# Eco-lution

Industry leading energy efficiency  
and high reliability  
from our high technology.

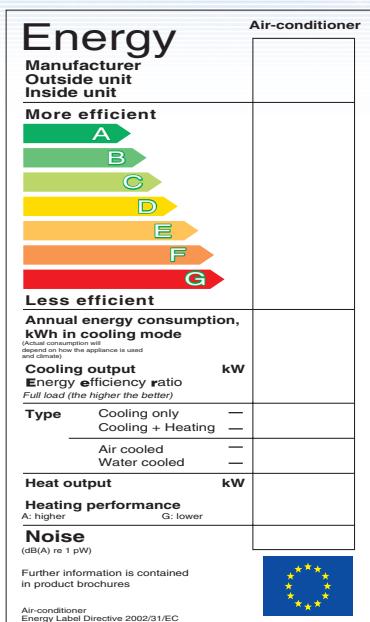

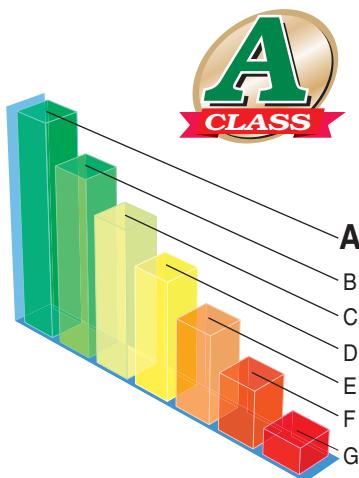

# High Efficiency

# Consideration for the Environment

Several radical changes of the design and engineering developments have brought about a vast improvement in energy efficiency and environmental protection.

## ENERGY LABEL "Class A"

## Employment of lead-free solder

### Adapted to RoHS directive

RoHS: Restriction of Hazardous substances

In order to avoid the release of hazardous substances to the global environment, all models have realized applications of lead-free solder.

It has been considered to be difficult to use lead-free solder for practical applications because it requires higher solder temperatures at assembly, which could jeopardize reliability. PbF soldering method developed by us, however, has enabled to realize a higher reliability of quality for lead-free printed circuit boards.

## Employment of R410A

All models use refrigerant R410A characterized by the ozone depletion coefficient being 0.

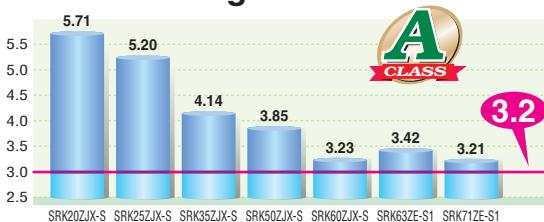

## Excellent Energy Saving

A High Performance and Excellent Energy Saving are achieved at the same time by an increased capacity of heat exchanger and employment of high efficiency DC motor etc.

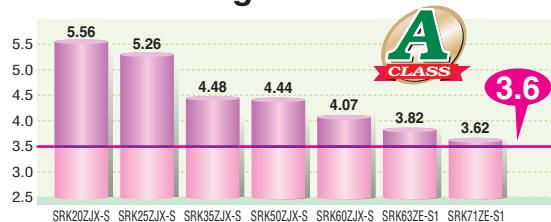

## The industry's highest COP levels

All the ZJX and ZE series have cleared the Class A standard, the highest energy saving level, with our high COP.

### EER in Cooling

### COP in Heating

Applied models  
All inverter models

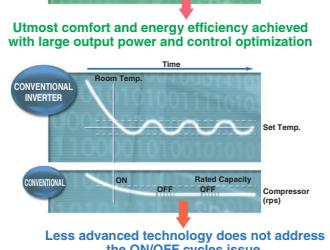

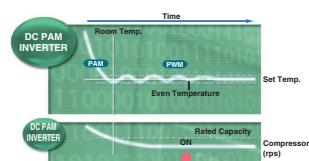

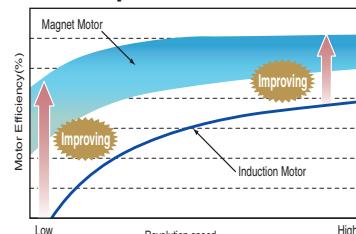

## QUICK & HIGH EFFICIENCY Control DC PAM inverter

An inverter driven system has a number of performance advantages over a constant speed system. For example, its variable compressor outputs can ensure quick heating after a startup and attain a set temperature more quickly.

Then, the air conditioner can slow down its compressor speed to save energy, keeping comfortable conditions. Moreover, the compressor is DC driven, so it provides higher performance.

### DC compressor motor

Applied models  
All inverter models  
(except SRK-ZE)

## New Inverter Control (Vector control)

New Inverter Control has applied new advanced technology of Vector control and has realized high efficiency.

- Smooth operation from low speed to high speed
- Smooth Sine Voltage Wave form are attained
- Energy efficiency is further improved in low speed range

Applied models  
All inverter models

## Our latest technologies

### New propeller fan

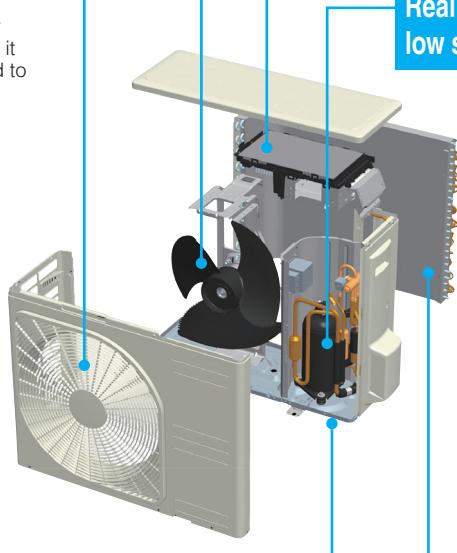

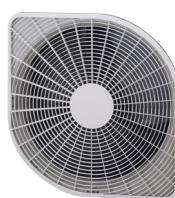

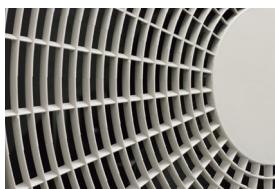

Matching a new propeller fan with a fan motor has been optimized in order to keep the same capacity as that of previous models with less electrical consumption. Synergy effect with leaf shape grill has realized improvement of energy efficiency by 5% and decrease of sound level.(SRC40/50/60ZIX-S)

Serration fan

### Energy saving leaf shape grill

Radial shape grill has been developed in order to realize natural air flow sent by propeller fan along with it. Airflow is very smooth with minimum air resistance and it can make decrease motor load and lead to improvement of energy efficiency.

