

Bulletin of The Natural History Museum

Botany Series

THE NATURAL
HISTORY MUSEUM
23 AUG 2002
PRESENTED
GENERAL LIBRARY

The Bulletin of The Natural History Museum (formerly: *Bulletin of the British Museum (Natural History)*), instituted in 1949, is issued in four scientific series, Botany, Entomology, Geology (incorporating Mineralogy) and Zoology.

The Botany Series is edited in the Museum's Department of Botany
Keeper of Botany: Prof. R. Bateman
Editor of Bulletin: Ms S.A. Henderson

Papers in the Bulletin are primarily the results of research carried out on the unique and ever-growing collections of the Museum, both by the scientific staff and by specialists from elsewhere who make use of the Museum's resources. Many of the papers are works of reference that will remain indispensable for years to come. All papers submitted for publication are subjected to external peer review before acceptance.

SUBSCRIPTIONS *Bulletin of the Natural History Museum*, Botany Series (ISSN 0968-0446) is published twice a year (one volume per annum) in June and November. Volume 32 will appear in 2002. The 2002 subscription price (excluding VAT) of a volume, which includes print and electronic access, is £88.00 (US \$155.00 in USA, Canada and Mexico). The electronic-only price available to institutional subscribers is £79.00 (US \$140.00 in USA, Canada and Mexico).

ORDERS Orders, which must be accompanied by payment, may be sent to any bookseller, subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; or in the USA, Canada and Mexico: Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 1011-4211, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered members should provide their VAT registration number. Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Postmaster: send address changes in USA, Canada and Mexico to: *Bulletin of the Natural History Museum*, Botany Series, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 105783-4930. Claims for missing issues should be made immediately on receipt of the subsequent issues.

Orders and enquiries for issues prior to 2002 should be sent to: Intercept Ltd., P.O. Box 716, Andover, Hampshire SP10 1YG, Telephone: (01264) 334748, Fax: (01264) 334058, Email: intercept@andover.co.uk, Internet: <http://www.intercept.co.uk>

ADVERTISING Apply to the Publisher. Address enquiries to the Advertising Promoter.

GENERAL LIBRAR

SYNOPSIS. *Syrrhopodon usambaricus* Broth. ex S. Orbán is placed in synonymy with *Syrrhopodon asper* Mitt., and *Syrrhopodon lisowskii* S. Orbán in synonymy with *Syrrhopodon gardneri* (Hook.) Schwägr. The distinctive features of *Syrrhopodon stuhlmannii* Broth. are discussed, and the only records of *Calymperes moluccense* Schwägr. from Africa are redetermined as *Calymperes palisotii* Schwägr.

The research for this paper was largely undertaken in response to difficulties encountered in identifying the specimens of *Syrrhopodon* collected during the British Bryological Society Expedition to Mulanje Mountain, Malawi, 1991. Determination of this material would have been considerably more difficult without the important primary accounts of the African species of *Syrrhopodon* by Orbán (1981) and Orbán & Reese (1986).

Syrrhopodon asper Mitt. in *J. Linn. Soc. Bot.* 7: 151: 1863. Type: Tanzania, Kilimanjaro, Hannington s.n. (NY!-holotype, BM!-isotype).

Fig. 1.

Syrrhopodon usambaricus Broth. ex S. Orbán in *Acta Bot. Hung.* 24: 113 (1978), syn. nov. Type: Tanzania, Usambara, Lutindi, 1902, Liebusch s.n. (H-BR!-holotype).

DISCUSSION. The leaves in *Syrrhopodon asper* Mitt. consist of a linear-lanceolate chlorophyllose limb extending from a subelliptical hyaline base. They possess a prominent marginal rib and are spinulose to various degrees. As in many species of *Calymperes* and *Syrrhopodon*, the leaves in different specimens can vary widely in their relative dimensions (Fig. 1a–c), and range from a stubby 4 mm to a slender 7.5 mm long. The marginal ribs, viewed in cross-section, are well differentiated. Commonly, a superficial layer of chlorophyllose cells encloses small dorsal and ventral groups of stereids that are separated by a median row of guide cells (a costa-like arrangement of tissues). This arrangement of cells in the marginal rib is plainly developed in the leaves of some specimens and less well developed in others (Fig. 1e–h). Towards the base in all leaves, the marginal rib becomes a flattened, undifferentiated, often unistratose band of linear cells. The region in the leaf base in which the margin transforms from a differentiated rib to an undifferentiated band also varies between specimens.

The type specimen of *Syrrhopodon usambaricus* Broth. ex S. Orbán (*Liebusch* s.n., H-BR) represents a form of *S. asper* Mitt. with tall, slender shoots. The leaves are relatively fine and narrow, and hardly curl when dry. The marginal ribs are well differentiated, and in the leaf base, the transition from polystratose rib to undifferentiated band occurs well below the apex of the hyaline lamina (Fig. 1i). In the isotype material of *S. asper* (Hannington s.n., BM) the shoots are small and have shorter, stubbier leaves. These curl when dry, are notably spinulose, and have prominent, well-differentiated marginal ribs. The region along the leaf at which the margin transforms from differentiated polystratose rib to unistratose/bistratose band tends to be adjacent to the apex of the hyaline lamina (Fig. 1k).

Intermediate expressions of these contrasting features of *Hannington* s.n. and *Liebusch* s.n. are apparent in the great range of material now available for examination, and indicate that these superficially distinct type specimens represent extreme forms of the same species. For example, Wood 1726 (Tanzania, BM, BM-K) has leaves proportioned like those of the type of *Syrrhopodon asper* that become curled when dry, but some cross-sections through the distal hyaline leaf base show a degree of differentiation closer to that in the type of *S. usambaricus* (Fig. 1j).

SPECIMENS EXAMINED. **Malawi.** Mulanje Mountain, June 1991: Hodgetts 2041a, 2047c, 2220b, 2532a, 2669a (RNG!); Kathumba M5915a (RNG!), M5916 (BM!); Kungu M3123a (RNG!); Longton M8054a, M8058a, 8425b (RNG!); Magombo M4041b, 4042b (RNG!); Porley 35a, 278a (RNG!); Russell M6055b, M6063a, M6068a (RNG!); Wigginton M1034a, M1682a (RNG!), M1201a (BM!). **Uganda.** Kadese, Ruwenzori Mts, above Miniba camp, 2700 m, 22 January 1962, Loveridge JPL397 (BM!). **Kenya.** Mutha Hill, August 1938, Boy Joana 7519 (BM!, BM-K!). **Tanzania.** Usambara, Lutindi, 1911, Liebusch s.n. (H-BR!); Usambara Ouset, crête Matundsi-Mashindei, SE of Ambangudu Tea Estate, 1300 m, 5 February 1985, Pócs 8533/R (BM!); Kilimanjaro: above Marangu, 2000 m, 13 July 1948, Hedberg 1144e (BM-K!); on path between Marangu and Bismark Hut, 2400 m, 24 February 1953, Wood 1726 (BM!, BM-K!). Morogoro District: Nguru Mts, ridge behind Dikurura Valley, 1700–1900 m, 6°02'S 37°32'E, Pócs 89119/W (BM!); Nguru ya Ndege Hill NNW of Morogoro town, summit, 1200–1350 m, 6° 42'S 37° 36'E, Pócs & Knox 88252/H (BM!). **Mozambique.** Namúli, Makua Country, 1887, Last s.n. (BM-K!).

Syrrhopodon stuhlmannii Broth. *Bot. Jahrb. Syst.* 24: 240 (1897). Type. Tanzania, Uluguru, Bergwald, 1600 m, Stuhlmann 8809 (BM!-isotype).

Fig. 2a–d.

DISCUSSION. In Orbán & Reese (1986) *Syrrhopodon usambaricus* Broth. ex S. Orbán [=*Syrrhopodon asper* Mitt.] is keyed out beside *S. stuhlmannii* Broth. Large specimens of *S. asper* are superficially similar to those of *S. stuhlmannii*. Both species possess leaves with marginal ribs that have a costa-like structure (viewed in cross-section). However, the species are easily distinguished. In leaves of *S. stuhlmannii* the marginal ribs are mostly smooth; the cells of the chlorophyllose lamina are ventrally roundly protuberant, and dorsally flat to barely protuberant (Fig. 2a–d). The rib at the margin of the distal hyaline lamina is very well developed and strongly differentiated, with a median row of guide cells often more than nine cells wide (Fig. 2c, d). In contrast, most superficial cells of the marginal

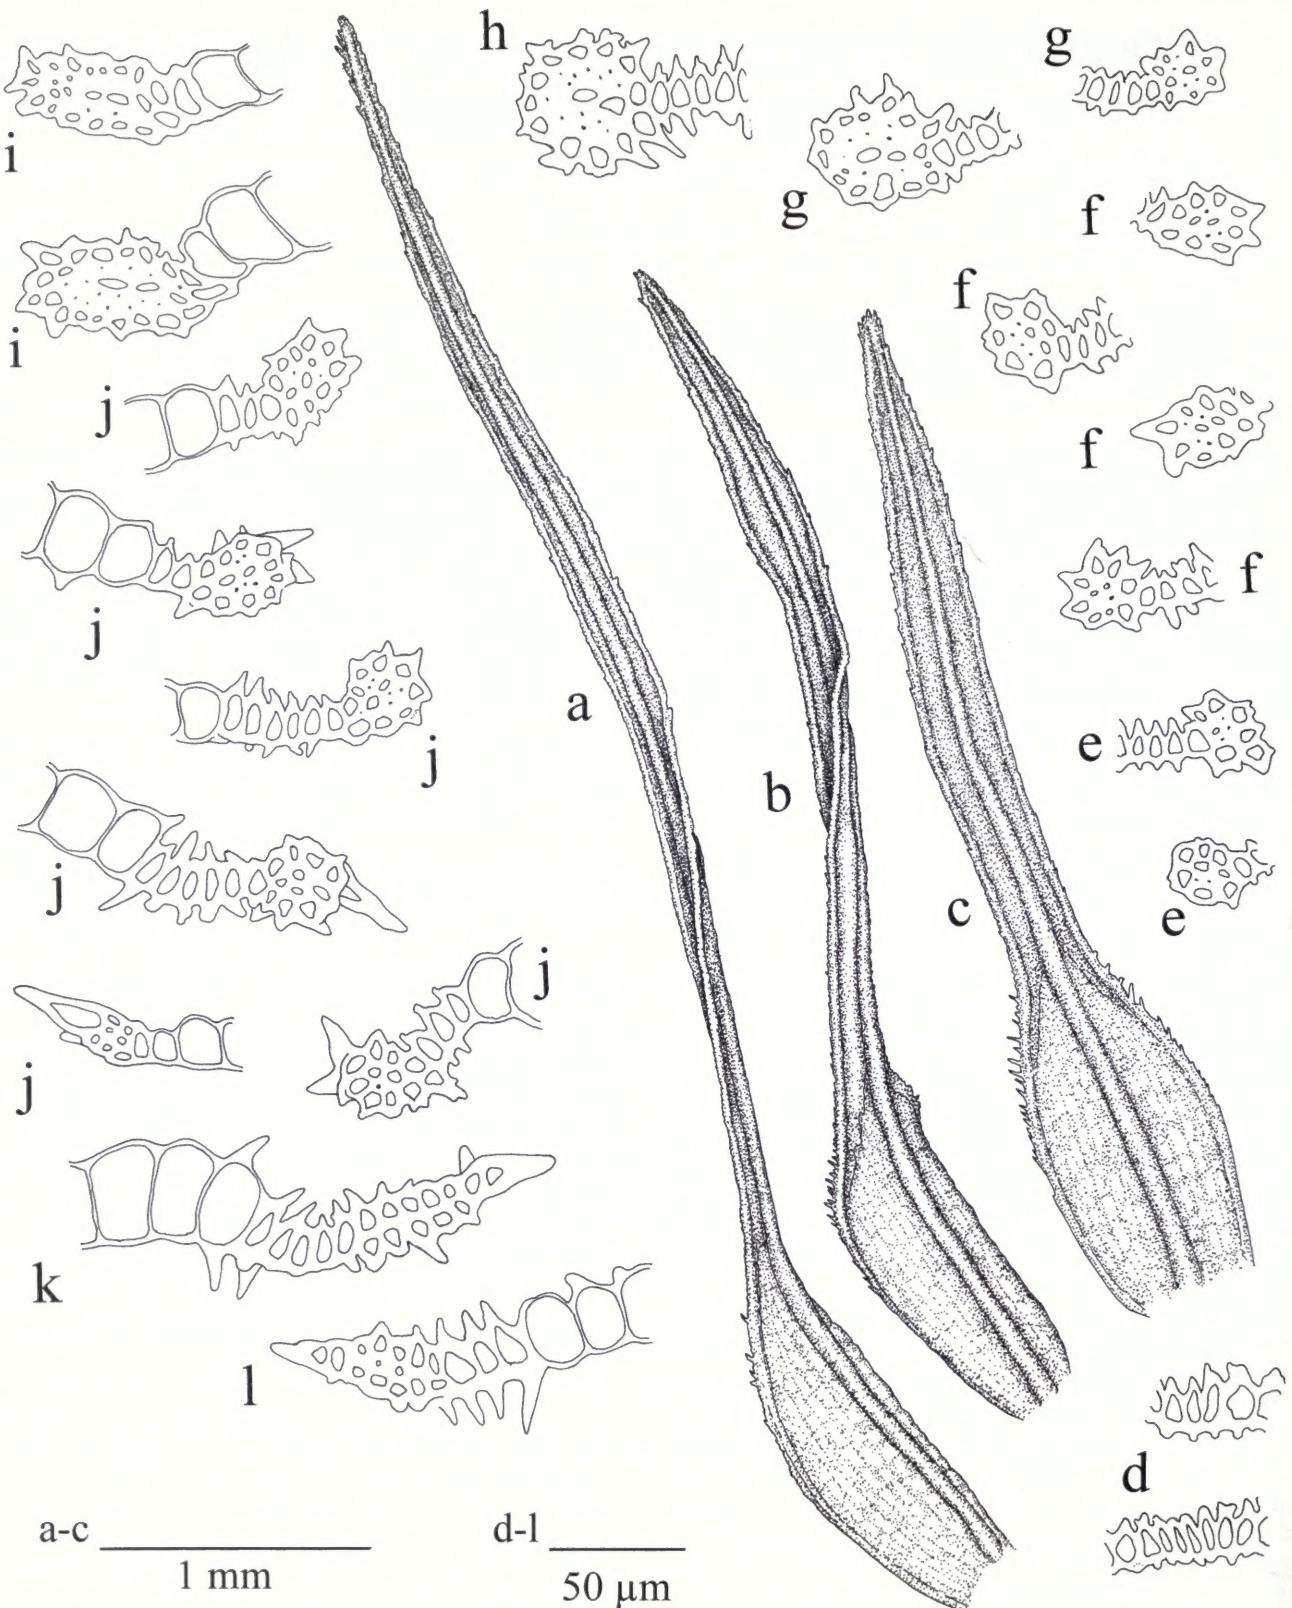

Fig. 1 a-l. *Syrrhopodon asper* Mitt. a-c: leaves; d-l: cross-sections of leaf through (d: chlorophyllose lamina, e-h: margin of chlorophyllose lamina, i-l: margin around distal hyaline lamina. a Drawn from Pócs 8533R (BM). b Drawn from Pócs & Knox 88252/H (BM), c Drawn from Boy Joana 7519 (BM). d, g, i, Drawn from Liebusch s.n. (H-BR, holotype of *Syrrhopodon usambaricus*). e, j Drawn from Wood 1726 (BM). f, k Drawn from Hannington s.n. (BM, isotype of *Syrrhopodon asper*). h, l Drawn from Pócs 89119/W (BM).

