Typographic Conventions

Type Style	Description
<i>Example text</i>	Words or characters quoted from the screen. These include field names, screen titles, pushbuttons labels, menu names, menu paths, and menu options. Cross-references to other documentation.
Example text EXAMPLE TEXT	Emphasized words or phrases in body text, graphic titles, and table titles. Technical names of system objects. These include report names, program names, transaction codes, table names, and key concepts of a programming language when they are surrounded by body text, for example, SELECT and INCLUDE.
Example text	Output on the screen. This includes file and directory names and their paths, messages, names of variables and parameters, source text, and names of installation, upgrade and database tools.
Example text	Exact user entry. These are words or characters that you enter in the system exactly as they appear in the documentation.
<Example text>	Variable user entry. Angle brackets indicate that you replace these words and characters with appropriate entries to make entries in the system.
EXAMPLE TEXT	Keys on the keyboard, for example, F2 or ENTER.

Configuration Guide for Domestic Inbound Transportation

This document contains the master data and Customizing settings for the *Domestic Inbound Transportation* scenario. You must implement this scenario as described and once you have verified the functionality, you can modify the data to suit your own environment and operating conditions.

Change History

Version	Date	Description
1.0	December 2010	Initial version
1.1	April 2011	Harmonized configuration and master data; scenarios based on IDES
2.0	September 2012	Revised for SAP TM 9.0
3.0	December 2013	<ul style="list-style-type: none">• Updated for SAP TM 9.1• Removed sections on SAP Event Management

Important SAP Notes

You must read the following SAP Notes before you start using this test scenario. These SAP Notes contain the most recent corrections required to test the scenario.

Make sure that you have the current version of each SAP Note, which you can find on SAP Service Marketplace at <http://service.sap.com/notes>.

SAP Note Number	Description
1738013	TM: Integration with ERP Enhancement Packages

1 The Scenario

Some settings in this guide can be copied from the existing SAP ERP configuration. In particular, SAP ERP Customizing settings can be reused for the following:

- Defining enterprise structure and relevant assignments
- Financial accounting
- Controlling

If you require a scenario-specific enterprise structure, we recommend that you copy the existing, standard configuration settings (such as *Country Template for Company Codes incl. G/L Accounts*) and change them as necessary (for example, changing addresses).

Business system groups, logical systems, RFC connections, and system connections used throughout this guide are examples only. Replace these with your own data.

This guide also assumes the use of Business Add-Ins (BAdIs), which add a prefix or suffix to master data objects transferred from SAP ERP to SAP TM (see SAP Note [458914](#)). An overview of the prefixes and suffixes used is provided in the following table:

Business Object	Prefix	Suffix
Carrier	CA-	None
Customer	CU-	None
Plant	PL-	None
Shipping Point	SP-	None
Supplier	SU-	None
System	None	-@ERP001

For example:

Shipping point name in SAP ERP: 1200

Shipping point name in SAP TM: SP1200@ERP001

If you have not implemented the corresponding BAdI in your system, the names of the objects are not changed.

Prerequisites

Before you begin to configure the *Domestic Inbound Transportation* scenario, see the following guides in SAP Solution Manager under **SAP Transportation Management > Configuration Structures > Basic Settings for SAP TM <release>**:

- Basic Settings and Integration for ERP

- Basic Settings for SAP TM
- Integration of SAP TM and SAP Event Management
- Integration of Output Management
- Basic Settings for Visual Business

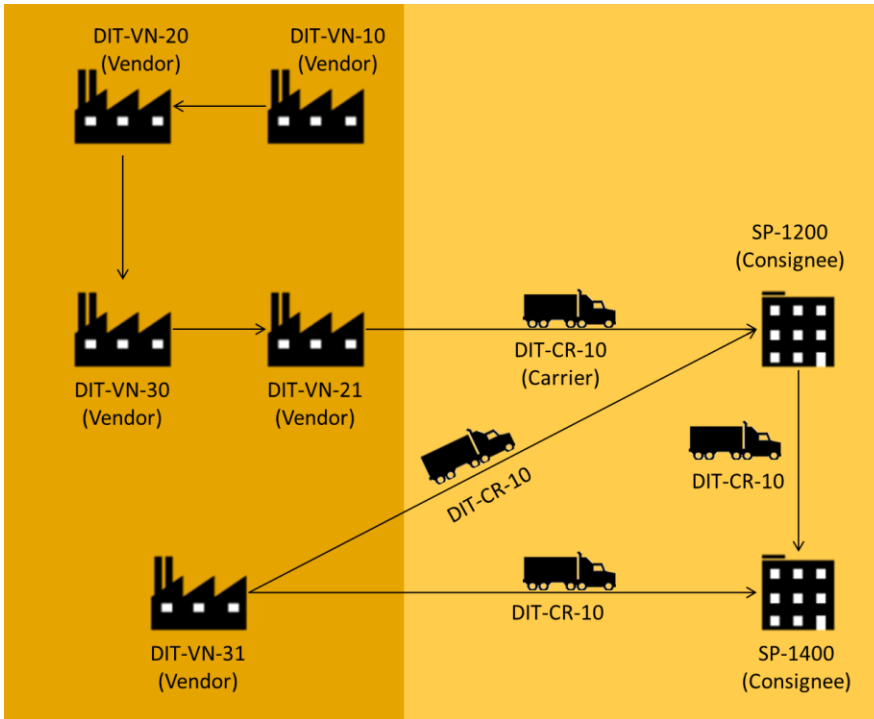

System Prerequisites

Your SAP ERP system must be configured to run the following processes:

- SD: Order-to-cash process:
 - Sales order entry
 - Delivery creation
 - Posting goods issue
 - Billing document creation
 - Transfer to accounting
- MM: Purchase order process:
 - Purchase order entry
 - Inbound delivery processing
 - Posting goods receipt
 - Logistics invoice verification
 - Invoice document creation (ERS settlement)
 - Transfer to accounting
- FI/CO
 - Supporting the processes listed above
 - Country-specific legal requirements (such as tax calculation)

Geography

The *Domestic Inbound Transportation* scenario describes a national transportation network with two vendors.

“Domestic Inbound Transportation” Scenario

Goods to be shipped are ordered by the ordering party and delivered to production plants in Munich and Dingolfing, Germany.

The goods are shipped from the vendor locations at which they were manufactured.

To use the transportation network as described in this document, you must ensure that the vendors and plants used in the customer system are located in the same vicinity.

The following organizational structures and document types are used by default and must be changed to customer-specific organizational structures as required.

Company code	1000
Controlling area	1000
Plant	<ul style="list-style-type: none"> • 1200 • 1400
Purchasing organization	1000
Storage location	0001
Shipping point	<ul style="list-style-type: none"> • 1200 • 1400
Purchase order type	NDI

2 Organizational Unit Configuration

Activities

- [Defining Organizational Units in SAP ERP](#) [Page 12]
- [Defining Organizational Units in SAP TM](#) [Page 18]

2.1 Defining Organizational Units in SAP ERP

The following IDES organizational units are used throughout this document:

- Controlling area 1000 (CO Europe)
- Company code 1000 (IDES AG)
- Purchasing organization 1000 (IDES Deutschland)
- Plants 1200 (Dresden) and 1400 (Stuttgart)

More Information

- [Defining Plants](#) [Page 13]
- [Defining Storage Locations](#) [Page 14]
- [Defining Shipping Points and Receiving Points](#) [Page 15]
- [Assigning Goods Receiving Points for Inbound Deliveries](#) [Page 17]

2.1.1 Defining Plants

Procedure

1. In Customizing for SAP ERP, choose ► *Enterprise Structure* ► *Definition* ► *Logistics – General* ► *Define, Copy, Delete, Check Plant* .
2. Choose *Define Plant*.
3. Select plants 1200 (Dresden) and 1400 (Stuttgart).
4. Choose *Address* or press **SHIFT+F5** and check that the addresses for the plants are as follows:
 - For plant 1200:

Field	Value
<i>Name</i>	Plant Dresden
<i>Street/House Number</i>	St. Petersburger Str. 9
<i>Postal Code/City</i>	01069 Dresden
<i>Country</i>	DE (Germany)
<i>Region</i>	14 (Saxony)
<i>Time Zone</i>	CET
<i>Language</i>	EN

- For plant 1400:

Field	Value
<i>Name</i>	Plant Stuttgart
<i>Search Term</i>	STUTTGART
<i>Street/House Number</i>	Sieglestr. 26
<i>Postal Code/City</i>	70469 Stuttgart
<i>Country</i>	DE (Germany)
<i>Region</i>	08 (Baden-Wuerttemberg)
<i>Time Zone</i>	CET
<i>Language</i>	EN

2.1.2 Defining Storage Locations

Procedure

1. In Customizing for SAP ERP, choose ► *Enterprise Structure* ► *Definition* ► *Materials Management* ► *Maintain Storage Location* ⌵.
2. Enter plant 1200 and choose *Continue*.
3. Delete all of the existing entries and create a new entry as follows:

Field	Value
<i>SLoc</i>	DIT1
<i>Description</i>	TM-DIT: StLoc

4. Repeat this procedure for plant 1400.

2.1.3 Defining Shipping Points and Receiving Points

In this procedure, you define shipping points and receiving points for the plants. The system uses the receiving point as the destination for the inbound transportation. The receiving point is then transferred to SAP TM using the Core Interface, resulting in a corresponding location of type 1003 (Shipping point) in SAP TM.

Procedure

1. In Customizing for SAP ERP, choose **Enterprise Structure** > **Definition** > **Logistics Execution** > **Define, Copy, Delete, Check Shipping Point**.
2. Choose *Define Shipping Point*.
3. Select entry 1200 (shipping/receiving Dresden) and choose *Details* or press CTRL+SHIFT+F2.
4. On the *Details* screen, choose *Address*.
5. Enter the following data:

Field	Value
<i>Name</i>	Shipping/Receiving Dresden
<i>Street/House Number</i>	St. Petersburger Str. 9
<i>Postal Code/City</i>	01069 Dresden
<i>Country/Region</i>	DE (Germany)
<i>Region</i>	14 (Saxony)
<i>Time Zone</i>	CET
<i>Language</i>	EN

6. Choose *Back* or press F3 to return to the overview screen.
7. Select entry 1400 (shipping/receiving Stuttgart) and choose *Details* or press CTRL+SHIFT+F2.
8. On the *Details* screen, choose *Address*.
9. Enter the following data:

Field	Value
<i>Name</i>	Shipping/Receiving Stuttgart
<i>Street/House Number</i>	Sieglestr. 26
<i>Postal Code/City</i>	70469 Stuttgart
<i>Country/Region</i>	DE (Germany)

<i>Region</i>	08 (Baden-Wuerttemberg)
<i>Time Zone</i>	CET
<i>Language</i>	EN

2.1.4 Assigning Goods Receiving Points for Inbound Deliveries

In this Customizing activity, you assign goods receiving points to the combination of plant and storage location.

Procedure

1. In Customizing for SAP ERP, choose **Logistics Execution > Shipping > Basic Shipping Functions > Shipping Point and Goods Receiving Point Determination > Assign Goods Receiving Points for Inbound Deliveries**.
2. Create entries with the following data:

Plant	Storage Location	Shipping Point
1200	DIT1	1200
1400	DIT1	1400

2.2 Defining Organizational Units in SAP TM

Activities

- [Transferring Organizational Data from SAP ERP to SAP TM](#) [Page 19]
- [Defining Business Partners for Receiving Points and Plants](#) [Page 21]
- [Assigning Business Partners to Locations](#) [Page 24]
- [Defining Geographical Data for Shipping and Receiving Points](#) [Page 26]
- [Defining Org. Unit for Planning & Execution Organization/Group](#) [Page 27]
- [Defining Organizational Unit for Purchasing Organization & Group](#) [Page 29]

2.2.1 Transferring Organizational Data from SAP ERP to SAP TM

In this procedure, you create and activate an integration model, which selects the plant and receiving point data and transfers it to SAP TM, thereby creating or updating locations and business partners.

In SAP TM, locations of type 1001 (plant) are created for the plants. Locations of type 1003 (shipping points) are created for the receiving points. The system automatically creates business partners with role BBP000 (vendor) for plants and shipping points. The business partners are assigned to the location.

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose ► *Logistics* ► *Central Functions* ► *Supply Chain Planning Interface* ► *Core Interface Advanced Planner and Optimizer* ► *Integration Model* ► *Create* ⌵.

2. Enter the following data:

Field	Value
<i>Model Name</i>	DIT
<i>Logical System</i>	Logical System ID of SAP TM target system
<i>APO Application</i>	ORG_DATA

3. In the *Material Dependent Objects* screen area, select the *Plants* checkbox.
4. In the *General Selection Options for Materials* screen area, enter plants 1200 and 1400 (multiple values).
5. In the *Material Independent Objects* screen area, select the *Shipping Points* checkbox and choose *Special Restrictions* to the right to open the respective selection screen.
6. Enter the shipping points 1200 and 1400 as multiple values.
7. Choose ► *Program* ► *Execute* ⌵ to continue. The system lists the selected filter objects (plants and shipping points) on the results screen along with the respective number of filtered objects.
8. Choose *Generate IM* to create the integration model.
9. Exit the transaction.
10. On the *SAP Easy Access* screen in SAP ERP, choose ► *Logistics* ► *Central Functions* ► *Supply Chain Planning Interface* ► *Core Interface Advanced Planner and Optimizer* ► *Integration Model* ► *Activate* ⌵.

11. Enter the following data:

Field	Value
<i>Model Name</i>	DIT

<i>Logical System</i>	Logical System ID of SAP TM target system
<i>APO Application</i>	ORG_DATA

12. Choose  *Program*  *Execute*  to continue. The created version of the selected integration model is listed.
13. Click the red cross (indicating that the integration model version is inactive) in the *New Status* column. The icon changes to a check mark (indicating that the integration model is active).
14. Choose *Start* from the toolbar to start the activation.
15. If necessary, confirm all dialog boxes to run the data transfer.

2.2.2 Defining Business Partners for Receiving Points and Plants

Procedure

1. Open *SAP NetWeaver Business Client* and choose ► *Master Data* ► *General* ► *Define Business Partner* ▾.
2. Choose *Organization* or press CTRL+F5.
3. Enter the following data:

Field	Value
<i>BP Number</i>	SP-1200
<i>Create in BP Role</i>	Business Partner (Gen.)
<i>Grouping</i>	0002 (External Number Assignment)

4. Choose the *Address* tab page and enter the following data:

Field	Value
<i>Name</i>	Shipping/Receiving Dresden
<i>Search Term 1/2</i>	DRESDEN
<i>Street/House Number</i>	St. Petersburger Str. 9
<i>Postal Code/City</i>	01069 Dresden
<i>Country</i>	DE
<i>Region</i>	14
<i>Time Zone</i>	CET
<i>Language</i>	Blank

5. Save your entries.
6. Repeat the above steps using the following data:

Field	Value
<i>BP Number</i>	SP-1400
<i>Create in BP Role</i>	Business Partner (Gen.)
<i>Grouping</i>	0002 (External Number Assignment)

Field	Value
<i>Name</i>	Receiving/Shipping Point, Plant 1400
<i>Search Term 1/2</i>	STUTTGART
<i>Street/House Number</i>	Sieglestr. 26
<i>Postal Code/City</i>	70469 Stuttgart
<i>Country</i>	DE
<i>Region</i>	08
<i>Time Zone</i>	CET
<i>Language</i>	EN

7. Repeat the above steps using the following data:

Field	Value
<i>BP Number</i>	PL-1200
<i>Create in BP Role</i>	Business Partner (Gen.)

Field	Value
<i>Name</i>	Plant Dresden
<i>Search Term 1/2</i>	DRESDEN
<i>Street/House Number</i>	St. Petersburger Str. 9
<i>Postal Code/City</i>	01069 Dresden
<i>Country</i>	DE
<i>Region</i>	14
<i>Time Zone</i>	CET
<i>Language</i>	EN

8. Repeat the above steps using the following data:

Field	Value
<i>BP Number</i>	PL-1400
<i>Create in BP Role</i>	Business Partner (Gen.)

Field	Value
<i>Name</i>	Plant Stuttgart
<i>Search Term 1/2</i>	TM-DIT
<i>Street/House Number</i>	Heilbronner Str. 319-339
<i>Postal Code/City</i>	70469 Stuttgart
<i>Country</i>	DE
<i>Region</i>	08
<i>Time Zone</i>	CET
<i>Language</i>	EN

2.2.3 Assigning Business Partners to Locations

In this procedure, you assign business partners to locations for receiving points and plants.

Procedure

1. In your SAP Transportation Management system, open SAP NetWeaver Business Client and choose ► *Master Data* ► *Transportation Network* ► *Locations* ► *Define Location* ►.
2. On the initial screen, enter the following data:

Field	Value
<i>Location</i>	SP1200 @ERP001
<i>Location Type</i>	1003 (Shipping Point)

3. Choose *Change* or press F6.
4. Choose the *General* tab page and enter the following data:

Field	Value
<i>BP Number</i>	SP-1200

5. Save your entries.
6. Repeat the above steps using the following data:

Field	Value
<i>Location</i>	SP1400 @ERP001
<i>Location Type</i>	1003 (Shipping Point)
<i>BP Number</i>	SP-1400

7. Repeat the above steps using the following data:

Field	Value
<i>Location</i>	PL1200 @ERP001
<i>Location Type</i>	1001 (Production Plant)
<i>BP Number</i>	PL-1200

8. Repeat the above steps using the following data:

Field	Value
<i>Location</i>	PL1400 @ERP001
<i>Location Type</i>	1001 (Production Plant)
<i>BP Number</i>	PL-1400

2.2.4 Defining Geographical Data for Shipping and Receiving Points

Procedure

1. In SAP NetWeaver Business Client (NWBC), choose **Master Data** > **Transportation Network** > **Locations** > **Define Location**.
2. On the initial screen, enter the following data:

Field	Value
Location	SP1200 @ERP001
Location Type	1003 (shipping point)

3. Choose **Change**.
4. On the **General** tab page, enter the following data in the **Geographical Data** screen area:

	Sign	Degree	Minutes	Seconds
Longitude	+	13	44	42
Latitude	+	51	2	53

5. In the **Geographical Data** screen area, enter the time zone **CET** and precision **1200**.
6. Return to the initial screen.
7. Repeat the above steps using the following data:

Field	Value
Location	SP1400 @ERP001
Location Type	1003 (shipping point)

	Sign	Degree	Minutes	Seconds
Longitude	+	9	10	29
Latitude	+	48	48	51

8. Enter time zone **CET** and precision **1200**.

2.2.5 Defining Org. Unit for Planning & Execution Organization/Group

Procedure

1. In SAP NetWeaver Business Client (NWBC), choose ► *Master Data* ► *Organization* ► *Create Organization and Staffing*.
2. In the *Create Root Organizational Object* dialog box, enter the current date in the *Valid From* field and December 31, 9999 in the *Valid To* field.
3. Choose the *Continue* pushbutton.
4. Choose the *Basic Data* tab page and enter the following data:

Field	Value
<i>Organizational Unit</i>	DIT-PEORG-1
<i>Description</i>	DIT Planning & Execution Org. DE

5. Choose the *Org. Data* tab page.
6. Choose *Create* and enter the following data:

Field	Value
<i>Org. Unit Function</i>	13 (Planning and Execution)
<i>Org. Unit Role</i>	1 (Organization)

The system completes the *Org. ID* field on the *Org. Data* tab page automatically. The ID for transportation planning and execution organization is required in the following configuration steps:

[Defining Freight Unit Types](#) [Page 100]

[Defining Freight Order Types](#) [Page 115]

7. Choose the *Address* tab page and enter the following data:

Field	Value
<i>Subtype</i>	Main address
<i>City</i>	Frankfurt
<i>Country</i>	DE

8. Select the new organizational unit listed under *Staff Assignments (Structure)*.
9. Choose *Create* to create a subordinate organizational unit.

10. Choose the relationship *Is line supervisor of Organizational unit* and continue.

11. Choose the *Basic Data* tab page and enter the following data:

Field	Value
<i>Organizational Unit</i>	DIT-PEGRP-1
<i>Description</i>	DIT Planning & Execution Group DE

12. Choose the *Org. Data* tab page.

13. Choose *Create* and enter the following data:

Field	Value
<i>Org. Unit Function</i>	13 (Planning and Execution)
<i>Org. Unit Role</i>	3 (Group)

The system completes the *Org. ID* field on the *Org. Data* tab page automatically. The ID for transportation planning and execution organization is required in the following configuration steps:

[Defining Freight Unit Types](#) [Page 100]

[Defining Freight Order Types](#) [Page 115]

14. Choose the *Address* tab page and enter the following data:

Field	Value
<i>Subtype</i>	Main address
<i>City</i>	Frankfurt
<i>Country</i>	DE

2.2.6 Defining Organizational Unit for Purchasing Organization & Group

Procedure

1. In *SAP NetWeaver Business Client* (NWBC), choose ► *Master Data* ► *Organization* ► *Create Organization and Staffing* ►.
2. In the *Create Root Organizational Object* dialog box, enter the current date in the *Valid From* field and December 31, 9999 in the *Valid To* field.
3. Choose the *Basic Data* tab page and enter the following data:

Field	Value
<i>Organizational Unit</i>	DIT-PORG-1
<i>Description</i>	DIT Purchasing Organization DE

4. Choose the *Org. Data* tab page.
5. Choose *Create* and enter the following data:

Field	Value
<i>Org. Unit Function</i>	2 (Purchasing)
<i>Org. Unit Role</i>	1 (Organization)

The system completes the *Org. ID* field on the *Org. Data* tab page automatically. The ID for the purchasing organization is required in the following configuration steps:

[Defining Freight Order Types](#) [Page 115]

[Defining Freight Agreements](#) [Page 196]

[Mapping Organizational Units for Purchasing](#) [Page 178]

6. Choose the *Address* tab page and enter the following data:

Field	Value
<i>Subtype</i>	Main address
<i>City</i>	Frankfurt
<i>Country</i>	DE

7. Select the new organizational unit listed under *Staff Assignments (Structure)*.
8. Choose *Create* to create a subordinate organizational unit.

