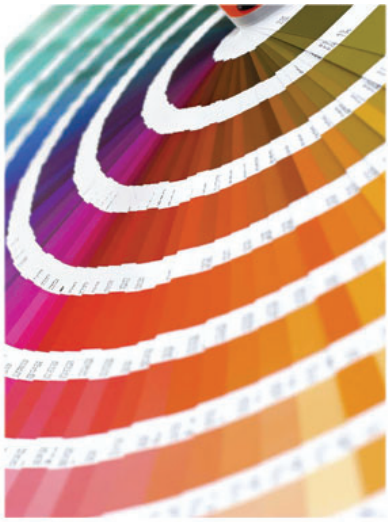
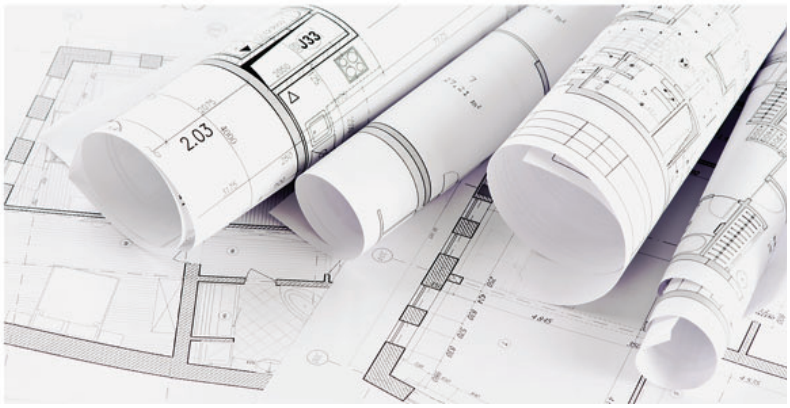
Brochure

Original HP large format printing materials & supplies

For graphics & technical applications





HP large format printing materials

Consistently outstanding image quality – that's what you see with HP large format printing materials. And with so many options in finish, size, and style, it's easy to find the ideal paper for almost any printing application.

Original HP printing materials are designed to work with the complete system – together with HP printing supplies and the HP DesignJet printer – to provide uncompromising quality, consistency, performance, durability, and value every time.

COLORPRO TECHNOLOGY

Ongoing HP innovation includes printing materials with ColorPRO Technology that perform to a strict set of specifications to meet industry-leading performance standards. All products with ColorPRO Technology utilize advanced technologies which have been designed together with Original HP inks and HP printers to optimize printing system performance.

Explore the wide range of different types of printing materials, specifically designed to meet the demands of graphics and technical professionals.

Original HP inks and HP printing materials–good chemistry

Original HP inks and HP printing materials are designed together to provide image quality, durability, and consistency you can rely on. Reliable results enable increased productivity and reduced costs.

Original HP inks are more than just ink, and HP large format printing materials are far more than just paper. It's the chemical makeup of each, together with the carefully engineered interaction between the two, that make exceptional results possible. Image quality and consistency so predictable, it's almost cliché. Print permanence that's measured in generations, not months or years. Breakthrough innovations that give you real alternatives to traditional materials that, by nature, must trade off quality, durability, even environmental considerations. The unique chemistry between HP inks and HP large format printing materials changes all that – among the broad array of materials offered in the HP large format printing materials portfolio, you can have it all.

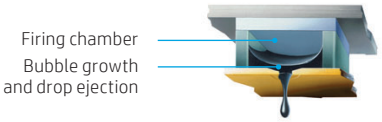
Science & technology

HP Thermal Inkjet technology
Inkjet is a digital printing technology that uses small drops of ink to form an image on a printed media. Drop-on-demand is one type of inkjet technology and it comes in two forms: Piezoelectric and Thermal. Piezoelectric inkjet technology uses mechanical means to eject ink. Thermal Inkjet technology uses heat to vaporize a thin layer of ink to form a bubble that expels a small drop of ink through an orifice or nozzle. These nozzles form part of a customer-replaceable printhead, which receives ink from ink cartridges via ink tubes.

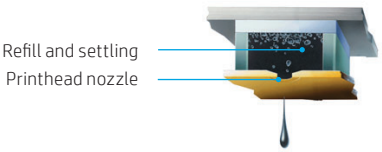
In 1984, HP introduced the first inkjet printer, the 'Thinkjet.' This technology, initially introduced with small-format printers, was quickly adopted for the HP DesignJet large format line of printers.

Firing a nozzle with HP Thermal Inkjet technology

A quick energy pulse is delivered to the resistor causing it to heat up. Then, bubble nucleation starts in the layer of ink next to the resistor.



