

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

#### **8069 Signatories**

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 19, 2017 9:23:11 AM

---

Dear Joint Review Panel members,

Please be responsible to the health of the land the people and the planet. It is very selfish for this industry to continue on this destructive path. Time is now, for a change in the direction of fossil fuel industry. i know every prospector is waiting to make their millions... but...on the backs of actual LIVES? !?!

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

adele reeves

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

No! No! No!

This is a bad project on so many levels, it needs to be stopped before the damage is done.

We know the oil/mining companies don't like to clean up their messes. How many times have governments been left with this job and allowed the companies to walk away with their profits?

So, I repeat: "No, No, No".

Sincerely,

Al Mullin

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

This is a disgrace. How can you ever hope to have relations with First Nations. Way of life, language and the environment are key to future development for all. Wake up !!

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Alan Creighton-Kelly

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Not only are oil sands operations a major contributor to Canada's carbon footprint and counter to our Paris Accord pledge, but they run the risk of becoming stranded assets as climate change takes hold in the Arctic. With US shale oil available, the price of oil barely makes Alberta oil worth the effort and that's during a coordinated effort by OPEC and Russia to reduce production. \$100/barrel oil is unlikely in any scenario.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Alan Heikkila

**Date:** July 18, 2017 4:05:20 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

This is insane! In the interests of indefinite term welfare of people and other species we have to move AWAY from using fossil fuels, not toward more use of them. We cannot sustain geometric population growth, geometric economic growth (Malthusian growth), or the degradation of the quality of water and air and habitat. We must switch to energy sources that don't inherently entail this degradation, and stabilize the need and demand for energy.

Please, don't make the problems any worse!

Sincerely,

Alan Herron

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I don't know what the ramifications of such a mine are but I am disturbed to find out that the process has not been clearly brought to the attention of those people in the public that might oppose it.

Our democracy needs to be authentic. We need to give plenty of space for public discussion and opposing views. I am deeply concerned that there is a process by which a company can largely avoid exposing its proposals to scrutiny beyond government agencies. (In which many of us have lost most of our trust)

Please delay your decision to allow opposition to organize against this proposal to the same degree that the proponents are... and please change this process so we can build a more democratic system. My family and many others paid dearly to support democracy and we expect all parties to fully operate within the boundaries in which it will flourish ..

Sincerely,

Alan Monk

Dear Joint Review Panel members,

Shame. Just shame.

The idea that short term gain, which costs us one province, the most beautiful one in the world perhaps, would even be on the table!

What grandiose hypocrisy. To complain about Trump exiting the Paris Accord and then even entertaining doing this! Shame.

Harper spent most of his career trying to inflict the tarsands on the planet. That Trudeau is now doing so is a breach of the social contract.

Come to your senses before it is too late.

Sincerely,

Alexander Maidan

Dear Joint Review Panel members,

We cannot continue to allow oil sands expansion & meet our Paris commitments on climate. This project is an assault on Canada's water, on indigenous rights and is bad economics, further entrenching the Alberta & Canadian economies in a single non-renewable, boom/bust energy sector.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Ecological values, from habitats to climate, are taking precedent over dirty industrial projects in the hearts and minds of the 21st century Canadian and global public. With each passing month a generation of young people who understand that their very future is at stake and that formerly externalized environmental costs must be internalize NOW is getting a little bit older and wiser. Let's help them grow up in a sustainable human society that rejects our current short-termist extractivism.

Please do your part to stop this non-sense project, and change the trajectory of the Canadian economy.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

As an Albertan, I am tired of seeing Indigenous peoples' rights and well-being, as well as environmental values, sacrificed so that huge corporations can continue to make millions in profits by ripping up the boreal forest.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural values. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project.

It is time that Canada made serious commitments to Indigenous reconciliation, rather than saying nice words while continuing to violate Indigenous peoples' rights. Therefore, I urge the panel to respect the voices of the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation, whose territory, with its spiritual, cultural, and ecological values, the Frontier mine would irreversibly destroy.

This project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Andrew Paul

**Date:** July 19, 2017 2:55:16 AM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

It was reported in the Vancouver Sun on 16 July, 2016, that a sitting member of China's National People's Congress has been appointed to Teck Resources' board of directors. Does the Canadian Government consider it right that a foreign government should have greater influence than ordinary Canadian citizens whose life not only revolves around traditional activities in the region now known as the Canadian tar-sands but whose ancient ancestral heritage still belongs there. Does the Canadian government not give priority to the health and well-being of its own citizens? Shouldn't the Canadian government insist that a local native resident also be appointed to the Teck Resources board of directors?

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions, which has already increased from 275ppm to the dangerous level of 400ppm since beginning of the industrial revolution and is now causing serious disruption in the lives of citizens all across and around the coastline of Canada. The Frontier project is incompatible with Alberta's 100 megatonne cap on oil sands greenhouse gas emissions and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Anthony Francis

Dear Joint Review Panel members,

I'm writing to express my strong opposition towards the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition, along with the rest of us citizens opposing the project.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would further threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

It is not at all in line with the Mission 2020 goals, as outlined by scientists. Our children will not be able to survive the world being created as a consequence of projects like this one.

It is unacceptable to allow such irresponsible developments as the science shows that such will result in human fatalities, and therefore can be ruled as an act of intentional genocide. Allowing this project to move forward is a violation of human rights against every citizen of Canada and the world.

