What's New in SAP S/4HANA 1709 SPS09

THE BEST RUN **SAP**

Content

1 What's New

What's New in SAP S/4HANA provides you with delta information on all new, changed or deleted features of this product. The What's New Viewer provides the same information in an interactive format.

2   R&D/Engineering

2.1   Enterprise Portfolio and Project Management

2.1.1 Project System

2.1.1.1   Project System: Small Enhancements as Part of Customer Connection 2021

Improvements in *Project System* are available to you in the context of the SAP Customer Connection project for Product Lifecycle Management. These improvements are based on proposals submitted by customers through the Customer Influence program.

Technical Details

3 Sales

3.1 Order and Contract Management

3.1.1 Sales Billing

3.1.1.1 Maintain Billing Due Lists: Selection Field 'External Data' Renamed to 'Billing Document Requests'

In the *Documents to Be Selected* group box within the function to maintain billing due lists (transaction `VF04`/ report `SDBILLDL`), the selection field *External Data* has been renamed to *Billing Document Requests* for consistency and clarity. The functionality of the attached checkbox remains unchanged: selecting the checkbox tells the system to include billing document requests (BDRs) in the billing due list.

Technical Details

Type	Changed
Functional Localization	Not applicable
Scope Item	BD9 (Sell from Stock)
Application Component	`SD-BIL` (*Billing*)
Available As Of	SAP S/4HANA 1709 SPS09

Related Information

Creating Billing Documents via the Billing Due List

3.2 Country/Region Specifics

For country/region-specific changes, please see .

4   Cross Components

4.1   Information Lifecycle Management

4.1.1 Legal Hold Management for Mass Data

With this feature you can set legal hold on mass data.

You have the following options for execcuting E-Discovery in batch mode for handling mass data:

- *Server Group*: Enter the dedicated application server, if any, on which the E-Discovery should be executed in batch mode.
- *Max Processes*: Enter the maximum number of work processes that can be created in this application server, if applicable.

Technical Details

Type	Changed
Functional Localization	Not applicable
Scope Item	Not applicable
Application Component	`BC-ILM-LCM` (*Legal Case Management for ILM*)
Available As Of	SAP S/4HANA 1709 SPS09

Additional Details

- When you execute the E-Discovery program in background mode, you can see the *Status of Background E-Discovery Run* under *Legal Case Attributes*.

  You can check the logs for the scheduled E-Discovery run. To do so, navigate to ▶ *Other Functions* ❭ *Display E-Discovery History* ❭. Select the *Job Name* for the relevant E-Discovery report.
- For BOR objects: `ARC_LHM_PROPAGATE_LEGAL_HOLD` - You can select the legal case, which are to be propagated to the store, from the value help.
- Legal case closure: If the number of objects in a legal case is very large and the legal case needs to be set to status *Case Closed*, then you can schedule the legal case closure in background mode.
- If the number of records in a legal case are greater than 200, the system displays the *Maximum No. of Data Records* button. You can select this option to display 200, 500, or 1000 records at one time. You can select

Fetch Next 5000 Records to display the next set of 5000 records in addition to the existing records currently displayed on the screen.

Related Information

Setting Legal Holds

4.2 Country/Region Specifics

For country/region-specific changes, please see Country/Region Specifics [page 11].

5 Country/Region Specifics

5.1 Australia

5.1.1 Cross-Application Functions

5.1.1.1 Electronic Documents

5.1.1.1.1 Creation and Sending of Electronic, Self-Billing Tax Invoices

With this feature, you can create and send electronic, self-billing tax invoices to your suppliers over the Peppol network. You as a buyer can value goods or services from your suppliers and issue tax invoices on their behalf. Such tax invoices are known as self-billing tax invoice or recipient-created tax invoice (RCTI).