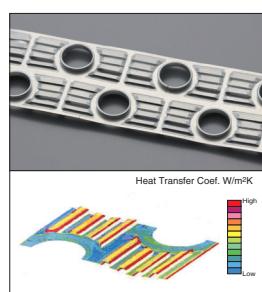

### Superior corrosion resistance hot dipping steel sheet

Superior corrosion resistance hot dipping steel sheet is applied at base of outdoor units. It has superior corrosion resistance and scratch resistance properties compared to conventional materials.

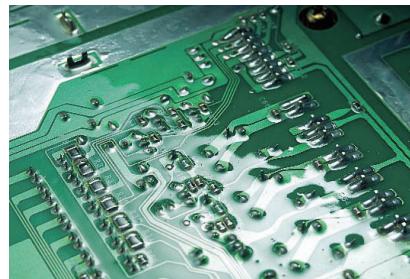

### Indoor unit

Optimization of combination of fin configuration and copper tube has achieved maximum air flow keeping size in width of indoor unit. Efficiency rate of heat exchanger has been drastically improved by 33% compared with previous models. New fin can realize maximum air flow and saving energy simultaneously.  
(except SRK-ZJP)

### Outdoor unit

Thanks to changing fin configuration from flat sheet to new M shape fin, efficiency has been improved by 10%. Optimum balance of heat transfer and air flow has been achieved in a high-dimensional structure.

### Silicon-coated PCB

The printed wiring board of the outdoor unit is coated by silicon. It lasts long having a tolerance for humidity.

## 3D AUTO Vertical + Horizontal AIR SCROLL

**3 motors make 3 independent controls**

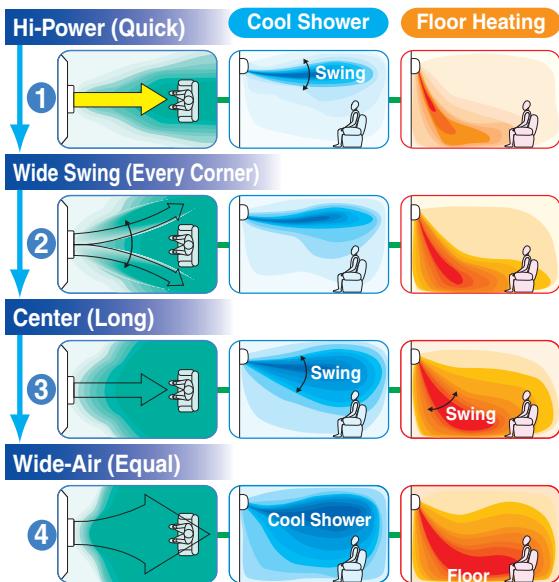

Applied models  
SRK-ZJX, SRK-ZJR,  
SRK-ZJ  
SRK63/71ZE, HE :  
Manual Setting only

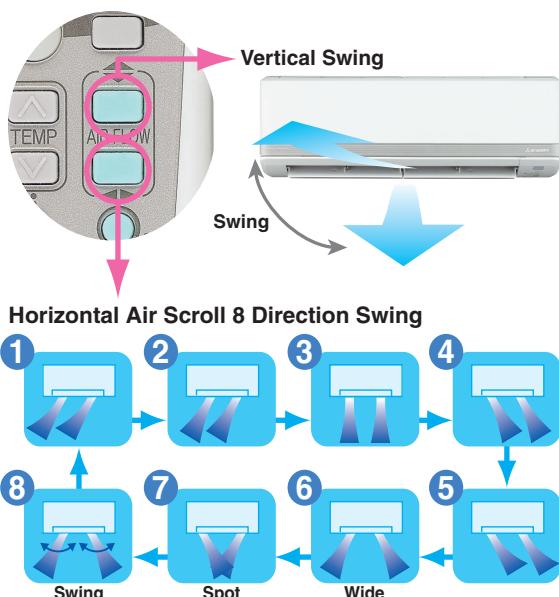

3D AUTO is one touch programmed and three motors (one vertical working motor + two horizontal working motors) make three independent air flow controls. The airflow is uniform and quiet and reaches at long distance points from the blower.

### Programmed 3D AUTO

### Manual Setting

Thanks to automatic control of air flow volume and air flow direction, comfortable air conditioning of the entire room can be done effectively.

In cooling operation cooled air flows directly to the ceiling. The cooled air does not flow directly to the occupants of the room and the comfort cooled air flow comes from the ceiling like a soft shower.

In heating operation warm air flows to the floor directly and spreads along the floor. Due to concentration of the warm air on the floor level, optimum comfort can be realized.

By individual control of right and left part of louver, air flow direction from the right part and the left part are controlled individually. Setting the most preferable air flow direction and determining whether direct air flow is required or not at the same time minimizing of energy loss and economical operation has realized.

**Aircraft technology was used in the design of the air conditioner's airflow system**

## Jet Air Scroll Long Reach & Silent Air Flow

- Applied models  
All SRK

We used the same aerodynamic analysis technology as used in developing jet engines.

CFD (computational fluid dynamics), used in blade shape design of jet engines, has been applied to the design of air channels in air conditioners to develop the ideal air channel system (air circulation). The airflow of the jets created in this system enable a large volume of air to be blown with minimum power consumption, yet the air flow is uniform, quiet and reaches points a long distance from the blower.

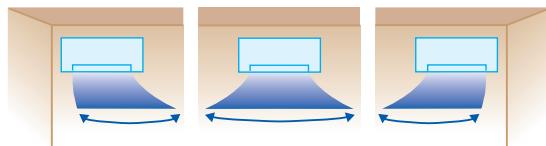

## Long Reach Air Flow

Powerful airflow is realized by Jet technology. Good for large living rooms and shops. Increase your comfort.