Sincerely,

April Mckenzie

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 19, 2017 5:14:10 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Why is this huge environmentally dangerous project being passed by the government, with details being hidden from the public? An attempt to slide this by the Canadian public and get construction started so there can be no stoppage of the mine is obvious to all. With oil at an all time low, and not likely to increase, it is completely incomprehensible that this project would be allowed to proceed. There is a glut on the market. Saudi Arabia and the other oil rich countries are not going to cut their market shares by decreasing production, even though they may pay lip service to the US, Canada and other nations whose economies are largely based on selling oil. It is counter intuitive to fail to see the big picture here.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition. So much for reconciliation eh? Here we go again, using a colonial approach: destroy the First Nations by taking their land, and driving them into concentration camps called reserves, where there are limited resources for them to make a living. As a Canadian, I am so ashamed.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project. In fact, I demand that you reject this project. It is demeaning to both the government and Canadians to know that we are being sold down the river once again. Have you looked at the devastation that is left, the leakage from those tailing ponds, all in the name of greed? When there is no livable area left from fracking and tar sands, and the forests burn as they are right now in B.C., and we are in trouble, it may be too late to fix things. In the end, when all is gone, we can't eat money. Think about that. The time to be nice is over, we need action to make change happen, I hope you will take that action and look for a more sustainable resource to mine, so we have clean air, land and futures.

Sincerely,

Audrey Brooks

Dear Joint Review Panel members,

I'm writing to express shock and dismay about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Indeed, I am outraged that in this day and age, after all we have learned about climate change that such destruction of the environment would be considered in a civilized society like Canada.

It is common knowledge that the mine would further endanger caribou and bison herds, undermine the treaty rights of local First Nations who rely on them, disrespect the Athabasca Chipewyan First Nation who have declared this area off limits to industrial development and ignore the voice of the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation

who oppose the project.

If all this is not enough, the project should be shut down because it: increases our greenhouse gas emissions and is thus incompatible with Alberta's 100 MT cap on oil sands emissions, and undermines our ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. By pandering to Tech Frontier, you insult and betray Canadians and our partners around the world. It simply is not worth it!!

Sincerely,

barb stec

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The biggest objection I have is regarding the Indigenous people of this region, and their right to have their objections to the proposed project heard in a fair and reasonable way, something which has not happened up until now for this project (or for most other mining projects in Canada in the past, as well.

In this time of increased global awareness, of Reconciliation and Forgiveness between most indigenous peoples and the settlers who took over their lands (worldwide), the United Nations has recently spoken out very strongly in their support.

I feel, personally, that its about time that we ALL actually listened to the UN and to the local Indigenous people whose lands will be affected, and did the right thing, which is to do more than pay lip service to the concept of Indigenous rights.

Indigenous rights are REAL RIGHTS and deserve a fir hearing, which has NOT happened to date for this project.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, on an environmental level, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Barbara Corry

Dear Joint Review Panel members,

Approving new oil sands infrastructure projects is directly incompatible with Canada's official goals as stated in the Paris Agreement. That is just one of several serious concerns I have about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Dear Joint Review.

To most of us who have grown old in this land of Canada, it is more than an area to be exploited for the purpose of making money. The land is to be shared with all lives, human and animal. The earliest nations who lived here knew that and even those who folloed to farm the land, appreciated it for its diversity. Please don't spoil the areas which other life can use.

Beryl Forgay

Dear Joint Review Panel members,

I don't understand how anyone could justify this new application for a tar sands mine. We have committed to lowering our emissions according to the Paris Agreement. How can a new mine do anything but increase our emissions. Are we not suppose to be directing our energies towards alternative energy and energy conservation in order to lower our emissions. Please explain the rationale.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Bob Morgan

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project. Given the low prices for oil at this time, with little sign of any real upswing, such additional production in tarsands heavy oil is NOT financially viable, aside from the known and ongoing negative side effects as listed above. Many large players have withdrawn from the tarsands - why is Teck so interested in this region? Has there been a thorough, public environmental assessment of their proposed project? It would seem not. I depend on my Government to act in the interests of ALL Canadians to ensure safety for our endangered species, preservation of our invaluable Boreal region, and support for the United Nations Site of Wood Buffalo Park and of the vital Athabasca Delta area, for future generations. There are alternatives to oil - none once such natural resources are destroyed.

Reject this project!

t

Sincerely,

Bonnie Denhaan

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The timing of such a mine at a time when the current operators in the area are clearly displaying a hesitance if not outright refusal to oblige to the cleaning up of the tailings ponds that currently cover 220sqkm is disgraceful.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. Dear Joint Review Panel members,

In addition to the prepared comments below from LeadNow.ca, I would like to specifically comment on the insanity of pushing for more fossil fuel as a general concept. Canada can, and should, be a leader in renewable, green energy. We have the resources to power our country AND leave an environmental legacy for future generations. More fossil fuel development is simply backwards thinking in this day and age.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Brandon Savage

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 5:41:29 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

There are many reasons to reject this project. But surely, as BC burns, the main reason for rejecting the project is obvious. We MUST break our dependence on fossil fuels, immediately.

It is true that the proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

However, if the panel does not actually care about any of this, then its members needs to reject this project out of simple self-interest and a desire to preserve the planet in a habitable state. There is no doubt that this project, if approved, would produce levels of greenhouse gas emissions incompatible with Alberta's 100 MT cap, and would undermine Canada's ability to meet our Paris Climate Accord commitments.

If the threat to endangered species, and the violation of Indigenous rights and of international commitments do not particularly concern the members of the panel, then at least let them consider the threat to their own well-being that would certainly result from the approval of this project. I urge you to resist taking refuge in bogus science generated by those who have a financial interest in oil extraction. I urge you not to be swayed by those who are in denial about the consequences of further oil extraction because they are psychologically unable to face painful realities. In a word, I urge you reject this destructive and irresponsible project.

Sincerely,

Dr. Brenda Linn

Westmount, QC,

Dear Joint Review Panel members,

Let me ask you this: have you noticed the rampant wildfires in the news lately? And perhaps taken a moment to consider the factors producing these ever-worsening wildfire seasons, and the direct and disproportionate effect of tar sands extraction in exacerbating these factors? And perhaps taken a moment to reflect on the fact that we have already placed this planet in crisis, and that decisions made now about fossil fuel extraction will have devastating and irreversible consequences? I'm sure that we, as a country, can handle 'economic slowdowns', but this planet CAN NOT AFFORD any continuation of backwards, pro-fossil-fuel policy decisions.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I have been studying the economics of the Alberta Oil Sands projects, and the Kinder Morgan Trans Mountain pipeline expansion proposal for some considerable time now.