Technical Details

Type	New
Functional Localization	Localized for Australia
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-AU` (*Document Compliance Australia*)
Valid as Of	SAP S/4HANA 2020 SPS03
	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

You can create electronic self-billing tax invoices based on the following source documents:

- Supplier invoices created using the transaction *Enter Vendor Invoice* (`FB60`)
- Supplier invoices created using the transaction *Evaluated Receipt Settlement (ERS) with Logistics Invoice Verification* (`MRRL`)
- Supplier invoices created using the transaction *Enter Incoming Invoice* (`MIRO`)

Once you post a source document in the source application, the system creates and displays an electronic, self-billing tax invoice in the *Australia eInvoice* process in the *eDocument Cockpit* (transaction `EDOC_COCKPIT`). You can then send the electronic, self-billing tax invoice to the supplier by choosing *Submit* in the *Australia eInvoice* process.

Effects on Customizing

You carry out the following configuration activities to define the rule for generating and processing electronic, self-billing tax invoices:

- *Activating Source Type Documents for Company Code*
- *Assigning eDocument Type to Invoice Verification Transaction*
- *Assigning eDocument Type to Accounting Document Type*

In addition, you should maintain agreement texts in supplier master data. According to the Australian Taxation Office (ATO), you should include agreement texts in self-billing tax invoices. When generating a self-billing tax invoice, the system extracts the agreement text from the master data of the supplier and then shows it in the invoice.

You can also define your own logic for generating and processing electronic documents by implementing the Business Add-In *Enhancements for eDocument* (`EDOC_ADAPTOR`).

Related Information

Processing Self-Billing Tax Invoices
Activating Source Type Documents for Company Codes

Assigning eDocument Types to Invoice Verification Transactions
Enhancements for Electronic Documents
Maintaining Agreement Texts for Self-Billing Tax Invoices in Supplier Master Data

5.1.1.1.2 Determination of Company Code from Incoming Message Data

As of this release, you can extend your solution to derive the correct company code for your electronic documents if your system has different company codes using the same Peppol ID, for example, the same VAT Number.

Technical Details

Type	New
Functional Localization	Localized for Austria, Australia, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Poland, Sweden, Singapore, and New Zealand.
Scope Item	n/a
Application Component	`Document Compliance Framework` (*CA-GTF-CSC-EDO*)
Available As Of	SAP S/4HANA 1709 SPS09

Additional Details

You implement the *eDocument Incoming Data Determination* (EDOC_INCOM_DATA) to determine the correct company code to be included in the electronic documents.

5.2 Austria

5.2.1 Cross-Application Functions

5.2.1.1 Electronic Documents

5.2.1.1.1 Usability Improvements for Document Compliance Framework

The following features deliver usability improvements:

- Access of different sources of errors directly from the result list in the *eDocument Cockpit* (`EDOC_COCKPIT`) from the *Logs/File* column.

- Navigation from a source document (accounting documents, billing documents, and settlement documents) to the corresponding eDocument using Object Relationship Service (ORS).

Technical Details

Type	New
Functional Localization	Localized for Austria, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Portugal, Sweden
Scope Item	Not applicable
Application Component	CA-GTF-CSC-EDO (*Document Compliance Framework*)
Available As Of	SAP S/4HANA 1709 SPS09

Effects on Existing Data

Displaying the *Logs/File* column to open different sources of errors is only possible if the screen 0100 of function group EDOC_COCKPIT4 is used for the *eDocument Cockpit*.

> **i Note**
>
> If you have created your own development in the current screen of the *eDocument Cockpit* (program EDOC_COCKPIT/screen 0100), this isn't displayed when using the new screen.

Effects on Customizing

The following setting is required in Customizing to enable the *Logs/File* column in the *eDocument Cockpit* under ▶ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *General Settings* ❯ *Maintain General Parameters for eDocument* ◀:

Scope Item	n/a
Application Component	`Document Compliance Framework` (*CA-GTF-CSC-EDO*)
Available As Of	SAP S/4HANA 1709 SPS09

Additional Details

You implement the *eDocument Incoming Data Determination* (EDOC_INCOM_DATA) to determine the correct company code to be included in the electronic documents.