## Positioning of Installation

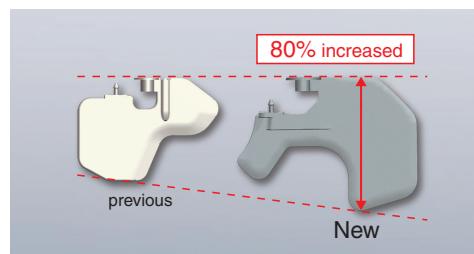

You can set the left-right air flow directions when you installed the air conditioner near the side wall by remote controller operation.

## New louver

Due to redesigned size and shape, the new louver has been increased in surface area by 80%. In addition to increase of air flow volume, it has improved controllability of swinging to right and left.

SRK-ZJX

# Clean Air

Applied models  
SRK-ZJX, SRK-ZE,  
SRK-HG, SRK-HE

**Generates the same amount of negative ions as a forest environment**

## 24-hour ION

The air conditioner main body employs a tourmaline-coated sheet. The sheet generates negative ions around the clock. Even when the air conditioner is not running, it generates as many negative ions (2,500– 3,000/cc) as in a forest, stream or fall does, allowing you to experience them without incurring any electrical charges.

Applied models  
SRK-ZJX, SRK-ZE,  
SRK-ZJR, SRK-ZJ,  
SRK-ZJP, SRK-HG,  
SRF-ZJX, SRR-ZJ

**Always keeping the indoor unit clean**

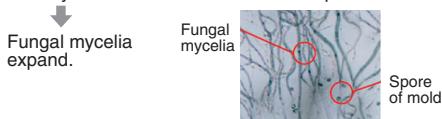

## Self Clean Operation

"Self clean operation" is operated for 2 hours after the unit has stopped its normal operation.

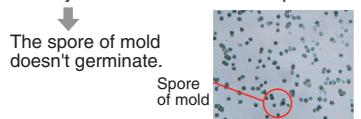

The indoor unit is dried up and the growth of mold is restrained. Users can select whether this mode is utilized or not.

### Situation of mold after one week

When you don't execute "Self Clean Operation"

When you execute "Self Clean Operation"

Applied models  
SRK-ZJX, SRK-ZE,  
SRK-ZJR, SRK-ZJ

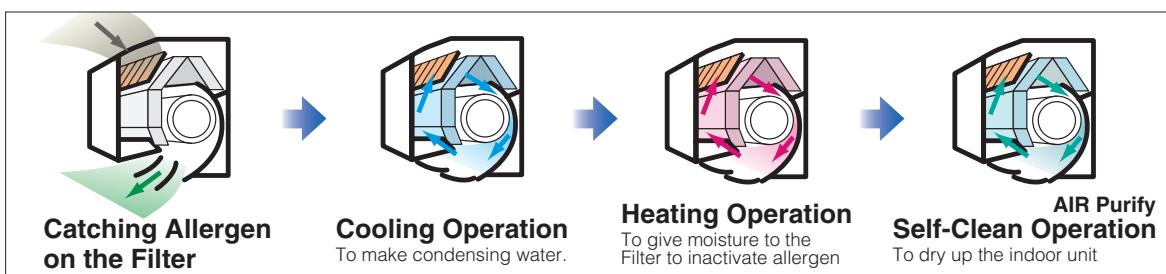

**The air in your room is kept fresh**

## Allergen Clear System

**First in the world**

"Allergen clear system" is equipped to suppress the influence of the allergen caught by the filter by controlling the temperature and humidity.

**20 of Patent Pending**

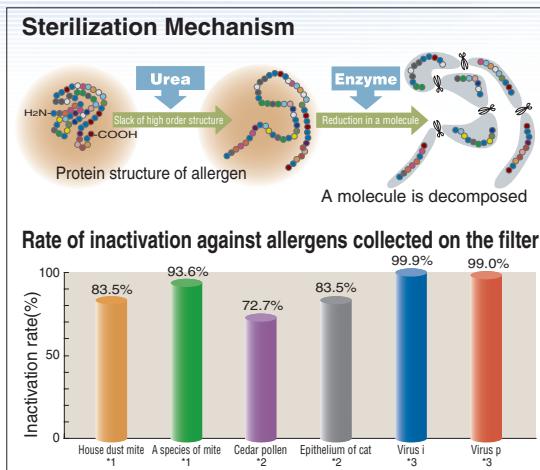

**This is the original and only technology to control the temperature and humidity for inactivating allergens**

## Allergen Clear Filter

**Enzyme + Urea deactivates allergens and kills bacteria.**

The allergen clear filter breaks down the pollen, lice, and allergens that live on cat skins, etc. and deactivates them. The secret of deactivation is the Enzyme-urea compound. It deactivates not only allergens but also all kinds of bacteria, molds and viruses. Even if allergens and bacteria, etc. fly off of the filter, they are deactivated, so the air in your room is kept fresh.

\*1 Test method:  
ELISA colorimetric method / ELISA fluorescent method  
Laboratory:  
Independent administrative agency national hospital mechanism Sagamihara Hospital, No.1536

\*2 Test method:  
ELISA colorimetric method  
Laboratory:  
Independent administrative agency national hospital mechanism Sagamihara Hospital, No.1536

\*3 Test method:  
TCID (Infection value 50%)  
Laboratory:  
Foundation of Kitazato Environmental Science Center, No.15-0145

**Sure to destroy fungi and bacteria, also effective on viruses and allergenic compounds (Cat hair, dust mite, pollen etc.)**

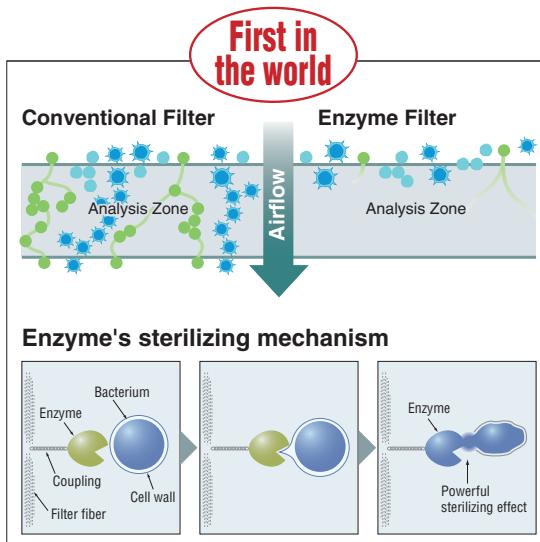

## Natural Enzyme Filter

**The first release in this range of the enzyme-sterilizing filter**

Enzymes used in these filters are naturally occurring lytic enzymes.

