#### **FOREWORD**

The starter kit for financial and regulatory reporting for banking is a banking pre-configuration of SAP Financial Consolidation, designed to perform, validate and publish IFRS financial statements (IFRS9 compliant) and all FINREP reports required by EBA (70 tables in the amended Implementing Technical Standard for supervisory reporting with regard to FINREP, issued in November 2016)

This starter kit provides a configuration to address both IFRS and FINREP requirements in an integrated reporting process:

## **Integrated reporting process**

This document aims to give you an overview of the main design principles used to build the application. It is organized according to the steps performed in a consolidation processing:

- Data Collection
- Consolidation Process
- Analysis Process

Section D is dedicated to the reconciliation process between IFRS Financial statements and FINREP reporting. Section E describes the configuration items designed for the transition to IFRS9.

In appendix, you will find the list of financial accounts, package and control schedules, flows, audit IDs and consolidation journal entries and the list of retrievals.

## A. DATA COLLECTION

## 1. Data entry format

#### 1.1. Account typology

The chart of accounts is common to IFRS and FINREP reporting in order to ensure the consistency of publishable statements (IFRS9 compliant). Each account is assigned an IFRS and a FINREP characteristic. The publishable financial statements use these characteristics to group together accounts either in an IFRS format or in a FINREP format.

In the example below, you can see that account A02000 Cash balances at central banks will:

- be included in the IFRS Statement of Financial Position in the Cash and cash equivalents line item;
- appear in the table 1.1 Asset on row 030 Cash balances at central banks.

Code A	Long description	FINREP-L1	FINREP-L1 (Long description)	IFRS-L1 (Code)	IFRS-L1 (Long description)
A01000	Cash on hand	FR-A020	Cash on hand	IR-A000	Cash and cash equivalents
A02000	Cash balances at central banks	FR-A030	Cash balances at central banks	IR-A000	Cash and cash equivalents
A03000	Other demand deposits	FR-A040	Other demand deposits	IR-A000	Cash and cash equivalents
A11000	Derivatives - HFT	FR-A060	Derivatives	IR-A010	Trading assets
A12010	Shares - HFT	FR-A070	Equity instruments	IR-A010	Trading assets
A12020	Units in investment funds - HFT	FR-A070	Equity instruments	IR-A010	Trading assets
A12030	Other equity-related securities - HFT	FR-A070	Equity instruments	IR-A010	Trading assets
A13010	Money market instruments - HFT	FR-A080	Debt securities	IR-A010	Trading assets
A13020	Bonds and notes - HFT	FR-A080	Debt securities	IR-A010	Trading assets
A13030	Other interest-rate-related securities - HFT	FR-A080	Debt securities	IR-A010	Trading assets
A14010	Loans and advances - HFT	FR-A090	Loans and advances	IR-A010	Trading assets

Assets and Liabilities are classified by portfolio category then by instrument. The income and expenses are classified by nature with a distinction between continuing and non-continuing operations.

The use of dimensions such as Product, FINREP Analysis, Country, Fair Value Hierarchy, and ISIN has made it possible to limit the number of accounts to 125 accounts for Assets, 158 accounts for Equity / Liabilities and 137 accounts for P&L.

The chart of accounts is easy to customize according to the group's requirements.

## 1.2. Naming Convention for Accounts

For financial accounts, the first letter of the code enables you to identify the accounting class: A for asset, E for equity, L for liabilities and P for profit and loss (net income). The first letters for subtotal accounts are TA (Assets subtotals), TE (Equity subtotals), TL (Liabilities subtotals), and TP (P&L subtotals).

For financial assets and liabilities accounts, the second position indicates the portfolio category and the third position indicates the instrument. For equity accounts, there are specific code ranges for Other Comprehensive Income in Equity attributable to owners of the parent entity and in Non-Controlling Interests.

