COLOUR BRING YOUR LIFE

Dear customers,

We invite you to join us and immerse yourselves in the colourful world of the SCHOCK sink.

Come and get to know our new products and innovations. Find out about how sinks can be employed as food prep assistants, how good SCHOCK looks in grey and how we are growing our portfolio optimally.

As a sink pioneer with outstanding product innovations that revolutionize the market we are keen to demonstrate once more that change is our status quo.

Your management team

Sven-Michael Funck and Ralf Boberg

SERVICE

High-grade products need the right kind of love and attention. So we have put together all the right hints and tips for you. You can find the answers to your specific questions in our care videos and FAQs located in our online Care Center at www.schock.de/care

Practical - The SCHOCK spare parts shop

Looking for SCHOCK spare parts or care products? Browse our spare parts shop for complementary parts to go with our assortment of sinks and mixer taps. Order what you need online wherever it suits you best - from your computer at home or on the road with your smartphone or tablet.

Visit the spare parts shop at www.schock.de/en/shop

Movie material - The SCHOCK service videos

What special features does my SCHOCK product have? How do I install it right? And what tools will I need to use? Answers to all these questions can be found in the service videos from SCHOCK. The video clips present our products, spare parts and care products, provide you with technical information and supply installation instructions. All of the videos are available to view on our website and on the SCHOCK Germany YouTube channel.

Visit the Youtube channel [SCHOCK Germany](https://www.youtube.com/channel/SCHOCKGermany)

THE COMPANY

ABOUT US
 OUR CORPORATE IDENTITY
 SOCIAL RESPONSIBILITY

SCHOCK

VISION

ABOUT US We invented the quartz composite sink in 1979. And we've been constantly reinventing it and ourselves ever since. The result is more than 240 sink models in as many as 43 colours. We have more than 90 patents and 60% of sinks made around the world are produced on the basis of our methods. But there's one thing we kept to ourselves: the special combination of our products themselves - handmade in Germany - and our international trend scouting activities. We don't follow a strategy, we follow our intuition. And what that means for us in figures is: 50% growth, 25% global market share, 100% pioneering spirit. We know that the road ahead of us is long: It will continue to take us out of our comfort zone and thrust us headlong into the world of colour. With new and unseen ideas and good old, tried-and-trusted craftsmanship.

CHANGE IS OUR PERMANENT STATE Since our company's inception in 1924 we have only ever been satisfied when we're not yet satisfied. What we want is to set the standards to which the global market aspires and to keep testing them constantly. We want to be top dog and challenger all in one. That's because we think that moving with the times is not enough: it's better to be ahead of the curve. The machinery and materials we've used in doing this have changed time and again over the course of the last 90 years. But the tools have remained the same. These are: curiosity, dedication, courage, an international context and a passion for what we're doing - and what we still have scope to do in the future. This encompasses both international success and commitment to our local region. For instance by partnering with regional suppliers, schools and workshops for the disabled or by creating jobs and apprenticeships.

Headquarters, Regen

HANDMADE IN GERMANY

TRUST

SOCIAL RESPONSIBILITY We work according to standards that are anything but standard. That goes for our manufacturing of premium, environmentally sound sinks and recyclable packaging materials and likewise for our demands in terms of energy-efficient and environmentally friendly production. We have achieved raw materials efficiency of 90%, for instance, halved our water consumption since 2007 and made sure that we recycle 95% of the water we use. Certification through ISO 14001 and EMAS (the European Commission's certification scheme) serve to underline our desire for healthy growth. That is why we produce exclusively in Germany, as the only manufacturer of quartz composite sinks to do so. And yet we still like to think beyond boundaries - e.g. about school projects in Africa like Ohole Ambassadors. Because we want to make life not only that little more colourful but perhaps also that little bit easier.

SCHOCK

PRODUCT BENEFITS

SCHOCK sinks are up to 80% natural quartz sand. CRISTADUR® and CRISTALITE+® have been specially developed for the demands of the kitchen. The rigours of everyday use vanish with hardly a trace.

SCHOCK INVENTED THE quartz composite SINK

Even after more than 35 years, 60% of all quartz composite sinks made in the world today are manufactured using SCHOCK methods – that's 2 million quartz composite sinks a year.

SCHOCK PREMIUM DESIGN

SCHOCK's material technology enables the realisation of exceptional designs. Premium sinks from SCHOCK have won numerous design awards over the years.

