elmeg D141

Sleek small DECT business handset

DECT handset, brilliant 2.4" TFT colour display with 8 lines, intuitive, icon-based user interface; vibration function, advanced handsfree talking, Headset connection via Bluetooth® or 2.5 mm jack, integration of hybrid phone book and voicemail

Product description

The speakerphone feature frees up your hands so you can perform other tasks while you talk or use the handset for teleconferencing. Thanks to the headset jack and Bluetooth® connectivity, you can use this handset with a wide range of wired and wireless headsets. Alongside the brilliant audio quality of the speakerphone feature, you can move within the office as you please. The vibrating alert lets you be available at all times without affecting others.

The large color display in combination with the icon-based user interface gives you easy access to be.IP plus system features and provides a range of convenient extras. The integrated system phone book lets you look up numbers and identify incoming callers. Users also receive alerts for new voice messages and can access their be.IP plus voicemail with the touch of a button. The handset itself provides a local contact list for up to 500 entries. Additional highlights include speed dialing, and the ability to schedule appointments, customer birthdays, or important family events. The Ring Off mode keeps the handset from ringing together with the desk telephone when your D141 is charging in its base. The vibrating alert makes sure you're not disturbed during meetings. A PIN-protected keypad lock keeps the device secure at all times. You can even set up notifications for new emails if desired.

A recent callers list and redial feature for the last 20 numbers dialed are of course included.

With 250 hours of standby and 12 hours of talk time, you can stay connected anywhere. Especially when used in combination with the elmeg DECT200 multi-cell system, you will always be reachable thanks to the system's integrated automatic handover from one radio cell to the next.