Without going into thesis length explanations and statistics, my response to this proposal is utter astonishment! With the Permian Basin oil field coming on stream in Texas, shipping light crude out of Corpus Christi, and to east Asia through a newly expanded Panama Canal able to accommodate fully loaded Aframax tankers, which the Westridge port in Burnaby cannot, where is the market for this very heavy, very degraded crude?

When, 6 weeks ago, a fully laden Suezmax tanker (a size unable to access the Westridge terminal!), pulled out of Valdez, Alaska, stuffed to the gills with North Slope crude (a heavy oil, but not as heavy as the Athabasca crude, nor with the sulphur content!!!), headed for Sth. Korea, only HALF of its cargo was sold - the rest carried to be sold eventually 'on spec'!!!

In short, there IS NOT, and for decades to come (if ever), WILL NOT be a secure and lucrative demand for this northern Alberta crude. Not only is this proposal economic lunacy, and apart from all the environmental, etc. arguments, this project will require taxpayer handouts in one form and/or the other, forever!

I urge you to reject this project.

Sincerely, Brian Hayward, <personal information removed>

---

Dear Joint Review Panel members,

As a biologist I am concerned about the impact of the massive open pit Frontier Oil Sands Mine Project will have on endangered caribou and bison herds, as well as other animals that depend on that boreal forest.

As a scientist and informed citizen I am deeply concerned about the impacts of expanded tar sands development on climate change, which represents an existential threat to humankind, the environment, and the economy. This particular project is especially filthy and presents no new approaches to mitigating its carbon emissions. Canada can no longer engage in its hypocritical role of promoting the Paris Accord and at the same time approve projects like this that would make it impossible to meet its modest commitments to reducing carbon emissions. It is time to stop expanding fossil fuel extraction until and unless technologies have been found that eliminate their excessive carbon pollution.

Thus, I am firmly apposed to the proposed project.

Sincerely,

Bruce Brandhorst, Ph.D.

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Tar Sands Mine Project, proposed by Teck Resources ... and trying to be at least respectful ... but difficult with the colonial mindset demonstrated by the naming of the "project"

Of course "big money" doesn't need permission to co-opt whatever they want ... but does that make it right?

Many Canadians were hopeful the "Harper Era" had passed ... apparently not!

What kind of world do you want to live in?

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions ... HELLO!

Please try to be part of the solution we all know we all need ... and it is not more "corputopia"

Live & love,

Bruce, Leslie, Jesse, Lindsay, Jackson, Jason, Shannon

Dear Joint Review Panel members,

Given the great uncertainty of the Kinder Morgan pipeline twinning project (British Columbians will fight hard to stop it), approval of the Frontier tar sands mine at this time would be a grievous error. Is there a current and future need for the oil? Where is that need? How can it be transported out of Canada with little social, financial and environmental impact?

More important, are the risks to the natural ecosystems --- wildlife, forests, fish, water quality--- and to the future of First Nations too great?

Hold off on this one.

---

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. **Date:** July 18, 2017 3:44:21 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

There seem to be no environmental requirements needed for this project to proceed.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Candace Carnie

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Oil sands have been exploited at an irrational pace of development while reclamation of land & water have lagged 40 years behind.

Why not allow new developments like Tech to proceed when an equivalent area of old mines and settling ponds have been reclaimed to original productivity?

The damage to climate, soil and water has been well documented and petroleum companies continue to proclaim their commitment to environmental reclamation.

After 40 years, why not make future development contingent upon demonstrated successful reclamation?

Carl Hunt

Dear Joint Review Panel members,

The Frontier Oil Sands Mine Project can not be a serious possibility of ever being passed by the government. The tar sands emissions and the emissions from environmentally permitted LNG terminals in BC, already make it impossible for the Canadian government to reach promised goals at the Paris summit.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

---

Dear Joint Review Panel members,

The Frontier Oil Sands Mine Project proposed by Teck Resources has many problems and no benefits.

First, if the federal government and the Alberta provincial governments are serious about reducing carbon emissions, we should not open any new mines. This project would violate the Paris Accord and the Alberta 100 MT cap.

Second, more oil sands projects when there is already a glut of oil on the global market is not going to help our economy.

Third, if our government is serious about reconciliation with First Nations, the opposition of the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation should be heeded.

Please reject this project

Sincerely,

Carolee Colter

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Clearly the technology to mine this stinking stuff is not state of the art in 2017. Leave the stuff in the ground until you get it right!

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I know that people need jobs. I have friends that work in the Oil Sands at various locations. However, oil is not exactly scarce right now and we do not need any further "development" of wilderness for this purpose. Canada is one of very few industrialized nations that still has wilderness and the natural world in its original state will be worth far more one day than any oil field. Please do not grant the destruction of this particular area of wilderness.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Carolle Eady

**Date:** July 18, 2017 10:03:21 PM

---

Joint Review Panel members:

Following are various reasons why you must deny the above-note Teck Resources proposal.

This mine would disrupt critical habitat for endangered caribou and bison herds; also it undermines the treaty rights of local First Nations who rely on these animals for food and cultural practices. In fact, the proposal involves an area that the Athabasca Chipewyan First Nation declares off limits to any industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation are against all such activities and it is your responsibility to respect their opposition.

Furthermore, the Frontier project would:

- produce an unacceptable level of greenhouse gas emissions; it is incompatible with Alberta's 100 MT cap on oil sands emissions
- undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments
- threaten endangered species, undermining Indigenous rights
- unleash unacceptable levels of greenhouse gas emissions.

It is your responsibility to protect everyone living in Canada from this mine.

Sincerely,

Carollyne Martell

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The tar sands are already the largest single point source of CO2 emissions in Canada. There is already a world-wide surplus of oil expected to last for years no matter how much OPEC cuts back production. Lastly, Volvo plans to end production of gasoline-only cars in 2019.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Hello Panel members,

I have serious concerns about Teck Resources proposed Frontier Oil Sands Mine Project.