The lytic enzymes attack cell walls of microorganisms trapped on a filter and destroy them and doing so, have a powerful sterilizing which will effect decrease the number of molds and bacteria. Natural Enzyme Filter will clean and sanitize air passing through it to keep air in the room clean and safe.

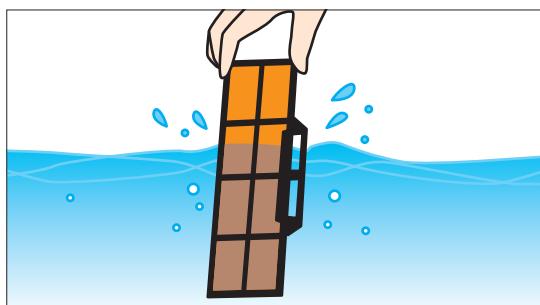

**The deodorizing ability of this filter can be easily restored simply by cleaning and exposing to the sunlight**

## Photocatalytic Washable Deodorizing Filter

It will keep the air fresh by deodorizing the molecules causing odor. Its deodorizing power can be restored by washing with water and drying under the sun, as such it is a Recycling deodorizing filter capable of repeat use.

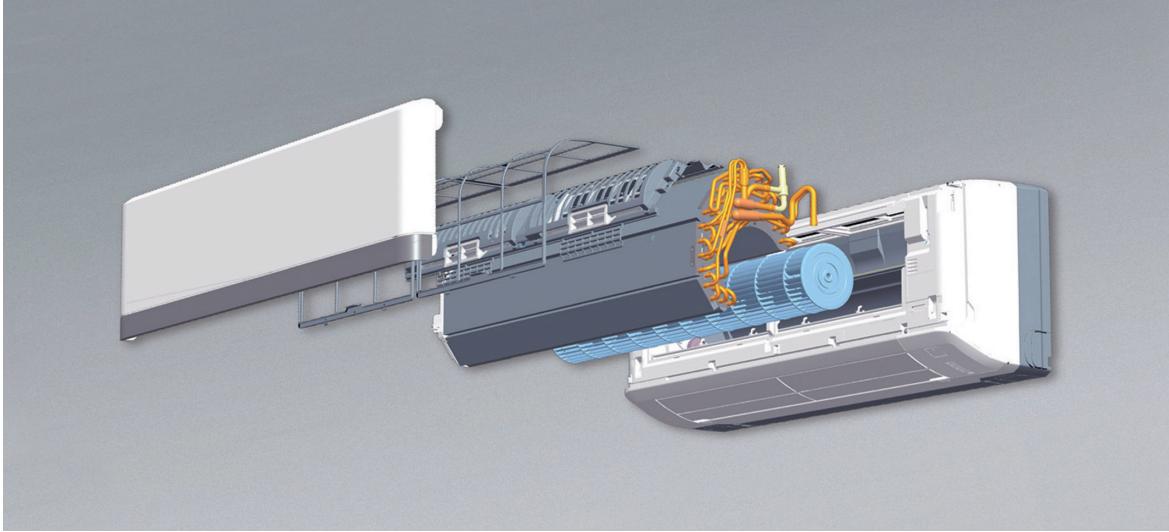

### Used in models

## Anti-microbial specifications and design will deliver cleanliness and safety

### Anti-microbial blower fan

The blower fan has undergone anti-microbial treatment to resist mold and germs, making the system clean and safe. Foul odors and molds, etc. which can occur when an air conditioning system is not in operation are prevented.

- Intestinal bacteria (Escherichia coli IFO 3972)
- Staphylococcus aureus subsp. aureus IFO 12732

Testing Authority: Japan Food Analysis Center

Test Report No.: 104034022-002

Tests were conducted with reference to the antimicrobial strength tests in JIS Z 2801 2000 "Antimicrobial Products-Antimicrobial Test Method" -5.2 Antimicrobial Effects: Test Methods for Plastic Products, etc.

Comparison of growth of bacteria and mold on fan surfaces (microscopic image)

In tests conducted at the Mitsubishi Heavy Industries Nagoya Research Lab, 24 hrs after contact with bacteria, cultured on agar media.

#### Live Bacteria Count on Measured Test Pieces

Tested Contaminant	Measurement	Test Pieces	Bacteria Count Per Test Piece		
			Measurement 1	Measurement 2	Measurement 3
Escherichia coli IFO 3972	Immediately after contact	Not treated	$1.9 \times 10^5$	$1.6 \times 10^5$	$1.3 \times 10^5$
	After 24 hrs at 35°C	Test piece 1 Not treated	<10 $3.8 \times 10^6$	<10 $4.9 \times 10^6$	<10 $7.2 \times 10^6$
Staphylococcus aureus	Immediately after contact	Not treated	$1.4 \times 10^5$	$1.6 \times 10^5$	$1.3 \times 10^5$
	After 24 hrs at 35°C	Test piece 1 Not treated	<10 $8.6 \times 10^5$	<10 $4.5 \times 10^5$	<10 $3.6 \times 10^5$
Aspergillus niger	Immediately after contact	Not treated	$1.5 \times 10^4$	$2.2 \times 10^4$	$1.6 \times 10^4$
	After 24 hrs at 35°C	Test piece 1 Not treated	<10 $1.0 \times 10^4$	<10 $1.2 \times 10^4$	<10 $2.5 \times 10^4$

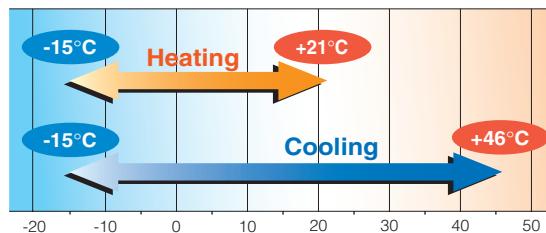

Test Pieces 1) Products with Antimicrobial and Antifungal Treatment

## Wide Operation Range

**Heating and cooling operations are possible at an outdoor temperature as low as  $-15^{\circ}\text{C}$ .**

Our new advanced technology has expanded the heating and cooling operation range.