SCHOCK MATERIAL TECHNOLOGY

Since the invention of the quartz composite sink, SCHOCK materials have been continually refined and set new standards. This innovative spirit is reflected in more than 90 patents.

PROHYGIENIC21 - THE HYGIENE STANDARD

The patented surface quality of CRISTALITE+ and CRISTADUR® ensure optimum safety when handling fresh food.

SCHOCK DIRT-REPELLENT EFFECT

The material's fine structure means dirt that could be a breeding ground for bacteria finds it impossible to stick to the surface.

Dirt-repellent effect

The dirt simply runs off.

Odour-free

Leaves the surface free of smells. LGA 5421357

Heat-proof

Not temperature sensitive. DIN 13310

Food-safe

Absolutely safe material. LGA 5631024

ProHygienic 21

Guaranteed, patented surface quality from SCHOCK.

Impact-resistant

Tough and resistant material. DIN EN438-2

Stain-resistant

Food stains cannot stick. LGA 1103

Made to last

Extremely durable. DIN 13310

CRISTADUR® EXTREME

Developing extremely hard-wearing materials demands extreme test methods. Like all SCHOCK products, the new CRISTADUR® EXTREME sinks naturally went through extensive internal and external testing. Heat resistance, impact resistance, durability and many more aspects had all been tested. Nevertheless, SCHOCK decided to conduct two more, very special endurance tests.

THE ICE-HOCKEY CHALLENGE

Achieving four times greater impact resistance in the bottom of the sink called for an impact load far in excess of anything tested under lab conditions. So SCHOCK called up the local ice hockey team, ERC Red Dragons Regen, and dared them to “bombard” and try to destroy the new CRISTADUR® EXTREME model, the Greenwich N-100. Having pucks forcefully shot at over 100 km/h against the bottom of the sink made this test a real challenge for SCHOCK’s new fibreglass technology.

See it for yourself:

www.schock.de/eishockey

THE OFF-ROAD SINK DERBY

The cross-linkage within the CRISTADUR® EXTREME material significantly reduces the risk of transport breakage for the heavy SCHOCK sinks, making it possible to develop smaller and more environmentally friendly packaging. Or even to do without packaging entirely? That was something SCHOCK was keen to know, so they arranged a sink derby: an old tank training track in the Bavarian Forest saw the sinks sent hurtling downhill, being “transported” without any packaging whatsoever.

See more here:

CRISTADUR® NATURE

For the production of the CRISTADUR® NATURE colours Kaiserstein and Rockenstein, SCHOCK employs a refined version of its manufacturing formula. An innovative crystalline quartz mixture is used to create the natural granite structure. And what's really special about it is that the quartz crystals are left completely uncoloured.

Granite in its rough, million year old, pristine colouring is an alluring sight and fits just perfectly into the trend of bringing regional materials back into contemporary kitchens. The colours Rockenstein and Kaiserstein show off the beauty of Bavarian granite. And CRISTADUR®

NATURE features a natural surface with the feel of real granite. Naturally, the surface still boasts the material's typical qualities, being food-safe, poreless and much more besides. The new natural colours are available with selected CRISTADUR® models.

THE ULTIMATE MATERIAL

SCHOCK is employing a revolutionary, patent pending method to produce the first sinks to be made of a carbon/quartz composite. Carbon is an integral part of technological progress. It's very strong and able to absorb a great deal of energy, making it the leading material of the 21st century. The new series of Carbon sinks with the N-100S and N-100 models enables those who acquire one to be part of the technological revolution and install something in their kitchen that is pretty much one of a kind. The material stands out even in an exclusive environment. Homeowners and their guests alike will love it - the ultimate sink for the exclusive kitchen.

FEATURES & NEWS

IN THE FAST LANE

Asphalt and Silverstone - two new names in the SCHOCK portfolio that speak for themselves. The two new shades of grey hold associations with high-powered vehicles speeding along scorching highways. The CRISTALITE®-colour Asphalt, just like the road surface that bears its name, lends itself well to becoming your constant companion - not on the motorway but in the busiest room of the house, the kitchen, where it is a perfect match for the elementary aesthetic of the contemporary kitchen.

The second shade of grey, Silverstone, is evocative of speed, sophisticated technology and a premiumness reflecting that of the high-grade material CRISTADUR® itself, whose colour repertoire it is now joining. These new colour themes see SCHOCK once more targeting the urban interior design trend and heading for life in the fast lane.