It is obvious this will :

- \* disrupt critical habitat for endangered caribou and bison herds
  
- \* ignore the treaty rights of the local First Nations who directly oppose the project.
  
- \* create a huge increase in greenhouse gas emissions. The project flouts Alberta's 100 MT cap on oil sands emissions.

Green lighting this project is a slap in the face to our claims to be working for a cleaner world tomorrow.

Given the decline in oil usage worldwide, this will needlessly create a permanent scar on Canada's north just so that a few rich people can become a little bit richer selling tar to other countries.

If only for the sake of your grandchildren, reject it, Please!

Chris Wilkes

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 8:51:20 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

People from all over the world are starting to migrate to Canada for fresh water. We have a duty to the human race to protect the world's largest fresh water source. These Tar Sands pollute. We must find alternative energy sources, to preserve the earth for future generations.

Sincerely,

Cindy Hillard

**Subject:** URGENT: Pls reject the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 5:24:22 PM

---

Dear Joint Review Panel members,

I'm adding my voice expressing urgent and serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Obviously, this proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

PLEASE, you must reject this project. Our children's children are counting on us to move us to clean, safe (not nuclear), renewable energy. This can create jobs to replace fossil fuel jobs. No one needs to become unemployed. Humans have incredible ingenuity and we can figure out how to supply ourselves with energy while not creating a hot climate we can't survive in.

Sincerely,

Cindy MacDonald

**Subject:** Reject the Frontier Oil Sands Mine Project and all Further Projects  
**Date:** July 18, 2017 3:09:13 PM

---

Dear Joint Review Panel members,

I'm writing to express my objection to the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project. I urge the panel to respect treaty and conduct themselves in a spirit of reconciliation.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Finally, if the billions needed to clean up the mess from the mine were front-loaded, the project would be entirely uneconomic. It is also not needed. Panel members may be unaware that in many jurisdictions renewables like solar are already competitive with fossil fuel; solar even subsidizes coal during peak hours in cities like Edmonton. How senseless and bizarre is it that clean energy is subsidizing dirty energy in Alberta? Who voted for carbon self-defeat?

In the end, renewable energy's price competitiveness with fossil fuel makes additional investment in carbon-emitting infrastructure a senseless, bad deal. The climate chaos of fire and flood that would accompany it is equally cruel and unacceptable.

Sincerely,

Clarke

I mean let's get real here!

UNESCO world heritage parks are%100 more important than tar sands.This park is the largest of its kind in the world. Let's celebrate it's 100 birthday in 2022 by conserving it further. And not by destroying it with a tar sands mine leaching it to death. BC is already screwing this park up with Site C, the other elephant in the room.

Wake up stupid humans!

Sincerely,

Colin Labelle

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. I'm now 74 years old, was born and raised in Calgary, in the oil patch and its extractive culture. I can assure you that this is a bad investment to be making: bitumen and fossil fuels generally have had their day, and if they haven't, due to your exploitative mindset and our consumer culture, our kids and grandkids are going to suffer immeasurably more than is already baked into the carbon overloaded environment.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. Dear Joint Review Panel members,

Harper's tar sands are the worst environmental catastrophe in Canada's history. Entire communities have been devastated, adults and children have been poisoned en masse, and cancer rates amongst tar sands workers and community members has spiked. Learn from the past instead of repeating it. If you go forward with this project, you are facing divestment from major investors and will find yourselves in an ongoing confrontation with the majority of the Canadian people.

As you know, Canada is a signatory on the Paris Climate Accord, which this project is in clear violation of. You will not only be breaking Canadian law and poisoning thousands of people, you will be breaking international law. Do not think that what is happening in the US will protect you. Trump's government is failing, and he is not going to protect you when you are called on to pay for this atrocity. Look to the rest of the world. I would not be surprised if, in a few years, we start to see major environmental polluters being arrested and tried at the Hague for crimes against humanity. You don't want to find yourself in that position.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. Dear Joint Review Panel members,

I am concerned about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Why would one degrade critical habitat for endangered caribou and bison herds?

Why would one not reconcile with the treaty rights of local First Nations who rely on such herds for food and cultural practice?

Have the Athabasca Chipewyan First Nation not declared this habitat off limits to industrial development?

Where is the respect for truth and reconciliation with both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation?

How will such a project help us achieve the emissions reduction targets required to meet our Paris Climate Accord commitments?

Please refuse to accept the Teck Frontier Oil Sands Mine project.

Sincerely,

Dan Maitland

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Plus this huge investment in oil is too late as the world realizes this oil will receive a too negative opinion regarding the impact on Climate Change plus it will likely never turn a profit as the world is weening itself off these dirty oil supplies and the major oil countries continue to extract as much oil as they can to get their money now because the price is only going to get cheaper.

A fool-hearty investment in our northern lands.

Please just don't do it!

Sincerely,

Dana Brown

Dear Joint Review Panel members,

I strongly object to the proposal by Teck Resources to develop their Frontier Oil Sands Mine Project.

This proposed strip-mine would permanently contaminate the ground water and the flowing water supply for the surrounding area and for the downstream watershed. The major contaminants include high concentrations of benzene and benzene-like compounds that are known mutagens and carcinogens. This will cause the incidence of cancer, still-births, and birth defects to skyrocket among the population downstream of the mine, including the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation.

This toxic mine will disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Daniel Conrad

Dear Joint Review Panel members,

I'm writing to express my serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. There several reasons why this project should be rejected.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

This new mine would pollute watersheds throughout the region., including those that flow through Canada's largest World Heritage Park.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

DARCY

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Contrary to the position of Prime Minister Justin Trudeau, Jim Carr, and Catherine McKenna:

We can not have our tar-sands project cake, and maintain our environmental commitments to the world as ice-cream, making up together a very unpalatable, Canadian Dessert.

Continuing Tar-Sands development sends a message to the rest of the world that we, Canadians, are as wishy-washy and self-serving-with corruption likely a thought as well-should we continue to support Fossil-Fuel Corporations over the needs of the rest of the planet.

Thank you.