This permits installation of the units considering a heating and cooling operation under a low temperature condition down to  $-15^{\circ}\text{C}$ .

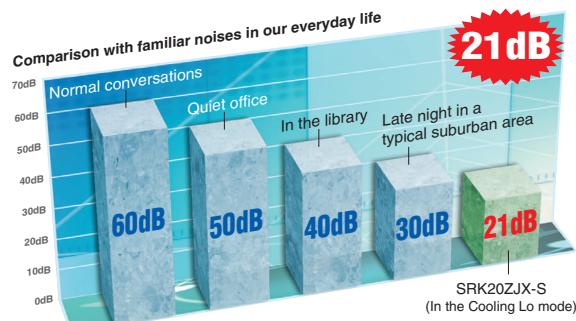

\*For the capacities under low temperature conditions, refer to technical manual.

**Hi quality air long reach & silent flow**

## Quiet Operation

**This is the secret of quiet operation.**

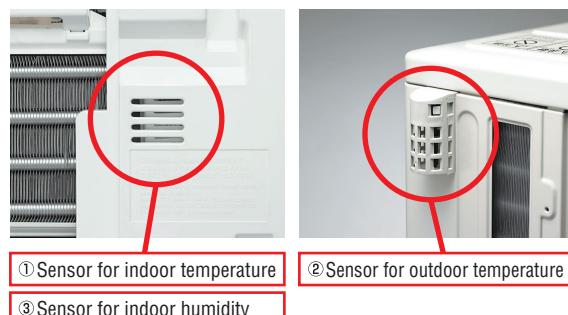

In addition to a jet airflow system delivering uniform winds to every corner, it has an optimized serration stabilizer configuration, which ensures smooth wind flow. It makes it possible to lower operation noises further by minimizing the interaction between wind flows and the fan.

## Three Sensors

Control of room temperature and humidity is very important for people to live a comfortable life.

Use of three sensors to control indoor temperature, indoor humidity and outdoor temperature enable unit to obtain optimum air-conditioning.

① Sensor for indoor temperature

② Sensor for outdoor temperature

③ Sensor for indoor humidity

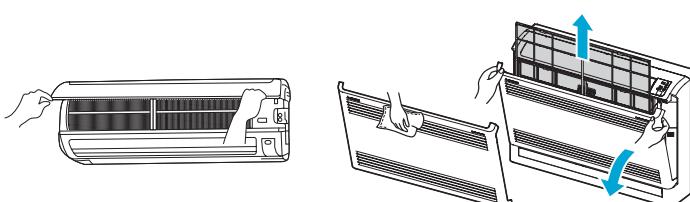

- Applied models
- ① ② All SRK, SRF, SRR, FDTC
- ③ SRK50/60ZJX, SRF-ZE, SRK35ZJR, SRK35/50ZJ, SRK35/50ZJP, SRF-ZJX

## Washable filter and easy cleaning of air inlet panel

Removing air filter is quite easy.

Keeping air filter clean is effective way to save energy and to keep the original powerful performance.

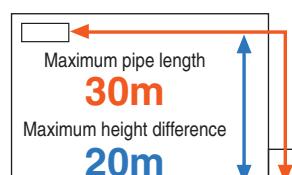

Air inlet panel is also removable and can be cleaned easily.

- Applied models
- All SRK, SRF

## Long piping length

Piping length has been extended and design flexibility has been improved.

- Applied models
- SRK50/60ZJX, SRF50ZJX, FDTC40/50/60VD, SRF-ZE

## Clean Operation / Filter

### Allergen Clear System

The operation is operated for 2 hours after the unit has stopped its normal operation. The indoor unit is dried up and growth of mold is restrained.

### Self Clean Operation

The system is equipped to suppress the influence of the allergen caught by the filter by controlled the temperature and humidity.

### Allergen Clear Filter

The filter breaks down the pollen, lice, and all allergens that live on cat skins, etc. and deactivates them.

### Natural Enzyme Filter

Enzymes used in the filter are naturally occurring lytic enzymes which attack cell walls of microorganisms trapped on the filter and destroy them.

### Photocatalytic Washable Deodorizing Filter

It keeps air fresh by deodorizing the molecules causing odor. The deodorizing ability can be easily restored simply by cleaning and exposing to the sunlight.

## Comfortable Functions

### Fuzzy Auto Mode

Automatically, the unit determines its operating mode and temperature setting based on a fuzzy calculation, and adjusts the inverter frequency.

### Automatic Operation

The air conditioner automatically selects from among heating, cooling and dry operations.

### "HI POWER" Operation

The unit can operate continuously in "HI POWER" mode for 15 minutes. This mode is convenient to reach the desired temperature quickly.

### Three "Hot" System

This series offers three "hot" systems. "Hot start" allows the unit to begin operating immediately, while the "hot spurt" fast-heating system works to increase the temperature setting by two degrees. The "hot keep" system is used during automatic defrosting or to prevent the influx of cool air. These three operational control systems help ensure comfortable and efficient heating.

## Comfortable Air Flow Functions

### 3D Auto

You can choose the best cooling or heating pattern by only pushing one button.

### Auto Flap Mode

Whatever the operating mode is, the unit automatically selects the optimal angle.

#### COOLING & DRY

Horizontal blowing

#### HEATING

Slant forward blowing

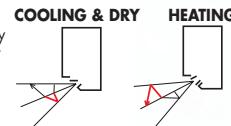

### Air Scroll

The swing of the flap causes the air flow to spiral as it reaches the floor, and breeze reaches all of a room.

Red line : moves quickly  
Black line : moves slowly

### Up/Down Flap Swing

Flap moves up and down continuously. The Up/Down flap swing can be fixed at the preferred operation angle.

### Right/Left Louver swing

Louver moves right and left continuously. The Right/Left louver swing can be fixed at the preferred operation angle.

### Air Outlet Selection

Both lower and upper air outlets and upper air outlet can be selected.

## Convenience & Economy Functions

### On Timer

This facility enables the operation to start a little earlier, so that the room approaches optimum temperature at ON time when the operation is started by ON-TIMER. Thus it will try to be at the temperature you want, when you want.

