Good reasons to choose Liebherr

Product presentation

Attractive product presentation is the best way to promote sales. Liebherr appliances are designed to present all products captivatingly to their very best advantage at all times, enticing customers to reach for them. Incorporating company logos and brand-specific images, our appliances are truly eye-catching.

Design and look

High-performance technology at its very best: Liebherr attaches great importance to the overall design concept of its appliances to ensure that they radiate both elegance and design quality. And, thanks to this meticulous design, Liebherr appliances always combine extremely well and look sensational.

Optimum performance

Liebherr drinks coolers and freezers offer perfect refrigeration performance, even under extreme ambient conditions. Using state-of-the-art components, high-performance and environmentally-friendly refrigerants, and precise controls these appliances guarantee top product quality and freshness.

Efficiency

The combination of powerful compressors, precise electronic controls, highly effective insulation, and high-performance CFC-free refrigerants results in low energy consumption and correspondingly low operating costs. The high quality of our virtually maintenance-free, service-friendly appliances guarantees their long service life and functional reliability.

Robust quality

Liebherr appliances are specially designed for intensive professional use and are therefore exceptionally robust. Only the highest quality materials are used and careful attention is paid to the very finest of details. Meticulous testing ensures the outstanding quality of Liebherr appliances. All electronic and refrigeration-related components are optimally balanced to ensure the highest levels of functionality and efficiency.

Easy to clean

Hygiene is critically important in the commercial sector and therefore the interiors of Liebherr appliances feature large corner radii, which allow very easy cleaning. The grid shelves are easily removed for cleaning and are also height-adjustable and can accommodate all sorts of different sized items.

Leading brands use customised branding

How to put your brand in the limelight

The brands shown above are a just a few of our clients: Liebherr currently customises refrigerators and freezers for over 200 different brands.

Liebherr appliances can be individually styled using the current branding options described below. These differ from both a technical and cost perspective, depending on the specific requirements and on the quantities involved.

PVC stickers (vinyls)

This popular and by far the most commonly used technique involves the supplier printing the required design onto a suitable sticker material (usually PVC) using either silk-screen or digital printing, depending on the quantity and the image. Liebherr then manually applies the vinyl to the outer housing of the appliance.

Direct digital printing: How to inspire customers with your brands

You too can now take advantage of the diverse branding possibilities of direct digital printing technology: Promote your company and increase your turnover whilst inspiring your customers with unique design. Direct digital printing allows your advertising message or motif to be printed directly onto the appliance surface. In this way you can skilfully present your company or your brands.

Thanks to the 180° design options you can communicate creative and effective messages over the entire surface of the appliance, whether with a photo-realistic representation of your product, an artistic motif or a perfectly presented company logo. We can also produce small quantities - completely custom-made. We use the CMYK colour model, the currently standard system for digital four-colour printing. In this way, you too can inspire customers with your brands and impressive messages. Direct digital printing technology makes it possible.

The advantages of direct digital printing technology:

- Visual refinement of the appliances using colour brilliance, high resolution, depth of field and three-dimensional rendition.
- Individual and flexible design for effective advertising messages.
- Increase brand awareness and increase sales.
- 180° branding: The design is printed directly onto the surface with an exact fit and over the entire surface, and is guided over the edges of the appliance.
- Easy to clean, and resistant to both scratches and UV light.
- Available in small quantities.
- Resilient branding: Neither accidental nor intentional removal is possible.
- To protect the design: Appliance is delivered with foil.

Did you know that...

we use the direct digital printing system to print housings and doors of single-door floor-mounted appliances, and free-standing fridge-freezers, in pin-sharp quality? Thanks to digital printing technology, we can now meet your specific requirements to an even higher standard when it comes to creating branding that really stands out. And with a depth of focus never seen before.

The special feature: The motif printing system has a total of 24 print heads producing up to 43 square metres of printed surface per hour. Incidentally: The location of our plant for direct digital printing is Lienz in East Tyrol, Austria.

Your branding in the right light

Customised colour schemes

A customised colour scheme presents your brand in a visually strong, attention-demanding manner and promotes the appeal of your products. Several materials and effects can be used to add customerspecific designs to side walls, door frames, handles, plinths, display frames and compartment interiors.