Sincerely,

Darren Gregory

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

IN ADDITION, THE YEARS OF RESEARCH CARRIED OUT BY THE UN'S INTERGOVERNMENTAL PANEL ON CLIMATE CHANGE MADE A CONVINCING CASE THAT 80% OF OUR UNDEVELOPED FOSSIL FUEL RESERVES MUST REMAIN IN THE GROUND IF WE ARE GOING TO HAVE A GOOD CHANCE OR HOLDING GLOBAL AVERAGE TEMPERATURE BELOW 2 DEGREES CELSIUS. ALBERTA'S TAR SANDS OIL IS ONE OF THE DIRTIEST, MOST POLLUTION FOSSIL FUEL DEPOSITS TO FURTHER DEVELOP. FOR THE BENEFIT OF THE HEALTH AND WELFARE OF THE ENTIRE EARTH AND ITS LIVING CREATURE, PLEASE REJECT THE FRONTIER OIL SANDS MINE PROJECT.

Sincerely,

DAVID

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

I believe that any industrial developments should put marginalized people first. In this case, that means developing in a way that is supported by the Chipewyan and the Mikisew Cree. If the industry doesn't believe that it is possible to do that, then the project should be cancelled. It would be unreasonable for them to demand that marginalized people be sacrificed for their own profits.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

David Inwood

---

Dear Joint Review Panel members,

I've personally taken the time to write this message and I'm writing to express very serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The Truth and Reconciliation Commission has laid out clear standards for Canadians to honour the rights of and establish ethical relationships with indigenous communities. The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition. Ethical leadership requires that you honour the wishes of these First Nations people especially since it is on their land that this project is proposed.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. What leadership on climate change is Canada demonstrating with this project?

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project, protect our resources and land and thereby protect the interests of all Canadians now and for future generations.

Sincerely,

David Pereira

Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Don Dyck

Dear Joint Review Panel members,

At this point in time, the federal government is re-writing the Canadian Environmental Assessment Act and proposing significant improvements in its coverage and application, among other important reforms.

I have very serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources which you are currently examining. I suggest you either put this process on hold until the CEAA reforms are legislated, or failing that, you should apply those reforms to your panel review.

The expansion of fossil fuel extraction is unacceptable anywhere on the globe. The world has agreed that climate change is a very serious problem and that emissions from the burning of fossil fuels is the main cause. If that means anything at all, it means we MUST STOP expanding the extraction, transportation and use of fossil fuels. When you find yourself in a hole, the first rule is to stop digging. ANY expansion of fossil fuel infrastructure is a crime against humanity and the other inhabitants of this planet. You have an obligation to act morally.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The Frontier project is incompatible Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Don McLean

**Date:** July 18, 2017 10:57:20 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I believe I am aware of the cost of extraction from Alberta's oil sands (destruction of forest, annihilation of wildlife, water contamination, negative impact on people's health) as well as the inefficiency of production (2 tonnes of oil sands required to extract one barrel of oil with a typical energy return on investment (EROI) of 5:1). I don't think Canadians should pay such a high cost for export purposes lining the wallets of international corporations.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Dear Joint Review Panel members,

Let me open by saying this tar sands mine is old out-dated technology. It is time to put forward ideas and plans that take into account the ways we contribute to global warming, our responsibilities to consult, truly consult with First Nations, well, really to do more than consult but actually negotiate nation to nation. And to acknowledge the crucial health of our nation and the animals we share the land with.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Dorothy Field

**Date:** July 18, 2017 6:22:19 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Even more important, the project would produce a huge increase in the level of greenhouse gas emissions. As the largest-ever tar sands mine, the Frontier project is clearly incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. As you know, these commitments are extremely important to the present and future well being of Canadians and all the peoples of the planet.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. In short, it would threaten us all. I strongly urge you to reject this project.

Sincerely,

Dr. Helen Jones

---

Dear Joint Review Panel members,

I'm writing to ask that you deny Teck Resources' application to open and operate the Frontier Oil Sands Mine Project. I oppose this project for many reasons, which I will list below. But I live in the Teck catchment area and while they provide some jobs, they are much better known for continuing to release pollutants into the Columbia River and for poisoning an entire community. Why would we assume that they'd be any better than Suncor, who is currently trying to defer its commitment to clean up the tar sand mess they left? What's it going to take for us to learn that this kind of operation is an old and worn out way to make money and energy? And why would you approve a project that will make a mockery of the Alberta greenhouse gas emissions cap?

I oppose this proposal because it abrogates treaty rights, will pollute sensitive watersheds, will destroy critical habitat for endangered species, and because it is NOT CREATIVE!! We need to start thinking in new ways about how we will provide energy, rather than the same old "rip things up and take what we want." Our current wildfire season here in British Columbia is more than proof that the climate is changing, and drastically.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Dr. Therese DesCamp

Dear Joint Review Panel members,

I don't understand politicians. We vote for you people to do what is best for the people of Canada and something like a giant tar sands project is up for review process when it shouldn't even be considered. Why is this even something to consider when it is not in the best interests of Canadians and new oil is not needed?

Look, this is a staging tactic by Tech Resources to simply tie up the huge area they want to hold onto just in case oil prices make a comeback. It is nothing short of a land grab by a greedy corporation and future investments are years off but in the mean time they want it in their pocket. People are not being fooled. Not by Tech Resources or by politicians. I guess 2019 will be time for another change in government.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. ---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

This is yet another proposed project which will cost us in future much much more than any supposed benefits it might deliver.

Sincerely,

Edward Tymchatyn

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Canada is supposed to be trying to avoid global warming and this has the exact opposite effect.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Edwin Daniel

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Please on behalf of our children, grandchildren and all future generations, do not grant permission for the development of this mine!

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Minister Goodale refers to climate change and the need to change our behaviour or adapt. There is no way we can adapt to this kind of abuse of our environment. The aquifer is already dried up in the boreal forests as was proven last year by the fire in Fort McMurray and is now happening in the interior of BC. Future assault is a disaster waiting to happen.