### Economy Mode

The unit realizes effective energy saving operation, while still keeping a comfortable cooling and heating condition.

### Dry Operation

The unit dehumidifies the room by intermittent cooling operation.

### Off Timer

The unit stops automatically at the set time.

### 24-hour On/Off Programmable Timer

By combining a start timer with a stop timer, you can register two timer operations a day. Once set, timers will faithfully start or stop the system at a specified time of the day repeatedly.

### Sleep Mode

The room temperature is automatically controlled during the set sleep mode period, ensuring that room temperature will not get too cold or too hot.

## Maintenance & Prevention Functions

### Microcomputer-Operated Defrosting

This mode automatically eliminates frost, and helps minimize excessive operation in other modes.

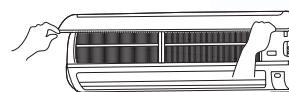

### Self-Diagnostic Function

In the case that the air conditioner malfunctions, an internal microcomputer automatically runs a self-diagnosis. (Inspection and repair should be performed by authorized dealers.)

### Detachable Indoor Air Inlet Panel

The air inlet panel on the indoor unit opens and closes easily, making filter cleaning simple. The suction panel can also be removed.

When removing the air inlet panel for internal cleaning or others, open the grill by 65 degrees and then pull it to this side.

## Others

### Back-up Switch

On the main unit, there is a backup on/off switch, which is useful when you can't use remote control, or batteries are flat.

### Auto Restart Function

Power blackout auto restart function is a function that records the operational status of the air-conditioner immediately prior to it being switched off by a power cut, and then automatically resumes operations at that point after the power has been restored.

### 24-hour ION

Tourmaline-coated sheet generates negative ions around the clock. Even when the air conditioner is not running, it generates as many negative ions as a forest, stream or fall does, allowing you to experience them without incurring any electricity charges.

### Luminous Button

With wireless "Luminous" remote controls that even "glow in the dark", it is possible to operate all desired functions of the unit with the click of a button.

\* Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

# The industry's highest COP levels

Our new models, SRK20/25/35ZJX-S have reached the highest level of COP (coefficient of performance) in the industry with full model change both of indoor and outdoor units, utilizing advanced technologies which have been applied for our larger models SRK50/60ZJX-S.

## Movable air inlet panel

Applying a movable air inlet panel, minimization of air resistance and advanced design are realized.

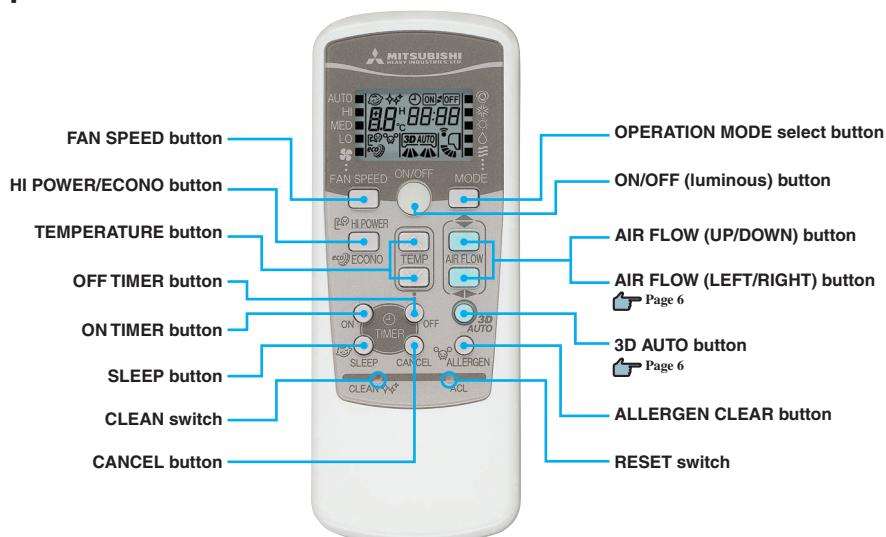

## Unification of indoor unit design

All the ZJX series have the same design for indoor units with a sophisticated flat front panel.

## Remote control

### Operation section

The above illustration shows all controls, but in practice only the relevant parts are shown.

Floor type

Standard equipment

SRC25ZJX-S, SRC35ZJX-S

SRC50ZIX-S

SRF25ZJX-S, SRF35ZJX-S, SRF50ZJX-S

All SRF-ZJX series can be selected for use as indoor units in the combination with SCM Multi system outdoor unit.

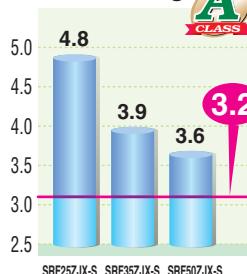

## The highest COP level in the industry

Our experience, research and development efforts with the floor standing series have realized the highest COP level in the industry and all models clear A class level by wide margin. Indoor units are totally new design with optimum balance of air outlet direction and sufficient air flow volume.

\* Indicates the value in an anechoic chamber. During operation these values are somewhat higher due to ambient conditions.

# Sophisticated Design

With classy semi flat front panel in chic white, the new series fit in various kinds of rooms and create relaxing atmosphere. Choice of wall hanging, floor standing or behind gallery installation is available.

# Quiet Operation

Thanks to optimum balance of air outlet direction and sufficient air flow volume, the sound level has been minimized. The level of SRF25ZIX-S in the cooling lo mode is 26dB(A) only.

# Auto air outlet selection

## Heating operation:

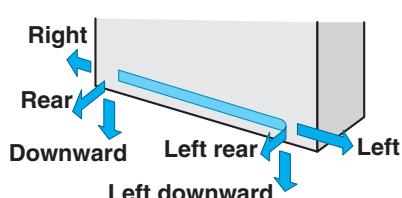

In case both lower and upper outlets operation with Auto fan speed mode is selected, the lower outlet will be kept for twenty minutes after the start or until room temperature is close to reaching the setting point. And then the air outlet will change to both outlets. That state will be maintained until the switch is turned off.

Automatic adjustment of lower air outlet direction prevents stirring up of warm air and keeps optimum comfort at floor level.