5.4   Brazil

5.4.1 Cross-Application Functions

5.4.1.1   Cloud Messages in NF-e/CT-e Monitor

With this feature, in the *NF-e/CT-e Monitor* (`J1BNFE`) transaction, you can view messages about a document during its processing, for example, when an NF-e isn't processed correctly because of SEFAZ connection issues. The messages come from the SAP Document Compliance, outbound invoicing option for Brazil service.

Technical Details

Type	New
Functional Localization	Localized for Brazil
Scope Item	Not applicable

Application Component	`LOD-LH-NFE` (*SAP Document Compliance outbound nota fiscal*)
Valid as Of	SAP S/4HANA 1610 SPS11

Effects on Existing Data

The document overview screen in the *NF-e/CT-e Monitor* (`J1BNFE`) transaction has been enhanced by a new column: *Cloud Log*.

Related Information

Electronic Fiscal Document Data

5.4.1.2   Electronic Documents

5.4.1.2.1   Consignment

This feature enables the consignment processes for Brazil, which represent the following situation: you receive the goods first, and then the goods are invoiced and paid later.

Technical Details

Type	New
Functional Localization	Localized for Brazil
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-BR` (*Document Compliance Brazil*)
Available As Of	SAP S/4HANA 1709 FPS09

Effects on Existing Data

The *eDocument Cockpit* (`EDOC_COCKPIT`) transaction displays the following processes:

- Brazil Csgmt Goods Receipt
- Brazil Csgmt Invoice Rec.

Related Information

Consignment Goods Receipt
Consignment Invoice Receipt

5.4.1.2.2 Future Delivery

This feature enables the future delivery processes for Brazil, which represent the following situation: goods are invoiced and paid first, and then you receive the goods later.

Technical Details

Type	New
Functional Localization	Localized for Brazil
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-BR` (*Document Compliance Brazil*)
Available As Of	SAP S/4HANA 1709 FPS09

Effects on Existing Data

The *eDocument Cockpit* (`EDOC_COCKPIT`) transaction displays the following processes:

- Brazil Fut. Del. Goods Receipt
- Brazil Fut. Del. Invoice Rec.

Related Information

[Future Delivery Goods Receipt](#)
[Future Delivery Invoice Receipt](#)

5.4.1.2.3 Returnable Package

This feature enables the returnable package scenario in business processes for Brazil. In this scenario, you can include returnable packages (for example, pallets or barrels) in your inventory at no value until they are returned to the vendor.

Technical Details

Type	New
Functional Localization	Localized for Brazil
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-BR` (*Document Compliance Brazil*)
Available As Of	SAP S/4HANA 1709 FPS09

Additional Details

The returnable package scenario is available on the following processes:

- Brazil Basic Process
- Brazil Csgmt Goods Receipt
- Brazil Fut. Del. Goods Receipt
- Brazil Normal Purchase
- Brazil Subcontracting

Effects on Customizing

To configure this feature, make the following settings in Customizing: *Cross-Application Components* *General Application Functions* *eDocument* *Country/Region-Specific Settings* *Brazil* *NF-e Specifics* *Define Item Type to CFOP Code* .

5.4.1.2.4 Gate Monitor

This feature enables gatekeepers in your company to allow or deny the entrance of goods into the company, based on the status of the fiscal documents on a particular shipment. Gatekeepers use the new transaction *eDocument Brazil: Gate Monitor* (`EDOC_BR_GATE_MONITOR`) to enter the access key of paper documents that come with the shipment, and the system provides the status of these documents to help gatekeepers decide.

Technical Details

Type	New
Functional Localization	Localized for Brazil
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-BR` (*Document Compliance Brazil*)
Available As Of	SAP S/4HANA 1709 FPS09

Effects on Existing Data

The area menu has been enhanced by the following new entry: ▌▶ *Cross-Application Components* ❯ *eDocument* ❯ *eDocument Brazil* ❯ *Gate Monitor* ▐.

Effects on System Administration

The *eDocument Brazil: Authorization for Gate Monitor* (`EDOBR_GATE`) authorization object is available. Administrators assign it to the relevant users of the `EDOC_BR_GATE_MONITOR` transaction.