9. Choose the relationship *Is line supervisor of Organizational unit* and continue.

10. Choose the *Basic Data* tab page and enter the following data:

Field	Value
<i>Organizational Unit</i>	DIT-PGRP-1
<i>Description</i>	DIT Purchasing Group DE

11. Choose the *Org. Data* tab page.

12. Choose *Create* and enter the following data:

Field	Value
<i>Org. Unit Function</i>	2 (Purchasing)
<i>Org. Unit Role</i>	3 (Group)

The system completes the *Org. ID* field on the *Org. Data* tab page automatically. The ID for the purchasing organization is required in the following configuration steps:

[Defining Freight Order Types](#) [Page 115]

[Defining Freight Agreements](#) [Page 196]

[Mapping Organization Units for Purchasing](#) [Page 178]

13. Choose the *Address* tab page and enter the following data:

Field	Value
<i>Subtype</i>	Main address
<i>City</i>	Frankfurt
<i>Country</i>	DE

3 Configuring Process Order Processing

Activities

- [Defining Document Types for Purchase Orders](#) [Page 33]
- [Maintaining and Assigning Partner Schema for Purchasing](#) [Page 36]
- [Defining Vendor Master](#) [Page 42]
- [Defining Material Master](#) [Page 59]
- [Maintaining Purchasing Contracts and Source Lists](#) [Page 77]

3.1 Configuring Document Types for Purchase Orders and Requisitions

Activities

- [Defining Document Types for Purchase Orders](#) [Page 33]
- [Defining Document Types for Purchase Requisitions](#) [Page 34]

3.1.1 Defining Document Types for Purchase Orders

Procedure

1. In Customizing for SAP ERP, choose ► *Materials Management* ► *Purchasing* ► *Purchase Order* ► *Define Document Types* ▾.
2. Create an entry with the following data by copying document type **NB** and all of its dependent entries:

Field	Value
<i>Type</i>	DIT1
<i>Doc. Type Descript.</i>	TM-DIT: Standard PO

3.1.2 Defining Document Types for Purchase Requisitions

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Purchase Requisition** > **Define Document Types**.
2. Create an entry with the following data by copying document type **NB** *without* dependent entries:

Field	Value
Type	DIT1
Doc. Type Descript.	TM-DIT: Standard PR

3. Select the new document type and choose *Allowed item categories* from the tree structure.
4. Create an entry with the following data:

Field	Value
ItCat.	Blank
Text for Item Cat.	Standard

5. Select the new entry and choose *Link purchase requisition – document type* from the tree structure.
6. Create new entries with the following data:

Field	Value
Document Type	DIT1
Item Category of Reference Document (Purchasing Document)	Blank
Item Category of Current Document (Purchase Requisition)	Blank
R/S (Contract Release / SA Schedule Line)	Blank

Field	Value
Document Type	MK
Item Category of Reference Document (Purchasing Document)	Blank
Item Category of Current Document (Purchase Requisition)	Blank

R/S (Contract Release / SA Schedule Line)	Selected
---	----------

3.2 Maintaining and Assigning Partner Schema for Purchasing

Activities

- [Defining Permissible Partner Roles per Vendor Account Group](#) [Page 37]
- [Defining Partner Schemas for Vendor Account Groups](#) [Page 38]
- [Assigning Partner Schemas to Vendor Account Groups](#) [Page 39]
- [Defining Partner Schemas for Purchasing Document Types](#) [Page 40]
- [Assigning Partner Schemas to Purchasing Document Types](#) [Page 41]

3.2.1 Defining Permissible Partner Roles for Each Vendor Account Group

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Partner Determination** > **Partner Roles** > **Define Permissible Partner Roles per Account Group**.
2. Check the following data and enter any values that are missing:

Partner Function	Account Group
OA	0001
OA	0002
VN	0001
PI	0001
PI	0005
GS	0001
GS	0002

i

In IDES, the partner function key **PI** (invoicing party) for language key **EN** (English) is replaced by partner function key **IP** (invoice presented by).

3.2.2 Defining Partner Schemas for Vendor Account Groups

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Partner Determination** > **Partner Settings in Vendor Master Record** > **Define Partner Schemas**.
2. Select partner schema **L1** (Vendor) and choose *Partner Functions in Procedure* in the tree structure.
3. Check the following entries and create them if they do not exist:

Partner Function	No Change	Mandatory
OA	Deselected	Deselected
VN	Selected	Selected
PI	Deselected	Deselected
GS	Deselected	Deselected

i
In IDES, partner function key **PI** (invoicing party) for language key **EN** (English) is replaced by partner function key **IP** (invoice presented by).

3.2.3 Assigning Partner Schemas to Vendor Account Groups

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Partner Determination** > **Partner Settings in Vendor Master Record** > **Assign Partner Schemas to Account Groups**.
2. Check the following data and create any entries that do not exist:

Field	Value
<i>Account Group</i>	0001
<i>Partner Schema Purchasing Organization</i>	L1

3.2.4 Defining Partner Schemas for Purchasing Document Types

Procedure

1. In Customizing for SAP ERP, choose **Materials Management > Purchasing > Partner Determination > Partner Settings in Purchasing Documents > Define Partner Schemas**.
2. Select partner schema 0001 (contracts).
3. Choose *Partner Functions in Procedure* from the tree structure.
4. Check the following data and enter any values that are missing:

Partner Function	No Change	Mandatory	End	Higher Level
OA	Deselected	Deselected	Deselected	Deselected
VN	Selected	Selected	Deselected	Selected
PI	Deselected	Deselected	Deselected	Deselected
GS	Deselected	Deselected	Deselected	Deselected

5. Choose *Partner Determination Procedures* from the tree structure.
6. Select partner schema 0002 (purchase order):
7. Choose *Partner Functions in Procedure* from the tree structure.
8. Check the following data and enter any values that are missing:

Partner Function	No Change	Mandatory	End	Higher Level
OA	Deselected	Deselected	Deselected	Deselected
VN	Selected	Selected	Deselected	Selected
PI	Deselected	Deselected	Deselected	Deselected
GS	Deselected	Deselected	Deselected	Deselected

In IDES, the partner function key **PI** (invoicing party) for language key **EN** (English) is replaced by partner function key **IP** (invoice presented by).

3.2.5 Assigning Partner Schemas to Purchasing Document Types

In this Customizing activity, you assign partner schemas to purchasing document types for partner assignments in purchasing documents.

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Partner Determination** > **Partner Settings in Purchasing Documents** > **Assign Partner Schemas to Document Types**.
2. Check the following data and create any entries that are missing:

Document Category	Document Type	Partner Schema
Purchase Order	DIT1	0002
Contract	MK	0001

3.3 Defining Vendor Master

Activities

- [Maintaining Vendor Account Groups](#) [Page 43]
- [Defining Vendor Master \(Vendor Company\)](#) [Page 44]
- [Defining Vendor Master for Vendor Locations \(Goods Supplier\)](#) [Page 47]
- [Maintaining Vendor Master for Vendor Subranges](#) [Page 49]
- [Defining Vendor Master for Carrier](#) [Page 51]
- [Transferring Vendor Master Data from SAP ERP to SAP TM](#) [Page 54]
- [Maintaining Geographical Data for Vendor Locations](#) [Page 56]
- [Assigning Locations to Incoterm Locations](#) [Page 58]

3.3.1 Maintaining Vendor Account Groups

Procedure

1. In Customizing for SAP ERP, choose ► *Logistics – General* ► *Business Partner* ► *Vendors* ► *Control* ► *Define Account Groups and Field Selection (Vendor)* ⌵.
2. Select account group 0001.
3. Choose *Details* or press F2.
4. Select the *Vendor sub-range relevant* checkbox.

3.3.2 Defining Vendor Master (Vendor Company)

In this procedure, you create the vendor master data for the vendor company. The vendor is the seller company in terms of purchasing and accounting. Therefore, you have to define the vendor master for both accounting and purchasing. The vendor is also to be used as the invoicing party.

Procedure

1. On the *SAP Easy Access* screen for SAP ERP, choose **Logistics > Materials Management > Purchasing > Master Data > Vendor > Central > Create**.
2. Create vendors assigned to purchasing organization 1000 according to the information below:

Vendor ID	Company Code	Purch. Organization	Account Group
DIT-VN-10	1000	1000	0001
DIT-VN-20	1000	1000	0001
DIT-VN-30	1000	1000	0001
DIT-VN-40	1000	1000	0001
DIT-VN-50	1000	1000	0001

3. On the *Create Vendor: Address* enter the following address data for each vendor. In each case, enter the title as *Company*.

Vendor ID	Name	Search Term	Address
DIT-VN-10	TM-DIT: Vendor 1 / Munich	TM-DIT	Frankfurter Ring 195 80687 Munich Bavaria DE
DIT-VN-20	TM-DIT: Vendor 2 / Nuremberg	TM-DIT	Nopitschstr. 67 90441 Nuremberg Bavaria DE
DIT-VN-30	TM-DIT: Vendor 3 / Dortmund	TM-DIT	Arminiusstr. 59 44149 Dortmund North Rhine Westfalia DE
DIT-VN-40	TM-DIT: Vendor 4 /	TM-DIT	Hauert 11

	Dortmund		44227 Dortmund North Rhine Westfalia DE
DIT-VN-50	TM-DIT: Vendor 5 / Kassel	TM-DIT	Henschelplatz 1 34127 Kassel Hesse DE

4. On the *Create Vendor: Accounting Information Accounting* screen, enter reconciliation account 160000 and cash management group E1 for each vendor.
5. On the *Create Vendor: Payment Transactions Accounting* screen, enter payment terms 0001 for each vendor.
6. On the *Create Vendor: Purchasing Data* screen, enter the following data for each vendor:

Field	DIT-VN-10	DIT-VN-20	DIT-VN-30	DIT-VN-40	DIT-VN-50
<i>Order Crcy</i>	EUR	EUR	EUR	EUR	EUR
<i>Incoterms</i>	EXW Munich (DIT-VN-10)	EXW Nuremberg (DIT-VN-20)	EXW Dortmund (DIT-VN-30)	EXW Dortmund (DIT-VN-40)	EXW Kassel (DIT-VN-50)
<i>GR-based Invoice Verification</i>	Selected	Selected	Selected	Selected	Selected
<i>Automatic Purchase Order</i>	Selected	Selected	Selected	Selected	Selected
<i>Purch. Group</i>	P01	P01	P01	P01	P01
<i>Plnd Dely Time</i>	1 day	1 day	1 day	1 day	1 day
<i>Conf. Ctrl</i>	0004	0004	0004	0004	0004

7. On the *Create Vendor: Partner Functions* screen, specify the following partner functions for each vendor:
 - VN
 - PI
 - GS
 - OA

In IDES, partner function `PI` (invoicing party) for language key `EN` (English) has been replaced by partner function key `IP` (invoice presented by).

3.3.3 Defining Vendor Master for Vendor Locations (Goods Supplier)

In this procedure, you create vendor master data for the individual ship-from locations, which differ from the vendor location that represents the company's headquarters in this country. Once you have created the vendor master data, it is transferred to SAP TM via CIF. The corresponding locations with location type 1011 (vendor) are created in SAP TM.

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose **Logistics > Materials Management > Purchasing > Master Data > Vendor > Purchasing > Create**.
2. Create new master data as follows:
 1. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-21
<i>Purchasing Organization</i>	1000
<i>Account Group</i>	0002

2. On the *Create Vendor: Address* screen, enter the following data:

Field	Value
<i>Title</i>	Company
<i>Name 1</i>	TM-DIT: Vendor 2 / Bamberg
<i>Search Term</i>	TM-DIT
<i>Street/House Number</i>	Hafenstr. 18
<i>Postal Code/City</i>	96052 Bamberg
<i>Country</i>	DE
<i>Region</i>	09
<i>Time Zone</i>	CET
<i>Language</i>	EN

3. On the *Create Vendor: Purchasing Data* screen, enter order currency **EUR**.
 4. On all of the other screens, leave the values initial.
 3. Create new master data with the following data:
 1. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-31
<i>Purchasing Organization</i>	1000
<i>Account Group</i>	0002

2. On the *Create Vendor: Address* screen, enter the following data:

Field	Value
<i>Title</i>	Company
<i>Name</i>	TM-DIT: Vendor 3 / Essen
<i>Search Term</i>	TM-DIT
<i>Street/House Number</i>	Hammacher Str. 100
<i>Postal Code/City</i>	45127 Essen
<i>Country</i>	DE
<i>Region</i>	05
<i>Time Zone</i>	CET
<i>Language</i>	EN

3. On the *Create Vendor: Purchasing Data* screen, enter order currency EUR.
4. On all of the other screens, leave the values initial.

3.3.4 Maintaining Vendor Master for Vendor Subranges

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose **Logistics > Materials Management > Purchasing > Master Data > Vendor > Purchasing > Change (Current)**.
2. On the initial screen, enter vendor `DIT-VN-20` and purchasing organization `1000`.
3. Select the *Partner functions* checkbox.
4. Choose *Enter* and navigate to the *Change Vendor: Partner Functions* screen.
5. In the menu, choose **Extras > Sub-ranges** to maintain vendor-specific subranges (VSR) of products.
6. Enter the following data:

Vendor Subrange (VSR)	VSR Description
P01	Product Group 01

7. In the menu, choose **Extras > Alternative Data** to maintain VSR-specific purchasing data.
8. Enter the following data on the *Alternative Data* screen:

Field	Value
<i>Vendor Subrange</i>	P01
<i>Purchasing Data</i>	Not selected
<i>Partner Functions</i>	Selected

9. Choose *Enter* to continue.
10. On the *Alternative Data: Partner Functions* screen, enter the following data:

Partner Function	Number
OA	DIT-VN-21
GS	DIT-VN-21

11. Return to the *Alternative Data Overview* screen.
12. Maintain the next vendor master with the following data.
13. On the initial screen, enter vendor `DIT-VN-30` and purchasing organization `1000`.
14. Select the *Partner functions* checkbox.
15. Choose *Enter* and navigate to the *Purchasing Organization Data: Partner Functions* screen.

16. In the menu, choose ► *Extras* ► *Sub-ranges* ► to maintain vendor-specific subranges (VSR) of products.

17. On the *Purchasing Organization Data: Vendor Subranges* screen, enter the following data:

Vendor Subrange (VSR)	VSR Description
P01	Product Group 01

18. In the menu, choose ► *Extras* ► *Alternative Data* ► to maintain VSR-specific purchasing data.

19. On the *Alternative Data* screen, maintain the following data:

Field	Value
<i>Vendor Subrange</i>	P01
<i>Purchasing Data</i>	Not selected
<i>Partner Functions</i>	Selected

20. Choose *Enter* to continue.

21. On the *Alternative Data: Partner Functions* screen, enter the following data:

Partner Function	Partner No.
OA	DIT-VN-31
GS	DIT-VN-31

22. Return to the *Alternative Data Overview* screen.

3.3.5 Defining Vendor Master for Carrier

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose ► *Logistics* ► *Materials Management* ► *Purchasing* ► *Master Data* ► *Vendor* ► *Central* ► *Create* ⌵.
2. Create new master data as specified below. In each case, choose *Enter* to switch to the next screen.

1. On the initial screen, enter the following data:

Field	Value
<i>Vendor No.</i>	DIT-CR-10
<i>Company Code</i>	1000
<i>Purchasing Organization</i>	1000
<i>Account Group</i>	0005

2. On the *Create Vendor: Address* screen, enter the following data:

Field	Value
<i>Title</i>	Company
<i>Name</i>	TM-DIT: Carrier 1
<i>Search Term</i>	TM-DIT
<i>Street / House Number</i>	Landsberger Str. 250
<i>Postal Code / City</i>	80687 Munich
<i>Country</i>	DE
<i>Region</i>	09
<i>Language</i>	EN

3. On the *Create Vendor: Control* screen, leave the values initial.
4. On the *Create Vendor: Accounting Information Accounting* screen, enter the following data:

Field	Value
<i>Reconciliation Account</i>	160000
<i>Cash Management Group</i>	E1

5. On the *Create Vendor: Payment Transactions Accounting* screen, enter payment terms 0001.

6. On the *Create Vendor: Purchasing Data* screen, enter the following data:

Field	Value
<i>Order Currency</i>	EUR
<i>Terms of Payment</i>	0001
<i>Evaluated Receipt Settlement</i> (AutoEvalGRSetmt Del.)	Not selected
<i>Service-based Invoice Verification</i> (Srv.-Based Inv. Ver.)	Selected
<i>Purchasing Group</i>	P01

7. On the *Create Vendor: Partner Functions* screen, enter the following data:

Partner Function	Partner No.
VN	DIT-CR-10
PI	DIT-CR-10
<p>i</p> <p>In IDES, partner function key PI (invoicing Party) for language key EN (English) is replaced by partner function key IP (invoice presented by).</p>	

3. Create new master data as follows:

1. On the initial screen, enter the following data:

Field	Value
<i>Vendor No.</i>	DIT-CR-20
<i>Company Code</i>	1000
<i>Purchasing Organization</i>	1000
<i>Account Group</i>	0005

2. On the *Create Vendor: Address* screen, enter the following data:

Field	Value
<i>Title</i>	Company
<i>Name</i>	TM-DIT: Carrier 2
<i>Search Term</i>	TM-DIT
<i>Street/House Number</i>	Eifelstr. 30

<i>Postal Code/City</i>	51371 Leverkusen
<i>Country</i>	DE
<i>Region</i>	05
<i>Language</i>	EN

3. On the *Create Vendor: Control* screen, leave the values initial.
4. On the *Create Vendor: Accounting Information Accounting* screen, enter the following data:

Field	Value
<i>Reconciliation Account</i>	160000
<i>Cash Management Group</i>	E1

5. On the *Create Vendor: Payment Transactions Accounting* screen, enter payment terms 0001.
6. On the *Create Vendor: Purchasing Data* screen, enter the following data:

Field	Value
<i>Order Currency</i>	EUR
<i>Terms of Payment</i>	0001
<i>Goods Receipt based Invoice Verification (GR-Based Inv. Verif.)</i>	Selected
<i>Evaluated Receipt Settlement (AutoEvalGRSetmt Del.)</i>	Not selected
<i>Service-based Invoice Verification (Srv.-Based Inv. Ver.)</i>	Selected
<i>Purchasing Group</i>	P01

7. On the *Create Vendor: Partner Functions* screen, enter the following data:

Partner Function	Partner No.
VN	DIT-CR-20
PI	DIT-CR-20

3.3.6 Transferring Vendor Master Data from SAP ERP to SAP TM

In this procedure, you create and activate an integration model, which selects the vendor master data and transfers it to SAP TM, creating or updating vendor locations and business partners.

Vendor locations of location type 1011 (vendor) are created in SAP TM for the vendor master of account group 0001 or 0002. Vendor locations of location type 1020 (transportation service provider) are created for the vendor master of account group 0005. Business partners with role `BBP000` (vendor) are created automatically for the vendor masters of account groups 0001 and 0002. Business partners with role `CRM010` (carrier) are created automatically for the vendor master of account group 0005. The business partner is assigned to the location.

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose **Logistics** > **Central Functions** > **Supply Chain Planning Interface** > **Core Interface Advanced Planner and Optimizer** > **Integration Model** > **Create**.
2. Enter the following data:

Field	Value
<i>Model Name</i>	DIT-IM-001
<i>Logical System</i>	Logical system ID of SAP TM target system
<i>APO Application</i>	VENDOR

3. Choose *Enter* to continue.
4. Select *Vendors* (in the *Material Independent Objects* screen area) and choose the pushbutton to the right to specify the restrictions.
5. In the *Vendors* screen area, enter the following data:

Field	Value
<i>Vendor</i>	DIT*
<i>Purchasing Org.</i>	1000
<i>Create Loc./BP</i>	2 (both location and business partner)

6. Choose **Program** > **Execute** to continue. The selected filter object *Material Master Data* and the number of filtered objects are listed on the result screen.
7. Choose *Generate IM* to create the integration model.
8. Exit the transaction.
9. On the *SAP Easy Access* menu, choose **Logistics** > **Central Functions** > **Supply Chain Planning Interface** > **Core Interface Advanced Planner and Optimizer** > **Integration Model** > **Activate**.

10. Enter the following data:

Field	Value
<i>Model Name</i>	DIT-IM-001
<i>Logical System</i>	Logical System ID of SAP TM target system
<i>APO Application</i>	VENDOR

11. Choose  *Program*  *Execute*  to continue. The created version of the selected integration model is listed.
12. Choose the cross (indicating that the integration model version is inactive) in the first row and column *New Status*. The icon changes to a check mark (indicating that the integration model is active).
13. Choose *Start* to begin activation.
14. If necessary, confirm all dialog boxes to run the data transfer.

