ADVANCED CONTAINER HANDLING

Product Range

- **COLD-END LINES**
- **CONSULTANCY FOR DESIGN AND MANUFACTURE OF CONTAINERS SPECIAL HANDLING AUTOMATED SYSTEMS**
- **PALLETIZING/DEPALLETIZING CUSTOMIZED SYSTEMS**

Advanced Container Handling is a new start-up established thanks to its founder's passion for handling in all its different forms and types, from containers to everything that needs to be handled.

The company's mission is based on the introduction of a new concept for the construction of systems and solutions: the focal centre is the container, the real protagonist, which starts from this essential element and its shape, from the material of which it is made, its purpose, used by third parties, for the diffusion of a brand or for large distribution.

Advanced Container Handling aims to offer its customers solutions of functionality and quality, enhancing the Handling of the 'product', the result of an entire process, hard work, constant commitment, with cutting-edge technical solutions.

At the base of everything there is a very simple philosophy and analogy: the most important thing for the customer is the most important thing for ADvanced Container Handling, and this is the driving guideline for the creation of each and every project.

Thanks to this vision and in-the-field experience, ADvanced Container Handling starts from simple consultancy interaction concerning design, proceeding to the manufacture and integration of automated systems, granting high functionality within global project optimization to maximise benefits in all different areas.

Born from a passion, dedicated to create and improve solutions for container handling:

Agr International, Inc. offers a broad line of products and services specifically designed to help bottle manufacturers around the world produce high-quality containers while improving efficiencies, reducing costs and contributing to the responsible management of resources.

Whether the need is for specialized testing equipment to support the quality of production efforts; a certified, independent laboratory to supplement your testing program or the assistance of expert consultants to better manage container filling and packaging related problems, Agr has a range of products and services that are uniquely designed to fit the needs of glass bottle manufactures, as well as brand owners.

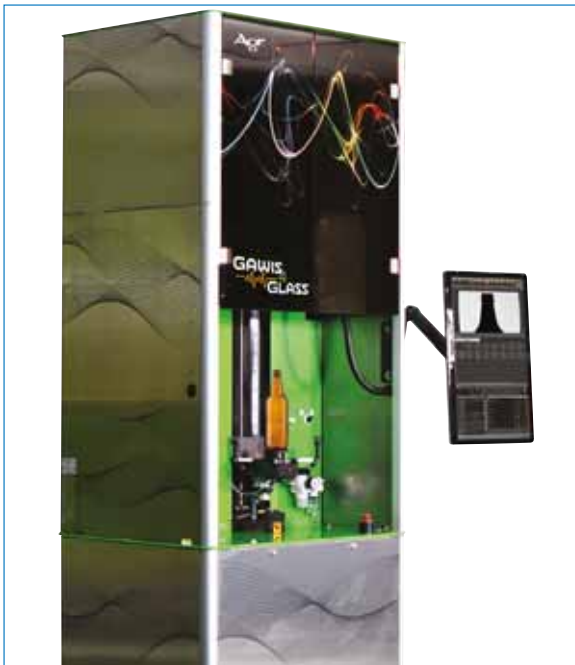

Agr's product offerings for the glass industry consist of a broad array of equipment for the production line and the laboratory, including on-line thickness management systems, automated gauging and sampling systems, as well as an extensive line of laboratory products for coating measurement, pressure testing, strength testing, volume measurement, and dimensional gauging.

Agr's American Glass Research division offers a host of specialized consulting, training, and analytical services for glass packaging. Experts from the American Glass Research division work with container manufacturers and fillers to lightweight and optimize containers, improve quality and productivity, as well as provide specialized testing services and training to industry personnel worldwide.

Agr International is a fully integrated supplier, from conceptual design to engineering, manufacturing, installation, training and support. Agr maintains worldwide operations with its headquarters in Butler, PA USA and satellite offices in Italy, Germany, Spain, Mexico, Thailand and China. Additional information can be found at www.agrintl.com.

Agr's Ramp Pressure Tester 3 is equipped with dual-bay, simultaneous pressurization increasing the speed of glass bottle testing, as well as a Linux-based, touchscreen operating system further enhancing the user experience.

Gawis4Glass, Agr's latest innovation in dimensional measurement, brings unmatched accuracy and repeatability into the glass lab. Featuring AutoJob, it can analyze and identify finish features in a matter of seconds—eliminating tedious and time-consuming job setup. The slick and intuitive user interface allows users to quickly access **Gawis4Glass'** powerful tools to make dimensional measurement quick, easy, and accurate. The system is also available with a robotic autofeed option to further enhance productivity and throughput.

ALL GLASS S.r.l. comes into being at the end of the 1990s in the heart of the Po' Valley and, on the strength of the know-how of its founders, the company has quickly specialized itself in the COLD-END sector, becoming an important national and international supplier to major producers of hollow glass.

Thanks to continuous requests from the market, All Glass has studied, designed and supplied a great deal of equipment that has been standardised and customised to make it increasingly effective and performing as per the end user's specific requirements.

All Glass places itself on the market as a unique interlocutor able to propose complete solutions, starting from the surface treatment of items on the tempering (hood) up to the palletising and also wrapping/thermal shrinking phases of finished products.

The company's strong focus on continuous improvement with a view to being a 360° active partner for its customers has allowed All Glass to complete its already wide range of equipment with the integration of AGV vehicles and Automated Warehouse systems, succeeding in offering increasingly innovative solutions for storage management and shipment of finished products.

A solid commercial partnership with companies which are leaders in the AGV and Automated Warehouse sectors, has allowed us to merge our respective know-how in order to guarantee advanced technology and customised solutions for our customers.

All Glass is able to offer proven professionalism and a high level of technical/commercial service in any country in the world where there is a need to innovate, build and implement major new projects.

To give strength to these important prerogatives, the company has recently inaugurated a new production unit – also located in the municipality of Traversetolo (PR) – which, with its approximately 23,000 square metres of surface area, further extends the company's production area to approximately 40,000 square metres of surface area used exclusively for the production, assembly and testing of equipment.

AMIG is OCMI and MT Forni's trademark for the supply of automatic and semi-automatic glass forming and processing machinery.

AMIG's trademark includes:

- **Pressing machines**

- Fully automatic rotary presses with pneumatic/hydraulic pressing mechanism, available for double gob processing for the production of small sized tumblers and cups, or for single gob processing for the production of medium/large sized articles such as beer mugs, plates, trays and other tableware articles.

Presses are available with a minimum of 6- up to a maximum of 16 stations and can be driven by Torque motor.

- Semi-automatic hydraulic presses.

- **Fire Polishers**

- Both linear and rotary fire polishers, equipped with gas/air or gas/oxygen fed polishing area.

- **Press-and-blow machines**

- PAS9 and PAS12 automatic, single turntable jug forming machines can be equipped with Geneva Wheel mechanism or Torque motor for table motion. Dedicated stations for mould temperature control and mould conditioning available as per customers' requests.

- **Glass block lines for standard and high capacity.**

- **High voltage insulator lines and plants.**

MT Forni Industriali and OCMI-OTG can perform turnkey projects from batch plants to final take-out for the production of different glassware articles: tableware, containers, stemware, jugs, lighting ware, electric insulators, glass blocks, etc. under the AMIG brand name.

CONTROLLED COMPANIES

BDF Servis doo

Based in Croatia, it focuses on IS installation, maintenance, overhauling and services.

BDF SUBSIDIARIES

BDF North America, Houston, Texas

BDF Industries is a manufacturer of technologically advanced machinery where performance and innovation melt together in an everlasting pursuit of excellence.

We design and build our complex machines with passion, giving safety and quality the highest priority while combining engineering skills with technological research. Our purpose is to go beyond standards and think «out of the box», to continue to satisfy our customers' needs in terms of performance and services. We offer the best plants and equipment solutions, serving various markets such as food & beverages, perfumery, cosmetics and pharmaceuticals. Plants are studied to ensure high performances and designed in accordance with customer specifications. From its headquarters in Italy, to its offices in Croatia and the USA, BDF Industries' worldwide presence has it working with clients in more than 80 countries, thanks to the company's ability to encounter any client's needs. All this makes BDF Industries a reliable and proactive business partner that is committed to respond to customers' requests.

IS FORMING MACHINES

BDF Industries' is able to provide a wide range of IS machines with a high level of **production flexibility**. From machines with **pneumatic handling** to **servo-assisted handling machines**, to **angular** or **parallel** mould openings/closures. The technical specifications available are:

SOLVING QUALITY PROBLEMS IN YOUR GLASS SINCE 1998

Since 1998, **Bohemi Chemicals** has been supplying hot- and cold-end coatings for glass bottles with a main focus on quality. If you encounter problems in the quality of your glass, such as scratches, white spots or blocked spraying system filters we can solve them as we have already done for many manufacturers all over the world.

HOT END COATING

STARTIN S

Monobutyl trichloride
Longer expiration date due to double stabilization.
Capable of closing the microfractures present in the glass.

**COLD END COATING
(High Quality)**

BOHEMI P4218 D

Polyethylene emulsion.
Recommended for beer and wine bottles.
Avoids the formation of residues in filters, pipes and solenoids.

**COLD END COATING
(Very High Quality)**

BOHEMI P1500

Copolymer and Waxes emulsion.
Suitable for precious bottles as liquor, champagne or returnable containers to be sterilized.

We supply nearly 100 customers all over the world in every continent.

All our products have food contact approval: Tuv Nord and Reach Certification. We offer free trials of all products to permit exhaustive test campaigns.

As the world's leader in equipment, services, and technology solutions, **Emhart Glass** continually sets new

standards for glass container production flexibility. Offering the widest array of products available, Emhart Glass is able to meet the requirements of glass-makers, regardless of their technology level, to become the solution provider for the glass container industry.

Forming Machines

As the inventor of the modern-day IS machine, Emhart Glass revolutionized the glass production process. Today the machine portfolio includes:

- IS 4 1/4" ☆ SG, 4 1/4" DG, 3" TG
- IS 5" ☆ SG, 5" DG, 85mm TG
- IS 5 1/2" ☆ SG, 5 1/2" DG
- IS 6 1/4" ☆ SG, 6 1/4" DG, 4 1/4" TG
- AIS 6 1/4" ☆ 6 1/4" DG, 4 1/4" TG
- NIS 5" ☆ 5" TG, 95mm QG, 6 1/4" DG

Glass Conditioning and Gob Forming

From the advanced design of the servo feeders to plungers, gob distributors, and shears, Emhart Glass offers a full range of glass conditioning and gob forming equipment incorporating the latest technologies.

Control Technology

Controls from Emhart Glass are at the heart of the forming machine, which direct the key processes – ranging from conditioning the molten glass, to the seamless integration of complex mechanisms in the glass production process. Today, the FlexIS Process Control System is the primary control system for the forming machine, and will be the foundation for advanced process feedback and automation systems.

Ware Handling

Emhart Glass products include a complete line of servo-electric mechanisms that include take-out, the FlexPusher, Ware Transfers, Conveyors and Flex Stackers.

Inspection Systems

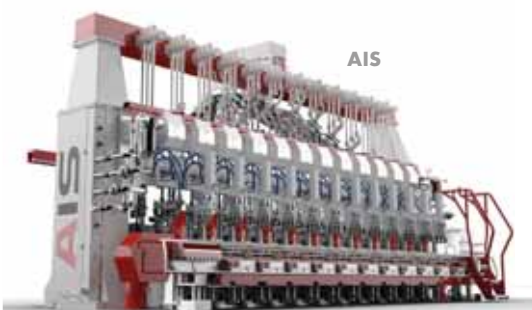

Emhart Glass provides quality assurance solutions designed to meet almost any inspection requirement. The Emhart Glass "total choice" portfolio includes the FlexInspect family, consisting of the most precise mechanical and vision inspection machines, as well as high-precision on-line statistical sampling systems.

Hot End and Cold End Technical Services

As the technology leader and solution provider in the glass container industry for more than 100 years, Emhart Glass is able to offer a comprehensive portfolio of customer service, training, customer process support and project management.

The training center in Sundsvall, Sweden, offers modern and up-to-date theoretical and practical training on all Emhart Glass hot-end equipment. In addition to the training center in Sundsvall, Emhart Glass established a training center in Windsor CT, USA.

For the cold end, Emhart Glass has a Technical Competency Center in Munich, and in Leipzig, Germany, which serve as the central training, service and demonstration facilities.

- **WATER-COOLING SYSTEMS FOR ELECTRODE HOLDERS**
- **ELECTRODE HOLDER FOR BOTTOM / SIDE / TOP**
- **POWER REGULATION / TRANSFORMERS**
- **SERVICE IN HOT-DRILLING AND CHANGE OF ELECTRODE HOLDERS**

Bock Energietechnik was founded in 1984 by graduate engineer Werner Bock.

Since 2016, Mr. Günther Bock, son of the founder, together with the support of his wife Diana, has been managing the company.

AREAS OF ACTIVITY

The objective of the company is the efficient utilization of electric energy in the glass industry.

Bock designs, manufactures and installs electrical heating systems for a variety of applications in the glass industry.

Forty years of experience in the area is helpful and, in fact, the company has carried out numerous installations to the complete satisfaction of clients.

Electrical heating systems for the glass industry.