Effects on Customizing

If you want to change the standard behavior of this feature, make the following settings in Customizing:

▶️ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *Country/Region-Specific Settings* ❯ *Brazil* ❯ *Business Add-Ins* ❯ *BAdI: Change Gate Monitor Settings* ⬛. This BAdI is optional.

5.7.1.1.2 Determination of eDocument Types

The eDocument types are determined for eDocuments by the standard system logics and your customizing configurations. As of this release, the process about how the eDocument types are determined for Document Compliance for Greece is introduced in the Application Help.

Technical Details

Type	New
Functional Localization	Localized for Greece
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-GR` (*Document Compliance Greece*)

Additional Details

For Document Compliance for Greece, there are different processes about determination of eDocument types based on the following types of source documents:

- Sales and Distribution (SD) or Financial Accounting (FI) Customer Invoices
- Invoice Verfication Documents
- FI Vendor Invoices

Related Information

Determination of eDocument Types

5.8 India

5.8.1 Contract Accounting

5.8.1.1   Tax Collected at Source (TCS)

With this feature, you can process the calculation of tax collected at source for India. Tax collected at source (TCS) is a tax payable by the seller of goods in India that the seller collects from the buyer at the time of sale. Section 206C of the income tax act governs the goods on which the TCS applies and the tax shall be collected from the purchaser.

Technical Details

Type	New
Functional Localization	Localized for India
Scope Item	Not applicable

Application Component	`FI-LOC-CA-IN` (*Contract Accounts Receivable and Payable: India*)
Valid as Of	SAP S/4HANA 2020 SPS03
	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

The following functions are enabled:

- You can process the TCS calculation:
  - The system compares the amount with the threshold defined in Customizing. If the amount is above the threshold, TCS is calculated for the amount that is over the threshold. If the document amount is below the threshold, no TCS is calculated.
  - The system accumulates the tax base amount and the tax amount including the FI documents created in the FI/LOG components. The accumulation always considers all the documents created in both components, the accumulation cannot be done in the components separately.
    The total accumulated amount (FI-CA and FI/LOG) is always used to calculate TCS.
- You can use the *Display Accumulated TCS Data (India)* report to display and check the accumulated tax collected at source (TCS) header and item data and the correctness of the posted TCS tax. The report collects the data from the accumulation database tables of both the FI-CA and the FI components.
- You can process (create, post, reverse) remittance challans for TCS items posted in *Contract Accounting* and transferred to *General Ledger*, when you need to remit a given sort of tax.
- Integration of the SD and FI-CA components: when you create an SD document, you release the document to accounting (that is, create and post a corresponding contract accounting document) so that the accumulation tables are updated and after that you can post new documents with TCS.

Related Information

Tax Collected at Source (TCS)
Prerequisites for Processing Tax Collected at Source (TCS)

5.8.2 Utilities

5.8.2.1   Tax Collected at Source (TCS) in Utilities

With this feature, you can process the calculation of tax collected at source for India, in the IS-UT (*SAP Utilities*) component.

Technical Details

Type	New
Functional Localization	Localized for India
Scope Item	Not applicable
Application Component	`IS-UT` (*SAP Utilities*)
Valid as Of	SAP S/4HANA 2020 SPS03
	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

Tax collected at source (TCS) is a tax payable by the seller of goods in India that the seller collects from the buyer at the time of sale. Section 206C of the income tax act governs the goods on which the TCS applies and the tax shall be collected from the purchaser. Any sale of goods by IS-Utilities customers exceeding a defined threshold in a financial year is subject to TCS.

The SAP Utilities solution is related to the TCS solution in *Contract Accounting*.

