

April 11, 2017

SDI Presence LLC
~~David Sullivan, CEO~~ David Gupta, CEO
7445 Cross County Road, Suite 10
North Charleston, SC 29418Dear Mr. ~~Sullivan~~ Gupta:Subject: Virginia Tech Contract # UCP-TS-C05-11
Commodity/Service: Video Surveillance System & Associated Components

This is to inform you that the subject contract expires on April 17, 2017. Since the university would like to renew the contract for an additional one-year period, please advise concerning your intention by signing in the appropriate space listed below. A signed copy of this letter should be received in Information Technology Acquisitions no later than April 13, 2017 at 1:00pm.

In addition, review the attached form which shows your company information as listed in the university's vendor database. If any of this information has changed, make corrections directly on the form, and return with this letter. It is essential this information be accurate for payments to be processed in a timely manner.

Also, please see the attached additions we wish to add to the contract.

Virginia Tech recommends that our vendors utilize the WellsOne AP Control Payment System for payment of all invoices and strongly encourages all vendors under contract with the university to participate in this program. If your firm is not enrolled in the program, refer to the Procurement Department's website at: <http://www.procurement.vt.edu/VendorWellsOne.html> or contact me directly for more information.

Sincerely,

*Jerri*Jerri Kemp, CPPB, CUPO
Assistant Director, IT Acquisitions

STANDARD CONTRACT AMENDMENT

Contract Number: UCP-TS-C05-11
Amendment #5

The above referenced contract is amended as of August 9, 2016, by SDI Presence LLC, hereinafter called the "Contractor," and Virginia Polytechnic Institute and State University, hereinafter called "Virginia Tech."

WHEREAS, Virginia Tech and SDI Solutions LLC, successor in interest to Orion Systems Group, entered into the referenced Contract Number UCP-TS-C05-11 for Video Surveillance System and Associated Components on April 18, 2011 (the "Contract"); and

WHEREAS, SDI Solutions LLC, filed a voluntary Chapter 11 bankruptcy petition on March 13, 2016; and

WHEREAS, as part of the bankruptcy proceedings, PGV Solutions Midwest LLC acquired substantially all the assets of SDI Solutions LLC, including the Contract, and thereafter changed the company name to SDI Presence LLC.

NOW, THEREFORE, the parties wish to amend the Contract to reference the assignment of the Contract to SDI Presence LLC as follows:

All references to "Contractor" shall refer to "SDI Presence LLC." SDI Presence LLC hereby assumes all duties, responsibilities and outstanding obligations imposed on the Contractor under the Contract, and shall be entitled to all rights and benefits accruing to the Contractor under said Contract, and agrees to be bound by the terms, conditions and duties of said Contract for the full remaining term thereof.

All other terms and conditions of the Contract remain in full force and effect.

The parties agree to execute this Contract Amendment by electronic means, via facsimile/
scanned signatures.

Request for Taxpayer Identification Number and Certification

Give Form to the
 requester. Do not
 send to the IRS.

Print or type See Specific Instructions on page 2.	1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank. SDI Presence LLC	
	2 Business name/disregarded entity name, if different from above _____	
	3 Check appropriate box for federal tax classification; check only one of the following seven boxes: <input type="checkbox"/> Individual/sole proprietor or single-member LLC <input checked="" type="checkbox"/> Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=partnership) ▶ P Note. For a single-member LLC that is disregarded, do not check LLC; check the appropriate box in the line above for the tax classification of the single-member owner. <input type="checkbox"/> Other (see instructions) ▶ _____ <input type="checkbox"/> C Corporation <input type="checkbox"/> S Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Trust/estate	4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3): Exempt payee code (if any) _____ Exemption from FATCA reporting code (if any) _____ <i>(Applies to accounts maintained outside the U.S.)</i>
	5 Address (number, street, and apt. or suite no.) 33 W Monroe, Ste 400	Requester's name and address (optional) _____ _____
	6 City, state, and ZIP code Chicago IL 60603	
	7 List account number(s) here (optional) _____	

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

Note. If the account is in more than one name, see the instructions for line 1 and the chart on page 4 for guidelines on whose number to enter.

	Social security number _____ - _____ - _____ or Employer identification number _____
--	--

Part II Certification

Under penalties of perjury, I certify that:

- The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
- I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
- I am a U.S. citizen or other U.S. person (defined below); and
- The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions on page 3.

Sign Here Signature of U.S. person ▶  Date ▶ **6.16.16**

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. Information about developments affecting Form W-9 (such as legislation enacted after we release it) is at www.irs.gov/fw9.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following:

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)

- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding? on page 2.

By signing the filled-out form, you:

- Certify that the TIN you are giving is correct (or you are waiting for a number to be issued).
- Certify that you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income, and
- Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting, is correct. See *What is FATCA reporting?* on page 2 for further information.

Dear Mr. Sullivan:

Subject: Virginia Tech Contract # UCP-TS-C05-11
 Commodity/Service: Video Surveillance System & Associated Components

This is to inform you that the subject contract expires on April 17, 2016. Since the university would like to renew the contract for an additional one-year period, please advise concerning your intention by signing in the appropriate space listed below. A signed copy of this letter should be received in Information Technology Acquisitions no later than April 11, 2016.

In addition, review the attached form which shows your company information as listed in the university's vendor database. If any of this information has changed, make corrections directly on the form, and return with this letter. It is essential this information be accurate for payments to be processed in a timely manner.

Virginia Tech recommends that our vendors utilize the WellsOne AP Control Payment System for payment of all invoices and strongly encourages all vendors under contract with the university to participate in this program. If your firm is not enrolled in the program, refer to the Procurement Department's website at: <http://www.procurement.vt.edu/Vendor/WellsOne.html> or contact me directly for more information.

Sincerely,

Jerri

**COMMONWEALTH OF VIRGINIA
 STANDARD CONTRACT AMENDMENT**

Contract Number: UCP-TS-C05-11
 Amendment #3

The above referenced contract is amended this 15th day of May 2015 by SDI Solutions LLC, hereinafter called the "Contractor" and the Commonwealth of Virginia, Virginia Polytechnic Institute and State University, hereinafter called "Virginia Tech".

The following change is made to the above referenced contract:

The attached list of newly available products and services shall be incorporated into this contract at the VASCUPP prices so stated.

All other terms and conditions remain in full force and effect.

The parties agree to execute this Contract Amendment by electronic means, via facsimile/scanned signatures.

By: _____
 SDI Solutions LLC Authorized Signature

By: _____
 Virginia Tech Authorized Signature

IN WITNESS WHEREOF, the parties have caused this Contract Amendment to be duly executed intending to be bound thereby.

To: Halferty, Ursula
Cc: Helmick, Mary
Subject: FW: Need signature / VT Contract Mod
Attachments: VA Amend No. 3 SDI Signed.pdf

Morning, Ursula. Forwarding a contract mod for Mary's signature. The original contract was signed by Tom in 2011, happy to send over a copy of that cover page, if you like.

Thanks,

Barb

**COMMONWEALTH OF VIRGINIA
 STANDARD CONTRACT AMENDMENT**

Contract Number: UCP-TS-C05-11
 Amendment #2

The above referenced contract is amended this 18th day of December 2014 by Orion Systems Group, LLC, hereinafter called the "Contractor" and the Commonwealth of Virginia, Virginia Polytechnic Institute and State University, hereinafter called "Virginia Tech".

The following changes shall be in effect immediately:

1. Orion Systems Group, LLC shall now be known as SDI Solutions LLC.
2. The parties hereby agree to extend this contract #UCP-TS-C05-11 until April 17, 2016; three optional one-year renewal periods remain.
3. GSA Contract #GS-35F-0248U with Genetec, price list modification #PA-0080 effective October 1, 2014 shall be available to Virginia Tech;
4. GSA Contract #GS-35F-0141W with Digital Video Group, Inc. shall be available to Virginia Tech;
5. GSA Contract #GS-07-7820C with Bosch Security Systems, Inc., price list modification MOD PO132 effective July 30, 2014, shall be available to Virginia Tech.

All other terms and conditions remain in full force and effect.

The parties agree to execute this Contract Amendment by electronic means, via facsimile/scanned signatures.

By:  SDI Solutions LLC Authorized Signature	By: _____ Virginia Tech Authorized Signature

SPECIAL ITEM NUMBER 132-34 - MAINTENANCE OF SOFTWARE AS A SERVICE

Software maintenance as a service creates, designs, implements, and/or integrates customized changes to software that solve one or more problems and is not included with the price of the software. Software maintenance as a service includes person-to-person communications regardless of the medium used to communicate: telephone support, on-line technical support, customized support, and/or technical expertise which are charged commercially.

Software maintenance as a service is billed arrears in accordance with 31 U.S.C. 3324.

Genetec, Inc.
2280 Alfred-Nobel Blvd., Suite 400,
St-Laurent (Quebec) H4S 2A4 Canada
514-332-4000

Contract Number: **GS-35F-0284U**

Contract Effective: **March 3rd, 2008 through March 2nd, 2018**

Pricelist current through Modification #PA-0080, October 1st, 2014.

Products and ordering information in this Authorized Information Technology Schedule Pricelist are also available on the GSA Advantage! System (<http://www.gsaadvantage.gov>).

**COMMONWEALTH OF VIRGINIA
STANDARD CONTRACT AMENDMENT****Contract Number: UCP-TS-C05-11**
Amendment # 1

The above referenced contract is amended this 6th day of May 2014 by Orion Systems Group, hereinafter called the "Contractor" and the Commonwealth of Virginia, Virginia Polytechnic Institute and State University, hereinafter called "Virginia Tech".

The parties hereby agree to extend the Contract Number UCP-TS-C05-11 until April 17, 2015.

All other terms and conditions remain in full force and effect.

The parties agree to execute this Contract Amendment by electronic means, via facsimile/scanned signatures.

COMMONWEALTH OF VIRGINIA
STANDARD CONTRACT

Contract Number: UCP-TS-C05-11

This Contract entered into this 18th day of April, 2011, by Orion Systems Group, hereinafter called the "Contractor" and Commonwealth of Virginia, Virginia Polytechnic Institute and State University called "Virginia Tech".

WITNESSETH that the Contractor and Virginia Tech, in consideration of the mutual covenants, promises and agreements herein contained, agrees as follows:

SCOPE OF CONTRACT: The Contractor shall provide the goods and services to Virginia Tech as set forth in the Contract Documents.

PERIOD OF CONTRACT: From April 18, 2011 through April 17, 2014, plus five (5) optional one-year renewals

COMPENSATION AND METHOD OF PAYMENT: The Contractor shall be paid by Virginia Tech in accordance with the Contract Documents.

CONTRACT DOCUMENTS: The Contract Documents shall consist of this signed contract; Attachment A - Request For Proposal Number 0016531 dated February 28, 2011, together with all written modifications thereof; Attachment B Contractor's response dated March 29, 2011; Attachment C Results of Negotiations; and Attachment D - Detail Pricing, all of which Contract Documents are incorporated herein.

In WITNESS WHEREOF, the parties have caused this Contract to be duly executed intending to be bound thereby.

The parties agree to execute this Contract by electronic means, via facsimile/scanned signatures.

Request for Proposal #0016531

for

Video Surveillance System and Associated Components

February 28, 2011

RFP 0016531
GENERAL INFORMATION FORM

1. **QUESTIONS:** All inquiries for information regarding this solicitation should be directed to: John Krallman, Phone: (540) 231-6233, e-mail: john.krallman@vt.edu.
2. **DUE DATE:** Sealed Proposals will be received until **March 31, 2011 at 3:00 PM**. Failure to submit proposals to the correct location by the designated date and hour will result in disqualification.
3. **ADDRESS:** Proposals should be mailed or hand delivered to: Virginia Polytechnic Institute and State University (Virginia Tech), Information Technology Acquisitions, 1700 Pratt Drive (0214), Blacksburg, Virginia 24061. Reference the Opening Date and Hour, and RFP Number in the lower left corner of the return envelope or package.
4. **PRE-PROPOSAL CONFERENCE:** See Section IX for information regarding a pre-proposal conference.
5. **TYPE OF BUSINESS:** (Please check all applicable classifications). If your classification is certified by the Virginia Department of Minority Business Enterprise, provide your certification number: _____. For certification assistance, please visit: <http://www.dmb.e.state.va.us/swamcert.html>.

_____ **Large**

_____ **Small business** – An independently owned and operated business which, together with affiliates, has 250 or fewer employees or average annual gross receipts of \$10 million or less averaged over the previous three years. Department of Minority Business Enterprise (DMBE) certified women-owned and minority-owned business shall also be considered small business when they have received DMBE small business certification.

_____ **Women-owned business** – A business concern that is at least 51% owned by one or more women who are U. S. citizens or legal resident aliens, or in the case of a corporation, partnership, or limited liability company or other entity, at least 51% of the equity ownership interest is owned by one or more women who are citizens of the United States or non-citizens who are in full compliance with the United States immigration law, and both the management and daily business operations are controlled by one or more women who are U. S. citizens or legal resident aliens.

_____ **Minority-owned business** – A business concern that is at least 51% owned by one or more minority individuals (see Section 2.2-1401, Code of Virginia) or in the case of a corporation, partnership, or limited liability company or other entity, at least 51% of the equity ownership interest in the corporation, partnership, or limited liability company or other entity is owned by one or more minority individuals and both the management and daily business operations are controlled by one or more minority individuals.

6. **COMPANY INFORMATION/SIGNATURE:** In compliance with this Request For Proposal and to all the conditions imposed therein and hereby incorporated by reference, the undersigned offers and agrees to furnish the services in accordance with the attached signed proposal and as mutually agreed upon by subsequent negotiation.

I. PURPOSE:

The purpose of this Request for Proposal (RFP) is to solicit sealed proposals to establish a contract or contracts through competitive negotiations for an enterprise-wide Internet Protocol-based Video Surveillance System and associated Components to assist in implementing University Policy 5617 related to Safety and Security Camera Acceptable Use Policy (See Attachment D) by Virginia Polytechnic Institute and State University (Virginia Tech), an agency of the Commonwealth of Virginia.

II. CONTRACT PERIOD:

The term of this contract or contracts is for three year(s), or as negotiated. There will be an option for five, one year renewals, or as negotiated.

III. BACKGROUND:

A. University Overview

Founded in 1872 as a land-grant college, Virginia Tech (www.vt.edu) is the most comprehensive university in the Commonwealth of Virginia and is among the top research universities in the nation. Virginia Tech's nine colleges are dedicated to quality, innovation, and results through teaching, research, and outreach activities. At its 2,600 acre main campus located in Blacksburg and other campus centers in Northern Virginia, Southwest Virginia, Hampton Roads, Richmond, Southside, and Roanoke, Virginia Tech enrolls more than 28,000 undergraduate and graduate students from all 50 states and more than 100 countries in 180 academic degree programs.

B. Critical Timeliness of Contract(s) Completion

Several projects, critical to university interests are dependent on the completion of contract(s) resulting from this RFP. It is Virginia Tech's intention to award contract(s) resulting from this RFP by April 18, 2011. As a result of this expedited review process, we would ask any offerors to this RFP to be prepared to answer clarification and follow-up questions and be available to provide demonstrations of parts or all of their solutions within 24 hours of request after the closing date of this RFP, in person or on-line.

C. Network Infrastructure

Virginia Tech has an Ethernet-based, Internet Protocol (IP) network system that supports the main campus in Blacksburg. The backbone of the network provides a foundation for Ethernet (802.3) and Wireless (802.11) access through core and, as applicable, distribution switching components capable of supporting a multitude of applications and corresponding service levels. IP Version 4 (IPv4) and IP Version 6 (IPv6) are fully supported in each of the core and distribution components that make up the system foundation. The backbone will support link speeds ranging from 1 Gbps to Nx10 Gbps, with future capabilities for 40 Gbps and 100 Gbps links.

Core and distribution switching components and interconnecting links will be at least 1+1 redundant throughout the backbone and supported by uninterruptible power.

Ethernet access is provided using several generations of Cisco-brand, Ethernet switches, ranging from the Cisco Catalyst 3500 XL to the Cisco Catalyst 3750. Ethernet access switches will utilize 1+1 redundant links to the backbone. Power over Ethernet (PoE) is provided, where needed, using Cisco Catalyst 3750 switches.

Several off-campus locations in the Town of Blacksburg (i.e., leased properties) are integrated into the campus network using either Virginia Tech-provided Single-Pair High-Speed Digital Subscriber Lines (SHDSL) or leased Digital Signal 1 (DS1) facilities.

Internet access is provided to the campus using a pair of Cisco 7600 series routers located adjacent to the primary data center. These routers interconnect the campus with commodity Internet and research networks (e.g., Internet2, National LambdaRail) via leased services and/or leased fiber at speeds ranging from 1 Gbps to 10 Gbps.

IP routing throughout the campus utilizes the Open Shortest Path First (OSPF) protocol. IPv4 and IPv6 are fully supported for production applications on the campus network. At the campus border, Border Gateway Protocol (BGP) is used to provide wide-area IP routing.

D. Current Safety and Security Camera Environment

Virginia Tech currently has approximately 250 cameras in operation managed by 21 separate departments. Most are digital although several are analog or still frame capture. Most capture and store video and maintain storage for varying periods. We have a mix of continuous feed and motion capture cameras with most being stationary, but some remotely controllable. New uses will include monitoring of outdoor areas where people congregate and parking areas. Approximately ten additional locations have been identified for priority camera expansion. Total cameras eventually under management could approach 2500 units.

IV. EVA BUSINESS-TO-GOVERNMENT ELECTRONIC PROCUREMENT SYSTEM:

The eVA Internet electronic procurement solution streamlines and automates government purchasing activities within the Commonwealth of Virginia. Virginia Tech, and other state agencies and institutions, have been directed by the Governor to maximize the use of this system in the procurement of goods and services. *We are, therefore, requesting that your firm register as a trading partner within the eVA system.*

There are registration fees and transaction fees involved with the use of eVA. These fees must be considered in the provision of quotes, bids and price proposals offered to Virginia Tech. Failure to register within the eVA system may result in the quote, bid or proposal from your firm being rejected and the award made to another vendor who is registered in the eVA system.

Registration in the eVA system is accomplished on-line. Your firm must provide the necessary information. Please visit the eVA website portal at <http://www.eva.virginia.gov/register/vendorreg.htm> and **register both with eVA and Ariba.** *This process needs to be completed before Virginia Tech can issue your firm a Purchase Order or contract.* If your firm conducts business from multiple geographic locations, please register these locations in your initial registration.

For registration and technical assistance, reference the eVA website at: eVACustomerCare@dgs.virginia.gov, or call 866-289-7367 or 804-371-2525.

V. CONTRACT PARTICIPATION:

It is the intent of this solicitation and resulting contract to allow for cooperative procurement. Accordingly, any public body, public or private health or educational institutions, or Virginia Tech’s affiliated corporations and/or partnerships may access any resulting contract if authorized by the contractor.

Participation in this cooperative procurement is strictly voluntary. If authorized by the Contractor, the resultant contract may be extended to the entities indicated above to purchase at contract prices in accordance with contract terms. The Contractor shall notify Virginia Tech in writing of any such entities accessing the contract. No modification of this contract or execution of a separate contract is required to participate. The Contractor will provide semi-annual usage reports for all entities accessing the Contract. Participating entities shall place their own orders directly with the Contractor and shall fully and independently administer their use of the contract to include contractual disputes, invoicing and payments without direct administration from Virginia Tech. Virginia Tech shall not be held liable for any costs or damages incurred by any other participating entity as a result of any authorization by the Contractor to extend the contract. It is understood and agreed that Virginia Tech is not responsible for the acts or omissions of any entity, and will not be considered in default of the contract no matter the circumstances.

Use of this contract does not preclude any participating entity from using other contracts or competitive processes as the need may be.

VI. STATEMENT OF NEEDS:

A. Network Capabilities

1. The proposed system must communicate with existing Virginia Tech networks as described in Section III B. Network Infrastructure above.
2. Describe the capabilities of the proposed solution to provide power over Ethernet.
3. Describe the capabilities of the system to support IP and IPv6 including:
 - a. DHCP for IP configuration
 - b. Stateless address autoconfiguration (SLAAC) or static configuration for IPv6
 - c. DHCP/Stateless DHCP for IPv6
 - d. The ability to operate on an IPv6-only network
4. Describe the capabilities of the system to provide packet filtering for IP and IPv6.
5. Describe the extent to which your proposal could make use of the university-provided 802.11 wireless infrastructure for network connectivity, including 802.1x authentication.
6. Describe how Virginia Tech system administrators will access any and all system components.
7. Describe how the proposed solution will enable stored or real-time video to be sent to a network database or viewed remotely on a secure personal computer.
8. Describe how the proposed solution will be able to store surveillance records from multiple locations for 30 days, and then erase or write over data older than 30 days utilizing a central storage repository.
9. Describe how the proposed system implements a “litigation” or “investigative” hold on selected video footage for an indefinite period of time.
10. Describe the features and capabilities of the proposed solution that will allow it to interface with existing access control and fire alarms via an open Application Programming Interface (API) and Software Development Kit (SDK).
11. Describe how the proposed solution will prevent data loss or the interruption of data collection should one of the storage nodes fail
12. The proposed system should be capable of daily backup. The backup should consist of two copies, one copy of which Virginia Tech will store offsite. System recovery procedures shall be well documented and kept up-to-date in order to allow Virginia Tech to test, ensure the system is functional, and that applications and data can be restored from backups.
13. Describe how the proposed system will provide redundancy in server and storage components.

B. Security Capabilities

1. Describe the security features and capabilities of the proposed solution.
2. Complete and attach the Virginia Tech Information Technology Security Office’s technology procurement questionnaire (Attachment C).
3. Describe how the proposed system will provide HTTPS for system configuration, SSL client authentication and support user installation of the server certificate chain.
4. Indicate whether the proposed solution is capable of encrypting all control and image transfer with either SSL or SSH and describe how.
5. Describe how control and image transfer will be encrypted.
6. Describe how the proposed system will provide access control, including different access levels and / or accounts for routine image fetching and administrative access.
7. Describe how the system manages and supports multiple users simultaneously accessing the same data, including access to live camera data from multiple disparate locations.
8. Describe how the system will authenticate surveillance records as original.
9. Describe the features and capabilities of the proposed system that will enable remote access via the Virginia Tech Virtual Private Network (VPN) for real time viewing from surveillance cameras or use of surveillance records.
10. Describe what access controls or technologies the system can employ to prevent misuse of data, such as unauthorized disclosure of video records to third parties.

C. Operating Standards

1. The proposed system must be broad enough to address all university locations as described in University Policy and Procedures No. 5617 (Attachment D).
2. Indicate whether the proposed solution will include an API for camera operation and image transfer available to the public and unencumbered by license and provide details.

3. Indicate whether cameras in the proposed solution can be fully configurable via a web browser with standard JavaScript and list the minimum versions required.
4. Indicate whether cameras in the proposed solution can be fully configurable via a web browser with Java.
5. Can configuration data from all components be exported and imported via plain ASCII text or XML? If so, please describe how.
6. The proposed system must provide for “five nines” (99.999%) reliability for uptime of video monitoring, storage and archival review functions, in a manner equivalent to the normal production mode.
7. The proposed system must monitor self-health and report failures of cameras and other edge peripherals to operations staff.

D. Technical Capabilities

1. The proposed system must address the use of security cameras as well as other video monitoring and recording systems. (See Attachment D)
2. To the extent possible, the proposed system should protect existing investments in legacy camera systems.
3. Describe the functional capabilities of the proposed system to simultaneously collect video including the maximum number of simultaneous digital and analog cameras, maximum number of frames per second, highest resolution, etc.
4. Describe the scalability characteristics of the proposed solution.
5. Describe how the proposed system will support access by multiple campus groups and accommodate different levels of users.
6. Describe the management characteristics of the proposed solution including:
 - a. Search functions by camera, time and date or frame number
 - b. Display capabilities of the system during active alarms
 - c. Viewing of synchronized video from multiple cameras on a single monitor
 - d. Operator selection of the camera or cameras to appear on the monitors and display format options.
 - e. Real time review of video from multiple locations, and in some cases, simultaneous access to the same video feed.
 - f. Procedures to export images and archive for legal purposes.
7. Describe how the proposed system will incorporate existing cameras, including both fixed and Pan Tilt Zoom (PTZ) cameras.
8. Describe the system’s capability to copy video footage or single video frames from a stored surveillance recording on to a standard magnetic medium for viewing on a personal computer. Describe the playback controls available to users.
9. Describe the system’s ability to incorporate the use of maps and other GIS data.
10. Describe the system’s ability to capture audio.
11. Describe the system’s ability to operate outdoors under low-light conditions or where lighting conditions will fluctuate.
12. Describe the system’s ability to operate in inclement weather and temperature conditions ranging from 0-105 degrees Fahrenheit.
13. Describe how the proposed solution will support the future use of video analytics.
14. Describe the system’s ability to operate during a power failure.

E. Account Management

1. Through expert consultation, the successful offeror must be able to assist the users of both new and existing camera systems with the design and implementation of the proposed system, so they may be in compliance with University Policy No. 5617 (Attachment D).
2. The successful offeror must be able to provide technical assistance to Information Technology and users regarding placement, type, connectivity and operation of cameras in both indoor and outdoor locations.
3. As the pilot project for the enterprise solution, the successful offeror must design and implement the first installation of the full safety and security system for Virginia Tech Parking Services at the Perry Street Parking Deck immediately upon award.
4. Describe the upgrade path from the completion of the parking deck pilot project to deployment of other university locations.
5. Provide detailed warranty information for all equipment in the proposed solution.
6. Describe the on-site support available to resolve a system failure. Provide a detailed description of maintenance options available for the proposed solution.

7. Provide a detailed description of the end user training included in the proposal to prepare Virginia Tech to use and administer the proposed solution, and to fully realize the utility of the proposed solution

F. Cost

1. Provide complete pricing information for an enterprise-wide safety and security camera system.
2. Provide itemized pricing information that includes all hardware, software, licensing, training and professional services, including annual maintenance and support.

VII. PROPOSAL PREPARATION AND SUBMISSION:

A. General Requirements

1. RFP Response: In order to be considered for selection, Offerors must submit a complete response to this RFP. One (1) **original** and seven (7) **copies** of each proposal must be submitted to:

Virginia Tech
Information Technology Acquisitions (0214)
1700 Pratt Drive
Blacksburg, VA 24061

Reference the Opening Date and Hour, and RFP Number in the lower left hand corner of the return envelope or package.

No other distribution of the proposals shall be made by the Offeror.

2. Proposal Preparation:
 - a. Proposals shall be signed by an authorized representative of the Offeror. All information requested should be submitted. Failure to submit all information requested may result in Virginia Tech requiring prompt submission of missing information and/or giving a lowered evaluation of the proposal. Proposals which are substantially incomplete or lack key information may be rejected by Virginia Tech at its discretion. Mandatory requirements are those required by law or regulation or are such that they cannot be waived and are not subject to negotiation.
 - b. Proposals should be prepared simply and economically providing a straightforward, concise description of capabilities to satisfy the requirements of the RFP. Emphasis should be on completeness and clarity of content.
 - c. Proposals should be organized in the order in which the requirements are presented in the RFP. All pages of the proposal should be numbered. Each paragraph in the proposal should reference the paragraph number of the corresponding section of the RFP. It is also helpful to cite the paragraph number, subletter, and repeat the text of the requirement as it appears in the RFP. If a response covers more than one page, the paragraph number and subletter should be repeated at the top of the next page. The proposal should contain a table of contents which cross references the RFP requirements. Information which the offeror desires to present that does not fall within any of the requirements of the RFP should be inserted at an appropriate place or be attached at the end of the proposal and designated as additional material. Proposals that are not organized in this manner risk elimination from consideration if the evaluators are unable to find where the RFP requirements are specifically addressed.
 - d. Each copy of the proposal should be bound in a single volume where practical. All documentation submitted with the proposal should be bound in that single volume.
 - e. Ownership of all data, material and documentation originated and prepared for Virginia Tech pursuant to the RFP shall belong exclusively to Virginia Tech and be subject to public inspection in accordance with the Virginia Freedom of Information Act. Trade secrets or proprietary information submitted by an Offeror shall not be subject to public disclosure under the Virginia Freedom of Information Act. However, to prevent disclosure the Offeror must invoke the protections of Section 2.2-4342F of the Code of Virginia, in writing, either before or at the time the data or other materials is submitted. The written request must specifically

identify the data or other materials to be protected and state the reasons why protection is necessary. The proprietary or trade secret material submitted must be identified by some distinct method such as highlighting or underlining and must indicate only the specific words, figures, or paragraphs that constitute trade secret or proprietary information. The classification of an entire proposal document, line item prices and/or total proposal prices as proprietary or trade secrets is not acceptable and may result in rejection of the proposal.