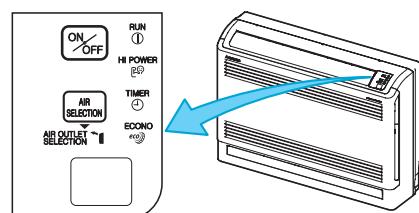

# Installation workability

Piping and drain hose connection can be selected out of 6-directions.

# Convenient to use operation

Besides on/off operation, simultaneous lower and upper air outlets or upper outlet can be selected by air flow direction button. Further control can be arranged by a remote control.

600 x 600 ceiling

**NEW**

FDT-C25VD, FDT-C35VD,  
FDT-C40VD, FDT-C50VD,  
FDT-C60VD

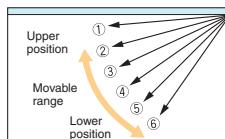

## Individual flap control system

According to room temperature conditions, four directions of air flow can be controlled by individual flap as preferred. As individual flap control is available even after installation, installation area became wider than before.

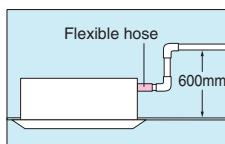

## Flap control system

Selection of louver position is possible. Louvers can be set at different angles.

## 600mm Drain Pump is mounted

Drain can be discharged upward by 600mm from the ceiling surface close to the indoor unit. It allows a piping layout with a high degree of freedom depending on the installation location.

All FDT-C-VD series (except FDT-C40VD) can be selected for use as indoor units in the combination with SCM Multi system outdoor unit.

## OUTDOOR UNIT

**SCM40ZJ-S, SCM45ZJ-S**  
**SCM50ZJ-S, SCM60ZJ-S**

**SCM71ZJ-S, SCM80ZJ-S**

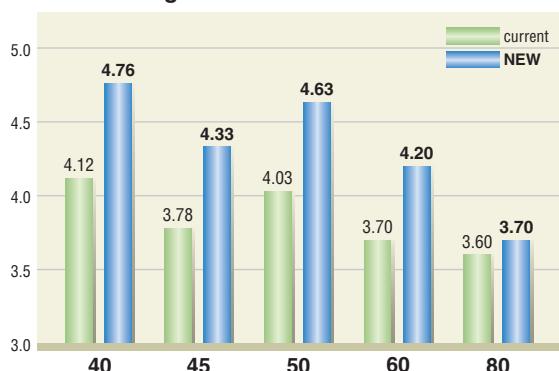

# The industry's highest COP levels

Our new models, SCM40~80ZJ-S have realized the highest level of COP (coefficient of performance) in the industry with full model change to both of outdoor and indoor (SRK series) units.

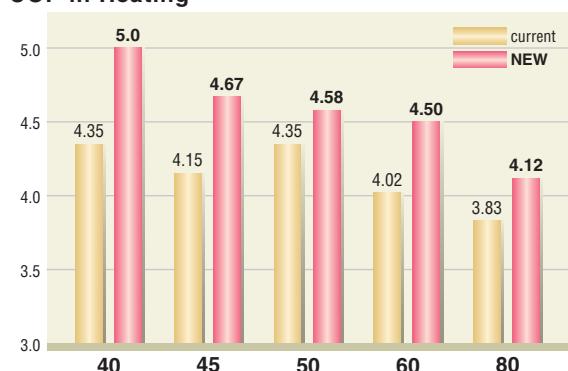

Outdoor unit uses new advanced compressors with new inverter control (Vector control) and new M shape fin.

Indoor units SRK series are the latest series, which are common to both of single and multi system, using the new heat exchanger and improved air flow system.

## EER in Cooling

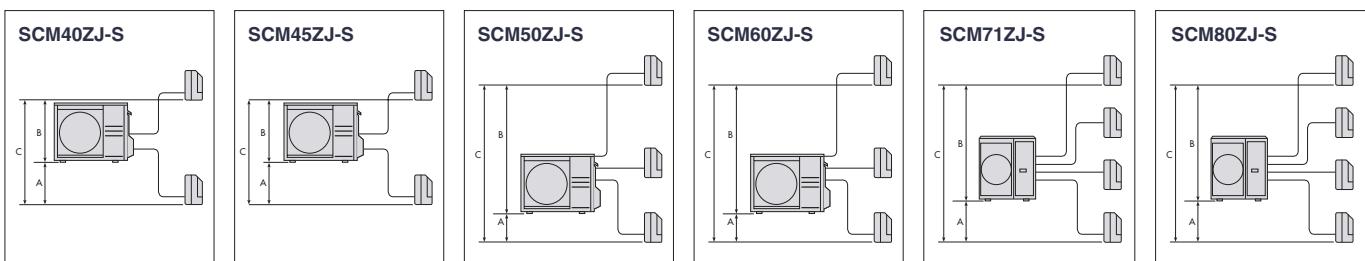

## COP in Heating

## PIPING LENGTH

**Limit** The maximum piping length of the refrigerant pipes for the outdoor units, and the maximum height difference for the outdoor units are as shown below.

		SCM40ZJ-S	SCM45ZJ-S	SCM50ZJ-S	SCM60ZJ-S	SCM71ZJ-S	SCM80ZJ-S
	length for one indoor unit	under 25m					
	total length for all rooms	under 30m	under 30m	under 40m	under 40m	under 70m	under 70m
height difference	lower installation spot of the indoor unit (A)	under 15m	under 15m	under 15m	under 15m	under 20m	under 20m
	upper installation spot of the indoor unit (B)	under 15m	under 15m	under 15m	under 15m	under 20m	under 20m
	maximum height difference of the indoor units (C)	under 25m					
	length of precharged refrigerant pipe	30m	30m	40m	40m	40m	40m

# INDOOR UNIT

Unit: mm

## Floor standing type

**SRF25ZJX-S SRF35ZJX-S SRF50ZJX-S**

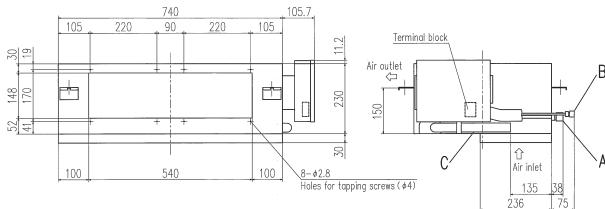

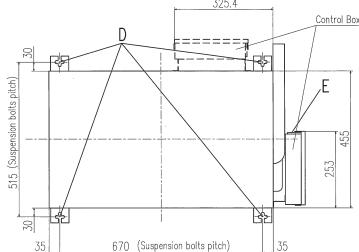

Symbol	Content
A	Gas piping Model 50 : #12.7 (1/2") (Flare)
B	Liquid piping #6.35 (1/4") (flare)
C	Hole on wall for right rear piping (#65)
D	Hole on wall for left rear piping (#65)
E	Drain hose VP16
F	Screw point fasten the indoor unit #5
G	Outlet for piping (on both side)