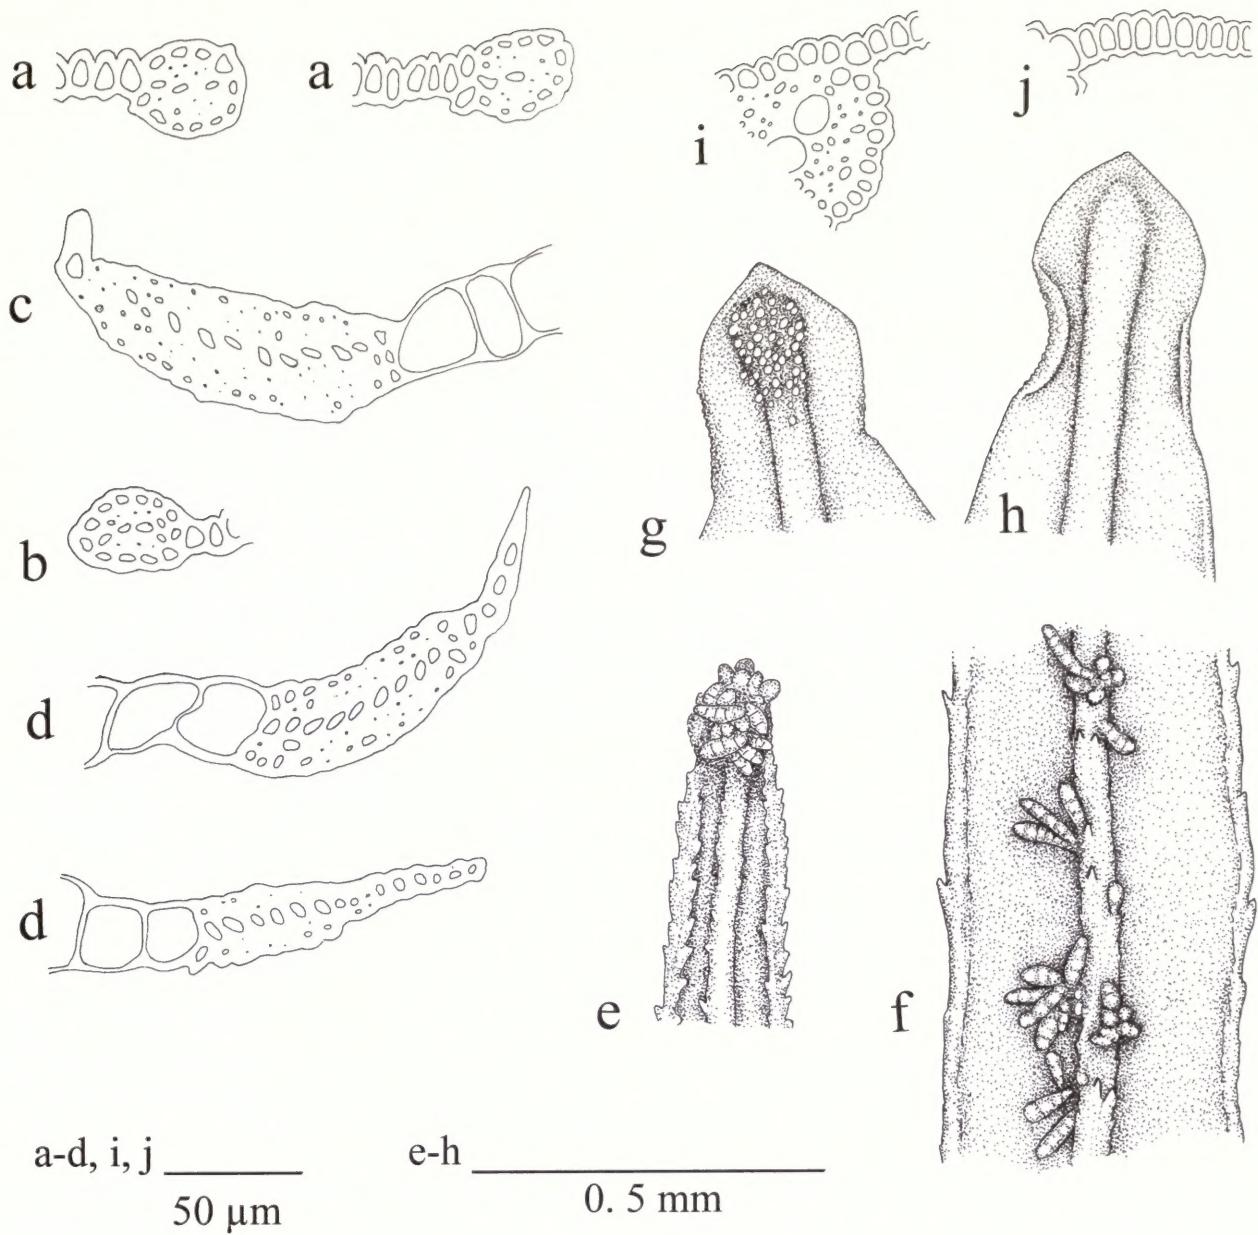

Fig. 2 a-d. *Syrrhopodon stuhlmannii* Broth. a-d: cross-sections through leaf margins (a, b: in chlorophyllose limb, c, d: in distal hyaline base). e, f: *Syrrhopodon gardneri* (Hook.) Schwägr. e, f: gemmae on leaves (e: in cluster at apex (ventral surface), f: in groups in mid-leaf). g-j. *Calympere palisotii* Schwägr. g, h: apices of gemmiferous leaves (g: in ventral view showing gemmae-producing region (gemmae lost), h: in dorsal view); i, j: cross-sections of chlorophyllose limb (i: showing half of costa, and j: lamina). a, c Drawn from Pócs & Knox 89053/AK (BM). b, d Drawn from Stuhmann 8809 (BM, isotype of *Syrrhopodon stuhlmannii*). e Drawn from Kathumba M5073b (RNG). f Drawn from Longton M8375a (RNG). g, h, i, j Drawn from Lisowski 50255 (EGR).

ribs and the cells of the chlorophyllose lamina in *S. asper* are replete with acute projections (Fig. 1d-l). If apparent at all, the median row of guide cells in the rib at the margin of the distal hyaline lamina is usually less than six cells wide (Fig. 1i-l).

Syrrhopodon stuhlmanni Broth. remains a distinct species, apparently endemic to Tanzania.

SPECIMENS EXAMINED. **Tanzania.** Uluguru, Bergwald, 1600 m, Stuhmann 8809 (BM!-isotype of *S. stuhlmannii*). Uluguru Mountains, 30 July 1941, Eccles AH8648 (BM!), AH8652 (BM!). Morogoro District, Nguru Mts, ridge above 'Spirit Lake' at the north source of

Chazi River above Chazi Falls, 2000–2100 m, 6°00'S 37°30'E, 4 February 1989, Pócs & Knox 89053/AK (BM!); Lushoto District, West Usambara Mts, 5 km east of Mgwasho village on west slope of Gonja Hill, 1600–1700 m, 4° 47'S 38° 33'E, Pócs & Krog 88205/R (BM!).

***Syrrhopodon gardneri* (Hook.) Schwägr., Sp. musc. frond. suppl. 2 (1): 110 (1824).**

Fig. 2e, f, 3.

***Calympere gardneri* Hook. Musci Exot. 2: 146 (1819). Type: Nepal, Gardner [1205] (BM!-holotype, BM!-isotype).**

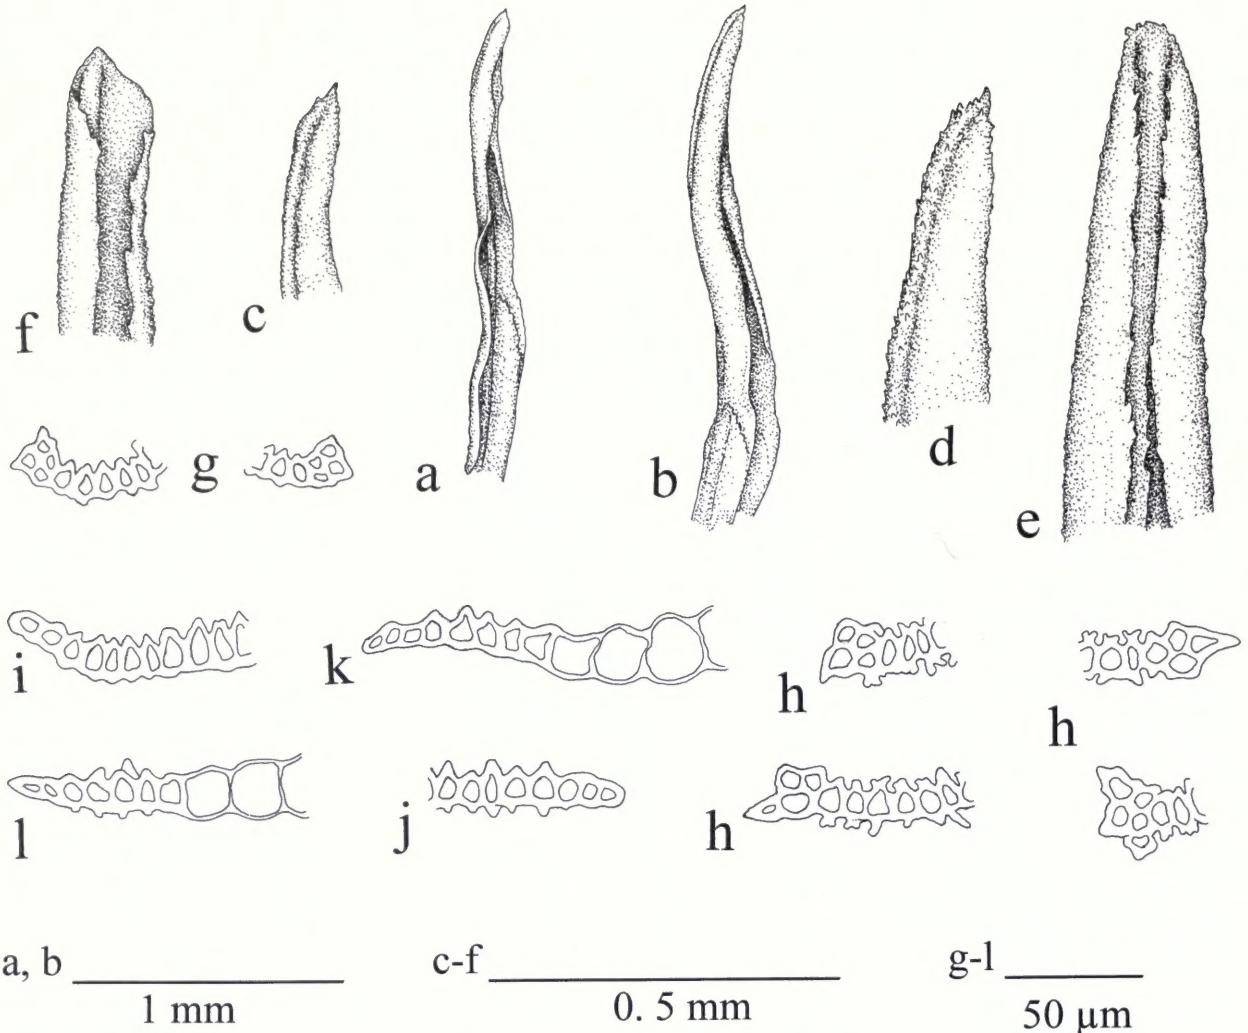

Fig. 3 a-l. *Syrrhopodon gardneri* (Hook.) Schwägr. a-b: leaves; c-f: details of leaf apex, (c, d: in lateral view, e, f: in ventral view); g-l: cross-sections through leaf margin (g, h: in chlorophyllose limb, i, j: around apex of hyaline base, k, l: in distal hyaline base). a, c, f, g, i, k Drawn from Gardner H1205 (BM, isotype of *Syrrhopodon gardneri*). b, d, e, h, j, l Drawn from Lisowski s.n. (EGR, holotype of *Syrrhopodon lisowskii*).

Syrrhopodon lisowskii S. Orbán in *Egri Ho Si Minh Tanárképző Föis. Füzetei* 18: 81 (1987), syn. nov. Type: Zaire, Haut Shaba, Env. de Kasumbalesa, Colline Kibwe I., 1400 m, 20 March 1971, Lisowski s.n. (EGR!-holotype).

DISCUSSION. The holotype of *Syrrhopodon lisowskii* S. Orbán possesses narrow, gemma-bearing leaves that have strongly incurved margins. Orbán & Reese (1986) use these features to distinguish *S. lisowskii* from *S. gardneri* (Hook.) Schwägr. However, cross-sections of the leaves from the types of *S. gardneri* and *S. lisowskii* are indistinguishable (Fig. 3–l), and an examination of a large number of specimens has shown that leaves with incurved margins and/or bearing gemmae fit comfortably within the range of features characteristic of *S. gardneri*.

In the latter species, young leaves often tend to possess strongly incurved margins and can have blunt, almost cucullate apices. The isotype material of *Syrrhopodon gardneri* (BM) has many leaves with a lamina approaching the degree of incurvature apparent in *S. lisowskii* (Fig. 3e, f). Gemmae occur in many specimens of *S. gardneri* and their presence is not correlated with the relative breadth of the leaf or incurvature of the leaf margins. They may be

produced on the ventral and sometimes dorsal surfaces of the costa, often in a bunch at the leaf apex (Fig. 2e). In a collection from Malawi (*Longton* M8375a) gemmae occur in small groups at intervals along the costa, associated with the loosely transverse rows of prominent costal teeth. The leaves of this specimen are not especially narrow nor are the margins of the chlorophyllose lamina particularly incurved (Fig. 2f). In all respects it is identifiable as *S. gardneri*.