3. Oral Presentation: Offerors who submit a proposal in response to this RFP may be required to give an oral presentation of their proposal to Virginia Tech. This will provide an opportunity for the Offeror to clarify or elaborate on the proposal but will in no way change the original proposal. Virginia Tech will schedule the time and location of these presentations. Oral presentations are an option of Virginia Tech and may not be conducted. Therefore, proposals should be complete.

B. Specific Requirements

Proposals should be as thorough and detailed as possible so that Virginia Tech may properly evaluate your capabilities to provide the required goods and services. Offerors are required to submit the following information/items as a complete proposal:

1. The return of the General Information Form and addenda, if any, signed and filled out as required.
2. Responses to the Statement of Needs as noted in Section VI formatted as noted above in Paragraph VII.A.2
3. The return of Attachment C filled out as required.
4. Four (4) recent references, either educational or governmental, for whom you have provided the type of goods and services described herein. Include the date(s) the goods and services were furnished, the client name, address and the name and phone number of the individual Virginia Tech has your permission to contact.
5. Demonstrate economic viability by providing a copy of your most recent annual report, public filing, or equivalent. Other financial statements may be requested as necessary, such as supplementary financial statements and any quarterly financial statements prepared since the period reported in the annual report. Supplementary financial statements should include, at a minimum, a consolidated balance sheet and income statement.
6. Any proposed exceptions to the RFP terms and conditions.
7. Small, Women-owned and Minority-owned Business (SWAM) Utilization:

If your business can not be classified as SWAM, describe your plan for utilizing SWAM subcontractors if awarded a contract. Describe your ability to provide reporting on SWAM subcontracting spend when requested. If your firm or any business that you plan to subcontract with can be classified as SWAM, but has not been certified by the Virginia Department of Minority Business Enterprise (DMBE), it is expected that the certification process will be initiated no later than the time of the award. If your firm is currently certified, you agree to maintain your certification for the life of the contract. For assistance with SWAM certification, visit the DMBE website at www.dmbv.virginia.gov. Any questions relating to SWAM businesses or SWAM subcontracting opportunities can be directed to Mark Cartwright, the University's Assistant Director for Supplier Diversity, at 540-231-3333 or mcartwright@vt.edu.

VIII. SELECTION CRITERIA AND AWARD:

A. Selection Criteria

Proposals will be evaluated by Virginia Tech using the following:

<u>Criteria</u>	<u>Maximum Point Value</u>
1. Network Capabilities	
2. Security Capabilities	
3. Operating Standards	
4. Technical Capabilities	
5. Account Management	
6. Cost	
7. SWAM Utilization	
	<hr/>
	Total 100

B. Award

Selection shall be made of two or more offerors deemed to be fully qualified and best suited among those submitting proposals on the basis of the evaluation factors included in the Request for Proposal, including price, if so stated in the Request for Proposal. Negotiations shall then be conducted with the offerors so selected. Price shall be considered, but need not be the sole determining factor. After negotiations have been conducted with each offeror so selected, Virginia Tech shall select the offeror which, in its opinion, has made the best proposal, and shall award the contract to that offeror. Virginia Tech may cancel this Request for Proposal or reject proposals at any time prior to an award. Should Virginia Tech determine in writing and in its sole discretion that only one offeror has made the best proposal, a contract may be negotiated and awarded to that offeror. The award document will be a contract incorporating by reference all the requirements, terms and conditions of this solicitation and the Contractor's proposal as negotiated. See Attachment B for sample contract form.

IX. OPTIONAL PRE-PROPOSAL CONFERENCE:

An optional pre-proposal conference will be held on **March 10, 2011 at 1:30 P.M.** in Room 115 of Research Building 14. The purpose of this conference is to allow potential Offerors an opportunity to present questions and obtain clarification relative to any facet of this solicitation.

While attendance at this conference will not be a prerequisite to submitting a proposal, offerors who intend to submit a proposal are encouraged to attend. For those attending, a site visit of the Perry Street Parking Deck, which will be the first implementation under the system, will follow the conference (see Account Management, VI.E.3.). An email to John Krallman with your company name and the number of people planning to attend will help with our planning.

Bring a copy of this solicitation with you. Any changes resulting from this conference will be issued in a written addendum to this solicitation.

It is strongly recommended that you obtain a Virginia Tech parking permit for display on your vehicle prior to attending the conference. While a parking permit is not necessary at 1770 Forecast Drive, the site of the conference, a permit is required elsewhere on campus. Parking permits are available from the Virginia Tech Parking Services Department located at 455 Tech Center Drive, phone: (540) 231-3200, e-mail: parking@vt.edu.

The format of the conference is to summarize background and procedural information, ask if there are follow-up questions to any Questions & Answers documents already posted to our department website (http://www.ita.vt.edu/VSSAC_RFP.html), receive any new questions, and close. Note that we do not plan to provide answers to questions immediately. For accuracy we plan to respond in writing in a document entitled Questions & Answers Pre-Proposal Conference that will be posted within a few days as an addendum to the RFP on the RFP website, http://www.ita.vt.edu/VSSAC_RFP.html. Please contact John Krallman if any questions arise. Follow-on questions will be accepted until 5:00 P.M., March 24, 2011. Answers will be posted as Addenda at the RFP website.

X. INVOICES:

Invoices for goods or services provided under any contract resulting from this solicitation shall be submitted to:

Virginia Polytechnic Institute and State University
Accounts Payable
201 Southgate Center
Blacksburg, VA 24061

XI. METHOD OF PAYMENT:

Virginia Tech will authorize payment to the contractor as negotiated in any resulting contract from the aforementioned Request for Proposal.

Payment can be expedited through the use of a ghost card payment system. For more information on this program please refer to Virginia Tech's Purchasing website: <http://www.purch.vt.edu/Department/WellsOne.html>

XII. ADDENDUM:

Any **ADDENDUM** issued for this solicitation may be accessed at http://www.ita.vt.edu/VSSAC_RFP.html. Since a paper copy of the addendum will not be mailed to you, we encourage you to check the web site regularly.

XIII. CONTRACT ADMINISTRATION:

- A. Richard Hach, Associate Director, Network Administration, Network Infrastructure and Services, at Virginia Tech or his/her designee, shall be identified as the Contract Administrator and shall use all powers under the contract to enforce its faithful performance.
- B. The Contract Administrator, or his/her designee, shall determine the amount, quantity, acceptability, fitness of all aspects of the services and shall decide all other questions in connection with the services. The Contract Administrator, or his/her designee, shall not have authority to approve changes in the services which alter the concept or which call for an extension of time for this contract. Any modifications made must be authorized by the Virginia Tech Purchasing Department through a written amendment to the contract.

XIV. TERMS AND CONDITIONS:

This solicitation and any resulting contract/purchase order shall be governed by the attached terms and conditions.

XV. ATTACHMENTS:

- Attachment A – Terms and Conditions
- Attachment B – Standard Contract Form
- Attachment C – Security Questions for Technology Based Procurements
- Attachment D – University Policy 5617 - Safety and Security Camera Acceptable Use Policy

TERMS AND CONDITIONS

RFP General Terms and Conditions

http://www.purch.vt.edu/html.docs/terms/GTC_RFP_100110.pdf

Special Terms and Conditions

1. **AUDIT:** The Contractor hereby agrees to retain all books, records, and other documents relative to this contract for five (5) years after final payment, or until audited by the Commonwealth of Virginia, whichever is sooner. Virginia Tech, its authorized agents, and/or the State auditors shall have full access and the right to examine any of said materials during said period.
2. **AVAILABILITY OF FUNDS:** It is understood and agreed between the parties herein that Virginia Tech shall be bound hereunder only to the extent of the funds available or which may hereafter become available for the purpose of this agreement.
3. **CANCELLATION OF CONTRACT:** Virginia Tech reserves the right to cancel and terminate any resulting contract, in part or in whole, without penalty, upon 60 days written notice to the Contractor. In the event the initial contract period is for more than 12 months, the resulting contract may be terminated by either party, without penalty, after the initial 12 months of the contract period upon 60 days written notice to the other party. Any contract cancellation notice shall not relieve the Contractor of the obligation to deliver and/or perform on all outstanding orders issued prior to the effective date of cancellation.
4. **CONTRACT DOCUMENTS:** The contract entered into by the parties shall consist of the Request for Proposal including all modifications thereof, the proposal submitted by the Contractor, the written results of negotiations, the Commonwealth Standard Contract Form, all of which shall be referred to collectively as the Contract Documents.
5. **INSURANCE:**

By signing and submitting a proposal under this solicitation, the Offeror certifies that if awarded the contract, it will have the following insurance coverage at the time the work commences. Additionally, it will maintain these during the entire term of the contract and that all insurance coverage will be provided by insurance companies authorized to sell insurance in Virginia by the Virginia State Corporation Commission.

During the period of the contract, Virginia Tech reserves the right to require the Contractor to furnish certificates of insurance for the coverage required.

INSURANCE COVERAGES AND LIMITS REQUIRED:

 - A. Worker's Compensation – Statutory requirements and benefits.
 - B. Employers Liability – \$100,000.00
 - C. General Liability – \$500,000.00 combined single limit. Virginia Tech and the Commonwealth of Virginia shall be named as an additional insured with respect to goods/services being procured. This coverage is to include Premises/Operations Liability, Products and Completed Operations Coverage, Independent Contractor's Liability, Owner's and Contractor's Protective Liability and Personal Injury Liability.
 - D. Automobile Liability – \$500,000.00
 - E. Builders Risk – For all renovation and new construction projects under \$100,000 Virginia Tech will provide All Risk – Builders Risk Insurance. For all renovation contracts, and new construction from \$100,000 up to \$500,000 the contractor will be required to provide All Risk – Builders Risk Insurance in the amount of the contract and name Virginia Tech as additional insured. All insurance verifications of insurance will be through a valid insurance certificate.

The contractor agrees to be responsible for, indemnify, defend and hold harmless Virginia Tech, its officers, agents and employees from the payment of all sums of money by reason of any claim against them arising out of any and all occurrences resulting in bodily or mental injury or property damage that may happen to occur in connection with and during the performance of the contract, including but not limited to claims under the Worker's Compensation Act. The contractor agrees that it will, at all times, after the completion of the work, be responsible for, indemnify, defend and hold harmless Virginia Tech, its officers, agents and employees from all liabilities resulting from bodily or mental injury or property damage directly or indirectly arising out of the performance or nonperformance of the contract.
6. **NOTICES:** Any notices to be given by either party to the other pursuant to any contract resulting from this solicitation shall be in writing, hand delivered or mailed to the address of the respective party at the following address:

If to Contractor: Address Shown On RFP Cover Page
Attention: Name Of Person Signing RFP

If to Virginia Tech:

Virginia Polytechnic Institute and State University
Attn: Nancy Sterling
Information Technology Acquisitions (0214)
1700 Pratt Dr.
Blacksburg, VA 24061

7. **PROPOSAL ACCEPTANCE PERIOD:** Any proposal received in response to this solicitation shall be valid for (120) days. At the end of the (120) days the proposal may be withdrawn at the written request of the Offeror. If the proposal is not withdrawn at that time it remains in effect until an award is made or the solicitation is cancelled.
8. **CONTRACTOR RESPONSIBILITIES:** The Contractor shall be responsible for completely supervising and directing the work under this contract and all subcontractors that he may utilize, using his best skill and attention. Subcontractors who perform work under this contract shall be responsible to the Contractor. The Contractor agrees that he is as fully responsible for the acts and omissions of his subcontractors and of persons employed by them as he is for the acts and omissions of his own employees.
9. **PROPOSAL PRICES:** Proposal shall be in the form of a firm unit price for each item during the contract period.
10. **QUANTITIES:** Quantities set forth in this solicitation are estimates only, and the Contractor shall supply at proposal prices actual quantities as ordered, regardless of whether such total quantities are more or less than those shown.
11. **RENEWAL OF CONTRACT:** This contract may be renewed by Virginia Tech upon written agreement of both parties for five successive one year periods, or as negotiated under the terms of the current contract, and at a reasonable time (approximately 90 days) prior to the expiration.
12. **COMMUNICATIONS:** Communications regarding this Request for Proposals (RFP) shall be formal from the date of issue for this RFP, until either a Contractor has been selected or the Information Technology Acquisitions Office rejects all proposals. Formal communications will be directed to the Information Technology Acquisitions Office. Informal communications, including but not limited to request for information, comments or speculations regarding this RFP to any University employee other than an Information Technology Acquisitions Office representative may result in the offending Offeror's proposal being rejected.
13. **RIGHT TO SELECT PROJECT PERSONNEL:** The University has the right to interview and select all of the Contractor's personnel that will provide services under the Agreement.
14. **RIGHT TO REMOVE PROJECT PERSONNEL:** The University has the right to remove any of the selected Contractor's personnel that will provide services under the Agreement.
15. **SUBCONTRACTS:** No portion of the work shall be subcontracted without prior written consent of Virginia Tech. In the event that the Contractor desires to subcontract some part of the work specified herein, the Contractor shall furnish Virginia Tech the names, qualifications and experience of their proposed subcontractors. The Contractor shall, however, remain fully liable and responsible for the work to be done by his subcontractor(s) and shall assure compliance with all requirements of the contract.
16. **ADVERTISING:** In the event a contract is awarded for supplies, equipment, or services resulting from this solicitation, no indication of such sales or services to Virginia Tech will be used in product literature or advertising without the prior written consent of Virginia Tech. The Contractor shall not state in any of the advertising or product literature that the Commonwealth of Virginia or any agency or institution of the Commonwealth has purchased or uses its products or services.
17. **CERTIFICATION TESTING AND ACCEPTANCE:** The system specified in the contract shall be considered ready for production testing upon receipt of documentation from the Contractor that a successful system audit or diagnostic test

was performed at the site demonstrating that the system meets the minimum design/performance capabilities stipulated by the contract. The system shall be deemed ready for production certification testing on the day following receipt of this documentation. Virginia Tech shall provide written confirmation of its acceptance following successful completion of the production certification test. System (software and/or hardware) payment will be authorized after the successful completion and certification test(s).

18. **SEVERAL LIABILITY:** Virginia Tech will be severally liable to the extent of its purchases made against any contract resulting from this solicitation. Applicable entities described herein will be severally liable to the extent of their purchases made against any contract resulting from this solicitation.

19. **WARRANTIES:**

- A. Vendor warrants that all services provided to Customer shall conform to and be performed in accordance with Vendor's proposal and that Vendor's services shall not infringe any third-party intellectual property rights
- B. The Contractor agrees that the goods and services furnished under any award resulting from this solicitation shall be covered by the most favorable commercial warranties the contractor gives any customer for such goods and services and that the rights and remedies provided therein are in addition to and do not limit those available to Virginia Tech by any other clause of this solicitation. A copy of this warranty must be furnished with the proposal.

**Standard Contract form for reference only
Offerors do not need to fill in this form**

COMMONWEALTH OF VIRGINIA
STANDARD CONTRACT

Contract Number: _____

This contract entered into this ____ day of _____ 20__, by _____, hereinafter called the "Contractor" and Commonwealth of Virginia, Virginia Polytechnic Institute and State University called "Virginia Tech".

WITNESSETH that the Contractor and Virginia Tech, in consideration of the mutual covenants, promises and agreements herein contained, agrees as follows:

SCOPE OF CONTRACT: The Contractor shall provide the _____ to Virginia Tech as set forth in the Contract Documents.

PERIOD OF CONTRACT: From _____ through _____.

COMPENSATION AND METHOD OF PAYMENT: The Contractor shall be paid by Virginia Tech in accordance with the contract documents.

CONTRACT DOCUMENT: The contract documents shall consist of this signed contract, Request For Proposal Number _____ dated _____, together with all written modifications thereof and the proposal submitted by the Contractor dated _____ and the Contractor's letter dated _____, all of which contract documents are incorporated herein.

In WITNESS WHEREOF, the parties have caused this Contract to be duly executed intending to be bound thereby.

Contractor:

Virginia Tech

Virginia Tech Security Questions for Technology-Based Procurements

If purchased, Virginia Tech reserves the right to conduct an IT security assessment on the product(s), system(s) and/or service(s) once delivered to validate the answers to the questions below.

If evaluation copies or instances are available for testing, they should be provided to the IT Security Office prior to purchase. Nicolas Pachis (npachis@vt.edu) or Randy Marchany (randy.marchany@vt.edu) may be contacted in the IT Security Office.

In the space following each question, please provide a Yes, No or a "no answer" (N/A), and add any appropriate comments. If the answer is No or N/A, please provide comments indicating how this question/concern is addressed elsewhere or why it is not applicable.

1. Does your product(s), system(s) and or service(s) protect against the SANS Top 20 security vulnerabilities <http://www.sans.org/top20>?
2. Does your product(s), system(s) and or service(s) protect against the OWASP http://www.owasp.org/index.php/OWASP_Top_Ten_Project?
3. What specific encryption algorithms are employed for your product(s), system(s) and/or service(s)?
4. Is all sensitive data (i.e. Social Security Numbers, Credit Card Numbers, Health Information, etc) encrypted in transit and at rest? If not, please explain? (NOTE: Please see the Sensitive Information page at <http://www.security.vt.edu/sensitiveinfo.html> for specifics).
5. Is login information such as user name and password encrypted during transmission from the client to the server? NOTE: Base-64 encoding is not acceptable.
6. Are operating systems (e.g. Windows or Linux), programming and scripting languages (e.g. Java or PHP), web servers (e.g. Apache or IIS), database servers (e.g.. Oracle or MySQL), application servers, etc. always promptly patched and current with security updates? If not, please explain.
7. Is all access, including administrative accounts, controlled and logged (i.e. firewalls, file system permissions, ACLs, database table permissions, packet logs, etc.)? If not, please explain.
8. Does your product(s), system(s) and/or service(s) prevent the use of shared credentials or accounts including administrative accounts?
9. Describe how your product(s), system(s) and/or service(s) authenticates and authorizes users?
10. Does your product(s) and/or system(s) facilitate compliance with Federal and State laws, such as FERPA, HIPPA and PCI?
11. Does your company alert customers to vulnerabilities and security issues in a timely fashion? If so, please describe your process.

For hosted services, in addition to questions above

1. Are intrusion detection technologies and firewalls utilized on the hosted system(s)?

2. Describe how your facility is physically secured?

3. Does your network or facility undergo vulnerability scanning and penetration testing?

4. Do your employees hold Information Technology Security certifications and/or secure coding certifications? If so, please describe them.

1. Purpose

Virginia Tech is committed to enhancing the quality of life of the campus community by integrating the best practices of safety and security with technology. A critical component of a comprehensive security plan is the utilization of a security and safety camera systems. The surveillance of public areas is intended to deter crime and assist in protecting the safety and property of the Virginia Tech community. This policy addresses the university’s safety and security needs while respecting and preserving individual privacy.

To ensure the protection of individual privacy rights in accordance with the university’s core values and state and federal laws, this policy is adopted to formalize procedures for the installation of surveillance equipment and the handling, viewing, retention, dissemination, and destruction of surveillance records. The purpose of this policy is to regulate the use of camera systems used to observe and record public areas for the purposes of safety and security. The existence of this policy does not imply or guarantee that cameras will be monitored in real time 24 hours a day, seven days a week.

2. Policy

The Virginia Tech Police Department (VTPD) has the authority to select, coordinate, operate, manage, and monitor all campus security surveillance systems pursuant to this policy. All departments using camera surveillance are responsible for implementing and complying with this policy in their respective operations.

All existing uses of security camera systems shall be brought into compliance with this policy within 12 months of the approval of the policy. Unapproved or nonconforming devices will be removed.

A university Surveillance Oversight Committee (SOC) is an operational committee established by the Vice President for Administrative Services to oversee implementation of this policy. Proposed policy revisions will be reviewed by the SOC and the University Safety and Security Policy Committee.

2.1 Responsibilities

VTPD, in conjunction with Information Technology and the Office of Emergency Management (OEM), is responsible for realization and assimilation of the policy.

Information Technology and VTPD are responsible for advising departments on appropriate applications of surveillance technologies and for providing technical assistance to departments preparing proposals for the purchase and installation of security camera systems.

VTPD and Information Technology shall monitor developments in the law and in security industry practices and technology to ensure that camera surveillance is consistent with the best practices and complies with all Federal and State laws.

VTPD and Information Technology will review proposals and recommendations for camera installations and review specific camera locations to determine that the perimeter of view of fixed location cameras conforms to this policy. Proposals for the installation of surveillance cameras shall be reviewed by the Chief of Police or designee. Recommendations shall be forwarded to the SOC.

VTPD will review any complaints regarding the utilization of surveillance camera systems and determine whether this policy is being followed. Appeals of a decision made by the Chief of Police will be made to and reviewed by the SOC which will make a recommendation to the Vice President for Administrative Services who will render a decision. An appeal of the Vice President for Administrative Services decision may be taken to the University President who is the final arbiter.

2.1.1 Responsibilities of Surveillance Oversight Committee (SOC)

The SOC will be responsible for reviewing and approving or denying all proposals for security camera equipment recommended by the Chief of Police. The SOC shall propose to the Vice President for Administrative Services appropriate changes to this policy as needed.

The SOC shall be comprised of five members;

- The Virginia Tech Chief of Police or designee, Chair of the SOC
- Chief Information Officer or designee
- Vice President for Student Affairs or designee
- Associate Vice President for Facilities or designee
- Virginia Tech Director of Emergency Management or designee

2.1.2 Responsibilities of University Relations and General Counsel

University Relations will review all external requests to release records obtained through security camera surveillance. University Relations will seek consultation and advice from the General Counsel related to these requests prior to the release of any records.

2.2 Scope

This policy applies to all personnel, departments, and colleges of Virginia Tech in the use of security cameras and their video monitoring and recording systems. Security cameras may be installed in situations and places where the security and safety of either property or persons would be enhanced. Cameras will be limited to uses that do not violate the reasonable expectation of privacy as defined by law. Where appropriate, the cameras may be placed campus-wide, inside and outside buildings. Although the physical cameras may be identical, the functions of these cameras fall into three main categories:

- A. **Property Protection:** Where the main intent is to capture video and store it on a remote device so that if property is reported stolen or damaged, the video may show the perpetrator. Examples: an unstaffed computer lab, an unstaffed science lab, or a parking lot.
- B. **Personal Safety:** Where the main intent is to capture video and store it on a remote device so that if a person is assaulted, the video may show the perpetrator. Examples: a public walkway, or a parking lot.
- C. **Extended Responsibility:** Where the main intent is to have the live video stream in one area monitored by a staff member in close proximity. In this case video may or may not be recorded. Example: a computer lab with multiple rooms and only one staff.

2.3 General Principles

Information obtained from the cameras shall be used exclusively for law and/or policy enforcement, including, where appropriate, student judicial functions. Information must be handled with an appropriate level of security to protect against unauthorized access, alteration, or disclosure in accordance with Policy 7105, Policy for Protecting University Information in Digital Form (<http://www.policies.vt.edu/7105.pdf>)

All appropriate measures must be taken to protect an individual's right to privacy and hold university information securely through its creation, storage, transmission, use, and deletion.

All camera installations are subject to federal and state laws.

Departments requesting security cameras will be required to follow the procedures outlined in this policy.

2.3.1 Placement of Cameras

The locations where cameras are installed may be restricted access sites such as a departmental computer lab; however, these locations are not places where a person has a reasonable expectation of privacy. Cameras will be located so that personal privacy is maximized.

No audio shall be recorded except in areas where no one is routinely permitted. Requests to utilize audio surveillance that does not comply with this requirement will be evaluated on a case by case basis by the SOC.

Camera positions and views of residential housing shall be limited. The view of a residential housing facility must not violate the standard of a reasonable expectation of privacy.

Unless the camera is being used for criminal surveillance, monitoring by security cameras in the following locations is prohibited:

- Student dormitory rooms in the residence halls,
- Bathrooms,
- Locker rooms,
- Offices,
- Classrooms not used as a lab.

The installation of “dummy” cameras that do not operate is prohibited.

Unless being used for criminal surveillance all video camera installations should be visible.

2.3.2 Access and Monitoring

All recording or monitoring of activities of individuals or groups by university security cameras will be conducted in a manner consistent with university policies, state and federal laws, and will not be based on the subjects’ personal characteristics, including age, color, disability, gender, national origin, race, religion, sexual orientation, or other protected characteristic. Furthermore, all recording or monitoring will be conducted in a professional, ethical, and legal manner. All personnel with access to university security cameras should be trained in the effective, legal, and ethical use of monitoring equipment.

With the exception of **Extended Responsibility** cameras, university security cameras are not monitored continuously under normal operating conditions, but may be monitored for legitimate safety and security purposes that include but are not limited to the following: high risk areas, restricted access areas/locations, in response to an alarm, special events, and specific investigations authorized by the Chief of Police or designee.

For **Property Protection** and **Personal Safety** cameras, access to live video or recorded video from cameras shall be limited to persons authorized by the Chief of Police or designee. For Extended Responsibility cameras, the live video can be monitored by the staff person; however, any video recorded must comply with the recording storage and retention requirements of this policy.

When an incident is reported, the personnel responsible for the area in question may request to the Police Chief to review the images from the camera. As circumstances require, the Police Chief may authorize others to review images. A record log will be kept of all instances of access to and use of recorded material. Nothing in this section is intended to limit the authority of the Virginia Tech Police Department (VTPD) in law enforcement activities.

2.3.3 Appropriate Use and Confidentiality

Personnel are prohibited from using or disseminating information acquired from University security cameras except for official purposes. All information and/or observations made in the use of security cameras are considered confidential and can only be used for official university and law enforcement purposes upon the approval of the Chief of Police or designee. Personnel are expected to know and follow University Policy 7000, Acceptable Use and Administration of Computer and Communication Systems and the Acceptable Use of Information Systems at Virginia Tech (www.policies.vt.edu/7000.pdf).

2.3.4 Use of Cameras for Criminal Investigations

The use of mobile or hidden video equipment may be used in criminal investigations by VTPD. Covert video equipment may also be used for non-criminal investigations of specific instances which may be a significant risk to public safety, security and property as authorized by the Chief of Police or designee.

2.3.5 Exceptions

This policy does not apply to cameras used for academic purposes. Cameras that are used for research would be governed by other policies involving human subjects and are therefore excluded from this policy.

This policy does not address the use of Webcams for general use by the University (e.g., on the Official Virginia Tech Website). This policy also does not apply to the use of video equipment for the recording of public performances or events, interviews, or other use for broadcast or educational purposes. Examples of such excluded activities would include

videotaping of athletic events for post game review, videotaping of concerts, plays, and lectures, or videotaped interviews of persons. Automated teller machines (ATMs), which may utilize cameras, are exempt from this policy.

3. Procedures

Departments requesting security cameras will be required to follow the procedures outlined in this policy.

3.1 Installation

Individual colleges, departments, programs, or campus organizations installing video surveillance equipment shall submit a written request to their appropriate dean or vice president describing the proposed location of surveillance devices, justifying the proposed installation, providing a cost estimate, and identifying the funding source or sources for purchase and ongoing maintenance.

- The vice president or dean will review the request and recommend it to the Chief of Police, if appropriate.
- The Chief of Police or designee will review all proposals from deans and vice presidents. Upon completion of review of the project, the Chief of Police will forward the proposal to the SOC with a recommendation.
- The SOC will be responsible for reviewing and approving or denying all proposals for security camera equipment recommended by the Chief of Police.

Communication Network Services shall oversee the installation of all approved security camera systems with the assistance of VTPD, the Office of Information Technology and Facilities, as required.

Purchasing (HokieMart) will not accept, approve, or process any order for security camera systems without the approval of the SOC.

3.2 Training

Camera control operators shall be trained in the technical, legal, and ethical parameters of appropriate camera use. Camera control operators shall receive a copy of this policy and provide written acknowledgement that they have read and understood its contents.

3.3 Operation

Video surveillance will be conducted in a manner consistent with all existing university policies.

Camera control operators shall monitor based on suspicious behavior, not individual characteristics.

Camera control operators shall **not** view private rooms or areas through windows.

All operators and supervisors involved in video surveillance will perform their duties in accordance with this policy.

3.4 Storage and Retention of Recordings

No attempt shall be made to alter any part of any surveillance recording. Surveillance centers and monitors will be configured to prevent camera operators from tampering with or duplicating recorded information.

Surveillance records shall not be stored by individual departments. All surveillance records shall be stored in a secure university centralized location for a period of 30 days and will then promptly be erased or written over, unless retained as part of a criminal investigation or court proceedings (criminal or civil), or other bona fide use as approved by the Chief of Police. Individual departments shall not store video surveillance recordings.

A log shall be maintained of all instances of access to or use of surveillance records. The log shall include the date and identification of the person or persons to whom access was granted.

Approved March 1, 2010 by Vice President for Administrative Services, Sherwood G. Wilson.