3.3.7 Maintaining Geographical Data for Vendor Locations

Procedure

1. In SAP TM, open SAP NetWeaver Business Client and choose **Master Data > Transportation Network > Locations > Define Location**.
2. On the initial screen, enter the following data:

Field	Value
Location	SUDIT-VN-10 @ERP001
Location Type	1011 (vendor)

3. Choose *Change*.
4. Choose the *General* tab page.
5. Check the following geographical data and enter any that is missing:

	Sign	Degree	Minutes	Seconds
Longitude	+	11	35	50
Latitude	+	48	11	16

6. Enter the time zone *CET* and precision *1200*.
7. Return to the initial screen and enter the following data for location *SUDIT-VN-20@ERP001* (type *1011*):

	Sign	Degree	Minutes	Seconds
Longitude	+	11	3	31
Latitude	+	49	25	45

8. Enter the time zone *CET* and precision *1200*.
9. Return to the initial screen and enter the following data for location *SUDIT-VN-21@ERP001* (type *1011*):

	Sign	Degree	Minutes	Seconds
Longitude	+	10	52	26
Latitude	+	49	54	30

10. Enter the time zone *CET* and precision *1200*.
11. Return to the initial screen and enter the following data for location *SUDIT-VN-30@ERP001* (type *1011*):

	Sign	Degree	Minutes	Seconds
<i>Longitude</i>	+	7	25	16
<i>Latitude</i>	+	51	31	14

12. Enter the time zone CET and precision 1200.

13. Return to the initial screen and enter the following data for location SUDIT-VN-31@ERP001 (type 1011):

	Sign	Degree	Minutes	Seconds
<i>Longitude</i>	+	7	1	9
<i>Latitude</i>	+	51	27	48

14. Enter the time zone CET and precision 1200.

15. Return to the initial screen and enter the following data for location SUDIT-VN-40@ERP001 (type 1011):

	Sign	Degree	Minutes	Seconds
<i>Longitude</i>	+	7	24	6
<i>Latitude</i>	+	51	29	23

16. Enter the time zone CET and precision 1200.

17. Return to the initial screen and enter the following data for location SUDIT-VN-50@ERP001 (type 1011):

	Sign	Degree	Minutes	Seconds
<i>Longitude</i>	+	9	29	9
<i>Latitude</i>	+	51	20	1

18. Enter the time zone CET and precision 1200.

3.3.8 Assigning Locations to Incoterm Locations

Procedure

1. In SAP TM, open SAP NetWeaver Business Client and choose **Master Data** > **Transportation Network** > **Locations** > **Assign Location to Incoterm Location**.
2. Create entries with the following data:

Incoterm Location (Free Text)	Location
Munich (DIT-VN-10)	SUDIT-VN-10 @ERP001
Nuremberg (DIT-VN-20)	SUDIT-VN-20 @ERP001
Bamberg (DIT-VN-21)	SUDIT-VN-21 @ERP001
Dortmund (DIT-VN-30)	SUDIT-VN-30 @ERP001
Essen (DIT-VN-31)	SUDIT-VN-31 @ERP001
Dortmund (DIT-VN-40)	SUDIT-VN-40 @ERP001
Kassel (DIT-VN-50)	SUDIT-VN-50 @ERP001

3.4 Defining Material Master

Activities

- [Defining Material Masters](#) [Page 60]
- [Transferring Material Master Data from SAP ERP to SAP TM](#) [Page 75]

3.4.1 Defining Material Masters

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose ► *Logistics* ► *Materials Management* ► *Material Master* ► *Material* ► *Create (General)* ► *Immediately* .
2. On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-10-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)

3. Choose *Select View(s)* and select the following views:
 - Basic Data 1
 - Purchasing
 - MRP 1
 - MRP 2
 - General Plant Data / Storage 1
 - Accounting 1
4. Select the *Create views selected* checkbox and choose *Org. Levels*.
5. In the *Organizational Levels* dialog box, enter plant 1200 and storage location DIT1.
6. Continue to maintain your master data as follows:

1. Choose the *Basic Data 1* tab page and enter the following information:

Field	Value
<i>Material Description</i>	Material for Domestic Inbound Transp.
<i>Base Unit of Measure</i>	EA (each)
<i>Material Group</i>	001
<i>General Item Category Group</i>	NORM
<i>Gross Weight</i>	5.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	5.0
<i>Volume</i>	20000

<i>Volume Unit</i>	CCM (cubic centimeter)
<i>Material Group for Packaging</i>	-

2. Choose the *Purchasing* tab page and enter the following data:

Field	Value
<i>Purchasing Group</i>	P01
<i>Automatic Purchase Order Allowed</i> (Autom. PO)	Selected
<i>Purchasing Value Key</i>	3
<i>Source List</i>	Selected

3. Choose the *MRP 1* tab page and enter the following data:

Field	Value
<i>MRP Type</i>	PD
<i>MRP Controller</i>	001
<i>Lot Size</i>	EX

4. Choose the *MRP 2* tab page and enter the following data:

Field	Value
<i>Procurement Type</i>	F
<i>Storage Location for External Procurement</i> (Storage Loc. for EP)	DIT1
<i>Planned Delivery Time</i>	1 (day)
<i>Scheduling Margin Key</i>	000

5. Choose the *Accounting 1* tab page and enter the following data:

Field	Value
<i>Valuation Class</i>	3000
<i>Price Control</i>	S
<i>Standard Price</i>	10.00

7. Save your entries and return to the initial screen.

8. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-10-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-10-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	10.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	10.0
<i>Volume</i>	30000
<i>Volume Unit</i>	CCM (cubic centimeter)

9. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-20-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-10-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
-------	-------

<i>Gross Weight</i>	7.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	7.0
<i>Volume</i>	25000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 20 . 00.

10. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-20-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-20-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

11. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-21-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-20-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	6.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	6.0
<i>Volume</i>	30000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 21 . 00.

12. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-21-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-21-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	7.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	7.0
<i>Volume</i>	30000
<i>Volume Unit</i>	CCM (cubic centimeter)

13. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-30-1

<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-21-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Material Group</i>	001
<i>Gross Weight</i>	2.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	2.0
<i>Volume</i>	10000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 30 . 00.

14. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-30-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-30-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
--------------	--------------

<i>Material Group</i>	001
<i>Gross Weight</i>	3.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	3.0
<i>Volume</i>	10000
<i>Volume Unit</i>	CCM (cubic centimeter)

15. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-31-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-30-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	2.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	2.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 31.00.

16. Repeat the above steps using the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-31-2

<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-31-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	3.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	3.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

17. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-40-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-31-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	11.0
<i>Weight Unit</i>	KG (kilogram)

<i>Net Weight</i>	11.0
<i>Volume</i>	25000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 40 . 00.

18. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-40-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-40-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	12.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	12.0
<i>Volume</i>	25000
<i>Volume Unit</i>	CCM (cubic centimeter)

19. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-50-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-40-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	1.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	1.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 50 . 00.

20. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-50-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-50-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1400	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

21. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-30-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)

<i>Copy From Material</i>	DIT-PROD-21-1
---------------------------	---------------

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1200
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Material Group</i>	001
<i>Gross Weight</i>	2.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	2.0
<i>Volume</i>	10000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 30 . 00.

22. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-30-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-30-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Material Group</i>	001
<i>Gross Weight</i>	3.0

<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	3.0
<i>Volume</i>	10000
<i>Volume Unit</i>	CCM (cubic centimeter)

23. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-31-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-30-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	2.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	2.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 31.00.

24. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-31-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)

<i>Copy From Material</i>	DIT-PROD-31-1
---------------------------	---------------

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	3.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	3.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

25. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-40-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-31-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	11.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	11.0
<i>Volume</i>	25000

<i>Volume Unit</i>	CCM (cubic centimeter)
--------------------	------------------------

On the *Accounting 1* tab page, enter the standard price 40.00.

26. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-40-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-40-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	12.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	12.0
<i>Volume</i>	25000
<i>Volume Unit</i>	CCM (cubic centimeter)

27. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-50-1
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-40-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
--------------	--------------	--------------	--------------

<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

On the *Basic Data 1* tab page, enter the following data:

Field	Value
<i>Gross Weight</i>	1.0
<i>Weight Unit</i>	KG (kilogram)
<i>Net Weight</i>	1.0
<i>Volume</i>	20000
<i>Volume Unit</i>	CCM (cubic centimeter)

On the *Accounting 1* tab page, enter the standard price 50 . 00.

28. Repeat the above steps with the following data:

On the initial screen, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD-50-2
<i>Industry Sector</i>	M (Mechanical Engineering)
<i>Material Type</i>	ROH (Raw Material)
<i>Copy From Material</i>	DIT-PROD-50-1

On the *Organizational Levels* tab page, enter the following data:

Field	Value	Field	Value
<i>Plant</i>	1200	<i>Copy From</i>	1400
<i>Storage Location</i>	DIT1	<i>Copy From</i>	DIT1

3.4.2 Transferring Material Master Data from SAP ERP to SAP TM

In this procedure, you create and activate an integration model, which selects the material master data and transfers it to SAP TM, thereby creating or updating product master data.

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose ► *Logistics* ► *Central Functions* ► *Supply Chain Planning Interface* ► *Core Interface Advanced Planner and Optimizer* ► *Integration Model* ► *Create* ⌵.
2. Enter the following data:

Field	Value
<i>Model Name</i>	DIT-IM-001
<i>Logical System</i>	Logical system ID of SAP TM target system
<i>APO Application</i>	MATERIAL

3. Select *Materials* (in the *Material Dependent Objects* screen area).
4. In the *General Selection Options for Materials* screen area, enter the following data:

Field	Value
<i>Material</i>	DIT-PROD*
<i>Plant</i> (multiple values)	1200 & 1400

5. Choose ► *Program* ► *Execute* ⌵ to continue. The selected filter objects (material master data and plants) with the respective number of filtered objects are listed on the result screen.
6. Choose *Generate IM* to create the integration model.
7. Exit the transaction.
8. On the *SAP Easy Access* screen, choose ► *Logistics* ► *Central Functions* ► *Supply Chain Planning Interface* ► *Core Interface Advanced Planner and Optimizer* ► *Integration Model* ► *Activate* ⌵.
9. Enter the following data:

Field	Value
<i>Model Name</i>	DIT-IM-001
<i>Logical System</i>	Logical system ID of SAP TM target system
<i>APO Application</i>	MATERIAL

10. Choose **► Program ► Execute ►** to continue. The created version of the selected integration model is listed.
11. Choose the cross (indicating that the integration model version is inactive) in the first row and column *New Status*. The icon changes to a check mark (indicating that the integration model is active).
12. Choose *Start* to begin activation.
13. If necessary, confirm all dialog boxes to run the data transfer.

3.5 Maintaining Purchasing Contracts and Source Lists

Activities

- [Maintaining Purchasing Contracts](#) [Page 78]
- [Maintaining Source Lists](#) [Page 85]

3.5.1 Maintaining Purchasing Contracts

In this procedure, you create purchasing contracts, which are used for reference when creating purchase orders.

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose **Logistics** > **Materials Management** > **Purchasing** > **Outline Agreement** > **Contract** > **Create**.
2. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-10
<i>Agreement Type</i>	MK
<i>Agreement Date</i>	Current date
<i>Purch. Organization</i>	1000
<i>Purchasing Group</i>	P01

3. Choose *Enter* to continue.
4. On the *Header Data* screen, enter the following data:

Field	Value
<i>Validity Start</i>	Current date
<i>Validity End</i>	December 31, 9999
<i>Payment Terms</i>	0001
<i>Incoterms</i>	Blank
<i>Invoicing Party</i>	DIT-VN-10

5. Choose *Enter* to continue.
6. On the *Item Overview* screen, enter the following data:

Item	Item Category	Material	Target Quantity	Net Price	Plant	Storage Location
10	Blank	DIT-PROD-10-1	100000	10.00	1200	DIT1
20	Blank	DIT-PROD-10-2	100000	10.00	1200	DIT1

7. Choose *Enter* to continue.
8. Select all items.

9. Choose ► *Item* ► *Details* ► to switch to the item details screen for the first item.

10. Enter the following data for each item. Choose *Enter* to switch to the next item.

Item	Tax Code	Vendor Material
10	V1	P10-1
20	V1	P10-2

11. Save your entries and return to the initial screen.

12. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-20
<i>Agreement Type</i>	MK
<i>Agreement Date</i>	current date
<i>Purch. Organization</i>	1000
<i>Purchasing Group</i>	P01

13. Choose *Enter* to continue.

14. On the *Header Data* screen, enter the following data:

Field	Value
<i>Validity Start</i>	Current date
<i>Validity End</i>	December 31, 9999
<i>Payment Terms</i>	0001
<i>Incoterms</i>	Blank
<i>Invoicing Party</i>	DIT-VN-20

15. Choose *Enter* to continue.

16. On the *Item Overview* screen, enter the following data:

Item	Item Category	Material	Target Quantity	Net Price	Plant	Storage Location
10	Blank	DIT-PROD-20-1	100000	20.00	1200	DIT1
20	Blank	DIT-PROD-20-2	100000	20.00	1200	DIT1
30	Blank	DIT-PROD-21-1	100000	21.00	1200	DIT1

40	Blank	DIT-PROD-21-2	100000	21.00	1200	DIT1
----	-------	---------------	--------	-------	------	------

17. Choose *Enter* to continue.

18. Select all items.

19. Choose ► *Item* ► *Details* ► to switch to the item details screen for the first item.

20. Enter the following data for each item. Choose *Enter* to switch to the next item.

Item	Tax Code	Vendor Material
10	V1	P20-1
20	V1	P20-2
30	V1	P21-1
40	V1	P21-2

21. On the *Item Overview* screen, select all items.

22. Choose ► *Item* ► *Additional Functions* ► *Additional Data* ► to switch to the additional data screen for the first item.

23. Enter the following data for each item. Choose *Enter* to switch to the next item.

Item	Vendor Subrange	Incoterms
10	Blank	EXW Nuremberg (DIT-VN-20)
20	Blank	EXW Nuremberg (DIT-VN-20)
30	P01	EXW Bamberg (DIT-VN-21)
40	P01	EXW Bamberg (DIT-VN-21)

24. Save your entries and return to the initial screen.

25. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-30
<i>Agreement Type</i>	MK
<i>Agreement Date</i>	current date

<i>Purch. Organization</i>	1000
<i>Purchasing Group</i>	P01

26. Choose *Enter* to continue.

27. On the *Header Data* screen, enter the following data:

Field	Value
<i>Validity Start</i>	Current date
<i>Validity End</i>	December 31, 9999
<i>Payment Terms</i>	0001
<i>Incoterms</i>	Blank
<i>Invoicing Party</i>	DIT-VN-30

28. Choose *Enter* to continue.

29. On the *Item Overview* screen, enter the following data:

Item	Item Category	Material	Target Quantity	Net Price	Plant	Storage Location
10	Blank	DIT-PROD-30-1	100000	30.00	1400	DIT1
20	Blank	DIT-PROD-30-2	100000	30.00	1400	DIT1
30	Blank	DIT-PROD-31-1	100000	31.00	1400	DIT1
40	Blank	DIT-PROD-31-2	100000	31.00	1400	DIT1
50	Blank	DIT-PROD-30-1	100000	30.00	1200	DIT1
60	Blank	DIT-PROD-30-2	100000	30.00	1200	DIT1
70	Blank	DIT-PROD-31-1	100000	31.00	1200	DIT1
80	Blank	DIT-PROD-31-2	100000	31.00	1200	DIT1

30. Choose *Enter* to continue.

31. Select all items.

32. Choose  *Item*  *Details*  to switch to the item details screen for the first item.

33. Enter the following data for each item. Choose *Enter* to switch to the next item.

Item	Tax Code	Vendor Material
10	V1	P30-1
20	V1	P30-2
30	V1	P31-1
40	V1	P31-2

34. Return to the *Item Overview* screen and select all of the items.

35. Choose ► *Item* ► *Additional Functions* ► *Additional Data* ► to switch to the additional data screen for the first item.

36. Enter the following data for each item. Choose *Enter* to switch to the next item.

Item	Vendor Subrange	Incoterms
10	Blank	EXW Dortmund (DIT-VN-30)
20	Blank	EXW Dortmund (DIT-VN-30)
30	P01	EXW Essen (DIT-VN-31)
40	P01	EXW Essen (DIT-VN-31)

37. Save your entries and return to the initial screen.

38. Enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-40
<i>Agreement Type</i>	MK
<i>Agreement Date</i>	Current date
<i>Purch. Organization</i>	1000
<i>Purchasing Group</i>	P01

39. Choose *Enter* to continue.

40. On the *Header Data* screen, enter the following data:

Field	Value
<i>Validity Start</i>	Current date

<i>Validity End</i>	December 31, 9999
<i>Payment Terms</i>	0001
<i>Incoterms</i>	Blank
<i>Invoicing Party</i>	DIT-VN-40

41. Choose *Enter* to continue.

42. On the *Item Overview* screen, enter the following data:

Item	Item Category	Material	Target Quantity	Net Price	Plant	Storage Location
10	Blank	DIT-PROD-40-1	100000	40.00	1400	DIT1
20	Blank	DIT-PROD-40-2	100000	40.00	1400	DIT1
40	Blank	DIT-PROD-40-1	100000	40.00	1200	DIT1
50	Blank	DIT-PROD-40-2	100000	40.00	1200	DIT1

43. Choose *Enter* to continue.

44. Select all items.

45. Choose ► *Item* ► *Details* ▸ to switch to the item details screen for the first item.

46. Enter the following data. Choose *Enter* to switch to the next item.

Item	Tax Code	Vendor Material
10	V1	P40-1
20	V1	P40-2

47. Save your entries and return to the initial screen.

48. Enter the following data:

Field	Value
<i>Vendor</i>	DIT-VN-50
<i>Agreement Type</i>	MK
<i>Agreement Date</i>	Current date
<i>Purch. Organization</i>	1000
<i>Purchasing Group</i>	P01

49. Choose *Enter* to continue.

50. On the *Header Data* screen, enter the following data:

Field	Value
<i>Validity Start</i>	Current date
<i>Validity End</i>	December 31, 9999
<i>Payment Terms</i>	0001
<i>Incoterms</i>	Blank
<i>Invoicing Party</i>	DIT-VN-50

51. Choose *Enter* to continue.

52. On the *Item Overview* screen, enter the following data:

Item	Item Category	Material	Target Quantity	Net Price	Plant	Storage Location
10	Blank	DIT-PROD-50-1	100000	50.00	1400	DIT1
20	Blank	DIT-PROD-50-2	100000	50.00	1400	DIT1
30	Blank	DIT-PROD-50-1	100000	50.00	1200	DIT1
40	Blank	DIT-PROD-50-2	100000	50.00	1200	DIT1

53. Choose *Enter* to continue.

54. Select all items.

55. Choose **Item** > **Details** to switch to the item details screen for the first item.

56. Enter the following data. Choose *Enter* to switch to the next item.

Item	Tax Code	Vendor Material
10	V1	P50-1
20	V1	P50-2

3.5.2 Maintaining Source List

In this procedure, you maintain the source list, which includes all valid sources allowed for purchasing.

Procedure

1. On the *SAP Easy Access* menu for SAP ERP, choose ► *Logistics* ► *Materials Management* ► *Purchasing* ► *Master Data* ► *Source List* ► *Follow-On Functions* ► *Generate* ⌵.
2. Enter the following data:

Field	Value
<i>Material</i>	DIT-PROD*
<i>Plant (from – to)</i>	1200 & 1400
<i>Outline Agreements Only</i>	Selected
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>MRP Indicator</i>	1
<i>Become Invalid</i>	Selected
<i>Test Run</i>	Not selected

3. Choose ► *Program* ► *Execute* ⌵ to start the selection.
4. Select all listed entries to be added (and to become invalid if available).

4 Configuring Managing Transportation Requirements

Activities

- [Configuring Transfer of Purchase Orders and Inbound Deliveries](#) [Page 87]
- [Configuring Requirement Types and Type Determination](#) [Page 92]
- [Configuring Freight Unit Building](#) [Page 99]

4.1 Configuring Transfer of Purchase Orders and Inbound Deliveries

Activities

- [Defining Control Keys for Document Transfer](#) [Page 88]
- [Activating Transfer of Purchase Orders](#) [Page 89]
- [Defining Message Schema for Inbound Delivery Transfer to SAP TM](#) [Page 90]
- [Defining Message Output for Inbound Delivery Transfer to SAP TM](#) [Page 91]

4.1.1 Defining Control Keys for Document Transfer

Procedure

1. In Customizing for SAP ERP, choose ► *Integration with Other SAP Components* ► *Transportation Management* ► *Order Integration* ► *Define Control Keys for Document Transfer* ►.
2. Check the following entries and create any that are missing:

Field	Value
<i>Control Key</i>	0006
<i>PO to TMS</i>	Selected
<i>Inbound Delivery</i>	Selected
<i>Control Key Description</i>	Transfer PO, Inb. Delivery, Sched. inactive

4.1.2 Activating Transfer of Purchase Orders

Procedure

1. In Customizing for SAP ERP, choose ► *Integration with Other SAP Components* ► *Transportation Management* ► *Order Integration* ► *Activate Transfer of Purchase Orders* ►.
2. Create the following entries:

Field	Value
<i>Purchasing Organization</i>	1000
<i>Purchasing Group</i>	P01
<i>Order Type (Purchasing)</i>	DIT1
<i>Control Key</i>	0006
<i>TM No.</i>	Blank
<p>i</p> <p>The <i>TM No.</i> field enables multiple SAP TM systems to be integrated from one SAP ERP system using SAP NetWeaver PI. If only one SAP TM system is integrated, you can leave the <i>TM No.</i> field blank.</p>	

4.1.3 Defining Message Schema for Inbound Delivery Transfer to SAP TM

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Purchasing** > **Messages** > **Output Control** > **Message Determination Schemas** > **Define Message Schemas for Inbound Delivery**.
2. Choose the activity *Maintain Message Schema for Inbound Delivery*.
3. On the *Procedures* view, select the *E10001 (Inbound Delivery)* row.
4. Choose subordinate view *Control Data* from the dialog structure.
5. Create a new entry with the following data:

Field	Value
<i>Step</i>	3
<i>Counter</i>	1
<i>Condition Type</i>	TRD0
<i>Requirement</i>	441

If step 3, counter 1 is already in use, choose another unique combination.