Prerequisites for Calculating TCS in Utilities

5.9   Ireland

5.9.1 Cross-Application Functions

5.9.1.1   Electronic Documents

5.9.1.1.1   Usability Improvements for Document Compliance Framework

The following features deliver usability improvements:

- Access of different sources of errors directly from the result list in the *eDocument Cockpit* (`EDOC_COCKPIT`) from the *Logs/File* column.
- Navigation from a source document (accounting documents, billing documents, and settlement documents) to the corresponding eDocument using Object Relationship Service (ORS).

Technical Details

Type	New
Functional Localization	Localized for Austria, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Portugal, Sweden
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO` (*Document Compliance Framework*)
Available As Of	SAP S/4HANA 1709 SPS09

Effects on Existing Data

Displaying the *Logs/File* column to open different sources of errors is only possible if the screen 0100 of function group `EDOC_COCKPIT4` is used for the *eDocument Cockpit*.

> **i Note**
>
> If you have created your own development in the current screen of the *eDocument Cockpit* (program `EDOC_COCKPIT/screen 0100`), this isn't displayed when using the new screen.

Effects on Customizing

The following setting is required in Customizing to enable the *Logs/File* column in the *eDocument Cockpit* under ▶ *Cross-Application Components* 〉 *General Application Functions* 〉 *eDocument* 〉 *General Settings* 〉 *Maintain General Parameters for eDocument* 〉:

Customizing view EDOGENCUSTV

5.9.1.1.2 Determination of Company Code from Incoming Message Data

As of this release, you can extend your solution to derive the correct company code for your electronic documents if your system has different company codes using the same Peppol ID, for example, the same VAT Number.

Technical Details

Type	New
Functional Localization	Localized for Austria, Australia, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Poland, Sweden, Singapore, and New Zealand.
Scope Item	n/a
Application Component	Document Compliance Framework (*CA-GTF-CSC-EDO*)
Available As Of	SAP S/4HANA 1709 SPS09

Additional Details

You implement the *eDocument Incoming Data Determination* (EDOC_INCOM_DATA) to determine the correct company code to be included in the electronic documents.

5.10 Luxembourg

5.10.1 Cross-Application Functions

5.10.1.1 Electronic Documents for Luxembourg

As of this release, you can create electronic documents using Document Compliance for Luxembourg.

Technical Details

Type	New
Functional Localization	Localized for Luxembourg
Scope Item	BD9 (Sell from Stock), BDD (Customer Returns), J59 (Accounts Receivable), 1EZ (Credit Memo Processing)
Application Component	CA-GTF-CSC-EDO-LU (*Document Compliance Luxembourg*)
Valid as Of	- SAP S/4HANA 2020 SPS03 - SAP S/4HANA 1909 SPS09 - SAP S/4HANA 1809 SPS07 - SAP S/4HANA 1709 SPS09 - SAP S/4HANA 1610 SPS11

Additional Details

The following apps are available for this feature:

App Name	Description
eDocument Cockpit	You can convert transactional documents, such as invoices into XML format and submit them to the end receivers. Receive electronic documents from business partners, such as your suppliers, and further process them.
eDocument: Processing in Background	You can schedule jobs to run actions on the electronic documents in the background.

In addition, for all customers you want to exchange electronic documents, you must maintain in their master data settings that identify them in the Peppol network.

Effects on System Administration

You can archive eDocuments using the archiving object `EDOCUMENT`.

Effects on Customizing

You must carry out the following Customizing activities:

Make general settings for creating electronic documents. Find the configuration steps in Customizing under ▶ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *General Settings* ◀:

- *Activate Source Type Documents for Company Code* (`EDOCOMPANYACTIV`)
- *Define Interface Type for eDocument* (`EDOINTTYPEV`)
- *Assign eDocument Type to Accounting Document Type* (`T003EDOC`)
- *Assign eDocument Type to Billing Document Type* (`TVFKEDOCV`)
- *Define Process Communication Through SAP Document Compliance Cloud Service* (`EDOCOMPPROCCOMV`)

Make settings required to exchange electronic documents among the participants of the Peppol network. Find the configuration steps under ▶ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *Country/Region Specific Settings* ❯ *Luxembourg* ❯ *Settings for Peppol* ◀:

- *Assign Party ID Types to Business Partner* (`EDOEUBUPAV`)
- *Assign Party ID Types to Companies* (`EDOEUCOMPV`)
- *Assign Business Partner Identification Types to party ID Types* (`EDOEUBPIDTYPEV`)
- *Define Bank Accounts for Company Code* (`EDOEUBANKACCV`)

Additionaly, you can configure several value mappings and fix values to better meet your business needs.