SPECIMENS EXAMINED. **Malawi.** Mulanje Mountain, June 1991: *N. Hodgetts* M2008e, M2026d, M2048b, M2066a, M2067b, 2383a, 2555a, M2638a, 2661a, 2662c (RNG!); *Kathumba* M5058(BM!), M5073b(RNG!); *Kungu* M3241 (BM!), M3267c, M3268a, M3033 (RNG!); *Longton* M8231a, M8232a, M8375a, M8648a (RNG!); *Magombo* M4238a (RNG!); *O'Shea* 7107b, 7108d, 7110a, 7111b, 7138a, 240a, 7240b pro parte, 7241b, M7404c, M7406b, M7508a, M7509b (RNG!), 7318a, 7389a (BM!); *Porley* 98a, 232a, 317a, 329a (RNG!); *Wigginton* M1009b pro parte, M1024b pro parte, M1217a, M1219a, M1225a, M1243a, M1247a, M1417a, M1576a (RNG!). Zomba Plateau, forestry campsite opposite Chawe School, 1470 m, 8 August 1993, *Stevenson* s.n. (BM!). **Uganda.** Ishasha

Gorge, Kanunga, 7500 ft, 6 June 1952, *Lind* 14 (BM!); Bwindi National Park, forest 1 km east of the Zaire border near Rukubira, 1680 m, 0°59'53"S 29°35'50"E, 3 February 1996, *Matcham* U1118a (BM!). **Democratic Republic of Congo.** Lushiji, October 1923, *Overlaet* 347 (BM!). **Angola.** Huilla District, near Humpata, 3800–5500 ft, May 1860, *Welwitsch* 6 (BM!- isotype of *Calymperes welwitschii* Dub.). **Madagascar.** Ankafana, 1880, *Deans Cowan* s.n. (BM!).

Calymperes palisotii Schwägr. *Sp. musc. frond. suppl.* **1** (2): 334 (1816). Type: Nigeria, 'Oware' [Warri], *Palisot de Beauvois* s.n. (BM!- lectotype).

Fig. 2g-j.

DISCUSSION. Orbán (1995) identified three specimens from continental Africa as *Calymperes palisotii* ssp. *moluccense* (Schwägr.) M. Menzel in M. Menzel & Schultze-Motel [=*Calymperes moluccense* Schwägr.]. These specimens, collected by Lisowski from Zaire and Guinea, would have been the first African records for *C. moluccense*. Unfortunately, all three collections are *Calymperes palisotii* Schwägr. (non *C. moluccense*). The cells of the chlorophyllose lamina are ventrally roundly protuberant (Fig. 2i, j) and the lamina at the apex of gemmiferous leaves forms a broad point (Fig. 2g, h). These features are typical of *C. palisotii*, and are especially well represented in collections from Africa. As explained by Ellis (1987) and Ellis & Tan (1999), *C. moluccense* (syn. *C. palisotii* ssp. *moluccense*) is distinguishable from *C. palisotii* by its

possession of laminal chlorocysts that are ventrally drawn out as acute, often coronate-papillose projections, and gemmiferous leaves with a rounded rather than broadly pointed apex.

Calymperes moluccense Schwägr. has yet to be found in continental Africa or the adjacent islands of the Indian Ocean, and must still be regarded as an Indo-Pacific species.

SPECIMENS EXAMINED. **Guinea.** Conakry, Campagne Minière, 23 December 1961, *Lisowski* 918 (EGR!). **Democratic Republic of Congo.** Haut-Zaire, Kisangani: près de la Porte, 11 December 1977, *Lisowski* 50255 (EGR!); centre de la ville, 22 December 1977, *Lisowski* 50379 (EGR!).

ACKNOWLEDGEMENTS. I am grateful to the directors and staff of EGR (especially Dr S. Orbán), NY and RNG for the loan of specimens.

Typification of *Ranunculus bullatus* L. (Ranunculaceae)

RICCARDO M. BALDINI

Museo Botanico, Università degli Studi di Firenze, via G. La Pira 4, I-50121 Firenze, Italy; rbaldo@unifi.it

CHARLES E. JARVIS

Department of Botany, The Natural History Museum, Cromwell Road, London SW7 5BD; c.jarvis@nhm.ac.uk

SYNOPSIS. The typification of *Ranunculus bullatus* L. is discussed and a lectotype and epitype chosen which maintain usage of the name in the sense of subsp. *bullatus*. *Ranunculus bullatus* subsp. *cytheraeus* (Halácsy) Vierh. is recognized at species rank, and the combination *R. cytheraeus* (Halácsy) Baldini is made to accommodate it. Both taxa are described and illustrated. The names *R. bullatus* L. var. *cuneifolius* Coustur. & Gand., *R. bullatus* L. var. *cyrenaicus* Pamp., *R. bullatus* L. var. *ovatus* Freyn, *R. bullatus* L. var. *prolifer* Gennari, *R. semicalvus* Jord. & Fourr. and *Ionosmanthus plantagineus* Jord. & Fourr. are also typified.

INTRODUCTION

Ranunculus bullatus L., s. l., is a polymorphic taxon distributed in the Mediterranean area (Greuter et al., 1989; Jalas & Suominen, 1989) by scattered populations from Portugal to Greece and Northern Africa (Maire, 1964). It is well-known that there are many difficulties in distinguishing the several infraspecific taxa described within this species (Gandoger, 1889; Vierhapper & Reichinger fil., 1935; Davis, 1965) because many diagnostic characters overlap. As a part of a wider study of this group of taxa in Europe (Baldini, in prep.), it is necessary to establish the correct application of the Linnaean name.

LECTOTYPIFICATION OF *RANUNCULUS BULLATUS* L.

Linnaeus (1753: 550) used a diagnosis ‘*Ranunculus foliis ovatis serratis, scapo nudo unifloro*’ cited from his earlier *Hortus Cliffortianus* (Linnaeus, 1738) along with three synonyms from, respectively, Bauhin (1623), Dodoens (1583) and Clusius (1601). He also recognized one unnamed variety (var. β) based on a series of polynomials of Morison (1680) ‘β. *Ranunculus latifolius bullatus autumnalis, flore pleno & prolifero. Moris. hist. 2. p. 447. s. 4. t. 31. f. 49. 50. 51.*’. Finally, Linnaeus added ‘*Habitat in Lusitania, Creta*’, and a symbol to indicate a perennial life form (Fig. 1).

Although there are two sheets referred to this taxon in Linnaeus’ Herbarium at LINN (numbering follows Savage, 1945), 715.10 lacks the relevant *Species Plantarum* number (i.e. ‘8’) and is therefore a post-1753 addition to the herbarium (see Turland & Jarvis, 1997: 458–459), and 715.11 is entirely unannotated. We therefore do not accept either sheet as original material for this name, although both are identified (e.g. by Davis, 1965: 179) as belonging to the typical subspecies. There is no relevant material in any of the other ‘general’ Linnaean collections (e.g. H, MW, S, SBT, UPS), nor is there any in the Burser Herbarium (UPS) which can be associated with the Bauhin polynomial cited by Linnaeus. However, there is a specimen in the Clifford Herbarium (Herb. Clifford: 229, *Ranunculus* 7, BM! (viewable at <http://www.nhm.ac.uk/botany/databases/clifford>) which can be associated with both var. β of *Hortus Cliffortianus* (Linnaeus, 1738) and var. β of *Species Plantarum*

(Linnaeus, 1753) and is a double-flowered form (‘*flore pleno & prolifero*’) of *R. bullatus*. It is similar to the plant portrayed by Cornut (1635: t. 95; cited by Linnaeus as a synonym in 1738 but omitted in 1753) and Morison (1680: s. 4, t. 31, f. 50). The Clifford specimen is original material for the name.

The other original elements for the name are drawn from the cited and uncited illustrations. The woodcut of Dodoens’ (1583: 426) ‘*Ranunculus Lusitanicus*’ was copied by Morison (1680: s. 4, t. 31, f. 51, as ‘*Ranunculus latifolius autumnalis caule hirsuto flore minimo, nobis*’) via the uncited Clusius (1601: 238, as ‘*Ranunc. grumosa rad. I. species II*’) and represents a plant from Crete (notwithstanding Dodoens’ belief that the plant came from Portugal) identifiable as *R. bullatus* subsp. *cytheraeus* (Hal.) Vierh. (see Greuter et al., 1989: 428).

Clusius’ (1601: 238) ‘*Ranunculus grumosa radice I.*’, also copied by Morison (1680: s. 4, t. 31, f. 49, as ‘*Ranunculus latifolius autumnalis fl. simplici, nobis*’), represents a plant from the Iberian Peninsula, identifiable as *R. bullatus* L. subsp. *bullatus*.

Lastly, for his unnamed variety β, Linnaeus cited Morison’s (1680: s. 4, t. 31, f. 49, 50 and 51) along with a single, composite polynomial that Linnaeus derived from those used by Morison for his three illustrations (for the identities of these, see above).

There are therefore six possible elements from which a lectotype could be chosen: the Clifford material, the element represented by Dodoens’ illustration, that represented by Clusius’ figure, and the three Morison figures associated with variety β. Clifford’s material and Morison’s f. 50 have petaloid staminodia (‘... *flore pleno & prolifero*’), are almost certainly of cultivated origin and would not effectively restrict the application of subsp. *bullatus*. Dodoens’ illustration and Morison’s f. 51 belong to subsp. *cytheraeus* so either would make an unfortunate and disruptive type choice. However, Clusius’ illustration (copied by Morison as his f. 49) belongs to subsp. *bullatus* and ‘*Ranunculus grumosa radice I.*’ in Clusius, *Rariorum plantarum historia*: 238 (1601) is therefore designated here as the lectotype of *Ranunculus bullatus* L. (Fig. 2). Given its somewhat schematic nature, it seems wise to designate an epitype to establish its application beyond any possible doubt, which we do here (see Taxonomic Summary).

Study of the variation in *Ranunculus bullatus* L. s.l. by the senior author (Baldini, in prep.), leads to the conclusion that *R. bullatus* L. subsp. *cytheraeus* (Halácsy) Vierh. is best recognized at species rank. This is based on several distinct features, including flower size

- bullatus*, 8. **RANUNCULUS** foliis ovatis ferratis, scapo nudo unifloro. *Hort. Cliff.* 229.

Ranuncul. grumosa radice I.

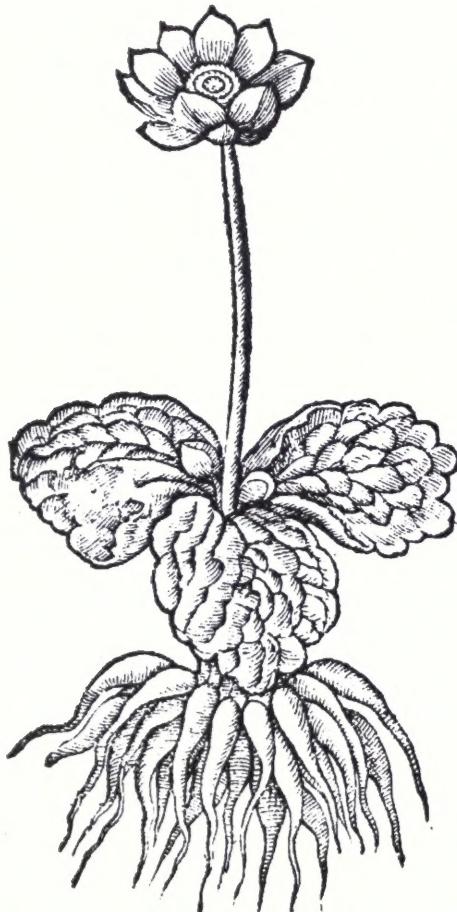

Fig. 2 'Ranunculus grumosa radice I.' in Clusius, *Rariorum plantarum historia*: 238 (1601), the lectotype of *Ranunculus bullatus* L.

and arrangement, leaf morphology and habit, and their correlation with geographical distribution. A new combination, relevant synonymy, key and species descriptions and illustrations are given below.

TAXONOMIC SUMMARY

Key to *Ranunculus bullatus* and *R. cythereaeus*

- 1 Leaf lamina ovate, crenate, never mucronate, more or less bullate and pubescent, sometimes glabrous or hispid above or beneath; scape to 20–25 cm long, never branched, more or less pubescent, 1-flowered; achenes with a short, curved beak 1. **R. bullatus**
- Leaf lamina obovate to elliptical, crenate-denticulate, mucronate, upper surface villose especially at the margin; scape to 8 cm long, branched with small bracteole at the base of each branch, with spreading hairs, 1–2-flowered; achenes with a short, uncinate beak 2. **R. cythereaeus**

1. **Ranunculus bullatus** L., *Sp. pl.* 1: 550 (1753). Type: 'Ranunculus grumosa radice I.' in Clusius, *Rar. pl. hist.*: 238 (1601), lectotype, designated here. Epitype: 'Flora Lusitanica. Prov. Estremadura, ad pagum, 1848, leg. Dr. Welwitsch 198' (BM!), designated here.

Fig. 3.

Ranunculus supranudus Jord. & Fourr., *Brev. Pl. Nov.* 1: 1 (1866). Type: 'Algeria: Daroussa prope Bône, ex dom. A. Joannon'. Not located.

R. semicalvus Jord. & Fourr., *Brev. Pl. Nov.* 1: 2 (1866). Type: 'Ajaccio, 15 octobre 1866, col. De Marsilly 101 bis' (P!, lectotype, designated here; BM!, K!-isotypes).

R. bullatus L. var. *prolifer* Gennari, *Spec. e var. Fl. Sard.*: 29 (1866), non Cavara & Grande in *Boll. Soc. Bot. Ital.*: 101 (1925). Type: 'Ranunculus bullatus scapo diviso seu prolifico, Cagliari ai Cappuccini, 9bre. 1863, Gennari s. n.' (TO!-lectotype, designated here).

Ionomanthus semicalvus (Jord. & Fourr.) Jord. & Fourr., *Icon. Fl. Eur.* 2: 14 (1869).

I. plantagineus Jord. & Fourr., *Icon. Fl. Eur.* 2: 14 (1869). Type: 'Algeria, Costantine, tab. CCXLIV. – 326' in Jordan & Fourreau, *Icon. Fl. Eur.* 2. (1869), lectotype, designated here.

R. bullatus L. var. α *ovatus* Freyn in Willk. & Lange, *Fl. Hisp. Prod.* 3: 919 (1880). Type: 'Malaga, Willkomm exsicc. 1844, n. 418', (BM!-lectotype, designated here; G!-isotype).

R. bullatus L. var. β *bellidifolius* Freyn in Willk. & Lange, *Fl. Hisp. Prod.* 3: 919 (1880). Type: 'Malaga, Kalisch'. Not located.

R. bullatus L. subsp. *supranudus* (Jord. & Fourr.) Vierh. in *Österr. Bot. Z.* 84: 129 (1935).

R. bullatus L. subsp. *bullatus* var. *plantagineus* (Jord. & Fourr.) Maire in Jahand. & Maire, *Cat. Pl. Maroc*: 994 (1940).

R. bullatus L. subsp. *bullatus* var. *supranudus* (Jord. & Fourr.) Maire in Jahand. & Maire, *Cat. Pl. Maroc*: 994 (1941).

