

Bridelia exaltata (Brush Ironbark)

Bark is greyish brown. Rough and hard, but with some corky flakes. Yellowish green flowers form in July. Male and female flowers separate, but often on the same tree. The fruit is a glossy drupe, 1 cm in diameter. Orange brown in colour with small green or yellow spots. The leaves appear somewhat two ranked, giving the stem, especially on small plants, a zig-zag appearance.

Type: Tree to 15+m
Aspect: Full Sun
Soil: Well-drained
Habitat: Dry Sclerophyll

Special features:

- Attracts –
 - Bees
 - Birds
 - Butterflies
- Drought Tolerant
- Fragrant Flowers
- Park Tree