The naming convention for balance sheet accounts is then as follows:

## **BALANCE SHEET ACCOUNTS**

Code	Description	Code	Description			
		EQUITY				
		E1xxxx	Capital and group equity accounts except OCI			
		E2xxxx	Other Comprehensive Income (OCI) accounts			
		E8xxxx	Non-Controlling Interest (NCI) - all accounts except OCI

P85xxx	G/L and share of the profit or (-) loss of investment i, subsidiaires, JV and associates
P86xxx	Profit or (-) loss from NC assets and disposal groups classified as held for sale not qualifying as discontinued op.
P89xxx	Tax expenses or (-) income related to P&L from continuing operations
P9xxxx	Profit or loss attributable to discontinued operations

## 2. Data Entry Package Configuration

The starter kit provides a set of data entry package, named P-A, which groups together schedules that are used for entering and retrieving data at the reporting unit level. The naming convention for schedules is the following:

- PAxxxx: schedules dedicated to entities required to fill in the IFRS reporting only
- PFxxxx: schedules dedicated to entities that are required to fill in FINREP analyses in addition to the IFRS reporting

This naming convention makes it possible to create if necessary a set of data entry package for entities that are not required to fill in FINREP analyses.

Three types of schedules exist:

- Summary schedules, used to guide the data entry and control data
- Data entry schedules that are grouped into books by type of information: balances, securities
  and shareholdings, movement analysis for balance sheet items, intercompany transactions,
  FINREP analyses

• Data retrieval schedules: IFRS Financial statements, FINREP tables, flow balances, control statements

The following summary gives an overview of the data entry package:

S000 - December 2030		
CONTENTS		
DATA ENTRY	Controls to be validated	DATA RETRIEVAL
1. Balance Sheet/P&L Assets		
Equity and liabilities	P-A10	Financial statements
Profit and loss		
2. Securities and shareholdings	P-A20	
3. Flow analysis	P-A30	Statement of Cash Flows
		Flow balances
4. Intercompany breakdown	P-A4	Intercompany declarations
5. FINREP data collection	P-Fx	FINREP financial statements

## 3. Data Entry Principles

## 3.1. Sign of Indicators

Assets are entered as positive amounts except for amortization and depreciation of assets. These are entered as negative amounts.

Liabilities and Equity are entered as positive amounts.

Expenses are entered as negative amounts and income figures as positive amounts.

## 3.2. Order of Package Data Entry

A step-by-step approach for entering data is configured in the package thanks to its architecture and the links that have been created between the schedules.

The steps are as follows:

- 1. Enter (manually or importing) the closing balance (balance sheet and income statement)
- 2. Enter the analysis of securities and shareholding
- 3. Enter the period movements of the balance sheet items (acquisition, disposal, etc.)
- 4. Enter intercompany breakdown (reciprocal operations, Internal gains and losses on disposal of assets, dividends, internal provisions)

#### 5. Enter FINREP breakdown

#### 3.3. Breakdown by Flow

Flow entries allow you to identify variations in the balance sheet between the opening and closing balance and therefore automatically generate the Statement of Cash Flows.

The flows available in the package may be classified into two categories:

- Flows for current transactions (purchase, increase in depreciation, fair value, etc.)
- Flows for special transactions (changes in accounting policies, internal merger, etc.)

#### 3.4. Use of specific flows to collect additional analyses for FINREP purposes

Flow F99 that is used to store carrying amount at closing in the IFRS data entry schedules, is retrieved in FINREP schedules and used with additional flows Txxx to collect FINREP analyses such as breakdown by counterparty sector and country of the counterparty. This configuration ensures the consistency between data entered in IFRS reporting and in FINREP reporting.

You can restrict the access to these flows for non-FINREP entities, thanks to a Financial Consolidation feature if you setup a dedicated set of data entry schedules for them.

## 4. Data Package Validation

## 4.1. Types of Control

There are two types of control:

Blocking controls: if these are not valid, the status of the data package cannot be validated. All
these controls must be valid.

• **Non-blocking controls:** these controls are simply warnings and do not prevent the data package from being validated. For instance, it is possible to enter the number of stocks of investment in subsidiaries and capital in order to generate automatically the portfolio and the scope. This data entry is optional and linked to non-blocking controls.