The ink vapor bubble rapidly grows, forcing the ink meniscus to expand and it begins to form into a drop at the nozzle.



When the ink drop ejects, the ink vapor bubble collapses and ink flows into the firing chamber, refilling it.

HP Thermal Inkjet inks

Traditional water-based inks (dye- or pigment-based) use water as the primary ink vehicle.

Dye-based inks

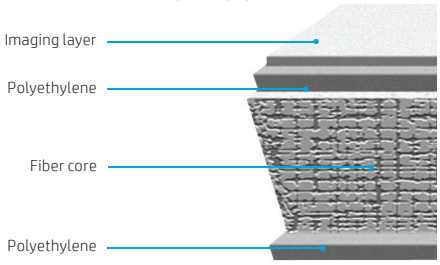
These inks contain colorant that provides extremely vivid colors, and are compatible with all inkjet coatings.

Pigment-based inks

Pigment-based inks contain finely ground pieces of a colored material. Due to their larger size, they are much more fade resistant than dye-based inks.

	Traditional water-based inks	
	Dye-based inks	Pigment-based inks
		Size	<10 nanometers	20-200 nanometers
Physical state	Dissolved in water	Dispersed in water
HP DesignJet printers	T series (colored inks)	T series (black ink only) Z series

Cross section of an HP photo paper



Inkjet receptive coatings

HP develops inkjet receptive coatings for print media such as paper, photo papers, films, and canvas. HP coatings are designed together with HP inks and printers in order to achieve optimum image quality and durability. The components of these coatings are determined by the properties of the media, the customer's workflow, and the large format printer.

Currently, HP offers more than 30 different types of large format printing materials, most of which are coated materials. The coating can be of a porous nature (typically used in matte fiber-based papers) or it can be swellable (used in traditional inkjet photo papers and films). Each coating formulation may have up to 15 ingredients. HP may develop up to 100 different formulations before the final definitive one is chosen.

Photo papers

A traditional photo paper is made of several layers, including the paper base (fiber core), a top and bottom extruded polyethylene layer, and a light-sensitive coating. Photo papers used in inkjet printers have a similar structure, but the light-sensitive coating is replaced by a transparent coating capable of absorbing the water-based inks: the imaging layer. These coatings can be of a swellable or nano-porous nature.

Swellable coatings, optimized for Original HP dye-based inks
The swellable coating inflates (swells) as the ink is absorbed, then shrinks as water evaporates. This drying process may take some time and the dye is trapped inside the coating. Swellable coatings are only compatible with dye-based inks and they offer excellent fade resistance when designed together with dye-based inks.

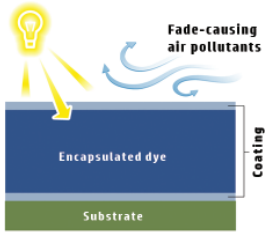
Advantages:

- Permanence (dyes are protected inside polymers)
- Image quality
- Gloss uniformity

Limitations:

- Dry time
- Water resistance
- Pigment compatibility

Swellable coatings subject the dye to light fade only



CONCEPT ONLY:
NOT TO SCALE

Porous coatings, optimized for Original HP pigment-based inks
Also known as porous or instant-dry, these coatings consist of microscopic particles that are bonded together. These particles form an open, porous structure. The ink is drawn into these open spaces by the capillary action of the coating which occurs during the printing process. These coatings are compatible with both dye- and pigment-based inks. However, when used with dye-based inks, it is important to protect the print (i.e., with lamination), if durability is desired.

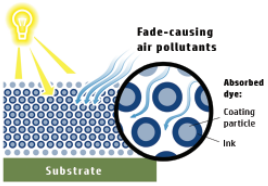
Advantages:

- Dry time
- Water resistance
- Gloss uniformity with dyes

Limitations:

- Permanence with dyes
- Scratch resistance with pigments
- Gloss uniformity with pigments

Porous coatings subject the dye to light and air fade



CONCEPT ONLY:
NOT TO SCALE

Value proposition

Value proposition of HP printing materials: image quality
Original HP large format printing materials make use of advanced HP-engineered coatings to take the guesswork out of producing high-quality, long-lasting prints. Designed together as a complete printing system, HP large format printers, Original HP inks, and HP printing materials deliver exceptional quality.

To achieve the best print quality results for every type of HP printing material, check for new 'paper presets' frequently at HPLFMedia.com/paperpresets.

COLORPRO TECHNOLOGY

Printing materials with ColorPRO Technology perform to a strict set of specifications to meet industry-leading performance standards. The specific technology behind media with ColorPRO Technology varies from product to product, however all products with ColorPRO Technology utilize advanced technologies which have been designed together with Original HP inks and HP printers to optimize printing system performance.