Glass door vinyls

Vinyls with individually designed brand images can be adhered to the glass door. These are also available as 'non-permanent' stickers. If necessary, these can be easily removed at any time without leaving any visible trace.

BlackSteel

BlackSteel is a visually stunning and exceptionally appealing black stainless steel. Paired with a high-quality SmartSteel finish, BlackSteel lends an appliance both high-tech appeal and timeless elegance. The transversepolished finish gives BlackSteel appliances a compelling and exclusive appearance, and significantly reduces the visibility of fingerprints on the doors and side walls. The finish is also easy to clean and much less sensitive to scratches.

LED lighting integrated into the glass door

An individual motif can be engraved on the inside of the glass door and illuminated with LEDs. Only the motif is illuminated so that it stands out very impressively. The engraving is set between the two panes of glass and is suitable for FKv 503 appliances.

3D branding

3D branding gives an appliance extraordinary visual appeal and opens up new opportunities for creatively using images in advertising graphics. An innovative technique is employed to create high-quality stickers using 3D lenticular printing. In addition, we can apply different printing levels and layers to glass door surfaces to create a 3D effect when combined with the right backlighting. 3D branding transforms any appliance into a stunning, unique, head-turning feature that is sure to encourage impulse buying.

An overview of the display options

Liebherr offers great-looking display options that draw more attention to your appliances, products and brand. The display panel can be styled according to the customer's specific preferences.

Interior LightGuide display

The transparent LightGuide display, which is installed on the inside of the door, is partially illuminated. It combines clear product visibility and at the same time attracts great attention to your logo.

FKDv 4523

Exterior LightGuide display

The fully illuminated exterior LightGuide display, which is attached to the outside of the door, places your brand in the limelight and is guaranteed to attract people's attention. No separate power supply is required for the lighting.

FKDv 4513

Interior door sticker

The sticker on the inside at the top of the glass door and is effectively illuminated by the ceiling lighting.

FKDv 4503

LED backlit display

The LED backlit display attracts a high amount of attention to the brand.

FKDv 42..

Customise appliances to your specific needs with a wide range of options and accessories

Design your appliance exactly how you want it! The exceptional branding opportunities offered by Liebherr enable appliances to be factory fitted with a variety of features and extras upon request.

Dimmable LED lighting

FKDv models can be fitted with a rotary control dial for dimming the lighting. The appliance's interior brightness level can then be adjusted to optimally illuminate the interior and to provide ideal product presentation.

FKDv 42../4503/4513

Additional LED side lighting

For optimised illumination and presentation of products, our various display refrigerators come with LED lighting on either one or both sides, as standard. Upon request, models with single side lighting can be fitted with additional lighting on the other side.

FKDv 42../4503/4513

EMS controller

EMS controller – fitted as standard on the FKDv 4523 and available as a special feature for other display refrigerators – is a convenient technology designed to improve energy efficiency. It detects, for example, door opening cycles: the refrigeration system then provides only the required cooling capacity and, in combination with the 'lights out' function, significant energy savings can be made.

FKDv 42../4503/4513

Rear wall cover

When fitted with the additional rear wall cover appliances look great from every angle and are ideal for freestanding use. They blend better into the installation environment and the rear wall surface can be used for branding.

FKDv 42../45..

Self-closing door

The door closes automatically after being opened to ensure that the appliance is never left open for too long and thereby maintain the appliance's efficiency.

FKDv 42..

Connection cable with appliance coupler

As an option, appliances can be supplied with detachable appliance connectors. This allows the use of appliances with different cord sets having a common supply voltage (EU, CH, UK).

FKDv

Additional display attachment

The 60-cm-wide illuminated display can be retrofitted to FKvsl models and is sure to draw a high degree of attention to the appliance and to its contents. The design of the display panel can be adapted to meet individual requirements.

FKvsl 26-41	9600457
FKv 26-41	9600574

Side-by-Side set

With this side-by-side set 2 display coolers can be combined on site to create a 120 cm wide double-door unit. The joint display header allows a uniform branding of both sections.

FKDv 4203, FKDv 4211, FKDv 4213	9902275
FKDv 4523	9902462

Glass canopy for scoop ice

The GTI 4153 ice cream freezer can be adapted to a scoop ice application with this glass canopy. The curved glass and LED lighting in the freezer combine to make an attractive product presentation.