Sincerely,

Elan Gibson

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

This project is a severe environmental hazard, as it would contaminate water flowing through Wood Buffalo National Park, while polluting other sensitive ecosystems home to endangered species. Furthermore, the Frontier Oil Sands Mine Project would considerably accelerate extreme climate change, with the potential to release enough CO2 emissions to exceed Alberta government limits on the oil and gas industry.

This project's approval would also directly violate the rights of two First Nations, the Athabasca Chipewyan and Mikisew Cree, both whom are opposed to this mine. In particular, the Athabasca Chipewyan have opposed industrial development in the proposed location to protect an area of cultural importance. Therefore, it is clear that this mine doesn't have the consent of affected indigenous peoples.

As stated above, the Teck Frontier Oil Sands Mine is a significant risk to both local ecosystems and the global climate, while infringing on indigenous rights. For these reasons, I urge you to reject this project.

Sincerely,

Eliot Santo

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Like it or not the rights of the First Nations people in this area must be respected and listened to. Additionally, they are the ones you should have consulted before starting on this unnecessary project in the first place. These people are inhabitants inside this wilderness that you want to turn into this Oil Sands Mine Project.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. You are thereby turning up your noses at both the Indigenous lives along with the natural animal / plant life in this ecological area just to create a glorified mine.

I urge you to reject this project.

Sincerely,

Eliza Tague

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

As I understand the situation, the proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. It appears that the treaty rights of Athabasca Chipewyan and the Mikisew Cree have not been properly respected. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to consider their opposition. At the very least, full, open and transparent negotiations with these two First Nations should be part of the approval process

Furthermore, the project would produce an additional greenhouse gas emissions. As far as I know, the Frontier project has presented no detailed plan of how it is compatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. I feel these are important commitments that the Alberta and Federal governments have made to Canadians and the international community. Any approval of this project should only be made once Teck has presented a comprehensive plan to show how the project is compatible with those commitments.

It appears that the Teck Frontier Oil Sands Mine could very well threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to review this project very carefully and release full disclosure of how the project does not threaten wildlife and government commitments before allowing it to go ahead.

Sincerely,

Elsbeth Nickle

Dear Joint Review Panel members,

It is my sincere hope that you will see fit to reject the Frontier Oil Sands Mine Project as proposed by Teck Resources.

I cannot understand how such a proposal could even reach your panel for consideration when Canada has not yet presented a plan to eventually discontinue the whole tar sands operation.

To allow such a giant investment in the most environmentally unsound project Canada has ever considered, without first detailing, and then giving due notice to Frontier Oil Sands, regarding just how we plan to keep our promise to phase out fossil fuels in the near future, is a dubious venture.

The fact that this mining company has interests in pipelines should be a signal that they can be expected to seek pipeline expansions too.

Such "supportive" activity is seldom explained to the public in a manner that clarifies what it really involves, i.e. it is not just oil pipelines, but two-way transportation of highly toxic and highly explosive hydrocarbons diluting the tar from which fuel oils can be distilled by the recipients, and then be returned to us to be reused. This process multiplies severalfold the inevitable environmental damage from processing and the risk of environmental risks involved in transportation.

This proposed mine and necessary pipeline expansion would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Much of this dangerous material will be shipped offshore at inevitable risk to our valuable West Coast marine life and the livelihood of other First Nations.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions.

The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

F. William Halliday, BA, BSc, MD, FRCP

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions.

The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Frances West

---

Dear Joint Review Panel members,

I love my country and work hard to contribute to making it better. At the age of 63, I am more and more alarmed at the insidious and terribly harmful influence of some of our biggest companies on our representatives to government, WHO ARE MANDATED TO PROTECT CANADA FROM HARM. It is in this capacity I write to you today.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project. We need to be a leader in the world on the environmental front, and not just another example of corporate greed over the well-being of all life here in Canada, and the world.

Sincerely,

Francesca Anton

Dear Joint Review Panel members,

Please think about this logically - the Federal gov't would be breaking an oath that they have understood and respect Canada's Indigenous Peoples ('cause they don't want it!). They would be gravely injuring Canada's natural world (it's flora & fauna) as this would weaken forests & waterways. Our resolve as pertains to climate change can't be believed as this mine would make a mockery of that plan.

Please do not make a hasty, ill-advised plan a certain death penalty for so many innocents !

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. I repeat. Both Alberta and Canada have made commitments to reduce emissions. Are those commitments worth anything?

As well, the plan is for Teck to use the proposed Kinder Morgan pipeline to transport the dirty oil to the BC coast so the damage to the environment would not be limited to Alberta.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Gary Cree

Dear Joint Review Panel members,

Wow, the tar sands disaster just keeps getting worse. I guess Alberta prefers allowing Teck Frontier Mine to destroy even more of the province by ripping out what's left of your arboreal forest and dooming the caribou and bison to extinction since they will have nowhere to live. When is Canada going to start moving forward to clean energy instead of continuing down the destructive tar sands path? Not to mention the fact that the local First Nations do not want this destructive mine in their community. Would YOU want it in YOUR community? Stop the madness and stop destroying the whole of Alberta so a few dirty energy companies can get richer. Do you really like the destruction they leave behind? We need more forests, not more tar sands.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

We are already seeing the effects of global warming -- this summer's fire season is just getting started, and we're spending millions trying to mitigate it.

It is critical not to create more carbon pollution by killing yet more boreal forest -- forests which are essential to keeping our world livable and cleaning the air -- and decimating yet more habitat, releasing even more carbon into the atmosphere.

The proposed mine would also disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices.

In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

As I mentioned, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to soundly reject this project, for all our sakes.

Sincerely,

Grace Golightly

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Teck has managed to keep this mine under the radar so it's characteristics are not well known.

In case you haven't heard much about the proposed development, the mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Greg Cook

Dear Joint Review Panel members,

I'm concerned about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

It would:

- \* disrupt habitats for endangered caribou and bison - \* undermine treaty rights of First Nations who rely on them for food and cultural practices.
- \* produce high levels of greenhouse gas emissions
- \* make it difficult for Canada to meet our Paris Climate Accord emission commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

Remember the word 'tar', the sands are exactly that: a sticky black substance which needs to be extracted. Having grown up in coal country - Ohio River valley, I know the results of burning soft coal which is more tar-like: respiratory weaknesses, illnesses, and death.