Value proposition of HP printing materials: permanence

Permanence refers to properties that define the ability of both the media and the printed image to resist light, air and humidity, fading, thermal degradation, and shelf-life issues.

HP designs and tests all of its inks and large format printing material combinations for optimal durability, knowing that different applications require different test requirements:

- Indoor, home and office display
- Indoor, commercial in-window display
- Outdoor display

HP performs all testing at HP facilities (San Diego, CA; Corvallis, OR; Barcelona, Spain; Singapore). In many cases, Wilhelm Imaging Research (WIR) verifies image permanence results. WIR has become a world-renowned, industry-leading third-party durability test facility for inkjet and other print technologies.

For example, Original HP Photo Inks (pigment-based inks), together with HP Professional Instant-dry Satin Photo Paper provide a display performance behind glass, indoors away from direct sunlight of up to 200 years (as per Wilhelm Imaging Research testing). In similar conditions, HP Premium Photo Papers (Gloss and Satin) printed with Original HP 711 inks last up to 70 years.

For more information, see **HPLFMedia.com/hp/printpermanence**.

Value proposition of HP printing materials: reliability

HP large format printing materials are designed and tested together with the HP printer and Original HP inks to provide a trouble-free printing experience. All Original HP printing materials are covered by an HP warranty. And in some cases, HP offers warranties tailored to specific sign and display application needs. For more information, see **HPLFMedia.com/MediaWarranties**.

Mechanical characteristics

The mechanical/physical properties of HP printing materials have a direct impact on printing reliability. HP designs and tests our printing materials to provide optimal media loading and paper advancement, which helps to avoid everyday printing issues, such as printhead crashes. Other important considerations during the design process are shown in the photo below:

Imaging characteristics

The imaging characteristics of the inkjet receptive layer developed by HP determine imaging properties as well as fade resistance and water resistance.

Value proposition of HP printing materials: environmental

1. Responsible sourcing and management

FSC®-certified HP printing materials (HPLFMedia.com/ecosolutions) carry the Forest Stewardship Council® (FSC) Mix label, signifying that these media support the development of responsible forest management worldwide.

Note: Not all FSC® certified products are available in all regions.

2. Recyclability and reuse
Many HP large format printing materials are recyclable through commonly available recycling programs. In addition, many other printing materials are eligible for free, convenient return and recycling through the HP Large Format Media take-back program[1] (see **HPLFMedia.com/ecosolutions)** including the following printing materials:

- HP Satin Wrapping Paper, 3-in Core
- HP Matte Litho-realistic Paper, 3-in Core
- HP Heavyweight Coated Paper
- HP Super Heavyweight Plus Matte Paper, 3-in Core

Value proposition of HP printing materials: consistency
Original HP large format printing materials, Original HP ink supplies, and HP DesignJet large format printers are designed together as a system to provide uncompromising image quality, consistency, performance, durability, and value every time.

Consistency is one key property considered during the manufacturing of HP printing materials. HP implements strict product qualification processes and Plan of Control (PoC) during the paper manufacturing and coating processes. This enables consistent and accurate results time after time. HP Super Heavyweight Plus Matte Paper is one example of this consistency. Its thick inkjet receptive layer is capable of uniformly holding all the ink during the printing process. This ability to uniformly hold the ink over the full width and length of the roll, as well as the paper's constant grammage across different rolls and manufacturing runs, is key. It enables a consistently high color gamut on this matte coated paper, plot to plot, roll to roll.

[1] HP Large Format Media take-back program availability varies. Some recyclable HP papers can be recycled through commonly available recycling programs. Recycling programs may not exist in your area. See **HPLFMedia.com/hp/ecosolutions** for details.

[2] Calculation by the HP IPG Environmental Technology Platform Team (and confirmed by an independent environmental life cycle assessment firm), based on the activities associated with the manufacturing of the product, and comparing 170 g/m^2 (5-ounce) HP HDPE Reinforced Banner to a traditional 440 g/m^2 (13-oz) PVC scrim product using the Swiss Center for Life Cycle Inventories Ecoinvent 2.0 database and model IPCC 2007 version 1.02; primarily for the category of PVC/PET/HDPE, and measuring materials extraction, transportation to the manufacturing site, and greenhouse gas emissions generated during manufacturing.

[3] Calculation by the HP IPG Environmental Technology Platform Team (and confirmed by an independent environmental life cycle assessment firm), based on the activities associated with the manufacturing of the product, and comparing 200 g/m^2 (6-ounce) HP Double-sided HDPE Reinforced Banner to a traditional 440 g/m^2 (13-oz) PVC scrim product using the Swiss Center for Life Cycle Inventories Ecoinvent 2.2 database and model IPCC 2007 version 1.02; primarily for the category of PVC/PET/HDPE, and measuring materials extraction, transportation to the manufacturing site, and greenhouse gas emissions generated during manufacturing.