Safety and Security Camera Acceptable Use Policy

ADDENDUM # 1 TO RFP # 0016531

For

Video Surveillance System and Associated Components

**VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY
 INFORMATION TECHNOLOGY ACQUISITIONS (0214)
 1700 PRATT DRIVE
 BLACKSBURG, VA 24061**

DATE March 4, 2011	ORIGINAL DUE DATE AND HOUR March 31, 2011 at 3:00 PM
-----------------------	--

ADDRESS ALL INQUIRIES AND CORRESPONDENCE TO: John Krallman, Director of Information Technology Acquisitions E-MAIL ADDRESS: john.krallman@vt.edu TELEPHONE NUMBER (540) 231-6233 FAX NUMBER (540) 231-4110
--

Section VI.E is amended to add item number 8 (VI.E.8) as follows:

8. The Virginia Department of Criminal Justice has strict licensing requirements for businesses providing specific security services in the Commonwealth in accordance with Virginia Code 9-1.138. Offeror shall be properly licensed by the Commonwealth of Virginia to operate as an Electronic Security Business. See the Business Requirements FAQ: at <http://www.dcjs.virginia.gov/pss/faq/catView.cfm?category=Electronic Security Businesses>.

Section VII.B is amended to add item number 8 (VII.B.8) as follows:

8. Documentation to substantiate current licensure or anticipated licensure by April 15, 2011 with the Virginia Department of Criminal Justice Services as an Electronic Security Business

All other terms, conditions and descriptions remain the same.

The Due date and hour remains **March 31, 2011 at 3:00 PM**

BLACKSBURG, VA 24061

DATE March 16, 2011	ORIGINAL DUE DATE AND HOUR March 31, 2011 at 3:00 PM
------------------------	---

ADDRESS ALL INQUIRIES AND CORRESPONDENCE TO: John Krallman, Director of Information Technology Acquisitions E-MAIL ADDRESS:john.krallman@vt.edu TELEPHONE NUMBER (540) 231-6233 FAX NUMBER (540) 231-4110

Questions and Answers from the Pre-proposal conference through March 15, 2011

- Q1. I assume that the Parking garage is the first project. Is each one of the projects or phases going to be design/build for us to decide on how to best approach it?
- A1. As indicated in the proposal, the Perry Street Parking Deck is the first project following the award of the RFP. Subsequent projects will be design/build based on university requirements with technical assistance from the successful offeror regarding placement, type, connectivity and operation of cameras.
- Q2. What existing equipment is going to be integrated within this project? Please provide makes and models. [For example,] you have some pre-existing analog equipment?
- A2. Yes, as indicated in the proposal and university policy, there are camera systems currently in place which will need to be integrated with the university-wide system. Based on your knowledge of the industry, please describe your capabilities and how you would generally approach the integration of an embedded base of cameras with the installation of an IP-based enterprise system.
- Q3. In Section VI.A.10, Statement of Needs, Network Capabilities; 'interface with existing access control and fire alarms' -- Is there any sort of control path you want with the access control or what exactly do you want in terms of an interface with access control? For example, locking doors as a response to an emergency situation you are viewing on video.
- A3. Please describe the capability of your proposed solution to provide access control. Individual needs-assessments will be done as the system is deployed.
- Q4. What do you want integrated with the access controls?
- A4. Again, based on your knowledge of the industry, please describe the features and capabilities of your proposed solution to provide access control. Individual needs-assessments will be done as the system is deployed.
- Q5. Are you going to be able to provide a list of the systems that we need to be integrated with, at what level and what version?
- A5. No, not prior to the award.
- Q6. Pricing Proposal – in area of consulting, how do you want that? Is that an hourly rate or a fixed price based on an assumed quantity, what is the expectation there?
- A6. As indicated in section VI. Statement of Needs, item F., Cost, please provide itemized pricing that will allow Virginia Tech to evaluate the cost of doing business with your firm. The information should include but not be limited to the items listed in number two which would be associated with each project plan.
- Q7. In regards to 30 day retention policy for all video – is there a separate retention policy if it is an event?
- A7. There is no policy in addition to University Policy No. 5617, but as requested in the proposal, describe how the proposed system will implement a "litigation" or "investigative" hold on selected video footage for an indefinite period of time.

- Q8. Storage requirement, resolution, etc... what resolution do you want on a log – how do you want it stored, etc.?
A8. Please describe how the proposed solution will address these types of issues. We do not want to provide a “stock set” of requirements that are too specific. We are looking for you to provide us with information about your capabilities regarding an enterprise-wide solution.
- Q9. So there are two pieces of work identified. First you want the parking garage with an itemized price, then an enterprise solution that is a superset of the parking lot with what we are proposing for the campus-wide environment.
A9. Yes, that is correct. Please keep in mind that whatever is proposed for the parking garage has to fit within what is proposed for the enterprise solution.
- Q10. Since this is such a network-based thing a lot of it is an IT-based thing, without knowing what your infrastructure backbone capability and bandwidth capability are we doing single location storage/are we doing distributing storage, UPS, etc. We need some guidelines on that. Don't know how much backhaul we will need.
A10. Because this is a Request for Proposal, throughout the document we are looking for you to tell us what will be needed to deploy your proposed solution. We are looking for a partner with consulting capabilities to help us take our current network and storage infrastructure and provide us with information that will help make it work with the camera/surveillance systems that we will deploy. Our network infrastructure is described in Section III of the RFP. Fiber-optic links in the university's backbone network suitable for use as backhaul for the video surveillance system may be included in the design and implementation of individual project plans.
- Q11. Who will manage surveillance infrastructure post deployment?
A11. Virginia Tech will manage the video surveillance infrastructure following deployment.
- Q12. Is the award based on price proposal just for the garage?
A12. No, the Perry Street Parking Deck is the first project, but the RFP will be awarded based on the responses to the request for an enterprise-wide surveillance system.
- Q13. When you are scaling from 250 to 2500 cameras, based on frames per second and resolution there is a major difference in packet passing so if you decide to do one frame per second and I quote based on a high resolution and frame rate, my cost will be dramatically higher and I could lose because of this. Can you give us a guideline?
A.13 Our Safety and Security Camera Acceptable Use Policy does not provide this level of detail, and the needs of the personnel, departments and colleges at Virginia Tech will vary. The key then is to provide a scalable, enterprise solution and make sure that we understand what your cost represents. If you can, provide us with a range of capabilities and costs on a unit-by-unit basis.
- Q14. Does the university have a preference where video storage is accomplished: at the camera, at the building, at the campus adjacent to or central?
A14. This is covered in the policy; the policy states storage will be centralized. Central storage will be predominantly housed in the Andrews Information Systems Bldg., 1700 Pratt Drive.
- Q15. Is the university supplying servers and storage or is this something we need to supply?
A15. In your response, please provide everything you think is necessary to support the solution that you recommend and make sure it is itemized in the cost structure – some may be provided and some we may choose to buy from you.
- Q16. Use of maps -- does the university have maps that [they] would ask us to integrate or would we create the maps?
A16. Yes, GIS data is available through a geo-database accessible to AutoCAD and ESRI through a middleware product called ArcSDE. Virginia Tech will work with the successful offeror to integrate GIS data.
- Q17. Will vendor have to run power or will the university supply power? Will vendor need to supply UPS units or backup generator power? Where is the demarcation point on this responsibility? What about implementations that require higher power than PoE?
A17. The university will provide power, but vendors should recommend UPS units as part of their turn-key response. The Perry Street Parking Deck has a back-up generator but Virginia Tech will not ask vendors to provide back-up generator power. Specific implementation questions will surface as a result of needs-assessments in connection with specific projects, but vendors are encouraged to propose solutions for issues such as distance and power limitations that will be encountered with Power over Ethernet (PoE).
- Q18. On-Site-Support -- is it the intent to not only cover new equipment but existing CCTV video equipment as well?

- A18. The RFP requests that to the extent possible, the proposed solution protect existing investments in legacy systems and include existing cameras. Vendors are encouraged to describe the on-site support available for such an integrated approach.
- Q19. Is there an incumbent provider already providing the services today?
- A19. No, there is not currently a central provider of video surveillance systems. There are several vendors from which Virginia Tech could make a contract purchase for products, service and repair, but it is not known what every department or college has done for service.
- Q20. Are you going to give us a list of what exists now? –make/model, protocol interface.
- A20. No. Again, there are several vendors from which Virginia Tech could make a contract purchase for products, service and repair, but it is not known what every department or college has done for service.
- Q20. What about monitoring -- are you going to have one area that is going to be your central control or have different clients? What are your monitor requirements? Do you want us to price a range of monitors and monitoring solutions? How many cameras do we need to have the capability of seeing at one time?
- A20. The RFP document requests that the proposed system support multiple campus groups and accommodate different levels of users. Vendors are encouraged to provide a complete description of their capabilities as it relates to monitoring and monitoring solutions.
- Q21. Contract Period -- is the pricing you are looking for in our proposals to be fixed for three years?
- A21. Vendors are requested to propose pricing that will cover the initial, three-year term or as negotiated.
- Q22. Need clarification on paragraph two, first sentence of 2.3.1 on Attachment D.
- A22. Audio is allowed in that situation because generally no one is supposed to be in that environment (for example, a restricted access site as explained in the policy). If an incident were to occur there, the audio record would be useful information to law enforcement/public safety organizations in their response. In order to preserve individual privacy, the use of audio requires approval by the Surveillance Oversight Committee (SOC).
- Q23. Based on award of 3 year contract -- what is your time frame to get to that point? What is your proposed schedule of build-out?
- A23. The successful offeror will work with Virginia Tech to identify university priorities, key sites and develop a phased approach to implement the enterprise-wide system.
- Q24. You use contracts plural -- is it possible you could break out sub sections for some components?
- A24. We are looking for a contract or contracts. This decision will depend on the quality and content of the responses we receive and the results of negotiations.
- Q25. What is the cutoff date that we can email questions to you? (March 24th @ 5:00pm)
- A25. As indicated in the RFP, follow-on questions will be accepted until 5:00 PM, March 24, 2011.
- Q26. Dispatch -- if there is an event...is there an 800MH radio system now in place or do you want some options as to how messaging could be sent out to folks in the field?
- A26. Virginia Tech does not use an 800 MHz radio system. Vendors are welcome to propose messaging options as part of their proposed solution.
- Q27. Are prints available of the garage?
- A27. Yes, floor plans for the Perry Street Parking Structure and lighting plans are attached.
- Q28. Is there a conduit requirement in garage...cables running to cameras...will they be required to be in conduit?
- A28. Yes.
- Q29. Is there an air conditioned / heated room that head-end equipment will be placed in the garage?
- A29. Yes.
- Q30. What is the actual pricing going to include for right now? Do we want to put all the existing cameras in this system?
- A30. As indicated in section VI. Statement of Needs, item F., Cost, please provide itemized pricing that will allow Virginia Tech to evaluate the cost of doing business with your firm. The information should include but not be limited to the items listed in number two which would be associated with each project plan.

- Q31. Critical Timelines, Section V.B – Are these for current construction projects, for installation of cameras in the future or for installation for areas in-place now?
A31. Yes, both scenarios.
- Q32. Funds Availability -- award contract doesn't guarantee future work?
A32. That is correct. This is standard wording for our RFPs.
- Q33. How can we determine for the enterprise solution if there is existing conduit/dark fiber resources and that sort of thing that we may be able to take advantage of for your economic advantage?
A33. Again, our network infrastructure is described in Section III of the RFP. Fiber-optic links in the university's backbone network suitable for use as backhaul for the video surveillance system may be included in the design and implementation of individual project plans.
- Q34. Is all that in play as far as surveillance goes (Pointing to the Campus Map)?
A34. Yes, Virginia Tech also has a campus in the National Capital Region and several Campus Centers around the Commonwealth that offer graduate and professional development programs that will also take advantage of this procurement. http://www.vt.edu/where_we_are/extended.html
- Q35. What access control is used in the structure and what version?
A35. T2 Systems provides the software for parking management. Currently there is no requirement for integration.
- Q36. Where is network connectivity located within the structure?
A36. There is a communication closet in the Parking Services office on the first floor to which fiber has been pulled. All network cabling for cameras, servers, etc. will originate there.
- Q37. Who designed the elevators (what manufacturer/brand)?
A37. The elevators were manufactured by ThyssenKrupp Elevator.
- Q38. Describe the entrances and exits of the structure.
A38. There are three parking garage entrances and exits. One entrance has three lanes; the others have two lanes each.
- Q39. What do the electrical and network connections look like in the structure?
A39. Virginia Tech is not sure what the questioner had in mind. See number two above.
- Q40. Will a performing arts center be a part of the structure?
A40. No.
- Q41. Who's going to be watching the videos?
A41. Live video will not be monitored at all times, but access to live video and recorded video from the cameras on demand must be part of the proposed solution.
- Q42. Will there be a central command center?
A42. Not at this time.
- Q43. What is the lighting plan?
A43. The lighting plan is attached.
- Q44. What do you have planned for outside of the structure?
A44. Currently there are no plans for surveillance of the exterior of the structure.
- Q45. I was asked about the level of detail needed in the garage itself.
A45. License plate detail is needed at the entrances and exits, not in the garage itself.
- Q46. What level of detail of individuals is needed?
A46. At this time, true "facial recognition" would likely not be needed (and perhaps does not currently work well in even the most expensive implementations), but being able to distinguish facial features such as beards, and the color of hair and clothing would be important.
- Q47. Is there was fiber optic cabling in the structure, for network access.

- A47. Fiber has been pulled to the parking structure and is available in the communications closet on the first floor. No other cabling for cameras or other IT related equipment has been provisioned.
- Q48. Please identify existing security systems (e.g. access control, perimeter detection, camera systems, building management, fire and intrusion detection systems), that VT would find desirable to integrate with this new system. Need vendors and model numbers.
- A48. As part of your response to the RFP, please explain the capabilities of the proposed system to integrate with the systems described above.
- Q49. Please confirm that VT has ESRI (or equivalent) GIS maps which would be used for integration into the new system. If not GIS, please identify the form (bit map, etc.).
- A49. GIS data is available through a geo-database accessible to AutoCAD and ESRI through a middleware product called ArcSDE. Virginia Tech will work with the successful offeror to integrate GIS data.
- Q50. Under Section VI, paragraph D, item #1, you mention "system must address the use of security cameras as well as other video monitoring and recording systems" Please identify the "other" systems.
- A50. As part of your response to the RFP, please explain the capabilities of the proposed system to integrate with video monitoring and recording systems.
- Q51. Same section and paragraph, item #2, please define the existing legacy camera systems (vendor, model, version).
- A51. As indicated earlier, there are several vendors from which Virginia Tech could make a contract purchase for products, service and repair, but it is not known what every department or college has done regarding existing service.
- Q52. Has VT selected a video analytic vendor? (item #13).
- A52. No, Virginia Tech has not selected a video analytics vendor and a recommendation may be included as part of your RFP response. If your proposed solution, either directly or through a partner, can provide video analytics please explain as part of your response to the RFP.
- Q53. How many personnel will staff a shift (for surveillance monitoring). How many shifts per 8 hour, 24 hour period? Is remote access to the security operations center data desirable?
- A53. As indicated above, live video will not be monitored at all times, but access to live video and recorded video from the cameras on demand must be part of the proposed solution, including remote access.
- Q54. If existing access control is integrated into the Video surveillance system, does VT desire to monitor for alarms (door forced) and the ability to remotely operate the door (lock/unlock) based on permissions to the operator?
- A54. As part of your response to the RFP, please explain the capabilities of the proposed system to integrate with the scenarios described above.
- Q55. Does VT want the ability to message security personnel (from the surveillance system console) in the event of an observed event? Does VT desire mass notification ability (e.g. notify all campus security via voice/sms/text, and/or local police)? Would the ability to notify students and faculty be desirable?
- A55. Yes, Virginia Tech would like the ability to message security personnel and vendors are welcome to propose messaging options as part of their proposed solution. Virginia Tech does not require a mass notification solution or other notification ability as described above.
- Q56. Does VT require system performance trend reporting for connected devices e.g. number of alerts/events per time period, camera outage, video analytic alerts, alert by area, etc.
- A56. Virginia Tech would find it valuable to have a means to provide reports on system activity and performance.
- Q57. Please describe any current video surveillance systems in use on campus.
- Make, model, storage, cameras, transport method, locations, and age.
 - Are current video solutions accomplishing their mission and fully functional?
 - How are current video solutions installed, maintained, supported?
 - Will the departments with existing systems continue to monitor their individual systems as well as being capable of being monitored central location?
- A57. Again, there are several vendors from which Virginia Tech could have made a contract purchase for camera products, service and repair, but it is not known what every department or college has done regarding their existing systems. Access and Monitoring is addressed in the University Policy.

- Q58. Please identify locations for future expansions mentioned in RFP and provide map, floor plans, electrical design, and wireless or cabled bandwidth coverage.
- Please provide general timeframe for expansion roll-out by location.
- A58. As indicated in the proposal, the Perry Street Parking Deck is the first project following the award of the RFP. Subsequent projects will be design/build based on university requirements with technical assistance from the successful offeror regarding placement, type, connectivity and operation of cameras. The successful offeror will work with Virginia Tech to identify university priorities, key sites and develop a phased approach.
- Q59. Please describe any existing access control or fire alarm solutions on campus that will eventually be integrated into proposed solution.
- Have any areas been identified for expansion of access control solution?
- A59. Again, as part of your response to the RFP, please explain the capabilities of the proposed system to integrate with the systems described above.
- Q60. Please provide floor plans, location and type of existing lighting, and electrical for proposed pilot parking decks.
- Have camera locations and type, quality of image for pilot location been identified?
 - Has success criteria for proposed pilot been developed?
- A60. Attached as part of this Addendum.
- Q61. Will appropriate stakeholders be made available for detail interviews prior to RFP response due date?
- A61. No, but questions will be answered per announced method.
- Q62. Will additional site visits be arranged, if required, prior to RFP response due date?
- A62. No other opportunity for guided access is planned. It should be noted that as a public university, Offerors are free to visit unrestricted buildings or sites at their convenience
- Q63. Would/could an extension be granted to RFP's due date? Requirements in RFP for an enterprise wide solution cannot be developed with level of detail provided and seem to be based on solution design being underway, or completed.
- A63. No.
- Q64. Is it the intent of the RFP to have "Turn-Key" solution provided for a campus wide integrated video solution; including all/any construction, electrical, cabling, wireless communications, training, maintenance, etc by selected vendor?
- What role will VT play with regards to support of the proposed system?
 - Is it your desire to use/repurpose any existing IT infrastructure (storage, Servers, network switches...?)
- A64. The intent is to have offerors provide proposals of their products' capabilities. All proposals will be considered in light of their price, capabilities, possible integration into existing infrastructure, etc. Certainly all training and maintenance for hardware/software that is part of any proposal should be included in the pricing information and will be provided by the vendor.
- Q65. The proposed system must provide for "five nines" (99.999%) reliability for uptime of video monitoring, storage and archival review functions, in a manner equivalent to the normal production mode".
- Does the 5(9s) requirement include individual cameras?
- A65. No.
- Q66. Section F "Cost" states as requirement that "itemized pricing information that includes all hardware, software, licensing, training and professional services, including annual maintenance and support" for enterprise wide solution but RFP document does not provide sufficient detail to comply with request. Can you please explain the itemized pricing requirement of the RFP for enterprise solution?
- A66. We want itemized pricing for the parking deck, and pricing for all pieces that start the infrastructure (server hardware, software, storage), itemized so we can decide whether we want to do this ourselves or purchase it as part of this procurement.

All other terms, conditions and descriptions remain the same.

The Due date and hour remains **March 31, 2011 at 3:00 PM**

For

Video Surveillance System and Associated Components

**VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY
 INFORMATION TECHNOLOGY ACQUISITIONS (0214)
 1700 PRATT DRIVE
 BLACKSBURG, VA 24061**

DATE March 28, 2011	ORIGINAL DUE DATE AND HOUR March 31, 2011 at 3:00 PM
------------------------	--

ADDRESS ALL INQUIRIES AND CORRESPONDENCE TO: John Krallman, Director of Information Technology Acquisitions E-MAIL ADDRESS: john.krallman@vt.edu TELEPHONE NUMBER (540) 231-6233 FAX NUMBER (540) 231-4110
--

Questions and Answers from March 16, 2011 through the Question cut-off date of March 24, 2011

- Q1. We are assuming that the offeror will provide, as part of our response, pricing to furnish and install a complete turnkey Video Surveillance System for the Perry Street Parking Structure. This pricing will also include a unit cost breakdown of all items required to provide a complete installation. Is this correct?
- A1. Virginia Tech is requesting the offeror's solution for video surveillance of the Perry Street Parking Deck, itemized pricing to support the design and implementation of the project, and the offeror's strategy to move from the parking deck to deploy other university locations in the context of an enterprise-wide solution, including itemized pricing as described in Section VI. F. of the RFP.
- Q2. Can you supply an example of how the offeror is to display Unit Cost Breakdowns? In our pre-bid meeting it was said that our mark-up on material was only supposed to include our overhead costs. Are we to include any taxes and profit?
- A2. Please include itemized pricing as requested in Section VI.F. of the RFP. We are part of the Commonwealth of Virginia and are exempt from sales and use taxes.
- Q3. As stated in the RFP, the University only requires storage in one central location. If the Andrews Information Systems Building suffers a catastrophic loss (such as fire or explosion), how does storage in only one location satisfy the five nines requirement? How is the required 30 days of data to be protected? The use of one or more Protected Storage Nodes will allow the retrieval of any lost data and also allow the ability for maintenance without loss of data. Would having some protected distributed storage be considered?
- A3. Yes, if this is part of what you would like to propose.
- Q4. Question pertaining to Section VIII, Selection Criteria and Award: The RFP currently has 7 items outlined as selection criteria for award. The weight of each item (under Maximum Point Value) ,however, has not been defined. Will Virginia Tech be providing this information in a subsequent amendment?
- A4. Virginia Tech will post the point values prior to the close of the RFP.

All other terms, conditions and descriptions remain the same.

Video Surveillance System and Associated Components RFP #0016531

Orion Systems Group (OSG) is an assembly of seasoned industry veterans averaging over 15 years experience each and this knowledge combined with our robust product lines translates into a valuable combination for our clients. For additional information please visit our web site at www.OrionSystemsGroup.com

OSG is very excited to have this opportunity to present this information. If OSG is selected as your electronic security vendor you will enjoy the full benefits of a company that's large enough to serve you and yet small enough to know you. You will also enjoy from OSG faster response and more personalized service than one could ever expect from larger organizations where all clients are considered equally unimportant. With OSG all of our clients are extremely important and they receive the attention to details they richly deserve.

OSG is a perfect fit for this Virginia Tech project. OSG has deployed over 20,000 IP video channels. The OSG solution provides a scalable and logical migration path from the current to the future with out any waste. OSG has elected to partner with EMC / Isilon as well a Genetec for our solution. OSG has complied with the rfp instruction but in addition has offer a cost plus approach. This approach will give Virginia Tech an unbiased security consultant that can also be the security integrator with out the time delays and expense of procurements. OSG is a Virginia based systems integrator licensed by VA DCJS and is a certified SWAM.

Thank you very much for allowing me to introduce OSG and please don't hesitate to call with any questions or comments. If I'm unavailable in the office I can be reached on my portable at (703-447-1504) or via e-mail at DRadoski@OrionSystemsGroup.com

Sincerely:

A handwritten signature in black ink, appearing to read "Derek Radoski", written over a horizontal line.

Derek Radoski, CPP

RFP 0016531
GENERAL INFORMATION FORM

- QUESTIONS:** All inquiries for information regarding this solicitation should be directed to: John Krallman, Phone: (540) 231-6233, e-mail: john.krallman@vt.edu.
- DUE DATE:** Sealed Proposals will be received until **March 31, 2011 at 3:00 PM**. Failure to submit proposals to the correct location by the designated date and hour will result in disqualification.
- ADDRESS:** Proposals should be mailed or hand delivered to: Virginia Polytechnic Institute and State University (Virginia Tech), Information Technology Acquisitions, 1700 Pratt Drive (0214), Blacksburg, Virginia 24061. Reference the Opening Date and Hour, and RFP Number in the lower left corner of the return envelope or package.
- PRE-PROPOSAL CONFERENCE:** See Section IX for information regarding a pre-proposal conference.
- TYPE OF BUSINESS:** (Please check all applicable classifications). If your classification is certified by the Virginia Department of Minority Business Enterprise, provide your certification number: _____. For certification assistance, please visit: <http://www.dmb.state.va.us/swamcert.html>.

Large

Small business – An independently owned and operated business which, together with affiliates, has 250 or fewer employees or average annual gross receipts of \$10 million or less averaged over the previous three years. Department of Minority Business Enterprise (DMBE) certified women-owned and minority-owned business shall also be considered small business when they have received DMBE small business certification.

Women-owned business – A business concern that is at least 51% owned by one or more women who are U. S. citizens or legal resident aliens, or in the case of a corporation, partnership, or limited liability company or other entity, at least 51% of the equity ownership interest is owned by one or more women who are citizens of the United States or non-citizens who are in full compliance with the United States immigration law, and both the management and daily business operations are controlled by one or more women who are U. S. citizens or legal resident aliens.

Minority-owned business – A business concern that is at least 51% owned by one or more minority individuals (see Section 2.2-1401, Code of Virginia) or in the case of a corporation, partnership, or limited liability company or other entity, at least 51% of the equity ownership interest in the corporation, partnership, or limited liability company or other entity is owned by one or more minority individuals and both the management and daily business operations are controlled by one or more minority individuals.

- COMPANY INFORMATION/SIGNATURE:** In compliance with this Request For Proposal and to all the conditions imposed therein and hereby incorporated by reference, the undersigned offers and agrees to furnish the services in accordance with the attached signed proposal and as mutually agreed upon by subsequent negotiation.

COMMONWEALTH OF VIRGINIA
STANDARD CONTRACT

Contract Number: _____

This contract entered into this ____ day of _____ 20__, by _____, hereinafter called the "Contractor" and Commonwealth of Virginia, Virginia Polytechnic Institute and State University called "Virginia Tech".

WITNESSETH that the Contractor and Virginia Tech, in consideration of the mutual covenants, promises and agreements herein contained, agrees as follows:

SCOPE OF CONTRACT: The Contractor shall provide the _____ to Virginia Tech as set forth in the Contract Documents.

PERIOD OF CONTRACT: From _____ through _____.

COMPENSATION AND METHOD OF PAYMENT: The Contractor shall be paid by Virginia Tech in accordance with the contract documents.

CONTRACT DOCUMENT: The contract documents shall consist of this signed contract, Request For Proposal Number _____ dated _____, together with all written modifications thereof and the proposal submitted by the Contractor dated _____ and the Contractor's letter dated _____, all of which contract documents are incorporated herein.

In WITNESS WHEREOF, the parties have caused this Contract to be duly executed intending to be bound thereby.

Contractor:
By: 
Title: VP

Virginia Tech
By: _____

was performed at the site demonstrating that the system meets the minimum design/performance capabilities stipulated by the contract. The system shall be deemed ready for production certification testing on the day following receipt of this documentation. Virginia Tech shall provide written confirmation of its acceptance following successful completion of the production certification test. System (software and/or hardware) payment will be authorized after the successful completion and certification test(s).

18. **SEVERAL LIABILITY:** Virginia Tech will be severally liable to the extent of its purchases made against any contract resulting from this solicitation. Applicable entities described herein will be severally liable to the extent of their purchases made against any contract resulting from this solicitation.

19. **WARRANTIES:**

- A. Vendor warrants that all services provided to Customer shall conform to and be performed in accordance with Vendor's proposal and that Vendor's services shall not infringe any third-party intellectual property rights
- B. The Contractor agrees that the goods and services furnished under any award resulting from this solicitation shall be covered by the most favorable commercial warranties the contractor gives any customer for such goods and services and that the rights and remedies provided therein are in addition to and do not limit those available to Virginia Tech by any other clause of this solicitation. A copy of this warranty must be furnished with the proposal.

A. Network Capabilities (RFP Page 5)

1. The proposed system must communicate with existing Virginia Tech networks as described in Section III B. Network Infrastructure above.

The OSG solution will communicate with the existing Virginia Tech network. Our solution is commercial off the shelf and comes with a software developers kit (SDK) as well as an open Application Programmers Interface (API) which will provide for linkage into other legacy systems.

2. Describe the capabilities of the proposed solution to provide power over Ethernet.

When the majority of new interior cameras are added OSG will utilize POE cameras. When the cameras are a long distance from an IT closet or when the cameras require a heating element or have moving parts OSG will power these with stepped down AC power. . The reason for this is because of the needed heating element power consumption.

3. Describe the capabilities of the system to support IP and IPv6 including:
 - a. DHCP for IP configuration

The OSG solution utilizing Genetec Omnicast and EMC / Isilon supports DHCP but requires that a DNS server is available and all servers and cameras are communicating with the DNS server. Static IP addresses for cameras and VMS application servers are typically recommended as a best practice.