Physical and mathematical modelling with representation of electric power density in molten glass.

- Electric additional heating systems (boosting facilities), complete installations from planning to commissioning
- Transformers and thyristors with corresponding adjustment controls
- Electrode supports with accessory installation equipment for bottom-, side- and top electrodes
- Cooling equipment for electrodes
- Forehearth heating
- Feeder bowl (spout) heating
- Glass level measurement with established principle - in high-tech measurement processes
- Special furnaces – according to customer specifications
- Service in hot-drilling and change of electrode holders

PLANNED EXHIBITIONS 2023

GLASSMAN EUROPE
Istanbul, Turkey - 8/9 February
SCHWEISSEN & SCHNEIDEN
Essen, Germany - 11/15 September

Numerical controlled automation is being introduced to glass mould production by Italian welding equipment supplier **Commersald Impianti**. This task remained dependent on the manual application of spray-fused canisters and powder products long after other aspects of the manufacturing process had been automated. Commersald Engineering believes that its Robo series of workstations can perform all the necessary functions of manufacturing and repairing moulds and other glassmaking accessories. The welding equipment, complete with torches and power supplies compatible with various movements, designed and manufactured entirely by Commersald Engineering, can be selected according to needs. It is available in various configurations and with power ranging from 200-400A.

All these work centres are managed by numerical control (NC), with dedicated software for both management of movements and for welding parameters. Programming meets the ISO standard, the same as normal NC machines for removing shavings.

The plants have the following characteristics:

- a torch with a copper tapering nozzle able to work in 200A continuous cycle on moulds and accessories of all dimensions for the glass industry, with constant penetration on the whole profile;
- 80kg max surfacing moulds, with pre-heating of pieces at temperatures up to 300°C for cast iron moulds and 400°C for bronze moulds;
- 20mm-thick metal structure, arc welded, quench and tempered steel with machined locator tables;
- programming simplified by the use of icons and windows.

All this equipment can be accessorized with Commersald Engineering

Induction Heating Units **HEAT 6-25** Kw for correct, fast, precise and economic pre-heating of the pieces.

Commersald Group's KOY trademark is one of the most complete, well-known and used lines of welding materials and **PTA powders**, in particular in Europe. The quality sales system of the group's welding consumables has been certified EN-ISO 9001:08 as a further warranty of excellence of its products. Commersald Group's range of PTA powders includes specific Ni/Co/Fe grades for the glass industry with different hardness and with specific features for cast iron, bronze or steel moulds.

Commersald is proud to be a leading European supplier of **Plasma Transferred Arc** equipment while focusing on developing new products and improving its machinery in each and every aspect. It also places emphasis on the assistance it provides, often external, for customers. This includes customizing machines for their specific requirements.

Since 1965 **CAR-MET** has been working in the glass industry supplying technological machinery. During these years CAR-MET has gained experience, knowledge and enhancements in glass production thanks to its skilled personnel. The company's internal workforce is dedicated to the engineering and manufacture of machinery such as:

- Annealing lehrs for containers and special glasses
- Decorating lehrs
- Lehrs with double belts
- Toughening lines on belt and spindle
- Mould preheating ovens
- Cross conveyors
- Stackers with two and three axes
- Brushes for all lehr types
- Hot glass scrapers
- Lehrs for special purposes

All machinery is manufactured entirely at CAR-MET's premises, in the north-east of Italy. Our services for clients include the pre-testing and inspection of machinery before delivery.

Annealing and decorating lehrs are among the best known products of the company; research and development is the guarantee that our technology is continuously evolving.

Gas or electrical heated lehrs are manufactured by means of modular

design. The burners installed on the lehrs are patented by CAR-MET, adapted to almost any type of gas. Size and configuration of each lehr is based on the space available for the installation and type of production. Heating and cooling systems installed have been developed in accordance with European energy-saving regulations; which reduce operating costs in energy consumptions.

Attention to the environment is not only the reduction of energy consumption but also controlled emissions of exhaust fumes. A new technology of heat exchangers and radiant tubes has been developed, manufactured and installed by CAR-MET to the satisfaction of clients. This indirect heating technology is widely used in decorating processes to ensure the best results in final product quality.

EME is a world-leading batch and cullet treatment systems specialist. After more than a century of improving batch plants using tailored solutions and the best technology available, we are a customer-centric partner dedicated to designing, constructing and improving

batch and cullet plants using the best technology available. Since 1987 EME has been an integral part of the wider SORG Group.

Technology

EME has the perfect solution for glass-makers looking to use state-of-the-art technologies in their process – from batch plants, cullet handling and batch charging to machinery, special applications and automation.

Services

We deliver tailored processes and technologies, upgrade batch plants and supply comprehensive and straightforward software to allow our partners to have a competitive advantage and produce the best batch globally.

Lifetime Support

To keep batch plants efficient and reduce maintenance requirements EME offers its customers lifetime support, including technical assistance, parts, training, audits, condition monitoring and performance optimisation.

Sustainability

Having designed, commissioned and supported some 250 glass production facilities across the world, we are committed to delivering batch plants that perform and endure like no other.

Innovation

For over a century we have thrived by creating pioneering technologies and innovations in the design and engineering of batch preparation plants, cullet handling equipment and batch charging technology.

THINKING ABOUT UPGRADING YOUR BATCH PLANT? SPEAK TO US FIRST

If you're considering upgrading, modernising or replacing your batch plant, speak to us first.

We work closely with customers to get a clear understanding of expectations and requirements when developing and implementing our sustainable engineering solutions. A big part of the process is a detailed audit of your equipment and processes, which forms the basis of the initial options.

The audit, consulting and technical support facilities give us access to the latest technology and allow us the flexibility we need to create the best solutions for you.

ECOBASIC P
ECOAC ID P**

**ULTRASOUNDS VERSUS
SANDBLASTING**

1,800,000 bottles

800,000 bottles

Ultrasonic cavitation

(molecular blasting) results in:

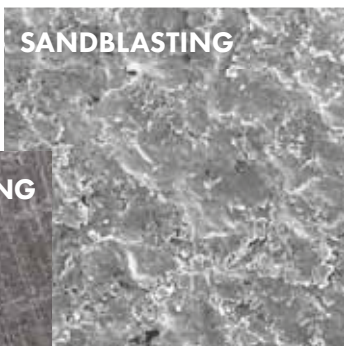

- more than twice as long mould life;
- high maintenance care;
- saving of mould edges;
- open and protected vent holes;
- saving glass because of the unchanged dimensions of the mould cavity.

Differences between sandblasting and ultrasonic cleaning (300x - 80 µm).

ULTRASONIC CLEANING

SANDBLASTING

Ecotecne, located in Galliera Veneta, Italy, is a leading manufacturer of ultrasonic cleaning equipment.

The company has released a new line of solid chemicals to foster the ultrasonic action of its system for the cleaning of moulds used in the hollow glass industry. The new chemicals – Ecobasic and Ecoacid – continue Ecotecne's tradition of integrating the latest technologies into its high-quality, easy-to-use plants. The chemicals have been developed in-house with the assistance of regional universities and with the collaboration and technical expertise of a private laboratory specialized in formulating new chemicals for current industrial use.

The new chemicals now feature:

- powder form = products are added on site into the cleaning tanks and no longer transported and manipulated in liquid form;
- low concentration = 8-9%;
- increased chemical efficiency;
- less volume, which also means minimum storage, reduced transportation costs, reduced ecological impact, reduced transportation risks – solid compared to liquid form.

Products are supplied with instructions and can be easily managed by any operator without additional precautionary measures, unlike those normally in usage.

Ecotecne's team has, moreover, during the past two years, reviewed and innovated all parts of its patented machinery and its ultrasound generators are now more powerful and multi-frequency, and can provide surplus energy whenever needed to achieve in-depth cleaning of particularly dirty items.

Transducers have been redesigned and upgraded in order to support and

transmit maximum power efficiently, while the cleaning cycle has also been revised. In this way, Ecotecne can now offer the same quality of service and cleaning effect with different system sizes, ranging from the manual single-tank ECO1 to the more sophisticated, fully automated seven-tank ECO7.

EMS Next Generation Factory

EMS AGVs

Our Mission - Turning customer needs into value

Leading our customers towards success, thanks to the cross-platform know-how obtained from the merger of five companies that can meet all your needs; from handling to palletizing, storage of goods and materials. Offering cutting-edge, sustainable solutions tailored to our customers, through ongoing research and technology renewal.

A One-Stop Shop approach

It means being able to count on a single partner capable of providing systems and services that can manage the entire production process. Not having to coordinate several suppliers means saving time, energy and costs, allowing you to enhance your product, step by step.

EMS Group – Your unique partner

The result of the One-Stop Shop approach is the Next Generation Factory: a fully integrated organizational and production model, digitized and aimed at value creation. Upstream and downstream of the process, our solutions interface with production and inspection machinery, without any interference while enabling maximum reduction in cross-over time. Our systems and the digital infrastructure that governs the production plant are fully integrated with the customer's management software. The customer can enjoy peace of mind, with a turnkey plant that is designed and built to transform ideas into reliable and distinctive solutions.

EMS ROBO-PAL

One group, 5 companies, 200 years of history. Innovation, know-how, expertise, efficiency.

EMS Group was established in 2018 from the merger of **EMMETI**, **MECTRA**, **SIPAC** and **LOGIK**, four leading companies specialized in the design and production of complete **palletizing, depalletizing, packaging and handling lines** for the food, beverage, glass and can-making industries. With the acquisition of **ZECCHETTI** in November 2019, EMS Group

consolidated its **leadership** in the **hollow glass** handling industry.

Glass Containers Division - Complete range of cold-end solutions

- Palletizers for bottles and jars
- Case/crate packers
- Robotic palletizers
- Tray formers
- AGVs & Shuttle trolleys
- Automated warehousing
- Pallet dressing lines
- Robotic labellers
- Automatic pallet control systems
- Accumulation tables
- Lehr de-stackers
- Camera orientators for non-round containers
- Rubber slat elevators, lowerators and over-turners
- Mechanisms designed for the handling of oddly shaped containers.

PLANT AREA

13,000 sq.m.

COMPANY FOUNDED

1983

Euromatic, located in Treviso (Italy), was founded in 1983 and is, today, a solid and well-organized group with facilities of over 13,000 square meters and 150 employees operating in technical, sales and administrative departments, all of whom are intensely loyal to the company, a result of the low personnel turnover.

Highly qualified design staff with significant expertise can guarantee the best synergy between mechanics and electronics for top level equipment efficiency and production quality.

Euromatic customers are market leaders in the field of glass primary packaging for the pharmaceutical sector; Euromatic equipment is commissioned all over the world in the best glass converting companies.

A strongly innovative approach, along with consolidated experience and commitment to quality, have been the impetuses for an increase in demand from international markets. It is also the true motivation behind customer loyalty that has made Euromatic a leader in its field.

MISSION

Euromatic is focused on designing and creating complete production units for converting glass tubes into containers for the pharmaceutical industry. The critical approach manifests itself in a driving force that refuses to be satisfied with past achievements.

ENGINEERING SOLUTIONS

Euromatic is a worldwide-known company in the production process of glass conversion.

The company's engineering and R&D teams are dedicated to developing technological state-of-the-art solutions to convert glass tube into vials, cartridges, syringes and ampoules.

The complete project cycle is developed and directly handled in-house by highly-specialized human resources.

PRODUCT PORTFOLIO

Euromatic's portfolio of products reflects the company's strong focus on glass conversion machines for the pharmaceutical industry. It covers the complete range of pharmaceutical products from vial, cartridges, syringes and ampoules:

- **Tube-loaders**
- **Forming machines**
 - for vials:
 - Zeta 098
 - Zeta 16 - 10
 - Zeta 18 - 10
 - Zeta 20 - 12
 - for cartridges:
 - Kappa 36 - 30
 - Kappa 16 - 10
 - Kappa 18 - 10
 - for syringes:
 - Sigma 22 - 18
 - and for ampoules:
 - Tau36
- **After-forming processing lines**
- **Annealing lehrs**
- **Automatic packing machines**

Our commitment to pharmaceuticals has enabled us to develop and supply "ready for filling" systems, for container preparation, including sterilization, approaching the "white area", offering the following units for syringes, cartridges and vials:

- **Washing machines**
- **Siliconization units**
- **Nest & tub units**

PLATINUM FEEDER TECHNOLOGY

Eglass, a famous Platinum feeder system manufacturer, has signed an agreement with Famor for the sales and service of DHPS® Direct Platinum Feeder Systems. Famor will sell and support glassworks producing fine tableware as well as high quality technical glass producers.

Together with forming lines, Famor is in a position to serve the glassworks with complete solutions, installing lines and providing production start-up. Eglass designs and engineers every solution in close partnership with Famor, which manufactures DHPS® systems in-house.

Famor Engineering, established 1977, is known for its intensive technical support to glassworks. Famor develops and provides machines, handling systems and feeders especially for the hot forming area of the hollow glass manufacturing process. Since its beginning, Famor has been specialized in prototyping and overhauling of glass forming machines, still carried out at present, thus contributing to industrial sustainability and providing cost efficiency for numerous glassworks. Famor's in-house machine shop guarantees precision in both parts manufacturing and fast deliveries.