EDUCATION

Print with the environment in mind

As you and your customers become increasingly concerned with the environmental impact of printing, look to HP for large format printing materials that reflect responsible sourcing practices and offer recycling options. FSC®-certified papers support the development of responsible forest management worldwide. Many HP graphics and technical printing materials are recyclable through commonly available recycling programs and select materials, optimized for sign and display applications, can be recycled through the free, convenient HP Large Format Media take-back program.[4]

HP bond & coated papers

Bond papers

HP Universal Bond Paper [5] FSC®-certified (Also available in 3-in core.)

HP Universal Bond Paper with ColorPRO Technology delivers professional quality and striking results at production speed. See more striking colors, crisper text and graphics, and higher-contrast blacks.

Weight: **80 g/m² (21 lb)** Thickness/caliper: **106 microns/4.2 mil** Whiteness: **160**[6] Brightness: **110%**[7] Opacity: **91%**[8]

HP Bright White Inkjet Paper [5] FSC®-certified (Also available in 3-in core.)

HP Bright White Inkjet Paper with ColorPRO Technology is our brightest white bond paper. This cost-effective paper is ideal for everyday black and color line drawings. See the ColorPRO difference with high-impact graphics and an extended range of colors.

Weight: **90 g/m² (24 lb)** Thickness/caliper: **119 microns/4.7 mil** Whiteness: **166**[6] Brightness: **113%**[7] Opacity: **94%**[8]

Coated papers

HP Coated Paper [5] FSC®-certified (Also available in 3-in core.)

Do more with this versatile premium bright white paper—from working comps and design proofs to fine line drawings and illustrations. This premium bright white paper is easy to handle and provides high-quality, consistent results.

Weight: **90 g/m² (24 lb)** Thickness/caliper: **114 microns/4.5 mil** Whiteness: **145**[9] Brightness: **89%**[10] Opacity: **>96%**[11,8]

HP Satin Wrapping Paper, 3-in Core [5] FSC®-certified

Print personal images, logos, and messages, with this customizable wrapping paper. Offer your customers this profitable, custom wrapping paper with little to no investment.

Weight: **100 g/m2** Thickness/caliper: **99 microns/3.9 mil** Whiteness: **>122**[9,14] Brightness: **>97%**[10] Opacity: **>90%**[11]

HP Universal Coated Paper [5] FSC®-certified (Also available in 3-in core.)

HP Universal Coated Paper is an economical material ideal for a variety of technical and graphics applications from working comps and design proofs to POP signage and special event posters.

Weight: **90 g/m² (24 lb)** Thickness/caliper: **124 microns/4.9 mil** Whiteness: **117**[12] Brightness: **89%**[10] Opacity: **89%**[11]

HP Universal Heavyweight Coated Paper [5] FSC®-certified

This economical printing material is ideal for a variety of medium ink-density graphics and technical applications including presentations, indoor signs, and posters that are frequently replaced.

Weight: **125 g/m² (35 lb)** Thickness/caliper: **172microns/6.8 mil** Whiteness: **133**[12] Brightness: **>97%**[10] Opacity: **>92%**[11]

HP Heavyweight Coated Paper [5] FSC®-certified (Also available in 3-in core.)

HP Heavyweight Coated Paper is ideal for durable, long-term applications such as signs and posters. The bright, matte inkjet paper makes colorful, light ink-density images look crisp and smooth.

Weight: **131 g/m² (35 lb)** Thickness/caliper: **167 microns/6.6 mil** Whiteness: **144**[12] Brightness: **89%**[10] Opacity: **96%**[11]

HP Super Heavyweight Plus Matte Paper [5] (Also available in 3-in core.)

HP Super Heavyweight Plus Matte Paper is a best-in-class graphics display media that delivers sharp image quality and ripple-free prints, even with high ink density. Enhance productivity with broad application versatility, instant dry time, and excellent film laminate compatibility. See a rich, distinctive look and feel with the ultra-white matte finish.

Weight: **200 g/m² (55 lb)** Thickness/caliper: **264 microns /10.4 mil** Whiteness: **>130**[12] Brightness: **100%**[10] Opacity: **98%**[11]

HP technical papers

HP Special Inkjet Paper [5] FSC®-certified
HP Special Inkjet Paper is an economical everyday paper, ideal for high/resolution presentation graphics.