- b. Stateless address autoconfiguration (SLAAC) or static configuration for IPv6

The OSG solution utilizing Omnicast 5.0, the system can be configured to use network name instead of IP Address and the system will resolved the Ip address every time we try to connect to another machine in the system. In consequence, the implementation is agnostics of how the IPv6 address is assigned to the machine. DHCP, SLAAC and static configuration are all supported.

- c. DHCP/Stateless DHCP for IPv6

In Omnicast 5.0, the system can be configured to use network name instead of IP Address and the system will resolved the Ip address every time we try to connect to another machine in the system. In consequence, the implementation is agnostics of how the IPv6 address is assigned to the machine. DHCP, SLAAC and static configuration are all supported.

A. Network Capabilities continued (RFP Page 5)

- d. The ability to operate on an IPv6-only network

Omnicast 5 operates on IPv6 networks. In Omnicast 5 the servers and client workstation can operate on an IPv6-only network, currently cameras drivers for each manufacturer have to be modified to allow seamless operations. For existing IPV4 networks system has the ability to bridge video from an IPv4 to IPv6 network. We recommend using IPv4 for the cameras and IPv6 for the server/client network. Install 2 NICs on the Archiver server one for cameras, one for clients.

4. Describe the capabilities of the system to provide packet filtering for IP and IPv6.

Gentec is capable of working with modern firewalls that filter traffic based on many packet attributes like source IP address, source port, destination IP address or port, destination service like WWW or FTP. They can filter based on protocols, TTL values, netblock of originator, of the source, and many other attributes.

5. Describe the extent to which your proposal could make use of the university-provided 802.11 wireless infrastructure for network connectivity, including 802.1x authentication.

Yes in the event that cabling is not possible OSG can utilize 802.11 and 802.1x. OSG recommends this only in scenarios where cabling is not possible.

6. Describe how Virginia Tech system administrators will access any and all system components.

Omnicast users will access the system with their client applications (Live Viewer, Archive Player and Config Tool). Live Viewer and Archive player are typically used for system operators while system administrators would typically have Config Tool privileges which provides a dashboard for system administration across multiple servers from any workstation in the system.

7. Describe how the proposed solution will enable stored or real-time video to be sent to a network database or viewed remotely on a secure personal computer.

Omnicast users will use their client applications and a username/password to gain access to the IP CCTV system. The user must have access to an Omnicast Gateway server in the system in order to gain access. This would require specific ports to be open in the firewall or a VPN connection to the VA Tech Security network to gain access. Video transmission to the clients would be sent in Multicast, Unicast UDP or Unicast TCP depending on the supported network connection types. Unicast TCP would always be used to send recorded video to a client.

A. Network Capabilities continued (RFP Page 5)

8. Describe how the proposed solution will be able to store surveillance records from multiple locations for 30 days, and then erase or write over data older than 30 days utilizing a central storage repository.

Omnicast allows data retention to be configured on a per camera basis. The system would be configured to retain all video for 30 days. When the disk is full, the system will begin writing over the oldest video files (first in – first out). Exception being video that has been identified for permeate or indefinite hold, or identified with a hold date beyond 30 days. The proposed OSG system will utilize the EMC / Isilon storage platform. Please see the enclosed CAD drawing that shows the scalability of our storage platform going form 25 cameras in the garage. Then adding 250 cameras that are currently existing and growing to 2500 plus camera in the future.

9. Describe how the proposed system implements a "litigation" or "investigative" hold on selected video footage for an indefinite period of time.

Video files that are to be retained for evidence or investigative purposes can be identified (tagged) for retention to prevent them from being overwritten. Options for tagging selected video are: 1. For X number of days, 2. through a specified date, 3. indefinitely. Video frames tagged with "Holds" will be archived and retained until they are manually released or specified dates/# of days reached.

10. Describe the features and capabilities of the proposed solution that will allow it to interface with existing access control and fire alarms via an open Application Programming Interface (API) and Software Development Kit (SDK).

The Omnicast SDK allows for third party integration of other security subsystems to Omnicast and vice versa. The capabilities of the SDK include IP based communication of inputs and alarms which can be tied to many actions in Omnicast (i.e. Video Bookmarking, Alarms, PTZ sent to presets, camera call up, etc). The SDK can allow for the streaming of video from Omnicast to a third party application.

A. Network Capabilities continued (RFP Page 5)

11. Describe how the proposed solution will prevent data loss or the interruption of data collection should one of the storage nodes fail

Omnicast relies on the built in failover mechanism to guarantee the availability of all critical system components. The failover is a backup operational mode in which every system component can be backed up by any number of secondary components on standby. The line up of secondary components on standby is called the failover list. Should a system component become unavailable through either failure or scheduled down time, the next component in its failover list will automatically take over, thus ensuring the continuity of the service in a seamless way to the end user.

12. The proposed system should be capable of daily backup. The backup should consist of two copies, one copy of which Virginia Tech will store offsite. System recovery procedures shall be well documented and kept up-to-date in order to allow Virginia Tech to test, ensure the system is functional, and that applications and data can be restored from backups.

Omnicast has a built in backup utility for offloading video files. Alternatively, standard IT backup tools can be used to move stored video from the primary location to a disaster recovery location. It is important to note the video data is often very large and requires considerable network bandwidth and processing power to backup on a daily basis.

13. Describe how the proposed system will provide redundancy in server and storage components.

The Omnicast system will leverage a fail over directory and fail over archivers to provide continues operation and recording in the event of a server failure.

B. Security Capabilities (RFP Page 5)

1. Describe the security features and capabilities of the proposed solution.

OSG solution utilizing Omnicast™ is an enterprise class IP Video Surveillance Solution that provides seamless management of video, audio and data across any IP network. Its unique design offers you the freedom to design a system that truly matches your security needs.

Omnicast offers several additional security features including:

- ***128 bit SSL for command and control channel with cameras/encoders***
- ***248 bit RSA to encrypt and decrypt passwords***
- ***248 bit RSA key to digitally sign (watermark) video files***
- ***Optional 128bit video export password for evidence access control***
- ***IP filtering option to grant/deny system access by IP address range***
- ***Support for IGMPv3 (Source Specific Multicast)***

Omnicast's IP based distributed architecture has revolutionized the security industry by offering security professionals numerous benefits such as:

- Unmatched reliability
- Unequaled scalability
- Open architecture
- Third party integration
- Network layout flexibility

Genetec has designed within the Omnicast solution unique innovations like:

- Built-In Failover and Redundancy
- Virtual Matrix
- Metadata Engine
- Federation™

With the introduction of these innovations and others, Omnicast has proven to be the solution of choice in numerous markets including homeland, enterprise, public, and VIP security.

Omnicast is an integral member of Genetec's suite of IP security products. The Genetec solution provides seamless integration of all aspects of your security system in a single unified security console, ensuring that your facility has the most complete security coverage.

B. Security Capabilities (RFP Page 5)

2. Complete and attach the Virginia Tech Information Technology Security Office's technology procurement questionnaire (Attachment C).

OSG has completed this and is in section 3 of our RFP response

3. Describe how the proposed system will provide HTTPS for system configuration, SSL client authentication and support user installation of the server certificate chain.

Command and control client communications are always sent from the client to server using encryption. Optionally command and control communications from the server to the camera/encoder are also encrypted using HTTPS/SSL (assuming the camera/encoder supports HTTPS/SSL – i.e. Axis, Sony, Verint, Genetec extension).

4. Indicate whether the proposed solution is capable of encrypting all control and image transfer with either SSL or SSH and describe how.

Command and control from client to server and server to camera/encoder can be encrypted however video streams are not encrypted. SSL or HTTPS can be used to encrypt the command and control channel between server and camera/encoder while a proprietary encryption method is used for client to server communications.

5. Describe how control and image transfer will be encrypted.

Command and control from client to server is proprietary while command and control from server to camera/encoder is accomplished by enabling the HTTPS option in the camera and in the Omnicast software or for SSL communication a CA certificate is added to the Omnicast software as well as the camera/encoder. Image transfer is not encrypted.

B. Security Capabilities (RFP Page 5)

6. Describe how the proposed system will provide access control, including different access levels and / or accounts for routine image fetching and administrative access.

Omnicast's access security does not just stop at user login. Omnicast also empowers the system administrators to limit what authorized users can see and do within the system.

To restrict the access to system resources, administrators can segment the system into a hierarchy of operational units called sites, to which cameras and other devices can belong. Each user can be granted or denied access to a given site and everything under it. As an added flexibility, system devices can also belong to multiple sites.

To control the range of actions a user may perform, Omnicast has over a hundred different privileges that the administrator may use to tailor the profile of each user with surgical precision.

7. Describe how the system manages and supports multiple users simultaneously accessing the same data, including access to live camera data from multiple disparate locations.

Omnicast uses a Multicast transmission protocol for superior bandwidth management. This technology allows a video feed to be viewed by multiple users at multiple locations simultaneously, using the bandwidth of each network segment only once. This also allows for a reduction in server hardware as much of the load is taken off VMS servers. Omnicast is also capable of working in hybrid unicast/multicast environments where connections between server and client or camera and server do not support multicast transmissions. For networks with high numbers of unicast clients Omnicast offers system load balancing using additional Omnicast gateway servers ensuring the system will scale in any network environment. It's extremely important to consider an application that can work in a hybrid environment as many VMS applications work in all unicast or all multicast and cannot dynamically switch between the two modes or work in both methods simultaneously.

B. S

Figure 2
Multicast transmission

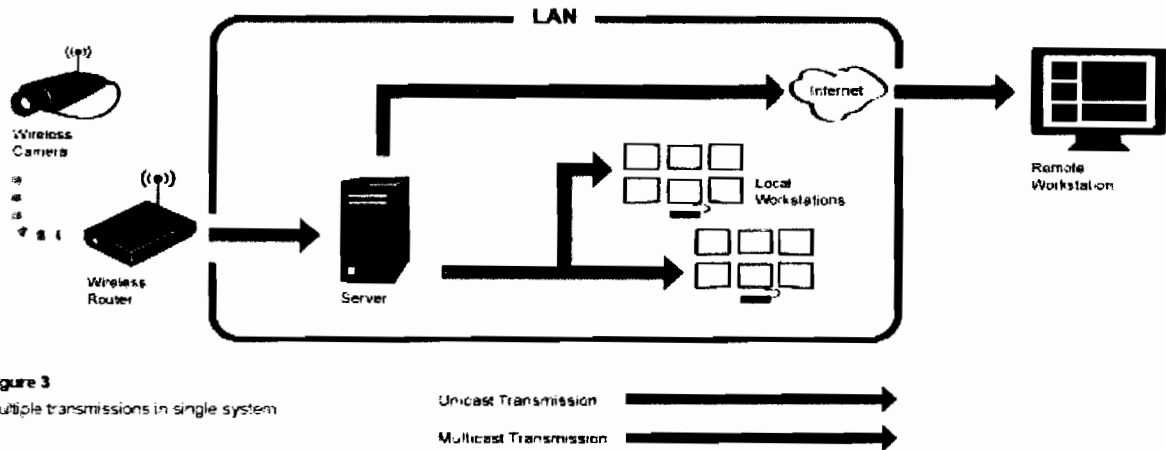

Figure 3
Multiple transmissions in single system

8. Describe how the system will authenticate surveillance records as original.

Another critical concern shared by security managers is the admissibility of video in court. To counter this problem, Genetec has implemented the latest digital signature technologies (248-bit RSA) to protect the integrity of stored video and audio. Once video is stored on a server into video files, a digital signature is applied. In essence, this technology analyzes and uniquely identifies each video frame while also linking each frame to the previous one through a complex algorithm. This prevents attackers from deleting, modifying or adding a video frame to archived video. For instance, if a single pixel is changed, the digital signature will no longer match, and the system will Omnicast Archive player will notify the user that the video file has been tampered with.

9. Describe the features and capabilities of the proposed system that will enable remote access via the Virginia Tech Virtual Private Network (VPN) for real time viewing from surveillance cameras or use of surveillance records.

Omnicast functions in a variety of network environments including those using VPNs. Omnicast supports multiple camera viewing streams commonly required in cases where a remote user may need access to the system with limited bandwidth. Remote clients can be configured to receive a lower bandwidth video stream to prevent saturating WAN connections or overloading the system with excessive unicast transmissions.

B. Security Capabilities (RFP Page 5)

10. Describe what access controls or technologies the system can employ to prevent misuse of data, such as unauthorized disclosure of video records to third parties.

Omnicast empowers the system administrators to limit what authorized users can see and do within the system. System users can be prevented from downloading any video from the system. Supervised login is also supported within Omnicast requiring that a person of supervisor level be present to log a system user into Omnicast using both the user credentials and the supervisor credentials. During a video file export, the user has the option of adding an export password which protects the evidence file from being used by a 3rd party without authorization, additionally all exports and user actions are logged for auditing.

C. Operating Standards (RFP Page 5)

1. The proposed system must be broad enough to address all university locations as described in University Policy and Procedures No. 5617 (Attachment D).

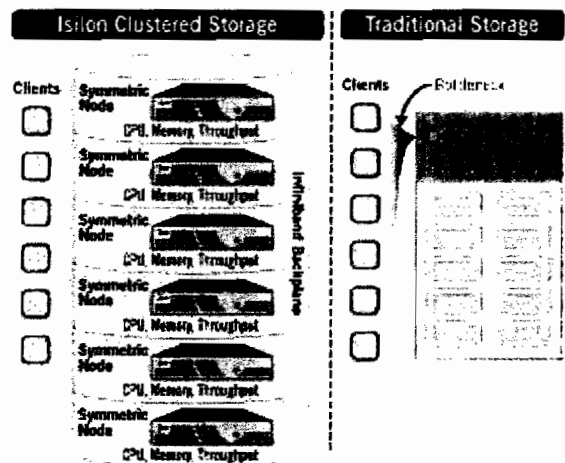

The strength of OSG response is the scalability with out waste. Our solution utilizing EMC / Isilon platform in conjunction with Genetec can scale from 25 to 250 to 2500 cameras.

EMC/Isilon starts simple...and stays that way no matter how much storage is added, performance is required or business needs change. Isilon is designed to handle massive numbers of large files

- One Single File System to Manage – True Ease of Use
- Scalable from 6 TB to 10.4 Petabytes in a single Volume
- OpEx: Reduce Storage management cost by 85%
- Reduce CapEx: 80%+ Raw Storage Utilization
- Industry-leading Performance accelerates time to decision

EMC/Isilon Scale-out Architecture

Isilon scale-out storage is a dramatic departure from the **traditional storage** architecture of head controllers (e.g. filer heads) sitting over shelves of disk. The traditional storage model is to construct a single system using RAID groups, LUNs, volumes and when more capacity or performance is needed, scale the system by adding more controller heads, more volumes, more shelves of disk, etc. With this traditional scale-up architecture all client access is enabled through a single or pair of heads. Each storage system has volume, performance or data reliability limitations, so multiple systems and more volumes, more file systems must be deployed as an agency requirements grow. These systems form a complicated web of "storage islands" and result in "storage sprawl".

Modular, self-contained nodes each include:

- Motherboard, CPU's
- Memory read cache and NVRAM
- Power supplies
- InfiniBand core network connections (intra-cluster)
- Front-end networking
- Disk drives in each node
- Hot-swappable disks, power supplies, and fans

Industry standard protocols
NFS, CIFS, HTTP, FTP, NDMP,
SNMP, ADS, LDAP and
NIS for security

The EMC/Isilon scale-out clustered storage system is engineered completely differently; it eliminates the dependency on layers of abstraction (RAID, volumes, LUNs) and instead gives the file system direct knowledge of every bit and byte. A scale-out clustered storage system is a *single file system* (single volume)

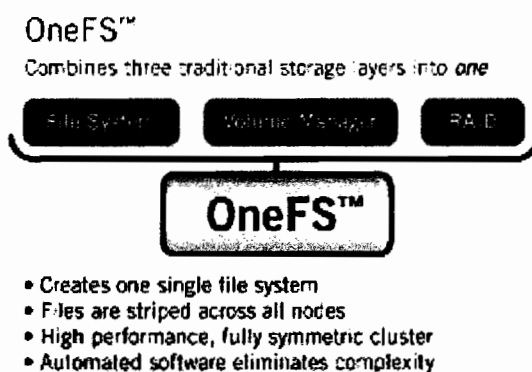

made up of independent devices commonly referred to as "nodes" - each providing storage and processing resources to store and serve data. Each node is connected via a private high-bandwidth, low-latency interconnect. It is ultimately a distributed storage system, with a single management point and system namespace.

OneFS Operating System – the foundation of Scale-out NAS

At the cornerstone of the EMC/Isilon clustered storage architecture is the patented 5th generation OneFS Operating System. OneFS combines the three layers of traditional storage architectures — file system, volume manager and RAID — into one unified software layer.

EMC/Isilon's OneFS operating system is distributed and intelligently stripes data and meta data across all nodes in a cluster to create a single, shared pool of storage. This approach is a vast improvement over the traditional method of striping data across individual disks (RAID groups) within a single storage device or volume. Traditional methods use a centralized server to manage a disk array, creating dependencies and multiple points of failure within a storage system. With OneFS each node in an Isilon clustered storage system is a peer, so any node can handle

a request for data. OneFS provides each node with knowledge of the entire file system layout and where each file and parts of files reside. Accessing any independent node gives a user access to all content in one unified namespace, meaning that there are no volumes or shares, no inflexible volume size limits, no downtime for reconfiguration or expansion of storage and no multiple network drives to manage. Instead, OneFS provides the user with the ease and simplicity of managing a single networked attached storage system with scalability, performance, and flexibility that exceeds SAN systems.

2. Indicate whether the proposed solution will include an API for camera operation and image transfer available to the public and unencumbered by license and provide details.

No license is required to view or configure the camera via web page . http commands and control can be accessed by anyone to use in their own application and are documented in our manual which can be found under Arecont support\downloads on our website. If access to SDK is required a developer can also register on our Arecont web page under the partner portal and will be contacted by our partner relations manager prior to release.

C. Operating Standards (RFP Page 5)

3. Indicate whether cameras in the proposed solution can be fully configurable via a web browser with standard JavaScript and list the minimum versions required.

Arecont cameras are fully configurable via web browser but JAVA or any other plug in such as activeX, or flash are not required or needed

Our cameras are fully configurable via web browser but JAVA or any other plug in such as activeX, or flash are not required or needed.

Only MJPEG video can be viewed through the HTTP interface.

4. Indicate whether cameras in the proposed solution can be fully configurable via a web browser with Java.

Our cameras are fully configurable via web browser but JAVA or any other plug in such as activeX, or flash are not required or needed.

5. Can configuration data from all components be exported and imported via plain ASCII text or XML? If so, please describe how.

In relation to the Genetec codecs that would work with existing cameras certain client application settings can be imported/exported via XML. In relationship to the new IP megapixel cameras we are providing you can simply choose ViewSource and see HTML coding – it is simple to do so. If you desired to save as ASCII you could just cut and paste into a notepad file in windows and save it that way.

6. The proposed system must provide for "five nines" (99.999%) reliability for uptime of video monitoring, storage and archival review functions, in a manner equivalent to the normal production mode.

It is important to note there are many factors that affect system uptime such as redundant network paths, system wide standby power, automated failover servers, additional system admin personnel, etc because of this Omnicast and other VMS systems can be architected to provide at least "3 nines" of uptime, which includes downtime for failures and system upgrades. This is not simply stating this but has been truly been measured by Omnicast customers running thousands of cameras at the "3 nines" mark. Improvements will allow for "in service" upgrades of many system components allowing for an improvement in overall system uptime.

Optionally, When Genetec is configured with VMware, it will provide for "five nines" availability. EMC and Genetec have published the following white paper which can be applied to the proposed solution as an option to achieve five nines at the head end.

**Please see white paper EMC Virtual Infrastructure for Physical Security in ancillary section*

C. Operating Standards question #6 continued (RFP Page 5)

With Regards to the backend storage "five nines" high availability,

The EMC/Isilon OneFS enables unprecedented system reliability and data availability. Each node in a cluster is a democratic peer to the next and if needed, can take over operations for any other node. This effectively gives the EMC/Isilon solution unprecedented N-way resiliency far superior to the 2-way simple controller failover found in with traditional architectures. OneFS data can be protected at unprecedented levels. Specifically, OneFS uniquely stripes data and ECC/parity across all nodes in the cluster (rather than a specific RAID set of disks as found with traditional hardware based RAID) which enables EMC/Isilon to deliver advanced protection not achievable with traditional storage architectures. EMC/Isilon scale-out solutions can survive an unprecedented four (N+4) simultaneous failures of either entire nodes or drives, regardless of the capacity of the drive. In contrast traditional systems can at best sustain only two drive or system failures with traditional RAID protection (e.g. RAID6, RAID DP, N+2, mirroring).

The OneFS FlexProtect™ feature includes state-of-the-art functionality, that rebuilds failed disks in a fraction of the time compared to traditional RAID. Because the EMC/Isilon cluster is a true symmetric system (instead of a single head as with traditional storage) all nodes in the cluster can participate in rebuilding content from failed disks and then harnesses the free storage space across all the spindles in the cluster. As a result EMC/Isilon can routinely rebuild data from failed drives in less than an hour with limited, if any

performance impact. Again in contrast to traditional storage solutions, rebuilding data can take as long as 8 - 24 hrs since resources are confined to a finite set of resources/controllers and disks that must compete with other operations within the storage subsystem.

The OneFS Operating System constantly monitors the health of all files and disks, maintaining records of smart statistics (e.g. recoverable read errors) on each drive to anticipate when that drive will fail. When OneFS identifies at risk components, it preemptively migrates the data off of the suspect disk to available free space on the cluster automatically and transparently to the user. Once the data is rebuilt, the user is notified to service the suspect drive in advance of actual failure. This feature ensures data that is written today will be stored with 100% reliability, bit-for-bit correct, and available whenever it is needed.

C. **Operating Standards (RFP Page 5)**

7. The proposed system must monitor self-health and report failures of cameras and other edge peripherals to operations staff.

Omnicast can monitor the status of system components from services to edge devices. The flexible event to action mechanisms can allow the system admin to configure notifications when components fail (via email, pop-up messages, sound alerts, etc.). Omnicast can also be configured with a SNMP traps plug-in that sends event notifications via SNMP. Omnicast 5.0 (April 2011 Release) adds additional functionality with a scheduled system status report function that allows an administrator to schedule system health scans periodically and have them delivered to an admins email address.

D. Technical Capabilities (RFP Page 6)

1. The proposed system must address the use of security cameras as well as other video monitoring and recording systems. (See Attachment D)

The OSG solution utilizing Genetec and the EMC/Isilon can utilize existing cameras. The OSG solution can utilize existing monitoring locations. OSG can keep in place the existing recording DVR's or NVR's. However OSG recommends moving towards a consolidated storage platform using the EMC / Isilon storage OneFS solution. The end result will be better management and economics.

OneFS presents a single file system regardless of the cluster size. As the system scales, the IT administrator enjoys the convenience of a true single pool of storage - a single mount point/share for users and applications and a single point of administration eliminating the need to load balance across volumes, LUNs, file systems.

With traditional systems when a system administrator adds a new storage resource (or needs to address a "hot spot"), the common next step is to manually migrate content from an existing volume/LUN to another to balance capacity across resources.

With EMC/Isilon the OneFS operating system delivers automated content migration and eliminates outages of business applications and the need for manual migrations. Using the OneFS AutoBalance feature, a new storage node can be added to an EMC/Isilon cluster in less than 60 seconds – also eliminating the need to over-provision storage for future needs. As soon as the node is turned on and network cables are connected, AutoBalance (as a background operation) immediately begins to migrate content from the existing storage nodes to the newly added node (across the cluster interconnect back-end switch), re-balancing all of the content across all nodes in the cluster and maximizing utilization. This elimination of managing volumes/LUNs, means EMC/Isilon customers routinely experience an industry leading 80%+ capacity utilization! From the simplicity of management to the inherent high capacity utilization, the EMC/Isilon architecture is able to deliver significant cost savings for both CapEx and OpEx.

D. Technical Capabilities (RFP Page 6)

2. To the extent possible, the proposed system should protect existing investments in legacy camera systems.

enetec's VMS software can support a wide range of IP cameras video encoders keyboard etc. OSG having done several Universities CCTV work in the past understands that some group want there own sub system kept in place. An (example) In the event that a VT group wanted to keep there DVR in place. OSG would simply install a 1v video input card with / 2 output card in front of the existing DVR. 1 output would go to the existing DVR. 1 output would go to the VT selected codec that would compress the images and send to the Isilon storage. We have done this for customers who wanted to keep legacy equipment in place like DVR's analog matrix switches etc.

Included in ancillary section is the Genetec list of approved / tested cameras, encoders and keyboards

It is also updated at the link below

<http://www.genetec.com/Lists/Reference%20Documents/Genetec%20-%20Omnicast%20Supported%20Hardware%20List.pdf>

For other VT security subsystems such as alarms, One Card campus systems like blackboard or Cboard, Access systems, facility control systems, PLC's etc. OSG has also deployed a graphic user interface (GUI) from Kaplogic named Aegis. This product allows for an overlay of multiple subsystems to give the user the feel of one solution. Recently these systems have been referred to as PSIM Physical Security Information Management.

3. Describe the functional capabilities of the proposed system to simultaneously collect video including the maximum number of simultaneous digital and analog cameras, maximum number of frames per second, highest resolution, etc.

Omnicast uses the standardized CIF (Common Intermediate Format) video formats, from QCIF to 4CIF, for viewing live and stored video from video encoders. Omnicast also supports non-CIF resolutions used by progressive, HDTV and megapixel IP cameras. The latter can provide greater than 4CIF resolutions, including megapixel formats (i.e. 720P, 1080p, 800x600, 1024x768, 1280x960, 1600x1200 2048 x 1536, 2596x1944, 4000x2656)

Omnicast offers real time video up to 60 fps per camera, regardless the number of cameras managed by the system. The frame per second is a per camera setting and can be configured from 1 fps to 60 fps (frame rate is ultimately determined by camera/encoders capabilities; typically 30FPS is the maximum frame rate per camera stream).

Omnicast's server components can be distributed over as many networked PCs as available. With Omnicast you can add cameras, workstations or any other component of the system anywhere on the network, at any time. Systems can grow from a single camera to tens of thousands of cameras, one camera at a time.

D. Technical Capabilities question 3 continued (RFP Page 6)

- *Omnicast has been tested in a single Directory with 50,000 cameras.*
- *Omnicast will support 72,000 alarms per day*
- *Omnicast Archiver Servers can support 300cameras/300mbps whichever occurs first.*

4. Describe the scalability characteristics of the proposed solution.

Genetec Ommnicast can start with as little as one camera and scale easily to 10's of thousands of cameras.

This solution we have broken into 3 phases

Phase 1 Parking Garage 18 TB (25 Megapixel Cameras)

Phase 2 Existing Campus 42 TB 250 standard cameras with H.264 compression

Phase 3 Future systems 378 TB 2500 IP cameras

- *Omnicast has been tested in a single Directory with 50,000 cameras.*
- *Omnicast will support 72,000 alarms per day*

ISILON Scalability

EMC/Isilon eliminates the challenges of scaling workloads and environments. Through OneFS the system automatically uses all available storage capacity and compute resources from each node (e.g. cache, CPU, and network resources) as a single system (regardless of the number of nodes), allowing the system resources to scale transparently and "on-the-fly" as more capacity or performance is needed. This unique capability enables an IT administrator to provision for current workloads and dynamically scale the entire environment as needed over time without over-provisioning either capacity or performance. The "building block" nature of this architecture enables the ability to predictably and linearly scale the storage in any dimension (e.g. performance, capacity, or both). If an environment needs both capacity and performance a Platform node can simply be added to the cluster. If one only needs performance Accelerator nodes can be added to the same cluster. And finally if a user only needs additional capacity EX expansion nodes can be added. The EMC/Isilon IQ family of storage solutions uniquely enables users to fine tune their solution to meet their changing environments and optimize their capital IT budgets. Isilon storage solutions can scale from as little as 6TB to more than 10+ petabytes of capacity and to over 45GB/s of aggregate throughput, maintaining a true single file system, single volume. Isilon products are easy to install, manage and grow. Once racked, a 10, 50 or 100+ terabyte cluster takes less than 10 minutes to configure and set up, and additional nodes can be

D. Technical Capabilities *question 4 continued* (RFP Page 6)

added while the cluster is in production with no downtime. In fact, once new nodes are racked, cabled and powered up the new nodes will join the cluster and be ready within 60 seconds to receive reads and writes, all while the system is in production

5. Describe how the proposed system will support access by multiple campus groups and accommodate different levels of users.

Omnicast empowers the system administrators to limit what authorized users can see and do within the system.

To restrict the access to system resources, administrators can segment the system into a hierarchy of operational units called sites, to which cameras and other devices can belong. Each user can be granted or denied access to a given site and everything under it. As an added flexibility, system devices can also belong to multiple sites.