TOOLS, EQUIPMENT & ACCESSORIES

Famor manufactures and sells Putsch-Meniconi brand glass tools. The well-known tools and shear blades of Putsch-Meniconi are now part of the FAM product range, represented by Famor's sales team. The portfolio also covers gathering robots, burners and moulds. The parts and tools warehouse has been transferred to Famor premises at Rivalta-Torino.

After development and tests, FAM BURNERS offers a large selection of Gas/Oxygen burners for different uses in glass production.

Fermac's story begins in 1993,

created by a staff that has been in the hollow glass decoration sector for many years.

Today, with customers in 40 countries, the range of machinery includes not only screen printing machines, from small semi-automatic to the most sophisticated CNC electronics, but also the evolution of digital printing that cover that ever growing market segment of customizations on items of complicated shape.

The activity is not limited only to the production of machinery, but also extends to all the accessories necessary for the completion of decoration lines, as well as consultancy

for the creation of lay-outs and turnkey projects.

In addition to all this, the company can also offer training courses on glass decoration, thanks to the owned companies that decorate on glass.

**• CAST IRON AND ALLOYS
FOR MOULDS**

Fima Olimpia Fonderie is located in Tuscany, a few kilometers from San Gimignano (SI).

It is a foundry producing castings in special cast iron for glass moulds. Thanks to highly technological production facilities and advanced control instruments, the company offers the market high quality products at competitive prices.

The company's logistic and technical organization enables Fima Olimpia to provide fast solutions in productive terms, as well as in customer service.

Fima Olimpia Fonderie is a custom-

er-oriented company which has client needs as its priority - from small to larger companies.

The company concentrates on research and development in order to offer the highest quality products and has had ISO 9001 certification since 1997.

Fima Olimpia Fonderie employs over 50 people and offers its clients:

- more than 50 years of foundry experience
- all the new technologies in terms of design and production of moulds
- new plants in order to have the maximum productive capacity
- 14 different kinds of special cast iron that enable to satisfy all customer needs
- a modern analysis laboratory that gives us the capacity to monitor production constantly
- high speed deliveries within 7 days from the date of the order to all European countries
- competitive prices on international markets.

Environment Resources

Territory protection is a matter of sustainable development and environment conservation is one of our priority. The new photovoltaic solar system is one of the last investments done in full support of "green" production.

COMPANY FOUNDED

1956

Fluorital is a dynamic, family owned and run company with its main plant located in Italy near Venice.

With more than 30 years of experience in the research and production of organic paints and silk-screen inks for glass decoration, Fluorital produces different types of spray paints, roller varnishes, and screen printing inks: UV-curable and solvent-based inks. The application fields of its products include perfume and cosmetic packaging, wine and spirit bottles, tableware, flat glass for furniture and interiors, and lighting glass.

All products are lead- and heavy metal free, and can be applied directly onto glass, as they do not require any primer.

All products are curable at low temperature or, when specified, with UV lamps, enabling important energy savings compared with other products.

The physical and mechanical resistance of Fluorital's products to the most severe tests required in the different mar-

ket fields makes them the top reference on the market.

Fluorital invests considerable resources in Research and in its laboratories; beside the continuous update of more consolidated products, research is aimed at developing new finishings and products with even more efficient resistance, and environmentally friendly characteristics.

Currently, as an alternative to vacuum metallization, Fluorital is introducing a simple, low temperature spray metallization process that can be run on most standard decoration lines.

Fluorital supplies top quality products to colour your imagination.

Fonderie Bartalesi was founded in 1962 and is one of the main manufacturers of bronze alloys for moulds for the production of glass bottles and jars.

The company concentrates on research and development in order to offer the highest quality products on the worldwide market, and has ISO 9001 certification.

Fonderie Bartalesi can offer its customers:

- more than 40 years' experience in the glass market;
- new plants and machines to improve production and decrease delivery times;
- more than five cast tons per day of bronze alloys for the glass industry;
- specialized production of bronze neck rings with and without Ni-insert;
- three induction furnaces;
- seven different types of bronze alloys for the glass industry;
- catalogues of standard models of bottom plates, baffles and neck rings;
- dimensional tests, chemical analysis, hardness tests and metallographies;
- new machine and high tech programme to produce new toolings, in order to improve casting precision and to decrease delivery times;
- very fast deliveries of 7/10 days from order date to all European countries;
- special bronze alloy studied and tested for mould production, with very good thermal conductivity, hardness, mould cleaning, easy weldability.

- Investments in research and development of new alloys for mould production.
- New alloy B02 S1, the best for bronze moulds: more than 2 mln. bottles.
- Fonderie Bartalesi has also installed an electric furnace for thermal treatment testing on bronze moulds.

More than 60 years serving glass making!

Since 1961, **Fonderie Valdelsane** has continued to strengthen its specialization in research, production and services for the worldwide hollow glass sector.

The company's experience has led it to constantly improve the ability to understand the needs and demands of the market.

Fonderie Valdelsane was a pioneer in the development of innovative materials for glass industries, with alloys that have become real references - such as **K250** - for mould production all over the

world, and the company is still holding its leadership position through continuous investments in research, human resources and technologies.

Fonderie Valdelsane materials mean **efficiency, time** and **cost-reduction** for both mould makers and glassworks. However, the progress of the company does not regard only the quality of cast irons and copper alloys, but also the services reserved to its partners, entirely customized as per their individual needs.

What Fonderie Valdelsane offers:

- 100% production for the **glass sector only**;
- Catalogue of standard materials including **18 types of cast irons** and **5 types of specific copper alloys** for glassmaking moulds, neckrings and accessories;
- Repeatability of casting quality, thanks to fully automated facilities;
- Daily production capacity: **80 tons for cast iron** and **10 tons for bronze**;
- ISO 9001, ISO 14001 and EMAS certification for the whole supply chain, including production, service and respect for the environment;

- **Multiannual Investment Plan for bronze casting**: production of copper alloys has been developed for years, gaining great appreciation from the glassworks. Constantly increasing demand led Fonderie Valdelsane to continue its long-term investment programme and even to expand it.
- Competitive prices;
- **Fast delivery**: up to 5 working days from order;
- Shipment to final destination, thanks to a fleet of 5 trucks and strong partnerships with reliable freight forwarders for out-of-EU deliveries;
- **Internationally registered trademarks** for K250 alloys and traceability of each mould set, with official certificates;
- In-house UE certified laboratory;
- Internal design department, equipped with CAD/CAM programs and CNC machines;
- Accurate control systems for chemical and physical conformity;
- Enthusiastic and proactive approach facing any new challenge.

AREAS OF ACTIVITY

For more than five decades now, the South German firm **futronic** has been developing innovative and reliable controls and drives for container glass machines and equipment.

Distributed Control System – Full Control

The **FMT24S** (Flexible Modular Timing System) is a distributed control system for IS machines with up to 24 sections. Thanks to its modern, low-maintenance bus technology, the system is fully scalable. Maximum flexibility – essential for efficient production – and high investment security are guaranteed. The FMT24S integrates easily into a manufacturer's existing IT and data structures.

Servo Drive Technology – Synchronous Precision

futronic's servo control and drive systems provide maximum precision whenever individual motion sequences have to be synchronised in the machines. Thanks to the **FDU24S** (Flexible Drive Unit), all servo mechanisms in the feeder, shear or gob distributor can now be parametrised and monitored using a single, central control. The **PDU24S** (Pusher Drive Unit) is designed to control and drive almost any standard type of single or two-axis pusher. It ships with several innovative functions, for example an additional hold position can be configured in order to extend the bottom air (punt) cooling time. The **STO24S** (Servo Take-Out) is a control system for almost any established servo take-out mechanism. The system features include additional parameters that allow the machine operator to determine the set-down position more flexibly and more precisely than is possible using conventional controls. The **SIU24S** (Servo Invert Unit) is compatible with almost any servo invert mechanism established in the market today. Its HMI allows the acceleration and deceleration of the swivel motion to be preset individually and accurately when an article is transferred from the blank mould to the blow mould. The SIU24S moreover permits ultra-fast revert motions, so that very short cycle times are possible.

Vacuum Control System – Zero Defect Quality

The **VCS** (Vacuum Control System) is an inexpensive reject system that enables manufacturing problems occurring at individual sections during the vacuum process to be detected at an early stage. Overpressed blow mould seams – referred to as bird swing or bird cage – caused by glass chips between the mould halves as well as leaks in the vacuum process are just two examples here. Sensors measure the vacuum in the article; if it deviates from the setpoint, the reject unit immediately removes the faulty glass container and an alarm appears prompting the operator to identify and clear the problem. The VCS makes a significant contribution to reducing the error rate – and to improving the quality of both the products themselves and the production process.

Tableware – Dual Control and Drive Solutions

The futronic portfolio also includes automation solutions for the tableware segment. The **FBC** (futronic Blow machine Control system) is a motion control system which combines the control and the synchronous drive for rotary blowing machines with up to 32 sections. The FBC meets the complete requirements profile from the feeder through the glass moulding equipment to the conveyor for the finished product. The **FPC** (futronic Press machine Control system) is a modular control and drive system for rotating press machines with up to 20 sections or 32 double gobs. The technology for these control systems is based on the Siemens SIMOTION platform.

Glass Service is the preferred choice of customers seeking innovative and customized glass furnace solutions, meticulously designed, built, and installed by engineers with extensive expertise in the global glass industry.

Founded in 1994 through the merger of two companies, each boasting more than 20 years of experience, Glass Service initially served the world-renowned glass companies of Murano and Venice before swiftly expanding its operations throughout Italy and across the globe.

What sets Glass Service apart is its comprehensive and unique approach to glass melting technology. They take into account the entire supply chain during the design process, ensuring longevity and optimal performance for all their products. As a one-stop shop, they offer a range of in-house services, including financing, raw material analysis, glass defect analysis and troubleshooting, furnace and equipment installation, furnace pre-heating, and start-up, all adhering to stringent ISO9001 and ISO45001 safety standards.

As a team of dedicated engineers, Glass Service brings decades of experience, agility, manufacturing capabilities, and a profound passion for every project they undertake, whether it's a single product manufacturing or a turn-key plant. They work closely with their customers, providing extensive staff training, dedicated customer support,

and comprehensive after-sales assistance.

Glass Service's commitment to excellence, combined with their deep industry knowledge, makes them the ideal partner for customers in the glass industry who seek cutting-edge solutions and unwavering support at every stage of their projects.

At its location in Plößberg, Germany, **HORN Glass Industries AG** designs and makes glass melting technology and turnkey projects for the float and container glass industries. The company's high-performance glass melting furnaces and turnkey projects are installed at glass manufacturers all over the world and serve the production of beverage bottles, food containers, drinking glasses, glass panes, glass tubes, glass fibres and special glass.

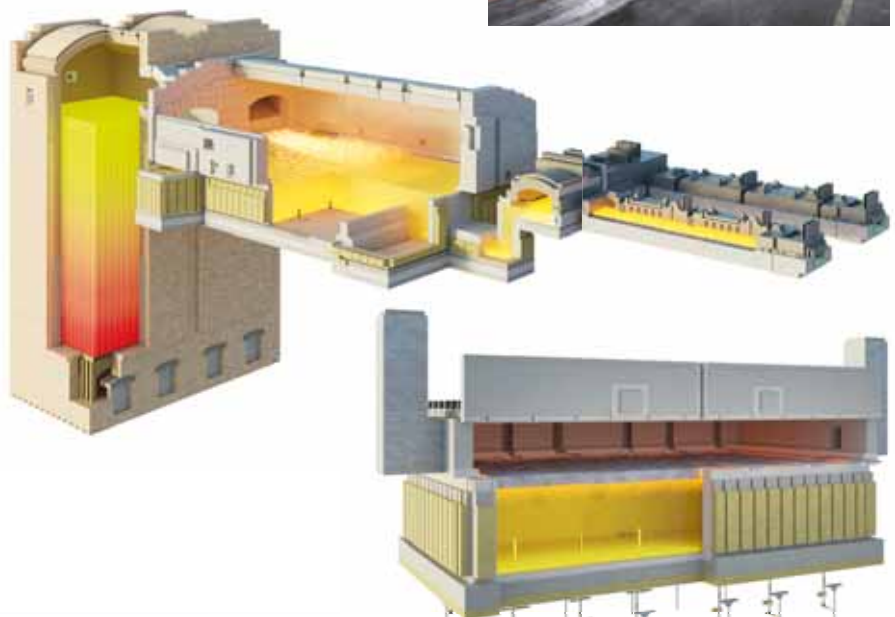

With more than 135 years of experience, HORN has been the specialist and expert in the field of the construction of glass melting furnaces for many years, and is now one of the industry leaders in the implementation of turnkey projects.

Subsidiary companies in China, Malaysia, India, Croatia, Brazil, Ukraine and the Czech Republic add value to global customers, offering proximity and prompt response in the global market. Almost 90% of HORN's products are exported from Plößberg in Upper Palatinate to more than 75 countries worldwide.

HORN offers its customers complete support and a helping hand at all times. HORN can offer tailor-made solutions because we have a very high level of vertical integration for all our products.