R. bullatus L. subsp. *eu-bullatus* Maire, *Fl. Afrique N.* 11: 139 (1964).

Perennial herb with fibrous roots and fusiform tubers; leaves (2)–3–5(–7) in basal rosette; petiole 2–5(–7) cm long, with silky hairs; lamina ovate, crenate, sometimes crenate-denticulate, never mucronate, more or less bullate and pubescent, sometimes glabrous or hispid above or beneath, (1)–2–8 × 1–5(–6) cm; scapes erect, never branched, up to 20–25 cm long, more or less pubescent, sometimes glabrous, 1-flowered; flowers 1–2(–3) cm in diameter, with 5 green sepals 0.3–0.6 cm long and 5–10(–12) yellow and obovate petals 0.5–1.5 cm long; receptacle glabrous, not elongated; achenes glabrous, ovate-inflated with a short and curved beak.

DISTRIBUTION

EUROPE. Tutin (1964: 234); Greuter et al. (1989: 428); Jalas & Suominen (1989: map no. 1839); Tutin & Akeroyd (1993: 281). **Portugal:** Pereira

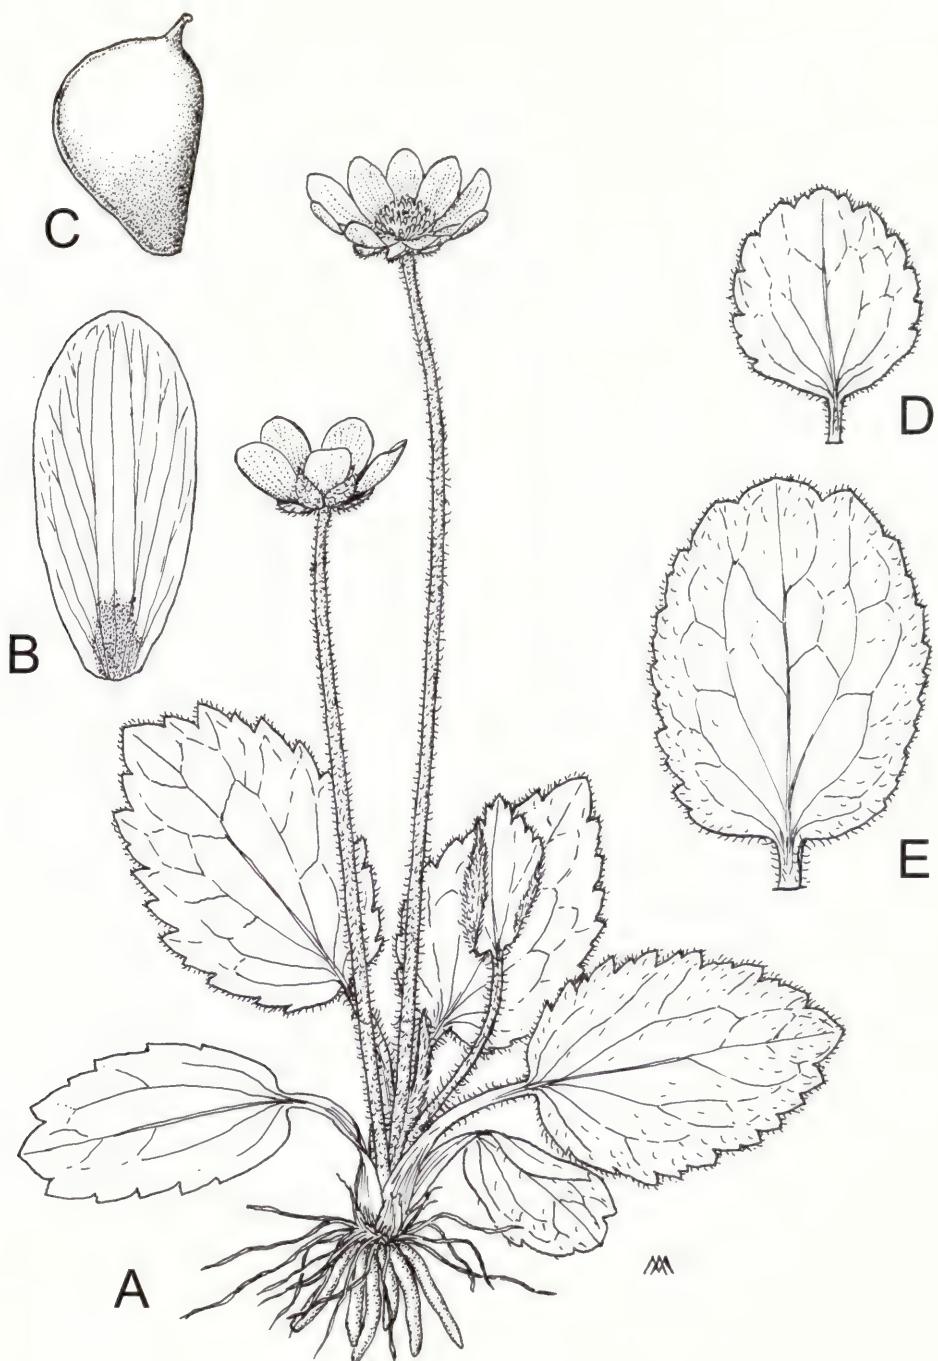

Fig. 3 *Ranunculus bullatus* L. From the epitype specimen, Welwitsch 198 (BM). A. Maury delineavit. A. whole plant $\times 1$; B. petal $\times 4$; C. achene $\times 20$; the additional leaves ($\times 1$) show two of the more frequent foliar morphotypes found in this variable species. The upper leaf (D) is from a collection from the Balearic Islands (Bianor 2518, BM!); the lower leaf (E) is from a collection from Sicily (Ross 103, G!).

Fig. 4 *Ranunculus cytheraeus* (Halácsy) Baldini. From material from Cyprus (Agia Napa distr., Famagusta, 15 Dec. 1940), Davis 2052 (BM), A. Maury delineavit. A. whole plant $\times 2$; B. petal $\times 5$; C. achene $\times 20$.

PATRICK M. McCARTHY

Australian Biological Resources Study, GPO Box 787, Canberra, A.C.T. 2601, Australia

SYNOPSIS. A catalogue of the lichens of Thailand is provided based on published reports. It includes publication details of 554 species and infra-specific taxa together with information on distribution in Thailand, occurrence in other south and south-east Asian countries, literature references and the locations of named specimens.

INTRODUCTION

Before the 1990s, knowledge of the diversity and distribution of the lichen flora of Thailand was based almost entirely on collections made by a handful of foreign visitors in the first half of the twentieth century (Wolseley & Aguirre-Hudson, 1991). During a research project on lichens as environmental indicators based at the Natural History Museum, London, a comprehensive survey of literature concerning lichens in south-east Asia was made and a data base constructed, which forms the basis of this checklist (Aguirre-Hudson & Wolseley, 1994). It was not possible during this time to trace all types described in the literature, or to confirm the accuracy of many earlier identifications. Since then there has been a rapid and productive expansion of lichenological research by Thai practitioners, especially at the Lichen Research Unit, Ramkhamhaeng University, Bangkok, further expanding the list and including many newly described species (Boonpragob et al., 1998; Pooprang et al., 1999; Vongshewarat et al., 1999; Homchantara & Coppins, 2002). The present checklist is conceived as a working document for all researchers in south-east Asia to provide both the literature sources and herbaria in which specimens from Thailand may be seen.

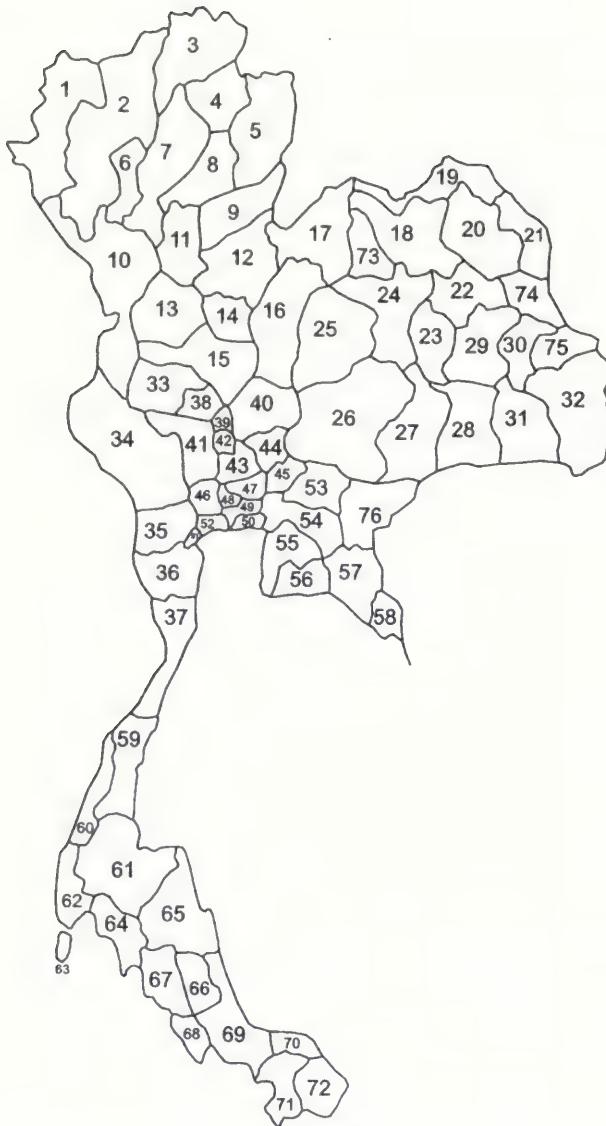

SCOPE AND ARRANGEMENT

This catalogue documents all 554 currently accepted taxa that have been reported in the literature from Thailand, as well as synonyms previously applied to Thai specimens. Genera and species are arranged in alphabetical order, and generic and family concepts follow Hawksworth et al. (1995). Where new combinations have not been made, taxa have been placed in the current genus within square brackets []. Accepted names are shown in bold and synonyms in italics. Distribution within Thailand is given where possible by province including new provinces and their former names (Fig. 1). Literature pertaining to distribution in Thailand is cited and references provided. Location of specimens in herbaria is indicated by abbreviations following *Index Herbariorum* (Holmgren et al., 1990) as shown below:

AAU: Herbarium Jutlandicum, Botanical Institute, University of Aarhus, Denmark.

BKF:	Forest Herbarium, Royal Forest Department, Bangkok, Thailand.
BM:	Herbarium, Botany Department, The Natural History Museum, London, UK.
C:	Herbarium, Botanical Museum, University of Copenhagen, Denmark.
CANB:	Australian National Herbarium, CSIRO, Canberra, Australia.
CMU:	Herbarium, Biology Department, Chiang Mai University, Thailand.
COLO:	Herbarium, Colorado University, Colorado, USA.
DUKE:	Herbarium, Botany Department, Duke University, Durham, North Carolina, USA.
E:	Herbarium, Royal Botanic Garden, Edinburgh, UK.
FH:	Farlow Reference Library and Herbarium of Cryptogamic Botany, Harvard University, Cambridge, Massachusetts, USA.
GB:	Herbarium, Botanical Museum, Gothenburg, Sweden.
H:	Herbarium, Botanical Museum, University of Helsinki, Finland.
KF:	Herbarium, Forest Research Institute, Seoul, Korea.
KYO:	Herbarium, Botany Department, Kyoto University, Japan.
L:	Rijksherbarium, Leiden, Netherlands.
LG:	Herbarium, Botany Department, Liège University, Belgium.
OSA:	Herbarium, Osaka Museum of Natural History, Japan.
PSU:	Herbarium, Department of Biology, Prince of Songkla University, Haad Yai, Thailand.
RAMK:	Herbarium, Biology Department, Ramkhamhaeng University, Bangkok, Thailand.
TNS:	Herbarium, Department of Botany, National Science Museum, Tokyo, Japan.
TUR-V:	Vainio herbarium, Biology Department, University of Turku, Finland.
UPS:	Botanical Museum, Uppsala University, Sweden.
US:	United States National Herbarium, Botany Department, Smithsonian Institution, Washington DC, USA.

Distribution of taxa in other countries in adjacent areas of south and south-east Asia is indicated under the subheading 'ASIA'. We have avoided making taxonomic judgements on specimens we have not examined. Consequently, a number of highly dubious identifications remain, as do species which will almost certainly be transferred to other genera.

Key to provinces of Thailand

Northern region

1. Mae Hong Son
2. Chiang Mai
3. Chiang Rai
4. Phayao
5. Nan
6. Lamphun
7. Lampang
8. Phrae
9. Uttaridit
10. Tak
11. Sukhotai
12. Phitsanulok
13. Kamphaeng Phet
14. Phichit
15. Nakhon Sawan

Northeastern region

16. Petchabun
17. Loei
18. Udon Thani
19. Nong Khai
20. Sakon Nakhon
21. Nakhon Phanom
22. Kalasin
23. Maha Sarakham
24. Khor Kaen

Eastern region

25. Chaiyaphum
26. Nakhon Ratchasima
27. Buri Ram
28. Surin
29. Roi Et
30. Yasothon
31. Si Sa Ket
32. Ubon Ratchathani

Southwestern region

33. Uthai Thani
34. Kanchanaburi
35. Ratchaburi
36. Phetchaburi
37. Prachuap Khiri Khan

Central region

38. Chai Nat

39. Sing Buri
40. Lop Buri
41. Suphan Buri
42. Ang Thong
43. Phra Nakhon Si Ayutthaya

44. Saraburi
45. Nakhon Nayok
46. Nakhon Pathom
47. Pathum Thani
48. Nonthaburi

49. Bangkok
50. Samut Prakan
51. Samut Songkram
52. Samut Sakhon

Southeastern region

53. Prachin Buri
54. Chachoengsao
55. Chon Buri
56. Rayong
57. Chanthaburi
58. Trat

Peninsular region

59. Chumphon
60. Ranong
61. Surat Thani
62. Phangnga
63. Phuket
64. Krabi
65. Nakhon Si Thammarat
66. Phatthalung
67. Trang
68. Satun
69. Songkhla
70. Pattani

71. Yala
72. Narathiwat
- New provinces**
73. Nong Bua Lamphu formerly in Udon Thani
74. Mukdahan formerly in Nakhon Phanom
75. Amnat Charoen formerly in Ubon Ratchathani
76. Sra Kaeo formerly in Prachin Buri

Fig. 1 Map of Thailand showing location of provinces. Reproduced with permission from Hamalainen & Pinratana (2001).

Although this Catalogue is based exclusively on published reports and Homchantara's unpublished thesis, we have not included data from an anonymous checklist on the web-site of the Lichen Research Unit at Ramkhamhaeng University, Bangkok (www.ru.ac.th/lichen). This checklist includes the names (without additional information) of 404 species based on specimens held at RAMK. However, although many names can be attributed to literature sources and authoritative determinations, a significant proportion are unauthenticated and are previously unpublished taxa which must be considered possibly doubtful. We are aware that this Catalogue documents a rather small portion of what is almost certainly a very diverse lichen flora; indeed, the actual number of species is probably in excess of 2000. However, we hope that it will provide a basis for future taxonomic research on Thai lichens, and that the research programs currently underway in Thailand will ensure its rapid obsolescence.