To control the range of actions a user may perform, Omnicast has over a hundred different privileges that the administrator may use to tailor the profile of each user with surgical precision. Some examples of user control include access to download video, access to camera views, PTZ control and PTZ priority levels,

6. Describe the management characteristics of the proposed solution including:

- a. Search functions by camera, time and date or frame number

Cameras can be organized in logical sites in the camera tree to allow for easy system navigation. The camera tree includes a camera search tool that allows an operator to quickly search for a camera name or partial camera name. Once the camera is located the user interface lists the dates for which video is stored. The operator selects a date and queues up the appropriate time segment for viewing.

- b. Display capabilities of the system during active alarms

Omnicast Alarm management will allow for dedicated alarm video tiles or monitors. Alarms are handles in one of 3 modes (simple, Block or Salvo). Alarms can be displayed in the order they are received or via priority level. Specific alarms can be sent to specific user workstations to ensure the proper party is tasked with handling the alarm condition.

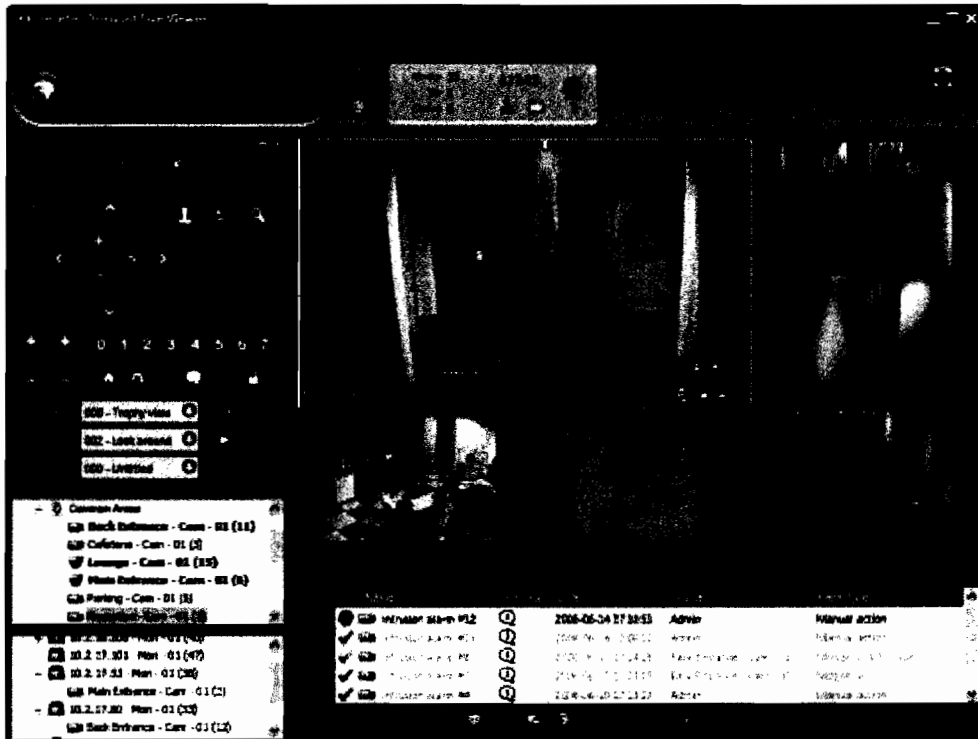

- c. Viewing of synchronized video from multiple cameras on a single monitor

Omnicast supports synchronized or asynchronous playback of multiple cameras on a single monitor.

- e. Operator selection of the camera or cameras to appear on the monitors and display format options.

D. Technical Capabilities question 6 continued (RFP Page 6)

Omnicast's Live Viewer serves as the control and monitoring center of your entire security system. Both intuitive and powerful, Omnicast's Live Viewer provides the tools necessary to gain a complete understanding of events taking place within a facility with a user interface streamlined for proper event management.

Feature Highlight

- Fully configurable UI
- View full-motion video with sound, up to 16 cameras per monitor
- Support as many monitors as the equipment can handle
- Instant replay of any camera on display
- View on-screen metadata from third-party softwares
- On-screen point-and-drag camera movement control
- Full range of alarm management controls
- Bookmark any important scene to ease future archive search and retrieval
- Save and print video snapshots
- Use interactive maps to control the system
- Block sensitive video from less privileged viewers
- Remotely control other Live Viewers on the system Launch hot macros
- Guard tour (automatic rotation of different viewer layouts)

D. Technical Capabilities (RFP Page 6)

- f. Real time review of video from multiple locations, and in some cases, simultaneous access to the same video feed.

The Omnicast operator, with proper credentials can dynamically select camera feeds to be displayed. Video is sent multicast or unicast to one or more operators. (Multicast preferred)

- g. Procedures to export images and archive for legal purposes.

Yes, Omnicast supports the export of still frame snapshots, avi/asf video export and watermarked g64 video export. A standalone player is available for evidence that needs to be handed off to parties that do not have the Genetec Omnicast software installed on their PCs. A video export password can be added to a video export to ensure only authorized parties may play back the evidence file.

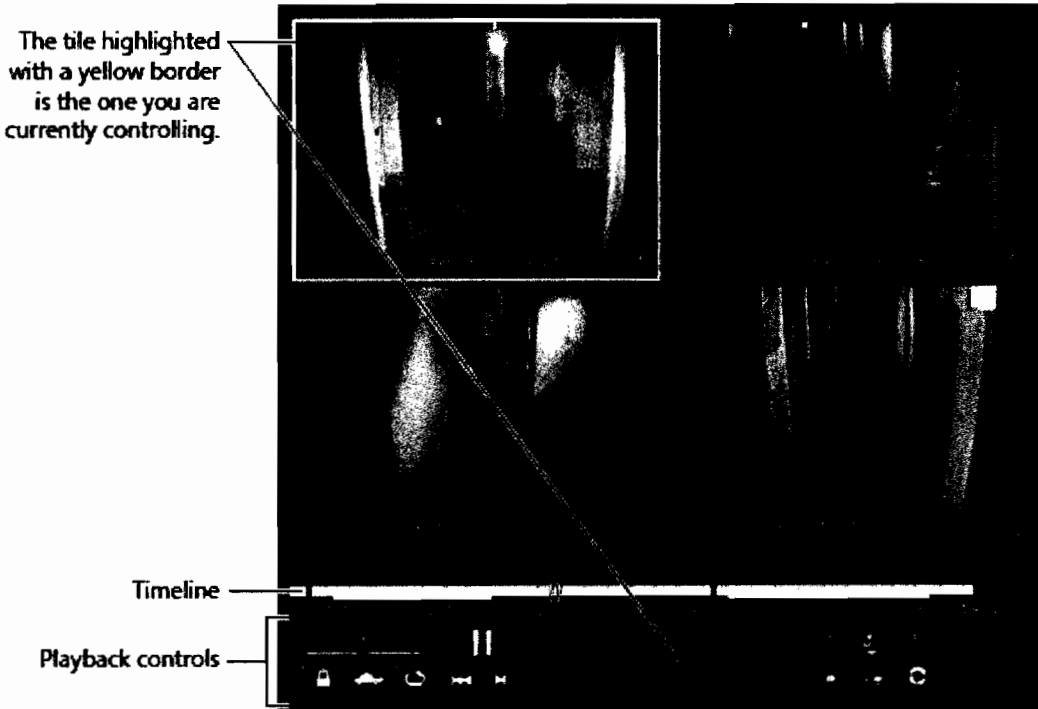

7. Describe how the proposed system will incorporate existing cameras, including both fixed and Pan Tilt Zoom (PTZ) cameras.

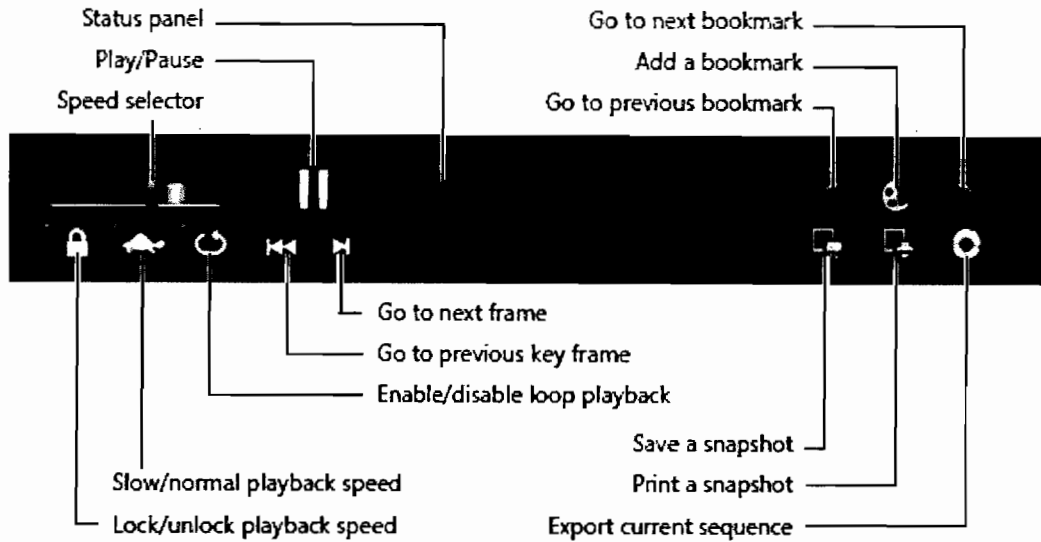

Details of the legacy 250 camera system was not available in the RFP document however Genetec Omnicast supports a wide range of cameras and encoders. We have included this list in the Ancillary section. OSG has made legacy (analog) PTZ controls work with Pelco P, D, Manchester, 485, 422, 232. We also suggest that we set presets for ease of use for VT operators.

8. Describe the system's capability to copy video footage or single video frames from a stored surveillance recording on to a standard magnetic medium for viewing on a personal computer. Describe the playback controls available to users.

Please find below actual screen shot of the answer to the question

Playback tile

Description The Export function allows you to create stand-alone video files that can be played without being connected to an Omnicast Directory. The Archive Player also gives you the option to convert the exported files to a format other than the Omnicast native video format (G64) so popular software like Microsoft Media Player can be used to play these files.

Export accessibility You must have the **Export video files** privilege to use this feature. You can export the sequence you are currently viewing or export the entire list of playback sequences returned by an archive query.

To export the playback sequence you are currently viewing, right-click on the playback tile and select the **Export** from the contextual menu, or click on the **Export current sequence** button from the playback controls.

Select the export folder

First, specify where you want to create the exported files.

Export

Directory where the files will be created
D:\Omnicast\Export

Export format:
ASF

Use predefined profile:
Windows Media Video 8 for Local Area Network (256 Kbps)

D. Technical Capabilities (RFP Page 6)

- Describe the system's ability to incorporate the use of maps and other GIS data.

Basic Maps – Map Editor Tool

Mapping is a feature offered in Omnicast's It provides users with an interactive graphical representation of the areas under surveillance. Often, security personnel have trouble finding cameras in large enterprise systems. Mapping eliminates this problem. Simply drag a camera from the digital map, and drop it into a window to view it in real time.

D. Technical Capabilities question 9 continued (RFP Page 6)

To make things even easier, maps can include hyperlinks that connect to other digital maps. This allows the user to switch from one site to another with the simple click of a mouse. Genetec also offers a map creation tool to help users design their own map in a simple to use drag-and-drop environment.

Advanced Maps – Omnicast Plan Manager

With Plan Manager, Genetec extends the concept of traditional graphical maps and provides operators with an interactive and efficient tool to help manage their security environment. Plan Manager is offered to Genetec customers as an add-on module within Omnicast, Genetec's video surveillance system. Plan Manager's alarm management functionality allows operators to position alarms throughout their maps. When an alarm is triggered in Omnicast, the map will automatically center on the alarm zone where then operators can acknowledge the alarm in Omnicast or click directly on the flashing area. Plan Manager accepts exported vectorial PDF maps from Autocad and other CAD systems or from an available Geographical Information System (GIS), if compliant with the Open Geospatial Consortium, Inc.[®] (OGC) interface and exchange standards, such as Microsoft[®] Bing[™] Maps. As opposed to standard JPG or raster map-based map systems, Plan Manager allows an operator to zoom into a map, from bird's eye view down, to gather as much details in an image as required.

Plan Manager also offers additional functionality such as navigation tools, view mode options, advanced search functionalities, instruction files with triggered alarms, and integration of third-party systems. Custom development services are also offered by Genetec to channel partners with clients that require other specific functions. Customizing the capabilities of Plan Manager maximizes efficiency in a specific application and provides operators with even more control at their fingertips.

10. Describe the system's ability to capture audio.

Genetec Omnicast can capture audio for any connected camera or encoder that supports audio. The cameras recommended allow two way streaming audio. If desired Virginia Tech would need to connect an external microphone to the camera to capture audio.

11. Describe the system's ability to operate outdoors under low-light conditions or where lighting conditions will fluctuate.

The OSG solution for the parking garage will utilize megapixel cameras. We have selected the Arecont megapixel camera because of there low light capability. OSG has provided an actual screen shot from the Arecont camera in a parking garage at nighttime (see ancillary information). OSG also utilizes camera that have day / night features this provides for clear crisp images in day light as well as nighttime. As an added feature and to help in lower light areas OSG also installs aspherical lenses, auto iris lenses etc. For areas with no light OSG utilizes thermal cameras and cameras that are able to utilize auto iris. For

D. Technical Capabilities question 11 continued (RFP Page 6)

outdoor conditions OSG utilizes the correct enclosures and depending on the situation will utilize additional heaters and blowers. OSG also utilizes surge protection to mitigate over and under voltages.

12. Describe the system's ability to operate in inclement weather and temperature conditions ranging from 0-105 degrees Fahrenheit.

For outdoor installations OSG would install the correct housing for the cameras. With a varying hi and low temperature OSG would also install with these cameras heaters and blowers.

13. Describe how the proposed solution will support the future use of video analytics.

Omnicast provides the ability to leverage video analytic capabilities offered by some IP video edge devices, by managing the events and alerts detected. Using Omnicast's event-to-action mechanism, the operator can create sophisticated rules to manage incidents received in Omnicast, such as generating alarms and sending email notifications. All events and alerts are also stored in the Omnicast system to facilitate video archive searches.

Omnicast supports the OV Ready protocol from ObjectVideo, Bosch IVA, Axis Camera tampering and cross line detection, Sony and Panasonic Edge Analytics.

For Server based analytics, Omnicast uses the Metadata Engine and SDK framework to integrate to third Party Video Analytic vendors IBM's advanced analytics S3, AgentVi, Sightlogix, VideoIQ, ObjectVideo, and more. The flexible architecture allows for easy integration with future analytics whether they are server or edge based. Genetec is always tracking the market leaders in the video analytics segment and will add support as new technologies emerge.

14. Describe the system's ability to operate during a power failure.

For the system to operate in the event of a power failure OSG would install a UPS. Most CCTV cameras can be powered three (AC, DC or POE). Depending on the way that the camera is powered would dictate how we would provide back up power. OSG would work with VT on deciding the amount of back up time required. OSG also would provide back up power to the head end.

E. Account Management (RFP Page 6)

1. Through expert consultation, the successful offeror must be able to assist the users of both new and existing camera systems with the design and implementation of the proposed system, so they may be in compliance with University Policy No. 5617 (Attachment D).

OSG understand this and VT main poc with OSG is Board Certified by the American Society of Industrial Security (ASIS) and is a Certified Protection Professional (CPP)

2. The successful offeror must be able to provide technical assistance to Information Technology and users regarding placement, type, connectivity and operation of cameras in both indoor and outdoor locations.

OSG core business is designing and providing large scale enterprise surveillance systems. OSG has assigned a board certified, Certified Protection Professional (CPP) to the VT account. This individual will aid VT in the assessment, design and implementation of the camera system. This individual has 16 years of video security experience. Backing this individual is the OSG team again whose core business is in large scale video systems.

3. As the pilot project for the enterprise solution, the successful offeror must design and implement the first installation of the full safety and security system for Virginia Tech Parking Services at the Perry Street Parking Deck immediately upon award.

OSG will perform this installation in the required time frame

E. Account Management (RFP Page 6)

4. Describe the upgrade path from the completion of the parking deck pilot project to deployment of other university locations.

Once the parking deck solution is completed and VT requests the upgrade of phase two. OSG will perform a site survey and identify the camera locations and types as well as their functionality. At that time OSG in conjunction with VT will make recommendations about simple fixes to the existing cameras. These simple fixes could include camera placement changes, lens changes for field of view potential addition of illuminators etc. OSG will then identify where the head end is and the functionality of that head end. Where VT requests to keep the legacy system intact OSG will leave it in place. OSG will however connect it to the new VT VMS by utilizing a video distribution card. The video distribution card will provide for one video input followed by two video outputs. One of these outputs will go to the existing legacy system the other will go to a non propriety video encoder. The video encoder will be connected to the VT network and go to the VT Video Management System (Genetec) and be stored onto the EMC / Isilon platform. We would scale the existing 18TB Isilon platform up to 42TB of additional storage. We allocated in phase one the use of 25 megapixel cameras hence the need for more storage in the first phase. We are assuming that the existing 250 cameras on campus are a standard resolution hence the 42TB (less per camera storage than phase 1). Phase 3 would be considered the addition of any new camera. OSG assumes that the majority of new cameras would be IP based. To move forward with phase 3 OSG would aid in the location and deployment of these cameras. OSG would work in conjunction with the VT to deploy the camera on the VT network.

5. Provide detailed warranty information for all equipment in the proposed solution.

Our proposal includes a full year parts and labor warranty on all OSG provided goods and services.

6. Describe the on-site support available to resolve a system failure.
Provide a detailed description of maintenance options available for the proposed solution.

OSG has in place 24/7 service dispatch and tracking via our website www.Orionsystemsgroup.com as the system scales from 25 to 250 to 2500 it would make sense for VT to contract OSG to provide a full time on site support engineer.

E. Account Management (RFP Page 6)

7. Provide a detailed description of the end user training included in the proposal to prepare Virginia Tech to use and administer the proposed solution, and to fully realize the utility of the proposed solution

Genetec Training Offerings:

OOT001 - Omnicast Operator Training

Not available as custom training

Length: ¼ day
Attendees: Dispatchers, Security Guards and Security Managers
Prerequisite(s): None

Upon successful completion of this course you will be able to

- Perform tasks associated with the Live Viewer application
- Perform tasks associated with the Archive Player application

OTC001 - Omnicast Technical Certification

Length: 2 days + 4-8 hours Online Prerequisite
Attendees: Technicians, Administrators, Project Managers and IT Professionals
Prerequisite(s): Online Training

Upon successful completion of this course you will be able to

- Discuss Ethernet/IP networking principles
- Identify various networking equipment types
- Discuss the Omnicast system architecture
- Identify and discuss various Omnicast system components
- Perform tasks associated with the Live Viewer application
- Perform tasks associated with the Archive Player application
- Perform tasks associated with the Config Tool application
- Create, configure and manage alarms
- Install Omnicast server software
- Install Omnicast client software
- Commission an Omnicast system
- Perform basic system troubleshooting

OTC002 - Omnicast Advanced Technical Certification

Length: 2 days
Attendees: Technicians, Administrators, Project Managers and IT Professionals
Prerequisite(s): OTC001

Upon successful completion of this course you will be able to

- Load balancing in a multiple server system
- Configure a system with failover directory
- Configure a system with failover archiving
- Configure a system with redundant archiving
- Configure a system with failover virtual matrix
- Configure a Federation server
- Configure a system with a Metadata engine
- Configure Metadata engine and its plugins
- Perform advanced system configurations
- Configure IIS web server to serve Omnicast Web Clients
- Create macros
- Perform advanced system troubleshooting

F. Cost (Page7)

1. Provide complete pricing information for an enterprise-wide safety and security camera system.

OSG has provide three itemized prices for VT

- 1.) *Phase 1 Parking Garage*
- 2.) *Phase 2 Existing Campus*
- 3.) *Phase 3 Future Campus expansion*

OSG is also allowing VT to procure the requested goods or future goods based off of our GSA schedule.

Cost plus option:

OSG is also proposing that we move forward utilizing a cost plus price structure. In this way OSG would act as a consultant as well as an integrator to VT. OSG would work in conjunction with VT on the best VMS, PSIM, Cameras storage, placement etc. OSG would provide cad drawing as well as work with facilities IT and security on providing an integrated solution. OSG would also identify and obtain vendors who could provide the needed work like conduit installation. VT could buy any of the identified goods and service from OSG or contract direct for those good and services with the vendors. If VT wanted to contract with OSG OSG would in turn offer our invoice (cost) to VT. OSG would mark this cost up based of a 25% mark up.

***Please see provided quotes on following pages**

2. Provide itemized pricing information that includes hardware, software, licensing, training and professional service, including maintenance and support

On the following pages OSG has provided itemized pricing to include hardware, software, licensing, training and professional service including maintenance and support.

Our rates are as follows:

<i>Tech Level 1</i>	<i>\$85</i>
<i>Tech Level 2</i>	<i>\$95</i>
<i>Engineer</i>	<i>\$115</i>
<i>Program manger</i>	<i>\$115</i>
<i>Consulting</i>	<i>\$125</i>
<i>CAD</i>	<i>\$75</i>
<i>Service tech</i>	<i>\$85</i>

Cost plus option:

OSG is also proposing that we move forward utilizing a cost plus price structure. In this way OSG would act as a consultant as well as an integrator to VT. OSG would work in conjunction with VT on the best VMS, PSIM, Cameras storage, placement etc. OSG would provide cad drawing as well as work with facilities IT and security on providing an integrated solution. OSG would also identify and obtain vendors who could provide the needed work like conduit installation. VT could buy any of the identified goods and service from OSG or contract direct for those good and services with the vendors. If VT wanted to contract with OSG OSG would in turn offer our invoice (cost) to VT. OSG would mark this cost up based of a 25% mark up.

***Please see provide quotes on following pages**

Overview of Pricing Preparation:

OSG has provided a simple, logical pricing methodology for this project. We have designed a Scalable Camera System with 3 Phases that allows migration from 25 to 250 to 2500 Cameras easily.

Phase 1 includes **25** 2MP Fixed IP Cameras for the Parking Deck with Headend Rack and 1 Client PC.

Phase 2 includes converting the existing **250** Analog Cameras on the VT Campus with IP Encoders and furnishing additional Headend Rack Equipment and 5 Client PC's. Pricing is predicated on 11 existing Camera Headend locations(using Cisco GB 24 port Layer 3 Switches) with 24 cameras each that will require interconnection by OSG and Network Connectivity by VT. Redundancy/Failover Remote is an Option.

Phase 3 includes **2500** New IP Cameras for the Entire Campus with furnishing additional Headend Rack Equipment . Additionally our platform is capable of integrating disparate systems to include Emergency Call, Intercoms, Fire Alarm, Email Notification, and Mass Notification while including Video Analytics, License Plate Recognition and other technologies. Redundancy/Failover Remote is Option. Estimate 105 – 24 Camera Locations.

Phase 1:

- 25 Arecont 2MP Day/Night Camera in Vandal Proof Dome with Heater –Pendant or wall mt
- 25 Camera Licenses
- 4 Locations with Small Enclosures/switch and UPS
- 1 70" Floor Rack with cooling to house:
 - 1 Dell Genetec PC Server with SW
 - 1 Dell 17" LCD Monitor
 - 1 UPS
 - 1 Cisco GB 24 Port Layer 3 Network Switch – Creating Private Security Network
 - 1 Isilon 3 Node Cluster with Flextronic IB Switch – Storage 18TB
- 1 Client PC with 42" LCD Monitor
- 1 First Year SW and Hardware Warranty and Maintenance Support
- 1 CAT6 Cabling
- 1 Surge Suppression for exposed Cameras

Phase 1 includes:

- Coordination with other trades and VT.
- Dedicated On-site Project Manager.
- Dedicated Engineering Team.
- Dedicated Installation Team.
- Training as required.
- 1 Year Warranty.

Assumptions and Exclusions:

- X-ray or Coring by others
- Network Connectivity by others
- Conduit and AC power/grounding not included. **We calculated approximately 5,000 feet of ¾” Conduit is required as well as 5 locations requiring AC Power and have not included this in our price as this can be procured at best pricing from local VT Electrical Contractor. (Suggest a \$20,000.00 allowance for this ROM)
- Traffic Control while work is ongoing is by others.
- See attached 4 page “Scope of this project” documentation for additional items

Phase 2:

- 250 Verint IP H.264 Encoders for existing Analog Fixed and PTZ Cameras
- 250 Camera Licenses
- 1 Email Notification/Camera Blocking/Remote Viewer SW
- 11 Locations with Lockable IDF Rack with Power Supply
- 11 Cisco GB 24 Port Layer 3 Network Switch

- 1 70” Floor Rack with cooling to house: (added to SEC Camera Headend Rm)
 - 1 Upgrade Dell Genetec PC Server and SW
 - 1 UPS upgraded for new equipment
 - 1 Isilon 5 Node Cluster with 1 Flextronic IB Switch – Storage 43TB

- 5 Client PC with 42” LCD Monitor
- 1 First Year SW and Hardware Warranty and Maintenance Support

Phase 2 includes:

- Coordination with other trades and VT.
- Dedicated On-site Project Manager.
- Dedicated Engineering Team.
- Dedicated Installation Team.
- Training as required.
- 1 Year Warranty.

Assumptions and Exclusions:

- X-ray or Coring by others
- Network Connectivity by others
- Conduit and AC power/grounding not included.
- Traffic Control while work is ongoing is by others.
- See attached 4 page "Scope of this project" documentation for additional items

Phase 3:

- 2500 Arecont IP MP Cameras – Fixed/PTZ/IR
- 2500 Camera Licenses
- 105 Locations with Lockable IDF Rack with Power Supply
- 105 Cisco GB 24 Port Layer 3 Network Switch

- 1 Add to existing Floor Rack in SEC room:
 - 1 Upgrade Dell Genetec PC Server and SW
 - 1 UPS upgraded for new equipment
 - 1 Isilon 7 Node Cluster with 2 Flextronic IB Switch – Storage 389 TB

- 5 Client PC with 42" LCD Monitor
- 1 First Year SW and Hardware Warranty and Maintenance Support

Assumptions and Exclusions:

- X-ray or Coring by others
- Network Connectivity by others
- Conduit and AC power/grounding not included
- Traffic Control while work is ongoing is by others.
- See attached 4 page "Scope of this project" documentation for additional items

All Phases include:

- Coordination with other trades and VT.
- Dedicated On-site Project Manager.
- Dedicated Engineering Team.
- Dedicated Installation Team.
- Training as required.
- 1 Year Warranty.

Scope of this Project

The goal of the project will be to install and deploy an enterprise- megapixel IP video surveillance system that will archive digital video streams and allow multi-user viewing of live and archived video. The introduction of IP-based, digital surveillance devices initiates the convergence of traditional physical security and IT solutions. This project will take advantage of industry-standard and emerging physical security and IS technologies to provide a robust and scalable system.

Software Included:

- Installation and configuration of one (1) instance of IP Isilon Storage software at the Virginia Tech site.
- Installation and configuration of one (1) instance of IP VMS Genetec software at the Virginia Tech site.

Services Included:

Experienced OSG personnel or authorized agents work with Virginia Tech personnel to deliver the engagement. Security and surveillance specialists will assist Virginia Tech in designing and implementing a scalable access control and megapixel VMS security solution that is built on a standards-based, open architecture optimized for low latency and real-time video surveillance that captures video into an appropriate storage environment. During this engagement, OSG will:

- Provide turnkey deployment services for the Parking Garage site.
- Project management for coordinating all aspects of the implementation.
- Determines the engagement process and schedule.
- Develops a high-level Project Plan with critical path events and milestones.
- Conducts a kick-off meeting to review project scope, expectations, communication plans, and availability of required resources.
- Gathers the information required for the engagement.
- Verifies that the environment meets all hardware and software requirements.
- Conducts an implementation review meeting.
 - Validates the site and prerequisites are completed prior to OSG activities.
 - Reviews the current organizational and operational information.
 - Reviews the existing process and procedural information.
 - Conduct site surveys for necessary Virginia Tech environment:
 - Documentation of existing network components and bandwidth capabilities
 - Documentation of new network infrastructure, storage infrastructure, and infrastructure placement
 - Detailed design and documentation of camera configuration, placement, and layout
 - Definition of video monitoring and archive policies, and event and/or motion trigger configurations where applicable for each camera
 - Documents the proposed architecture in the Configuration Guide including the Technical Project Description (TPD) and single-line drawings of the video system and reviews with Virginia Tech for approval.