Weight: **131 g/m²** Thickness/caliper: **172 microns/6.8 mil** Whiteness: **240**[12] Brightness: **92%**[10] Opacity: **92%**[11]

HP Natural Tracing Paper [5] FSC®-certified
HP Natural Tracing Paper is designed for reproducible final drawings that are highly durable.

Weight: **90 g/m²** Thickness/caliper: **76 microns/3 mil** Whiteness: **>120**[21] Brightness: **61%**[10] Opacity: **25%**[11]

HP Translucent Bond Paper [5]

This economical alternative to vellum is ideal for reproducible drawings and check prints.

Weight: **63 g/m²** Thickness/caliper: **71 microns/2.8 mil** Whiteness: **>113**[12] Brightness: **90%**[10] Opacity: **77%**[11]

HP films (graphics & technical)

HP Clear Film [13]

HP Clear Film is ideal for multiple overlays and transparent images. This optically clear film provides excellent ink adhesion and bleed control as well as bright, vivid colors.

Weight: **156 g/m²** Thickness/caliper: **119 microns/4.7 mil** Whiteness: **130**[12] Brightness: **>95%**[10] Opacity: **8%**[11]

HP Matte Film [13]

Keep track of changes during the review process. Redraw in pen, pencil, or marker on the erasable side, write with pen on the traditional drafting coating on the opposite side. This smear-resistant, archivable, and recyclable[13] film produces sharp black and color lines and uniform solid areas and is ideal for original and high-volume reproducible drawings.

Weight: **160 g/m²** Thickness/caliper: **127 microns/5 mil** Whiteness: **130**[12] Brightness: **72%**[15] Opacity: **34%**[16]

HP photographic papers

Optimized for Original HP dye-based inks

HP Universal Gloss Photo Paper [20] FSC®-certified

HP Universal Gloss Photo Paper is an economical and versatile choice for presentation graphics, displays, and color presentations.

Weight: **200 g/m²** Thickness/caliper: **187 microns/7.4 mil** Whiteness: **120**[12] Brightness: **>95%**[16] Opacity: **95%**[11]

HP Universal Satin Photo Paper [20] FSC®-certified

HP Universal Satin Photo Paper is a versatile, economical satin-finish paper that provides excellent image quality and vivid color for presentation graphics, displays, and presentations.

Weight: **200 g/m²** Thickness/caliper: **187 microns/7.4 mil** Whiteness: **120**[12] Brightness: **>95%**[16] Opacity: **95%**[11]

Optimized for Original HP pigment-based inks

HP Everyday Instant-dry Gloss Photo Paper [20] FSC®-certified

Designed for maximum ink absorption, this everyday gloss-finish photo paper includes a porous surface that enables higher ink density, speeds dry time, and achieves vibrant, long-lasting color. And this FSC®-certified paper is recyclable through commonly available recycling programs.[20]

Weight: **235 g/m²** Thickness/caliper: **231 microns/9.1 mil** Whiteness: **90**[21] Brightness: **90%**[18,16] Opacity: **96%**[11,22]

HP Everyday Instant-dry Satin Photo Paper [20] FSC®-certified

Designed for maximum ink absorption, this everyday satin-finish photo paper includes a porous surface that enables higher ink density, speeds dry time, and achieves vibrant, long-lasting color. And this FSC®-certified paper is recyclable through commonly available recycling programs.[20]

Weight: **235 g/m²** Thickness/caliper: **231 microns/9.1 mil** Whiteness: **90**[21] Brightness: **90%**[18,16] Opacity: **96%**[11,22]

[20] In North America and Asia (including Japan), recyclable in consumer collection systems that can accept mixed paper (may not be recyclable in your area); in Europe recyclable in consumer collection systems that accept liquid packaging.
[21] Per ISO 11476 Test Method.
[22] Per ISO 2471 Test Method.

HP photographic papers (continued)

HP Universal Instant-dry Gloss Photo Paper [23] FSC®-certified

This economical gloss-finish photo paper has been improved, now offering even higher image quality with deeper blacks and more vivid colors. Prints dry instantly for immediate handling and lamination. And indoor displays on this FSC®-certified paper provide exceptional display permanence.[24]

Weight: **200 g/m²** Thickness/caliper: **195 microns/7.7 mil** Whiteness: **99**[21] Brightness: > **92%**[18] Opacity: > **94.5%**[22]

HP Universal Instant-dry Satin Photo Paper [23] FSC®-certified

This economical satin-finish photo paper has been improved, now offering even higher image quality with deeper blacks and more vivid colors. Prints dry instantly for immediate handling and lamination. And indoor displays on this FSC®-certified paper provide exceptional display permanence.[24]

Weight: **200 g/m²** Thickness/caliper: **195 microns/7.7 mil** Whiteness: **99**[21] Brightness: > **92%**[18] Opacity: > **94.5%**[22]