HORN has ventured into unknown areas, e.g. in the construction of its own tin baths and associated equipment. HORN manufactures a large number of products in its workshops in Plößberg:

- Glass melting furnaces (container glass, float glass, etc.)
- Tin baths
- Batch chargers
- Stirrers
- Gas, oil and heavy oil heating for melting furnaces
- Tin bath equipment such as top roller, pusher, flags, fences
- Tweel
- Dross boxes
- Shield gas supply stations

ADVANCED LEVEL OF ELECTRIC BOOSTING

As an innovative technological leader in the global glass industry, we have a crucial responsibility towards the future of our planet. Therefore an environmentally friendly platform for electric boosting is available: E-Fusion – HORN Power Boosting.

HORN's answer to the future way of glass melting focuses on our environment by creating a new boosting world which takes electric boosting to a whole new level. HORN has bundled its forces to use sustainable energy in order to reach less CO₂ emissions. Our specialists and comprehensive service package ensure a highly efficient performance of the plant over the entire life cycle.

A futuristic glass hand holding a glowing rod against a background of renewable energy. The background features a blue sky with white clouds, a wind turbine, and solar panels. The glass hand is transparent and holds a black rod with a glowing yellow and red tip. The overall scene is set against a blue background with water splashes and a lightning bolt striking the solar panels.

EVOLUTION inspection machines,
 EVOLUTION NEO AI – intelligent inspection
 machines

PLANNED EXHIBITIONS 2023

Glasspex India

Mumbai, India - 14/16 September

Glassman Asia

Seoul, South Korea - 20/21 September

AFGM

Khanh Hoa, Vietnam - 25/29 September

Product Range

- **SIDEWALL • SIDEWALL STRESS**
- **BASE • BASE STRESS • FINISH**
- **MOULD READERS • MULTI-ARTICLES**

In excess of six man-years of work by R&D engineers at **IRIS Inspection machines** led to the introduction of the Evolution NEO AI machine, delivering an innovative defect approach that relates to defect identification, as well as the creation of statistics by defect type. Local trend analyses are produced on the machine, with information presented in a user-friendly for-

mat. Importantly, reduced dependence on human intervention was a key goal for this strategic initiative, which brings the smart factory much closer to reality.

Advanced inspection intelligence

Evolution NEO AI is engineered to meet the distinct needs of the glass container inspection market, helping customers to improve performance and save valuable time during the manufacturing process. In particular, the introduction of advanced inspection intelligence is high on the list of benefits that have been widely valued by glass plant personnel in the first few months of machine operation.

NEO Intelligence is a machine learning-based software, incorporating the latest, well-proven technologies applied to inspection. Performance is enhanced via the power of artificial intelligence and already 'smart' features have been made even more accurate via the inclusion of an Image Processing Accelerator (IPA). As a result, Evolution NEO AI machines can now recognise and more accurately detect critical defects, without having to set advanced settings manually.

Reduced dependence on human skills

The introduction of greater automation has reduced the inspection equipment's dependence on human skills, another factor that has already been widely appreciated by customers. This AI-powered machine is able to recognise a defect, leaving the operator to decide whether it is acceptable or not. Furthermore, the specially conceived

interface design is responsible for the delivery of a better user experience.

Traditionally, every time a production change is initiated, it has been necessary for the operator to adjust all parameters for the new article, set the inspection zones etc. With Evolution NEO AI, a library of settings is available for faster, precise and repeatable adjustments. The Evolution NEO AI machine recognises the article, its exact shape and automatically draws the inspection zone. Consequently, each job change is simplified for the operator. This reduces the possibility of human errors significantly.

IRIS complete range is named Evolution because the modular structure and Artificial Intelligence enabled features evolve through time and never become obsolete.

All existing IRIS machines can be upgraded with software and hardware innovations developed by in-house experts.

IRIS customers benefit from cutting-edge inspection technology during the whole lifetime of their Evolution machines.

4 plants in Italy

Our aim is to manufacture state-of-art refractories coupled with the best possible service; this means a continuous, demanding programme of improvements to meet rising expectations.

Linco Baxo production is located in Italy in four modern integrated plants which are able to produce large volumes of high-quality products at an affordable price.

Overall production of the group is in excess of 80,000 tons per year and the whole organization employs more than 150 people.

High quality materials, secured through its own Research and Development department, along with international qualifications, allow Linco Baxo to meet the highest standards of its domestic and foreign customers. Today Linco Baxo is a leading manufacturer of:

- Channel & Superstructure blocks for Working-ends and Forehearths
- Expendables for Feeder
- Feeder Expendables grade ASTM 23,26,28,30,32
- Refractory & Insulating Bottom blocks for furnace safety
- Alumina, Sillimanite, Zircon and Zircon-Mullite bricks and itemized shapes
- Special Blocks for hot-repairs
- Castables, ramming mixes, patches and mortars
- Ancillaries and auxiliaries

Since 1949, the year of its foundation, Linco Baxo group of companies has developed into a leading refractories manufacturer.

Thanks to the high quality standards of its own production program, the trade name Linco, Baxo, Kero, Maref and Sirma have achieved international recognition.

Resourcefulness, prime quality, service, reliability and safety have paved the way for today's standing of the group: a well renowned manufacturer of refractories.

Production and design engineers develop both standard products as well as tailored products according to customer specifications.

Technical staff is able to discern the developments taking place on the market and to verify and satisfy the needs of the customers.

The company invests considerably in research, development and training, as the general strategy is not only to meet current requirements, but also to anticipate future needs.

Company factories also include a complete modern central laboratory with all in-house equipment and a training centre.

Product Range

- **CHANNEL & SUPERSTRUCTURES BLOCKS FOR WORKING-ENDS AND FOREHEARTHES**
- **EXPENDABLES FOR FEEDER**
- **REFRACTORY & INSULATING BOTTOM BLOCKS FOR FURNACE SAFETY**
- **ALUMINA, SILLIMANITE, ZIRCON AND ZIRCON-MULLITE BRICKS AND ITEMIZED SHAPES**
- **CASTABLES, RAMMING MIXES, PATCHES AND MORTARS**

Luben Glass has been in the hollow glass market since the 1980s, and has established itself as a leading company specialized in the supply of spare parts, special equipment, plants, machines and chemicals, while adding engineering and energy consulting services alongside the sales department.

LUBEN GLASS' mission is to satisfy the needs of its clients, offering innovative products based on the creation of components for different types of forming machines and plants, in response to the many functional needs of both the hot- and cold-end of glassworks.

Thanks to the work carried out by our skilled technicians, we are able to provide standard products, as well as those which respond to the specific needs of our clients, guaranteeing the maximum reliability of our products.

Dynamic aspect and construction expertise are the winning features of LUBEN GLASS.

The company has always been, and still is, committed to innovation and offering solutions in response to the ever-more stringent needs of clients, such as: VR1, the innovative mould polishing machine, and ILS evo, the performing lubricating system for IS machines.

Active in the search for new materials and in the study of tailor-made solutions and items for clients, Luben Glass is specialized in the manufacture of different types of equipment and spares for IS machines. The service range reaches 360° with its plants and chemical divisions.

Luben Glass is now looking to the future with the aim of ensuring a more proactive service to its Customers with its worldwide network of branches and agents.

Marposs is a worldwide leader in precision equipment for measurement, inspection and testing in production environments. Headquartered in Bentivoglio (Italy), it is present with its sales and service network in 34 countries. Production is based in Italy, as well as in other countries such as China, France, Germany, Japan, Korea, Mexico and the US. Marposs has been operating in the glass industry for over 20 years, providing products and applications for dimen-

sional and geometric measurement of:

- flat/automotive glass; and
• glass packaging (for the food and beverage, pharmaceutical, cosmetic and perfumery sectors).

Marposs' applications for glass containers measurement, on sample basis, include:

- flexible automatic (VisiQuick) and semi-automatic (VisiQuick mini, ID SCAN) solutions;
• components and optical sensors (e.g. chromatic confocal sensors).

VisiQuick is a fully flexible and modular gauging machine, including one or more stations for measuring:

- external dimensions on body, neck and finish with cameras;
• weight;
• push-up;
• bore diameter and internal profile;
• wall-thickness;
• labelling area profile (sinks and bulges)

VisiQuick is available both in standalone configuration, with single or multi conveying systems, or for integration in the production lines for sample checking.

VisiQuick mini is a camera-based compact semi-automatic gauging bench for external dimensions measurement. It can be used in the Quality Control

Laboratory or close to the manufacturing line, where it can profitably replace all go and no-go gauges for external dimensions control. It can also be equipped with an optional scale for weight measurement.

ID SCAN is a semi-automatic gauging bench for bore diameter and internal profile measurement, available in two versions for the cold-end (ID SCAN CE) and for the hot-end (ID SCAN HE).

More information on Marposs solutions for glass packaging are available on the Marposs website:

Messersi Packaging, one of the most important brands of Made in Italy related to packaging and industrial automation, operates in more than 60 countries, with an export share of over 70% sales and after-sales services in all continents.

Messersi Packaging designs and manufactures industrial automation systems with machines and lines for each end of line, of any industrial and logistics sector, for any merchandise and packaging, anywhere in the world. Pursuant to a mix of knowledge and skills that cross advanced mechanics with interdisciplinary content ranging from robotics to mechatronics, from electronic to hydraulics, from electrotechnics to thermodynamics. The production of strapping band, machines and packaging lines is **totally made in Italy**, in the Marche Region - at the center of a historic district of the mechanics and automation linked to packaging developing from Via Emilia to the Adriatic coast.

Shrink Wrapping Machine SH77

Shrink Wrapping Machine SH77

The machine combines and synchronizes three different and independent phases: preparation of the tubular film, hooding and heat shrinking, merging them together in a single process minimizing the downtime of various devices, providing exceptional levels of productivity (up to 140 packages per hour). The system for gripping and handling the tubular film is independent from the heat shrinking system ensuring maximum reliability in terms of wear resistance of the components and wires.

Shrink Wrapping Machine SH45

Shrink Wrapping Machine SH45

The SH45 automatic shrink wrapping machine is a combined machine which, using a single work station, performs the hooding and heat-shrinking operations of the product to be packaged. The SH45 automatic machine uses a reel of shrink film in tubular form equipped with side bellows. In the different versions, up to three film reels can be reached. The film is heat-shrunk on the product by means of a gas-fired ring oven; all functions are controlled by a PLC that manages the automatic and manual operations.

Strapping machines

The automatic strapping machines, horizontal, vertical, lateral and with compression are designed to pack all kinds of material easily and quickly. User-friendly

Strapping machines

and customizable, they are employed in numerous industrial and craft sectors.

Packaging Lines

The Packaging Lines are conceived and designed for the leading manufacturers in the glass sector. They represent the most innovative part of automation systems, the more structured one in terms of functions, machines models and service equipment, the most specialized one; each packaging line reveals production and logistics policy choices, work strategies and inventory management. The complexity of the solutions, the size and location of the plants are a special heritage of experience and expertise, specialized know-how prefiguring new and infinite solutions.

cold-end supplier, is one of the leading players in the industry, has a goal to fulfill all demands of worldwide glass manufacturers.

The key to the company's success is the building of a close working relationship with the clients by ensuring optimum and cost-effective solutions meeting their requirements.

The bottom line of the company's philosophy is building long-term business partnerships with its clients, where interpersonal relationships, reliability, guaranteed quality, and target-oriented modern technology are the major building blocks.

MIMSAN's line of business in the glass industry can be defined as conceptualization, analysing and designing, developing, manufacturing and automation, testing, site installation, training, maintenance, and technical support of cold end lines.

With regards to its installed and commissioned turnkey projects, MIMSAN produces the cold-end line products, listed below, for non-round, round and square glass products:

- Vibrating plates;
- Unloading conveyors;
- Multi-speed conveyors;
- Table tops;
- Gripper chain conveyors (elevator - lowerator and blowing systems, passage conveyors);
- Divider systems (pneumatic and servo control);
- Cullet conveyors;
- Aligners;
- Carousel round tables;
- Warehouse conveyors (pallet conveyors, chains, rolls, rotary units, shuttle units, transfer units, centring units);
- Pallet shuttles;
- Automation Control Cabinets;
- HMI Management Systems;
- Real-time access to process data stored inside the HMI and PLC (for operation and maintenance);
- QR Code Management for Asset/Inventory Management;
- Interactive 3D product manuals: Product Knowledge Communication tools.

Designing and manufacturing production and assembly lines for more than 40 years

MIMSAN Conveyor Systems & Equipment Industry and Trading Joint Stock Company, located in Istanbul, Turkey, was established in 1977 to produce conveyor systems for the bottling and hollow glassmaking industries, and for home appliances, logistics, automotive industries.

MIMSAN is 45% export-oriented, with 7,500 square meters of factory area, and a working group of 80 employees. Many projects have been executed in different regions in Europe, Asia, and Africa. MIMSAN, a main

Product Range

- **AMPOULE FORMING MACHINES**
- **AMPOULE/VIALS AFTER-FORMING LINES**
- **CAMERA VISION SYSTEMS**

Moderne Mecanique, a company of OCMI-OTG S.p.A, is a worldwide leading manufacturer of ampoule forming machines and ampoule/vial after-forming lines.

The present production range includes:

- **MM30 Ampoule Forming Machines:** The most popular ampoule forming machine with more than 1,500 installations worldwide. Its sturdy construction assures the longest working life. This machine can be equipped with automatic tube loader for continuous tube loading without operator support.