CATALOGUE

Anisomeridium (Müll. Arg.) M. Choisy; Monoblastiaceae

SPECIMENS. RAMK.

ASIA. China, India, Indonesia, Taiwan.

Cladonia gymnopoda Vain., *Acta Soc. Fauna Fl. Fenn.* **10**: 172 (1894).

THAILAND. Loei (Phu Miang). Yoshimura (1978: 38).

SPECIMENS. AAU, C.

ASIA. India, Indonesia, Malaysia, Papua New Guinea, Philippines, Taiwan.

Cladonia modesta Ahti & Krog, *Ann. Bot. Fenn.* **24**: 88 (1987).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 216).

SPECIMENS. RAMK.

ASIA. —

Cladonia ramulosa (With.) Laundon, *Lichenologist* **6**: 225 (1984).

Cladonia pityrea (Flörke) Fr.

THAILAND. Chiang Mai (Doi Suthep N.P.), Khu Kawng, Loei (Phu Luang N.P.). Vainio (1921: 46, as *C. pityrea*), Yoshimura (1978: 38, as *C. pityrea*).

SPECIMENS. C.

ASIA. China (incl. Hong Kong), India, Indonesia, Malaysia, Papua New Guinea, Philippines, Sri Lanka.

Cladonia rangiferina (L.) F.H. Wigg., *Primit. Fl. Holsat.* **90**: 29 (1780).

THAILAND. Loei (Phu Kradung N.P.). Yoshimura (1978: 37), Kurokawa & Kashiwadani (1988: *Lich. Rar. Crit. Exs.* No. 60).

SPECIMENS. C, TNS.

ASIA. China, India, Taiwan.

Cladonia rappii A. Evans, *Trans. Connecticut Acad. Arts* **38**: 297 (1952).

Cladonia calycaantha Delise ex Nyl.

THAILAND. Chiang Mai (Doi Suthep N.P.), Loei (Phu Kradung N.P.). Yoshimura (1978: 37, as *C. calycantha*).

SPECIMENS. AAU, BM, C.

ASIA. China, India, Indonesia, Malaysia, Papua New Guinea, Philippines, Taiwan.

***Cladonia siamea* des Abbayes, *Kew Bull.* **2**: 262 (1956).**

THAILAND. Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.), Loei (Phu Kradung N.P.). Yoshimura (1978: 37), Huovinen & Ahti (1986: 182), Stenroos (1986: 164), Kurokawa & Kashiwadani (1988: *Lich. Rar. Crit. Exs. Nos.* 61, 62).

SPECIMENS. BM (holotype), C, H (isotype), RAMK, TNS.

ASIA. Indonesia, Papua New Guinea.

***Cladonia siamea* f. *evoluta* des Abbayes, *Kew Bull.* **2**: 262 (1956).**

THAILAND. Loei (Phu Kradung N.P.). des Abbayes (1956: 262).

SPECIMENS. BKF, BM (holotype).

ASIA. —

***Cladonia siamea* f. *pulvinata* des Abbayes, *Kew Bull.* **2**: 263 (1956).**

THAILAND. Loei (Phu Kradung N.P.). des Abbayes (1956: 263).

SPECIMENS. BKF, BM (holotype).

ASIA. —

***Cladonia squamosa* (Scop.) Hoffm., *Deutschl. Fl.* **2**: 125 (1796).**

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 216).

SPECIMENS. RAMK.

ASIA. China, India, Indonesia, Papua New Guinea, Philippines, Taiwan.

***Cladonia subptyrea* Sandst., in Zahlbrückner, *Ann. Naturhist. Mus. Wien* **42**: 61 (1928).**

THAILAND. Loei (Dan Sai). Yoshimura (1978: 38).

SPECIMENS. C.

ASIA. Papua New Guinea, Philippines, Taiwan.

***Cladonia transindica* Ahti, *Ann. Bot. Soc. Zool-Bot. Fenn. 'Vanamo'* **32**(1): 72 (1961).**

THAILAND. locality not known. des Abbayes (1964), Ahti (1984: 44), Stenroos (1988: 212).

SPECIMEN. ?

ASIA. China, Indonesia, Malaysia, Vietnam.

***Coccocarpia* Pers.; Coccocarpiaceae**

***Coccocarpia dissecta* Swinscow & Krog, *Norweg. J. Bot.* **23**: 254 (1976).**

THAILAND. Chiang Mai (Queen Sirikit Botanical Garden, Doi

Suthep N.P., Doi Inthanon N.P.), Khiri Khan, Uthai Thani (Huay Khaeng Wildlife Sanctuary). Mongkonsuk et al. (1996: 16).

SPECIMENS. BM, Queen Sirikit Botanical Garden Herbarium.

ASIA. Malaysia, Papua New Guinea, Philippines.

***Coccocarpia erythroxyli* (Spreng.) Swinscow & Krog, *Norweg. J. Bot.* **23**: 256 (1976).**

Coccocarpia molybdaea Pers.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.), Trat (Koh Chang I.), Uthai Thani (Huay Khaeng Wildlife Sanctuary). Paulson (1930: 99, as *C. molybdaea*), Arvidsson (1982: 62), Boonpragob et al. (1998: 216).

SPECIMENS. BM, GB, L, RAMK, TNS.

ASIA. China (incl. Hong Kong), India, Malaysia, Myanmar, Papua New Guinea, Philippines, Singapore, Sri Lanka, Taiwan.

***Coccocarpia glaucina* Kremp., *Nuovo Giorn. Bot. Ital.* **7**: 14 (1875).**

THAILAND. Chiang Mai (Doi Suthep N.P.), Nakhon Nayok (Khao Yai N.P.). Boonpragob et al. (1998: 216).

SPECIMENS. BM, RAMK.

ASIA. Malaysia, Papua New Guinea, Philippines.

***Coccocarpia palmicola* (Spreng.) Arv. & D.J. Galloway, *Bot. Not.* **132**: 242 (1979).**

THAILAND. Chiang Mai (Queen Sirikit Botanical Garden, Doi Suthep N.P., Doi Inthanon N.P., Chiang Dao N.P.), Nakhon Nayok (Khao Yai N.P.), Tak (Ton Krabakayai N.P.), Uthai Thani (Huay Khaeng Wildlife Sanctuary). Arvidsson (1982: 76), Wolseley & Aguirre-Hudson (1997a: 333; 1997b: 355), Mongkonsuk et al. (1996), Boonpragob et al. (1998: 216).

SPECIMENS. BM, L, RAMK, TNS, Queen Sirikit Botanical Garden Herbarium.

ASIA. China (incl. Hong Kong), India, Malaysia, Myanmar, Papua New Guinea, Philippines, Singapore, Sri Lanka, Taiwan.

***Coccocarpia pellita* (Ach.) Müll. Arg. emend. R. Sant., *Symb. Bot. Upsal.* **12**(1): 420 (1952).**

THAILAND. Nakhon Nayok (Khao Yai N.P.), Uthai Thani (Huay Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 216).

SPECIMENS. BM, RAMK.

ASIA. China (Hong Kong), India, Indonesia, Malaysia, Papua New Guinea, Philippines, Sri Lanka.

***Collema* F.H. Wigg.; Collemataceae**

***Collema coccophyllum* Nyl., *Syn. Meth. Lich.* **1**: 112 (1858).**

THAILAND. Chiang Mai (Doi Suthep). Degelius (1974: 69).

SPECIMEN. TNS.

ASIA. India.

Collema coilocarpum (Müll. Arg.) Zahlbr., *Cat. Lich. Univ.* **3**: 34 (1924).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Wolseley & Aguirre-Hudson (1997a: 333), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. India, Papua New Guinea, Philippines, Sri Lanka.

Conotrema Tuck.; Stictidaceae

Conotrema lumbricoides Sipman, in Aptroot et al., *Biblioth. Lichenol.* **64**: 52 (1997).

THAILAND. Nakhon Sri Thammarat (Khao Luang N.P.). Vongshewarat et al. (1999: 227)

SPECIMENS. RAMK.

ASIA. Papua New Guinea.

Cresponia Egea & Torrente; Roccellaceae

Cresponia chloroconia (Tuck.) Egea & Torrente, *Mycotaxon* **48**: 310 (1993).

Lecanactis deminuens (Nyl.) Vain.

THAILAND. Trat (Koh Chang I.). Vainio (1909: 121, as *Lecanactis deminuens*).

SPECIMEN. TUR-V.

ASIA. —

Crocynia A. Massal.; Lecideaceae

Crocynia pyxinoides Nyl., *Sert. Lich. Trop. Labuan Singapore*: 37 (1891).

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Wolseley & Aguirre-Hudson (1995: 320; 1997a: 333, 339; 1997b: 356), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. Malaysia, Singapore.

Cryptothecia Stirt.; Arthoniaceae

Cryptothecia candida (Kremp.) R. Sant., *Symb. Bot. Upsal.* **12**(1): 65 (1952).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. RAMK.

ASIA. India, Indonesia, Malaysia, Sri Lanka.

Cryptothecia obtecta Patw. & Sethy, *Biovigyanam* **13**(2): 46 (1987).

THAILAND. Northern Thailand. Wolseley (1991: 240).

SPECIMEN. BM.

ASIA. India.

Dichosporidium Pat.; Chiodectonaceae

Dichosporidium boschianum (Mont.) Thor, *Opera Bot.* **103**: 64 (1990).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. RAMK.

ASIA. China (Hong Kong), India, Malaysia, Philippines, Singapore, Sri Lanka.

Dictyonema C. Agardh ex Kunth; Meruliaceae

Dictyonema sericeum (Sw.) Berk., *J. Bot. (London)* **2**: 639 (1843).

Dictyonema sericeum f. *thelephora* (Spreng.) Parm.

THAILAND. Trat (Koh Chang I.). Vainio (1909: 151), Parmasto (1978: 110, 111).

SPECIMEN. TUR-V.

ASIA. China (incl. Hong Kong), Indonesia, Papua New Guinea, Philippines, Taiwan.

Dirinaria (Tuck.) Clem.; Physciaceae

Dirinaria aegialita (Ach.) B. Moore, *Bryologist* **71**: 248 (1968).

THAILAND. Chiang Mai (Doi Inthanon N.P., Chiang Dao N.P.), Lampang (Doi Khun Tan N.P., Doi Pae Luang N.P.). Wolseley & Aguirre-Hudson (1997a: 333).

SPECIMENS. BM, CMU.

ASIA. China (Hong Kong), India, Indonesia, Malaysia, Philippines, Sri Lanka, Taiwan, Vietnam.

Dirinaria applanata (Fée) D.D. Awasthi, in Awasthi & Agarwal, *J. Indian Bot. Soc.* **49**: 135 (1970).

THAILAND. Khiri Khan, Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Wolseley & Aguirre-Hudson (1997a: 333).

SPECIMENS. BM.

ASIA. China (incl. Hong Kong), India, Indonesia, Malaysia, Papua New Guinea, Philippines, Sri Lanka, Taiwan, Vietnam.

Dirinaria confusa D.D. Awasthi, *Biblioth. Lichenol.* **2**: 56 (1975).

THAILAND. Fang (northern Thailand). Yoshimura (1978: 35).

SPECIMEN. C.

ASIA. China, Papua New Guinea, Taiwan.

Dirinaria consimilis (Stirt.) D.D. Awasthi, in Awasthi & Agarwal, *J. Indian Bot. Soc.* **49**: 135 (1970).

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P., Chiang Dao N.P.), Sara Buri, Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Awasthi (1975: 93), Wolseley & Aguirre-Hudson (1995: 321; 1997a: 333; 1997b: 355).

SPECIMENS. BM, CMU.

ASIA. India, Indonesia, Malaysia, Myanmar, Vietnam.

Dirinaria picta (Sw.) Clem. & Shear, *Gen. Fung.*: 323 (1931).

Physcia picta Nyl.

THAILAND. Chiang Mai (Queen Sirikit Botanical Garden), Khiri Khan, Trat (Koh Chang I.). Vainio (1909: 112, as *Physcia picta*), Paulson (1930: 100, as *P. picta*), Mongkonsuk et al. (1996), Wolseley & Aguirre-Hudson (1995: 321).

SPECIMENS. BM, TUR-V, Herbarium Queen Sirikit Botanical Garden.

ASIA. China (Hong Kong), India, Indonesia, Malaysia, Myanmar, Papua New Guinea, Philippines, Singapore, Sri Lanka, Taiwan, Vietnam.

Echinoplaca Fée; Gomphillaceae

Echinoplaca epiphylla Fée, *Essai Crypt. Écorc. Offic.*: 93 (1824).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. RAMK.

ASIA. China (Hong Kong), India, Indonesia, Papua New Guinea, Philippines, Vietnam.

Echinoplaca pellicula (Müll. Arg.) R. Sant., *Symb. Bot. Upsal.* 12(1): 367 (1952).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. RAMK.

ASIA. China, Indonesia, Papua New Guinea, Philippines, Sri Lanka, Vietnam.

Endocarpon Hedwig; Verrucariaceae

Endocarpon adscendens Müll. Arg., *Bull. Trav. Soc. Murith. Valais* 10: 58 (1881).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. CANB.

ASIA. —

Enterographa Fée; Chiodectionaceae

[***Enterographa***] ***Chiodection pallidellum*** var. *olivaceoalba* Vain., *Bot. Tidsskr.* 29: 138 (1909).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 138), Thor (1990: 86).

SPECIMEN. TUR-V (not located).

ASIA. —

[***Enterographa***] ***Chiodection pallidellum*** var. *olivaceostaminea* Vain., *Bot. Tidsskr.* 29: 137 (1909).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 137), Thor (1990: 86).

SPECIMEN. TUR-V (holotype).

ASIA. —

Eremothecella Syd.; Arthoniaceae

Eremothecella macrocephala (R. Sant.) Thor, Lücking & Matsumoto, *Symb. Bot. Upsal.* 32(3): 39 (2000).

Stirtonia macrocephala R. Sant.

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217, as *Stirtonia macrocephala*).

SPECIMENS. RAMK.

ASIA. Indonesia, Malaysia, Papua New Guinea, Philippines.

Erioderma Fée; Pannariaceae

Erioderma sorediatum D.J. Galloway & P.M. Jørg., *Lichenologist* 7: 139 (1975).

THAILAND. Chiang Mai (Doi Suthep N.P.), Nakhon Nayok (Khao Yai N.P.). Wolseley & Aguirre-Hudson (1995: 321; 1997a: 339), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. Malaysia, Papua New Guinea, Sri Lanka.