Please reject this project.

Sincerely,

Heather Macleod

Dear Joint Review Panel members,

My main reason for my serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources, is that it is opposed by the people whose lives it will affect most, and permanently, the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation. I urge the panel to listen to their opposition. Nature that far north is a fragile ecosystem, and it will never recover from the kind of devastation being proposed.

Caribou everywhere are under threat by development; bison, which are only now making a come back from their near extinction a century ago, have been stressed for years by habitat loss and climate change (the bison herd in the southern NWT was decimated by anthrax poisoning back in 2012, a situation exacerbated by climate change).

In addition to threatening habitat for caribou and bison, the effect of the mine would be extremely negative for the Indigenous groups which rely on these animals for food and cultural expression.

I urge the panel to reject this project.

Sincerely,

Hermina Joldersma

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Any such project would increase greenhouse gas emissions and given the climate crisis facing Canada and the world, it is inconceivable that mine like this would be developed. Further, the Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would threaten Canada's ability to achieve the emissions reduction targets we committed to meet at the Paris Climate Accord.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

J. Keith Hay, MD

**Date:** July 19, 2017 2:16:15 PM

---

Dear Joint Review Panel members,

I'm writing to express my extreme concern about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Of equal concern, the project would produce totally unacceptable levels of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

To summarize, the Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. In the interests of all Canadians, I urge you as conscientious overseers of our country's obligation to protect the environment to reject this destructive project.

Sincerely,

J. Scott

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. Please consider the following when reviewing the proposal.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Jaclyn O'Connor

Dear Joint Review Panel members,

The Frontier Oil Sands Mine Project, proposed by Teck Resources is an outrageous travesty of injustice to the environment and nearby First Nations.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices.

Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions.

The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

I urge you to reject this project.

Sincerely,

Jacques Charbin

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. While I recognise that economic activity is deemed a social good and that development is considered necessary I question whether development should be exempt from the normal economic considerations of costs and benefits.

My observation of mega-projects, particularly in the mining sector, is that nearly invariably the decision to proceed entirely neglects to consider the true cost of clean up in the aftermath of development.

The Alberta Tar Sands development has been controversial since I was first taught about it in the 1960s and the spectacle of the ruin that this development has made of Canada's north is a mute testament of why it was, and remains, controversial.

The mess that some profit driven companies have made of our environment is, with small exception, left to the public to bear. Whether through persistent degradation of our environment or through the expenditure of vast amounts of public money to ameliorate the injuries.

There is only one way where development on the scale proposed is acceptable and that is on the basis of cleaning up as one goes. Of course, insisting on this often will make such projects 'uneconomic' to their proponents. Which reveals all one needs to know about the 'economic' arguments in their favour.

Leaving the cost of remediation to the end of a project's economic life is a guarantee of the public dealing with a corporate shell without assets to finance the task required. Taking money 'on account' to deal with future remediation is equally disingenuous. These funds are never reserved to use for their intended purpose and the costs of remediation always greatly exceed any accrued reserve in any case.

I am neither blind to the political issues which underlie these decisions nor to the excessive influence that large amounts of money seems to have on our elected officials and public officers. One does not have to take a bribe to benefit from deciding in favour big money. There are many benefits to be had by acquiescing to the desires of the powerful: Re-election, promotion, access to the corridors of power, expectations of reward in other forms. It is amazing how so very often public policy decisions seem to align perfectly with the personal interests of the people making the decisions.

The people of Canada, indeed the people around the world, have long since grown tired of this systemic corruption. We are so very, very weary of seeing the birthright of average citizens parcelled out by evidently corrupt governments to private interests for a fraction of its real value. We are

increasingly angry when we are left with the cost of cleaning up after our 'betters' when those interests longer benefit from their exploitation of public property.

The Alberta Tar Sands development projects are individually and collectively a blight on the Canadian Nation, physically, intellectually, economically, and morally. We need no more moonscapes and rivers of filth in this country. It is past time that oilmen need look to less destructive means of earning a living.

Do not permit this project to proceed. It is unconscionable.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. This cannot go ahead. Energy companies have to transition to non-fossil fuels starting now. Every billion invested now locks us in to dangerous levels of CO2 emissions for decades, and we don't have decades. Teck ahs to realize that the age of fossil fuels is ending, and the big money will be in renewables. Rescue them from their own folly and turn this project down.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. **Subject:** Concerning Teck Resources Frontier Mine Project  
**Date:** July 20, 2017 12:17:13 PM

---

Dear Members of Review Panel:

I hereby express my strong opposition to approval of the proposed Teck Frontier Mine.

First, the area concerned is important to two indigenous peoples: the Mikisew Cree, and the Athabaska Chipewyan. Both groups consider that the proposed mine would violate their aboriginal rights. They strongly oppose the proposed industrial development. In this era of Reconciliation and recognition of Aboriginal rights, it is highly unwise to impose a huge industrial project on an area of indigenous concern.

Secondly, as a concerned Canadian, I oppose a project that will severely impact the environment. The proposed open-pit tar-sands Frontier Mine would involve destruction of a large area of boreal forest, and imperil the herds of bison and caribou which are already stressed.

Third, the proposed mine is intended to supply the Kinder Morgan pipeline. Many thousands of Canadians are horrified that the K-M Pipeline is proceeding, when it is abundantly clear that the environmental impacts and aboriginal conflicts far outweigh any economic benefit. The world is rapidly shifting to renewable energy, and it is an enormously risky folly to continue pursuing the transport of low-grade "dilbit" over huge distances of Canadian territory and by tanker through Canadian waters.

Fourth, the shift to renewable energy makes continued mining of tar sands an unsustainable activity. The pollution involved would defeat Canada's attempts to reduce global warming. It is highly risky—and unnecessary—to continue to mine tar-sands, with their inherent pollution and contribution to climate change, their habitat and species destruction, and their abrogation of aboriginal rights.

