## WELCOME

All of us at Green Fuse® Botanicals would like to welcome you to our 2021/2022 North American offerings. Our breeding program continues to expand with nearly fifty new varieties entering our program this year. We remain focused on delivering pioneering genetics to our grower partners. Green Fuse® Botanicals owns and operates Calico™ Genetics, our internal breeding company as well as a liaison to our global network of breeding partners. Calico™ Genetics strives to not only deliver revolutionary varieties to the marketplace, but to orient all breeding to the ultimate goal of grower ready solutions.

Our grower advantage breeding clearly extends to our end gardening consumer. This year we deliver the all NEW 24/7™ series of portulaca. The five bloom color series will remain open all day and night, solving a historic issue with portulaca sales. Our Rudbeckia Dakota™ series expands with three new colors. This series takes the traditional annual Rudbeckia offering and not only delivers zone hardiness as a first ever, but also adds daylength neutrality to allow year-round sales. These new introductions highlight our breeding strategy of innovation.

We at Green Fuse® Botanicals are constantly and systematically driven to the continuation of breeding breakthroughs delivered to the horticultural community. It is the trust and support of you, our growing partners, that is the true strength of the program. We strive for our partnership to ensure success for us both this season and for many to come.

## 2021-2022

### Equinox Perennials®

Iberis Chill™	54
Monarda Marje®	54

Lifestyle Plants™ is our selection of plants designed for the changing life-style needs of our customers. Lifestyle Plants™ can be grown for outdoor seasonal color or as indoor house plants. Year round availability brings all new options for seasonal programs. There are no boundaries to where we can bring color into our lives!

The breeding goal of the Green Fuse® Botanicals Optimum™ Annuals program is to deliver uniformity within each series for ease of production. Each color in each series will perform uniformly regardless of geography. The earliness to flower allows delivery any time of year.

The First Light® Perennial program contains first year flowering varieties that require no cold treatment (vernalization) to flower and are day length neutral. The goal of First Light Perennials® is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.

This collection of perennials exhibits extremely unique attributes that validate their inclusion into the Green Fuse® Botanicals perennial program. While they do require vernalization and/or long days, their flower intensity ensures excellent sell through.

proudly offered by our partners at

Strawberry Sherbet

### BEGONIA SHADOW KING®

The Green Fuse® Shadow King® series has small leaves and is heavily branched, making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. The complete, textural color selection will enhance any retail bench. Finished height will be 8" to 12".

Bred by Koppe. Plants protected under USPP 24,717; USPP24,738; USPP23,468; USPP27,483 and USPPAF

### BEGONIA REX BEWITCHED™

The strong upright growth and incredible leaf structure on the Bewitched™ series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs®, due to their aggressive growth pattern. A yearlong sales window, with such an excellent habit, it's just plain scary! Finished height of 12" to 18".

### ANIGOZANTHOS JOEJOE®

Anigozanthos JoeJoe® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. JoeJoe® works great in quarts through gallons. They will finish quickly easily allowing multiple turns in a season. Finished height is 12" to 15".

Orange

Red

Yellow

### ANIGOZANTHOS JUMP®

Anigozanthos Jump® are excellent in landscapes and for large containers. Jump® are larger growing plants with excellent disease resistance and drought tolerance. Hummingbirds find the brightly colored tubular flowers of these Anigozanthos irresistible. Finished height is 24" to 36".

Orange

Red

### ANIGOZANTHOS KANGA®

Anigozanthos Kanga® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. Kanga® is geared for quick turn gallon production. They will finish quickly easily allowing multiple turns in a season. Finished height is 17" to 20".

Cherry

Orange

Red

### CLEOME CLEMENTINE™

The combination of daylength neutrality and superior basal branching gives the Clementine™ series easy container fill in both small and large containers. Geared for the hottest environments, Clementine™ will throw massive blooms all season long. Mature height is 24" to 30".

Blush

Pink

Violet

### FUCHSIA WINDCHIMES® BASKET

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Finished height is 8" to 14".

### EUPHORBIA CRYSTAL™ WHITE

Euphorbia Crystal™ White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Mature height is 8" to 12".

Double Dark Eyes

### FUCHSIA WINDCHIMES® UPRIGHT

The Windchimes® Upright are sturdy enough to hold their upright habit while loaded with massive blooms, making them perfect for pot crops and combinations. They will flower in short days to hit the market extremely early. An excellent choice for the elusive shade combination. Finished height is 10" to 16".

### LOBELIA OCEANIS®

Lobelia Oceanis is a heat tolerant series with exciting “break-through” colors like our Lavender and Pink. All four Oceanis varieties flower so heavily that they create sensational mixed baskets and can also be used in containers and landscapes as featured stand-alone plants. Mature height is 4” to 7”.

Lavender

Blue

Pink

Shine

### NEMESIA MOMENTO®

Momento® are compact, making them ideal for 4” or quart production. Customers love the sweet fragrance of Momento®, growers love their ability to initiate flowers under higher night temperatures. Expect early spring flowers that continue with their unique summer performance. Mature height is 6” to 8”.

### PURSLANE HOT SHOT®

Hot Shot® are very early and have eye catching, large flowers. Their strong self-branching eliminates multiple pinches to create full baskets. Rose Flambeau is a must grow in your Purslane assortment. With its variegated foliage of lime, pink and cream in combination with bright pink flowers it looks outstanding alone or in a mixed container. Mature height is 4” to 6”.

Orange

### LOBULARIA MARINELAND®

Marineland® varieties will take the spring chill and the summer heat and flower abundantly, from top to bottom. Their well-behaved habit makes them perfect for season long combinations. The sub classification of the Frosty series combines both bright foliage contrast and deep flower highlights. Finished height is 3” to 5”.