Eschatogonia Trevis., ?Acarosporaceae

Eschatogonia prolifera (Mont.) R. Sant., in Swinscow & Krog, *Macrolichens East Africa*: 86 (1988).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Lampang (Wiang Kosai N.P.), Nakhon Ratchasima (Khao Yai N.P.), Satun (Thaleban N.P.), Uthai Thani (Huay Kha Kaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. —

Everniastrum Hale ex Sipman; Parmeliaceae

Everniastrum cirrhatum (Fr.) Hale ex Sipman, *Mycotaxon* 26: 237 (1986).

Parmelia cirrhata Fr.

Cetrariastrum cirrhatum (Fr.) W.L. Culb. & C.F. Culb.

Parmelia vulgaris Vain.

THAILAND. Chiang Mai (Doi Suthep, Doi Inthanon, Chiang Dao N.P.), Loei (Phu Luang). Vainio (1921: 38, as *Parmelia vulgaris*), Sato (1962: 3, as *P. cirrhata*), Moon et al. (2000a: 101, as *Cetrariastrum cirrhatum*).

SPECIMENS. BM, CMU, TNS, TUR-V.

ASIA. China, India, Indonesia, Nepal, Sri Lanka, Taiwan.

Everniastrum nepalense (Taylor) Hale ex Sipman, *Mycotaxon* 26: 239 (1986).

Cetrariastrum nepalense (Taylor) W.L. Culb. & C.F. Culb. *Parmelia americana* (Meyen & Flotow) Mont.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P., Chiang Dao N.P., Maetang), Yala (Banglang N.P.). Vainio (1921: 38, as *Parmelia americana*), Sato (1962: 6, as *P. americana*), Wolseley & Aguirre-Hudson (1995: 321; 1997a: 333), Moon et al. (2000a: 101, as *Cetrariastrum nepalense*).

SPECIMENS. BM, CMU, PSU, RAMK, TNS, Kurokawa, *Lich. Rar. Crit. Exs.* No. 78.

ASIA. China, India, Indonesia, Nepal.

Everniastrum scabridum Elix & Pooprang, in Pooprang et al., *Mycotaxon* **71**: 112 (1999).

THAILAND. Chiang Mai (Doi Suthep N.P.). Pooprang et al. (1999: 112).

SPECIMENS. BM, CMU, RAMK (holotype).

ASIA. —

Everniastrum sorocheilum (Vain.) Hale ex Sipman, *Mycotaxon* **26**: 242 (1986).

Parmelia sorocheila Vain.

THAILAND. Chiang Mai (Doi Suthep N.P.). Sato (1962: 4, as *Parmelia sorocheila* Vain.).

SPECIMEN. OSA.

ASIA. China, Indonesia, Philippines, Taiwan.

Everniastrum vexans (Zahlbr. ex W.L. Culb. & C.F. Culb.) Hale ex Sipman, *Mycotaxon* **26**: 242 (1986).

Cetrariastrum vexans Zahlbr. ex W.L. Culb. & C.F. Culb.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Loei (Phu Luang N.P.). Wolseley & Aguirre-Hudson (1995: 318; 1997a: 333), Moon et al. (2000a: 101, as *Cetrariastrum vexans*).

SPECIMENS. BM, TNS.

ASIA. China, India, Indonesia, Papua New Guinea, Philippines, Taiwan.

Fuscopannaria P.M. Jørg.; Pannariaceae

Fuscopannaria siamensis P.M. Jørg. & Wolseley, in Jørgensen, *J. Hattori Bot. Lab.* **89**: 256 (2000).

THAILAND. Chiang Mai (Doi Inthanon N.P.). Jørgensen (2000: 256).

SPECIMENS. BM (holotype).

ASIA. —

Glyphis Ach.; Graphidaceae

Glyphis cicatricosa var. *confluens* (Zenker) Zahlbr., *Denkschr. Kaiserl. Akad. Wiss., Wien Math.-Naturwiss. Cl.* **83**: 112 (1909).

Graphis cicatricosa var. *confluens* (Zenker) Vain.

THAILAND. Trat (Koh Chang I.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Vainio (1909: 136, as *Graphis cicatricosa* var. *confluens*).

SPECIMENS. BM, TUR-V.

ASIA. Vietnam.

Graphidastra (Redinger) Thor; Chiodectionaceae

Graphidastra byssiseda (Müll. Arg.) Thor, *Opera Bot.* **103**: 80 (1990).

P.A. WOLSELEY, B. AGUIRRE-HUDSON AND P.M. McCARTHY

THAILAND. Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.). Wolseley & Aguirre-Hudson (1997: 333).

SPECIMENS. BM.

ASIA. India, Indonesia, Nepal.

Graphina Müll. Arg.; Graphidaceae

Graphina boschiana Müll. Arg., *Flora* **65**: 385 (1882).

Graphis concolor Nyl.

THAILAND. Trat (Koh Chang I.). Vainio (1909: 128, as *Graphis concolor*).

SPECIMENS. TUR-V.

ASIA. India, Indonesia, Sri Lanka.

Graphina columbiana (Nyl.) Zahlbr., *Cat. Lich. Univ.* **2**: 402 (1924).

Graphis obtecta var. *columbiana* Nyl.

Graphis striatula (Ach.) Spreng., *Syst. Veg.*, 16th ed, **4**: 250 (1827).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 134).

SPECIMENS. TUR-V.

ASIA. China, India, Indonesia, Malaysia, Sri Lanka.

Graphis subdisserpens Nyl., *Bull. Soc. Linn. Normandie*, sér. 2, **7**: 16 (1874).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 132).

SPECIMENS. TUR-V.

ASIA. India.

Graphis subdisserpens f. *arbusculaeformis* Vain., *Bot. Tidsskr.* **29**: 132 (1909).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 132).

SPECIMENS. TUR-V (holotype).

ASIA. —

Graphis tenella Ach., *Syn. Meth. Lich.*: 81 (1814).

THAILAND. Chiang Mai (Doi Suthep N.P.). Vainio (1909: 133; 1921: 54).

SPECIMENS. TUR-V.

ASIA. China, India, Indonesia, Sri Lanka.

Graphis tenella var. *epiphaea* Vain., *Bot. Tidsskr.* **29**: 133 (1909).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 133).

SPECIMENS. TUR-V (holotype).

ASIA. —

Graphis tenella var. *leptocarpoides* Vain., *Bot. Tidsskr.* **29**: 133 (1909).

THAILAND. Trat (Koh Chang I.). Vainio (1909: 133).

SPECIMENS. TUR-V (syntypes).

ASIA. —

Graphis tenuis Vain., *Suom. Elain-ja Kasvit. Seuran Van. Julk.* **1**(3): 53 (1921).

THAILAND. Chiang Mai (Doi Suthep N.P.). Vainio (1921: 53).

SPECIMENS. TUR-V (syntypes).

ASIA. —

Graphis trichospora Vain., *Suom. Elain-ja Kasvit. Seuran Van. Julk.* **1**(3): 52 (1921).

THAILAND. Chiang Mai (Doi Suthep N.P.). Vainio (1921: 52).

SPECIMEN. TUR-V (holotype).

ASIA. —

***Gyalideopsis* Veézda; Gomphillaceae**

Gyalideopsis rubescens Veézda, *Folia Geobot. Phytotax.* **14**: 67 (1979).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.). Wolseley & Aguirre-Hudson (1997a: 333), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. —

***Gymnoderma* Nyl.; Cladoniaceae**

Gymnoderma coccocarpum Nyl., *Syn. Meth. Lich.* **2**: 26 (1863).

THAILAND. Nakhon Nayok. Yoshimura & Sharp (1968: 635–640), Hawksworth & Yoshimura (1973: 503), Yoshimura (1982: 84), Kashiwadani & Gradstein (1982: 80).

SPECIMENS. US.

ASIA. China, India, Indonesia, Malaysia, Taiwan.

***Gyrostomum* Fr.; Thelotremaeaceae**

Gyrostomum scyphuliferum (Ach.) Nyl., *Ann. Sci. Nat. Bot.*, sér. 4, **16**: 96 (1862).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.), Trat (Koh Chang I.). Vainio (1909: 121), Wolseley & Aguirre-Hudson (1997a: 333), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK, TUR-V.

ASIA. China (incl. Hong Kong), India, Indonesia, Malaysia, Philippines, Taiwan, Vietnam.

***Haematomma* A. Massal.; Haematommataceae**

Haematomma collatum (Stirt.) C.W. Dodge, *Beih. Nova Hedwigia* **38**: 41 (1971).

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Lampang (Doi Khun Tan N.P.), Uthai Thani (Khao Nang Ram Wildlife Sanctuary). Staiger & Kalb (1995: 89).

SPECIMENS. BKF, BM, CMU, COLO.

ASIA. India, Indonesia, Papua New Guinea, Sri Lanka.

Haematomma puniceum (Ach.) A. Massal., *Atti Reale Ist. Veneto, Sci. Lett. Arti*, ser. 3, **5**: 253 (1860).

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Uthai Thani (Khao Nang Ram Wildlife Sanctuary). Vainio (1921: 43), Wolseley & Aguirre-Hudson (1997a: 339).

SPECIMENS. BKF, BM, CMU, TUR-V.

ASIA. China, India, Indonesia, Singapore, Sri Lanka, Taiwan, Vietnam.

Haematomma wattii (Stirt.) Zahlbr., *Cat. Lich. Univ.* **5**: 776 (1928).

THAILAND. Chiang Mai (Doi Suthep N.P., Chiang Dao N.P.). Staiger & Kalb (1995: 89), Wolseley & Aguirre-Hudson (1997a: 333, 339).

SPECIMENS. BM, CMU.

ASIA. India, Indonesia, Malaysia, Papua New Guinea, Philippines.

Hafellia Kalb, H. Mayrhofer & Scheidegger;
Physciaceae

Hafellia disciformis (Fr.) Marbach & H. Mayrhofer, in
Marbach, *Biblioth. Lichenol.* **74**: 259 (2000).

Buellia disciformis (Fr.) Mudd

THAILAND. Chiang Mai (Doi Suthep N.P.). Vainio (1921: 45, as
Buellia disciformis).

SPECIMENS. TUR-V.

ASIA. China, India, Indonesia, Vietnam.

Heterodermia Trevis.; Physciaceae

Heterodermia albicans (Pers.) Swinscow & Krog,
Lichenologist **8**: 113 (1976).

Physcia crispa var. *mollescens* (Nyl.) Vain.

THAILAND. Chiang Mai (Queen Sirikit Botanical Garden), Trat
(Koh Chang I.). Vainio (1909: 111, as *Physcia crispa* var. *mollescens*),
Mongkonsuk et al. (1996: 17).

SPECIMENS. TUR-V, Queen Sirikit Botanical Garden Herbarium.

ASIA. China, Malaysia, Philippines.

Heterodermia dendritica (Pers.) Poelt, *Nova Hedwigia* **9**:
31 (1965).

Anaptychia dendritica Pers.

THAILAND. Hase Plantation, probably Laos. Kurokawa (1962: 54;
1973: 602, both as *Anaptychia dendritica*).

SPECIMEN. TNS.

ASIA. China, India, Indonesia, Papua New Guinea, Philippines,
Taiwan.

Heterodermia diademata (Taylor) D.D. Awasthi,
Geophytology **3**: 113 (1973).

THAILAND. Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.,
Chiang Dao N.P.). Wolseley & Aguirre-Hudson (1997b: 356).

SPECIMENS. BM.

ASIA. India, China, Malaysia, Papua New Guinea, Sri Lanka.

Heterodermia esorediata (Vain.) Du Rietz & Lyngé, in
Lyngé, *Videnskaps. I. Mat.-Naturv. Kl.* **16**: 14 (1924).

Anaptychia esorediata Vain.

THAILAND. Locality not given. Kurokawa (1959: 179, as
Anaptychia esorediata).

SPECIMEN. TNS (not seen).

ASIA. India, Indonesia, Philippines.

Heterodermia fragilissima (Kurok.) J.-C. Wei & Y.-M.
Jiang, *Lich. Xizang*: 111 (1986).

THAILAND. Chiang Mai (Doi Inthanon N.P.). Wolseley & Aguirre-Hudson (1997a: 333).

SPECIMENS. BM.

ASIA. China.

Heterodermia hypocaesia (Yasuda) D.D. Awasthi,
Geophytology **3**: 113 (1973).

Anaptychia hypocaesia Yasuda

THAILAND. Chiang Mai (Doi Suthep N.P., Maetang District), Loei
(Phu Kradung N.P.). Kurokawa (1973: 603, as *Anaptychia hypocaesia*).

SPECIMENS. TNS.

ASIA. China, Indonesia, Papua New Guinea, Philippines, Taiwan.

Heterodermia hypoleuca (Ach.) Trevis., *Atti Soc. Ital. Sci. Nat.* **11**: 615 (1868).

Anaptychia hypoleuca (Ach.) A. Massal.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.,
Queen Sirikit Botanical Garden), Uthai Thani (Huay Kha Khaeng
Wildlife Sanctuary). Vainio (1921: 45, as *Anaptychia hypoleuca*),
Mongkonsuk et al. (1996: 17).

SPECIMENS. BM, TUR-V, Queen Sirikit Botanical Garden Herbarium.

ASIA. China, India, Malaysia, Papua New Guinea, Sri Lanka,
Taiwan.

Heterodermia incana (Stirt.) D.D. Awasthi, *Geophytology* **3**: 114 (1973).

Anaptychia incana (Stirt.) Zahlbr.

THAILAND. Hase Plantation, probably Laos. Kurokawa (1962: 92,
as *Anaptychia incana*).

SPECIMEN. TNS.

ASIA. China, India, Indonesia, Taiwan.

Heterodermia leucomelos (L.) Poelt, *Nova Hedwigia* **9**: 31
(1965).

Anaptychia leucomelaena (L.) A. Massal.

Anaptychia neoleucomelaena Kurok.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.),
Trat (Koh Chang I., Lem Dan). Vainio (1921: 44, as *Anaptychia leucomelaena*),
Kurokawa (1961: 51, as *A. neoleucomelaena*),
Wolseley & Aguirre-Hudson (1997a: 333).

SPECIMENS. BM, TUR-V.

ASIA. China, India, Indonesia, Malaysia, Myanmar, Papua New
Guinea, Philippines, Sri Lanka, Taiwan.

Heterodermia microphylla (Kurok.) Skorepa, *Bryologist* **75**: 490 (1972).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Nakhon Nayok (Khao
Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. China, India, Papua New Guinea.

Heterodermia pandurata (Kurok.) J.-C. Wei, *Enum. Lich. China*: 112 (1991).

Anaptychia pandurata Kurok.

THAILAND. Hase Plantation, probably Laos. Kurokawa (1962: 95–96).

SPECIMENS. TNS.

ASIA. Taiwan.

Heterodermia speciosa (Wulfen) Trevis., *Atti Soc. Ital. Sci. Nat.* 11: 614 (1868).

Anaptychia speciosa (Wulfen) A. Massal.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.). Vainio (1921: 45, as *Anaptychia speciosa*).

SPECIMENS. BM, TUR-V.

ASIA. China (incl. Hong Kong), India, Indonesia, Malaysia, Sri Lanka.