#### 4.2. Sets of Controls

Controls are grouped in the data entry package into one set of controls (P-A).

## 4.3. Subsets of Controls

In the data entry package, the controls are grouped together into subsets, where each subset of controls corresponds to a book of schedules.

## 4.4. Main Types of Controls

Aim	Example
	Assets equal Equity and Liabilities
Check balances	Gross value of assets is greater or equal to depreciation and
	impairment
	Exhaustive breakdown of investment in subsidiaries by share
Securities and Shareholdings	Complete analysis of net equity by flows
Securities and Shareholdings	Data entry of number of shares in capital and in investment
	in subsidiaries
Flow analysis	Complete analysis of assets and liabilities by flows
Flow analysis	The transfer flow must balance
	Exhaustive breakdown of reciprocal accounts, dividends,
Intercompany breakdown	gains and losses on disposal of assets and provisions by
	partner
FINREP Analyses	Exhaustive breakdown of selected accounts / flows by
FINITE Analyses	counterparty, product,

## B. CONSOLIDATION PROCESS

Overview of the consolidation process in SAP Financial Consolidation

## 1. Consolidation Definition

The settings of a consolidation definition are:

- A category and a data entry period: selection of the data to be consolidated (for example: Actual, 2016.12)
- A scope
- A variant
- A consolidation currency

The 'variant' parameter is a technical dimension that allows different consolidation settings to be selected for a given category, a given data period and a given currency:

- Set of rules (monthly conversion / quarterly conversion / year to date conversion)
- Scope (pro-forma statements)
- Exchange rates table (pro-forma statements)

Two variants are pre-defined in the starter kit for financial and regulatory reporting for banking: IFRSYTD and FINREPYTD. If needed, these variants can be renamed and new variants can be created.

## 2. Consolidation Processing

Two processing modes exist: full processing and incremental processing.

During the course of full processing, the software executes the following steps:

- · Read the scope
- Load data: data of the period (package data and manual journal entries) and the opening balance, if any
- Convert package data and manual journal entries
- Run the rules of the selected set of rules (see below).

For incremental processing, the software executes the same steps as described above but only for the manual journal entries recorded since the last consolidation.

The conversion of data entered in foreign currency is carried out as follows (using the closing rate method):

- The closing balance of the balance sheet is converted using closing exchange rates, except for equity and consolidated investments kept at their historical value (calculation and booking of the currency translation adjustment)
- The net income of the period is converted using average exchange rates
- Balance sheet movements of the period are converted using the average exchange rates of the period.

Depending on the set of rules selected in the consolidation definition and the type of conversion rate filled in in the conversion rate table, periodic or year to date conversion will apply.

The configuration handles the following methods of consolidation: full consolidation, proportionate consolidation and the equity method.

The scope changes handled by the starter kit for financial and regulatory reporting for banking set of rules are:

- Acquisitions
- Loss of control
- Equity transactions

- Changes in interest rates of associates and joint-ventures
- Internal mergers

Flows generated during the consolidation process allow you to retrieve changes due to currency translation differences and changes in scope consolidation.

These flows make it possible to automatically produce the following financial statements:

- Statement of Comprehensive Income
- Statement of Cash Flows
- · Statement of Changes in Equity

## 3. Configured Automatic Entries

The starter kit for financial and regulatory reporting for banking includes a set of rules that enable you to produce consolidated data using data from the data entry packages.

This set of rules can be enhanced in order to meet the group's specific accounting policies.

The automatic consolidation entries are:

- Elimination of internal reciprocal operations
- Elimination of internal provisions
- Elimination of internal dividends
- Elimination of internal gains and losses on disposal of assets
- Goodwill booking
- Elimination of investment in subsidiaries
- Calculation of currency translation adjustments
- Calculation of non-controlling interests

In addition to standard consolidation rules, several technical rules have been configured in order to:

- Calculate and store the subtotal accounts
- Calculate and store line items for the Statement of Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity

## C. ANALYSIS PROCESS

#### 1. Publishable Financial Statements

#### 1.1. IFRS Financial Statements

The starter kit for financial and regulatory reporting for banking contains a complete set of financial statements which follow the requirements of IAS1.