6. Save your entries.

4.1.4 Defining Message Output for Inbound Delivery Transfer to SAP TM

Procedure

1. On the SAP Easy Access menu of your SAP ERP system, choose **Logistics** > **Materials Management** > **Purchasing** > **Master Data** > **Messages** > **Inbound Delivery** > **Create** or enter transaction **MN24** in the command field.
2. Enter the output type **TRD0**.
3. Press **ENTER** to continue.
4. Select **Delivery Type** and press **ENTER**.
5. Create a new entry with the following data:

Field	Value
<i>Delivery Type</i>	EL
<i>Function</i>	Blank
<i>Partner</i>	Blank
<i>Medium</i>	8 (Special Function)
<i>Date/Time</i>	4 (Send immediately (when saving the application))
<i>Language</i>	Blank

6. Save your entries.

4.2 Configuring Requirement Types and Type Determination

Activities

- [Defining Order-Based Transportation Requirement Types](#) [Page 93]
- [Defining Delivery-Based Transportation Requirement Types](#) [Page 94]
- [Defining Conditions for OTR Type Determination](#) [Page 95]
- [Defining Conditions for DTR Type Determination](#) [Page 97]

4.2.1 Defining Order-Based Transportation Requirement Types

Procedure

1. In Customizing for SAP Transportation Management, choose **Transportation Management > Integration > ERP Logistics Integration > Order-Based Transportation Requirement > Define Order-Based Transportation Requirement Types**.
2. Enter a new OTR type with the following data:

Field	Value
<i>OTR Type</i>	DIT1
<i>Description</i>	DIT: Order-Based Trsp. Requirement
<i>Is Default Type</i>	Not selected
<i>Number Range Interval</i>	01
<i>BW Relevance</i>	Select
<i>Output Profile</i>	/SCMTMS/TRQ_FWO_PRINT
<i>Propagate Changes</i>	<i>B Synchronous Propagation of Changes, Fallback to Asynchronous</i>
<i>Plan on Requested or Confirmed Quantities</i>	<i>01 Plan on Requested Quantities</i>
<i>EM Integration Active</i>	Select
<i>Event Manager</i>	<Logical system> (see below)

If you intend to use SAP Event Management and, therefore, select the *EM Integration Active* checkbox, you must enter the logical name of the SAP Event Management system in the *Event Manager* field. The logical name of the system is specified in the *Integration of SAP TM and SAP Event Management* configuration guide.

4.2.2 Defining Delivery-Based Transportation Requirement Types

In this procedure, you specify types of delivery-based transportation requirements (DTR). You use these types to define DTR parameters that determine how the system processes the business document.

Procedure

1. In Customizing for SAP Transportation Management, choose **► Transportation Management ► Integration ► ERP Logistics Integration ► Delivery-Based Transportation Requirement ► Define Delivery-Based Transportation Requirement Types**.
2. Create a new entry with the following data:

Field	Value
<i>DTR Type</i>	DIT2
<i>Description</i>	DIT: Delivery-Based Trsp. Requirement
<i>Default Type</i>	Not selected
<i>Number Range Interval</i>	06
<i>BW Relevance</i>	Select
<i>Propagate Changes</i>	<i>B Synchronous Propagation of Changes, Fallback to Asynchronous</i>
<i>Plan on Requested or Confirmed Quantities</i>	<i>01 Plan on Requested Quantities</i>
<i>EM Integration Active</i>	Select
<i>Event Manager</i>	<Logical system> (see below)

If you intend to use SAP Event Management and, therefore, select the *EM Integration Active* checkbox, you must enter the logical name of the SAP Event Management system in the *Event Manager* field. The logical name of the system is specified in the *Integration of SAP TM and SAP Event Management* configuration guide.

4.2.3 Defining Conditions for OTR Type Determination

Only one condition is permitted for determining order-based transportation requirements. The condition definition is described in the *Basic Settings for SAP TM* document. The following description is about the scenario-specific decision table record only.

Procedure

1. Open SAP NetWeaver Business Client and choose **Application Administration** **General Settings** **Conditions** **Edit Condition**.
2. On the *Edit Condition Definition* screen, enter the condition ZOTR_TYPE.
3. Choose *Continue*.
4. Check that the following entries exist on the *Data Access Definition* tab page and create any that are missing:

Field	Value
<i>Column Position in BRFplus Decision Table</i>	10
<i>Data Access Definition for Conditions</i>	/SCMTMS/TRQ_ORD_CAT
<i>Data Object Description</i>	TR: Original Order Category
<i>Name of BO Used in Condition</i>	/SCMTMS/TRQ
<i>Name of BO Node Used in Condition</i>	ROOT
<i>Name of the Field of the BO Node</i>	BASE_BTD_TCO
<i>Column Position in BRFplus Decision Table</i>	20
<i>Data Access Definition for Conditions</i>	/SCMTMS/TRQ_ORD_TYPE
<i>Data Object Description</i>	TR: ERP Order Type
<i>Name of BO Used in Condition</i>	/SCMTMS/TRQ
<i>Name of BO Node Used in Condition</i>	ROOT
<i>Name of the Field of the BO Node</i>	BASE_BTD_PROCTCO

5. Choose the *Decision Table* tab page and choose *Edit*.
6. In the *Table Contents* area, choose *Insert New Row* to create a new condition record.
7. Maintain each parameter value of the new condition record as given below and choose *OK* to continue.
 - o In the *TR: Original Order Category* column, choose the icon in your new row and enter the following data:

Field	Value
<i>Selection Option</i>	Is equal to
<i>Parameter Value</i>	001 (= Purchase Order)

- In the *TR: ERP Order Type* column for the same row, choose the icon and enter the following data:

Field	Value
<i>Selection Option</i>	Is equal to
<i>Parameter Value</i>	DIT1

8. In the *OTR Type* column for the same row, choose the icon and set parameter *OTR type* to DIT1.

4.2.4 Defining Conditions for DTR Type Determination

Only one condition is permitted for determining delivery-based transportation requirements. The condition definition is described in the *Basic Settings for SAP TM* document. The following description is about the scenario-specific decision table record only.

Procedure

1. In SAP NetWeaver Business Client, choose **Application Administration** > **General Settings** > **Conditions** > **Edit Condition**.
2. On the *Edit Condition Definition* screen, enter ZDTR_TYPE.
3. Choose *Continue*.
4. Check the *Data Access Definition* tab page for the following entries. If the entries do not exist, create them and save the changed condition.

Field	Value
<i>Column Position in BRFplus Decision Table</i>	30
<i>Data Access Definition for Conditions</i>	/SCMTMS/TRQ_DLV_TYPE
<i>Data Object Description</i>	TR: ERP Delivery Type
<i>Name of BO Used in Condition</i>	/SCMTMS/TRQ
<i>Name of BO Node Used in Condition</i>	ROOT
<i>Name of the Field of the BO Node</i>	BASE_BTD_PROCTCO
<i>Column Position in BRFplus Decision Table</i>	50
<i>Data Access Definition for Conditions</i>	/SCMTMS/TRQ_SRC_LOC
<i>Data Object Description</i>	TR: Source Location ID
<i>Name of BO Used in Condition</i>	/SCMTMS/TRQ
<i>Name of BO Node Used in Condition</i>	ROOT
<i>Name of the Field of the BO Node</i>	SRC_LOC_ID

5. Choose the *Decision Table* tab page and choose *Edit*.
6. In the *Table Contents* area, choose *Insert New Row* to create a new condition record.
7. Maintain the parameters given below and choose *OK* to continue.
 - In the *TR: ERP Delivery Type* column, choose the icon in your new row and enter the following data:

Field	Value

<i>Selection Option</i>	is equal to
<i>Parameter Value</i>	EL

- In the *TR: Source Location* column, choose the icon in your new row and enter the following data:

Field	Value
<i>Selection Option</i>	Matches pattern
<i>Parameter Value</i>	SUDIT*

- In the *DTR Type* column, choose the icon in your new row and set the *DTR type* parameter to `DIT2`.

4.3 Configuring Freight Unit Building

Activities

- [Defining Freight Unit Types](#) [Page 100]
- [Defining Freight Unit Building Rules](#) [Page 102]
- [Defining Conditions for Freight Unit Building Rule Determination](#) [Page 105]
- [Defining OTR Types for Automatic Freight Unit Creation](#) [Page 107]
- [Defining DTR Types for Automatic Freight Unit Creation](#) [Page 108]

4.3.1 Defining Freight Unit Types

Procedure

1. In Customizing for SAP Transportation Management, choose **Transportation Management > Planning > Freight Unit > Define Freight Unit Types**.
2. Create a freight unit type with the following header data:

Field	Value
<i>Freight Unit Type</i>	DIT3
<i>Description</i>	DIT: Freight Unit Type
<i>Is Default Type</i>	Not selected

3. In the *Basic Settings* screen area, select the *Freight Unit Can Be Deleted* checkbox.
4. In the *Number Range Settings* screen area, enter the following data:

Field	Value
<i>Time for Drawing</i>	<i>S Draw Number When Saving Document</i>
<i>Number Range Interval</i>	FU

5. In the *Change Controller Settings* screen area, enter default change strategy DEF_CHACO.
6. In the *Additional Settings* screen area, enter the following data:

Field	Value
<i>Dangerous Goods Profile</i>	Blank
<i>Rule for PU/DLV Window Determination</i>	Blank (Pick-Up and Delivery as Defined in OTR and DTR)
<i>BW Relevance</i>	Select

7. In the *Freight Order Determination* screen area, enter freight order type DIT4.
8. In the *Organizational Unit Determination* screen area, enter the following data:

Field	Value
<i>Execution Organization</i>	Organization ID for planning and execution organization as defined in Defining Org. Unit for Planning & Execution Organization/Group [Page 27].
<i>Execution Group</i>	Organization ID for planning and execution group as defined in Defining Org. Unit for Planning & Execution Organization/Group

When you enter your organizational data, enter the organizational unit ID that the system created automatically and *not* DIT-PEORG-1. For more information, see [Defining Org. Unit for Planning & Execution Organization/Group](#) [Page 27].

9. In the *Execution Settings* screen area, enter the following data:

Field	Value
<i>Execution Tracking Relevance</i>	<i>3 Execution Tracking with External Event Management</i>
<i>Display Mode for Execution Tab</i>	<i>Actual Events from TM and EM, Expected Events from EM</i>
<i>Execution Propagation Mode</i>	<i>Standard Propagation</i>
<i>Immediate Processing</i>	Select
<i>Event Management Settings: Application Object Type</i>	ODT30_FU
<i>Last Expected Event</i>	UNLOAD_END

4.3.2 Defining Freight Unit Building Rules

Procedure

1. In SAP NetWeaver Business Client for SAP TM, choose **Application Administration** > **Planning** > **General Settings** > **Freight Unit Building Rule** > **Create Freight Unit Building Rule**.
2. Choose the *General Data* tab page and enter the following data:

Field	Value
<i>Freight Unit Building Rule</i>	DIT-FUBR-01
<i>Description</i>	DIT: Freight Unit Building R1
<i>Document Type</i>	DIT3
<i>Freight Unit Building Strategy</i>	Consolidate Per Item
<i>Incompatibility Settings</i>	Blank
<i>Critical Quantity</i>	Pieces
<i>Item Split Allowed</i>	Selected

3. Choose the *Planning Quantities* tab page and enter the following data:

Field	Value
<i>Planning Quantity</i>	Pieces
<i>Unit of Measure of Split Quantity</i>	EA
<i>Split Quantity</i>	100
<i>Rounding Quantity</i>	1

Field	Value
<i>Planning Quantity</i>	Gross Weight
<i>Unit of Measure of Split Quantity</i>	TO
<i>Split Quantity</i>	1.0
<i>Rounding Quantity</i>	0.001

Field	Value
<i>Planning Quantity</i>	Gross Volume

<i>Unit of Measure of Split Quantity</i>	M3
<i>Split Quantity</i>	5.0
<i>Rounding Quantity</i>	0.001

5. Choose the *Advanced Settings* tab page and enter the process controller strategy settings FUB_AUTO.

6. Repeat the above steps with the following data:

On the *General Data* tab page, enter the following data:

Field	Value
<i>Freight Unit Building Rule</i>	DIT-FUBR-02
<i>Description</i>	DIT: Freight Unit Building R2
<i>Freight Unit Type</i>	DIT3
<i>Freight Unit Building Strategy</i>	Consolidate Per Item
<i>Incompatibility Settings</i>	Blank
<i>Critical Quantity</i>	Pieces
<i>Item Split Allowed</i>	Selected

On the *Planning Quantities* tab page, enter the following data:

Field	Value
<i>Planning Quantity</i>	Pieces
<i>Unit of Measure of Split Quantity</i>	EA
<i>Split Quantity</i>	200
<i>Rounding Quantity</i>	1

Field	Value
<i>Planning Quantity</i>	Gross Weight
<i>Unit of Measure of Split Quantity</i>	TO
<i>Split Quantity</i>	5.0
<i>Rounding Quantity</i>	0.001

Field	Value
<i>Planning Quantity</i>	Gross Volume
<i>Unit of Measure of Split Quantity</i>	M3
<i>Split Quantity</i>	5.0
<i>Rounding Quantity</i>	0.001

7. Choose the *Advanced Settings* tab page and enter the process controller strategy settings `FUB_AUTO`.

4.3.3 Defining Conditions for Freight Unit Building Rule Determination

Procedure

1. In SAP NetWeaver Business Client for SAP TM, choose **Application Administration** > **General Settings** > **Conditions** > **Create Condition**.
2. On the initial screen, enter condition type `/SCMTMS/FUBR`.
3. Enter the following data:

Field	Value
<i>Condition</i>	DIT-FUBR-DET-COND-01
<i>Description</i>	DIT: FUB Rule Determination Condition
<i>Origin of Condition</i>	Condition Based on BRFPplus Decision Table

4. Choose *Continue*.
5. On the *Data Access Definition* tab page, choose *Create* and enter the following data:

Field	Value
<i>Column Position in BRFPplus Decision Table</i>	10
<i>Data Access Definition for Condition</i>	/SCMTMS/TRQ_ITEM_PRD
<i>Data Object Description</i>	TR Item: Product
<i>Name of BO Used in Condition</i>	/SCMTMS/TRQ
<i>Name of BO Node Used in Condition</i>	ITEM
<i>Name of the Field of the BO Node</i>	PRODUCT_ID

6. Choose the *Decision Table* tab page and choose *Edit*.
7. In the *Table Contents* area, choose *Insert New Row* to create a new condition record.
8. Enter the parameter of the new condition record as given below.
9. Choose *OK* to continue.
 - o In the *TR: Item Product* column, choose the icon in your new row and enter the following data:

Field	Value
<i>Selection Option</i>	Matches pattern
<i>Parameter Value</i>	DIT-PROD*

<i>Parameter: Freight Unit Building Rule</i>	DIT-FUBR-01
--	-------------

10. Repeat the above steps for the next condition record.

- In the *TR: ERP Delivery Type* column, choose the icon in your new row and enter the following data:

Field	Value
<i>Selection Option</i>	Matches pattern
<i>Parameter Value</i>	DIT-PROD-40*
<i>Parameter: Freight Unit Building Rule</i>	DIT-FUBR-02

11. Select the second entry and choose *Move Up* to move it above the first entry.

4.3.4 Defining OTR Types for Automatic Freight Unit Creation

Procedure

1. In Customizing for *Transportation Management*, choose **Integration** > *ERP Logistics Integration* > *Order-Based Transportation Requirement* > *Define Order-Based Transportation Requirement Types*.
2. Select OTR type DIT1.
3. Choose *Details* and enter the following data:

Field	Value
<i>Automatic Freight Unit Building</i>	Selected
<i>Freight Unit Building Rule</i>	Blank
<i>FU Building Rule Condition</i>	DIT-FUBR-DET-COND-01

If you intend to use SAP Event Management and, therefore, select the *EM Integration Active* checkbox, you must enter the logical name of the SAP Event Management system in the *Event Manager* field. The logical name of the system is specified in the *Integration of SAP TM and SAP Event Management* configuration guide.

4.3.5 Defining DTR Types for Automatic Freight Unit Creation

Procedure

1. In Customizing for *Transportation Management*, choose **Integration** > *ERP Logistics Integration* > *Delivery-Based Transportation Requirement* > *Define Delivery-Based Transportation Requirement Types*.
2. Select DTR type `DIT2`.
3. Choose *Details* and enter the following data:

Field	Value
<i>Automatic Freight Unit Building</i>	Selected
<i>Freight Unit Building Rule</i>	Blank
<i>FU Building Rule Condition</i>	DIT-FUBR-DET-COND-01

5 Configuring Planning Freight and Selecting Carriers

Activities

- [Defining Means of Transport](#) [Page 110]
- [Configuring Freight Order Type](#) [Page 113]
- [Defining Conditions for Loading and Unloading Durations](#) [Page 117]
- [Configuring Selection Settings for Planning](#) [Page 119]
- [Configuring Planning Settings](#) [Page 130]
- [Defining Transportation Networks](#) [Page 139]
- [Defining Vehicle Resources](#) [Page 148]
- [Defining and Assigning Calendar Resources](#) [Page 152]

5.1 Defining Means of Transport

Procedure

1. In Customizing for *Transportation Management*, choose ► *Master Data* ► *Resources* ► *Define Means of Transport* ⌵.
2. Choose *New Entries*.
3. Enter a new means of transport with the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT
<i>MTr Description</i>	DIT: Truck (Multiresource)
<i>Standard Code</i>	031
<i>Transportation Mode</i>	01 (Road)
<i>Superordinate MTr</i>	Blank
<i>Multiresource</i>	Selected
<i>No. of Individual Resources</i>	Deselected
<i>Low Speed</i>	40
<i>Medium Speed</i>	60
<i>High Speed</i>	80
<i>Average Speed</i>	70
<i>Distance Factor</i>	1
<i>Schedule MTr</i>	Deselected
<i>Your Own MTr</i>	Deselected
<i>Passive</i>	Deselected
<i>No Capacity</i>	Deselected
<i>No Direct Load</i>	Deselected
<i>Lock Multiresource</i>	Deselected
<i>GIS Quality</i>	Deselected

4. Return to the overview screen.
5. Enter a new means of transport with the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Description</i>	DIT: Trucks of carrier DIT-CR-10 (MR)
<i>Standard Code</i>	031
<i>Transportation Mode</i>	01 (Road)
<i>Superordinate MTr</i>	DIT_MT
<i>Multiresource</i>	Selected
<i>No. of Individual Resources</i>	Blank
<i>Low Speed</i>	40
<i>Medium Speed</i>	60
<i>High Speed</i>	80
<i>Average Speed</i>	70
<i>Distance Factor</i>	1
<i>Schedule MTr</i>	Deselected
<i>Your Own MTr</i>	Deselected
<i>Passive</i>	Deselected
<i>No Capacity</i>	Deselected
<i>No Direct Load</i>	Deselected
<i>Lock Multiresource</i>	Deselected
<i>GIS Quality</i>	Deselected

6. Return to the overview screen.

7. Enter a new means of transport with the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT20
<i>Description</i>	DIT: Trucks of carrier DIT-CR-20 (MR)
<i>Standard Code</i>	031
<i>Transportation Mode</i>	01 (Road)
<i>Superordinate MTr</i>	DIT_MT
<i>Multiresource</i>	Selected

<i>No. of Individual Resources</i>	Blank
<i>Low Speed</i>	40
<i>Medium Speed</i>	60
<i>High Speed</i>	80
<i>Average Speed</i>	70
<i>Distance Factor</i>	1
<i>Schedule MTr</i>	Deselected
<i>Your Own MTr</i>	Deselected
<i>Passive</i>	Deselected
<i>No Capacity</i>	Deselected
<i>No Direct Load</i>	Deselected
<i>Lock Multiresource</i>	Deselected
<i>GIS Quality</i>	Deselected

This scenario does not use a geographical information system (GIS). You therefore have to enter a distance factor and an average speed. If you have established a connection to a GIS provider, select the *GIS Quality* attribute.

When you save your data, the system may issue a message stating that the IGS or GIS tool is currently unavailable. Ignore this message.

5.2 Configuring Freight Order Type

Activities

- [Defining Freight Settlement Document Types](#) [Page 114]
- [Defining Freight Order Types](#) [Page 115]

5.2.1 Defining Freight Settlement Document Types

Procedure

1. In Customizing for *Transportation Management*, choose **Settlement** **Freight Settlement** **Define Freight Settlement Document Types**.
2. Create the following entry:

Field	Value
<i>FSD Type</i>	DIT5
<i>Description</i>	DIT: Freight Settlement Document
<i>FSD Category</i>	10 (Freight Settlement Document)
<i>No. Range Interval</i>	01
<i>Track Changes</i>	Selected
<i>BW Relevance</i>	Selected
<i>Output Profile</i>	/SCMTMS/TOR_INV_PREP (SFIR ERP Integration Profile)
<i>Add. Output Profile</i>	/SCMTMS/SFIR/PRINT (SFIR Profile for Printing)

5.2.2 Defining Freight Order Types

In this Customizing activity, you define a new freight order type that contains an enhanced save strategy.