5.12.1.1.2 Determination of Company Code from Incoming Message Data

As of this release, you can extend your solution to derive the correct company code for your electronic documents if your system has different company codes using the same Peppol ID, for example, the same VAT Number.

Technical Details

Type	New
Functional Localization	Localized for Austria, Australia, Belgium, Denmark, Germany, Ireland, Netherlands, Norway, Poland, Sweden, Singapore, and New Zealand.
Scope Item	n/a
Application Component	Document Compliance Framework (*CA-GTF-CSC-EDO*)
Available As Of	SAP S/4HANA 1709 SPS09

Additional Details

You implement the *eDocument Incoming Data Determination* (EDOC_INCOM_DATA) to determine the correct company code to be included in the electronic documents.

5.13 New Zealand

5.13.1 Cross-Application Functions

5.13.1.1 Electronic Documents

You can send electronic invoices and credit notes to your customers via the Peppol network using SAP Document Compliance for New Zealand. You can also receive electronic invoices and credit notes from your suppliers via the Peppol network.

Technical Details

Type	New
Functional Localization	Localized for New Zealand
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-NZ` (*Document Compliance New Zealand*)
Valid as Of	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09

Additional Details

You use the following transactions to process electronic documents:

Transaction	Function
eDocument Cockpit (`EDOC_COCKPIT`)	You can convert invoices into XML format and submit them to the end receivers.

Transaction	Function
eDocument: Processing in Background (`EDOC_BACKGROUND`)	You can schedule jobs to run actions on electronic documents in the background.
Read Access Logging Manager (`SRALMANAGER`)	You can log and monitor read access to sensitive personal data in electronic documents.

In addition, you need to maintain the New Zealand Business Numbers (NZBN) of your companies and customers in the system. Companies are identified in the Peppol network by their NZBNs, which are also their Global Location Numbers (GLN).

If you play the customer role, your GLN is required in receiving supplier invoices from your suppliers.

Effects on System Administration

You can archive eDocuments using the archiving object `EDOCUMENT`.

Effects on Customizing

You need to carry out the following Customizing activities:

Customizing Activity	Path in Transaction SPRO
Activate Source Type Documents for Company Code	▐▶ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *General Settings* ❯
Define Interface Type for eDocument	
Assign eDocument Type to Accounting Document Type	
Assign eDocument Type to Billing Document Type	
Define Process Communication Through SAP Document Compliance Cloud Service	
Assign Party ID Types to Business Partner	▐▶ *Cross-Application Components* ❯ *General Application Functions* ❯ *eDocument* ❯ *Country/Region-Specific Settings* ❯ *Australia* ❯ *Settings for Peppol* ❯
Assign Party ID Types to Companies	
Define Bank Accounts for Company Code	

In addition, you need to configure some value mappings and fix values, which are required for XML mapping.

5.17   Saudi Arabia

5.17.1 Finance

5.17.1.1 Collective Expenditure Orders and Payment Orders

Collective Expenditure Orders and Payment Orders is a localized solution provided to public sector companies for processing payment towards suppliers. The solution meets the legal requirements of the Ministry of Finance and supports both cash-based and accrual accounting.

Technical Details

Type	New
Functional Localization	Localized for Saudi Arabia
Scope Item	J60 (Accounts Payable)
Application Component	`FI-LOC-FM-SA` (*Funds Management Saudi Arabia*)
Valid as Of	SAP S/4HANA 2020 SPS03
	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

In Saudi Arabia, public sector companies need to follow the process mandated by the Ministry of Finance to process payments towards their suppliers. Payment processing involves two documents - Expenditure Orders and Payment Orders.