- Develops the Test and Acceptance Plan and reviews with Virginia Tech for approval.
- Installation and configuration of wiring and infrastructure to support a Virginia Tech-provided dedicated, wired Local Area Network (LAN)/WAN and Fiber Backbone for video capture and management:
 - Installation of Cat6 cable runs to support the megapixel video management system.
 - Cat6 low voltage deployment will utilize Berktek/Ortronics or other Virginia Tech approved manufacturer.
 - All fasteners (anchors and screws) will be provided by OSG.
 - Installation of wiring without protective enclosures in concealed areas regardless of height including but not limited to wall cavities, ceiling cavities, closed raceways, plenum ceilings, and areas above dropped or acoustic tile ceilings
 - Any drilling or interior wall penetrations, other than “core drilling” or roof penetrations, required to complete cabling
- Installation and configuration of security cameras:
 - Installation of necessary power cabling to support new IP cameras and associated camera components
 - Assignment of static IP address to all cameras connected to the dedicated security LAN/WAN.
 - Positioning and focus of cameras on the appropriate field of view
 - Installation of variable-focus lenses on all cameras
 - Physical installation of new, outdoor megapixel IP cameras at predetermined locations
 - Configuration of the VMS software to archive and manage video content, and configure event triggers as necessary
 - Installation, configuration, and/or validation of up to five (5) on Virginia Tech-provided workstations for the viewing of live and archived video
- Thorough testing of the camera network and entire VMS infrastructure and application environment.
- Training on the VMS system will be provided by certified technicians.
- Provide applicable VMS product documentation as installed in the Virginia Tech environment.
- Conducts a site walk-through to execute the Test and Acceptance Plan.
- Completes and delivers the Test and Acceptance Plan to Virginia Tech for signature.
- Completes and delivers the Configuration Guide.
- Provides Virginia Tech documented steps to resolve problems identified during the “Burn-In” period.
- Conducts one (1) return visit to the site to resolve document problems.
- All cabling installed will be tested to ensure it will pass current cabling standards.

Out of Scope:

OSG is responsible for performing only the Services described in this SOW. All other services are considered outside the scope of this SOW. The following list of items is explicitly outside the scope of the SOW but does NOT represent all items that may be out of scope.

- Any application or host system access that encompasses coding, scripting, application analysis, system performance, and/or troubleshooting, or application logins outside of the tasks described in this Statement of Work.
- Any integration with or modification of host operating systems, applications, or databases not explicitly stated in this Statement of Work.
- Development of custom solutions, including scripting, not explicitly stated in this Statement of Work.
- Server, operating system, database, and/or application monitoring and/or tuning not explicitly stated in this Statement of Work. Please refer to separate attachment that provides the recording and management server specifications for the VMS platform.
- Any painting, patching, etc. required due to the installation process.
- Installation of a cable management system other than what is explicitly stated in this Statement of Work.
- Any core drilling, roof penetration or installation of electrical equipment rated higher than 24V. 110V electrical will be required at all IDF locations and should be tied into the emergency generator circuits.
- Design or installation of wiring or connections between noncontiguous structures.
- Deployment of a central video archive at another Virginia Tech facility.
- Implementation of infrastructure, software, and/or processes to migrate video archives to a central location.
- Logical data restructuring or data migration from existing video archives into the VMS video archive.
- Security consulting or risk assessment.
- Implementation of WAN communications infrastructure and components.
- Support of existing IP network (LAN or WAN) infrastructure and/or resolution of network connectivity issues.
- Resolution of SMTP and/or SNMP issues.
- Any configuration and/or changes to the existing command center viewing environment, if applicable.
- Providing power conversion and/or power supplies on exterior light poles, if applicable.
- Any trenching or underground placement of power or network cabling/wiring, if applicable.
- Network design, network infrastructure, or connectivity.
- Installation and configuration of LAN switches, other than those specified in this SOW, and associated optical GBIC(s).
- Termination of Virginia Tech provided fiber pairs.

- Connection of Virginia Tech provided fiber pairs to LAN switches.
- Validation that all camera locations are within necessary distance specifications for network wiring.
- Installation or configuration of video cards in Virginia Tech provided workstations. OSG recommends the use of nVidia Geforce 9800 video cards for viewing the megapixel camera images.
- Any preventive maintenance inspections prior to warranty close. OSG will provide a complete PM checklist that will be for the VMS system components.

Attachment C

Virginia Tech Security Questions for Technology-Based Procurements

If purchased, Virginia Tech reserves the right to conduct an IT security assessment on the product(s), system(s) and/or service(s) once delivered to validate the answers to the questions below.

If evaluation copies or instances are available for testing, they should be provided to the IT Security Office prior to purchase. Nicolas Pachis (npachis@vt.edu) or Randy Marchany (randy.marchany@vt.edu) may be contacted in the IT Security Office.

In the space following each question, please provide a Yes, No or a “no answer” (N/A), and add any appropriate comments. If the answer is No or N/A, please provide comments indicating how this question/concern is addressed elsewhere or why it is not applicable.

1. Does your product(s), system(s) and or service(s) protect against the SANS Top 20 security vulnerabilities <http://www.sans.org/top20?>

The SANS Top 20 is a broad list, Genetec Omnicast protects against the stated vulnerabilities that apply to the application.

2. Does your product(s), system(s) and or service(s) protect against the OWASP http://www.owasp.org/index.php/OWASP_Top_Ten_Project?

N/A - OWASP is primarily geared towards web based applications. Omnicast is not a web based application.

3. What specific encryption algorithms are employed for your product(s), system(s) and/or service(s)?

Omnicast uses the following algorithms and security measures:

- 128 bit SSL or HTTPS for command and control channel with cameras/encoders
- 248 bit RSA to encrypt and decrypt passwords

- **248 bit RSA key to digitally sign (watermark) video files**
- **Optional 128bit video export password for evidence access control**
- **IP filtering option to grant/deny system access by IP address range**
- **Support for IGMPv3 (Source Specific Multicast)**

4. Is all sensitive data (i.e. Social Security Numbers, Credit Card Numbers, Health Information, etc) encrypted in transit and at rest? If not, please explain? (NOTE: Please see the Sensitive Information page at <http://www.security.vt.edu/sensitiveinfo.html> for specifics).

N/A

5. Is login information such as user name and password encrypted during transmission from the client to the server? NOTE: Base-64 encoding is not acceptable.

Yes, 248 bit RSA is used to encrypt and decrypt passwords

6. Are operating systems (e.g. Windows or Linux), programming and scripting languages (e.g. Java or PHP), web servers (e.g. Apache or IIS), database servers (e.g.. Oracle or MySQL), application servers, etc. always promptly patched and current with security updates? If not, please explain.

Typically it's a best practice to update Omnicast Servers with the latest windows patches and security updates.

7. Is all access, including administrative accounts, controlled and logged (i.e. firewalls, file system permissions, ACLs, database table permissions, packet logs, etc.)? If not, please explain.

Omicast logs all user access and tracks what each user does within the VMS. Camera call up, video download, changes to system entities, ptz movements and more are all tracked in an audit log.

8. Does your product(s), system(s) and/or service(s) prevent the use of shared credentials or accounts including administrative accounts?

Yes, Omnicast allows the administrator to restrict how many concurrent logins can use the same user account which prevents multiple operators from using the same system account. Admin accounts do not have this restriction capability. Omnicast does allow the use of Supervised login which requires a supervisor level individual to also enter their credentials before a operator can log into the system.

9. Describe how your product(s), system(s) and/or service(s) authenticates and authorizes users?

Omnicast users authenticate to the Directory (Master Control/Management Server) via their designated gateway. If Active Directory integration is enabled the user will access the Omnicast software in a single sign-on mode that simply uses the windows credentials that the user has already entered into the workstation.

10. Does your product(s) and/or system(s) facilitate compliance with Federal and State laws, such as FERPA, HIPPA and PCI?

N/A

11. Does your company alert customers to vulnerabilities and security issues in a timely fashion? If so, please describe your process.

Genetec offers a technical assistance portal and mailing list used to inform customers of updates, bug fixes, and new features. If we are aware of a security risk inherent in our software we use the portal and portal mailing list to get word to customers.

REFERENCE AND PROJECT PROFILE #1

1. Project Name: District of Columbia Citywide ESS Maintenance and Sustainment
2. Project Locations: Washington, DC
3. Corrective Maintenance Period of Performance: Current (5-year contract)
4. OSG's Role: Deployment and sustainment of integrated security management systems for 70+ facilities throughout the District and preventative and corrective maintenance for each site. OSG's responsibility includes same-day service for critical system components.
5. Client Contact: Jeff Ryder – DRES/PSPD
6. Phone Number: (202) 698-8177
7. Supported Systems: IP Video Surveillance, Access Control, Intrusion Detection, Video Intercoms, Duress/Emergency Call, Optical Turnstiles, Security Operations Center
8. System Size:
 - > 2,000 Access Doors
 - > 800 Cameras
 - > 4,000 Alarm Points
 - > 100 Control Panels
9. Contract Value: \$1,000,000+
9. Description of Project:

OSG has served as the Enterprise deployment partner for the District of Columbia in the provision and installation of comprehensive electronic security management systems since 2009. OSG's role for these projects includes system design, installation, initialization, programming, testing, training, project management, and preventative and corrective maintenance of large-scale video surveillance and access control systems. OSG provides full-time support personnel to provide programming, administration, and maintenance services throughout the District.

OSG is responsible for the deployment and maintenance of the electronic security management systems for the Department of Real Estate Services (DRES) and the Protective Services Police Department (PSPD). Projects include the most high-profile and mission critical facilities in the District, including the Unified Communications Center, Evidence Warehouse, Consolidated Forensics Lab, etc. OSG has successfully deployed and maintained the following electronic security management systems for the State:

- Biometric and Smart Card Access Control and Electronic Locking Systems
- Analog, Standard IP, and Megapixel Video Surveillance Systems
- Aiphone Video Intercommunication Systems
- DMP Intrusion Detection Systems
- Integration to Facility Management System
- Security Command and Control Center

REFERENCE AND PROJECT PROFILE #2

1. Project Name: The Metropolitan Police Department – Headquarters and Substations
2. Project Location: The District of Columbia
3. Type of Project: Citywide Security Deployment - MPD Police and Detention Facilities
4. Period of Performance: 2009 – Current
5. OSG's Role: Deployment and sustainment of integrated security management systems throughout MPD's 1.5 million sq. ft. of space. OSG services for MPD include the deployment of CCTV systems for each of MPD's District Police and Detention Facilities, including 1D, 2D, 2D, 4D, 5D, 6D, 7D, and MPD Headquarters.
6. Client Contact: Sean MacCarthy – Director of Facilities
7. Phone Number: (202) 727-2092
8. System Size:
 - > 500 CCTV Cameras
 - > 15 Workstations
 - < 150 Card Access Doors
 - < 15 Control Panels
9. Contract Value: \$1,000,000+

9. Description of Project:

One of the ten largest local police agencies in the United States, the MPD is the primary law enforcement agency for the District of Columbia. In order to achieve its mission the MPD realizes the importance of establishing a secure and technologically advanced environment for its more than 4,400 members – including approximately 3,800 sworn police officers and more than 600 civilian employees. In 2009 MPD selected OSG to provide maintenance and sustainment services for existing MPD systems while beginning the process to migrate these disparate stand-alone systems spanning 1.5 million sq. ft. of space to an enterprise-class centralized security management architecture utilizing native IT enable components and infrastructure.

OSG has provided design, deployment, and life cycle maintenance services for a broad range of facilities in the MPD portfolio, including MPD Headquarters, MPD District Stations, Substations, and the new Evidence Warehouse. OSG has successfully deployed and maintained the following electronic security management systems

- Turnkey Migrations of Legacy Systems to the new Enterprise Architecture
- Smart Card Access Control and Electronic Locking Systems
- Pelco Analog Surveillance Systems
- Server-Based IP Video Surveillance/Megapixel Cameras
- Iphone Video Intercommunication Systems
- DMP Intrusion Detection Systems
- Duress Systems
- Command and Control Infrastructure

OSG's most recent project with MPD was for the turnkey implantation of the security management system for the new DC Evidence Warehouse facility. This facility featured an extensive megapixel camera system utilizing IP video management software and DC OCTO-approved server and storage infrastructure.

REFERENCE AND PROJECT PROFILE #3

10. Project Name: Commonwealth Office of Technology (COT)
11. Project Locations: Statewide (Kentucky)
12. Corrective Maintenance Period of Performance: 2007 – Current
13. OSG's Role: Deployment and sustainment of integrated security management systems for multiple facilities throughout the COT and preventative and corrective maintenance for each site. OSG's responsibility includes same-day service for critical system components.
14. Client Contact: John McKenzie – Practice Manager, Physical Security
15. Phone Number: (502) 419-0184
16. Supported Systems: Digital Video Surveillance, Access Control, Intrusion Detection, Video Intercommunication, Duress/Emergency Call, Security Operations Center
17. System Size:
- > 1,000 Cameras
 - > 15 Workstations
 - > 180 Card Access Doors
 - > 25 Control Panels
 - > 15 Facilities
18. Contract Value: \$1,000,000+

19. Description of Project:

OSG has served as the Enterprise deployment partner for the Commonwealth Office of Technology (COT) in the provision and installation of comprehensive electronic security management systems since 2007. OSG's role for these projects includes system design, installation, initialization, programming, testing, training, project management, and preventative and corrective maintenance.

OSG is responsible for the deployment and maintenance of the electronic security management systems for the Kentucky State Fairboard, which operates numerous facilities including the Kentucky Exposition Center. The Kentucky Exposition Center is one of the top 10 largest public facilities in the United States – a 400-acre property with more than one million square feet of indoor space. OSG's systems are also being used to provide security for the 721,000 sq. ft. Louisville Arena, the fifth largest college basketball complex in the nation. OSG has successfully deployed and maintained the following electronic security management systems for the State:

- Biometric and Smart Card Access Control and Electronic Locking Systems
- Analog, Standard IP, and Megapixel Video Surveillance Systems
- Aiphone Video Intercommunication Systems
- DMP Intrusion Detection Systems
- Integration to Facility Management System
- Security Command and Control Center

In addition to the initial design and deployment services, OSG supports the SAMS initiative through service agreements that include preventative maintenance, corrective maintenance, and software support agreements. The SAMS initiative includes service agreements that require same-day service for selected system components.

REFERENCE AND PROJECT PROFILE #4

1. Project Name: Surveillance Analysis and Management Solution (SAMS)
2. Project Location: National Capital Region
3. Corrective Maintenance Period of Performance: 2008 – Current
4. OSG's Role: Deployment and sustainment of integrated security management systems for multiple facilities throughout the National Capital Region and preventative and corrective maintenance for each site. OSG's responsibility includes same-day service for critical system components.
5. Client Contact: David Budd – Physical Security Partner Manager
6. Phone Number: 301-873-1108
7. Supported Systems: Digital Video Surveillance, Access Control, Intrusion Detection, Video Intercommunication, Duress/Emergency Call, Metadirectory Integration
8. System Size:
 - > 800 Cameras
 - > 15 Workstations
 - > 500 Card Access Doors
 - > 85 Control Panels
 - > 85 Facilities
9. Contract Value: \$3,000,000+

10. Description of Project:

In 2008 EMC selected OSG as their Enterprise deployment partner in the provision and installation of the Surveillance Analysis and Management Solution (SAMS) across multiple facilities throughout the National Capital Region. The SAMS initiative leverages an organizations IT infrastructure to bring comprehensive electronic security to a campus environments, providing a unified security platform that allows the organization to monitor and protect more assets while using fewer resources. OSG's role for these projects includes system design, installation, initialization, programming, testing, training, and preventative and corrective maintenance.

OSG has successfully deployed and maintained the following electronic security management systems in support of the SAMS initiative:

- Turnkey System Conversions of Siemens, Honeywell, ADT, and Stanley/Best Systems
- Smart Card Access Control and Electronic Locking Systems (AMAG and others)
- Pelco and Verint Analog and IP Video Surveillance Systems
- Aiphone Video Intercommunication Systems
- DMP Intrusion Detection Systems
- Code Blue Emergency Communication Systems
- Integration of SAMS database with Siemens DirX Metadirectory

In addition to the initial design and deployment services, OSG supports the SAMS initiative through service agreements that include preventative maintenance, corrective maintenance, and software support agreements. The SAMS initiative includes service agreements that require same-day service for selected system components.

Reference architecture overview

Document purpose

This document provides an overview of the EMC Virtual Infrastructure for Physical Security solution enabled by EMC® CLARiiON®, EMC Celerra®, VMware vSphere 4, ESX/ESXi 4.x, and Genetec Omnicast.

This document also includes configuration guidelines and resource specifications for the solution components and storage arrays. For detailed information regarding installation and implementation, please consult the Proven Solution Guide for EMC Virtual Infrastructure for Physical Security Enabled by EMC CLARiiON, VMware ESX/ESXi, and Genetec Omnicast.

Solution purpose

The purpose of this solution is to present a reference architecture that provides a platform for integrating legacy and state-of-the-art physical security and surveillance infrastructures, while using virtualization technology to:

- Increase resource utilization
- Decrease the number of servers and their associated costs
- Maximize server manageability

Using the EMC and Genetec integrated solution, a security team can view realtime video while also receiving policy-based and anomaly-based alerts generated from sophisticated software analysis of the data from remote locations and historical archives.

The business challenge

Private businesses and public entities have responded to rising concerns about theft, fraud, and terrorism by sharpening their focus on physical security and surveillance systems. These organizations face two key challenges:

- Managing and protecting their ever-growing volume of physical security information
- Maximizing the performance and utilization of their network and storage infrastructure

The ability to access the right data at the right time from anywhere is crucial to supporting physical security and surveillance needs. But comprehensive solutions may be hindered by:

- Proprietary software and closed hardware platforms
- Lack of archive management capabilities
- Data retrieval wait times or lost data
- Content authenticity

These limitations are amplified by the high expansion costs of legacy video surveillance systems based on CCTV, digital video recorders (DVRs) or networked video recorder (NVR) technologies; and non-integrated IT and physical security systems.

The technology solution

The EMC Virtual Infrastructure for Physical Security Enabled by EMC CLARiiON, VMware ESX/ESXi, and Genetec Omnicast solution provides the ability to control video surveillance and analyze security incidents in real time from anywhere, while monitoring and collecting evidence faster through realtime data and active archiving capabilities.

This solution integrates EMC and Genetec technology in a virtualized architecture to help meet the challenges of video surveillance information convergence and management.

Genetec Omnicast is an open video management platform; it can control and record cameras from most manufacturers on the market. With its scalable and flexible design it meets the expectations of the most demanding customers with many advanced features:

- High availability with built-in failover
- Alarm management with an escalation process
- Support for cameras and software-based video analytic
- Video Wall Integrations
- Advanced floor plans and GIS maps
- Multi-site deployments with the Federation feature
- Offsite cording and monitoring
- Indexing of video with metadata (point-of-sale, access control, and so on)
- Integration of CCTV equipment (matrix, CCTV keyboards)

The Genetec Archive application is compatible with RSA, The Security Division of EMC, and the SecurID Windows Authentication agent, providing multiple layers of secure access to the physical security infrastructure and authenticated tamper-proof video data for increased conviction rates.

The core storage architecture is based on enterprise-class EMC CLARiiON storage systems to cost-effectively scale the solution as security requirements grow, with industry-leading reliability, availability, scalability, and storage-based functionality.

To reduce the footprint of an Omnicast installation, the servers and recorder can be run on virtual machines using VMware vSphere 4, including the Omnicast Gateway server, Omnicast SQL server, Omnicast Directory server, and the Omnicast Archiver server.

Omnicast can take advantage of VMware's High Availability (HA) and Fault Tolerance (FT) features. When vSphere recognizes a failure HA will immediately boot up the same server to a different physical ESX/ESXi host. An FT failover will immediately switch the active server to a second server that has been "shadowing" the instruction execution or the primary.

HA provides:

- Immediate recovery for any Omnicast server

FT provides:

- Near zero downtime for any Omnicast server
- Near zero data loss (data loss is rare)
- Continuous availability

Note

FT is not recommended for Archiver servers (Failover Archivers should be used).

Cisco Unified Computing System (UCS) for vSphere 4 provides a high-performance environment for Genetec Omnicast servers. UCS is also suitable for FT and HA environments.

Key components

Digital video streams

Digital video streams over TCP/IP are captured by the Omnicast Archiver application and written to CLARiiON storage.

Note: Only the EMC E-Lab™ Interoperability Navigator SAN and DAS configurations are supported with the Genetec Omnicast application.

Omnicast Services

For Omnicast Services see the *EMC Storage for Physical Security - Enabled by EMC CLARiiON and Genetec Omnicast Reference Architecture*.

VMware vSphere 4

VMware vSphere 4 is the market-leading virtualization management tool for ESX/ESXi. vSphere 4 combined with ESX/ESXi 4.x turns your infrastructure into an efficient and flexible internal cloud, enabling you to:

- Decrease your capital and operating costs
 - Run a greener data center and reduce energy costs
 - Control your application service levels with advanced availability and security features
 - Streamline IT operations and improve flexibility
-

ESX/ESXi 4.x

ESX and ESXi 4.x both run the same hypervisor. The hypervisor provides a virtual hardware layer forming the basis for server virtualization.

The primary differences between ESX and ESXi 4.x is based on packaging. ESX loads with a running Linux 2.4 kernel. ESXi 4.x uses the Linux loader to install the hypervisor but does not provide the Linux 2.4 kernel.

Compatible vCenter 4.x technologies

Advanced vCenter features include:

vMotion

The capability to move a running virtual machine from one ESX/ESXi host to another.

Storage vMotion

The capability to move a running virtual machine from one storage device to another.

DRS

Dynamic Resource Scheduler – Provides automatic load balancing of an ESX/ESXi cluster using vMotion. DRS can dynamically load balance VM guests between the hosts in the vCenter cluster.

Automatic, dynamic load balancing may be set from conservative to aggressive, depending on how dynamic the movement of VM guests should be for the particular installation.

DRS can also be set for manual load balancing. In manual load-balancing mode, DRS will provide a list of recommendations and the vCenter operator will have the option to accept recommendations.

Key components

HA

High Availability – In case of a failure the virtual servers (guest) will automatically restart on another host in the cluster. HA works well for all servers.

FT

Fault Tolerance – Provides a zero downtime failover from the active virtual machine (guest) to a shadow virtual machine (guest) that has been running in lock-synch to the active. FT can protect only VM guests that have a single vCPU requirement.

Note: FT should not be used for Omnicast servers that have the Archiver service running.

Physical architecture

Cisco UCS

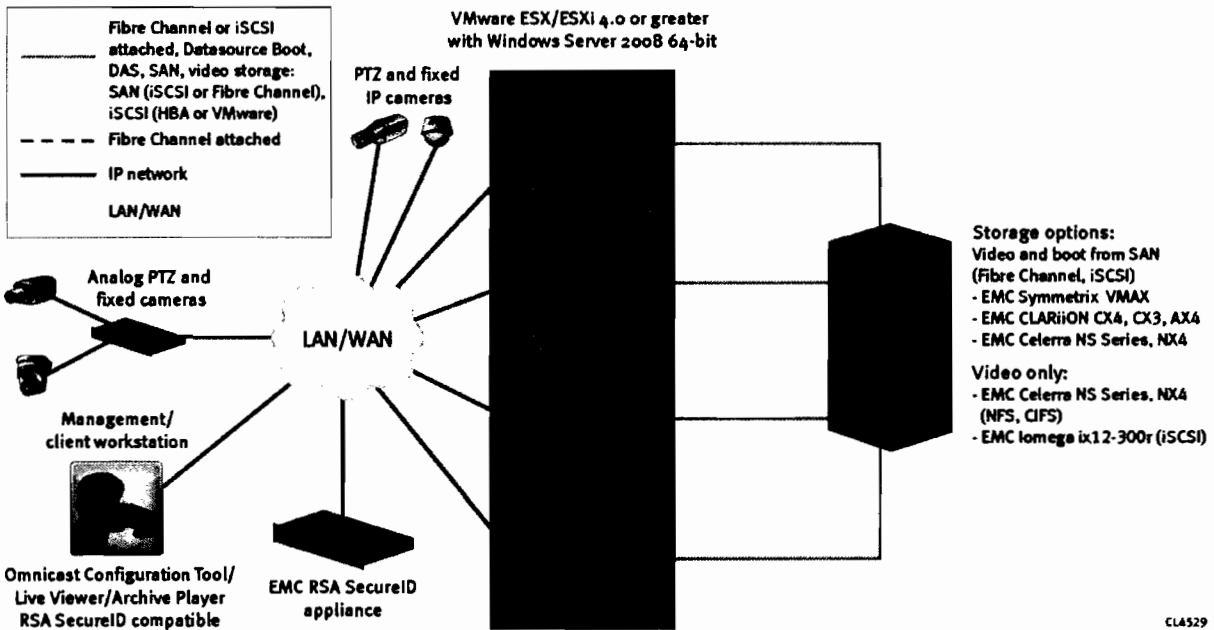

The Cisco UCS is an innovative architecture that integrates computing, networking, and virtualization in a single platform. All Genetec Omnicast servers perform extremely well when installed as ESX VMs on the UCS.

EMC Symmetrix VMAX™ storage, coupled with Cisco UCS and ESX/ESXi 4.0 or later, provides an excellent platform for the demanding installations.

Reference architecture diagram

The following illustration depicts the overall physical architecture of the solution.

See the *EMC Storage for Physical Security - Enabled by EMC CLARiION and Genetec Omnicast Reference Architecture* for information on Omnicast services placement between VM guests.

CL4529

**Virtualized
Omnicast
servers**

The reference architecture diagram illustrates the virtualization of Omnicast servers using VMware vSphere 4.

The virtualized infrastructure must use server and storage adapter hardware that is officially validated by VMware and EMC.

Because VMware FT relies on a single processor for all activity such as operating system functions, the Directory, SQL, and Gateway, each of these services should be placed on separate Windows Server 2008 64-bit operating systems. VMware FT provides a full nondisruptive transition for each service, providing no data is lost during failover in most cases. An FT failover is generally not noticeable by the client.

VMware HA allows a virtual machine to be automatically rebooted to a different ESX host in the vSphere cluster. HA may be used for any Omnicast service. HA is not dependent on the CPU having virtualization hardware assist (Intel VT and AMD-V). It may be used when FT is not available.

The database of supported hardware, including fault tolerance, for VMware can be found at:

<http://www.vmware.com/resources/compatibility/search.php>

Minimum virtualized configuration

Note All hardware (processors, Ethernet cards, FC cards, iSCSI cards, and so on) must be supported based on VMware's support matrix.

CPU In the following tables, the Minimum column assumes a system with the directory and Archiver on a single VMware guest. The Recommended Minimum column assumes a configuration with a directory server, and two archive server VMware guests. Both the minimum and recommended minimums include enough processing power for CPU-intense operations such as motion detection and inserting watermarks. The recommended minimum may allow room for minimal expansion.

Minimum	Recommended Minimum
Two 2 GHz cores <ul style="list-style-type: none"> One socket (quad-core) Two socket (dual-core) 	Eight 2 GHz cores <ul style="list-style-type: none"> Two quad-core sockets
<ul style="list-style-type: none"> Two vCPUs per VM guest running the Archiver service One vCPU for each guest running directory, vmatrix, and database services. This may be on a single VM guest up to three VM guests. One vCPU for VM guests running Fault Tolerance (FT) 	

Memory

Minimum	Recommended Minimum
12 GB	16 GB
<ul style="list-style-type: none"> 2 GB per VM guest plus 2 GB for ESX/ESXi Allow memory to expand 64-bit Windows Server 2008 may expand beyond 3 GB per VM guest VMware memory overloading will occur. This allows VM guests to share common pages of memory thus reducing total memory needs. 	