SILVERSTONE NEW

ASPHALT NEW

THAT PERFECT PARTNER LOOK

Finding a perfect match is not only important on an interpersonal level - styling accessories in matching materials is becoming increasingly imperative in the modern kitchen, too. In the quest for perfection, SCHOCK offers the possibility to install mixer taps with matching trim. Available with selected sink models, solid stainless steel taps can be teamed with an overflow, basket strainer

and control knob for the pop-up waste finished in the exact same material, bringing a touch of cool chic into the kitchen. Another highlight is the shimmering metallic black aesthetic of the Dion and Neilos designer taps in combination with a PVD-coated trim we call Gunmetal. These options enable us to craft a dangerously good alliance of materials and accessories in the sink unit.

NEW

WEMBLEY

CURVES ALL
ROUND

RADI(C)AL TREND

WEMBLEY

Swimming against the tide has always been one of our strengths. Which is why we are reinventing ourselves anew this year with another unusual sink design. The excitingly large radii in the sweeping lines of these models see us using curves to striking effect. You might even say that we managed to square the circle! The flowing forms of the Wembley D-100 and D-150 show off the silky-smooth CRISTADUR® surface to best effect in any one of the ten different colours available. With confident style, a premium wooden chopping board picks up on the soft lines of the new design. The new range offers total flexibility for all installation variants, being available for undermount, flush-mounted or inset installation in the worktop. Our latest innovation brings a unique look into the kitchen: instead of sharp corners we are showcasing unconventional radii with this sink, our design choices highlighting a new and curvy emphasis.

DRESSED BY SCHOCK

THE NEW SC-RANGE

CONFIDENTLY STYLISH

SCHOCK is like a perfect designer in many respects. The quartz composite sink's inventor is, after all, extraordinary, attention-grabbing and chic. Fashion design and architecture are not the only disciplines where different materials are teamed in confidently styled combinations. Our patented cladding technology enables us to ensure that the finish on the new SC- mixer tap range matches the many different colours of our sinks to perfection and allows us to create harmonious masterpieces within the contemporary kitchen setting. Offering five modern mixer taps in varying designs from simple to

professional and variable styles with fixed or pull-out spout, the inventor of the quartz composite sink demonstrates exceptionally good taste once more. Tone on tone with SCHOCK sinks, the SC-500 range is encased in solid CRISTADUR® or CRISTALITE® in as many as 28 different colours. Available in tapered sleeves, different sizes and a variety of spout shapes, the new SC range takes style into the heart of the kitchen, where it adapts to the room's design and creates an individual look.

THE JUNGLE TEST

MONO D-100XS

Welcome to the jungle – the kitchen jungle! If you're going to stay on top of the challenges in this environment you'll need functional support. The new Mono D-100XS was developed as the Tarzan of the kitchen, ready to lead Jane, a.k.a. the single-person or family household, out of the jungle. There is a range of smart accessories on offer: besides a perfectly sized rack that not only helps with drying the dishes but also serves as a place to put down hot pans, the new model also comes with an optional wooden chopping board. This can function as a traditional chopping board which can be placed flat on the sink and used to prepare fresh food. But

the practical, fold-out handles also turn the chopping board into a tray you can use to carry freshly made meals straight out of the jungle and onto the table – or as Tarzan might say, „me Mono D-100XS, you perfect dinner“. Available in three variants for inset, undermount and flush-mounted installation, the compact model integrates flexibly into a huge range of worktops. And with the tap ledge at the side rather than at the back, the sink can even be positioned in front of a window – Tarzan needs his freedom, after all.

PREPSTATION

A NEW KITCHEN DIMENSION

ADD MORE WOW! TO YOUR KITCHEN

GASTRONORM-SIZED MULTIFUNCTIONAL BOWL FOR USE IN THE STEAM COOKER OR FOR MORE CONVENIENT PREPARATION OF FRESH FOODS

PREMIUM-QUALITY WOODEN CHOPPING BOARD AS ADDITIONAL WORK SURFACE IN THE HUB OF THE KITCHEN

SPACE-MAXIMISING DRAINING BOARD FOR THE PREPARATION OF FRUIT, VEGETABLES, FISH OR MEAT

CONOS PRO MIXER TAP WITH ADDITIONAL PULL-OUT SIDE SPRAY FOR TWICE THE IMPACT OVER THE ENTIRE SINK AREA

LARGE BOWL FOR THE PREPARATION OF DELICATE FOODS

INTEGRATED RACK TAILORED TO HOLD GASTRONORM-SIZED STEAMER ACCESSORIES

SCHOCK takes the kitchen sink to a whole new level with this prep station. Representing a real revolution in the kitchen, the novel sink concept assists you throughout the entire process of food preparation,