The machine can be integrated with:

- **OPTISTEM/2**, an automatic stem vision device checking the forming operation by self-adjusting the oxygen flow in the last two heating burners before the forming section. The new OPTISTEM/2 system provides full dimensional control IN REAL TIME of the ampoules in order to realize 100% quality control during the forming process.

- **LA502 Ampoule Afterforming Lines**, which handle all glass container finishing operations, such as electro-mechanical dimensional control, application of colour rings for ampoule breaking or identification, printing and predrying, annealing, sorting and packing.

These lines can be integrated with:

- The new **Gas Powered Hood** for annealing Lehr which can replace the standard electric one.
- **OPTICUT**, an electronic or mechanical device to apply the easiest and safest way of opening ampoules, using a predetermined breaking point;
- **Closing device** for the production of ISO form "D" ampoules;
- Extra **colour rings** application devices.
- **Automatic ampoule packing machines** developed by OCMI or Kyp

- **LF520 and LF535 VIAL AFTERFORMING LINES** are able to perform important operations such as electro-mechanical dimensional control, printing and pre-drying, annealing, sorting and packing: the new version of annealing Lehr with alternative conveying system allows to reduce the minimum total length of vials to be processed. The lines are able to match the high speed vial machines produced by OCMI-OTG S.p.A. such as **FLA20/S** and **FLA35**.

Automatic packing machines developed by OCMI are suitable to be connected with **LF520** or **LF535** after-forming lines.

MASTERS OF GLASS

M O V I N G

Making use of increasingly advanced technology, continuously innovating to respond to the unceasing evolution of the market, always guaranteeing the very highest quality. This means no less that being masters in your field, masters of your skills. With over 200 employees and offices across the globe, the OCMI-OTG Group is today a fundamental point of reference for machinery devoted to the production of glass containers for the pharmaceutical industry and for tableware, thanks to a hundred years of experience that has led it to become an undisputed leader, a true master of glass.

Minerali Industriali Srl is an independent Italian mid-sized mining company that produces raw materials for the glass and ceramic sectors.

Minerali Industriali's global presence counts 12 extraction and production units in Italy, 4 in Europe, 2 in North Africa, 7 in Central and South America and 1 in Asia.

The following 10 companies produce raw materials for the glass industries:

- MAFFEI SARDA SILICATI S.p.A. (Italy) feldspatic sands for container glass (flint);
- MINERALI INDUSTRIALI S.r.l. (Italy) silica sands for containers, tableware, technical and float glass;
- SASIL S.r.l. (Italy) low iron quartz, silica and feldspatic sand, feldspar, cullet (glassy sand) for containers, tableware, technical and float glass;
- MINERALI INDUSTRIALI TUNISIA SA (Tunisia) sand for float glass and container glass (flint);
- SUEZ COMPANY FOR MINERALS SA (Egypt) - micronized quartz for fiber glass

- and feldspar for float and container glass;
- LOCHALINE QUARTZ SAND Ltd. (Scotland) - sand for float, solar, containers, tableware and technical glass;
- COLOMBIA MINERALES INDUSTRIALES SAS (Colombia) sand for float and containers glass; tableware and technical glass;
- CZECH SILICAT Sro (Czech Republic) feldspar for float, containers, tableware and technical glass;
- GRUPPO MINERALI DO BRASIL Ltda (Brazil) feldspar for float, containers, tableware and technical glass;
- MEXICAN SILICATES Sa de CV (Mexico) feldspar for float, containers, tableware and technical glass.

Minerali Industriali products are able to satisfy all the most demanding sectors of flint glass: food and perfumery containers, articles for tableware and lighting, artistic, architectural glass, automotive glass, technical and solar glass. The chemical characteristics of some of the raw materials produced by Minerali Industriali companies can be seen in the table below. Constant product quality is assured by a strict process control system and by systematic chemical and granulometric analysis.

Minerali Industriali staff is able to give all necessary information about the company's products and provide technical assistance. Minerali Industriali can also advise clients on the most affordable solutions.

MSK Covertech Group - Your Cold End partner

More than 45 years of experience at the **cold end** have made **MSK** one of the leading equipment suppliers from lehrs to warehouses with **different levels of automation**. Customers appreciate MSK engineering, software and automation competence, as well as the unique and innovative MSK systems.

The modular construction of **MSK bottle conveying technology** guarantees a high degree of flexibility, the best possible layer pre-forming and fully automatic flow of bottle transport.

MSK's robots and palletizing systems offer solutions whatever performance and flexibility is required. The latest generation can automatically be adjusted to alternating bottle types and offers quick-change mechanisms and easy accessibility for fastest possible job changes.

MSK shrink-wrapping solutions rank among the most sold machines in the glass industry: user-friendliness, availability and safety are the distinguishing MSK characteristics, as well as efficiency and sustainability. MSK wrapping systems are often able to process films made of recycled material. Energy consumption is reduced about 13% with the latest shrink frame development.

MSK EMSY HMI controls the complete cold end. As developments and enhancements have been carried out 100% in-house, MSK adapts the system to individual needs and is independent from third parties. With the easy-to-handle operating software MSK EMSY the MSK cold end will run almost on its own!

By using a modern industrial tablet, **MSK EMSY move** offers mobility and easy parametrization in the field.

For further digitalization of the cold end the **MSK EMSY smart app** allows for mobile status monitoring of MSK systems via smart phone. **MSK EMSY analytics** enables smart and superordinated controlling of the overall equipment.

With subsidiaries and representations, MSK is located close to its customers, also with fast and economic help thanks to its 24-hour emergency and online service.

- **MEASURING SENSORS FOR DIAMETER, OVALITY, TOTAL THICKNESS OR THICKNESS OF LAYERS**
- **INLINE AND OFFLINE MEASURING SYSTEMS FOR PHARMA TUBES**
- **INLINE MEASURING AND INSPECTION SYSTEMS FOR VIALS AND AMPOULES**
- **INLINE MEASURING SYSTEMS FOR GLASS CAPILLARIES**

NIROX is an Italian company specialized in designing, manufacturing, and supplying **optoelectronic measuring sensors and systems** for **Glass, Plastic and Metal Industries**.

Glass is our main market and our sensors and systems are mostly used in **Pharmaceutical, Electronic, Scientific and Automotive Glass**. Our portfolio of solutions is continuously increasing and expanding to other market segments, as we face everyday new challenges from our valuable customers.

Our family of sensors includes:

- **ODK** is a family of optical micrometers which allow measuring **outer diameter**. The **multiple axis models** allow measurements of **product ovality**.

- **m-Thick optical sensors** can measure total **thickness of glass panels, tubes and objects**.
- **multi-Thick optical sensors** can analyze **complex structures** by measuring the **thickness of each layer**, including coating.
- **OTS optical sensor** is used in the **glass chemical etching process** of electronic displays. It measures **directly in the slimming chamber** the whole panel thickness.

Our family of systems includes:

- **NCSline** is a family of turn-key systems for pharmaceutical **glass tubes production** lines. The system with its options can measure wall-thickness and concentricity, outer diameter and ovality,

and inner diameter. Tube sorting and data logging provide a total control and performance analysis of the production line.

- **NCSlab** is an automatic **offline measuring system** for **glass tubes and preforms** which quickly provides tubes measurements for **production control or incoming inspections**.

- **VISline** is a family of turn-key devices designed for the pharmaceutical primary packaging, to be installed on the **glass tube converting machines**.

The main controls are:

- **bottom features**
- **dimensional measurements**
- **cosmetic inspection**

- **EVline** is a family of systems designed to **inspect glass tubes after the ends glazing**.

- **CMSline** systems provide the inline cross-sectional measurements of **glass capillaries in the drawing process**. All dimensions are obtained with just one sensor with multiple head expansions.

The history of NOVAXION started back in 2005

NOVAXION started in the Industry offering gathering robots for the handcraft and semi-automatic production of glass ware.

One year later in 2006, NOVAXION launched an advanced solution and a high-performance Swabbing Robot to apply a specially engineered swabbing-spray to the moulds.

The NOVAXION company is specialized in robotics technologies for the glass industry and in 2019 became a full member of the Rondot Group.

NOVAXION continues to offer a unique solution for automatic swabbing of blank moulds and neck rings on IS Machines.

More than 150 units have been installed worldwide.

Novaxion swabbing robot solutions

Novaxion offers 2 versions of swabbing Robot

Valve Block (EPVB) mounting on all IS Machines

The NX-VR-300 features an improved mounting rail system

Swabbing robot suspended

Swabbing robot valve block

The new rail is resting on the blank side valve block of the IS machine and offers:

High rigidity is provided to cope with the demands of on-the-fly high speed swabbing.

One NX-VR-300 can serve single or tandem machines.

Suspended swabbing robot on all IS Machines

NX-SR-300 features a new fixation method with a suspended (hanging) version of Novaxion's best selling swabbing robot for IS Machine.

The suspended version is matching the structure and overhead panel of the existing IS machine and offers:

High rigidity to cope with on-the-fly high speed swabbing. Available for new IS machine or conversion of existing, ... we match your choice...

One NX-SR-300 can serve single or tandem machines.

Novaxion swabbing features

It automatically swabs the moulds AND the neck ring and can provide swabbing on-the-fly within one section cycle with no rejects.

The advanced technology of the smart spray nozzle provides closed mould swabbing with no direct contact to the moulds.

This method allows swabbing with minimal amounts of lubricant, saving on consumables and increasing the lifetime of moulds.

Gathering Robot

Novaxion Gathering Robots have acquired the reputation of worldwide leaders in the semi automatic and high end glass production. A new, friendly operator software has been developed for the gathering operation, offering additional functions for the end-users and adding possibilities of adjustments. All of this leads to making top quality in semi automatic glass production.

Services

- The robots are equipped with accessibility for remote diagnosis and remote support.
- Training is offered to be conducted at the customer's factory and in the training room at Novaxion.
- Maintenance contracts and follow-up training contracts are available.
- Lubricants can be qualified at Novaxion for suitability for use with the robot.

CONTROLLED COMPANIES

Moderne Mecanique
Kyp Accesories, OCMI India.

EQUIPMENT FOR THE PRODUCTION OF GLASS TUBULAR CONTAINERS FOR PHARMACEUTICAL AND COSMETIC USE:

- **FA36S** ampoule forming machine. This 36-station machine is equipped with a special section to shape the first bottom of each new glass tube in order to minimize glass wastage. It can be integrated with **OPTISTEM/2** camera control system working with self-adjustment of oxygen level.
- **FLA20/S-FLA35**: 20 or 35 stations forming machine working with continu-

ous rotation to produce all ISO DIN vials including penicillin, insulin, screw-neck and blow-back types. Equipped with servo-driven main forming stations, they can be equipped with hot-end camera control system OPTIVIAL.

- **FLA18**: new 18/9 stations forming machine working with index rotation to produce all ISO DIN vials. Index rotation driven by water-cooled torque motor. Tools of forming stations driven by servo-motors. Inspection system OPTIVIAL available for vials dimensional control.
- **LF518**: after-forming line to be connected with FLA18 vial forming machine, equipped with cooling fans, electro-mechanical control for total length, camera inspection system for inner mouth diameter, electrical annealing lehr with pick&place loader and unloader, packing section with option of automatic packing available.
- **FLA 20-DROPPER**: is a 20-station continuous rotary machine able to produce droppers with different shapes of tips and flanges through special tube cutting and forming devices. Suitable for the installation of camera control systems OPTIVIAL.
- **FLA20-CAR** is a 20-station continuous rotary machine able to produce all types of dental cartridges thanks to the crack-off station for bottom cutting through thermal shock. Suitable for the installation of camera control systems OPTIVIAL.
- **ROBOGLASS**: Automatic glass tube feeder suitable to be connected with all forming machines supplied by OCMI-OTG S.p.A. and controlled companies.
- **ATL4**: Automatic tube loader with han-

dling system for the preparation of complete bundles in pre-loading position. Available to be connected to OCMI vial forming machines with index rotation.

- **PM-A/PM-V**. automatic ampoules/vials packing machine ready to be connected with after-forming lines made by Moderne Mecanique and Kyp. The vacuum picking device enables perfect gripping of the containers. The operator can be sure to insert the same number of ampoules/vials in each box without missing products. Furthermore, the problem of friction between containers during traditional manual packing is solved. The number of ampoules per box, the number of ampoule rows per box and the number of ampoules per each row can be set by means of a user-friendly touch screen.

AUTOMATIC MACHINES FOR STEMWARE PRODUCTION:

- The **SA42**, **SA48** and the **SA60** sealing machines for stemware are the answer to every market-oriented tableware factory. They allow for a matching of the highest efficiency and production speed with a flexibility never before achieved by alternative systems. Equipped with a complete range of intelligent control systems able to control and maintain the final quality of products. SA sealing machines are equipped with loaders for bowls and stems and unloaders for finished products according to **OCMI** drawings. OCMI's sealing machines include a section for stem stretching if required, as as per article type under production.
- All OCMI stemware machines can be equipped with Vision Systems that allow 100% consistent control of chucks adjustment and surface defectiveness.

Technology, passion and tradition. A union that makes each mould the best solution.

OFFICINE S.R.L. has been designing and manufacturing moulds for all glass machines since 1948.

