

# Banana Supreme Peppers

**Since the Banana Supreme F1 does look similar to a banana, this could be fun to grow in your garden and prank your friends and neighbors!**

## ***Capsicum annuum 'Banana Supreme' Scoville Units -0***

- **Use:** Don't get this confused with banana peppers! The Banana Supreme F1 pepper get their name from their color and shape which does resemble a banana. However Banana Supreme pepper plant will produce larger fruit at an earlier stage, and will grow sweet, tapered yellow peppers.
- **Exposure/Soil:** Full sun or at least 5-6 hours of afternoon sun. Water regularly, when top 3 in. of soil is dry. Use slow release fertilizer for best results. Keep water off leaves and flowers.
- **Growth:** Plants can grow 3 to 4 ft tall.
- **Hardiness:** 9-11, annual, houseplant.
- **Foliage:** Small leaves.
- **Flower:** Heavy yields of very sweet, tapered yellow fruit will turn brilliant red at maturity. These peppers are excellent for pickling, grilling, frying, and roasting, and are great to use for pizzas, sandwiches, salads, and stir-fry. This is one of the bigger pepper pods to grow, which will average to 7-8 inches long!