Procedure

1. In Customizing for SAP Transportation Management, choose **Transportation Management** > **Freight Order Management** > **Freight Order** > **Define Freight Order Types**.
2. Choose the *New Entries* pushbutton.
3. In the header area, enter freight order type `DIT4` and the description `DIT: Freight Order Type`.
4. Deselect the *Default Type* checkbox.
5. In the *Basic Settings* screen area, enter the following data:

Field	Value
<i>Freight Order Can Be Subcontracted</i>	<i>01 Relevant for Subcontracting</i>
<i>Shipper/Consignee Determination</i>	<i>P Determination Based on Predecessor Documents</i>
<i>Fix Document When Saving</i>	Not selected
<i>Freight Order Can Be Deleted</i>	Select
<i>Sequence Type of Stops</i>	<i>01 Defined and Linear</i>

6. In the *Number Range Settings* screen area, select *S Draw Number When Saving Document* from the *Time for Drawing* dropdown box and enter number range interval `FO`.
7. In the *Charge Calculation and Settlement Document Settings* screen area, enter the following data:

Field	Value
<i>Enable Settlement</i>	Select
<i>Enable Charge Calculation</i>	Select
<i>Default FSD Type</i>	<code>DIT5</code>

8. In the *Change Controller Settings* screen area, enter default change strategy `DEF_CHACO`.
9. In the *Execution Settings* screen area, enter the following data:

Field	Value
<i>Execution Track. Relev.</i>	<i>3 Execution Tracking with External Event</i>

	<i>Management</i>
<i>Display Mode for Execution Tab</i>	<i>Actual Events from TM and EM, Expected Events from EM</i>
<i>Propagate Execution Info</i>	Select
<i>Execution Propagation Mode</i>	<i>Standard Propagation</i>
<i>Application Object Type</i>	ODT30_TO
<i>Last Exp. Event</i>	POD

10. In the *Default MTr Determination* screen area, enter transportation mode 01.

11. In the *Output Options* screen area, enter output profile /SCMTMS/TOR.

12. In the *Organizational Unit Determination* screen area, enter the following data:

Field	Value
<i>Execution Org.</i>	Organization ID for Transportation Planning and Execution Organization as defined in Defining Org. Unit for Planning & Execution Organization/Group [Page 27].
<i>Purchasing Org.</i>	Organization ID for Purchasing Organization as defined in Defining Org. Unit for Planning & Execution Organization/Group [Page 29].
<i>Execution Group</i>	Organization ID for Transportation Planning and Execution Organization as defined in Defining Org. Unit for Planning & Execution Organization/Group [Page 27].
<i>Purchasing Group</i>	Organization ID for purchasing group as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29].

13. In the *Tendering Settings* screen area, select the *Use Default Settings* checkbox.

14. In the *Additional Settings* screen area, enter the following data:

Field	Value
<i>Document Creation Relevance</i>	<i>N No Shipment Creation in SAP ERP</i>
<i>BW Relevance</i>	Select
<i>Track Changes</i>	Select

15. Save your entries.

5.3 Defining Conditions for Loading and Unloading Durations

Procedure

1. In SAP NetWeaver Business Client (NWBC), choose **Application Administration** > **General Settings** > **Conditions** > **Create Condition**.
2. On the *New Condition Definition* screen, enter condition type /SCMTMS/FU_LOAD_DURA.
3. Choose *Continue*.
4. In the header area of the next screen, enter the following data:

Field	Value
<i>Condition</i>	DIT-LDUR-COND-01
<i>Description</i>	DIT: Loading/Unloading Durations Determination Condition
<i>Origin of Condition</i>	Condition Based on BRFplus Decision Table

5. On the *Data Access Definition* tab page, choose *Create* and enter the following data:

Field	Value
<i>Column Position in BRFplus Decision Table</i>	10
<i>Data Access Definition for Conditions</i>	/SCMTMS/PLNG_SRV_SET
<i>Data Object Description</i>	Blank
<i>Data Element Used for Input Help</i>	/SCMTMS/SERV_TIME_DEF

Field	Value
<i>Column Position in BRFplus Decision Table</i>	20
<i>Data Access Definition for Conditions</i>	/SCMTMS/PLNG_MTR
<i>Data Object Description</i>	Blank
<i>Data Element Used for Input Help</i>	/SAPAPO/TR_TRATY

Field	Value
<i>Column Position in BRFplus Decision Table</i>	30
<i>Data Access Definition for Conditions</i>	/SCMTMS/TOR_TYPE

<i>Data Object Description</i>	Blank
<i>Data Element Used for Input Help</i>	/SCMTMS/TOR_TYPE

7. Choose the *Decision Table* tab page and choose *Edit*.
8. In the *Table Contents* area, choose *Insert New Row* to create a new condition record.
9. Enter the parameters for the new condition record as specified below. In each case, choose *OK* to continue.

Parameter	Value
<i>Service Time Setting</i>	A (Freight Unit and Means of Transport Dependent)
<i>Selected Means of Transport</i>	DIT_MT10
<i>Document Type (TO Type)</i>	DIT3
<i>Load</i>	00:01:00
<i>Unload</i>	00:01:00

10. Repeat the steps above to enter the next condition record.

Parameter	Value
<i>Service Time Setting</i>	A (Freight Unit and Means of Transport Dependent)
<i>Selected Means of Transport</i>	DIT_MT20
<i>Document Type (TO Type)</i>	DIT3
<i>Load</i>	00:02:00
<i>Unload</i>	00:02:00

5.4 Configuring Selection Settings for Planning

Activities

- [Defining Time-Related Selection Attributes](#) [Page 120]
- [Defining Geographical Selection Attributes](#) [Page 124]
- [Defining Additional Selection Attributes](#) [Page 125]
- [Defining Selection Profiles](#) [Page 126]
- [Defining Capacity Selection Settings](#) [Page 127]
- [Defining Carrier Selection Settings](#) [Page 128]

5.4.1 Defining Time-Related Selection Attributes

In this procedure you define time-related attributes for selection profiles.

The time-related selection, described below, considers all transportation requirements to be planned with a calculated pick-up date and time, starting from the current date and time of transportation planning plus four hours (defined as offset) and ending with the fifth working day from the current date (rounded horizon to full day). The delivery date and time of the transportation requirement is not considered in the time-related selection.

For example, if the current date and time is Monday June 14, 2010 at 9:00, the pick-up window for planning starts on Monday June 14, 2010 at 13:00 and ends on Friday June 18, 2010 since the specified factory calendar specifies Monday to Friday as working days. All transportation requirements with a calculated pick-up date and time within this pick-up window are selected during transportation planning, regardless of the delivery date or time.

Procedure

1. Open SAP NetWeaver Business Client from SAP TM and choose **Application Administration > Planning > Selection Profile Attributes > Time-Related Selection Attributes > Create Time-Related Selection Attributes**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Time-Rel. Sel. Attributes</i>	DIT-TIME-SEL-01
<i>Description</i>	DIT: Time-Related Selection for Freight Units

3. In the *Demand Horizon* screen area, enter the following data:

Field	Value
<i>Absolute or Relative Horizon</i>	Use Relative Horizon
<i>Round Horizon to Full Days</i>	Selected
<i>Time Zone for Rounding the Horizon</i>	CET
<i>Factory Calendar for Offset / Duration Calculation</i>	01 (Germany)

4. In the *Other Settings* screen area, enter the following data:

Field	Value
<i>Use Index Time for Selection</i>	Use Index Time of Stop
<i>Combination of Pick-Up and Delivery Windows</i>	Combine Pick-Up Window with Source Location, Delivery Window with Destination Location

5. In the *Pick-Up Window* screen area, enter the following data:

Field	Value
<i>Ignore Pick-Up Window</i>	Selected
<i>Pick-Up in Days</i>	Blank
<i>Additional Duration (hh:mm)</i>	Blank
<i>Offset Direction</i>	Blank
<i>Offset in Days</i>	Blank
<i>Additional Offset (hh:mm)</i>	00:00
<i>Start Date</i>	Blank
<i>Start Time</i>	Blank
<i>End Date</i>	Blank
<i>End Time</i>	Blank

6. In the *Delivery Window* screen area, enter the following data:

Field	Value
<i>Ignore Delivery</i>	Deselected
<i>Delivery in Days</i>	10
<i>Additional Duration (hh:mm)</i>	-
<i>Offset Direction</i>	Past
<i>Offset in Days</i>	5
<i>Additional Offset (hh:mm)</i>	-
<i>Start Date</i>	-
<i>Start Time</i>	-
<i>End Date</i>	-
<i>End Time</i>	-

7. In SAP NetWeaver Business Client, choose **Application Administration > Planning > Selection Profile Attributes > Time-Related Selection Attributes > Create Time-Related Selection Attributes**.

8. In the *General Data* screen area, enter the following data:

Field	Value
<i>Time-Rel. Sel. Attributes</i>	DIT-TIME-SEL-02
<i>Description</i>	DIT: Time-Related Selection for Freight Orders

9. In the *Demand Horizon* screen area, enter the following data:

Field	Value
<i>Absolute or Relative Horizon</i>	Use Relative Horizon
<i>Round Horizon to Full Days</i>	Selected
<i>Time Zone for Rounding the Horizon</i>	CET
<i>Factory Calendar for Offset / Duration Calculation</i>	01 (Germany)

10. In the *Other Settings* screen area, enter the following data:

Field	Value
<i>Use Index Time for Selection</i>	Use Index Time of Stop
<i>Combination of Pick-Up and Delivery Windows</i>	Combine Pick-Up Window with Source Location, Delivery Window with Destination Location

11. In the *Pick-Up Window* screen area, enter the following data:

Field	Value
<i>Ignore Pick-Up Window</i>	Deselected
<i>Pick-Up in Days</i>	10
<i>Additional Duration (hh:mm)</i>	Blank
<i>Offset Direction</i>	Future
<i>Offset in Days</i>	0
<i>Additional Offset (hh:mm)</i>	2:00
<i>Start Date</i>	Blank
<i>Start Time</i>	Blank
<i>End Date</i>	Blank
<i>End Time</i>	Blank

12. In the *Delivery Window* screen area, enter the following data:

Field	Value
<i>Ignore Delivery</i>	Selected
<i>Delivery in Days</i>	Blank
<i>Additional Duration (hh:mm)</i>	Blank
<i>Offset Direction</i>	Blank

<i>Offset in Days</i>	Blank
<i>Additional Offset (hh:mm)</i>	Blank
<i>Start Date</i>	Blank
<i>Start Time</i>	Blank
<i>End Date</i>	Blank
<i>End Time</i>	Blank

5.4.2 Defining Geographical Selection Attributes

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Selection Profile Attributes > Geographical Selection Attributes > Create Geographical Selection Attributes**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Geographical Selection Attributes</i>	DIT-GEO-SEL-01
<i>Description</i>	DIT: Geographical Selection
<i>Both Locations</i>	Selected

3. Choose the *Source Zones* tab page and enter the following data:

Sign	Option	Lower Value	Upper Value
Inclusive	=	DIT-PC-CR10	Blank
Inclusive	=	DIT-PC-CR20	Blank

4. Choose the *Destination Zones* tab page and enter the following data:

Sign	Option	Lower Value	Upper Value
Inclusive	=	DIT-PL-1200 (for example, PL1200@ERP001)	Blank
Inclusive	=	DIT-PL-1400 (for example, PL1400@ERP001)	Blank

5.4.3 Defining Additional Selection Attributes

In this procedure, you define additional attributes for selection profiles.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Selection Profile Attributes > Additional Selection Attributes > Create Additional Selection Attributes**.
2. In the General Data screen area, enter the following data:

Field	Value
<i>Additional Selection Attributes</i>	DIT-ADD-SEL-01
<i>Description</i>	DIT: Additional Selection of Freight Units
<i>Planned Requirements</i>	Include in Selection
<i>Blocked Documents</i>	Exclude in Selection

3. Choose the *Selection Values* tab page, enter the following data, and save:

Business Object	Field Name	Sign	Option	Lower Limit	Upper Limit
/SCMTMS/TO	TOR_TYPE	Inclusive	=	DIT3	Blank

4. In SAP NetWeaver Business Client, choose **Application Administration > Planning > Selection Profile Attributes > Additional Selection Attributes > Create Additional Selection Attributes**.
5. In the *General Data* screen area, enter the following data:

Field	Value
<i>Additional Selection Attributes</i>	DIT-ADD-SEL-02
<i>Description</i>	DIT: Additional Selection for Freight Orders
<i>Planned Requirements</i>	Include in Selection
<i>Blocked Documents</i>	Exclude in Selection

6. Choose the *Selection Values* tab page and enter the following data:

Business Object	Field Name	Sign	Option	Lower Limit	Upper Limit
/SCMTMS/TO	TOR_TYPE	Inclusive	=	DIT4	Blank

5.4.4 Defining Selection Profiles

In this procedure, you define selection profiles for transportation requirements and freight orders.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Selection Profiles > Create Selection Profile**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Selection Profile</i>	DIT-GEN-SEL-01
<i>Description</i>	DIT: Selection Profile for Freight Units
<i>Maximum Number of Selected Objects</i>	1000

3. In the *Profile Assignments* screen area, enter the following data:

Field	Value
<i>Time-Related Selection Attributes</i>	DIT-TIME-SEL-01
<i>Geographical Selection Attributes</i>	DIT-GEO-SEL-01
<i>Additional Selection Attributes</i>	DIT-ADD-SEL-01

4. In SAP NetWeaver Business Client, choose **Application Administration > Planning > Selection Profiles > Create Selection Profile**.
5. In the *General Data* screen area, enter the following data:

Field	Value
<i>Selection Profile</i>	DIT-GEN-SEL-02
<i>Description</i>	DIT: Selection Profile for Freight Orders
<i>Maximum Number of Selected Objects</i>	100

6. In the *Profile Assignments* screen area, enter the following data:

Field	Value
<i>Time-Related Selection Attributes</i>	DIT-TIME-SEL-02
<i>Geographical Selection Attributes</i>	DIT-GEO-SEL-01
<i>Additional Selection Attributes</i>	DIT-ADD-SEL-02

5.4.5 Defining Capacity Selection Settings

In this procedure, you define the settings used to select transportation capacities during transportation planning.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Planning Profile Settings > Capacity Selection Settings > Create Capacity Selection Settings**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Capacity Selection Settings</i>	DIT-CAP-SEL-01
<i>Description</i>	DIT: Capacity Selection of Vehicle Resources

3. Choose the *Vehicle Resources* tab page and enter the following data:

Attributes for Vehicle Resource Selection	Sign	Option	Lower Limit	Upper Limit
MTRTCO062_I (Means of Transport)	Inclusive	Pattern	DIT*	Blank

5.4.6 Defining Carrier Selection Settings

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Planning Profile Settings > Carrier Selection Settings > Create Carrier Selection Settings**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Carrier Selection Settings</i>	DIT-CAR-SEL-01
<i>Description</i>	DIT: Carrier Selection Settings
<i>Check Incompatibilities</i>	Not selected
<i>Incompatibility Settings</i>	-
<i>Type of Carrier Selection Settings</i>	General Carrier Selection

3. In the *Other Settings* screen area, enter the following data:

Field	Value
<i>Transportation Allocation Usage</i>	Do Not Use Transportation Allocation
<i>Business Share Usage</i>	Do Not Use Business Shares
<i>Strategy</i>	Costs
<i>Carrier Cost Origin</i>	Use Transportation Charges from TCM (Transportation Charge Management)

4. Choose the *Advanced Settings* tab page and enter the following data:

Field	Value
<i>Planning Strategy</i>	TSPS_DEF
<i>Optimizer Runtime</i>	6
<i>Consider Manual Assignment as Fixed</i>	Selected
<i>Action for Manual Rankings</i>	Keep
<i>Overall Carrier Availability</i>	Deselected
<i>Transportation Charge Interpretation</i>	Accept Carriers with Charges of Zero as Highest Costs
<i>Common Currency</i>	EUR
<i>Action After Carrier Selection Run</i>	Assign Best Carrier

<i>Continuous Move Type</i>	Use Transportation Lane Settings
<i>Continuous Move Information</i>	Selected
<i>Reaction to CM Removal</i>	Blank
<i>Check Distance and Duration</i>	Selected
<i>Continuous Move Means of Transport Check</i>	Deselected
<i>CM Cost Recalculation for TCM</i>	No Recalculation
<i>Use Tendered Objects for Optimization</i>	Deselected
<i>Tender Without Optimizer Result</i>	Deselected
<i>Tendering Manager</i>	Blank
<i>Tendering Profile</i>	Blank

5.5 Configuring Planning Settings

Activities

- [Defining Optimizer Settings](#) [Page 131]
- [Defining Cost Function Settings](#) [Page 132]
- [Defining Planning Cost Settings](#) [Page 133]
- [Defining Planning Profiles](#) [Page 137]

5.5.1 Defining Optimizer Settings

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Planning Profile Settings > Optimizer Settings > Create Optimizer Settings**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Optimizer Settings</i>	DIT-OPT-SET-01
<i>Description</i>	DIT: Optimizer Settings
<i>Planning Strategy</i>	VSR_1STEP
<i>Freight Order Building Rule</i>	New Freight Order when Resource is Empty

3. In the *Transportation Proposal Settings* screen area, enter the following data:

Field	Value
<i>Accept Transportation Proposals</i>	Save Route and Freight Orders
<i>Planning Strategy for Transportation Proposals</i>	VSR_1STEP
<i>Max. Number of Transportation Proposals</i>	5

4. In the *Optimizer Performance Settings* screen area, enter the following data:

Field	Value
<i>Maximum Number of Parallel Processes</i>	2
<i>Maximum Number of Transshipment Locations</i>	3

5. In the *Optimizer Runtime* screen area, enter the following data:

Field	Value
<i>Maximum Runtime (Seconds)</i>	60
<i>Max. Time Without Improvement (Sec./FU)</i>	1
<i>Automatic Runtime Regulation</i>	12 (Good Quality)

6. In the *Consider Constraints* screen area, select *Consider Capacities During Optimization* in the *Consider Capacities During Optimization* field.