The company is specialized in the manufacture of:

- moulds for blown glass production with IS machines, O90 and H28 machines, B&B and semi-automatic machines of bottles, jars, still blown glasses, stemware, tumblers etc.;
- moulds for pressed glass production of glasses, tableware, vases, goblets, stems, neck rings etc.;
- moulds for technical glassware production of glass bricks, power insulators, lighting, lenses, borosilicate pots, washing machine windows;
- moulds for spinning machines (to produce dishes, cups, under plates, centrepieces).

OFFICINE S.R.L. pays particular attention to the choice of selected materials: cast iron or steel, bronze, stainless steel also with high content of NiCr and powders for the metallization of mould parts.

Our company mission is to guarantee to customers high quality standard of the products and services offered. We always make our experience available to our customers in order to provide cooperation, to be able to face any production requirements and to find the best solution with commitment, efficiency and professionalism.

A Quality Management System complying with the **UNI EN ISO 9001** norm was established in **1996** to better organize and systemize all the company's activities. The goal is to strongly and uniformly orient the company to its customers and to their profitability.

The high professionalism of our team enables us to assist our customers at all stages, from mould design right up to end products.

OFFICINE S.R.L. also has a production unit in Mexico, thus expanding its market and providing better services to its US clients. The aim of this new production unit is to guarantee the same standards of service and quality that OFFICINE S.R.L. has been providing over more than 70 years of activities.

Olimerk Makina was established in 2007 and is based in Istanbul Turkey.

It is a company of Olivotto Glass Technologies (leading company in the production of machines and equipment for tableware, technical glass and pharma tubing).

Starting from the year of its establishing, Olimerk has continued to expand its business over the years thanks to many different ranges of products and services.

Equipment and semi-automatic machines: linear and rotary fire polishers, belt conveyors, push bar stackers, transfer systems, semi-automatic spinning and many others.

Technical assistance from experts specialized in the commissioning and optimization of new and existing production lines: automatic pressing forming Press, press & blow forming, Stemware (two pieces and one piece), Spinning machines and others.

Design and sales of moulds and production equipment for different types of machines and the most common existing processes used in the tableware and technical glass fields.

Olimerk and its subsequent growth have always been addressed to end-customer production needs.

When a customer has production difficulties or just needs to improve efficiency, Olimerk is able to offer turnkey production support service – starting from a technical audit of existing production conditions, through a study of the equipment, (design and materials) used for production, up to training and support for production staff.

Olimerk provides service aimed at satisfying specific production needs of final producers such as: production of new items, thanks to the design and supply of production equipment; production tests for new items (samples) or more simply production improvements of specific products thanks to the support of Olimerk production experts.

Advice regarding article weight, production speed and equipment sizes suitable for specific items are also part of the know-how and services offered by Olimerk.

Olimerk Makina is a solution-oriented company that can jointly incorporate advanced glass machinery, glass-production and mould knowledge.

Since 1946, with the first rotary blowing machine up to the acknowledgement of one of the major realities in the world of glass.

A way sprinkled with international performances and success stories, also through the acquisition of different brands such as ANTAS, LYNCH SYSTEMS and LINDNER, all led **Olivotto Glass Technologies** to be a global reference for the production of hollow glass.

We have built our technology-driven identity on continuous research for innovation, choosing to diversify and deepen our potentialities, thanks to investments in ever-increasing R&D.

For over 70 years, we have been – as we still remain – a leader in design, realization and implementation of complete plants for the production of hollow glass-providing highly customized solutions for all kind of needs.

Highly skilled motivated engineers and technical teams that represent OGT, the recognition of the market and our peculiar and constant propensity to innovate, afford us the opportunity to be competitive in all sectors.

To anticipate the expectations of Customers and Markets, OGT organizes its activities through four Business Units:

- HOLLOW GLASS
- PHARMACEUTICAL PACKAGING
- MINERAL WOOLS
- SOLAR

Each BU is structured as a team of highly qualified professionals and engineers.

The supply of plants and integrated lines is completed by the production of tools, accessories and spare parts as well as by our well-known dedicated Service.

Our installations are present all over

the world and we are able to guarantee assistance anytime, anywhere.

We exist in the glass market to expand the technological horizon beyond, so that this is more sustainable for the market and the environment, with the strength of exclusive and performing solutions, always.

• STRAPPING, STRETCHING & WRAPPING MACHINES

The **OMS Group** is a global leader in end-of-line packaging of palletized products for all market sectors. In addition to its Italian headquarters, the Group consists in 12 subsidiaries based in Italy, Europe, North and South America, Asia and Oceania.

Established in 1949, OMS has a long tradition in designing and manufacturing strapping, wrapping and hooding systems. Reliability, experience and flexibility are three important characteristics that enable OMS to respond to today's market demands, from the simplest strapping machine up to the most sophisticated packaging plant, as well as complete packaging lines for the hollow glass market.

All this has been made possible thanks to OMS' many years' experience in this market, along with a vast number of tailor-made solutions specifically studied for its customers. The important results achieved by the company now have to be credited to the third

generation of business teams who have continued to be involved closely with the market, with the vision of a future characterized by innovation and continuous improvement.

In order to stay ahead of times, OMS is now living a new phase of transformation to elevate its current position in the market to an even more global industrial reality.

AT55 Shrink-hooding machine

AT55 is an automatic machine specifically designed for the hollow glass industry which, on a single work station, applies and shrinks the hood on the pallet of bottles. Depending on the chosen model, it can use up to three different coils of shrinkable tubular film with side gussets.

The film is shrunk onto the product by a flameless ring gas oven.

Vertical press/strapping PM-GLS

The vertical press/strapping machine, for palletized products, has a top press capacity up to 2,400 Kg. Thanks to the perfect combination between strapping heads, swords and the turntable placed under the machine, it can apply multiple strapping patterns in both directions (from 2x0 up to 4x6).

Horizontal strapping machine 06CL

OMS' horizontal strapping machine for palletized products, features an arch

driven on a linear rack that guarantees a perfect positioning of the straps on the pallets, a simplified head maintenance with quick-action connectors and different strapping programs that can be easily managed from the operator panel.

AVR1000 Wrapping machine

The AVR1000 has been developed with a carbon fiber ring, slip ring contacts and a patented pre-stretch carriage up to 300% ratio.

Possibility to start and stop the wrapping cycle at any height of the pallet load (Top or Bottom). High speed, simplicity and flexibility. The results are: a largely increased reliability and reduced maintenance as well as stable loads with minimal film consumption.

At the end of the cycle, the final film tail is safely inserted under the previous wrap or welded with halogen lamp device (based on option chosen). The results are no loose film ends, guaranteeing a perfect finishing.

Top Pal protection machine

OMS' automatic system to apply and thermo-shrink a sheet of plastic film on top of the load, hermetically and mechanically protecting the top part of the load, which is generally subject to tears due to stacking.

This operation also ensures a better hermetic seal of the welding of the hood.

Pennekamp Ware Transfer, Multi Axis Stackers and Cross Conveyor are other reliable components, which can work maintenance-free in the continuous production increasing the performance.

Pennekamp's patented BLEU Burner will considerably reduce lehr' energy consumption and harmful emissions such as NOX, CO & CO₂, while it optimizes the combustion process at the same time. This intelligent system improves the heat distribution around glass articles during their treatment processing as well.

BLEU Burner

Pennekamp is a leading manufacturer of Annealing, Decorating & Tempering Lehrs, with an excellent reputation and more than 2.500 Lehrs being built since 1945.

We continuously aim to assist the worldwide glass industry in Container, Tableware, Solar, Float and Automotive Glass sectors with reliable, economical and energy efficient equipment on a high technical level.

Pennekamp preheated Mould Ovens and Firing Kilns bring reliability to the clients' production, and our Automation techniques at the Cold End area provide our clients with the highest productivity, where the articles are supposed to be coated.

• INVERTED TOOTH CONVEYOR CHAINS & SPROCKETS

Pennine Industrial is one of the world's leading manufacturers of Silent Inverted Tooth Conveyor Chain and Sprockets that are used in the transportation and handling of hollow glass, container glass, tableware and stemware. Our conveyor chains are also used to transport larger items such as glass bricks and automotive glass light covers.

The company was founded in 1968 and has been involved in the conveying of hot glassware for over 45 years. Pennine now employs over 70 people at its two manufacturing plants in the UK and has agents and partners working in 30 countries throughout the world. Chain manufactured by Pennine in the UK is now used in glass plants in 60 countries.

Also available from Pennine are our range of 2 pin Laser Welded Conveyor Chains. Specifically designed for the most demanding of modern high speed glass container production lines these new chains require less maintenance and give longer life with reduced chain elongation.

Customers can also maximize the life of their Conveyor Chains by using one of the 12 standard Head Protector Links that can be fitted onto all chains and used without sprocket modification. As the original designer of the Head Protector Link, Pennine can advise customers on the best type of Protector Link to meet customers' individual requirements.

- **MOULDS & ACCESSORIES**

M Modern technology - More than 50 completely automatic CNC machines including 4 plasma welding robots. The main requirements for all the machines in our production line are precision, reliability, safety and versatility.

O Organization - Giancarlo Perego has completely restructured its organization, from senior management to the delivery department. Every single piece is checked during the working stage.

U UNI EN ISO 9001:2015 certification certification - obtained in July 1995 and renewed in 2013. The company has, so far, passed all the inspections carried out by the DNV certification body. This quality certification has clearly enabled us to improve our products by rationalizing production procedures.

L Layout design - Our technical department is equipped with ultra-modern software (CAD-CAM) and can provide technical support for mould designing. Our staff regularly attend training courses on the various technologies used by glassworks today.

D Delivery - Thanks to our new technological potential and to the reorganization of our production structure, our output has already increased considerably and we can now be more flexible in terms of delivery dates.

S Service - Giancarlo Perego SpA's quality, customer and post-sales services are always available at

clients' disposal along with the on-line direct technical service available 6 days a week.

Giancarlo Perego Group has been manufacturing moulds for the glass industry since 1964. With more than 50 years of experience, and with continuous huge investments in new machinery and technology, the company is continuously consolidating its leading position in the global mould market every day. With its mould shop in Eastern Europe, acquired in 2001 and completely renovated in 2012, Giancarlo Perego Group has a total covered area of 12,000 square meters.

All these investments enable the Giancarlo Perego Group to significantly increase its production capacity; with more than 4,500 cavities per month, the company is able to supply tools all around the world, and has more than 75% of sales in non-European markets. South America, USA, Africa, Middle East and also Asia are now reached by our sales department each day, developing strong business relations with major international partners.

Well aware of the difficulty of communicating the full scope of our activity in a few lines, Giancarlo Perego Group invites you all to visit our plants of Italy and Croatia.

UV 100 VS220 Vacuum Pump for Hot Climate

A520.4 VS400 Air Compressor with Variable Speed Drive

Manufacturing more than 45,000 units since 1923, **Pneumofore** has long established its reputation as one of the first and most experienced manufacturers of high capacity rotary vane compressors and vacuum pumps. Today, industrial plants worldwide benefit from the reliability and durability of Pneumofore systems in a great variety of applications, including the moulding of hollow glass. The supply of compressed air and vacuum on IS machines improves the forming process, especially for complicated shapes of containers. Vacuum is also used on the blank side to increase the production speed and improve quality by reducing settle blow marks. For these reasons, the UV Series vacuum pumps and the A Series compressors are found in glassworks in more than 70 countries. Pneumofore systems are ready-to-use with dedicated accessories for every specific glass application and for round-the-clock operations, also under extreme and harsh climatic circumstances (tropical or polar), using exclusive air cooling to **reduce operational costs**.

Pneumofore simply offers the solution for the **lowest Life Cycle Cost** with **up to five years warranty** on efficiency and functionality of the Air-End. Pneumofore divisions cover a wide range of industrial needs and applications: **Vacuum, Compressed Air, Gas Compression, Engineering and Service**.

ROTARY VANE COMPRESSORS

Pneumofore Rotary Vane, lubricated, single-stage compressors range in power from 5.5 to 500 kW, with capacity up to 5,360 m³/h. Each model has three different motor sizes for the pressure ranges from 2.5 to 10 bar. Designed to run 24/7. Air-cooling as standard. Hot Climate, Variable Speed, Heat Recovery versions available.

ROTARY VANE VACUUM PUMPS

The UV Series are single stage, lubricated vacuum pumps ranging from 462 to 6,610 m³/h, with 0.5 mbar residual pressure. In their Variable Speed version, they allow constant adaptation of the electrical motor's rotation speed in rpm in order to keep the same vacuum level all year through, independently of bottle' size, shape or weight.

CUSTOMER SATISFACTION

Pneumofore assists customers at every step: from process specifications through-out layout and definition to answering installation, commissioning, operation and long-term maintenance needs. Our **engineers and qualified technicians** provide support to all clients in order to ensure the choice of the right product and the best solution. Pneumofore also offers a complete **after-market service** for maintenance, spares delivery, on- or off-site repair and overhaul of the units.

MAIN FEATURES

- Complete turn-key solutions for compressed air and vacuum supply
- Easy to install - compact footprint, no water or foundation required
- Air-cooled through high-efficiency vertical radiator
- Variable Speed, Hot Climate, Heat Recovery versions available
- No Air-End overhauling, non-consumable parts, constant performance
- High energy savings and low cost of maintenance.