Hypogymnia (Nyl.) Nyl.; Hypogymniaceae

[*Hypogymnia*] *Parmelia coilocarpa* Vain., *Suom. Elain-ja Kasvit. Seuran Van. Julk.* 1(3): 40 (1921), auct. non Stirt.

THAILAND. Chiang Mai (Doi Suthep). Vainio (1921: 40, as *Parmelia coilocarpa*).

SPECIMENS. BM, TUR-V (syntype).

ASIA. —

Hypogymnia pseudobitteriana (D.D. Awasthi) D.D. Awasthi, in Awasthi & Singh, *Geophytology* 1: 101 (1972).

THAILAND. Chiang Mai (Doi Suthep Pui N.P., Doi Inthanon N.P.). Wolseley & Aguirre-Hudson (1995: 318).

SPECIMENS. BM.

ASIA. India, Malaysia, Papua New Guinea, Taiwan.

Hypogymnia subphysodes (Kremp.) Filson, *Victorian Nat.* 87: 327 (1970).

Parmelia subphysodes Kremp.

THAILAND. Chiang Mai (Doi Suthep, N.P.). Vainio (1921: 40, as *Parmelia subphysodes*), Wolseley & Aguirre-Hudson (1997a: 333).

SPECIMENS. BM, TUR-V.

ASIA. —

Hypogymnia vittata (Ach.) Gas., *Acta Soc. Linn. Bordeaux* 53: 66 (1898).

THAILAND. Chiang Mai (Doi Inthanon N.P.). Wolseley & Aguirre-Hudson (1997a: 333, 337).

SPECIMENS. BM.

ASIA. China, India, Malaysia, Nepal, Taiwan.

Hypotrachyna (Vain.) Hale; Parmeliaceae

Hypotrachyna adducta (Nyl.) Hale, *Phytologia* 28: 341 (1974).

THAILAND. Chiang Mai (Doi Inthanon N.P.). Pooprang et al. (1999: 119), Moon et al. (2000a: 101).

SPECIMENS. RAMK, TNS.

ASIA. China, India, Malaysia, Nepal, Philippines, Taiwan.

Hypotrachyna adjuncta (Hale) Hale, *Phytologia* 28: 341 (1974).

Parmelia exsecta Taylor.

Hypotrachyna exsecta (Taylor) Hale.

THAILAND. Chiang Mai (Doi Suthep N.P., Doi Inthanon N.P.), Loei (Phu Luang N.P.), Phitsanulok. Sato (1962: 3, as *Parmelia exsecta*) Kurokawa (1986: 265, as *Hypotrachyna exsecta*), Pooprang et al. (1999: 120), Moon et al. (2000a: 101, and as *H. exsecta*).

SPECIMENS. BKF, BM, CMU, RAMK, TNS.

ASIA. India, Malaysia, Nepal, Philippines, Sri Lanka, Taiwan.

Hypotrachyna bahiana (Nyl.) Hale, *Smithsonian Contr. Bot.* 25: 23 (1975).

Parmelia bahiana Nyl.

THAILAND. Chiang Mai (Doi Suthep). Vainio (1921: 38, as *Parmelia bahiana*).

SPECIMEN. TUR-V.

ASIA. —

Hypotrachyna chlorobarbatica Elix & Pooprang, in Pooprang, Boonpragob & Elix, *Mycotaxon* 72: 113 (1999).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Pooprang et al. (1999: 113).

SPECIMENS. CANB (isotype), RAMK (holotype).

ASIA. —

Hypotrachyna coorgiana Patw. & Prabhu, *Bryologist* 80: 348 (1997).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Phitsanulok (Phu Hin Rongkla N.P.). Pooprang et al. (1999: 120).

SPECIMENS. RAMK.

ASIA. India.

Hypotrachyna crenata (Kurok.) Hale, *Phytologia* 28: 341 (1974).

Parmelia crenata Kurok.

THAILAND. Chiang Mai (Maetang District). Kurokawa (1988: 167–168, as *Parmelia crenata*), Moon et al. (2000a: 101).

SPECIMENS. TNS.

Myriotrema terebratulum (Nyl.) Hale, *Mycotaxon* **11**: 135 (1980).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Loei (Na Po District),

Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 196).

SPECIMENS. BM, RAMK.

ASIA. India.

Myriotrema viride Nagarkar & Hale, *Mycotaxon* **35**: 440 (1989).

THAILAND. Sukhothai (Ramkhamhaeng N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217), Homchantara (1999: 199).

SPECIMENS. BM, RAMK.

ASIA. Malaysia.

Myriotrema wightii (Taylor) Hale, *Mycotaxon* **11**: 135 (1980).

THAILAND. Chiang Mai (Doi Suthep N.P.), Kanchanaburi (Erawan N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Homchantara (1999: 201).

SPECIMENS. BM, RAMK.

ASIA. India, Malaysia, Philippines, Sri Lanka.

Nephroma Ach.; *Nephromataceae*

Nephroma helveticum Ach., *Lichenogr. Universalis*: 523 (1810).

Nephroma tropicum (Müll. Arg.) Zahlbr.

THAILAND. Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.). Wolseley & Aguirre-Hudson (1995: 324; 1997a: 334, 339, as *Nephroma tropicum*).

SPECIMENS. BM, CMU.

ASIA. China, India, Indonesia, Malaysia, Papua New Guinea.

Nephromopsis Müll. Arg.; *Parmeliaceae*

Nephromopsis stracheyi (Church. Bab.) Müll. Arg., *Flora* **74**: 374 (1891).

Nephromopsis ornata auct. non (Müll. Arg.) Hue

THAILAND. Chiang Mai (Doi Suthep N.P.), Loei (Phu Rua N.P.). Wolseley & Aguirre-Hudson (1995: 324, as *Nephromopsis ornata* auct. non (Müll. Arg.) Hue).

SPECIMENS. BKF, BM, CMU.

ASIA. China, India, Malaysia, Taiwan.

Normandina (Nyl.) Vain.; *incert. sed.*

Normandina pulchella (Borrer) Nyl., *Ann. Sci. Nat., Bot.*, sér. 4, **15**: 382 (1861).

THAILAND. Chiang Mai (Doi Inthanon N.P.), Nakhon Ratchasima (Khao Yai N.P.). Wolseley & Aguirre-Hudson (1997a: 334), Boonpragob et al. (1998: 217).

SPECIMENS. BM, RAMK.

ASIA. China, Malaysia, Papua New Guinea.

Ocellularia Meyen; Thelotremaeae

Ocellularia albomaculata Hale, *Bull. Brit. Mus. (Nat. Hist.) Bot.* **8**(3): 300 (1981).

THAILAND. Satun (Thala Ban N.P.). Homchantara (1999: 237).

SPECIMENS. BM.

ASIA. Sri Lanka.

Ocellularia allosporoides (Nyl.) Patw. & C.R. Kulk., *Kavaka* **5**: 5 (1977).

THAILAND. Lampang (Wiang Kosai N.P.), Chantaburi (Khitchakut N.P.), Kanchanaburi (Khao Lem N.P.), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 239).

SPECIMENS. BM, RAMK.

ASIA. India.

Ocellularia arecae (Vain.) Hale, *Mycotaxon* **11**: 136 (1980).

Thelotrema arecae Vain.

Thelotrema interpositum Nyl.

THAILAND. Chantaburi (Khitchakut N.P.), Loei (Na Haeo N.P.), Nakhon Ratchasima (Khao Yai N.P.), Phetchabun (Phu Hin Rongkla N.P.), Trat (Koh Chang I.). Vainio (1909: 119, as *Thelotrema arecae*), Salisbury (1971: 277, as *T. interpositum*), Hale (1981: 305), Boonpragob et al. (1998: 217), Homchantara (1999: 242).

SPECIMENS. RAMK, TUR-V (holotype).

ASIA. India, Malaysia, Philippines.

Ocellularia ascidioidea Hale, *Bull. Brit. Mus. (Nat. Hist.) Bot.* **8**(3): 300 (1981).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Phetchabun (Phu Hin Rongkla N.P.), Sukhothai (Ramkhamhaeng N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217), Homchantara (1999: 245).

SPECIMENS. BM, RAMK.

ASIA. Malaysia, Sri Lanka.

Ocellularia asiatica (Vain.) Hale, *Hedwigia* **46**: 175 (1907).

Thelotrema asiaticum Vain.

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Trat (Koh Chang I.). Vainio (1909: 120, as *Thelotrema asiaticum*), Patwardan & Kulkarni (1977a: 10, as *T. asiaticum*), Boonpragob et al. (1998: 217).

SPECIMENS. RAMK, TUR-V (holotype).

ASIA. India.

Ocellularia chonestoma (Leight.) Zahlbr., *Cat. Lich. Univ.* **2**: 586 (1923).

THAILAND. Kanchanaburi (Khao Lem N.P.). Homchantara (1999: 248).

SPECIMENS. RAMK.

ASIA. Malaysia, Philippines, Sri Lanka.

Ocellularia concolor Meyen & Flot., *Nov. Actorum Acad. Caes. Leop.-Carol. Nat. Cur.* **19**, suppl.: 230 (1843).

THAILAND. Chantaburi (Khitchakut N.P.), Chiang Mai (Doi Suthep N.P.), Nakhon Ratchasima (Khao Yai N.P.), Phetchabun (Phu Hin Rongkla N.P.), Sukhothai (Ramkhamhaeng N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 250).

SPECIMENS. BM, RAMK.

ASIA. India, Malaysia, Philippines.

Ocellularia conformis (Fée) Hale, *Mycotaxon* **11**: 136 (1980).

THAILAND. Phetchabun (Phu Hin Rongkla N.P.). Homchantara (1999: 250).

SPECIMENS. RAMK.

ASIA. India.

Ocellularia crassa (Müll. Arg.) Hale, *Mycotaxon* **11**: 136 (1980).

THAILAND. Phetchabun (Phu Hin Rongkla N.P.). Homchantara (1999: 250).

SPECIMENS. RAMK.

ASIA. India.

Ocellularia diacida Hale, *Mycotaxon* **7**: 378 (1978).

THAILAND. Chantaburi (Kitchakut N.P., Namtok Phliu N.P., Khao Soi Dao Wildlife Sanctuary), Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.), Lampang (Doi Pae Luang), Loei (Na Haeo N.P., Phu Riea N.P.), Nakhon Ratchasima (Khae Yai N.P.), Phetchabun (Phu Hin Rongkla N.P.), Sakon Nakhon (Phu Phan N.P.), Sukhothai (Ramkhamhaeng N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217), Homchantara (1999: 250).

SPECIMENS. BM, RAMK.

ASIA. India, Sri Lanka.

Ocellularia diospyrosis Homchantara & Coppins, *Lichenologist* **34**: (in press).

THAILAND. Tak (Ton Krabak Yai N.P.). Homchantara (1999: 314-315, as *Ocellularia* 'unidentified 1').

SPECIMENS. BM (holotype).

ASIA. —

Ocellularia dolichotata (Nyl.) Zahlbr., *Cat. Lich. Univ.* **2**: 589 (1923).

Thelotrema siamense Vain.

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Trat (Koh Chang I.). Vainio (1907: 174; 1909: 120, as *Thelotrema siamense*), Hale (1981: 303), Sethy et al. (1987: 193), Boonpragob et al. (1998: 217), Homchantara (1999: 264).

SPECIMENS. BM, C (isolectotype), RAMK, TUR-V (lectotype).

ASIA. India, Malaysia, Papua New Guinea, Philippines, Singapore.

Ocellularia emersa (Kremp.) Müll. Arg., *Flora* **69**: 310 (1886).

THAILAND. Chanthaburi (Khitchakut N.P.), Loei (Phu Ruea N.P.), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 267).

SPECIMENS. RAMK.

ASIA. Sri Lanka.

Ocellularia epitrypa (Nyl.) Hale, *Mycotaxon* **11**: 136 (1980).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217), Homchantara (1999: 269).

SPECIMENS. BM, RAMK.

ASIA. India, Philippines, Sri Lanka.

Ocellularia eumorpha (Stirt.) Hale, *Mycotaxon* **11**: 136 (1980).

THAILAND. Chiang Mai (Doi Suthep N.P.), Loei (Na Haeo N.P.). Homchantara (1999: 271).

SPECIMENS. BM, RAMK.

ASIA. India, Sri Lanka.

Ocellularia fissa (Nyl.) Hale, *Mycotaxon* **11**: 136 (1980).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMENS. RAMK.

ASIA. India.

Ocellularia flavescentia Homchantara & Coppins, *Lichenologist* **34**: (in press).

THAILAND. Chiang Mai (Doi Inthanon N.P.). Homchantara (1999: 339–341, as *Ocellularia* ‘unidentified 13’).

SPECIMENS. BM (holotype), RAMK (isotype).

ASIA. —

Ocellularia groenhartii Hale, *Mycotaxon* **3**: 173 (1975).

THAILAND. Chantaburi (Khao Soi Dao N.P., Kitchakut N.P., Namtok Phliu N.P.), Kanchanaburi (Khao Laem N.P.), Lampang (Wiang Kosai N.P.), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 272).

SPECIMENS. BM, RAMK.

ASIA. India, Indonesia.

Ocellularia guptei (Nagarkar, Sethy & Patw.) D.D. Awasthi, *Mycotaxon* **23**: 79 (1986).

THAILAND. Chantaburi (Khitchakut N.P.), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 276).

SPECIMENS. RAMK.

ASIA. India.

Ocellularia inthanonensis Homchantara & Coppins, *Lichenologist* **34**: (in press).

P.A. WOLSELEY, B. AGUIRRE-HUDSON AND P.M. McCARTHY

THAILAND. Chiang Mai (Doi Inthanon N.P.). Homchantara (1999: 333–334, as *Ocellularia* ‘unidentified 10’).

SPECIMENS. BM (holotype), RAMK (isotype).

ASIA. —

Ocellularia kansriae Homchantara & Coppins, *Lichenologist* **34**: (in press).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.), Pechabun (Phu Hin Rongkla N.P.), Sukhothai (Ramkhamhaeng N.P.). Homchantara (1999: 335–337, as *Ocellularia* ‘unidentified 11’).

SPECIMENS. E (isotype), RAMK (holotype).

ASIA. —

Ocellularia kratingensis Homchantara & Coppins, *Lichenologist* **34**: (in press).

THAILAND. Chantaburi (Khitchakut N.P.), Nakhon Ratchasima (Khao Yai N.P.). Homchantara (1999: 316–318, as *Ocellularia* ‘unidentified 2’).

SPECIMENS. E (isotype), RAMK (holotype).

ASIA. Malaysia, Philippines, Sri Lanka.

Ocellularia leucina (Müll. Arg.) Hale, *Mycotaxon* **11**: 137 (1980).

THAILAND. Chantaburi (Namtok Phliu N.P.), Kanchanaburi (Kroengkawia), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 278).

SPECIMENS. RAMK.

ASIA. India.

