Maths	<p>Girls, if you have access to a laptop, ipad or tablet you can use 'Hit the Button' to do your tables this week. Otherwise, you can do them with somebody at home. This is the link:</p> <p>https://www.topmarks.co.uk/maths-games/hit-the-button</p> <p>-Tables x2 & ÷2</p> <p>Today, we are going to begin 'Length'. You will need a ruler for measuring the length of lines.</p> <p>Remember: 1m=100cm, $\frac{1}{2}$ m=50cm, $\frac{1}{4}$ m=25cm, $\frac{3}{4}$ m =75cm, 1/5m=20cm, 2/5m=40cm, 3/5m =60cm, 4/5 m =80cm, 1/10m= 10cm, 2/10m=20cm.....</p> <p>-This youtube clip is a little re minder of how we measure lines</p> <p>https://www.youtube.com/watch?v=tuBLuIW1U70</p> <p>-BAM -pg 111 Qs 1 & 2</p> <p>-TT pg 63 Test 11</p> <p>-Master Your Maths (MYM) pg 39 (Wednesday)</p>

Unit 6

Lucky Finds

Amazingly, some of the most important historical and archaeological finds have been lucky accidents. Here are a few famous examples.

The Lost City of Pompeii

Pompeii was a beautiful city near Naples that was destroyed and buried when a volcano, Mount Vesuvius, erupted in AD 79. Over the centuries, people forgot about Pompeii. Then one day in 1748, a farmer, who was digging a well, discovered pieces of marble statues and other objects. A wealthy prince bought the land and started a huge excavation that is still going on to this day.

About three-quarters of the city is now uncovered. The people, houses and gardens of the ancient city of Pompeii are frozen in time. It is a giant outdoor museum where visitors can see what life was like in the time of the Roman Empire.

King Tutankhamun's Tomb

For many years, archaeologist Howard Carter had searched the deserts of Egypt for the missing tomb of the boy king Tutankhamun but without success. By 1922, his patron (the man who paid him), Lord Carnarvon, had decided to tell Carter to give up. However, Carter persuaded him to let him carry on the search for one more season. Amazingly, a few days later, he found some rock half-hidden in the sand. He cleared the sand and found that it was the first step of a flight of steps leading down to the walled-up entrance of a tomb! And what a tomb it was!

Carter had discovered the "find of the century" – the intact tomb of the pharaoh Tutankhamun. All the other tombs and pyramids of the pharaohs had been robbed long ago, but this tomb had been lost beneath the sand. It was packed with priceless treasures that can now be seen in the Egyptian Museum in Cairo.

The Rosetta Stone

The Ancient Egyptians used a strange writing system called hieroglyphics. When this system was first discovered, nobody could understand it. People only started to understand the system after the Rosetta Stone was accidentally discovered in 1799.

Soldiers from the army of Napoleon were knocking down a wall in the Egyptian town of Rosetta when they discovered a black rock with strange markings on it.

Little did they know that their find would finally crack the code of hieroglyphics, which had been puzzling people for more than 1,000 years.

The markings on the Rosetta Stone contained a message written in hieroglyphics, Demotic Egyptian and, most importantly, Greek. By reading the Greek, scientists could, at long last, 'read' the forgotten writing of the Ancient Egyptians! The Rosetta Stone can now be seen in the British Museum in London.

Question Time

A

1. What is so amazing about how some important historical and archaeological finds were discovered?
2. What city in Italy is Pompeii near?
3. What is the name of the volcano that destroyed Pompeii?
4. When did the volcano erupt?
5. In what year did a farmer discover the remains of Pompeii?
6. Who bought the land so as to begin an excavation?
7. How much of Pompeii is still hidden?
8. Look up the word 'excavation' and write it in a sentence to show its meaning.

B

1. Who was the archaeologist searching for King Tut's tomb?
2. King Tut is the short name for whom?
3. Who was the archaeologist's patron?
4. What did a patron do?
5. In what year did the patron decide to give up?
6. What did the archaeologist find in the sand?
7. What was the difference between Tutankhamun's tomb and the tombs and pyramids of the other pharaohs?
8. Where can you see the priceless treasures from Tutankhamun's tomb today?

Think and Talk

1. Who discovered the Rosetta Stone? Describe how its discovery was a lucky accident.
2. Imagine you were in a foreign land and you accidentally discovered some treasure. Talk about what you found and how you found it.