**PETUNIA BLANKET®**

Every garden bed needs a Blanket® Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just 1 plant per basket. Their milliflora flowers require near zero maintenance for the consumer, even the doubles are excellent at self-cleaning. The ALL NEW Silver Surprise is an instant one plant combination! Plants will reach 6" to 8" in height with an impressive 36" spread.

**PLECTRANTHUS LION™**

The compact habit makes the Lion™ series an easy choice for summer and fall sales as they resist stretch under high temperatures. The perfect colors and foliage for both monoculture and combinations. Ideal for quart through patio containers. Mature height is 10” to 12”.

Blue

Pink

### RUDBECKIA RISING SUN® CHESTNUT GOLD

The first ever day length neutral Rudbeckia Hirta has proven itself an all-star award winner in trial gardens around the world. Chestnut Gold is ready for sales year round without the need for supplemental lighting. From the earliest of spring through autumn frost, Rising Sun is the only Rudbeckia needed in your Hirta program. Garden height is 18" to 24".

### RUDBECKIA RODEO™ DOUBLE RED

Fantastically unique fully double, deep red flowers will generate late spring sales through fall. Rodeo™ will deliver consumer excitement with never before seen color on this fan favorite genus. Coming into flower under long days, Rodeo™ Double Red will flower continuously until heavy frost. Garden height is 18" to 24".

**NEW**

### SALVIA CATHEDRAL®

Salvia Cathedral® is a true outdoor performer for all regions, including hot and humid environments. The series is early to flower with a wide range of colors. Their consistently uniform habit throughout the series allows row run shipping. Also perfect for multicolored mixed containers. Garden height is 12" to 16".

**LAVENDER DENTATA PARIS® BLUE**

Paris® Blue boasts an incredibly heavy branched habit, easily setting itself apart from the traditional Dentata. This bred habit allows for three to four times the blooms, while behaving perfectly in high density container production. Garden height is 12" to 15". Zone 7

**LAVENDER STOECHAS MADRID® MAGNUM PURPLE**

Madrid® Magnum Purple is a large growing Lavender stoechas selection, ideal for 2 gallon production. The Madrid® Magnum flowers produce an abundance of massive colorful bracts, resulting in a stunning display. Garden height is 15" to 20". Zone 7

**LAVENDER STOECHAS LAVISH®**

The Lavish® series is yet another breakthrough breeding program. Lavish® have compound flower heads that produce ridiculous amounts of beautiful bracts. The abundance of thick, false flowers brings retail hold capabilities for weeks. Among the earliest of all lavender to flower, Lavish® may hit the market early and will continually bloom for months. Garden height is 12" to 18". Zone 7

DARLING DAISY®

DOUBLE DARLING DAISY®

CARPET ANGEL DAISY®

DARLING DAISY® SUPREME

ANGEL DAISY®

**DARLING DAISY®**

Leucanthemum Darling Daisy® has a short stature and a small, pure white daisy flower. Darling Daisy® are continuous flowering, so they are easy to finish for early sales. Perfect for quarts and gallon containers. Garden height is 6" to 8". Zone 6

**DOUBLE DARLING DAISY®**

With a fully double flower and compact habit, Double Darling Daisy® is positioning itself as a crowd favorite. The snowball shaped flowers sit cleanly on this day length neutral selection for a tidy appearance throughout the entire growing season. Garden height is 8" to 10". Zone 5

**CARPET ANGEL DAISY®**

Yet another industry first in leucanthemum breeding, the world's only ground cover shasta daisy! Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3" to 4". Garden width is 18" to 20". Zone 4

**DARLING DAISY® SUPREME**

It is easy to see the supremacy of Darling Daisy Supreme®! With industry exclusive breeding program to develop multiple flowering branches along the same stem, Darling Supreme® rarely cycles out of color. This is a clear advancement for all leucanthemum breeding. Garden height is 12" to 15". Zone 3

DOUBLE ANGEL DAISY®

WHITE MOUNTAIN®

BETSY®

**ANGEL DAISY®**

Angel Daisy® is so early to flower, it makes production planning a snap. Angel Daisy® has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8" to 12". Zone 4

**WHITE MOUNTAIN®**

White Mountain® is also day length neutral. White Mountain® boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain® is the flag ship of the Green Fuse® Botanicals Leucanthemum program. Garden height is 18" to 24". Zone 4

**DOUBLE ANGEL DAISY®**

**NEW**

The all NEW Double Angel Daisy® throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy® perfectly, Double Angel Daisy® will boast the same finishing time and garden performance with a unique flower formation. Garden height 8" to 12". Zone 4

**BETSY®**

Betsy® is the world's largest flowering day length neutral shasta daisy. With flower sizes of 5" to 8" Betsy® will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy's® robust stature will impress! Garden height is 18" to 20". Zone 4

### LUPINE STAIRCASE®

The Lupine Staircase® Series is the pure definition of First Light™ perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. Red/White is a standout in this seven-color series. This also allows for a fantastic new fall crop. The Staircase® series allows any grower to become a lupine grower! Garden height is 18" to 24". Zone 3

#### IBERIS GIBRALTARICA CHILL™ LAVENDER

The Spring season just got a whole lot cooler with this selection. While this selection does require vernalization, its smooth lavender flowers are a welcomed achievement in this genus. Chill™ has been intentionally bred to bloom just a couple weeks later than traditional Iberis in order to greet the higher traffic in spring, rather than late winter. Garden Spread 15" to 18". Zone 4

#### MONARDA MARJE®

Marje® will require long days like other monarda, but unlike other monarda, Marje® has incredible resiliency to mildew. Its compact habit becomes loaded with unusually large blossoms through the summer and into the fall. Garden height is 12" to 15". Zone 4