HP Premium Instant-dry Satin Photo Paper [23] FSC®-certified

This premium satin-finish photo paper has been improved to offer unrivaled image quality for brilliant photos and high-impact display graphics—from posters and presentations to retail graphics. Prints dry instantly for immediate handling and lamination. And indoor displays on this FSC®-certified paper provide exceptional display permanence.[24]

Weight: **260 g/m²** Thickness/caliper: **261 microns/10.3 mil** Whiteness: **104**[12] Brightness: **92%**[18] Opacity: **97%**[11]

HP Premium Instant-dry Gloss Photo Paper [23] FSC®-certified

This premium gloss-finish photo paper achieves deep blacks and vivid colors on a brilliantly white sheet for high-quality photos and display graphics. Images seem to pop right off the page with this this FSC®-certified paper. Instant-dry prints can be laminated immediately.

Weight: **260 g/m²** Thickness/caliper: **261 microns/10.3 mil** Whiteness: **105**[12] Brightness: **92%**[18] Opacity: **97%**[11]

HP Professional Instant-dry Satin Photo Paper

This professional, satin-finish photo paper is ideal for printing photographs with vivid, true-to-life colors, realistic skin tones, rich blacks, and sharp details. The professional-grade weight adds a gallery-ready look and feel and enables easier handling of large-size exhibition prints. Long-lasting display prints provide exceptional display permanence.[24]

Weight: **300 g/m²** Thickness/caliper: **297 microns/11.7 mil** Whiteness: > **130**[14] Brightness: **>100%**[18, 16] Opacity: **> 97%**[11], **>95%**[22]

HP Premium Matte Photo Paper [23] FSC®-certified

This premium photo paper features a smooth matte surface together with a sturdy 210-g/m² weight ideal for producing professional, ripple-free prints. Instant-dry prints enable immediate lamination.

Weight: **200 g/m²** Thickness/caliper: **264 microns /10.4 mil** Whiteness: **130**[12] Brightness: **100%**[16] Opacity: **98%**[11]

HP Satin Wrapping Paper, 3-in Core [23] FSC®-certified

Print personal images, logos, and messages, with this customizable wrapping paper. Offer your customers this profitable, custom wrapping paper with little to no investment.

Weight: **100 g/m2** Thickness/caliper: **99 microns/3.9 mil** Whiteness: **122**[9] Brightness: **97%**[10] Opacity: **90%**[11]

[23] In North America and Asia (including Japan), recyclable in consumer collection systems that can accept mixed paper (may not be recyclable in your area); in Europe recyclable in consumer collection systems that accept liquid packaging.

HP banner & sign materials

HP Opaque Scrim

HP Opaque Scrim is a matte, opaque PVC banner with a tear-resistant polyester fabric embedded between two white vinyl layers. It is an easy-to-use, high-quality material for banners, decorating, and indoor and outdoor signs.

Weight: **495 g/m²** Thickness/caliper: **378 microns/14.9 mil** Whiteness: **127**[17] Brightness: **98%**[18] Opacity: **100%**[11]

HP Premium Matte Polypropylene, 2 Pack [13]

This versatile, durable matte polypropylene film is water-[48] and tear-resistant, making it ideal for both indoor and outdoor applications full of brilliant color and edge definition. And it's recyclable.[47]

Weight: **140 g/m²** Thickness/caliper: **231 microns (9.1 mil)** Whiteness: **140**[14] Brightness: **>99%**[18] Opacity: **96%**[11], **98%**[22]

HP Durable Semi-gloss Display Film

HP Durable Semi-gloss Display Film is an opaque, white inkjet-compatible coated PET film designed for pop-up display and roll-up indoor presentation systems. No backside lamination is needed, and this film is resistant to stress from rolling and unrolling.

Weight: **265 g/m²** Thickness/caliper: **198 microns/7.8 mil** Whiteness: **N/A** Brightness: **119%**[30] Opacity: **>99%**[29]

HP Everyday Matte Polypropylene, 2 Pack [13]

(Also available in 3-in core.)

Produce high-impact signs with this versatile, durable matte polypropylene film. This tear-resistant substrate is easy to use and handle, and is ideal for both indoor and outdoor applications.

Weight: **120 g/m²** Thickness/caliper: **203 microns/8 mil** Whiteness: >**113**[21] Brightness: **>101%**[16] Opacity: >**96%**[11]

HP Everyday Blockout Display Film

This economical display film has an innovative three-layer construction with polyester and polypropylene which produces rigid, durable displays with excellent lay-flat properties.