EFI 3503/53	9809160
-------------	---------

Customise appliances to your specific needs with a wide range of options and accessories

Thermostat dial

On the standard configuration, the thermostat is hidden to avoid tampering. This optional external thermostat dial allows easier temperature adjustment without the use of tools. This might be useful where freezers are not accessible by the public.

EFI, EFE, MRHsc on request

Grid shelf

The highly resilient wire shelves have an abrasion-resistant coating and are designed for heavy shelf loads. They are height-adjustable to facilitate versatile use of the interior.

FKDv 4523	7113269	Fv 913	7113033
FKDv 4513/03, FKDv 4213/11/03	7113267	F 913	7113035

BCv 1103	7113031	FKv(sl) 41../36../26..	7113413

Wooden shelf

This shelf made from beech wood is designed for the presentation of bottles. The use of wood implies organic sustainability and strengthens the premium image of the entire cooler.

FKDv 7114000

Base grid

The base grid protects the inner liner and allows use of the cabinet floor space for storage, even for kegs.

FKDv, FKv(sl) 26, 36, 41, 54 7113265

Perforated metal shelf cover

The additional perforated metal cover together with the sturdy shelves provide a solid base and maximum stability for all types of bottles and containers. The perforated metal shelf covers are extremely tough and optimally suited for storing drinks.

FKDv 7746179

Scanner rails

Price labels and scan codes can be optimally read from the practical scanner rail, which attaches to the front of the grid shelves to give customers an instant, clear view of the prices or product information.

FDv, Fv (except Fv 913)	7443779
BCv 1103	7444050
Fv 913, F 913	7444051

Flexible scanner rails

The flexible scanner rails, made from premium-quality plastic, give customers product information at a glance and still allow drinks to be removed easily. Their flexibility means they are exceptionally easy to use and that it's quicker than ever to replenish appliance stocks. The scanner rails attach to the grid shelves and are available as accessories.

FKDv, FKv(sl) 26../36../41.. 7435063

Labels for scanner rails

The scanner rails can be attached to the grid shelves to provide customers with information about products and their prices. Labels with individual customer branding can also easily be inserted into the scanner rails.

FKDv, FKv(sl) 26../36../41..

Scanner rail for ice-cream cabinets

This scanner rail can be used for printed scan-codes, price or product information, advertising etc. It is ideally positioned and is quick and easy to use or update. The printed tags can be up to 52 mm high.

Customise appliances to your specific needs with a wide range of options and accessories

Gravity feed shelf (bottle slide)

With the practical gravity feed shelf, bottles are always positioned to the front where they are easy to access. The gravity feed shelf is available with or without telescopic rails.

FKDv	Fixed gravity feed shelf	9007045
FKDv, FKv(sl) 26../36../41..	Pull-out gravity feed shelf	9007659

Scanner rail for the gravity feed shelf

This scanner rail can be used for printed scan-codes, price or product information, advertising etc. It clips onto the front of the gravity feed shelf and is quick and easy to use or update.

7435012 Suitable for gravity feed shelf
product code 9007045

Castor base

The robust castor base makes transportation far easier, especially if refrigerators are regularly moved around. Thanks to their superb workmanship and quality these castor bases are extremely durable.

FKvsl 54..	9086381		
FKv 54..	9086365		
FKvsl 36../26..	9086321	FKv 36../26..	9086323

Height-adjustable feet

The height-adjustable feet are robust and provide sufficient ground clearance to allow easy and convenient cleaning underneath the appliance.

FKv(sl) 54..	9590229
FKv(sl) 36../26..	9590231

Protection guard

When transporting larger FKDv models, the robust protection guard protects the condenser at the back of the appliance and the appliance underside from impacts. It is ideal for transporting unpacked appliances by lorry.

FKDv 45..	7790671		
FKv(sl) 41..	7790747	FKv(sl) 54..	7790739
FKDv 42..	7790603	FKv(sl) 36..	7790773

Castors for protection guard

To make it easier to transport appliances, two sturdy castors can be directly attached to the protection guard at the back. This enables the appliance to be easily moved around, similar to pushing a hand truck.

FKDv, FKv(sl) 36../41../54.. 7790761

Castors

Castors are particularly practical for chest-type appliances that require frequent repositioning. Threeswivel castors are available as accessories – two with brake.