NIC Ports

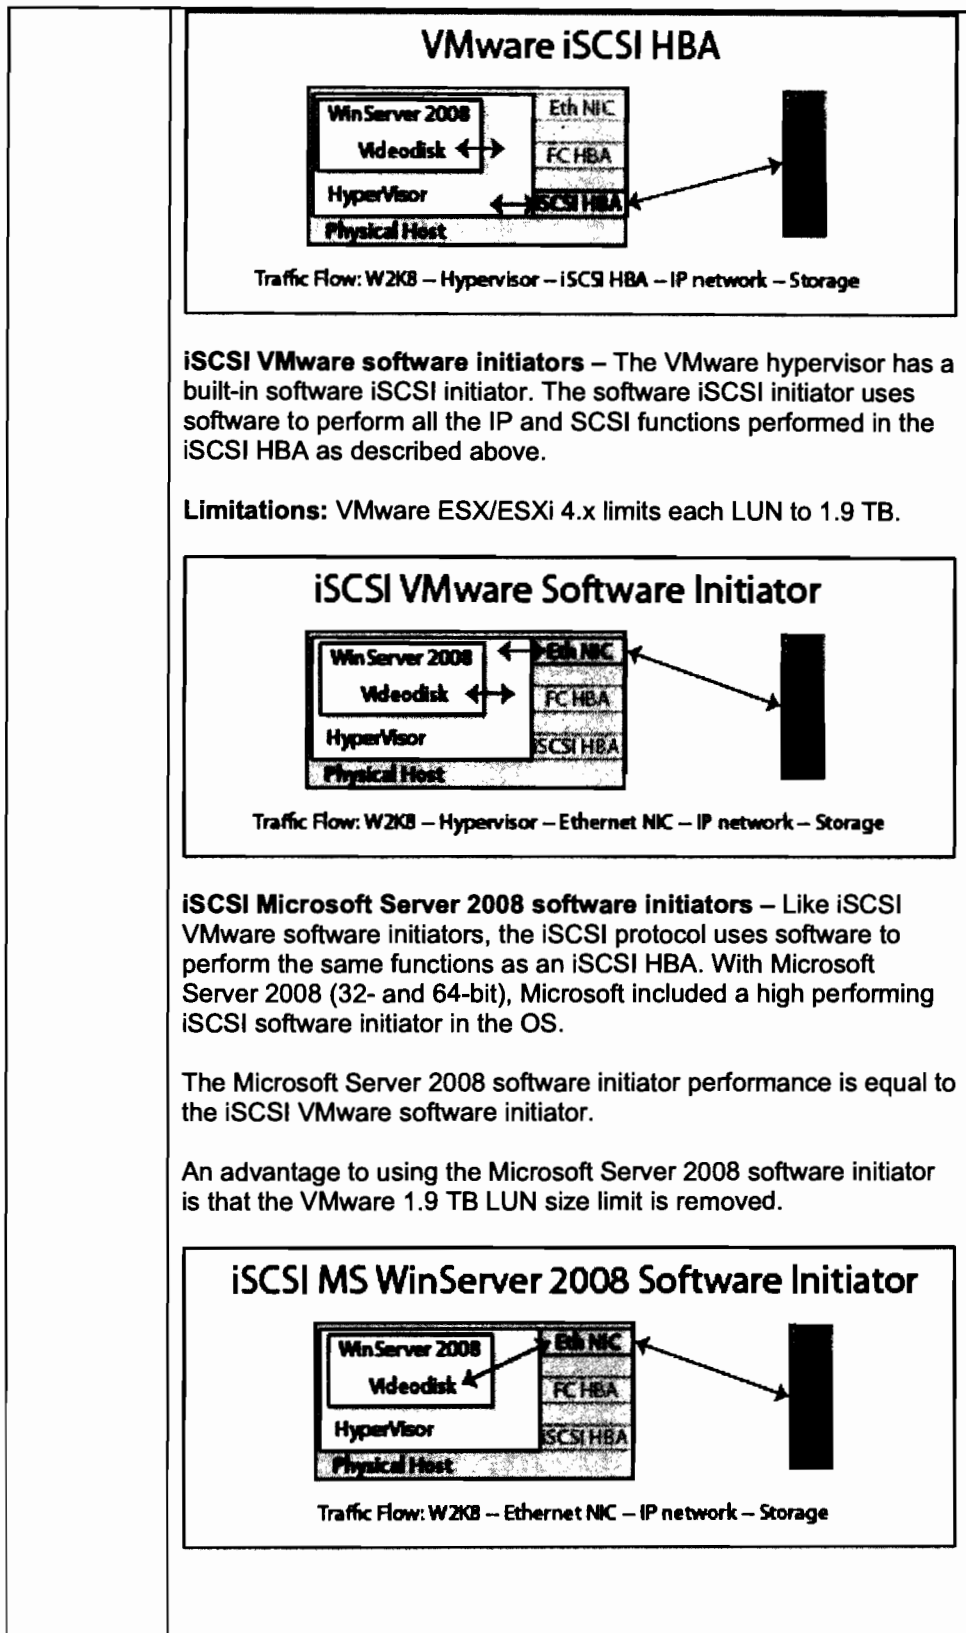

Note: In all cases the minimum number of physical NIC ports is two. VLANs may be used on 10 Gb/s NICs to achieve more virtual NIC ports. On a Cisco UCS, the 10 Gb/s ports can be broken many ports using the UCS management utility.
Note: Additional NICs may be required for other functions such as iSCSI.
Note: iSCSI NIC may be, through a dedicated NIC, assigned to the ESX/ESXi host or a NIC assigned to an iSCSI-dedicated vSwitch.

Minimum	Recommended Minimum
NIC1 <ul style="list-style-type: none"> vmconsole (ESX) VMKernel (ESX/ESXi) Management network 	NIC1 <ul style="list-style-type: none"> vmconsole (ESX) Management network
NIC2 <ul style="list-style-type: none"> User network 	NIC2 <ul style="list-style-type: none"> User network1
	NIC3 <ul style="list-style-type: none"> User network 2
	NIC4 <ul style="list-style-type: none"> VMKernel (vMotion) Management network backup
	NIC5 (only needed if FT is active) <ul style="list-style-type: none"> Fault Tolerance (FT)

Validated environment profile

**vCenter/
ESX/ESXi 4.x
storage
topology**

Topology	
<p>FC</p>	<p>Use only VMware- and EMC-approved Fibre Channel (FC) host bus adapter (HBA) cards.</p> <p>The storage area network (SAN) may be either Point-to-Point (FC-P2P) or switched fabric (FC-SW).</p> <p>FC-P2P would connect the storage array directly to a single ESX server. This is a valid solution if the storage array has enough FC ports to accommodate the number of ESX/ESXi hosts.</p> <p>Limitations: VMware ESX/ESXi 4.x limits each LUN to 1.9 TB.</p> <div data-bbox="602 772 1370 1073" style="border: 1px solid black; padding: 5px;"> <p style="text-align: center;">VMware FC HBA</p>  <p style="text-align: center;">Traffic Flow: W2K8 – Hypervisor – iSCSI HBA – IP network – Storage</p> </div>
<p>iSCSI</p>	<p>The EMC Physical Security lab has qualified three different implementations of iSCSI:</p> <ul style="list-style-type: none"> • iSCSI HBA • iSCSI VMware software initiators • iSCSI MS Windows Server 2008 software initiators <p>iSCSI (Internet Small Computer System interface) is an Internet Protocol (IP)-based storage network standard. iSCSI uses TCP/IP to allow two hosts to exchange SCSI commands/data.</p> <p>iSCSI is generally considered a SAN protocol, although some consider it a Network Area Storage (NAS) protocol. iSCSI may be considered a SAN/NAS hybrid.</p> <p>iSCSI HBA – The iSCSI HBA is the highest performing iSCSI topology. Because an iSCSI HBA configuration is on the HBA card, booting from an iSCSI-attached EMC storage array is possible.</p> <p>iSCSI HBA increases performance in two ways. First, the server writes to the HBA as if it were a SCSI device, leaving all the IP protocol to the HBA. Secondly, because the HBA is a single-purpose card it handles the iSCSI protocol more efficiently.</p> <p>Limitations: VMware ESX/ESXi 4.x limits each LUN to 1.9 TB.</p>

<p>NFS</p>	<p>Network File System (NFS) is an open standard protocol developed by Sun Microsystems in 1984. NFS allows hosts to access files over a network.</p> <p>NFS is a VMware hypervisor-supported network storage protocol. NFS datastores may be defined as a Windows Server 2008 VM. Genetec can use the datastore as if it is any other disk (for example, \\e:).</p> <p>An advantage to using NFS is that the VMware 1.9 TB LUN size limit is removed.</p> <p>Limitations: NFS is very sensitive to network latency. Ideally the NFS-attached disk array will be co-located within the same room, or connected to the same Ethernet switch as the Genetec Archiver.</p> <p>Note: In most cases it is better to use iSCSI in place of NFS.</p> <div data-bbox="600 819 1372 1123" style="border: 1px solid black; padding: 10px; text-align: center;"> <p>VMware NFS</p> <p>Traffic Flow: W2KB – Hypervisor – Ethernet NIC – IP network – Storage</p> </div>
<p>CIFS</p>	<p>Common Internet File System (CIFS) is use as a shared file access method as well as for communicating to printers, serial, and other miscellaneous objects.</p> <p>Limitations: CIFS is very sensitive to network latency. Ideally the CIFS-attached disk array will be co-located within the same room, or connected to the same Ethernet switch as the Genetec Archiver.</p> <p>Note: In most cases it is better to use iSCSI in place of CIFS.</p> <div data-bbox="600 1459 1372 1766" style="border: 1px solid black; padding: 10px; text-align: center;"> <p>VMware CIFS</p> <p>Traffic Flow: W2KB – Ethernet NIC – IP network – Storage</p> </div>

Profile characteristics The solution was validated with the following environment profile.

Profile characteristic	Value
Omnicast application software	The EMC Physical Security lab used Windows Server 2008 64-bit. ESXi 4.0 was used on the Dell servers and ESX 4.0 used on the Cisco UCS.
Storage topology	SAN, NAS iSCSI, and VMware NFS datastores
Bandwidth per archiver	For the EMC Physical Security Lab's LUN throughput test results see the Storage Throughput table in <i>Genetec Configuration Guidelines for EMC CLARiiON Technical Note</i> .

EMC minimum requirements for Genetec on ESX 4.0 or later

Compatible hardware can be found at:

<http://www.vmware.com/resources/compatibility/search.php>

Processor minimum during EMC Physical Security lab tests:

- Quad-core 2 GHz minimum

VMware Fault Tolerance requirements:

- FT requires CPUs to have the virtualization hardware assist feature. Acceptable processors include those with the Intel VT or AMD-V feature sets.

Memory minimums:

- 2 GB per Genetec virtual machine

Storage adapter

- All storage adapters must be VMware certified.
- Fibre Channel adapters must be VMware and EMC certified.

Storage

- Data store
 - Direct attached or SAN devices with unpartitioned space
 - A minimum of 80 GB per VM is required
- Video storage
 - SAN devices with unpartitioned space (that is, VMware RAW attach)
 - FC or iSCSI
 - NAS-attached datastores

Software resources

Software resources

Software The following table lists the software used to validate the solution.

Software	Version	Configuration
VMware ESX/ESXi 4.0	Update 1	As described in the "Virtual hardware requirements" section.
Windows Server 2008 64-bit		Operating system for Omnicast servers and workstation(s)
Genetec Omnicast	4.4 and 4.6	Windows 2008 64-bit
EMC PowerPath®/VE	Latest GA version	Installed on ESX/ESXi 4.0

Virtual hardware requirements

The following table lists the virtualized hardware requirements for the solution.

Virtual element	Description
vCPU	<ul style="list-style-type: none">• Two vCPUs per virtualized Omnicast Archiver• One vCPU for non-Archiver VM guests requiring FT
Memory	<ul style="list-style-type: none">• 2 GB allocated per virtualized Omnicast server• Memory allowed to expand

Conclusion

Conclusion

Summary

The EMC Virtual Infrastructure for Physical Security Enabled by EMC CLARiiON, VMware ESX/ESXi, and Genetec Omnicast represents an ideal solution for surveillance management and IT infrastructure, incorporating virtualization technology that allows increased system performance and maximizes resource utilization.

The solution provides a flexible and highly scalable virtualized infrastructure meeting a broad range of today's demanding physical security requirements. By leveraging the best-in-breed surveillance management software from Genetec and advanced IT infrastructure components from EMC and VMware, customers can maximize the return on investment in these crucial platforms, while optimizing the use of their system infrastructure.

In addition, the solution provides seamless integration with new and legacy infrastructures reducing the total number of physical servers, reducing greenhouse gasses, and more effectively utilizing a physical server's processing capabilities. EMC storage-based functionality also allows customers to nondisruptively back up their primary servers while the system remains online and available to users. As requirements change and become more sophisticated, customers can be assured that the EMC Physical Security Solution's flexibility and modular architecture can be designed to meet their needs.

Next steps

EMC can help to accelerate assessment, design, implementation, and management while lowering the implementation risks and costs of a physical security solution for a VMware environment.

To learn more about this and other solutions contact an EMC representative or visit www.emc.com/solutions/business-need/information-security/physical-security.htm.

Certified: Camera model has been tested and validated by Genetec

Supported by design: Camera model shares the same API of an existing certified camera, but has not been tested or validated by Genetec

Tested by partner: Camera model has been tested by the partner

Director, Department of Criminal Justice Services

Attachment C
to
Commonwealth of Virginia Standard Contract UCP-TS-C05-11
Results of Negotiation

1. What period of hardware support comes with the EMC Isilon cluster and Cisco switches?

a. What are ongoing recurring costs after the warranty period?

OSG Response: Our proposal includes one-year of Gold Hardware and Software Support. This support package includes 24x7x365 hardware and software phone support, software upgrades and next-day advance parts shipment. The post warranty costs for additional years of Gold Support are detailed below in Response 2b.

2. What is included in the 1 year Isilon Software support price?

a. Why so much? 41% of purchase price?

OSG Response: The initial purchase contains heavy, one-time discounting on hardware and software extended by Isilon to Virginia Tech. The discounting on hardware and software makes the support pricing as a percentage of the total cost appear larger than it will be on future purchases. OSG has extended an additional 1% off Virginia State Contract pricing contract

b. What about years two and three?

OSG Response: A single year extension (Year 2) of support is \$7,415. Two additional years of support (Year 2 and Year 3) purchased at the same time is \$13,433.00.

3. What other modules are available from Genetec? How can these be purchased/added on?

OSG Response: The product, Security Center, is modular in nature enabling clients to add, Synergis Access Control, Autovue License Plate Recognition, as well as Omnicast which is the Video element included in OSG's proposal. Each module can be added and managed by one common interface.

In addition, Genetec presents several options which can be added as "plug-in" items. We have attached a list of plug-ins for review. Pricing for all options will be at 1% below the Genetec published GSA pricing referenced in response to Question 10. These modules are added to the existing software license and provide functionality such as email notification, Active Directory integration, analytics, options for centralized management of the enterprise "Federation", and failover capabilities. Each element can be added on independent of other options.

a. Can these be added on by camera, camera location/multiple cameras in a logical grouping, enterprise wide?

OSG Response: That answer is dependent upon the options chosen. Some options are per camera (i.e. Federation, Auxiliary Recording, and Failover), while some options are Enterprise-wide (Active Directory), while others can be applied by location or camera "groups".

4. Is the per camera license from Genetec a one-time cost or an annual cost?

OSG Response: The camera license is a one-time cost and is a permanent license, issued by IP address.

a. How does this cost relate to the SSA and Basic SMA annual costs? What are each of these costs cover.

OSG Response: The Basic SMA annual cost is 18% of the total MSRP cost of the software installed at the site. Discounts are available for multiyear purchases. See attached explanation of Genetec Support pricing.

b. What do these costs entitle us to in the way of support?

OSG Response: Please see the attached explanation of Genetec Support pricing for complete benefits.

5. How can licensing and maintenance costs be broken down? By camera? By camera location/multiple cameras in a logical grouping? Enterprise-wide?

OSG Response: SMA is a System-based agreement tied to the System ID. The System (and its ID) can be defined as an enterprise wide agreement, or in a FEDERATION model, divided into and identified by each sub-system resulting in each sub-system having its own SMA agreement.

We'd like to establish a minimum standard for the enterprise, but allow units to expand coverage if they so desire.

OSG Response: The enterprise could choose a "FEDERATION" architecture model. This would permit individual systems (departments) to manage their own SMA, but still be centrally managed by the enterprise. The enterprise could then establish the minimum standard, and allow individual locations can expand coverage.

6. Can more than one project be deployed simultaneously?

OSG Response: Yes. Orion Systems Group is staffed and has management practices established to efficiently deploy multiple projects simultaneously. In addition, the technology being deployed is capable of rapid and concurrent expansion.

7. How soon after contract award can you begin providing services?

OSG Response: With an anticipated award date of 4/18, Orion Systems Group could be onsite on 4/19.

8. Please describe your billing capabilities. Answer: Orion Systems Group has a full time billing and Accounts receivable department

Is it possible to track projects at the university by sub-accounts, in addition to an enterprise-wide master account? Can subsequent additions and maintenance costs be tracked and billed separately?

OSG Response: OSG has a fully staffed accounting department capable of tracking projects at the University through enterprise-wide master accounts. Master accounts can also have an unlimited number of sub accounts or defined projects. Additionally, maintenance costs can be tracked and billed separately by department or account.

9. In "Isilon Systems Terms of License/Sale and Warranty" Limited Warranty" heading, "Restrictions" sub-headings, it states, "The foregoing limited warranties extend only to the original Customer (and not to any subsequent purchasers or third parties)..." Is Virginia Tech the original customer so we will be purchasing this hardware and software directly from Isilon?

OSG Response: For warranty purposes, Virginia Tech would be considered as the original purchaser.

10. We reviewed your GSA schedule and saw that it did include the camera system that you specified, but did not find the Genetec Software. As we indicated earlier, Virginia Tech is precluded by law from entering into a cost plus contract. Please provide a detailed price list of items and options that we may want to purchase as we build out our video surveillance infrastructure to include all applicable eVA system transaction fees. As we are anticipating a three year contract with options to renew, we would like pricing that we can plan on for at least the three year term. Please provide your best and final pricing. Final design and purchases for the parking garage will be accomplished after a final consultation after contract award so the submitted price list should at a minimum include all hardware, software and services that will be incorporated into that project.

OSG Response: OSG has identified pre-negotiated, published pricing for the products and services required to deliver Phase 1, Phase 2 and Phase 3 of the project. We are extending to Virginia Tech a discount off each of the published price books as follows:

Anixter, Virginia State Contract UVA898734 (Ref. NY State Contract PT64432 & PT63201)..	-1%

11. The Warranty information that you provided about Genetec does include a description of what is included in Basic SMA. It does not appear to include reference to “Genetec SW 1st year SSA” that is included in your original quote. Please explain what this is for.

OSG Response: Please deduct 1 x GSC-VIRT (-\$1,607.00). This is a Virtualization feature that is not required. The Software Support SMA-BASIC-1Y is Included in Phase 1 Cost SMA-Basic-1Y.

12. Moving forward, please provide us with a description of how subsequent projects will be initiated, specified and quoted. No university funds can be expended prior to the issuance of a purchase order so this process must provide for that requirement.

OSG Response: Subsequent projects will be identified by Virginia Tech personnel and contact with OSG initiated by Virginia Tech personnel. OSG will meet with Virginia Tech personnel, perform a site survey, develop a solution, and develop itemized project pricing from the four published pricing schedules that OSG has provided with this response. Upon acceptance of the design, scope and pricing, Virginia Tech will have the option to start the deployment of the project by issuing a PO to OSG.

13. Please comment on your willingness to register and participate in the eVA internet procurement solution described in the terms and conditions of the RFP.

OSG Response: Orion Systems Group is currently registered with eVA and will utilize eVA for procurements in accordance with the terms and conditions of the RFP.

14. Upon completion of the initial contract period, does Orion System Group agree that the contract may be renewed by Virginia Tech upon written agreement of both parties for up to five (5) one year periods, under the terms of the current contact?

OSG Response: Yes.

15. Will you be able to handle increased volumes of business and/or provide service to additional departments during the course of the contract?

OSG Response: Yes. OSG performs work throughout the United States and is prepared to provide the resources necessary to provide exceptional service and response to Virginia Tech’s needs throughout the term of our contract.

16. Do you acknowledge, agree and understand that Virginia Tech cannot guarantee a minimum amount of business if a contract is awarded to your company?

OSG Response: Yes.

17. Does the vendor acknowledge, agree, and understand that the terms and conditions of the RFP # 0016531 shall govern the contract if a contract is awarded to your company?

OSG Response: Yes.

18. For purposes of interacting with HokieMart, please identify the person (name, phone number, email address, etc.) in your company that will serve as liaison for a) e-commerce, b) accounts receivable, c) emergency orders.

703-691-1530 x111

Emergency Service Calls can be places 24/7 via our home page www.orionsystemsgroup.com simply click *SERVICE REQUEST* or by calling our 24/7 help desk (Virginia Tech toll free help desk number issued at contract).

19. Please provide applicable detail price listing noted in your response to questions 10 above for inclusion in a separate contract attachment. (See UCP- TS-C05-11, Attachment D.) Do you agree to the following with regards to price escalations/deescalations:

Price adjustments may be permitted only for changes in the Orion Systems Group's cost of materials not to exceed the increase reflected in the Contract's noted in Orion Systems Group's response to question 10 above. No price increases will be authorized for 60 calendar days after the effective date of the contract. Price escalation may be permitted only at the end of this period and each 60 days thereafter and only where verified to the satisfaction of the Virginia Tech Information Technology Acquisitions Department. However, "across the board" price decreases are subject to implementation at any time and shall be immediately conveyed to Virginia Tech.

Orion Systems Group shall give not less than 30 days advance notice of any price increase to the Virginia Tech Information Technology Acquisitions Department. Any approved price changes will be effective only at the beginning of the calendar month following the end of the full 30 day notification period. Orion Systems Group shall document the amount and proposed effective date of any general change in the price of materials. Documentation shall be supplied with Orion Systems Group's request for increase which will: (1) verify that the requested price increase is general in scope and not applicable just to Virginia Tech; and (2) verify the amount or percentage of increase which is being passed on to Orion Systems Group by Orion Systems Group's suppliers.

The Virginia Tech Information Technology Acquisitions Department will notify Orion Systems Group in writing of the effective date of any increase which it approves. However, Orion Systems Group shall fill all purchase orders received prior to the effective date of the price adjustment at the old contract prices. Orion Systems Group is further advised that decreases which affect the cost of materials are required to be communicated immediately to the Virginia Tech Information Technology Acquisitions Department.

OSG Response: Yes.

20. Most of your GSA schedule has labor rates that are higher than those quoted in your original proposal, even after the discount:

In your original proposal Professional Services were offered as follows:

OSG Project Manager	\$115 per hour
OSG Installer	\$ 85 per hour
OSG CAD	\$70 per hour
OSG Engineer	\$115 per hour

In your GSA Contract your professional services, after our 1% discount are:

OSG Project Manager	\$131.45
OSG Technician/Labor	\$88.24
OSG CAD	\$112.14
OSG Engineer	\$109.39

Which rates are applicable?

OSG Response: Please use the lower of the prices for the contract.

GSA Awarded Pricelist- LABOR CATEGORIES
GS-07F-0525W

SIN	Labor Category	Labor Category Description	GSA Awarded Price w/ IFF
246-50,52, 246-60-1, 2, 3	CAD Technician	<p>Description: Performs complex and non-routine drafting assignments that require the application of industry standard drafting techniques. Supervises and performs layouts, drawings and designs to specifications using Computer Aided Design (CAD) software. Review drawings and supporting documents to verify specific dimensioning, tolerances and adherence to organization or industry standard practices. Investigate and procure all data required to develop a design. Operate with some latitude for independent decision-making.</p> <p>Experience: Seven years of experience in preparing specifications and drawings using AutoCAD or Micro station and related engineering design software. Experienced in proper use of printers, plotters, and other peripheral devices. Proficient in engineering design software quality assurance standards.</p> <p>Functional Responsibility: Creates original CAD drawings from sketches or redlined design or arrangement drawings and/or specifications.</p> <p>Professional Qualifications/Skills: Associates degree in a related discipline or completion of a certified CAD training program; or high school diploma plus six years of experience as an AutoCAD or Micro station operator creating engineering and technical drawings.</p>	\$113.27
246-50,52, 246-60-1, 2, 3	Field Engineer	<p>Description: Performs engineering work in the development and design of products and systems. Organizes, directs, and conducts technical efforts in systems design, engineering, and integration. Prepares technical project plans and schedules. Conducts system test, and analyzes and quantifies test data. Prepares design documents and technical reports.</p> <p>Experience: College or university graduate with 1-3 years of work experience.</p> <p>Functional Responsibility: Provides input for engineering management plans, monitors schedule execution; assists in the preparation of status reports; and provides technical contributions to hardware and software engineers for development of engineering designs and documentation.</p> <p>Professional Qualifications/Skills: Bachelors degree a technical, engineering or business discipline or equivalent work experience. Six years experience in related technical discipline.</p>	\$110.49

SIN	Labor Category	Labor Category Description	GSA Awarded Price w/ IFF
246-50,52, 246-60-1, 2, 3	Project Manager	<p>Description: Works independently to provide support to client facility-wide security systems. Plans and directs highly technical projects involving detailed analysis, alternative solutions, designs of technical and business solutions. Provides direction for subordinates to achieve levels of performance to meet contract goals. Works in concert with the direction of the program manager and government Contract Officer Representative (COR) and management. Tests and sets up all related video equipment such as codex units, sound systems, graphics cameras, and commercial interfaces. Secures services for events that use technology not in the client inventory. Provides customer assistance, planning for additional services, training, and assistance in verifying vendor charges, accurate inventories of all telecommunications equipment. The Project Manager is responsible for the overall management of specific task orders and solution of problems in a timely manner.</p> <p>Experience: Six years of experience (three with an advanced degree) in analyst positions involving any of the following areas, as appropriate: program/project strategic planning, acquisition program policies/procedures and documentation, program/project planning and management, program execution and coordination, program budget/POM analysis and development, and life cycle planning. Experience also may include analysis of contractor performance, development of top-level program processes, e-commerce/e-business initiatives, life cycle costing and design to ownership objectives, economic business case analysis, and privatization studies. Experience will also include Computer-Aided Management applications.</p> <p>Functional Responsibility: As part of a task team provides program/project planning, management/execution and analysis services, and the associated preparation of program/project management and acquisition support products. Performs analysis of program goals, mission objectives, and schedule and cost performance. Identifies program/project problem areas and provides recommendations for resolution action. Performs analysis and studies in such areas as life cycle costing, design to ownership, economic business case prerequisites, and privatization. Develops work breakdown structures, management plans, and content for acquisition packages.</p> <p>Professional Qualifications/Skills: Bachelors degree in engineering related disciplines or equivalent work experience and eight years of experience in management of complex business and technical project including information resources management. Four years managing or supervising engineering projects.</p>	\$132.77

SIN	Labor Category	Labor Category Description	GSA Awarded Price w/ IFF
246-50,52, 246-60-1, 2, 3	Technician/ Laborer	<p>Description: Maintains and supports operational security/facility management electronic systems with limited direction. Performs routine support to construction and systems integration activities. Works from schematics, logic diagrams, written and verbal descriptions, layouts or defend plans. Assist in the testing troubleshooting, aligning and adjusting of complete electronic and computer systems, equipment, or components. Implements system testing and preventive maintenance program. Solves complex electronic problems with limited direction. Assists with the design, planning, installation, implementation, and operation of facility and security alarm systems.</p> <p>Experience: Four years of experience in assembling/ manufacturing, installing, operating and/or maintaining electronic, electro-mechanical, and/or mechanical systems, subsystems and components along with associated software and data/communication networks. Experience includes training on test equipment and diagnostics. Demonstrated ability to work independently, supervise other technicians, and function as a task leader.</p> <p>Functional Responsibility: Works under general supervision to assemble/manufacture, install, operate, maintain or repair highly complex mechanical, electronic or integrated systems. Applies working technical knowledge to perform routine or complex tasks in maintaining and repairing equipment. Performs activities such as manufacturing and assembling components, wiring circuits, and taking test measurements. Performs preventive and corrective maintenance. Performs test/calibration procedures, observes results, and records information for evaluation.</p> <p>Professional Qualifications/Skills: High school diploma or equivalent. Technical or military trade school. One year of experience.</p>	\$89.13