Weight:	Thickness/caliper:	Whiteness:	Brightness:	Opacity:
220 g/m²	**248 microns (9.8 mil)**	**133%**[21, 6]	**>95%**[30]	**>99%**[27], **100%**[27]

HP Durable Synthetic Banner, 2 Pack [13]

HP Durable Synthetic Banner is engineered with DuPont™ Tyvek® material and together with Original HP inks, produces moderately water-resistant[1] and tear-resistant prints. Indoor prints last over 75 years.

Weight:	Thickness/caliper:	Whiteness:	Brightness:	Opacity:
133 g/m²	**299 microns (11.8 mil)**	**125%**[22], **154**[5]	**>99%**[10], **>102%**[16]	**>96%**[11, 12]

HP fine art printing materials

HP Matte Litho-realistic Paper, 3-in Core [23] FSC®-certified

HP Matte Litho-realistic Paper delivers outstanding results with the look, feel, and longevity of a heavy, matte offset paper. This natural-white paper is ideal for high-quality poster art and other cost-effective art reproductions.

Weight: **269 g/m²** Thickness/caliper: **307 microns/12.1 mil** Whiteness: **95**[6] Brightness: **95%**[26] Opacity: **>98%**[11]

HP Artist Matte Canvas

HP Artist Matte Canvas has a natural, artistic look and feel for photo enlargements and reproductions. This affordable canvas produces true artistic quality with precise colors on a bright-white, slightly textured matte finish.

Weight: **390 g/m²** Thickness/caliper: **396 microns/15.6 mil** Whiteness: **117**[14] Brightness: **97%**[26] Opacity: **>99%**[11]

HP Professional Matte Canvas

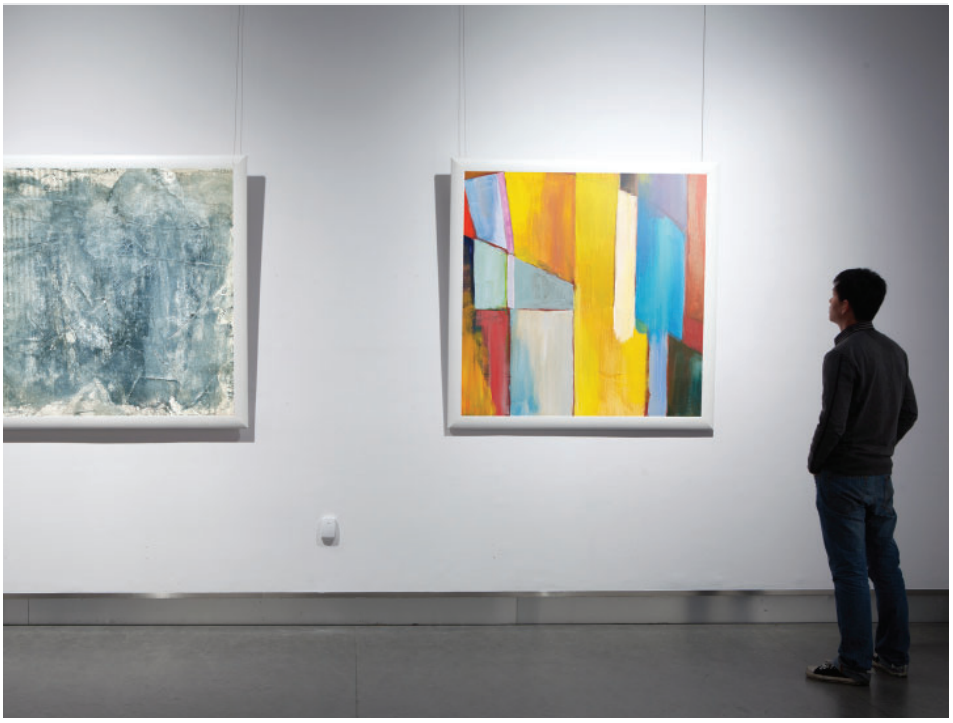
HP Professional Matte Canvas now offers a more consistent base fabric. Museum-quality, matte-finish prints achieve vivid, accurate color reproduction with a bright white surface and improved color gamut ideal for fine art and photographs.[62] Long-lasting, water-resistant[63] prints preserve your work. A flexible finish resists cracking for easier mounting. And broad laminate compatibility includes water-based liquid laminates.

Weight: **392 g/m²** Thickness/caliper: **459 microns/18.1 mil** Whiteness: **133**[14] Brightness: **101%**[26] Opacity: **>99%**[11]

HP Recycled Satin Canvas [23]

Meet environmental goals with this REACH compliant[2] canvas made with yarn from 100% recycled water bottles.[63] This affordable canvas provides single-step print production, eliminating the need for costly and time-consuming top coating and is also available for the HP take-back program [1].