Product Range

Ramsey Silent Chain

Founded in 1923, Ramsey Products Corporation is celebrating its 100th Anniversary.

The originator of Ramsey silent chains, the company designs and manufactures a wide range of industrial silent chain products for both hot-end and cold-end bottle handling.

In the early 1920s, Joseph Ramsey, a mechanical engineer in New York, decided he could design a better silent chain than the current-day versions... and he set out to do just that. After much research and testing, Ramsey created the Ramsey Compensating Joint Silent Chain and filed a patent for it. On July 5, 1923, he and a partner incorporated the Ramsey Chain Company to sell his new chain.

Joseph Ramsey's breakthrough silent chain design had three decided advantages over other chains: smoother running qualities, greater quietness of operation, and a considerably longer service life. Within a year, Ramsey's Compensating Joint Silent Chain was used by the engineering departments of numerous prominent companies.

From this humble beginning, Ramsey Products has grown to become a dominant force in the chain industry, offering thousands of customers worldwide silent chain products for conveying and power transmission applications.

Ramsey Today:

- Holds eight patents and numerous registered trademarks,
- Has representation in more than 70 countries,
- Offers the highest level of quality, excellent customer service, and competitive prices,
- Provides conveyor chains that can run at extreme speeds with smooth bottle transfer and exceptional chain life.

We are stable partners of the leading OEMs and producers at global level in the glass industry and across overall industry sectors in which we operate.

Highlights for the Glass Industry:

- Full range of dedicated high-quality chains, modular belts and components for top-tier cold-end lines
- New imperial standard heavy duty modular belts and dedicated widths chains, 1305 Series
- New gripper chain with GS rubber pad design for bottle-turner applications, best solution for conveying unstable and shaped products
- Unique high-performing solutions for Lube-Free Bottle turner applications
- State-of-the-art product design, engineering and materials (e-SLIDE and SUPREME-S) for guides and curves, offering low wear at high-speed dry running
- Fully proofed low-dusting solutions
- Complete in-house manufacturing and control of overall product portfolio
- More than 1,000 lines installed worldwide

Established in 1919, **Regina** is a world leading developer and manufacturer of high-quality conveyor chains, belts, roller chains and components, offering a complete cutting-edge product portfolio of standard and special applications for glass, beverage, food, packaging and many other industries.

Regina is recognized among the 'fathers' of high-performance conveying and power transmission solutions for

the glass industry at global level. We are strongly committed to continuous innovation and development of our value proposition, process capabilities and human capital, with a continuous drive towards sustainability.

Our products are fully developed and manufactured at our premises by means of a wide range of top-tier engineered plastics and steel grades, products available in metric and imperial standards.

REVIMAC: FORMING, HANDLING & CONDITIONING

REVIMAC, part of the BOTTERO Group of companies, is to date one of the most dynamic presences in the hollow glass world. On the one hand, Revimac is engaged in the forming process by supplying high efficiency forehearth combustion systems and by performing professional IS machine re-manufacturing with over 1100 sections installed in 31 countries, and on the other, it is one of the few companies able to deliver complete ware handling

and ancillary equipment such as ware transfers, cross conveyors, stackers, hot treatment hoods and cold treatment units.

About conditioning, REVIMAC forehearth is distinguished by improvements to the design of the refractory superstructure, optimizing air-gas mixing units and combustion control system in order to supply to the glass industry one of the most efficient and reliable glass conditioning system.

Revimac is world famous as the producer of the unrivalled three-axis RSS-100 Servo Stacker, capable to handle containers at the speed of 22 cycles per minutes and equipped with the Self Learning function, based on A.I. technology.

In addition Revimac has perfected its range of High Performance Ware Handling equipment with the so called **Ensemble Evo**.

Especially designed as the answer to the increasing demand of huge production of glass containers, where quantity and speed are the key factors in the global standard ware market, and where the pack-to-melt index needs to keep up at its best performance, **Revimac Ensemble Evo** is a composition of synchronized, harmonic and stable system putting together the ware transfer triple belt **XHS900**, the cross conveyors **RC900** (without cooling system) and the lehr loader (stacker) **RSS100**. This consolidated technology has been chosen by the largest groups and glass plants to fulfil their need of very stable containers handling.

The **XHS900 High Performance Ware Transfer** is more than a ware transfer, it's an integrated transfer system capable of transferring articles from primary conveyor to cross conveyor at a very high production speed, variable according to container dimensions.

Up to now Revimac has delivered - all around the world - over 2100 units including ware transfers, stackers, cross conveyors and hot treatment hoods. The most part of this equipment has been installed to serve many different machines of many different producers and in many different configurations.

This is just an indication of how Revimac, thanks to the collaboration with its customers, the competence of its team and the experience collected in over 35 years in the field, is capable not only of offering spot-on solutions for the actual needs of the market, but also to be a most reliable partner for tomorrow's request.

Revimac is looking forward with confidence to meet the most demanding challenges in the hollow glass industry for further improving performance and reliability of its equipment to grant customers always the ultimate design.

the industry-leading SORG Group. From installation and inspection to repairs and replacements, our single-source approach enables us to deliver safe and innovative turnkey projects that help extend the lifecycle of every furnace.

Construction

SKS provides a turnkey approach from decommissioning to furnace start-up and everything in between, including complete steel construction for example. Working with furnace designers, we deliver our projects to schedule and exacting safety standards.

Maintenance

We can offer frequent furnace maintenance to keep your assets in optimum operating condition. Our maintenance team has earned a leading reputation for all kinds of ongoing works like pushing or exchanging electrodes, closing of sting outs and overcoating of tank blocks.

Repairs

SKS is a specialist in hot repairs to secure and extend the furnace lifetime. With ceramic welding and repairs during furnace operation, we can help to minimise disruption and downtime.

Furnace Audits

We have a variety of inspections to determine the current condition of your furnaces. These include visual and endoscopic inspections, as well as test drillings to assign the refractory thickness of the melting end bottom.

Worldwide Presence

With a wide network of local offices for SKS subsidiaries and strategic partners, our scope of services is available anywhere in the world.

Experience

Combining over 140 years of experience working in the most demanding conditions, our team has an unrivalled application knowledge and expertise in operational furnace repairs, maintenance and constructions.

Glassmakers worldwide choose the comprehensive applications and support framework of **SKS** to optimise the performance of their furnaces and minimise downtime. We are one third of

As **Nikolaus SORG** celebrates 150 years at the forefront of glass melting and conditioning, we are proud to be one of three industry-leading specialists in the SORG Group. Responsible for designing the world's most advanced furnaces and related technologies, our tireless commitment to research and development supports glassmakers in

improving the sustainable performance of their furnaces to maximise asset lifespan.

MISSION BY SORG

We are committed as the one and only partner to develop the next generation of sustainable melting technologies that will help glassmakers to produce net zero glass at volume.

Technology

The only furnace company global-

ly with a research and development department for glass melting and conditioning, our tireless commitment to innovation includes mathematical modelling, modern design tools and digitalisation.

Services

SORG is committed to unrivalled customer support over the lifecycle of a furnace. Our in-house specialists offer furnace glassmakers service and assistance for a smooth operation and any glass or melting problems.

Innovation

SORG believes in the continued pursuit of innovation, working in close partnership with our customers to understand their needs and develop high-quality answers that enhance industrial glass production.

Applications

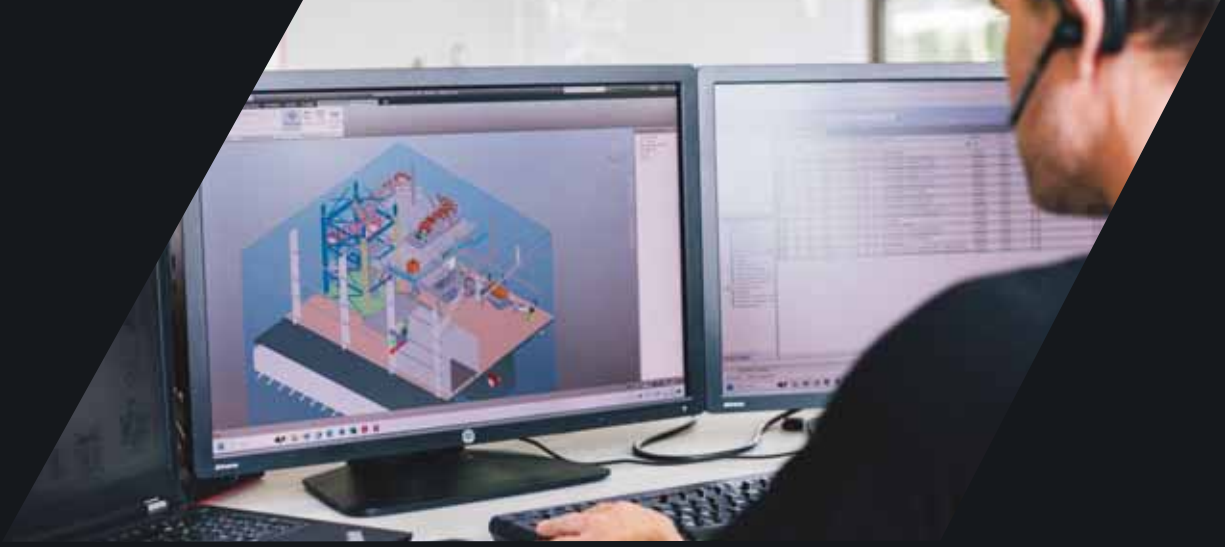

Every kind of glass requires a different type of furnace. That's why each furnace has a unique design and special features – and we can produce them all according to customer requirements.

SUPPORT FOR THE FULL LIFE CYCLE

Support is just as important over the lifecycle of a furnace as it is during rebuild or start-up. SORG is committed to unrivalled customer support. It's been the foundation of our business for almost 150 years.

We offer knowledge and expertise throughout the furnace lifecycle including: Consulting & Design, Supply & Installation, Filling & Commissioning, Auditing & Optimisation, Technical Support & Training, Repairs & Maintenance.

As part of the SORG Group, we have access to specialist services from SKS and EME, supporting the entire melting and conditioning process for glass plants worldwide.

Spami is part of Stevanato Group: one of the global leading suppliers of primary glass packaging for the pharmaceutical industry. **Spami** is and has been the technological leader in designing

and assembling **automated lines for the transformation of glass tubing into containers** for pharmaceutical use since 1971. Its fully automated, high-speed precision glass forming lines guarantee the most accurate processing for glass **vials, cartridges, syringes** and **ampoules**, thanks to delicate handling of the containers throughout the forming process, and rigorous product inspection by means of state-of-the-art camera control systems.

Spami continuously upgrades its **technology**, adapting it to the actual **needs of glass tubing packaging manufacturers** to improve the **quality, stability of the process, output speed and ease of use. The company's lines are also certified and validated to process high quality "type 1" glass.**

A team of more than 100 employees design and assemble complete forming lines based on vertical rotating technology with high capability and precision that include integrated fully automatic lines with auto-packaging units, 100% control of dimensional and cosmetic parameters and needle assembly.

Moreover, since 2013, Spami has been supplying all the equipment necessary to produce and package RTU products.

Cutting edge glass converting technology for the highest quality

Being part of Stevanato Group and with a deep knowledge in the pharmaceutical glass primary packaging, Spami contributes to offer 'synchronized solutions' in order to significantly enhance product integrity.

Thanks to its global footprint and competences in glass forming equipment, Spami is the **ideal partner** for any pharmaceutical packaging manufacturer seeking **proven and reliable technology customized to its specific needs.**

• MIXERS

TEKA Maschinenbau GmbH, established in 1961, is the manufacturer of the internationally reputable TEKA glass batch mixer, and one of the leading glass mixing equipment specialists worldwide.

We specialize in the engineering and manufacturing of a complete range of glass batch mixers from 250 liters up to 7,500 liters capacity for the highest demands in all glass mixing applications. TEKA mixers have an outstanding reputation for mixing performance, reliability and ease of use in combination with an exceptional service life.

Decades of know-how and technological innovation guided by in-the-field experience under severest conditions and a strong customer commitment have made TEKA one of the leading manufacturers of glass batch mixers worldwide.

We have supplied glass batch mixers to the most reputable and advanced glass manufacturing companies worldwide into all glass batch mixing applications.

TEKA batch mixers can be installed in any new or existing glass manufacturing facility and due to its compact size are perfectly suitable for retrofitting into any existing batch house.

Our after-sales service, which includes spare parts service and the TEKA technical service teams, provide customers with an

extremely reliable and timely spare parts supply.

TEKA has a spare parts inventory that is second to none in the glass mixer business. Our spare parts and service teams consist of professionals with many years of experience. TEKA service technicians are highly skilled and very knowledgeable, often with decades of field experience. During site visits, they can instruct on maintenance and operation of the mixers.

As a family-owned company, our philosophy is not so much directed towards growth but rather to continuously aim for high standards, thereby providing exceptional customer value throughout the decades.

TEKA has wholly-owned subsidiaries in North America, France, Spain, Poland and China and a worldwide distribution network provided by professional and long-standing partners.