Includes required USB cables inter-connect	EA		\$1,149.00	6.0%	\$1,080.06
Axis Comm	5020-101	Professional joystick for accurate control of Axis pan/tilt/zoom and dome network cameras. Connects to the workstation over USB. Features a three-axis joystick with X/Y-axis for positioning and turning knob for zoom and 6 push-buttons. Includes a 2 meter	EA		\$399.00	6.0%	\$375.06
Axis Comm	5020-201	Professional 22 button keypad for quick navigation between workspaces, camera views and PTZ. Connects to the workstation over USB. Includes a 2 meter USB cable for connection to the workstation. AXIS T8312 Keypad is supported in ACS ver. 3.3 or later.	EA		\$449.00	6.0%	\$422.06
Axis Comm	5020-301	Professional video surveillance jog dial for high precision playback, facilitating functions such as play, pause, index, image steps and fast search. 6 built-in push buttons additionally simplifies video forensics. AXIS T8313 Jog Dial is supported in ACS	EA		\$399.00	6.0%	\$375.06
Axis Comm	5022-211	Metal stand for wall or hard ceiling mount. Compatible with all standard tripod thread cameras e.g. AXIS Q17/19 series and AXIS P13 series.	EA		\$29.00	6.0%	\$27.26
Axis Comm	5500-051	CS mount Varifocal 3-8 mm DC-Iris, for AXIS 211	EA		\$99.00	6.0%	\$93.06
Axis Comm	5500-061	CS mount Varifocal 3-8mm DC-Iris, for AXIS 221	EA		\$125.00	6.0%	\$117.50
Axis Comm	5500-071	Allows you to mount the AXIS 213 PTZ Network Camera on a wall, or other vertical surface.	EA		\$49.00	6.0%	\$46.06
Axis Comm	5500-081	ACC Extension Cable for PS-K products. 210, 211, 241S/Q.	EA		\$11.00	6.0%	\$10.34
Axis Comm	5500-131	Black plastic stand for AXIS 210 and AXIS 211 Network Cameras	EA		\$14.00	6.0%	\$13.16
Axis Comm	5500-141	1.8M extension Cable for PS-H and PS-L products	EA		\$7.00	6.0%	\$6.58
Axis Comm	5500-161	CS mount 4mm for 210/210A, new lens. RoHS Compatible	EA		\$49.00	6.0%	\$46.06
Axis Comm	5500-191	Clear plastic dome for AXIS 231D+/232D+ Network Dome Camera.	EA		\$28.00	6.0%	\$26.32
Axis Comm	5500-201	Smoked plastic dome for AXIS 231D+/232D+ Network Dome Camera.	EA		\$28.00	6.0%	\$26.32
Axis Comm	5500-211	Main adapter, AXIS 214, spare-part	EA		\$39.00	6.0%	\$36.66
Axis Comm	5500-231	Power supply PS-K for AXIS 211/A, 241Q/S/SA/QA, 243SA. Multi-country version for US/JP, AUS, KOR, ARG, EUR and UK	EA		\$39.00	6.0%	\$36.66
Axis Comm	5500-251	Mains adapter for IR-illuminators, spare part. (PS-S)	EA		\$39.00	6.0%	\$36.66
Axis Comm	5500-271	AXIS 212 plastic wall bracket as spare part	EA		\$19.00	6.0%	\$17.86
Axis Comm	5500-291	CS mount Varifocal 5-50 mm DC-Iris for AXIS P1343 and AXIS 211/221	EA		\$169.00	6.0%	\$158.86
Axis Comm	5500-301	Replaceable cover for AXIS 209FD-R, 10 pcs. Includes dry bags	EA		\$249.00	6.0%	\$234.06
Axis Comm	5500-311	External antenna for AXIS 211W. Includes 3 m cable.	EA		\$129.00	6.0%	\$121.26
Axis Comm	5500-321	Lightning protector for AXIS 211W when used outdoors with external antenna	EA		\$89.00	6.0%	\$83.66
Axis Comm	5500-331	Power supply PS-H for 207W and AXIS 207MW, AXIS 212 PTZ and AXIS 216FD series. Multi-country version for US/JP, AUS, KOR, EUR and UK	EA		\$39.00	6.0%	\$36.66
Axis Comm	5500-351	10m extension multi-cable between AXIS 247S and the analog camera and microphone. 6-pin mini-DIN to RCA (video in), RCA (audio in) and Mini DC Jack (power out). Includes RCA to BNC adapter.	EA		\$59.00	6.0%	\$55.46
Axis Comm	5500-441	4 pack of BNC to RCA adaptors. Replaces 19403 and 19404.	EA		\$19.00	6.0%	\$17.86
Axis Comm	5500-471	AXIS 233D mounting bracket for Video Alarm and Video Techs outdoor housing that are designed for AXIS 231/232D	EA		\$39.00	6.0%	\$36.66
Axis Comm	5500-501	Super wide angle conversion lens for AXIS Q1755. Converts AXIS Q1755 lens to 2.55 -25.5mm.	EA		\$219.00	6.0%	\$205.86

Axis Comm	5500-511	Super telephoto conversion lens for AXIS Q1755, 2.2X. Converts AXIS Q1755 lens to 102mm. For use in full focal length.	EA	\$249.00	6.0%	\$234.06
Axis Comm	5500-591	Dry bags for AXIS 209FD-R, 100 pcs	EA	\$40.00	6.0%	\$37.60
Axis Comm	5500-601	Clear and Smoked plastic dome for AXIS 233D dome cameras	EA	\$69.00	6.0%	\$64.86
Axis Comm	5500-671	Smoked and clear dome kit for AXIS 215 PTZ as spare part	EA	\$69.00	6.0%	\$64.86
Axis Comm	5500-681	Drop ceiling mount kit for AXIS 215 PTZ as spare part	EA	\$30.00	6.0%	\$28.20
Axis Comm	5500-691	Screw kit for AXIS 215 PTZ as spare part	EA	\$10.00	6.0%	\$9.40
Axis Comm	5500-721	Power supply PS-P for AXIS 215 PTZ	EA	\$39.00	6.0%	\$36.66
Axis Comm	5500-771	Interchangeable black casing for AXIS 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras with transparent cover. 10-pack.	EA	\$279.00	6.0%	\$262.26
Axis Comm	5500-791	Vertical tilt 37.7 degree downward	EA	\$49.00	6.0%	\$46.06
Axis Comm	5500-821	Interchangeable black casing for AXIS 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras with transparent cover.	EA	\$29.00	6.0%	\$27.26
Axis Comm	5500-831	Connectors for AXIS Q7410 as spare parts. Includes two 2pin STR 2.50MM, one 6pin STR 2.50MM and one 2pin STR 3.81MM. In total 4 connectors.	EA	\$19.00	6.0%	\$17.86
Axis Comm	5500-851	Kit for the AXIS P13XX-series. Content: one terminal connector 4P str 250mm BP LF and one 2P STR 3.81MM BP LF. As spare part.	EA	\$9.00	6.0%	\$8.46
Axis Comm	5500-871	CS mount Varifocal Megapixel Lens 2.4-6mm DC Iris for AXIS P1344 and AXIS 211M/223M. Includes CS mount ring for AXIS 223M.	EA	\$199.00	6.0%	\$187.06
Axis Comm	5500-881	With AXIS 216FD PENDANT KIT it is possible to mount AXIS 212PTZ, 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras on AXIS T91A Brackets, VT Dome Brackets and on 1.5"NPT threaded brackets. Includes 1.5 inch to M30 Male adapter. Black.	EA	\$49.00	6.0%	\$46.06
Axis Comm	5500-891	With AXIS 216FD PENDANT KIT it is possible to mount AXIS 212PTZ, 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras on AXIS T91A Brackets, VT Dome Brackets and on 1.5"NPT threaded brackets. Includes 1.5 inch to M30 Male adapter. White.	EA	\$49.00	6.0%	\$46.06
Axis Comm	5500-901	Indoor P/S for AXIS 233D	EA	\$69.00	6.0%	\$64.86
Axis Comm	5500-914	Indoor power supply for AXIS 233D. Input 100-240VAC. Output 24VDC, 1.5 A US only. Can also be used for AXIS 231D+/232D+.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5500-921	Power supply PS-T for AXIS P1311 and AXIS Q7401 as spare part.	EA	\$39.00	6.0%	\$36.66
Axis Comm	5500-931	Power supply PS-T for AXIS P1311 and AXIS Q7401 as spare part. 10 pack	EA	\$299.00	6.0%	\$281.06
Axis Comm	5500-941	CS mount Varifocal 5-50 mm DC-Iris for AXIS P1343 and AXIS 211/221 in 10 pack	EA	\$1,599.00	6.0%	\$1,503.06
Axis Comm	5500-951	Original lens for AXIS 223M as spare	EA	\$299.00	6.0%	\$281.06
Axis Comm	5500-961	Replaceable cover for AXIS 209FD/209MFD, 10 pcs	EA	\$249.00	6.0%	\$234.06
Axis Comm	5500-971	Replaceable cover for AXIS 209FD/209MFD	EA	\$26.00	6.0%	\$24.44
Axis Comm	5502-011	With AXIS 216FD PENDANT KIT it is possible to mount AXIS 212PTZ, 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras on AXIS T91A Brackets and on 1.5"NPT threaded brackets. Black.	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-021	With AXIS 216FD PENDANT KIT it is possible to mount AXIS 212PTZ, 216FD, AXIS M32 Series, AXIS P3301 and P3304 Network Cameras on AXIS T91A Brackets and on 1.5"NPT threaded brackets. White.	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-041	Aluminum side wall bracket as spare	EA	\$59.00	6.0%	\$55.46
Axis Comm	5502-051	10-pack of MALE RJ45 Connector	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-061	Vibration resistant male RJ-45 connector suitable for RJ-45 version of AXIS M31XX-R and AXIS 209FD-R/MFD-R Network Cameras.	EA	\$15.00	6.0%	\$14.10
Axis Comm	5502-091	Vandal-resistant casing with clear transparent cover as a spare part for AXIS 212PTZ-V.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-101	Megapixel lens 2.8mm with M12 thread for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter. 10pcs	EA	\$199.00	6.0%	\$187.06
Axis Comm	5502-111	Megapixel lens 6mm lens with M12 thread for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter 10pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-121	C mount Varifocal Lens 10-40mm DC Iris day and night corrected for AXIS 221. Includes C mount ring for AXIS 221.	EA	\$199.00	6.0%	\$187.06
Axis Comm	5502-131	Rugged, male D-coded M12 connector compatible with AXIS M31XX-R M12 and Connector M12 Female 4P. Field installable with screw-in contacts. 10 pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-141	Rugged, female D-coded M12 connector compatible with Connector M12 Female 4P, 209FD-R M12 /209MFD-R M12. Field installable with screw-in contacts. 10 pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-151	Megapixel lens 3.6mm with M12 thread for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter 10pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-161	Megapixel lens 16mm with M12 thread for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter. 10pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-171	White cover with clear bubble for AXIS M30 Series as spare part. 10 pack.	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-181	Black cover with clear bubble for AXIS M30 Series. 10 pack	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-191	Silver cover with clear bubble for AXIS M30 Series. 10 pack	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-201	Gold cover with clear bubble for AXIS M30 Series. 10 pack	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-221	CS mount Varifocal Megapixel Lens 5-50mm DC Iris for AXIS P1344 and AXIS 211M.	EA	\$249.00	6.0%	\$234.06
Axis Comm	5502-261	Power supply PS-P T-C for AXIS Q1755	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-291	Corner bracket for AXIS 215 PTZ-E.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-301	Pole bracket for AXIS 215 PTZ-E.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-321	With AXIS P33-VE Series Pendant Kit it is possible to mount the AXIS P3343-VE and AXIS P3344-VE Fixed Dome Network Camera on AXIS T91A Brackets or on standard 1.5" NPT threaded brackets. White	EA	\$49.00	6.0%	\$46.06

Axis Comm	5502-331	Audio and I/O extension cable for AXIS P33 series. Includes 4 pin terminal connector 2.5mm Female to Male, 2 x stereo plug 3.5mm Male to Female. 5 meter.	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-341	Mixed covers with clear bubble for AXIS M30 Series. Includes 3 black, 3 silver, 3 gold and 1 white cover.	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-351	With AXIS P33 Series PENDANT KIT it is possible to mount the AXIS P3343, AXIS P3343-V, AXIS P3344 and AXIS P3343-V Fixed Dome Network Camera on AXIS T91A Brackets or on standard 1.5" NPT threaded brackets. White	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-361	Drop ceiling mount for AXIS P3343 and AXIS P3344 including clear transparent bubble. For indoor use	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-371	Drop ceiling mount for AXIS P3343 and AXIS P3344 including smoked transparent bubble. For indoor use	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-391	Clamp to mount AXIS M10 series. 10 pack.	EA	\$29.00	6.0%	\$27.26
Axis Comm	5502-401	Mounting plate for AXIS P3343, AXIS P3343-V, AXIS P3344 and AXIS P3344-V. Used when mounted on a single or double gang box.	EA	\$29.00	6.0%	\$27.26
Axis Comm	5502-411	Megapixel lens 8mm with M12 thread for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter. 10pcs	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-421	Mixed pack of M12 Megapixel lenses. Focal length: 2.8mm, 3.6mm, 6mm, 8mm and 16mm for AXIS M3113-R, AXIS M3114-R, AXIS 209FD, AXIS 209MFD, AXIS M3011, AXIS 3014. With IR filter. 10pcs=2 pcs of each lens.	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-431	With AXIS Q6032-E PENDANT KIT it is possible to mount the AXIS Q6032-E PTZ Dome Network Camera and AXIS P5534 PTZ Network Camera on standard '1,5" NPT threaded brackets. White.	EA	\$49.00	6.0%	\$46.06
Axis Comm	5502-441	Adapter to convert M30 to 1.5" thread. Used to convert VT Dome mounts to 1.5" NPT thread. Black color.	EA	\$19.00	6.0%	\$17.86
Axis Comm	5502-451	CS mount Fixedfocal Lens 1.7 mm DC-Iris for AXIS P1344 and AXIS 211M/223M. Includes CS mount ring for AXIS 223M. Wideangle lens without barrel distortion.	EA	\$269.00	6.0%	\$252.86
Axis Comm	5502-461	YP3040 Pan Tilt Motor is a compact PT motor for use with AXIS Q1755 Network Cameras. Indoor and outdoor use. IP66-rated. 24VAC input. Compatible with AXIS T92A Housing. YP3040 Wall bracket required. AXIS PS24 recommended.	EA	\$499.00	6.0%	\$469.06
Axis Comm	5502-471	Wall bracket for YP3040 Pan Tilt Motor for AXIS Q1755. White	EA	\$49.00	6.0%	\$46.06
Axis Comm	5502-481	Replaceable black cover for AXIS 209FD/209MFD. 10 pcs	EA	\$249.00	6.0%	\$234.06
Axis Comm	5502-491	Multi-connector cable for power, audio and I/O. Used for AXIS P5534 PTZ Dome Network Camera.	EA	\$109.00	6.0%	\$102.46
Axis Comm	5502-541	Optional plastic adapter for mounting AXIS M311X on flat surfaces. Used when the cable must enter from the side. 10 pack	EA	\$29.00	6.0%	\$27.26
Axis Comm	5502-551	Optional adapter for mounting AXIS M311X on curved surfaces. 10 pack	EA	\$29.00	6.0%	\$27.26
Axis Comm	5502-661	Axis accessory lens cloth. 10 pack	EA	\$39.00	6.0%	\$36.66
Axis Comm	5502-701	AXIS M10-series 10 cm stand extension. 10 pcs. Cable clip included.	EA	\$29.00	6.0%	\$27.26
Axis Comm	5502-711	Accessory cable sealing to meet IP65 rating for Q8108-R.	EA	\$249.00	6.0%	\$234.06
Axis Comm	5502-721	Axis accessory lens cloth. 50 pack	EA	\$169.00	6.0%	\$158.86
Axis Comm	5502-731	Outdoor CAT6 ethernet cable. IP66 rated male push pull connector for for AXIS Q6032-E, IP20 rated male RJ45 connector for midspan. Length 5 meters. Color black.	EA	\$79.00	6.0%	\$74.26
Axis Comm	5502-741	Fixed Iris Megapixel Lens 16mm, F1.8, CS mount for AXIS M1103/4	EA	\$49.00	6.0%	\$46.06
Axis Comm	5502-751	Varifocal 2.4-6mm DC-Iris Megapixel Lens, F1.3, CS mount for AXIS M1113/4	EA	\$149.00	6.0%	\$140.06
Axis Comm	5502-761	Varifocal Mega Pixel DC-Iris Lens 15-50mm, F1.5, CS mount, for AXIS M1113/14	EA	\$199.00	6.0%	\$187.06
Axis Comm	5502-771	Tool kit for simplifying adjustment of viewing direction and focus setting. Compatible with AXIS M311X. Content: Lens tool and Opening tool 4 pcs of each.	EA	\$24.00	6.0%	\$22.56
Axis Comm	5502-781	Drop ceiling mount for AXIS P3346 including clear bubble. For indoor use.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-791	Drop ceiling mount for AXIS P3346 including smoked bubble. For indoor use.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5502-801	Varifocal 5 Mega Pixel P-Iris Lens 9-20mm, F1.6, CS mount, for AXIS P1347	EA	\$349.00	6.0%	\$328.06
Axis Comm	5502-811	Axis branded sticker showing a Camera. Text: Video surveillance in operation	EA	\$8.00	6.0%	\$7.52
Axis Comm	5502-821	Axis branded sticker showing a Camera. Text: Video surveillance in operation	EA	\$18.00	6.0%	\$16.92
Axis Comm	5700-001	Original lens for AXIS 211M as spare part	EA	\$199.00	6.0%	\$187.06
Axis Comm	5700-061	Replacement fan cassette for AXIS Q7900 encoder rack	EA	\$129.00	6.0%	\$121.26
Axis Comm	5700-071	Replacement power supply for AXIS Q7900 encoder rack	EA	\$329.00	6.0%	\$309.26
Axis Comm	5700-091	Electronic boards for replacement in AXIS T95A10 24 VAC. Includes 3 boards.	EA	\$129.00	6.0%	\$121.26
Axis Comm	5700-111	Replacement kit with 3 heaters and fans for AXIS T95A10	EA	\$99.00	6.0%	\$93.06
Axis Comm	5700-121	Replacement clear bubble for AXIS T95A. Includes aluminum ring, rubber gasket and screws.	EA	\$129.00	6.0%	\$121.26
Axis Comm	5700-131	Replacement smoked bubble for AXIS T95A. Includes aluminum ring, rubber gasket and screws.	EA	\$129.00	6.0%	\$121.26
Axis Comm	5700-141	Replacement sunshield and lid for AXIS T95A	EA	\$59.00	6.0%	\$55.46
Axis Comm	5700-151	Replacement cable gland plate, cable glands and screws for AXIS T95A	EA	\$24.00	6.0%	\$22.56
Axis Comm	5700-161	Terminal connectors for AXIS Q7404. Includes 8 pcs 2P 2.50MM, 4 pcs 4P 2.50MM and one 2P 3.81MM. In total 13 connectors.	EA	\$35.00	6.0%	\$32.90
Axis Comm	5700-221	Power supply PS-V for AXIS M10 series. White	EA	\$39.00	6.0%	\$36.66
Axis Comm	5700-271	Spare Power supply for AXIS 215PTZ-E. Not for Japan	EA	\$39.00	6.0%	\$36.66
Axis Comm	5700-281	Spare fan and heater ring for AXIS 215-PTZ-E. Includes 2 fans and 2 heaters.	EA	\$119.00	6.0%	\$111.86
Axis Comm	5700-291	Spare clear dome for AXIS 215-PTZ-E. Includes mounting ring, clear bubble, rubber gasket and 4 screws.	EA	\$99.00	6.0%	\$93.06

Axis Comm	5700-301	Screw kit for AXIS P3343, P3343-V, P3344 and P3344-V as spare part. Includes mounting screws, plugs and I/O connector.	EA	\$4.00	6.0%	\$3.76
Axis Comm	5700-311	Dome kit for AXIS P3343-V and P3344-V as spare part. Includes a clear bubble, mounted on an aluminum dome cover and a separate smoked bubble.	EA	\$69.00	6.0%	\$64.86
Axis Comm	5700-321	Dome Kit for AXIS P3343 and P3344 as spare part. Includes a clear bubble, mounted on a plastic dome cover and a separate smoked bubble.	EA	\$29.00	6.0%	\$27.26

Intrinsa	STD-KBM	Optional standard full size PS/2 keyboard & mouse for use with Intrinsa appliances, servers & other devices	EA		\$50.00	20.0%	\$40.00
Intrinsa	STD-MON-19	Optional standard 19" widescreen LCD flat monitor w/1440x900 resolution for Intrinsa appliances, servers & other devices	EA		\$300.00	20.0%	\$240.00
Intrinsa	STD-MON-26	Optional standard 26" widescreen LCD flat monitor for Intrinsa appliances, servers & other devices	EA		\$750.00	20.0%	\$600.00
Intrinsa	TR-WS-SHLF	Optional 19" rack shelf with locking strap assembly for VA80tr, VA110tr, WS01 & WS04 pedestals (1 per shelf) - Total 7" h (4.07 U)	EA		\$250.00	20.0%	\$200.00
Intrinsa	VA10	VA10 Server Appliance, rack mount, Intel® Core™ 2 Duo 3.0GHz CPU, 2GB RAM, standard config with Intrinsa VDMR technology & USB Media Kit	EA		\$2,950.00	20.0%	\$2,360.00
Intrinsa	VA100st-Base-2TB-1	VA100st Storage Appliance, rack mount, standard config with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD Media Kit	EA		\$5,200.00	20.0%	\$4,160.00
Intrinsa	VA100st-Base-4TB-1	VA100st Storage Appliance, rack mount, standard config with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD Media Kit	EA		\$7,100.00	20.0%	\$5,680.00
Intrinsa	VA100st-Base-8TB-1	VA100st Storage Appliance, rack mount, standard config with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD Media Kit	EA		\$9,300.00	20.0%	\$7,440.00
Intrinsa	VA110-Base-2TB-1DN	VA110 Duo-Mode Server/Storage Appliance, rack mount, standard configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$6,150.00	20.0%	\$4,920.00
Intrinsa	VA110-Base-2TB-1TN	VA110 Tri-Mode Server/Storage Appliance, rack mount, 8GB RAM, standard configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$6,550.00	20.0%	\$5,240.00
Intrinsa	VA110-Base-4TB-1DN	VA110 Duo-Mode Server/Storage Appliance, rack mount, standard configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$7,850.00	20.0%	\$6,280.00
Intrinsa	VA110-Base-4TB-1TN	VA110 Tri-Mode Server/Storage Appliance, rack mount, 8GB RAM, standard configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$8,250.00	20.0%	\$6,600.00
Intrinsa	VA110-Base-8TB-1DN	VA110 Duo-Mode Server/Storage Appliance, rack mount, standard configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$10,150.00	20.0%	\$8,120.00
Intrinsa	VA110-Base-8TB-1TN	VA110 Tri-Mode Server/Storage Appliance, rack mount, 8GB RAM, standard configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$10,550.00	20.0%	\$8,440.00
Intrinsa	VA110-Duo-8GB	VA110 Duo-Mode total 8GB system memory option provides 4GB available memory for use of 1 application	EA		\$250.00	20.0%	\$200.00
Intrinsa	VA110-EXP	Expandable capacity option for VA110. Enables capacity expansion with (1) VA Expander	EA		\$250.00	20.0%	\$200.00
Intrinsa	VA110tr-Duo-8GB	VA110tr Duo-Mode total 8GB system memory option provides 4GB available memory for use of 1 application	EA		\$250.00	20.0%	\$200.00
Intrinsa	VA110tr-EXP	Expandable capacity option for VA110tr. Enables capacity expansion with (1) VA Expander	EA		\$250.00	20.0%	\$200.00
Intrinsa	VA110tr-Ped-2TB-2DN	VA110tr Duo-Mode Server/Storage Appliance, pedestal, standard configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$5,950.00	20.0%	\$4,760.00
Intrinsa	VA110tr-Ped-2TB-2TN	VA110tr Tri-Mode Server/Storage Appliance, pedestal, 8GB RAM, standard configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$6,350.00	20.0%	\$5,080.00
Intrinsa	VA110tr-Ped-4TB-2DN	VA110tr Duo-Mode Server/Storage Appliance, pedestal, standard configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$7,650.00	20.0%	\$6,120.00
Intrinsa	VA110tr-Ped-4TB-2TN	VA110tr Tri-Mode Server/Storage Appliance, pedestal, 8GB RAM, standard configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$8,050.00	20.0%	\$6,440.00
Intrinsa	VA110tr-Ped-8TB-2DN	VA110tr Duo-Mode Server/Storage Appliance, pedestal, standard configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$9,950.00	20.0%	\$7,960.00
Intrinsa	VA110tr-Ped-8TB-2TN	VA110tr Tri-Mode Server/Storage Appliance, pedestal, 8GB RAM, standard configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intrinsa VDMR technology & CD/USB Media kit	EA		\$10,350.00	20.0%	\$8,280.00

Intransa	VA20	VA20 Server Appliance, rack mount, Intel® Quad Core Xeon® 2.33GHz CPU, 4GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$4,850.00	20.0%	\$3,880.00
Intransa	VA200st-Base-2TB-1	VA200st Storage Appliance, rack mount, fault resilient config with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD Media Kit	EA		\$7,100.00	20.0%	\$5,680.00
Intransa	VA200st-Base-4TB-1	VA200st Storage Appliance, rack mount, fault resilient config with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD Media Kit	EA		\$8,700.00	20.0%	\$6,960.00
Intransa	VA200st-Base-8TB-1	VA200st Storage Appliance, rack mount, fault resilient config with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD Media Kit	EA		\$11,200.00	20.0%	\$8,960.00
Intransa	VA20-3	VA20 Server Appliance, rack mount, Intel® Quad Core Xeon® 3.0GHz CPU, 4GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$6,050.00	20.0%	\$4,840.00
Intransa	VA210-Base-2TB-1DN	VA210 Duo-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD/USB Media Kit	EA		\$7,700.00	20.0%	\$6,160.00
Intransa	VA210-Base-2TB-1TN	VA210 Tri-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 2TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology, & CD/USB Media kit	EA		\$9,700.00	20.0%	\$7,760.00
Intransa	VA210-Base-4TB-1DN	VA210 Duo-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD/USB Media kit	EA		\$9,300.00	20.0%	\$7,440.00
Intransa	VA210-Base-4TB-1TN	VA210 Tri-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 4TB hot-swap SATA-II, RAID 5 protected capacity, with Intransa VDMR technology, & CD/USB Media kit	EA		\$11,300.00	20.0%	\$9,040.00
Intransa	VA210-Base-8TB-1DN	VA210 Duo-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology & CD/USB Media kit	EA		\$11,800.00	20.0%	\$9,440.00
Intransa	VA210-Base-8TB-1TN	VA210 Tri-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 8TB hot-swap SATA-II, RAID 5 protected capacity, Intransa VDMR technology, & CD/USB Media kit	EA		\$13,800.00	20.0%	\$11,040.00
Intransa	VA210-Duo-8GB	VA210 Duo-Mode 8GB total system memory option provides 4GB available memory for use of 1 application	EA		\$250.00	20.0%	\$200.00
Intransa	VA210-Tri-12GB	VA210 Tri-Mode 12GB system memory provides 4GB available memory for use by each of (2) Application Modes	EA		\$750.00	20.0%	\$600.00
Intransa	VA25as	VA25as Server Appliance, rack mount, Intel® Quad Core Xeon® 5600 Series 2.4GHz CPU, 6GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$5,450.00	20.0%	\$4,360.00
Intransa	VA25as-12GB	VA25as & SR950 total 12GB system memory option provides 4GB available memory for use of 1 application	EA		\$800.00	20.0%	\$640.00
Intransa	VA25as-3	VA25as Server Appliance, rack mount, Intel® Quad Core Xeon® 5600 Series 2.66GHz CPU, 6GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$6,950.00	20.0%	\$5,560.00
Intransa	VA30	VA30 Server Appliance, rack mount, (2) Intel® Quad Core Xeon® 2.33GHz CPUs, 4GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$5,850.00	20.0%	\$4,680.00
Intransa	VA300-EXPNDR-12TB-1	VA300 Expander 2U rack mount. 12TB raw storage capacity (10TB available recording capacity) with 12 x 1TB SATA-II hot-swap disk drives with RAID 6 protection	EA		\$12,000.00	20.0%	\$9,600.00
Intransa	VA300-EXPNDR-24TB-1	VA300 Expander 2U rack mount. 24TB raw storage capacity (20TB available recording capacity) with 12 x 2TB SATA-II hot-swap disk drives with RAID 6 protection	EA		\$16,000.00	20.0%	\$12,800.00
Intransa	VA300st-12TB-1	VA300st Storage Appliance, rack mount, fault resilient config with 12TB hot-swap SATA-II, RAID 6 protected capacity, Intransa VDMR technology	EA		\$15,500.00	20.0%	\$12,400.00
Intransa	VA300st-24TB-1	VA300st Storage Appliance, rack mount, fault resilient config with 24TB hot-swap SATA-II, RAID 6 protected capacity, Intransa VDMR technology	EA		\$21,500.00	20.0%	\$17,200.00
Intransa	VA300st-EXP	Expandable capacity option for VA300st & VA600st. 2 x SAS ports enables capacity expansion for additional (2) VA300 or VA600 Expanders	EA		\$1,000.00	20.0%	\$800.00
Intransa	VA30-3	VA30 Server Appliance, rack mount, (2) Intel® Quad Core Xeon® 3.0GHz CPUs, 4GB RAM, fault resilient config with Intransa VDMR technology & USB Media kit	EA		\$8,350.00	20.0%	\$6,680.00
Intransa	VA320-12TB-1D	VA320 Duo-Mode Server/Storage Appliance, rack mount, fault resilient configuration with 12TB hot-swap SATA-II, RAID 6 protected capacity, Intransa VDMR technology & CD/USB Media Kit	EA		\$15,000.00	20.0%	\$12,000.00
Intransa	VA320-12TB-1F4	VA320 Flex-Mode4 Server/Storage Appliance, rack mount, fault resilient configuration with 12TB hot-swap SATA-II, RAID 6 protected capacity, Intransa VDMR technology, & CD/USB Media kit	EA		\$21,000.00	20.0%	\$16,800.00
Intransa	VA320-12TB-1F5	VA320 Flex-Mode5 Server/Storage Appliance, rack mount, fault resilient configuration with 12TB hot-swap SATA-II, RAID 6 protected capacity, Intransa VDMR technology, & CD/USB Media kit	EA		\$23,000.00	20.0%	\$18,400.00