5.5.2 Defining Cost Function Settings

In this procedure, you define a profile for the transportation costs.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Planning Profile Settings > Cost Functions Settings > Create Cost Function Settings**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Cost Function</i>	DIT-COST-FNC-SET-01
<i>Description</i>	DIT: Cost Function Settings

3. Enter the following values in the table:

Segment	Load	Load Costs	Slope
0001	0,000	500,000	0,000
0002	5,000	500,000	20,000-
0003	10,000	400,000	30,000-
0004	15,000	250,000	50,000-
0005	20,000	0,000	0,000

5.5.3 Defining Planning Cost Settings

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Application Administration > Planning > Planning Profile Settings > Planning Costs Settings > Create Planning Costs Settings**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Planning Costs Settings</i>	DIT-PLAN-COST-SET-01
<i>Description</i>	DIT: Planning Cost Settings

3. In the *Direct Shipment Options* screen area, leave the *Currency for Direct Shipment Options* field blank.
4. In the *Freight Unit Costs* screen area, enter the following data:

Field	Value
<i>Earliness/Delay Cost Basis</i>	Earliness/Delay Costs Defined in Planning Costs
<i>Costs for Non-Delivery</i>	999999999999999
<i>Costs for Earliness per Day</i>	9999
<i>Costs for Lateness per Day</i>	9999

5. In the *Means-of-Transport Costs* table, enter the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Calculation Basis for Costs per Distance: Planning Costs:</i>	Take into Account Costs per Distance and Distance Unit
<i>Calculation Basis for Costs per Distance: Lane</i>	Do Not Take into Account Costs per Transportation Lane
<i>Fixed Costs</i>	500.000

6. Select the row containing your means of transport and choose the *Means-of-Transport Cost Details* tab page.
7. In the *Distance* screen area, enter the following means of transport-dependent data:

Field	Value
<i>Costs per Distance</i>	1.000
<i>Maximum Distance</i>	0.000

<i>Unit of Measure</i>	KM (Kilometer)
------------------------	----------------

8. In the *Quantity Costs* screen area, enter the following data:

Field	Value
<i>Costs Basis for Quantity</i>	No Costs
<i>Costs per Quantity</i>	0.000
<i>Unit of Measure</i>	Blank

9. In the *Penalty Costs* screen area, enter the following data:

Field	Value
<i>Premature Pickup</i>	0.000
<i>Delayed Pickup</i>	0.000
<i>Premature Delivery</i>	100.000
<i>Delayed Delivery</i>	100.000

10. In the *Duration* screen area, enter the following data:

Field	Value
<i>Costs per Duration Unit</i>	0.000
<i>Maximum Duration</i>	0.000
<i>Unit of Measure</i>	Blank

11. In the *Additional Stops* screen area, enter the following data:

Field	Value
<i>Costs per Additional Intermediate Stop</i>	25.000
<i>Maximum Number of Stops</i>	5.000

12. Choose the *Cost Functions* tab page and enter the following data:

Field	Value
<i>Unit of Measure</i>	TO (Ton)
<i>Cost Function</i>	DIT-COST-FNC-SET-01

13. Create a new row in the *Means-of-Transport Costs* table using the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT20
<i>Calculation Basis for Costs per Distance:</i>	Take into Account Costs per Distance and

<i>Planning Costs</i>	Distance Unit
<i>Calculation Basis for Costs per Distance: Lane</i>	Do Not Take into Account Costs per Transportation Lane
<i>Fixed Costs</i>	500.000

14. Select the means of transport and choose the *Means-of-Transport Cost Details* tab page.

15. In the *Distance* screen area, enter the following data:

Field	Value
<i>Costs per Distance</i>	1.000
<i>Maximum Distance</i>	0.000
<i>Unit of Measure</i>	KM (Kilometer)

16. In the *Quantity Costs* screen area, enter the following data:

Field	Value
<i>Costs Basis for Quantity</i>	No Costs
<i>Costs per Quantity</i>	0.000
<i>Unit of Measure</i>	Blank

17. In the *Penalty Costs* screen area, enter the following data:

Field	Value
<i>Premature Pickup</i>	0.000
<i>Delayed Pickup</i>	0.000
<i>Premature Delivery</i>	100.000
<i>Delayed Delivery</i>	100.000

18. In the *Duration* screen area, enter the following data:

Field	Value
<i>Costs per Duration Unit</i>	0.000
<i>Maximum Duration</i>	0.000
<i>Unit of Measure</i>	Blank

19. In the *Additional Stops* screen area, enter the following data:

Field	Value
<i>Costs per Additional Intermediate Stop</i>	30.000
<i>Maximum Number of Stops</i>	5.000

20. Choose the *Cost Functions* tab page and enter the following data:

Field	Value
<i>Unit of Measure</i>	TO (Ton)
<i>Cost Function</i>	DIT-COST-FNC-SET-01

5.5.4 Defining Planning Profiles

Procedure

1. Open SAP NetWeaver Business Client (NWBC) in SAP TM and choose **Application Administration > Planning > Planning Profiles > Create Planning Profile**.
2. In the *General Data* screen area, enter the following data:

Field	Value
<i>Planning Profile</i>	DIT-PLAN-PROF-01
<i>Description</i>	DIT: Planning Profile

3. In the *Planning Horizon* screen area, enter the following data:

Field	Value
<i>Duration in Days</i>	10
<i>Additional Duration (hh:mm)</i>	Blank
<i>Offset in Days</i>	Blank
<i>Additional Offset (hh:mm)</i>	Blank
<i>Factory Calendar for Offset / Duration Calculation</i>	01
<i>Round Horizon to Full Days</i>	Selected
<i>Time Zone for Rounding the Horizon</i>	CET

4. In the *Profile Assignments* screen area, enter the following data:

Field	Value
<i>Selection Profile for Freight Orders</i>	DIT-GEN-SEL-02
<i>Selection Profile for Freight Bookings</i>	Blank
<i>Capacity Selection Settings</i>	DIT-CAP-SEL-01
<i>Optimizer Settings</i>	DIT-OPT-SET-01
<i>Planning Costs Settings</i>	DIT-PLAN-COST-SET-01
<i>Incompatibility Settings</i>	Blank
<i>Carrier Selection Settings</i>	DIT-CAR-SEL-01

5. In the *Business Document Type* screen area, enter the following data:

Field	Value
-------	-------

<i>Type Determination Rule</i>	Defined per Category in Planning Profile
<i>Default Type for Vehicle Resources</i>	DIT4
<i>Default Type for Passive Vehicle Resources</i>	-

6. In the *Manual Planning* screen area, enter the following data:

Field	Value
<i>Manual Planning Strategy</i>	VSRI_DEF
<i>Consider Fixing Status</i>	Warning When Changing Fixed Documents

7. In the *Scheduling* screen area, enter the following data:

Field	Value
<i>Scheduling Strategy</i>	VSS_DEF
<i>Consider Freight Unit Dates</i>	Consider Freight Unit Dates
<i>Scheduling Direction</i>	Not Specified

8. In the *Check* screen area, enter the following data:

Field	Value
<i>Check Strategy</i>	VSR_CHECK
<i>Take Capacities into Account</i>	Warning

9. In the *Loading and Unloading Duration* screen area, enter the following data:

Field	Value
<i>Dependence</i>	Freight Unit and Means of Transport Dependent
<i>Condition for Loading/Unloading Duration</i>	DIT-LDUR-COND-01

5.6 Defining Transportation Networks

Activities

- [Defining Transportation Zones](#) [Page 140]
- [Defining Transportation Lanes](#) [Page 143]
- [Defining Carrier Profiles](#) [Page 147]

5.6.1 Defining Transportation Zones

Procedure

1. Open SAP NetWeaver Business Client (NWBC) in SAP TM and choose ► *Master Data* ► *Transportation Network* ► *Transportation Zones* ► *Define Transportation Zone* ⌵.
2. Choose *Create* to create a new transportation zone.
3. Enter the following data:

Field	Value
<i>Zone</i>	DIT-PC-CR10
<i>Description</i>	Postal Code Zone of Carrier DIT-CR-10

4. Select your transportation zone in the table and choose the change icon to change the zone type (*Type* column) to *P* (*Postal Code Zone*).
5. Choose the *Zone – Postal Code* tab page.
6. Choose *Create* to create the following entries:

Field	Value
<i>Country</i>	DE
<i>Postal Code – From</i>	80000
<i>Postal Code – To</i>	80999

Field	Value
<i>Country</i>	DE
<i>Postal Code – From</i>	90400
<i>Postal Code – To</i>	90699

Field	Value
<i>Country</i>	DE
<i>Postal Code – From</i>	96000
<i>Postal Code – To</i>	96099

8. Choose *Create* to create a new transportation zone with the following data:

Field	Value
-------	-------

<i>Zone</i>	DIT-PC-CR20
<i>Description</i>	Postal Code Zone of Carrier DIT-CR-20

9. Select your new transportation zone and choose the change icon to change the zone type (*Type* column) to *P* (*Postal Code Zone*).

10. Choose the *Zone – Postal Code* tab page.

11. Choose *Create* to create the following entries:

Field	Value
<i>Country</i>	DE
<i>Postal Code – From</i>	34000
<i>Postal Code – To</i>	34999

Field	Value
<i>Country</i>	DE
<i>Postal Code – From</i>	44000
<i>Postal Code – To</i>	45999

12. Choose *Create* to create a new transportation zone using the following data:

13. Enter the following data:

Maintain Zone

Field	Value
<i>Zone</i>	DIT-PL-1200
<i>Description</i>	Direct Zone for Plant Dresden

14. Select your new transportation zone and choose the change icon to change the zone type (*Type* column) to *D* (*Direct Zone*).

15. Choose the *Zone – Location* tab page to assign locations to the transportation zone.

16. Choose *Create* to create new entries:

Location	Description
SP1200 (Location of Type 1003 (Shipping Point)). For example, SP1200@ERP001.	Shipping/Receiving Dresden

17. Choose *Create* to create a new transportation zone using the following data:

Field	Value
<i>Zone</i>	DIT-PL-1400

<i>Description</i>	Direct Zone for Plant Stuttgart
--------------------	---------------------------------

18. Select your new transportation zone and choose the change icon to change the zone type (*Type* column) to *D (Direct Zone)*.

19. Choose the *Zone – Location* tab page to assign locations to the transportation zone.

20. Choose *Create* to create new entries:

Location	Description
SP1400 (Location of Type 1003 (Shipping Point)). For example, SP1400@ERP001.	Shipping/Receiving Stuttgart

21. Select all of the transportation zones you have created.

22. Choose *Calculate Coordinates* to determine the geocoordinates for the transportation zone.

5.6.2 Defining Transportation Lanes

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data > Transportation Network > Transportation Lanes > Define Transportation Lane**.
2. On the *Tr. Lane* tab page, enter the following data:

Field	Value
<i>Start Location/Zone</i>	DIT-PC-CR10
<i>Destination Location/Zone</i>	DIT-PL-1200

3. Choose *Create* to create a new transportation lane.
4. In the *Means of Transport* screen area, choose *Create* to assign a means of transport to the transportation lane.
5. Enter the following data for the means of transport:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Validity Start Date</i>	<Current date>
<i>Validity End Date</i>	December 31, 2999
<i>Relevant to Carrier Selection</i>	Selected
<i>Priority/Costs</i>	Neither Costs Nor Priority

6. Choose *Copy and Close*.
7. When prompted, create a proposal for the transportation distance and duration. The result should be as follows:

Field	Value
<i>Transportation Distance</i>	600,000
<i>Transportation Duration</i>	5:18

8. Select the new entry on the *Means of Transport* screen.
9. In the *Carrier (Select Means of Transport)* screen area, choose *Create*.
10. Enter the following data for the carrier:

Field	Value
<i>BP Number</i>	DIT-CR-10
<i>Transportation Costs</i>	Blank

<i>Priority</i>	Blank
-----------------	-------

11. Choose *Copy and Close*.

12. Return to the initial screen.

13. On the *Tr. Lane* tab page, create a new transportation lane as follows:

Field	Value
<i>Start Location/Zone</i>	DIT-PC-CR20
<i>Destination Location/Zone</i>	DIT-PL-1400

14. Choose *Create* to create a new transportation lane.

15. In the *Means of Transport* screen area, choose *Create* to assign a means of transport to the transportation lane.

16. Enter the following data for the means of transport:

Field	Value
<i>Means of Transport</i>	DIT_MT20
<i>Validity Start Date</i>	<Current date>
<i>Validity End Date</i>	December 31, 2999
<i>Relevant to Carrier Selection</i>	Selected
<i>Priority/Costs</i>	Neither Costs Nor Priority

17. Choose *Copy and Close*.

18. When prompted, create a proposal for the transportation distance and duration. The result should be as follows:

Field	Value
<i>Transportation Distance</i>	619,000
<i>Transportation Duration</i>	5:37

19. Select the new entry on the *Means of Transport* screen.

20. In the *Carrier (Select Means of Transport)* screen area, choose *Create*.

21. Enter the following data:

Field	Value
<i>BP Number</i>	DIT-CR-20
<i>Transportation Costs</i>	Blank
<i>Priority</i>	Blank

22. Choose *Copy and Close*.
23. Repeat steps 13 to 22 with a source location of DIT-PC-CR20 and a destination location of DIT-PL-1200.
24. Return to the initial screen.
25. In SAP NetWeaver Business Client, choose ► *Master Data* ► *Transportation Network* ► *Define Transportation Lane* ↵.
26. On the *Intra-Zone Lane/Loc. Transp. Lane* tab page, enter the location/transportation zone DIT-PC-CR10.
27. Choose *Create* to create a new transportation lane.
28. In the *Means of Transport* screen area, choose *Create* to assign a means of transport to the transportation lane.
29. Enter the following data for the means of transport:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Validity Start Date</i>	<Current date>
<i>Validity End Date</i>	December 31, 2999
<i>Relevant to Carrier Selection</i>	Not selected
<i>Priority/Costs</i>	Neither Costs Nor Priority

30. Choose *Copy and Close*.
31. When prompted, create a proposal for the transportation distance and duration. The result should be as follows:

Field	Value
<i>Transportation Distance</i>	0,000
<i>Transportation Duration</i>	0:00

32. Select the new entry on the *Means of Transport* screen.
33. In the *Carrier (Select Means of Transport)* screen area, choose *Create*.
34. Enter the following data:

Field	Value
<i>BP Number</i>	DIT-CR-10
<i>Transportation Costs</i>	Blank
<i>Priority</i>	Blank

35. Choose *Copy and Close*.

36. Return to the initial screen.
37. On the *Intra-Zone Lane/Loc. Transp. Lane* tab page, enter the location/transportation zone DIT-PC-CR20.
38. Choose *Create* to create a new transportation lane.
39. In the *Means of Transport* screen area, choose *Create* to assign a means of transport to the transportation lane.
40. Enter the following data for the means of transport:

Field	Value
<i>Means of Transport</i>	DIT_MT20
<i>Validity Start Date</i>	<Current date>
<i>Validity End Date</i>	December 31, 2999
<i>Relevant to Carrier Selection</i>	Not selected
<i>Priority/Costs</i>	Neither Costs Nor Priority

41. Choose *Copy and Close*.
42. When prompted, create a proposal for the transportation distance and duration. The result should be as follows:

Field	Value
<i>Transportation Distance</i>	0,000
<i>Transportation Duration</i>	0:00

43. Select the new entry on the *Means of Transport* screen.
44. In the *Carrier (Select Means of Transport)* screen area, choose *Create*.
45. Enter the following data:

Field	Value
<i>BP Number</i>	DIT-CR-20
<i>Transportation Costs</i>	Blank
<i>Priority</i>	Blank

46. Choose *Copy and Close*.
47. Return to the initial screen.

5.6.3 Defining Carrier Profiles

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose ► *Master Data* ► *General* ► *Define Carrier Profiles*. ▾
2. Choose *Create*.
3. In the *Maintain Carrier Profile* dialog box, enter business partner DIT-CR-10.
4. Choose the *Transportation* tab page and check that the transportation lane-specific data for each means of transport to which the carrier is assigned is displayed.
5. Choose *Create* to create a carrier profile.
6. In the *Maintain Carrier Profile* dialog box, enter business partner DIT-CR-20.
7. Choose the *Transportation* tab page and check that the transportation lane-specific data for each means of transport to which the carrier is assigned is displayed.

5.7 Defining Vehicle Resources

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Resources** > **Define Resource**.
2. On the initial screen, choose *Create Resources*.
3. On the *Vehicle* tab page, enter the following data:

Field	Value
<i>Resource</i>	DIT-TRUCK-MR-CR10
<i>Location</i>	Blank
<i>Means of Transport</i>	DIT_MT10
<i>Time Zone</i>	CET
<i>Continuous Dimension</i>	MASS (Mass)
<i>Factory Calendar</i>	01
<i>Capacity</i>	24
<i>Unit</i>	TO (tons)
<i>Short Description</i>	DIT: Truck (Multi-Resource) of carrier DIT-CR-10

4. Press **ENTER**.
5. Choose the *General Data* tab page and select the *Finite Scheduling* checkbox.
6. Choose the *Transportation* tab page and enter the following data:

Field	Value
<i>From Date</i>	Current date
<i>To Date</i>	December 31, 9999
<i>Owner</i>	DIT-CR-10

7. Choose the *Time-Cont. Capacity* tab page and enter the following data:

Continuous Dimension	Capacity	Unit
Mass	24	TO (ton)
Volume	90	M3 (cubic meter)

8. Select resource **DIT-TRUCK-MR-CR10** and choose *Copy Resources*.

9. In the *Copy Resources* dialog box, enter the following data:

Field	Value
<i>Resource</i>	DIT-TRUCK-MR-CR20
<i>Resource Category</i>	T
<i>Location</i>	Blank
<i>Short Description</i>	DIT: Truck (Multi-Resource) of carrier DIT-CR-20

10. Choose *Copy Object* to create the new resource.

11. Select the new resource and choose the *General Data* tab page.

12. Enter means of transport `DIT_MT20`.

13. Choose the *Transportation* tab page and enter owner `DIT-CR-20`.

14. Choose *Definitions* or press `F8`.

15. On the *Change/Create Definitions* screen, choose the *Breaks* tab page and enter the following data:

Field	Value
<i>Break Pattern</i>	DIT-2200-0500
<i>Break Number</i>	1
<i>Break Start</i>	22:00:00
<i>Break End</i>	05:00:00

16. Choose the *Shifts* tab page and enter the following data:

Field	Value
<i>Shift</i>	DIT-0700-0700
<i>Valid To</i>	December 31, 9999
<i>Start</i>	07:00:00
<i>End</i>	07:00:00
<i>Break Pattern</i>	DIT-2200-0500

17. Choose the *Shift Sequences* tab page and enter the following data:

Field	Value
<i>Shift Sequence</i>	DIT-MOSU-0700-0700
<i>Day Number</i>	1 (Monday)

<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	2 (Can Only Start or Finish on a Workday)
<i>Shift 1</i>	DIT-0700-0700

18. Select the new entry and choose *Copy*.

19. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
<i>To Shift Sequence</i>	DIT-MOSU-0700-0700
<i>To Day Number</i>	2 (Tuesday)
<i>Valid To</i>	December 31, 9999

20. Continue to copy the shift sequence for the remaining days of the week (Wednesday to Sunday) by entering values 3 to 7 respectively in the *To Day Number* field.

21. Once you have created shift sequences for all seven days, choose *Back* to return to the *Resources* screen.

22. Choose *Capacity Variants* or press F6.

23. On the *Create Resources: Capacity Variants* screen, select resource DIT-TRUCK-MR-CR10 on the *Cap. Var. Shift Sequence* tab page.

24. Choose *Interval* or press F5.

25. In the *Create Resources: Capacity Variants* dialog box, enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOSU-0700-0700
<i>First Day</i>	1 (Monday)
<i>Workdays</i>	Workdays According to the Factory Calendar

26. Choose *Continue*.

27. On the *Create Resources: Capacity Variants* screen, select resource DIT-TRUCK-MR-CR20 on the *Cap. Var. Shift Sequence* tab page.

28. Choose *Interval* or press F5.

29. In the *Create Resources: Capacity Variants* dialog box, enter the following data:

Field	Value
--------------	--------------

<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOSU-0700-0700
<i>First Day</i>	1 (Monday)
<i>Workdays</i>	Workdays According to the Factory Calendar

30. Return to the *Resources* screen.

31. On the *Vehicles* tab page, enter active variant 1.

5.8 Defining and Assigning Calendar Resources

Activities

- [Defining Calendar Resources](#) [Page 153]
- [Assigning Calendar Resources to Locations](#) [Page 159]

5.8.1 Defining Calendar Resources

In this procedure, you define resources for operating times at locations.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Resources** > **Define Resource**.
2. On the initial screen, choose **Create Resources**.
3. Choose the **Calendar** tab page and create the following resources. For each resource, enter the time zone as **CET**, the factory calendar **01**, and the active variant **1**.

Resource	Location	Short Description
DIT-OT-VN10	SUDIT-VN-10@ERP001	DIT: Operating Times Supplier DIT-VN10
DIT-OT-VN20	SUDIT-VN-20@ERP001	DIT: Operating Times Supplier DIT-VN20
DIT-OT-VN21	SUDIT-VN-21@ERP001	DIT: Operating Times Supplier DIT-VN21
DIT-OT-VN30	SUDIT-VN-30@ERP001	DIT: Operating Times Supplier DIT-VN30
DIT-OT-VN31	SUDIT-VN-31@ERP001	DIT: Operating Times Supplier DIT-VN31
DIT-OT-VN40	SUDIT-VN-40@ERP001	DIT: Operating Times Supplier DIT-VN40
DIT-OT-VN50	SUDIT-VN-50@ERP001	DIT: Operating Times Supplier DIT-VN50
DIT-OT-SP1200	SP1200@ERP001	DIT: Operating Times Shipping/Receiving Point 1200
DIT-OT-SP1400	SP1400@ERP001	DIT: Operating Times Shipping/Receiving Point 1400
DIT-OT-SP1200-CR10	SP1200@ERP001	DIT: Operating Times Ship./Rcv.Pt. 1200 for carrier DIT-CR-10
DIT-OT-SP1400-CR20	SP1400@ERP001	DIT: Operating Times Ship./Rcv.Pt. 1400 for carrier DIT-CR-20
DIT-OT-VN10-CR10	SUDIT-VN-10@ERP001	Operating Times Supplier DIT-VN-10 for carrier DIT-CR-20
DIT-OT-VN30-CR20	SUDIT-VN-30@ERP001	Operating Times Supplier DIT-VN-30 for carrier DIT-CR-20
DIT-OT-VN31-	SUDIT-VN-	Operating Times Supplier DIT-VN-31 for carrier

CR20	31@ERP001	DIT-CR-20
DIT-OT-VN40-CR20	SUDIT-VN-40@ERP001	Operating Times Supplier DIT-VN-40 for carrier DIT-CR-20

4. Press **ENTER**.
5. Choose *Definitions* or press **F8**.
6. On the *Change/Create Definitions* screen, choose the *Shifts* tab page. Enter the following data:

Shift	Valid To	Start	End	Break Pattern
DIT-0600-2200	December 31, 9999	06:00:00	22:00:00	Blank
DIT-0700-0800	December 31, 9999	07:00:00	08:00:00	Blank
DIT-0800-0900	December 31, 9999	08:00:00	09:00:00	Blank
DIT-1400-1500	December 31, 9999	14:00:00	15:00:00	Blank
DIT-1500-1600	December 31, 9999	15:00:00	16:00:00	Blank

7. Choose the *Shift Sequences* tab page and enter the following data:

Field	Value
<i>Shift Sequence</i>	DIT-MOFR-0600-2200
<i>Day Number</i>	1 (Monday)
<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	Can Only Start or Finish on a Workday
<i>Shift 1</i>	DIT-0600-2200

8. Select your new entry and choose *Copy*.
9. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
<i>To Shift Sequence</i>	DIT-MOFR-0600-2200
<i>To Day Number</i>	2 (Tuesday)
<i>Valid To</i>	December 31, 9999

10. Repeat the process to create shift sequences for Wednesday (day number 3) to Friday (day number 5).
11. Select an entry and choose *Copy*.
12. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
-------	-------

<i>Shift Sequence</i>	DIT-MOFR-0700-0800
<i>Day Number</i>	1 (Monday)
<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	Can only Start or Finish on a Workday
<i>Shift 1</i>	DIT-0700-0800