Weight: **330 g/m²** Thickness/caliper: **441 microns/17.4 mil** Whiteness: **85**[14] Brightness: **89%**[26] Opacity: **>94%**[11]



[1] HP Large Format Media take-back program availability varies. Recycling programs may not exist in your area. See **HPLFMedia.com/ecosolutions** for details.

[2] Visit **HPLFMedia.com/ecosolutions** to see how to participate and for HP Planet Partners program availability; program may not be available in your area. Where this program is not available, consult the Material Safety Data Sheet (MSDS) available at **HPLFMedia.com/ecosolutions** to determine appropriate disposal.

HP graphics and technical printing materials

for HP large format printers

Compatibility and Availability Information

Original HP inks and HP printing materials–system chemistry

Original HP inks and printing materials are designed together to provide image quality, durability, and consistency you can rely on. Reliable results enable increased productivity and reduced costs.

Original HP inks are more than just ink, and HP large format printing materials are far more than just paper. It's the chemical makeup of each, together with the carefully engineered interaction between the two, that make exceptional results possible. Image quality and consistency so predictable, it's almost cliché. Print permanence that's measured in generations, not months or years. Breakthrough innovations that give you real alternatives to traditional materials that, by nature, must trade-off quality, durability, even environmental considerations. The unique chemistry between HP inks and HP large format printing materials changes all that – among the broad array of materials offered in the HP large format printing materials portfolio, you can have it all.

Original HP inks and printheads

Original HP printing supplies feature intelligent technology, built into the ink cartridges, printheads, and the printer. These critical system components communicate interactively to provide automatic and continuous adjustments that optimize print quality and maximize printhead life. Individually-replaceable printheads enable easy, low-maintenance, cost-effective printing.

Designed with the environment in mind

Many HP graphics and technical printing materials are recyclable through commonly available recycling programs. And in some cases, HP offers the free, convenient HP Large Format Media take-back program.[1] And the HP Planet Partners program provides easy, convenient return and recycling of most Original HP DesignJet ink cartridges and printheads.[2]

Compatibility & Availability Chart

Printer availability varies by region. Americas includes the United States, Canada, and Latin America. Europe includes Europe, Middle East, and Africa.

Take advantage of free return through the HP Large Format Media take-back program.

FSC®-certified HP printing materials carry the Forest Stewardship Council® (FSC) Mix label, signifying that these media support the development of responsible forest management worldwide.

Note: Not all FSC®-certified products are available in all regions.

REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals) is a regulation of the European Union, adopted to improve the protection of human health and the environment from risks that can be posed by chemicals.

The following HP large format printing materials have approved fire certifications. For more information see **HPLFMedia.com/hp/en/flame-resistant**.

	B1	NFPA	Class A	ASTM E84	ASTM E84-16
HP Opaque Scrim	●	●			
HP Removable Adhesive Fabric			●	●	
HP Backlit Polyester Film					●

36 Compatible only with the 36-inch (914 mm) version of the printer series.

44 Compatible only with the 44-inch (1118 mm) version of the printer series.

60 Compatible only with the 60-inch (1524 mm) version of the printer series.

1 HP Large Format Media take-back program availability varies. Programs may not exist in your area. See **HPLFMedia.com/ecosolutions** for details.

2 Visit **hp.com/recycle** to see how to participate and for HP Planet Partners program features and availability; program may not be available in your area. Where this program is not available, and for other consumables not included in the program, consult the Material Safety Data Sheet (MSDS) available at **hp.com/go/ecodata** to determine appropriate disposal.

3 Roll feed accessory required.

4 BMG trademark license code FSC®-C115319, see **fsc.org**. HP trademark licence code FSC®-C017543, see **fsc.org**. Not all FSC®-certified products are available in all regions.

5 Can be recycled through commonly available recycling programs.

6 Additional sizes available, please visit **HPLFMedia.com**.

7 Requires 3-in core adapter.

8 Papers can be recycled according to region-specific practices. In North America and Asia (including Japan), recyclable in consumer collection systems that can accept mixed paper (may not be recyclable in your area); in Europe recyclable in consumer collection systems that accept liquid packaging.

9 Compatible with the HP DesignJet Z3200 Photo Printer series only.

10 As of the date of this document, this product does not contain any of the chemicals on the EU's Candidate List for Authorization (otherwise known as Substances of Very High Concern) in concentrations exceeding 0.1%. To determine the status of SVHC in HP products, see the HP REACH Article 33 Declaration published at HP Printing Products and Consumable Supplies at **hp.com/hpinfo/globalcitizenship/environment/productdata/reachall-products.html**.