## Ceiling Concealed

**SRR25ZJ-S SRR35ZJ-S SRR50ZJ-S SRR60ZJ-S**

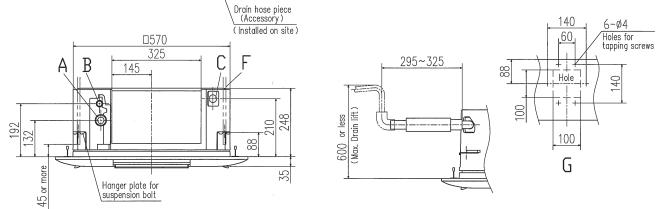

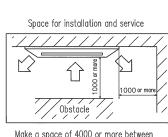

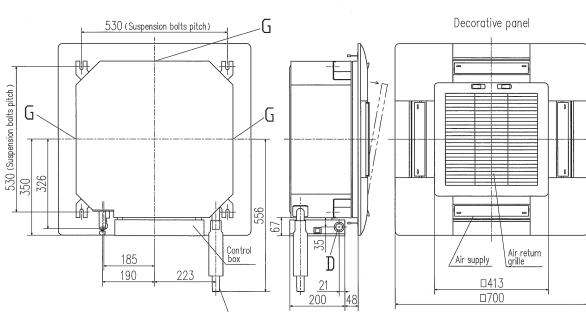

Symbol	Content
	Model
	SRP25ZJ-S, 35ZJ-S
A	Gas piping #9.52 (3/8") (Flare)
B	Liquid piping #6.35 (1/4") (flare)
C	Drain piping VP16
D	Suspension bolts (M8)
E	Power supply intake (#35)

## 4way ceiling cassette type

**FDTC25VD FDTC35VD FDTC40VD FDTC50VD FDTC60VD**

Symbol	Content
A	Gas piping Model: 25.35 : #9.52 (3/8") (Flare) 40-60 : #12.7 (1/2") (Flare)
B	Liquid piping #6.35 (1/4") (Flare)
C	Drain piping #P20 (LD,20,0.26) Note (2)
D	Hole for wiring #25
E	Suspension bolts (M10 or M8)
F	Air outlet opening (Konekt art.)

## Before starting use

### Heating performance

The heating performance values (kW) described in catalog are the values obtained by operating at an outdoor temperature of 7°C and indoor temperature of 20°C as set forth in the ISO Standards. As the heating performance decreases as the outdoor temperature drops, if the outdoor temperature is too low and the heating performance is insufficient, use other heating appliances as well.

### Indication of sound values

The sound values are the values (A scale) measured in a chamber such as an anechoic chamber following the ISO Standards. In the actual installation state, the value is normally larger than the values given in the catalog due to the effect of surrounding noise and echo. Take this into consideration when installing.

### Use in oil atmosphere

Avoid installing this unit in an atmosphere where oil scatters or builds up, such as in a kitchen or machine factory.

If the oil adheres to the heat exchanger, the heat exchanging performance will drop, mist may be generated, and the synthetic resin parts may deform and break.

### Use in acidic or alkaline atmosphere

If this unit is used in acidic atmosphere such as hot spring areas having high level of sulfuric gases or in alkaline atmosphere including ammonia or calcium chloride, places where the exhaust of the heat exchanger is sucked in, or at coastal areas where the unit is subject to salt breezes, the outer plate or heat exchanger, etc., will corrode. Please ask a dealer or specialist when you use an air conditioner in places differing from a general atmosphere.

### Use in places with high ceilings

If the ceiling is high, install a circulator to improve the heat and air flow distribution when heating.

### Refrigerant leakage

The refrigerant (R410A) used for the Residential Air conditioner is non-toxic and inflammable in its original state.

However, in consideration of a state where the refrigerant leaks into the room, measures against refrigerant leaks must be taken in small rooms where the tolerable level could be exceeded. Take measures by installing ventilation devices, etc.

### Use in snowy areas

Take the following measures when installing the outdoor unit in snowy areas.

#### •Snow-prevention

Install a snow-prevention hood so that the snow does not obstruct the air intake port or enter and freeze in the outdoor unit.

#### •Snow piling

In areas with heavy snow fall, the piled snow could block the air intake port. In this case, a frame that is 50cm or higher than the estimated snow fall must be installed underneath the outdoor unit.

### Automatic defrosting device

If the temperature is low, and the humidity is high, frost will stick to the heat exchanger of the outdoor unit. If use is continued, the heating performance will drop.

The "Automatic defrosting device" will function to remove this frost.

After heating for approx. three to ten minutes, it will stop, and the frost will be removed. After defrosting, hot air will be blown again.

### Servicing the air-conditioner

After the air-conditioner is used for several seasons, dirt will build up in the air-conditioner causing the performance to drop. In addition to regular servicing, we recommend the maintenance contract (charged for) by a specialist.

## ⚠ Safety Precautions

### Air-conditioner usage target

The air-conditioner described in this catalog is a dedicated cooling/heating device for human use.

Do not use it for special applications such as the storage of foodstuffs, animals or plants, precision devices or valuable art, etc.

This could cause the quality of the items to drop, etc.

Do not use this for cooling vehicles or ships. Water leakage or current leaks could occur.

### Before use

Always read the "User's Manual" thoroughly before starting use.

### Installation

Always commission the installation to a dealer or specialist. Improper installation will lead to water leakage, electric shocks and fires.

Make sure that the outdoor unit is stable in installation. Fix the unit to stable base.

### Usage place

Do not install in places where combustible gas could leak or where there are sparks.

Installation in a place where combustible gas could be generated, flow or accumulate, or places containing carbon fibers could lead to fires.