13. Repeat the process to copy shift sequence DIT-MOFR-0700-0800 for Tuesday to Friday.

14. Select an entry and choose *Copy*.

15. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
<i>Shift Sequence</i>	DIT-MOFR-0800-0900
<i>Day Number</i>	1 (Monday)
<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	Can only Start or Finish on a Workday
<i>Shift 1</i>	DIT-0800-0900

16. Repeat the process to copy shift sequence DIT-MOFR-0800-0900 for Tuesday to Friday.

17. Select an entry and choose *Copy*.

18. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
<i>Shift Sequence</i>	DIT-MOFR-1400-1500
<i>Day Number</i>	1 (Monday)
<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	Can only Start or Finish on a Workday
<i>Shift 1</i>	DIT-1400-1500

19. Repeat the process to copy shift sequence DIT-MOFR-1400-1500 for Tuesday to Friday.

20. Select an entry and choose *Copy*.

21. In the *Copy Shift Programs* dialog box, enter the following data:

Field	Value
--------------	--------------

<i>Shift Sequence</i>	DIT-MOFR-1500-1600
<i>Day Number</i>	1 (Monday)
<i>Valid To</i>	December 31, 9999
<i>Non-Workdays</i>	Can only Start or Finish on a Workday
<i>Shift 1</i>	DIT-1500-1600

22. Repeat the process to copy shift sequence DIT-MOFR-1500-1600 for Tuesday to Friday.

23. Return to the *Resources* screen.

24. Select all new calendar resources.

25. Choose *Capacity Variants*.

26. Select the following resources:

- DIT-OT-SP1200
- DIT-OT-SP1400
- DIT-OT-VN10
- DIT-OT-VN20
- DIT-OT-VN21
- DIT-OT-VN30
- DIT-OT-VN31
- DIT-OT-VN40
- DIT-OT-VN50

27. Choose *Interval* or press F5.

28. Enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOFR-0600-2200
<i>First Day</i>	1
<i>Work Days</i>	Workdays According to the Factory Calendar
<i>Shift Factors</i>	Blank

29. Select resource DIT-OT-SP1200-CR10 and choose *Interval* or press F5.

30. Enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOFR-0700-0800
<i>First Day</i>	1
<i>Work Days</i>	Workdays According to the Factory Calendar
<i>Shift Factors</i>	Blank

31. Select resource DIT-OT-SP1400-CR20 and choose *Interval* or press F5.

32. Enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOFR-0800-0900
<i>First Day</i>	1
<i>Work Days</i>	Workdays According to the Factory Calendar
<i>Shift Factors</i>	Blank

33. Select resources DIT-OT-VN10-CR10, DIT-OT-VN30-CR20 and DIT-OT-VN31-CR20 and choose *Interval* or press F5.

34. Enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOFR-1400-1500
<i>First Day</i>	1
<i>Work Days</i>	Workdays According to the Factory Calendar

<i>Shift Factors</i>	Blank
----------------------	-------

35. Select resources DIT-OT-VN30-CR20 and DIT-OT-VN40-CR20 and choose *Interval* or press F5.

36. Enter the following data:

Field	Value
<i>Capacity Variant</i>	1
<i>From</i>	Current date
<i>To</i>	December 31, 9999
<i>Shift Sequence</i>	DIT-MOFR-1500-1600
<i>First Day</i>	1
<i>Work Days</i>	Workdays According to the Factory Calendar
<i>Shift Factors</i>	Blank

5.8.2 Assigning Calendar Resources to Locations

In this procedure, you assign the calendar resources for operating times to the relevant locations.

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Transportation Network** > **Locations** > **Define Location**.
2. On the initial screen, enter location `SUDIT-VN-10@ERP001` and location type `1011` (vendor).
3. Choose *Change*.
4. Choose the *Resources* tab page and enter the following data:

Field	Value
<i>Operating Times</i>	Selected
<i>Outbound</i>	DIT-OT-VN10

5. Choose *More Resources*.
6. Choose *Insert Row* for outbound.
7. Enter the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Operating Times of Location (Outbound)</i>	DIT-OT-VN10-CR10
<i>Valid</i>	1

8. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SUDIT-VN-20@ERP001
<i>Operating Times</i>	Selected
<i>Outbound</i>	DIT-OT-VN20

9. Repeat the above steps with the following data:

Initial Screen

Parameter	Value
<i>Location</i>	SUDIT-VN-21@ERP001
<i>Operating Times</i>	Selected

<i>Outbound</i>	DIT-OT-VN21
-----------------	-------------

10. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SUDIT-VN-30@ERP001
<i>Operating Times</i>	Selected
<i>Outbound</i>	DIT-OT-VN30
<i>Means of Transport</i>	DIT_MT20
<i>Operating Times of Location (Outbound)</i>	DIT-OT-VN30-CR20
<i>Valid</i>	1

11. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SUDIT-VN-31@ERP001
<i>Operating Times</i>	Selected
<i>Outbound</i>	DIT-OT-VN31
<i>Means of Transport</i>	DIT_MT20
<i>Operating Times of Location (Outbound)</i>	DIT-OT-VN31-CR20
<i>Valid</i>	1

12. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SUDIT-VN-40@ERP001
<i>Operating Times</i>	Selected
<i>Outbound</i>	DIT-OT-VN40
<i>Means of Transport</i>	DIT_MT20
<i>Operating Times of Location (Outbound)</i>	DIT-OT-VN40-CR20
<i>Valid</i>	1

13. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SUDIT-VN-50@ERP001
<i>Operating Times</i>	Selected

<i>Outbound</i>	DIT-OT-VN50
-----------------	-------------

14. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SP1200@ERP001
<i>Operating Times</i>	Selected
<i>Inbound</i>	DIT-OT-SP1200

15. Choose *More Resources*.

16. Choose *Insert Row* for inbound.

17. Enter the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT10
<i>Operating Times of Location (Inbound)</i>	DIT-OT-SP1200-CR10
<i>Valid</i>	1

18. Repeat the above steps with the following data:

Parameter	Value
<i>Location</i>	SP1400@ERP001
<i>Operating Times</i>	Selected
<i>Inbound</i>	DIT-OT-SP1400

19. Choose *More Resources*.

20. Choose *Insert Row* for inbound.

21. Enter the following data:

Field	Value
<i>Means of Transport</i>	DIT_MT20
<i>Operating Times of Location (Inbound)</i>	DIT-OT-SP1400-CR20
<i>Valid</i>	1

Activities

[Defining Partner Determination for Inbound Delivery](#) [Page 163]

6.1 Defining Partner Determination for Inbound Delivery

Activities

[Defining Partner Determination](#) [Page 164]

6.1.1 Defining Partner Determination

Procedure

1. In Customizing for SAP ERP, choose **Logistics Execution** > **Shipping** > **Basic Shipping Functions** > **Partners** > **Set Up Partner Determination for Deliveries**.
2. On the *Partner Determination Procedures* screen, select the entry **EL**.
3. In the tree structure, choose *Partner Functions in Procedure*.
4. On the *Partner Functions in Procedure* screen, check the following entry and create any missing data:

Field	Value
<i>Partner Function</i>	GS
<i>Not Modifiable</i>	Deselected
<i>Mandatory Function</i>	Deselected

7 Configuring Monitoring and Executing Freight

Activities

[Configuring Settings for User and User Interface](#) [Page 166]

7.1 Configuring Settings for User and User Interface

Activities

- [Assigning Authorization Profiles to Users](#) [Page 167]
- [Assigning Authorization Profiles to Event Handler Types](#) [Page 170]
- [Assigning User Profiles and Web Interface Transactions to Users](#) [Page 171]

7.1.1 Assigning Authorization Profiles to Users

This document does not explain how to create users. The following procedure assumes that there is one user for each carrier to report events.

For information about defining and assigning user roles, see SAP Library for SAP Event Management under ► *SAP Event Management* ► *Administration* ► *Roles for SAP Event Management* ► *SAP Event Management User* ►.

Procedure

1. On the *SAP Easy Access* screen for SAP Event Management, choose ► *Tools* ► *Administration* ► *User Maintenance* ► *Role Administration* ► *Roles* ►.
2. In the *Role* field, enter DIT_CARRIER_CR10.
3. Choose *Create Single Role*.
4. In the *Description* field, enter TM-DIT: Authorization for Carrier DIT-CR-10.
5. Save your entries.
6. Choose the *Menu* tab page and choose *Transaction*.
7. In the *Assign Transactions* dialog box, enter transaction code /SAPTRX/EM_START.
8. Choose *Assign Transactions*.
9. In the *Node Details* screen area, change the entry in the *Text* field to Web Interface - Search.
10. Save your entries.
11. Select the *Authorizations* tab page.
12. Choose *Propose Profile Names* to automatically generate a profile name and profile text.
13. Save your entries.
14. Choose *Change Authorization Data*.
15. Choose *Manually* to manually select authorization objects.
16. Enter the authorization objects X_EM_EH and X_EM_EVM.
17. Choose *Continue*.
18. Expand the new nodes in full.
19. Enter the following data for the event handler authorizations:

Field	Value
<i>Parameter</i> (From)	ODT20_TSP_INT
<i>Parameter Value of Length 255</i> (From)	DIT-CR-10

<i>Activity</i>	03 (Display)
-----------------	--------------

20. Enter the following data for the event messages:

Field	Value
<i>Sender Code ID (From)</i>	*
<i>Sender Code Set (From)</i>	*
<i>Activity</i>	32 (Save)

21. Save your entries.

22. Choose *Generate* or press `SHIFT+F5`.

23. Choose *Back* to return to the *Change Roles* screen.

24. Choose the *User* tab page.

25. Enter the user ID for carrier `DIT-CR-10`.

Save your entries.

26. Choose *Back* to return to the role maintenance screen.

27. Choose *Back* to return to the *Role Maintenance* screen.

28. Make sure that the *Role* field contains your new role and choose *Copy Role*.

29. In the *To Role* field, enter `DIT_CARRIER_CR20`.

30. Choose *Copy All*.

31. Choose *Change* to edit the new role.

32. Enter the description `TM-DIT: Authorization for Carrier DIT-CR-20`.

33. On the *Authorizations* tab page, choose *Propose Profile Name* to automatically generate a profile name and profile text.

34. Save your entries.

35. Choose *Change Authorization Data*.

36. Expand the *Manually* nodes in full.

37. Enter the following data for the event handler authorizations:

Field	Value
<i>Parameter (From)</i>	ODT20_TSP_INT
<i>Parameter Value of Length 255 (From)</i>	DIT-CR-20
<i>Activity</i>	03 (Display)

38. Save your entries.

39. Choose *Generate*.
40. Choose *Back* to return to the *Change Roles* screen.
41. Choose the *User* tab page.
42. Enter the user ID for carrier DIT-CR-20.
43. Save your entries.

7.1.2 Assigning Authorization Profiles to Event Handler Types

Procedure

1. In Customizing for SAP Event Management, choose **Event Management** > **Event Handlers and Event Handler Data** > **Event Handlers** > **Define Event Handler Types**.
2. Choose the *Event Handler Types* view from the dialog structure.
3. Select entry ODT30_TO and choose *Details*.
4. Change the entry in the *Auth. Prof. ID* field to DIT_ODT20_CARRIER.

7.1.3 Assigning User Profiles and Web Interface Transactions to Users

Procedure

1. In Customizing for SAP Event Management, choose ► *Event Messages, Status Queries, and Web Interface* ► *Web Interface* ► *Assign User Profiles and Web Interface Transactions to Users* ⌵.
2. Choose the *Selection Profile* view from the dialog structure.
3. In the *Determine Work Area: Entry* dialog box, enter the user ID for carrier DIT-CR-10.
4. Choose *Enter* to continue.
5. Create an entry with the following data:

Field	Value
<i>Web Interface Transaction</i>	DIT_ODT20_CARR_FO
<i>User Profile</i>	DIT_ODT20_CARR_FO
<i>Web Entry Profile Order Number</i>	1

6. In Customizing for SAP Event Management, choose ► *Event Messages, Status Queries, and Web Interface* ► *Web Interface* ► *Assign User Profiles and Web Interface Transactions to Users* ⌵.
7. Choose the *Selection Profile* view from the dialog structure.
8. In the *Determine Work Area: Entry* dialog box, enter the user ID for carrier DIT-CR-20.
9. Choose *Enter* to continue.
10. Create an entry with the following data:

Field	Value
<i>Web Interface Transaction</i>	DIT_ODT20_CARR_FO
<i>User Profile</i>	DIT_ODT20_CARR_FO
<i>Web Entry Profile Order Number</i>	1

8 Configuring Settling Freight Orders

Activities

- [Configuring Freight Settlement in SAP TM](#) [Page 173]
- [Configuring Freight Agreements](#) [Page 175]
- [Mapping Organizational Units for Purchasing](#) [Page 178]
- [Defining Master Data for Charge Management](#) [Page 179]

8.1 Configuring Freight Settlement in SAP TM

Activities

[Defining Freight Settlement Profiles](#) [Page 174]

8.1.1 Defining Freight Settlement Profiles

Procedure

1. In Customizing for *Transportation Management*, choose ► *Settlement* ► *Define Settlement Profile* ►.
2. Create a settlement profile with the following data:

Field	Value
<i>Settlement Profile</i>	DIT_SP_01
<i>Description</i>	DIT: Freight Settlement Profile
<i>Data Source</i>	01 (Planned Data)
<i>Split/Consolidation Strategy</i>	FSD_CREAT
<i>Calculation Option</i>	B (Copy All Charges)
<i>Collective Invoice</i>	Deselected

8.2 Configuring Freight Agreements

Activities

- [Defining Freight Agreement Types](#) [Page 176]
- [Defining General Settings for Charge Calculations](#) [Page 177]

8.2.1 Defining Freight Agreement Types

Procedure

1. In Customizing for *Transportation Management*, choose **Master Data** > *Agreements and Service Products* > *Define Freight Agreement Settings*.
2. Choose *New Entries* to create a new entry with the following data:

Field	Value
<i>Type</i>	DIT6
<i>Short Description</i>	DIT: Freight Agreements
<i>Default Type</i>	Deselected
<i>Track Changes</i>	Selected
<i>Multiple Parties</i>	Deselected
<i>FA No. Range</i>	01
<i>Text Schema</i>	DEFAULT
<i>Time Determination Type</i>	Simple, Transit Time Only
<i>Display Time Determination Type</i>	Do Not Display

3. Save your entries.

8.2.2 Defining General Settings for Charge Calculations

Procedure

1. In Customizing for *Transportation Management*, choose **Basic Functions** > **Charge Calculation** > **Basic Settings for Charge Calculation** > **Define General Settings**.
2. Create an entry with the following data:

Field	Value
<i>Organizational Unit</i>	Organization ID for Purchasing Organization as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29]
<i>Default Purchasing Organization</i>	Organization ID for Purchasing Organization as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29]
<i>Settlement Profile</i>	DIT_SP_01
<i>Local Currency</i>	EUR

8.3 Mapping Organizational Units for Purchasing

Procedure

1. In Customizing for SAP ERP, choose ► *Integration with Other SAP Components* ► *Transportation Management* ► *Invoice Integration* ► *Invoicing* ► *Mapping of Organizational Units* ► *Assign Organizational Units for Purchasing* ►.
2. Create the following entries:

Field Name	Value
<i>Logical System</i>	Logical system ID of your SAP TM system
<i>TM Pur. Organization</i>	Organization ID for purchasing organization as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29]
<i>TM Purchasing Group</i>	Organization ID for purchasing group as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29].
<i>Purchasing Org.</i>	1000
<i>Purch. Group</i>	P01
<i>Plant</i>	1200
<i>Company Code</i>	1000
<i>Document Type</i>	NB
<i>Material Group</i>	007

3. Save your entries.

8.4 Defining Master Data for Charge Management

Activities

- [Defining Scales](#) [Page 180]
- [Defining Rate Tables](#) [Page 184]
- [Releasing Rate Tables](#) [Page 192]
- [Defining Charge Calculation Sheets](#) [Page 193]
- [Defining Freight Agreements](#) [Page 196]
- [Releasing Freight Agreements](#) [Page 200]

8.4.1 Defining Scales

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Charge Management and Service Product Catalogs** > **Scales** > **Create Scale**.
2. Choose *Continue* to create a new scale without template.
3. On the *General Data* tab page, enter the following data:

Field	Value
<i>Scale</i>	DIT-SCALE-DIST-CR10
<i>Description</i>	DIT: Scale for distances (km) of carrier DIT-CR-10
<i>Scale Base</i>	DIST (Distance)
<i>Scale Type</i>	To-Scale (<=)
<i>Scale Unit of Measure</i>	KM (Kilometer)
<i>Rounding Profile</i>	0005 (Round Up/Down To 1.00)

4. Choose the *Items* tab page and enter the following data:

Distance	Calculation Type
50	Relative
100	Relative
150	Relative
200	Relative
250	Relative
300	Relative
350	Relative
400	Relative
450	Relative
500	Relative
550	Relative
600	Relative
650	Relative

700	Relative
800	Relative
900	Relative
1,000	Relative

5. Repeat the process to create another scale using the following data.

6. On the *General Data* tab page, enter the following data:

Field	Value
<i>Scale</i>	DIT-SCALE-DIST-CR20
<i>Description</i>	DIT: Scale for distances (km) of carrier DIT-CR-20
<i>Scale Base</i>	DIST (= Distance)
<i>Scale Type</i>	To-Scale (<=)
<i>Scale Unit of Measure</i>	KM (Kilometer)
<i>Rounding Profile</i>	0005 (Round Up/Down To 1.00)

7. Choose the *Items* tab page and enter the following data:

Distance	Calculation Type
50	Relative
100	Relative
150	Relative
200	Relative
250	Relative
300	Relative
350	Relative
400	Relative
450	Relative
500	Relative
600	Relative
700	Relative
800	Relative

900	Relative
1,000	Relative

8. Repeat the steps above to create another scale using the following data:

9. On the General Data tab page, enter the following data:

Field	Value
<i>Scale</i>	DIT-SCALE-WGHT-CR10
<i>Description</i>	DIT: Scale for weight of carrier DIT-CR-10
<i>Scale Base</i>	WEIGHT (Weight)
<i>Scale Type</i>	To Scale (<=)
<i>Scale Unit of Measure</i>	TO (Ton)
<i>Rounding Profile</i>	0005 (Rounding Up/Down to 1.00)

10. Choose the *Items* tab page and enter the following data:

11. Add scale items with the following data:

Weight	Calculation Type
10	Relative
15	Relative
20	Relative
30	Relative
40	Relative

12. Repeat the steps above to create another scale using the following data.

13. On the General Data tab page, enter the following data:

Field	Value
<i>Scale</i>	DIT-SCALE-WGHT-CR20
<i>Description</i>	DIT: Scale for weight of carrier DIT-CR-20
<i>Scale Base</i>	WEIGHT (Weight)
<i>Scale Type</i>	To Scale (<=)
<i>Scale Unit of Measure</i>	TO (Ton)
<i>Rounding Profile</i>	0005 (Rounding Up/Down to 1.00)

14. Choose the *Items* tab page and enter the following data:

Weight	Calculation Type
10	Relative
15	Relative
20	Relative
30	Relative
40	Relative

15. Repeat the steps above to create another scale using the following data.

16. On the General Data tab page, enter the following data:

Field	Value
<i>Scale</i>	DIT-SCALE-STOP
<i>Description</i>	DIT: Scale for number of stops
<i>Scale Base</i>	NUMBER (Number)
<i>Scale Type</i>	Same Scale (=)

17. Choose the Items tab page and enter the following data:

Number of Units	Calculation Type
1	Absolute
2	Absolute
3	Absolute
4	Absolute
5	Absolute
6	Absolute
7	Absolute
8	Absolute
9	Absolute

8.4.2 Defining Rate Tables

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Charge Management and Service Product Catalogs** > **Rate Tables** > **Create Rate Table Definition**.
2. Choose *Continue* to create a new rate table without template.
3. On the *General Data* tab page, enter the following data:

Field	Value
<i>Rate Table</i>	DIT-RATE-HAUF-CR10
<i>Description</i>	DIT: Rate table for FTL of carrier DIT-CR-10
<i>Charge Usage</i>	Service Provider
<i>Charge Type</i>	HAUF
<i>Value Type</i>	Absolute

4. Navigate to the area for scales and choose *Insert* to enter the following data. Then choose *Add Scale*.

Field	Value
<i>Dimension</i>	1
<i>Reference Scale</i>	DIT-SCALE-WGHT-CR10
<i>Calculation Base</i>	GROSS_WEIGHT (Gross Weight)
<i>Minimum Value</i>	Selected
<i>Maximum Value</i>	Deselected
<i>Rel. Calc. Method</i>	Selected
<i>Rounding Profile</i>	0005

5. Enter another row using the following data and then choose *Add Scale*:

Field	Value
<i>Dimension</i>	2
<i>Transportation Charge Scale</i>	DIT-SCALE-DIST-CR10
<i>Calculation Base</i>	ACTUAL_DIST
<i>Minimum Value</i>	Deselected
<i>Maximum Value</i>	Deselected

<i>Rel. Calc. Method</i>	Deselected
<i>Rounding Profile</i>	0005

6. Choose the *Dates and Values* tab page and enter the following data:

Field	Value
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Aggregated Rate Desc.</i>	Blank
<i>Currency</i>	EUR (Euro)
<i>Rounding Profile</i>	Blank

7. Select the validity period entered to enter the rate table values.

8. On the *Calculation Rules* tab page, enter the following data:

Field	Value
<i>Calculation Base</i>	GROSS_WEIGHT (Gross Weight)
<i>Price Unit</i>	1000
<i>Unit of Measure</i>	KG (Kilogram)
<i>Rounding Profile</i>	0007

9. Choose the *Excel Integration* tab page and choose *Download*.

10. In the *File Download* dialog box, save file `DIT-RATE-HAUF-CR10.XML.XLS` to your local drive.

11. Open the downloaded file using Microsoft Excel and confirm the warning message about the file format by choosing *Yes*.