Ocellularia marivelensis (Vain.) Hale, *Mycotaxon* **11**: 137 (1980).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 281).

SPECIMENS. RAMK.

ASIA. India, Malaysia, Philippines.

Ocellularia massalongoi (Mont.) Hale, *Mycotaxon* **11**: 137 (1980).

THAILAND. Chantaburi (Namtok Phliu N.P.), Nakhon Ratchasima (Khao Yai N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary), Yala (Banlang N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 283).

SPECIMENS. BM, RAMK.

ASIA. India, Malaysia, Papua New Guinea, Philippines.

Ocellularia meiosperma (Nyl.) Hale, *Mycotaxon* **11**: 137 (1980).

THAILAND. Chantaburi (Namtok Phliu N.P.), Chiang Mai (Doi Suthep N.P.), Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217), Homchantara (1999: 281).

SPECIMENS. RAMK.

ASIA. India, Indonesia, Malaysia, Philippines, Sri Lanka.

Ocellularia melanopthalma Homchantara & Coppins, *Lichenologist* 34: (in press).

THAILAND. Phetchabun (Phu Hin Rongkla N.P.). Homchantara (1999: 324–326, as *Ocellularia* ‘unidentified 6’).

SPECIMENS. E (isotype), RAMK (holotype).

ASIA. —

Ocellularia monosporoides (Nyl.) Hale, *Mycotaxon* 11: 137 (1980).

THAILAND. Chantaburi (Khitchakut N.P.), Phetchabun (Phu Hin Rongkla N.P.). Homchantara (1999: 288–290).

SPECIMENS. RAMK.

ASIA. Sri Lanka.

Ocellularia microascidium (Vain.) Zahlbr., *Cat. Lich. Univ.* 2: 595 (1923).

Thelotrema microascidium Vain.

THAILAND. Trat (Koh Kong I.). Vainio (1907: 176, as *Thelotrema microascidium*).

SPECIMEN. TUR-V (holotype).

ASIA. —

Ocellularia neoleucina Homchantara & Coppins, *Lichenologist* 34: (in press).

THAILAND. Chantaburi (Namtok Phliu N.P.). Homchantara (1999: 333–334, as *Ocellularia* ‘unidentified 15’).

SPECIMENS. E (isotype), RAMK (holotype).

ASIA. —

Ocellularia neopertusariiformis Hale, *Bull. Brit. Mus. (Nat. Hist.), Bot.* 8(3): 315 (1981).

THAILAND. Loei (Phu Ruea N.P.), Nakhon Ratchasima (Khao Yai N.P.), Phetchabun (Phu Hin Rongkla N.P.). Homchantara (1999: 290–293).

SPECIMENS. RAMK.

ASIA. Malaysia, Sri Lanka.

Ocellularia nylanderiana Hale, *Phytologia* 26: 414 (1973).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Boonpragob et al. (1998: 217).

SPECIMEN. RAMK.

ASIA. India.

Ocellularia paleoamplior Aptroot & Sipman, *J. Hattori Bot. Lab.* 91: 333 (2001).

THAILAND. Nakhon Ratchasima (Khao Yai N.P.). Homchantara (1999: 326–328, as *Ocellularia* ‘unidentified 7’).

SPECIMENS. RAMK (holotype).

ASIA. —

Ocellularia papillata (Leight.) Zahlbr., *Cat. Lich. Univ.* 2: 597 (1923).

THAILAND. Chantaburi (Namtok Phliu N.P., Khitchakut N.P.), Lampang (Doi Mae Luang), Nakhon Ratchasima (Khao Yai N.P.), Sakhon Nakhon (Phu Phan N.P.), Sukhothai (Ramkhamhaeng N.P.), Uthai Thani (Huay Kha Khaeng Wildlife Sanctuary). Boonpragob et al. (1998: 217), Homchantara (1999: 295).

SPECIMENS. BM, RAMK.

ASIA. India, Philippines, Sri Lanka.

Ocellularia peremergens Homchantara & Coppins, *Lichenologist* 34: (in press).

THAILAND. Chiang Mai (Doi Inthanon N.P., Doi Suthep N.P.), Loei (Na Haeo N.P.), Nakhon Ratchasima (Khao Yai N.P.). Homchantara (1999: 331–332, 337, 349–350, as *Ocellularia* ‘unidentified 9’, ‘12’, ‘18’).

SPECIMENS. BM (holotype), RAMK (isotype).

ASIA. —

Ocellularia perforata (Leight.) Müll. Arg., *Hedwigia* 31: 284 (1892).

Xanthoparmelia (Vain.) Hale; Parmeliaceae

Xanthoparmelia congensis (Stein) Hale, *Phytologia* **28**: 486 (1974).

THAILAND. Chiang Mai (Doi Saget), Loei (Ban Sui, Phu Kradung), Lumpang (Khuntan N.P.), Phitsanulok (Lan Hin Taek, Phu Hin Rongkla, N.P.), Sakonnakhon (Phu Pan N.P.). Pooprang et al. (1999: 125), Moon et al. (2000a: 105).

SPECIMENS. RAMK, TNS.

ASIA. China (incl. Hong Kong).

Xanthoparmelia mougeotina (Nyl.) D.J. Galloway, *New Zealand J. Bot.* **18**: 538 (1981).

THAILAND. Lumpang (Khuntan N.P.). Pooprang et al. (1999: 125).

SPECIMEN. RAMK.

ASIA. Papua New Guinea.

ACKNOWLEDGEMENTS. We are grateful to those organisations and individuals who have assisted this project over many years: the Leverhulme Trust who provided the initial funding to Pat Wolseley and Begoña Aguirre-Hudson for this research in Thailand; The Natural History Museum for supporting this research during and since initial funding; Prof. Teuvo Ahti (Helsinki), Prof. Jack Elix (Canberra), Dr Seppo Huhtinen (Turku), Dr Hiroyuki Kashiwadani (Tokyo), Laszlo Lököc (Budapest), Dr Simone Louwhoff (London), the Royal Forestry Department, Thailand; Prof. Kansri Boonpragob, Dr Natsurang Homchanta and the staff and students of the Lichen Research Group, Ramkhamhaeng University, Bangkok; Dr Wanarak Saipunkaew (Chiang Mai University), Dr Oy Kanjanavanit and M.R. Smansnid Svasti.

This catalogue is dedicated to Thai lichenologists and especially to Prof. Kansri Boonpragob and Dr Natsurang Homchanta under whose direction lichenology now flourishes in Thailand.

Botany Series

Earlier Botany Bulletins are still in print. The following can be ordered from Intercept (address on inside front cover). Where the complete backlist is not shown, this may also be obtained from the same address.

Volume 24

- No. 1 Pre-Linnaean references for the Macaronesian flora found in Leonard Plukenet's works and collections. J. Francisco-Ortega, A. Santos-Guerra and C.E. Jarvis. 1994. Pp. 1–34, 16 figs.
Studies on the lichen genus *Sticta* (Schreber) Ach.: II. Typification of taxa from Swartz's *Prodromus* of 1788. D.J. Galloway. 1993. Pp. 35–48, 9 figs.
Seaweeds of the western coast of tropical Africa and adjacent islands: a critical assessment. IV. Rhodophyta (Florideae) 4. Genera L–O. D.M. John, G.W. Lawson, J.H. Price, W.F. Prud'homme van Reine and W.J. Woelkerling. 1994. Pp. 49–90, 1 fig.
Studies on the Cretan flora 3. Additions to the flora of Karpathos. N.J. Turland and L. Chilton. 1994. Pp. 91–100, 1 fig. £43.25

- No. 2 Observations on the benthic marine algal flora of South Georgia: a floristic and ecological analysis. D.M. John, P.J.A. Pugh and I. Tittley. 1994. Pp. 101–114, 8 figs.
Studies in *Pseudocyphellaria* (Lichens) IV. Palaeotropical species (excluding Australia). D.J. Galloway. 1994. Pp. 115–160, 36 figs.
Morphology and ecology of seedlings, fruits and seeds of Panama: Bixaceae and Cochlospermaceae. N.C. Garwood. 1994. Pp. 161–172, 2 figs.
A study of *Bixa* (Bixaceae), with particular reference to the leaf undersurface indumentum as a diagnostic character. R.E. Dempsey and N.C. Garwood. 1994. Pp. 173–180, 2 figs. £43.40

Volume 25

- No. 1 A revision of *Rutilaria* Greville (Bacillariophyta). R. Ross. 1995. Pp. 1–94, 76 figs, 20 plates.
William Roxburgh's St Helena plants. Q.C.B. Cronk. 1995. Pp. 95–98. £43.40
No. 2 Seaweeds of the western coast of tropical Africa and adjacent islands: a critical assessment. IV. Rhodophyta (Florideae) 5. Genera P. G.W. Lawson, W.J. Woelkerling, J.H. Price, W.F. Prud'homme Van Reine and D.M. John. 1995. Pp. 99–122, 1 fig.
A new species of *Odontorrhynchos* (Orchidaceae, Spiranthinae) from Bolivia. D.L. Szlachetko. 1995. Pp. 123–125, 1 fig.
Linnaeus's interpretation of Prospero Alpino's *De plantis exoticis*, with special emphasis on the flora of Crete. N.J. Turland. 1995. Pp. 127–159, 27 figs.
Book review. M.G. Gilbert. 1995. P. 161. £43.40

Volume 26

- No. 1 A morphological study of *Chaetoceros* species (Bacillariophyta) from the plankton of the Pacific ocean of Mexico. D.U. Hernández-Becerril. 1996. Pp. 1–73, 52 plates. £43.40
No. 2 Studies in the genus *Hypericum* L. (Guttiferae) 6. Sections 20. *Myriandra* to 28. *Eldes*. N.K.B. Robson. 1996. Pp. 75–217, 43 maps, 29 figs. £43.40

Volume 27

- No. 1 Notes on the diatom species *Tetracyclus castellum* (Ehrenb.) Grunow with a description of *Tetracyclus pseudocastellum* nov. sp. D.M. Williams. 1997. Pp. 1–5, 8 figs.
A new species of *Calymperes* (Musci: Calymperaceae) from Peninsular Malaysia. L.T. Ellis. 1997. Pp. 7–9, 1 fig.
A phylogenetic conspectus of the tribe *Hyoscyameae* (Solanaceae). A.L. Hoare and S. Knapp. 1997. Pp. 11–29, 7 figs.
A revision of *Solanum* section *Pteroidea*: Solanaceae. S. Knapp and T. Helgason. 1997. Pp. 31–73, 23 figs. £43.40
No. 2 Systematics of *Pogostemon* (Labiateae) G.R. Bhatti and M.

Ingrouille. 1997. Pp. 77–147, 40 figs.

£43.40

Volume 28

- No. 1 Morphology and ecology of seedlings, fruits and seeds of Panamá: Vochysiaceae. N.C. Garwood. 1998. Pp. 1–16, 3 figs.
A revision of the genus *Mandragora* (Solanaceae). S. Ungricht, S. Knapp and J.R. Press. 1998. Pp. 17–40, 9 figs.
The pteridophytes of São Tomé and Príncipe (Gulf of Guinea). E. Figueiredo. 1998. Pp. 41–66, 2 figs. £43.40
A revision of *Brillantaisia* (Acanthaceae). K. Sidwell. 1998. Pp. 67–113, 5 maps, 16 figs.
Seaweeds of the western coast of tropical Africa and adjacent islands: a critical assessment. IV. Rhodophyta (Florideae) 6. Genera [Q] R–Z, and an update of current names for non-geniculate Corallinales. W.J. Woelkerling, G.W. Lawson, J.H. Price, D.M. John and W.F. Prud'homme van Reine. 1998. Pp. 115–150, 1 fig. £43.40

Volume 29

- No. 1 The moss family Calymperaceae (Musci) in the Philippines. L.T. Ellis. 1999. Pp. 1–46, 25 figs.
Revision of *Hibiscus* section *Furcaria* (Malvaceae) in Africa and Asia. F.D. Wilson. 1999. Pp. 47–79, 6 figs. £43.40
No. 2 Catalogue of the holdings in The Natural History Museum (London) of the Australian botanical drawings of Ferdinand Bauer (1760–1826) and cognate materials relating to the *Investigator* voyage of 1801–1805. D.J. Mabberley and D.T. Moore. 1999. Pp. 81–226, 268 figs. £43.40

Volume 30

- No. 1 A new species of *Heisteria* (Olacaceae) from Mesoamerica. Q. Jiménez and S. Knapp. 2000. Pp. 1–6.
Three new species of *Pilea* (Urticaceae) from Costa Rica and Panama. A.K. Monro. 2000. Pp. 7–12.
A revision of *Solanum thelopodium* species group (section *Anthoresis* sensu Seitze, pro parte): Solanaceae. S. Knapp. 2000. Pp. 13–30.
No. 2 The genus *Polystichum* (Dryopteridaceae) in Africa. J.P. Roux. 2000. Pp. 33–79.
Recent records of pteridophytes for Belize, Central America. D.A. Sutton, A. Hughes and B. Bulmer-Thomas. 2000. Pp. 81–99.
Collections of flowering plants by Francis Buchanan-Hamilton from Nepal, 1802–1803. J.R. Press and K.K. Shrestha. 2000. Pp. 101–130. £43.40

Volume 31

- No. 1 New synonymy in some Asian species of *Syrrhopodon* (Calymperaceae: Musci). L.T. Ellis. 2001. Pp. 1–4, 2 figs.
Two new species of *Pilea* (Urticaceae) from Panama. A.K. Monro. 2001. Pp. 5–7, 1 fig.
Synopsis of Mesoamerican *Pilea* (Urticaceae), including eighteen typifications and a key to the species. A.K. Monro. 2001. Pp. 9–25.
The Japanese plant collection of Engelbert Kaempfer (1651–1716) in the Sir Hans Sloane Herbarium at The Natural History Museum, London. P.-A. Hinz. 2001. Pp. 27–34, 1 fig. £43.40
Index to new taxa. P. 35.
No. 2 Studies in the genus *Hypericum* L. (Guttiferae) 4(1). Sections 7. *Roscyna* to 9. *Hypericum* sensu lato (part 1). N.K.B. Robson. 2001. Pp. 37–88.
A bibliography of the scientific work of Boris V. Skvortzov (1896–1980) with commentary on the publications concerning diatoms (Bacillariophyta). D.M. Williams and G. Reid. 2001. Pp. 89–106.
On the identity of *Pleurosigma angulatum* (Bacillariophyta) and related species. G. Reid. 2001. Pp. 107–117.
Index to new taxa. P. 119. £43.40

CONTENTS

- 1 Taxonomic notes on some African species in the family Calymperaceae (Musci)
L.T. Ellis
- 7 Typification of *Ranunculus bullatus* L. (Ranunculaceae)
R.M. Baldini and C.E. Jarvis
- 13 Catalogue of the lichens of Thailand
P.A. Wolseley, B. Aguirre-Hudson and P.M. McCarthy