right from step one, guaranteeing an uncompromisingly enjoyable cooking experience on a professional level in your home. The accessories turn the prep station into a full service provider in the hub of your kitchen. These

include steamer accessories tailored to fit perfectly and a wooden or plastic chopping board to rest on the draining board. The new model is reversible and suitable for inset, flush-mounted or undermount installation

in cabinets starting at 120 cm wide. Available in ten modern colours and built of CRISTADUR® material, it teams the widest possible choice of combination options with different high-grade surface materials.

FOOD-ENTHUSIAST THE PREPSTATION AS A SOUS-CHEF

Paying homage to good food and functional design, the prep station extends the work area of every kitchen virtuoso whose love of good food begins with its preparation. Many steps in the preparation and cooking process come together in the novel, Gastronorm-standard sink. For example, you can prepare legumes in the small basin and fresh fruit and vegetables, meat or fish on the adjacent draining board and work surface at the same time. While the small bowl is practically positioned to take the peelings, you can wash food in the large basin, where the tailored-to-fit steamer accessories will come in handy. The Cronos Pro mixer tap, which is similar to the mixer taps used in professional kitchens, extends your range of action. To get your ingredients ready for the cooking pot or the frying pan, you can chop or slice them directly on the integrated work surface or place the wooden or plastic chopping board on top. The prep station makes a real statement in a premium kitchen – form and function united in an innovative sink concept, turning cooking in good company into a true highlight.

MIXER MIXER
MIXER TAPS

HANDMADE IN GERMANY

SCHOCK

CRISTADUR® The SCHÖCK premium material is truly captivating with its extremely fine and smooth structure and lovely shimmering surface, which provides nowhere for grime to take hold - the dirt simply runs off. So it's not just the way they look but also how easy they are to clean that makes these models a luxury that becomes any kitchen.

SCHOCK

Delivery period Within one week if in stock.
We reserve the right to defer delivery in the event of production delays.

Minimum order value For orders with a net value of €50 or less, we shall impose a flat-rate shipping charge of €6.90.

Delivery Free delivery ex works (from Regen) within Germany for orders with a net value of €50 or more.

Warranty Sinks in CRISTALITE®/CRISTADUR®

2 years*, improper use voids the warranty.

Any installation of undermount sinks in countertops made of laminate/wood is at the customer's own risk.

Sink accessories:

2 years*, improper use voids the warranty.

Mixer taps:

2 years*, improper use voids the warranty.

Complaints Colours may vary due to the high proportion of natural raw materials used. This is not a fault and does not constitute cause for complaint. SCHOCK shall not pay the costs of any duplicate journey or installation if the customer fails to check the product and notify us of any defects with the period specified in the General Terms and Conditions of Supply and Payment.

In the event of breakage of one of our sinks, SCHOCK shall only deliver a replacement for free if the damage is notified to SCHOCK within 4 days of delivery and the sink is given back to the haulage company to take away. SCHOCK shall not be obliged to recover the product.

Recovery/return of goods SCHOCK shall pay the costs of recovering or returning the goods in the event of defective products or wrong deliveries only by prior arrangement and only if the goods are available for collection at all times after the date of complaint with a copy of the invoice or delivery note enclosed. Otherwise the customer shall be obliged to return the goods to the Regen plant at the customer's own expense.

If the goods cannot be taken upon collection, SCHOCK shall be entitled to invoice the costs incurred; at the same time payment of the invoice for the goods shall become due. Freight and shipping costs for the return of goods ordered in error or for any other reason not attributable to SCHOCK shall be paid by the purchaser.

For return deliveries not made under notices of defects or warranty claims, we are entitled to invoice the purchaser 30% of the value of the goods. This does not apply to failed or wrong deliveries occurring as a result of our own error.

Separate section on trademark rights: In the absence of any other written agreement between us and the purchaser, all goods purchased from us may only be marketed under the respective SCHOCK product name. This particularly applies in the event of products from SCHOCK GmbH being publicised by the purchaser or publicised within the scope of auctions, advertising or other offers.

*in accordance with SCHOCK's General Terms and Conditions as available at www.schock.de

This price list supersedes all earlier price lists and offers.
We reserve the right to make technical modifications.
Schock assumes no liability for misprints.