12. Copy the rate table values below to your clipboard.

Gross Weight (TO)

Actual Distance (KM)	Minimum	≤ 10	≤ 15	≤ 20	≤ 30	≤ 40
≤ 50	15.50	15.50	16.00	16.50	17.00	17.50
≤ 100	16.33	16.33	16.90	17.48	18.05	18.63
≤ 150	17.15	17.15	17.80	18.45	19.10	19.75
≤ 200	17.98	17.98	18.70	19.43	20.15	20.88
≤ 250	18.80	18.80	19.60	20.40	21.20	22.00

≤ 300	19.63	19.63	20.50	21.38	22.25	23.13
≤ 350	20.45	20.45	21.40	22.35	23.30	24.25
≤ 400	21.28	21.28	22.30	23.33	24.35	25.38
≤ 450	22.10	22.10	23.20	24.30	25.40	26.50
≤ 500	22.93	22.93	24.10	25.28	26.45	27.63
≤ 550	23.75	23.75	25.00	26.25	27.50	28.75
≤ 600	24.58	24.58	25.90	27.23	28.55	29.88
≤ 650	25.40	25.40	26.80	28.20	29.60	31.00
≤ 700	26.23	26.23	27.70	29.18	30.65	32.13
≤ 800	27.88	27.88	29.50	31.13	32.75	34.38
≤ 900	29.53	29.53	31.30	33.08	34.85	36.63
≤ 1,000	30.63	30.63	32.50	34.38	36.25	38.13

13. Switch to Excel, select the corresponding cells, and choose *Paste Special...*
14. In the *Paste Special* dialog box, select *Paste Values* and *Transpose*.
15. Save file *DIT-RATE-HAUF-CR10.XML.XLS* to your drive and confirm that you want to save the workbook in the given format by choosing *Yes*.
16. On the *Excel Integration* tab page, choose *Browse*.
17. Choose the XML spreadsheet that you saved to your disk.
18. On the *Excel Integration* tab page, choose *Upload* to upload the rate table values.
19. In SAP NetWeaver Business Client, choose **Master Data** > *Charge Management* > *Rate Tables* > *Create Rate Table Definition*.
20. Choose *Continue* to create a new rate table without template.
21. On the *General Data* tab page, enter the following data:

Field	Value
<i>Rate Table</i>	DIT-RATE-HAUF-CR20
<i>Description</i>	DIT: Rate table for FTL of carrier DIT-CR-20
<i>Charge Usage</i>	Service Provider
<i>Charge Type</i>	HAUF
<i>Value Type</i>	Absolute

22. Navigate to the area for scales and choose *Insert* to enter the following data. Then choose *Add Scale*.

Field	Value
<i>Dimension</i>	1
<i>Reference Scale</i>	DIT-SCALE-WGHT-CR20
<i>Calculation Base</i>	GROSS_WEIGHT (Gross Weight)
<i>Minimum Value</i>	Selected
<i>Maximum Value</i>	Deselected
<i>Rel. Calc. Method</i>	Selected
<i>Rounding Profile</i>	0005

23. Enter another row using the following data and then choose *Add Scale*:

Field	Value
<i>Dimension</i>	2
<i>Reference Scale</i>	DIT-SCALE-DIST-CR20
<i>Calculation Base</i>	ACTUAL_DIST
<i>Minimum Value</i>	Deselected
<i>Maximum Value</i>	Deselected
<i>Rel. Calc. Method</i>	Deselected
<i>Rounding Profile</i>	0005

24. Choose the *Dates and Values* tab page and enter the following data:

Field	Value
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Aggregated Rate Desc.</i>	-
<i>Currency</i>	EUR (Euro)
<i>Rounding Profile</i>	-

25. Select the validity period to enter the rate table values.

26. On the *Calculation Rules* tab page, enter the following data.

Field	Value
<i>Calculation Base</i>	GROSS_WEIGHT (Gross Weight)
<i>Price Unit</i>	1000

<i>Unit of Measure</i>	KG (Kilogram)
<i>Rounding Profile</i>	0007

27. Choose the *Excel Integration* tab page and choose *Download*.

28. Open the downloaded file using Microsoft Excel and confirm the warning message about the file format by choosing *Yes*.

29. Copy the rate table values below to your clipboard.

Gross Weight (TO)

Actual Distance (KM)	Minimum	≤ 10	≤ 15	≤ 20	≤ 30	≤ 40
≤ 50	15.50	15.50	16.00	16.50	17.00	17.50
≤ 100	16.33	16.33	16.90	17.48	18.05	18.63
≤ 150	17.15	17.15	17.80	18.45	19.10	19.75
≤ 200	17.98	17.98	18.70	19.43	20.15	20.88
≤ 250	18.80	18.80	19.60	20.40	21.20	22.00
≤ 300	19.63	19.63	20.50	21.38	22.25	23.13
≤ 350	20.45	20.45	21.40	22.35	23.30	24.25
≤ 400	21.28	21.28	22.30	23.33	24.35	25.38
≤ 450	22.10	22.10	23.20	24.30	25.40	26.50
≤ 500	22.93	22.93	24.10	25.28	26.45	27.63
≤ 600	24.58	24.58	25.90	27.23	28.55	29.88
≤ 700	26.23	26.23	27.70	29.18	30.65	32.13
≤ 800	27.88	27.88	29.50	31.13	32.75	34.38
≤ 900	29.53	29.53	31.30	33.08	34.85	36.63
≤ 1,000	30.63	30.63	32.50	34.38	36.25	38.13

30. Switch to Excel, select the corresponding cells, and choose *Paste Special...*

31. In the *Paste Special* dialog box, select *Paste Values* and *Transpose*.

32. Save file *DIT-RATE-HAUF-CR20.XML.XLS* to your drive and confirm that you want to save the workbook in the given format by choosing *Yes*.

33. On the *Excel Integration* tab page, choose *Browse*.

34. Choose the XML spreadsheet that you saved to your disk.

35. On the *Excel Integration* tab page, choose *Upload* to upload the rate table values.
36. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > *Charge Management* > *Rate Tables* > *Create Rate Table Definition*.
37. Choose *Continue* to create a new rate table without template.
38. On the General Data tab page, enter the following data:

Field	Value
<i>Rate Table</i>	DIT-RATE-STOP-CR10
<i>Description</i>	DIT: Rate table for additional stop charges of carrier DIT-CR-10
<i>Charge Usage</i>	Service Provider
<i>Charge Type</i>	STOP
<i>Value Type</i>	Absolute

39. Navigate to the area for scales and choose *Insert* to enter the following data. Then choose *Add Scale*.

Field	Value
<i>Dimension</i>	1
<i>Reference Scale</i>	DIT-SCALE-STOP
<i>Calculation Base</i>	NUMBER_OF_STOPS (Number of Stops)
<i>Minimum Value</i>	Deselected
<i>Maximum Value</i>	Deselected
<i>Rel. Calc. Method</i>	Deselected
<i>Rounding Profile</i>	Blank

40. Choose the *Dates and Values* tab page and enter the following data:

Field	Value
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Aggregated Rate Desc.</i>	Blank
<i>Currency</i>	EUR (Euro)
<i>Rounding Profile</i>	Blank

41. Select the validity period to enter the rate table values.
42. Enter the following data in the rate table:

Number of Stops	Value
1	0.00
2	0.00
3	25.00
4	50.00
5	75.00
6	100.00
7	125.00
8	150.00
9	175.00

43. Save your entries.

44. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data > Charge Management > Rate Tables > Create Rate Table Definition**.

45. Choose *Continue* to create a new rate table without template.

46. On the *General Data* tab page, enter the following data:

Field	Value
<i>Rate Table</i>	DIT-RATE-STOP-CR20
<i>Description</i>	DIT: Rate table for additional stop charges of carrier DIT-CR-20
<i>Charge Usage</i>	Service Provider
<i>Charge Type</i>	STOP
<i>Value Type</i>	Absolute

47. Navigate to the area for scales and choose *Insert* to enter the following data. Then choose *Add Scale*.

Field	Value
<i>Dimension</i>	1
<i>Reference Scale</i>	DIT-SCALE-STOP
<i>Calculation Base</i>	NUMBER_OF_STOPS (Number of Stops)
<i>Minimum Value</i>	Deselected
<i>Maximum Value</i>	Deselected

<i>Rel. Calc. Method</i>	Deselected
<i>Rounding Profile</i>	Blank

48. Choose the *Dates and Values* tab page and enter the following data:

Field	Value
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Aggregated Rate Desc.</i>	Blank
<i>Currency</i>	EUR (Euro)
<i>Rounding Profile</i>	Blank

49. Select the validity period entered to enter the rate table values.

50. Enter the following data in the rate table:

Number of Stops	Value
1	0.00
2	0.00
3	0.00
4	30.00
5	60.00
6	90.00
7	120.00
8	150.00
9	180.00

51. Save your entries.

8.4.3 Releasing Rate Tables

Procedure

1. In SAP TM, open *SAP NetWeaver Business Client* and choose **Master Data** > *Charge Management and Service Product Catalogs* > *Rate Tables* > *Edit Rate Table Definition*.
2. On the initial screen, enter the rate table `DIT-RATE-HAUF-CR10`.
3. Choose *Continue*.
4. Choose the *Dates and Values* tab page.
5. Select the maintained validity period.
6. Choose *Release*.
7. Save your data.
8. Repeat the process for the following rate tables:
 - `DIT-RATE-HAUF-CR20`.
 - `DIT-RATE-STOP-CR10`.
 - `DIT-RATE-STOP-CR20`.

8.4.4 Defining Charge Calculation Sheets

Procedure

1. In SAP TM, open *SAP NetWeaver Business Client* and choose **Master Data > Charge Management and Service Product Catalogs > Calculation Sheets > Create Calculation Sheet**.
2. Choose *Continue* to create a new calculation sheet without a template.
3. On the *General Data* screen, enter the following data:

Field	Value
<i>Calculation Sheet</i>	DIT-TCCS-CR10
<i>Description</i>	DIT: Calculation Sheet of carrier DIT-CR-10
<i>Charge Usage</i>	Service Provider

4. In the *Items* screen area, select the first row (line 10).
5. Choose *Insert* to add a new item that is subordinate to the first item.
6. Enter the following data for the new item:

Field	Value
<i>Line No.</i>	20
<i>Instruction Type</i> (on the <i>Basic Data</i> tab page)	Standard
<i>Charge Type</i> (on the <i>Basic Data</i> tab page)	HAUF
<i>Mandatory</i> (on the <i>Basic Data</i> tab page)	No
<i>Crcy</i> (<i>Currency</i>) (on the <i>Rate</i> tab page)	EUR
<i>Suppress Zero Values</i> (on the <i>Rate</i> tab page)	Deselected

7. In the *Items* screen area, select the new row (line 20).
8. On the *Basic Data* tab page, select the *Calculation Resolution Base* checkbox.
9. Choose the *Rate* tab page and enter rate table `DIT-RATE-HAUF-CR10`.
10. In the *Items* screen area, select the first row in the table (line 10).
11. Choose *Insert* to add an item that is subordinate to the first item.
12. Enter the following data for the new item:

Field	Value
<i>Line No.</i>	30

<i>Instruction Type</i> (on the <i>Basic Data</i> tab page)	Standard
<i>Charge Type</i> (on the <i>Basic Data</i> tab page)	STOP
<i>Mandatory</i> (on the <i>Basic Data</i> tab page)	No
<i>Crcy (Currency)</i> (on the <i>Rate</i> tab page)	EUR
<i>Suppress Zero Values</i> (on the <i>Rate</i> tab page)	Selected

13. In the *Items* screen area, select the new row (line 30).
14. On the *Basic Data* tab page, blank the *Calculation Resolution Base* field.
15. Choose the *Rate* tab page and enter rate table DIT-RATE-STOP-CR10.
16. Save your entries.
17. In SAP TM, open *SAP NetWeaver Business Client* and choose ► *Master Data* ► *Charge Management and Service Product Catalogs* ► *Calculation Sheets* ► *Create Calculation Sheet* ⌵.
18. Choose *Continue* to create a new calculation sheet without a template.
19. On the *General Data* tab page, enter the following data:

Field	Value
<i>Calculation Sheet</i>	DIT-TCCS-CR20
<i>Description</i>	DIT: Calculation Sheet of carrier DIT-CR-20
<i>Charge Usage</i>	Service Provider

20. In the *Items* screen area, select the first row (line 10).
21. Choose *Insert* to add a new item that is subordinate to the first item.
22. Enter the following data for the new item:

Field	Value
<i>Line No.</i>	20
<i>Instruction Type</i> (on the <i>Basic Data</i> tab page)	Standard
<i>Charge Type</i> (on the <i>Basic Data</i> tab page)	HAUF
<i>Mandatory</i> (on the <i>Basic Data</i> tab page)	No
<i>Crcy (Currency)</i> (on the <i>Rate</i> tab page)	EUR
<i>Suppress Zero Values</i> (on the <i>Rate</i> tab page)	Selected

23. In the *Items* screen area, select the new row (line 20).
24. On the *Basic Data* tab page, deselect the *Calculation Resolution Base* checkbox.

25. Choose the *Rate* tab page and enter rate table DIT-RATE-HAUF-CR20.

26. In the *Items* screen area, select the first row (line 10).

27. Choose *Insert* to add a new item that is subordinate to the first item.

28. Enter the following data for the new item:

Field	Value
<i>Line No.</i>	30
<i>Instruction Type</i> (on the <i>Basic Data</i> tab page)	Standard
<i>Charge Type</i> (on the <i>Basic Data</i> tab page)	STOP
<i>Mandatory</i> (on the <i>Basic Data</i> tab page)	No
<i>Crcy (Currency)</i> (on the <i>Rate</i> tab page)	EUR
<i>Suppress Zero Values</i> (on the <i>Rate</i> tab page)	Selected

29. In the *Items* screen area, select the new row (line 30).

30. On the *Basic Data* tab page, deselect the *Calculation Resolution Base* checkbox.

31. Choose the *Rate* tab page and enter rate table DIT-RATE-STOP-CR20.

32. Save your entries.

8.4.5 Defining Freight Agreements

Procedure

1. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data** > **Charge Management and Service Product Catalogs** > **Freight Agreements** > **Create Freight Agreement**.
2. On the initial screen, enter the agreement type `DIT6`.
3. Choose *Continue*.
4. On the *General Data* screen, enter the following data:

Field	Value
<i>Agreement</i>	DIT-FA-CR10
<i>Description</i>	DIT: FA with carrier DIT-CR-10
<i>Purchase Organization</i>	Organization ID for Purchasing Organization as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29].
<i>Carrier</i>	DIT-CR-10
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Agreement Priority</i>	1
<i>Exclusion Rule</i>	Blank
<i>Document Currency</i>	EUR
<i>Weight Profile</i>	Blank

5. In the *Items* screen area, enter the following data (choose **Insert** > **Insert Product**):

Field	Value
<i>Item Number</i>	100
<i>Description</i>	FTL to Plant 1200
<i>Calculation Sheet</i>	DIT-TCCS-CR10

6. Select the *Payment Terms* tab page and enter terms of payment `0001`.
7. Select the *Preconditions* tab page and enter the following data:

Field	Value
<i>Orientation</i>	From

<i>Source Type</i>	Zone
<i>Source</i>	DIT-PC-CR10
<i>Means of Transport</i>	Blank
<i>Transportation Mode</i>	01 (Road)
<i>Orientation</i>	To
<i>Destination Type</i>	Zone
<i>Destination</i>	DIT-PL-1200
<i>Means of Transport</i>	Blank
<i>Transportation Mode</i>	01 (Road)

8. Open SAP NetWeaver Business Client in SAP TM and choose **Master Data > Charge Management and Service Product Catalogs > Freight Agreements > Create Freight Agreement**.
9. On the initial screen, enter the agreement type `DIT6`.
10. Choose *Continue*.
11. On the *General Data* screen, enter the following data:

Field	Value
<i>Agreement</i>	DIT-FA-CR20
<i>Description</i>	DIT: FA with carrier DIT-CR-20
<i>Purchase Organization</i>	Organization ID for Purchasing Organization as defined in Defining Organizational Unit for Purchasing Organization & Group [Page 29]
<i>Carrier</i>	DIT-CR-20
<i>Valid From</i>	Current date
<i>Valid To</i>	December 31, 9999
<i>Agreement Priority</i>	1
<i>Exclusion Rule</i>	Blank
<i>Document Currency</i>	EUR
<i>Weight Profile</i>	Blank

12. In the *Items* screen area, enter the following data (choose **Insert > Insert Product**):

Field	Value
<i>Item Number</i>	100

<i>Description</i>	FTL to Plant 1200
<i>Calculation Sheet</i>	DIT-TCCS-CR20

13. Select the *Payment Terms* tab page and enter the terms of payment 0001.

14. Select the *Preconditions* tab page and enter the following data:

Field	Value
<i>Orientation</i>	From
<i>Source Type</i>	Zone
<i>Source</i>	DIT-PC-CR20
<i>Means of Transport</i>	Blank
<i>Transportation Mode</i>	01 (Road)
<i>Orientation</i>	To
<i>Destination Type</i>	Zone
<i>Destination</i>	DIT-PL-1200
<i>Means of Transport</i>	Blank
<i>Transportation Mode</i>	01 (Road)

15. In the *Items* screen area, enter the following data (choose ► *Insert* ► *Insert Product* ►):

10 Processing Evaluated Receipt Settlements (ERS) in ERP

Activities

[Defining Master Data for Evaluated Receipt Settlements](#) [Page 205]

10.1 Defining Master Data for Evaluated Receipt Settlement

Activities

- [Defining Vendor Master \(Carrier\) for ERS](#) [Page 206]
- [Defining Condition Records for Credit Memo Message Output in ERS](#) [Page 207]
- [Defining Partner Profiles for Credit Memo Message Output in ERS](#) [Page 208]

10.1.1 Defining Vendor Master (Carrier) for ERS

In this procedure, you define the vendor master on the carrier side for evaluated receipt settlement (ERS).

Procedure

1. On the *SAP Easy Access* screen in SAP ERP, choose **Logistics** > *Materials Management* > *Purchasing* > *Master Data* > *Vendor* > *Purchasing* > *Change (Current)*.
2. On the initial screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-CR-20
<i>Purchasing Organization</i>	1000

3. In the *Purchasing Organization Data* screen area, select the *Purchasing Data* checkbox.
4. Choose *Enter* to switch to the *Purchasing Data* screen.
5. In the *Control Data* screen area, select the *AutoEvalGRSetmt Del.* checkbox (evaluated receipt settlement).

10.1.2 Defining Condition Records for Credit Memo Message Output in ERS

In this procedure, you define the condition records that are used to process the message output for credit memos in evaluated receipt settlement (ERS).

Procedure

1. In Customizing for SAP ERP, choose **Materials Management** > **Logistics Invoice Verification** > **Message Determination** > **Maintain Conditions**.
2. Choose the *Create Condition: Invoice Verification* activity.
3. On the initial screen, enter output type **ERS6**.
4. Choose *Enter* to continue.
5. In the *Key Combination* dialog box, choose *CoCode, Vendor*.
6. Choose *Enter* to continue.
7. Enter company code **1000** and choose *Execute*.
8. On the next screen, enter the following data:

Field	Value
<i>Vendor</i>	DIT-CR-20
<i>Partner Function</i>	VN
<i>Medium</i>	6 (EDI)
<i>Date/Time</i>	4 (Send Immediately (saving the application))
<i>Language</i>	EN

10.1.3 Defining Partner Profiles for Credit Memo Message Output in ERS

In this procedure, you define the EDI partner profiles that are used to output messages for credit memos in evaluated receipt settlement (ERS).

Procedure

1. On the *SAP Easy Access* menu in SAP ERP, choose **Tools** > **ALE** > **ALE Administration** > **Runtime Settings** > **Partner Profiles**.
2. Choose *Create* to create a new partner profile.
3. Enter the following data:

Field	Value
<i>Partner Number</i>	DIT-CR-20
<i>Partner Type</i>	LI (Vendor)

4. Select the *Post Processing: Permitted Agent* tab page and enter the following data:

Field	Value
<i>Type</i>	US (User)
<i>Agent</i>	Your user ID
<i>Language</i>	EN

5. In the *Output Parameters* screen area, choose *Create Outbound Parameter*.
6. On the *Partner Profile: Output Parameters* screen, enter the following data (if the *Insert* pushbutton is disabled, save the document):

General Data

Field	Value
<i>Partner Role</i>	VN (Vendor)
<i>Message Type</i>	GSVERF

7. On the *Outbound Options* tab page, enter the following data:

Field	Value
<i>Receiver Port</i>	<Defined receiver port> as defined in <i>IDoc Interface/Electronic Data Interchange</i>
<i>Transfer IDOC Immed.</i>	Selected
<i>Basic Type</i>	GSVERF03

8. Choose *Enter* to continue.

9. Check that the package size has automatically been entered as 1. If not, enter this value.

10. Choose the *Message Control* tab page.

11. Choose *Insert Row* and enter the following data:

Field	Value
<i>Application</i>	MR
<i>Message Type</i>	ERS6
<i>Process Code</i>	MRRL
<i>Change Message</i>	Deselected