TEKA Batch Mixer Advantages:

- outstanding homogeneity performance
- exceptional reliability and robustness
- tremendous life-cycle period
- perfect for retrofitting due to compact size
- intelligent mixer design simplifies maintenance and cleaning

Recognised as a global innovator in glass plant engineering and contracting, the **TECO Group** has been designing, building and modernising since 1927. Originating as an engineering and construction company focused on designing and building glass melting furnaces, TECO has since extended its capabilities to include turnkey glass plants, glass process design modelling and analysis, forehearth and working ends, batch plants, glass plant equipment and custom control systems. Utilising a full range of in-house expertise, the TECO Group continually pools its knowledge and works together to innovate and improve glass plant operations, helping customers minimise production costs whilst maximising glass quality and product pack efficiency. With an ever-evolving industrial landscape, consideration is given to factors such as product type, glass quality, fuel

efficiency, energy savings, sustainability and environmental compliance. With its six Group companies located over two continents and industry representatives strategically positioned around the globe, the Group is well-placed to serve many of the world's primary glass manufacturing industry.

Result of Forel's decades of experience in IG processing solutions, the "High Tech" IG line was conceived to offer an unrivalled choice of options for the production of insulating glass, for both the residential and the commercial destination, and also for production of IG façade. The "High Tech" IG line is equipped by exclusive devices and systems for processing offset panes, shaped panes and manufacturing double, triple and quadruple IG units, up to 6,000 x 3,300 mm in size weighing up to 400 kg per linear meter (assembled panel), and up to 100 mm in thickness. The automatic sealing robot Art. SR "High Tech" is designed to maximize productivity and reduce waste and downtime, thanks to features such as the no-stop mode and the automatic dosing unit change.

Tiama is a global provider of real-time process data and quality controls for glass packaging.

The company's machines are filled with sensors installed both at the hot-end and cold-end of the glass plant. All these Tiama sensors, backed-up by specific expertise in traceability and services, offer a powerful source of data and knowledge preparing for the arrival of the **Smart Factory**.

Today, Tiama is capable of sending highly valued data (unique bottle laser-engraved identification, container images, measures) coming from the hot-end and cold-end to ensure optimized productivity and to strongly connect these two glass plant areas.

To better prepare future Business Intelligence capabilities, Tiama has structured its unique offer around six product families:

- **Intelligence:** all production and quality data are recorded and displayed in one smart database that enables to have optimized production management and immediate actions.
- **Monitoring:** modular and affordable technological bricks at the hot-end provide process information at the earliest stage of the bottle's life and detect early production drifts.
- **Traceability:** with the patented device Total Tracer engraving an individual code on the bottle. All defects information and events at the H-E and C-E will be correlated down to a single container creating a unique identity card for each ware.
- **Inspection:** with the development of flexible and automated machines. At Tiama, advanced technologies such as learning processes, deep learning and artificial intelligence concepts are being pushed, with machines to provide operators with precise data in the fastest possible time.
- **Service:** with a panel of support programs giving the possibility to use all the Tiama equipment at their highest performance rates, maximizing initial investments. Tiama Support also includes predictive and preventive solutions to reduce costs of ownership.
- **Sampling:** either at the H-E, C-E or at the Laboratory, TIAMA develops new sampling solutions. One of them, the Tiama Xlab is a revolutionary machine which uses Xray technology to create a 3D mapping of the container.

Ultimately, based on this powerful database, Tiama will develop data mining solutions, and will build business models around correlations between all the parameters of a glassplant. This is why Tiama created its Smart Factory Concept called YOUiverse and has, in fact, already started to work on customer cases attesting the value of these correlations.

France

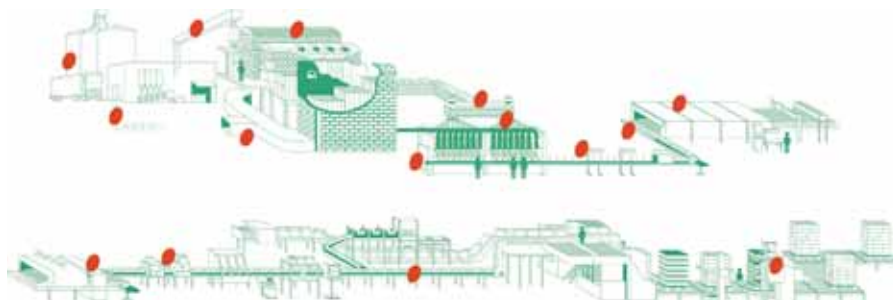

Tel: +33 3 85 98 19 19

For more than 25 years, **Vertech'** has been the reference provider of software solutions for the glass industry. With a wide range of products, SIL provides glassmakers with very precise, real time KPIs on the performance of whole plants. Thanks to all this shared data and the full traceability of products, production rates improve, losses decrease and customer risks are reduced. With 25% invested in R&D yearly, Vertech' is constantly innovating and adapting SIL to current industrial needs. More than 750 production lines have been equipped with SIL so far in 32 countries all over the world.

SIL is a Manufacturing Execution System (M.E.S.) intended for glassmakers producing:

- Hollowware
- Tableware
- Tubes
- Decoration

SIL can be installed everywhere in the glass plant, but also at the headquarters from where all KPIs of several plants can be viewed simultaneously.

Trustworthy collaborations with partners and customers

Thanks to trustworthy collaborations with partners, SIL is an independent system that's capable of being connected to any production and inspection machine available on the market.

Besides being a very complete system, SIL includes an individualized follow-up, an annual maintenance contract, on-site installation and customer service.

Vertech' is there every step of the way from the first technical visit and to the installation process to full system implementation and on-site training. Vertech' customer support is available during office hours (GMT+1), with an optional subscription to the 24/7 hotline for technical support. For long-term system optimization, Vertech' offers expert maintenance service on-site with yearly updates.

COMPANY FOUNDED

1992

Vetromeccanica, established in 1992 in the province of Parma, the heart of the Italian packaging area, has been an important industrial international player right from the very beginning.

With 30 years of expertise in containers handling, Vetromeccanica is a reliable partner during all the phases of the process: from feasibility studies, executive engineering, the choice of the best supplies, right up to the supply

of innovative, patented and competitive handling and automation solutions to meet specific needs.

In-house management of all the phases of the production cycle guarantees high quality products 100 % Made in Italy, short delivery times and competitive prices. Vetromeccanica's aftersales service offers the best support in any situation with its prompt response thanks to a well-stocked spare part warehouse.

Vetromeccanica offers Cold End Lines fromlehr exit up to palletizing units for the handling of glass

containers of different sizes and shapes.

Video Systems is specialised in the design and construction of high-tech sensors, vision and quality control systems for the main industrial sectors. Flexibility and dynamism guide the company's work, while constant research allows Video Systems to develop high quality control systems where innovation offers concrete and customised solutions to meet the specific requirements of the customers. Video Systems develops advanced technology solutions thanks to its extensive expertise in **Artificial intelligence** since 2001: Video Systems solutions learn directly from the production line, with great advantages in terms of reliable results and cost reduction. Being specifically designed for the end user, Video Systems technology assures high performance and great ease of use. One of the most important sectors for the company is the hollow glass market, and **Imago** is our complete range of **advanced systems for in-line quality control in hollow glass production** - bottles, jars, etc. Imago systems are designed for contactless inspection of products: they have been **enriched with Artificial intelligence and developed to guarantee fault-finding of any kind of defect, while reducing false rejects to the minimum.** This equipment has been developed in cooperation with major hollow glass manufacturers, according to the requirements of special hollow glass production lines. Imago connection technology guarantees that all machines are equipped both with advanced connectivity regarding remote-assistance and monitoring and connection, and with corporate management systems. High-tech, outstanding performance, ease of use: this is the Imago world. Video Systems supplies **customised solutions** with a flexible approach that characterises the company's range of quality control systems. The company is specialised in the construction of models and simulations to find the right solution that matches customer needs, starting from the data supplied and an accurate study of the production line. This allows Video Systems to design and implement a **selected control system based on customer specification.** This operating method has been applied for years and, according to defined protocols, guarantees a top quality service in terms of product and assistance.

China Glass to be announced

Product Range

- **OPTICAL, NON-CONTACT THICKNESS MEASUREMENT TECHNOLOGY FOR VARIOUS GLASS PRODUCTS**

Container Glass

TMC-FLX- System for on-line, non-contact, wall thickness measurement at the cold end.

Float Glass

TMF-FLX-System for on-line, non-contact thickness, stress and temperature measurement at the hot end and cold end.

LabTMC®

Portable off-line, non-contact thickness measurement gauge; used for laboratory quality control or sample inspection at the production line.

Special Solutions

Tubular glass: on-line, off-line wall thickness measurement, diameter measurement and sorting.

Tableware: on-line wall thickness and glass distribution measurement.

Fibreglass: preform analyser.

Service

We provide various services to support our customers in every situation. For example: installation, training, maintenance, on-site trouble-shooting, repair, test measurement and guidance with any problems or issues our customers may have.

VMA GmbH is specialized in developing and manufacturing non-contact opto-electronic measuring and testing equipment for the glass industry worldwide.

VMA's engineers have been working in the glass industry for many years. They are perfectly familiar with the special demands on quality control of glass as well as the technological challenges of glass manufacturing.

Therefore, the company's measurement systems are designed in accordance with the special requests and needs of its customers – providing the best support for high-quality glass production.

INNOVATIVE SOLUTIONS FOR YOUR SUCCESS

Our customer base operates in tableware, cookware, foot storage, floral and candle, glass blocks, glass insulators and technical glass applications, such as washing machine windows and optical glass.

WORLD'S NO.1 LEADING PLANT TECHNOLOGY FOR THE GLASS INDUSTRY

LEADER IN INNOVATION, TECHNOLOGY, SUSTAINABILITY & COST-SAVING

Our family-owned company is a leading manufacturer of fully automated and electronically controlled production lines – from feeder up to annealing lehr.

Guaranteed quality through in-house manufacturing safeguards the best possible result, driven by our family heritage. Over time we have been successfully migrating our state of the art pressing, blowing, spinning, handling and fire polishing solutions into more than 250 manufacturing locations around the globe.

Driven by innovation, our teams work around the clock to re-engineer and upgrade your glass forming processes using the latest available machine and process technologies.

Transforming your Hot End operations through improved resource efficiencies, reduced energy consumption and higher efficiencies is our key challenge.

Our team of experienced engineers and fitters delivers worldwide support for process design, machine development, productivity improvement, commissioning and start-up services.

Our core business is the development and construction of batch and cullet plants.

We pride ourselves on being amongst our customers' most reliable partners with the infrastructure, expertise and capability to deliver projects of any magnitude.

As one of the few full-service providers in our industry, our spectrum covers all service areas within plant construction – engineering, planning, design, production, automation technology, installation, site management for all disciplines, commissioning, training for personnel, and services for ongoing operations.

Be it flat glass or hollow ware, Zippe batch plants ensure that the batch for every glass type is fully automatically fed into the furnace with the exact consistency and homogeneity needed, at

the required amount and at the right point in time – 24 hours a day, every day.

State-of-the-art control technology is a key element for optimal operation of a batch plant. There are around 40 Zippe automation and control systems specialists hard at work for you. This means we are one of the few companies able to develop complete control systems in-house.

Our 24-hour support service enables our customers to contact an expert around the clock either by phone or email.

Zippe has been focused on the future for more than 100 years and, having realized well over 650 batch plant projects, has the longest standing experience in our industry sector.

Zippe – right from the start.

Glass Magazines

1989

Glass-Technology International

GLASS-TECHNOLOGY INTERNATIONAL is the leading international magazine for professionals involved in the flat and bent glass industry, from building to automotive, and from furniture to household appliances. G-TI is useful for those working in float glass plants as well as glass processors/fabricators, glazing contractors, automotive glass installers, window and door manufacturers, glass merchants, wholesalers, etc. With about 100 pages per issue, it is the bi-monthly tool for keeping abreast of new technology, new products, company life and all innovations in the world of flat and bent glass.

The screenshot shows the glassOnline website interface. At the top, there are logos for glassOnline, FILTRAGLASS, and GB. Below the navigation bar, a large banner reads "Special cast irons & alloys for glass moulds". Underneath is a "DAILY NEWS" section with a search bar and a grid of news articles. The articles include headlines such as "Tanzania again invests in a BioPackaging Line/Boiler", "Vetropack: Bohoval wins Setais Packaging Award 2023", "Sahel green building: 300 solar panels installed at the HQ", "Oil jobs World Environment Day - Solutions to Plastic Pollution", "AMETEK Land: Flameproof housing for temperature measuring instruments", "GPD 2023 - Announcing the opening keynote speakers", "Eastman online glass configurator tool on Vanceva.com", and "FURNACES BATCH PLANTS".

glassOnline
The World's Leading Glass Industry Website

The screenshot shows a "Daily Newsletter" from glassOnline. It features several articles with images and text. The first article is titled "AMETEK Land: Flameproof housing for temperature measuring instruments" and includes a photo of a measuring instrument. The second article is "GPD 2023 - Announcing the opening keynote speakers" and includes a photo of a speaker. The third article is "Eastman: online glass configurator tool on Vanceva.com" and includes a photo of a computer screen. The newsletter also features logos for MAZZAROPPI, A+W, and Refractory Shop.