- A Statement of Financial Position in the current/non-current format
- A Statement of Profit or Loss with an expense classification by nature
- A Statement of Other Comprehensive Income
- · A Statement of Cash Flows
- A Statement of Changes in Equity

It provides you also with a sample of IFRS disclosures required for the transition to IFRS 9:

- Reconciliation between financial assets IAS39 vs IFRS9 at DIA
- Reconciliation between financial liabilities IAS39 vs IFRS9 at DIA

## 1.2. FINREP templates

The starter kit for financial and regulatory reporting for banking contains a complete set of core and non-core information FINREP templates which follow the EBA requirements issued in November 2016 (see Appendix 4 List of retrievals schedules).

## 2. Monitoring and Controlling the Consolidation Process

#### 2.1. Accounting reports

The accounting reports (balances, general ledgers, debit-credit ledgers) allow for the analysis of consolidated data by drilling down to the original data.

## 2.2. Consolidation Analysis

The pre-configuration contains reports that enable you to validate each step of the consolidation process:

- · Check packages
- Check main balances
- Check conversion
- Intercompany reconciliations
- Transition from local to consolidated figures
- · Net Equity, dividends and goodwill

#### **EXAMPLE: Consolidation control dashboard**

## 3. Analysis and Audit Trail

The starter kit for financial and regulatory reporting for banking contains reports that allow the analysis of consolidated data.

Each data item is linked to an audit ID and a journal entry number which makes the audit trail possible.

The audit ID allows the accounting origin to be tracked. For instance:

- The 0PACK01 Package data audit ID tracks data that has been entered in the packages
- The 3PRO10 audit ID is linked to the elimination of internal impairment on investments

With analysis schedules, each line of the Statement of Financial Position and of the Statement of Profit or Loss can be detailed by account, reporting unit or audit ID.

## D. RECONCILIATION IFRS VERSUS FINREP CONSOLIDATIONS

To fasten the reconciliation between FINREP and IFRS data, a three-step approach is proposed, using specific reports

First step: Automatic identification of the differences between the FINREP and the IFRS group structures, sorted by categories of differences

- Case 1: Entities not consolidated in IFRS scope
- Case 2: Entities not consolidated in FINREP scope
- Case 3: Entities consolidated using the proportionate method for FINREP and the equity method for IFRS
- Case 4: Entities equivalent in both scopes
- Case 5: Other differences

TOTAL6 TOTAL FINREP6	Equity (EM)	Equity (EM)	30,00%	30,00%		
Case 5: Methods & rates different for FINREP & IFRS

Second step: Automatic accounting reconciliation between FINREP and IFRS data sorted by categories of differences

	FINREP - YTD	Case 1: FINREP only	Case 2: IFRS only	Case 3: Proportionate method FINREP / Equity method IFRS	Case 4: Methods & rates equivalent for FINREP & IFRS	Case 5: Methods & rates different for FINREP & IFRS	IFRS - YTD	Control
A01000 Cash on hand	23 254	-14 754	4 500		0		13 000	0
A02000 Cash balances at central banks	- N	-				-		0
A03000 Other demand deposits								0
A11000 Derivatives - HFT	3 000				5 000	Ţ	8 000	0
A12010 Shares - HFT	u u	2				я_		0

You can drill down to further analysis for one account per entity or all accounts for all entities as shown in screenshots below.

**EXAMPLE**: Analysis of differences for all accounts by entity for one case:

					Case 4: Methods & rates equivalent for FINREP & IFRS	
	TOTAL1	TOTAL3	TOTAL4	TOTAL6	Total FINREPYTD - IFRSYTD	Control
A01000 Cash on hand	ע	0	0	0	0	0

A54571 Loans and advances to customers impairment - AC - individually assessed financial assets - Stage 1	ע	د 500 د	ע	ы <u></u>	500	0

Third step: Automatic validation and justification of most of the differences between the two sets of consolidated data.