SAP already provides the Expenditure Orders and Payment Orders solution for payment processing by public sector companies. However, this solution supports only cash-based accounting.

The new Collective Expenditure Orders and Payment Orders solution supports both cash-based and accrual accounting and meets the requirements of the Ministry of Finance.

If you need to create an incident regarding this feature, use the component `XX-CSC-SA-PS`.

Effects on Customizing

A new set of customizing activities has been provided to enable you to activate the solution and complete the customizing required for collective expenditure orders. You can access the customizing activities and extensibility options under the following node: ▐▷ *Financial Accounting (New)* ❭ *Accounts Receivable and Accounts Payable* ❭ *Business Transactions* ❭ *Country-Specific Settings* ❭ *Saudi Arabia* ❭ *Public Sector* ◀

5.21 Taiwan

5.21.1 Cross-Application Functions

5.21.1.1 Electronic Documents

5.21.1.1.1 Electronic Invoicing Using Exchange Mode

With this feature, if you play the supplier role in business-to-business transactions, you can do electronic invoicing in exchange mode.

Technical Details

Type	New
Functional Localization	Localized for Taiwan
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-TW` (*Document Compliance Taiwan*)
Valid as Of	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

A new process named *Taiwan eInvoice Exchange Mode* is now available in the *eDocument Cockpit.* This process enables you to perform the following tasks in doing electronic invoicing using exchange mode:

Document Type	Tasks
Electronic Invoice	• Create electronic invoices in XML format • Confirm rejections of electronic invoices initiated by customers, and create confirmation XML files • Cancel electronic invoices and create cancelation XML files • Track process statuses of electronic invoices

Document Type	Tasks
Electronic Allowance	- Create electronic allowances in XML format - Confirm cancelations of electronic allowances initiated by customers, and create confirmation XML files - Track process statuses of electronic allowances
Electronic, Customer-Created Allowance (Instead of you, as a supplier, creating allowances, your customers might create allowances for you.)	- Confirm customer-created allowances, and create confirmation XML files - Confirm cancelations of customer-created allowances, and create confirmation XML files - Track process statuses of customer-created allowances

Effects on Customizing

You must carry out the following Customizing activities to define the rule for generating and processing eDocuments:

- *Activate Source Type Documents for Company Code*
- *Define Interface Type for eDocument*
- *Determine eDocument Type by Billing Type and Customer Category*
- *Determine eDocument Type by Document Type and Customer Category*

In addition, you can define your own logic for generating and processing eDocuments by implementing the Business Add-In *Enhancements for eDocument* (EDOC_ADAPTOR).

5.22   Turkey

5.22.1 Cross-Application Functions

5.22.1.1 Electronic Documents

5.22.1.1.1 Electronic Delivery Notes for Goods Movements

With this feature, you can create electronic delivery notes in XML format based on material documents for goods movements.

Technical Details

Type	New
Functional Localization	Localized for Turkey
Scope Item	Not applicable
Application Component	`CA-GTF-CSC-EDO-TR` (*Document Compliance Turkey*)
Valid as Of	SAP S/4HANA 2020 SPS03
	SAP S/4HANA 1909 SPS05
	SAP S/4HANA 1809 SPS07
	SAP S/4HANA 1709 SPS09
	SAP S/4HANA 1610 SPS11

Additional Details

Electronic delivery notes for goods movements are supported in the *Turkey Delivery Note* process only. The system can create an electronic delivery note in the following **intracompany stock transfer** scenario:

1. You post a stock transfer from one plant to another, or from one storage location to another. As a result, a material document is posted.
2. The system generates and displays an electronic delivery note in the *Turkey Delivery Note* process.

Effects on Customizing

You must carry out the following configuration activities to define the rule for generating and processing electronic delivery notes for goods movements:

- *Activate Source Type Documents for Company Code*
- *Define Interface Type for eDocument*
- *Activate Additional eDocument Instance Creation*
- *Assign eDocument Type to Goods Movement Type*