- For reporting units belonging to case 1: Automatic checking ensuring that there is no data in the IFRS set of data for these reporting units triggering a status "OK" or "Error".
- For reporting units belonging to case 2: Automatic checking ensuring that there is no data in the FINREP set of data for these reporting units triggering a status "OK" or "Error".
- For reporting units belonging to case 3: Manual checking to validate de different amounts for reporting units consolidated using the proportionate method for FINREP and the equity method for IFRS.
- For reporting units belonging to case 4: Automatic checking ensuring that the differences between the two sets of consolidated data are coming from intercompany eliminations with partners or shares belonging to cases 1, 2 and 3, triggering a status "OK" or "Error".

**EXAMPLE:** Dashboard in Financial Consolidation

## E. TRANSITION TO IFRS 9

Groups are required to reconcile the financial assets and liabilities at previous year's closing, classified and measured according to IAS39 principles, with those at Date of Initial Application classified and measured in compliance with IFRS 9.

## 1.2. Data entry package

A folder P-A-TRANS Package for transition, which contains an additional book PA55 – Transition to IFRS9, makes it possible to enter the analysis by reclassification type for financial assets / liabilities accounts and the impact on the OCI and retained earnings.

#### 1.3. Configuration enhancements specific to the transition

#### 1.3.1. Dimension builder

Two flows are used to store the reclassifications and the remeasurements at DIA:

F08A: ReclassificationF08B: Remeasurement

The ANALYSIS dimension is used to enter and retrieve the type of reclassification and remeasurement. The following members have been added.

Code	Description
0-IMPAIR-AC	Remeasurement of impairement on assets at AC at DIA
0-IMPAIR-OCI	Remeasurement of impairement on assets at FVTOCI at DIA
0-ST-RECLOCI	Gross value reclassification between stages 1 to 3 in assets at FVTOCI
1-AFS-FVPL	From AFS (IAS 39) to FVTPL
2-AC-FVPL-R	From amortised cost (IAS 39) – required reclassification
3-AC-FVPL-O	From amortised cost (IAS 39) – FVO elected at DIA
4-FVPL-AC-R	From FVPL to AC - required reclassification
5-FVPL-AC-O	From FVTPL to AC – FV option revoked at DIA
6-FVPL-OCI-O	From FVTPL(FVO under IAS39) to FVTOCI elected at DIA
7-AC-FVOCI-R	From amortised cost (IAS 39) to FVTOCI – required reclassification
8-AFS-AC	From AFS (IAS39) to amortised cost
9-AC-FVOCI-O	From amortised cost (IAS 39) to FVTOCI – option elected at DIA
0-ST-RECL-AC	Gross value reclassification between stages 1 to 3 in assets at AC
L1-AC-FVPL-O	From amortised cost (IAS 39) – FVO elected at DIA
L3-FVPL-AC-R	From FVPL (IAS39) to AC - required reclassification
L4-FVPL-AC-O	From FVTPL (IAS39) to AC – FV option revoked at DIA
L2-AC-FVPL-R	From amortised cost (IAS 39) – required reclassification

A Financial Consolidation feature, the data entry restriction, makes it possible to remove these flows along with the flows specific to consolidation (e.g. F01 Incoming) from those available in the data entry package.

It also excludes the ANALYSIS members used for the type of reclassification / remeasurement except when entering data for the transition period.

## 1.3.2. Category scenario

The flows F08A and F08B are included in the accounts families. The analyses by type of reclassification have been included in the dimensional analyses for accounting flows.

#### 1.3.3. Report designer

A book C14 - Disclosures on transition to IFRS 9 is included in folder C1 – Annual report. It contains the two reports shown above.

A folder P-A-TRANS - Package for transition IAS39 to IFRS9 including a book PA55 – Transition to IFRS9 with seven data entry schedules is configured.