As a Canadian citizen, I strongly oppose the proposed Teck Frontier Mine project. I urge you to use all your powers to deny this application.

Ms. Jan Bevan

Hornby Island, B.C.

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck.

This type of project is not what is needed as we face a world of climate change. This is a backwards, nothing-will-never-change project. Something HAS to change to protect our future, because it's going to change on us. This project is a perfect example of climate change denial, really.

We cannot continue to increase oil sands production and expect to not pay a price. Economics will probably prove to be a final nail in the coffin as projects like this become untenable in our changing world.

This type of project is a mistake now, and will be an even bigger one in the future.

Please do not approve it.

Sincerely,

Jane

Dear Joint Review Panel members,

Before you read the following form letter expressing general rejection of this plan, you should know that I was one of the thousands that spoke out against the mega quarry proposed for Melancthon in southern Ontario. That too was an outrage that a big multimillionaire dollar hedge fund tried to sneak into my backyard.

This mine isn't literally in my backyard, but it's in my country and its part of the environment we need to protect. Don't underestimate the power of the people. We took on the mega quarry and won. Eyes are on you.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. Dear members of the Joint Review Panel,

I wish to bring to your attention a number of serious concerns about the proposed Teck Frontier Oil Sands Mine.

Having lived and worked as an Ecologist in Northern Alberta for several years, I am aware of the details of this proposal, many of which make me very concerned for the long-term environmental and cultural impacts on this region. This proposal has been through many rounds of Supplementary Information Requests but there is good evidence that it has been advanced through the EIA process because of tight deadlines and confusion over the previous government's changes to the Environmental Assessment Act, rather than the merits of the application. This has left many major unresolved issues as the project is about to be presented for the panel.

The proposed mine would disrupt critical habitat for Woodland Caribou and Wood Bison (in particular, leading to potential disruption of the disease-free status of the Ronald Lake Bison Herd). The proposed mine is directly on the migratory pathway and breeding area of a number of birds that are Species At Risk, which have not been adequately surveyed or assessed in this region or in Canada (examples include the Whooping Crane, Yellow Rail, Common Nighthawk, Cliff Swallow, Barn Swallow, Tree Swallow, Red Knot, Upland Sandpiper, Ruddy Turnstone, Solitary Sandpiper, American Golden-Plover, Bar-tailed Godwit, Short-billed Dowitcher, Dunlin, Olive-sided Flycatcher, Canada Warbler, and Rusty Blackbird). Furthermore, current (and proposed) methods of assessing and mitigating impacts on migratory and breeding birds are extremely inadequate, particularly for birds other than waterfowl (e.g. passerines, shorebirds, and aerial insectivores).

Teck has also failed to articulate how it plans on mitigating the impacts of invasive plant species, industrial noise (including noise from the proposed airport), and light pollution (with potential to impact Wood Buffalo's status as a Dark Sky Preserve).

The mine will also impact the rights of Indigenous people, including the Mikisew Cree, Athabasca Chipewyan, and Metis. The proposal has not adequately outlined impacts on these people, including impacts to their health, livelihoods, and spiritual and cultural wellbeing, as well as access to traditional territories. Teck has not provided clear ways of mitigating these impacts.

Furthermore, the project would produce an unacceptable level of emissions of contaminants (PACs, PAHs, and methyl mercury) and greenhouse gases. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

I urge you to reject this project.

Sincerely,

Jason Straka

To All Joint Review Panel members,

The Frontier Oil Sands Mine Project, proposed by Teck Resources, is a complete disaster for many reasons and therefore should be stopped immediately.

The world does NOT need to destroy nature, animal habitat, indigenous territory and create pollution in order to produce more hydrocarbons. And we specifically don't need that happening in Canada, specifically in Northern Alberta's tar sands.

Stop this project while we can and make the right decision for Canada's future. Stop the Teck Frontier Mine and protect people and nature instead of short term profits and a pollution.

Regards,

Jeff Payne

Dear Joint Review Panel members,

I'm writing to ask you to reject the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Jeffrey Clapp

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I am a mother of young children who will, together with countless others, be impacted by climate change and poisoned water. I care about the boreal forest and endangered species and habitat. I care about the rights of the First Nations who suffer the most from dirty projects in their territories. I hope you care about these things too. They matter, more than profits.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Jen Strohschein

**Subject:** Teck Frontier Oil Sands Mine Project  
**Date:** July 19, 2017 3:59:22 PM

---

Dear Joint Review Panel members,

I have some concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

My first concern is in regards to Alberta's tar sands emission cap of 100 megatonnes/year and how, even without this project's approval, we are expected to be approximately 30 megatonnes over the cap. Not only is this unacceptable but it is contrary to our responsibility to uphold the Paris Climate Accord.

Secondly, it is widely suggested that the project will disrupt critical habitat for endangered caribou and bison herds, both of which are of great concern to me. The undermining of local First Nations treaty rights and the fact they rely on the land for food is another concern of mine, not to mention the potential loss of their cultural practices. The mine is proposed for an area the Athabasca Chipewyan First Nation has declared off limits to industrial development. Since both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, I ask the panel to respect their opposition. These lands are obviously important to them.

In summary, the Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I strongly suggest this project be rejected. As much as Alberta is in need of jobs, we cannot afford the consequences of approving this project.

Sincerely,

Jenna Gardner

**Subject:** Say "NO!" to the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 5:34:11 PM

---

To all Joint Review Panel members;

I write today to express my complete opposition to the proposed Frontier Oil Sands Mine Project, put forward by Teck Resources.

This mine \*will\* disrupt irreplaceable habitat which supports endangered caribou and bison herds, and WILL undermine the treaty rights of local First Nations who rely on these animals for food and cultural practices.

The fact is Teck Resources has proposed opening a tar-sands mine in an area the Athabasca Chipewyan First Nation has declared OFF LIMITS to industrial development! It is impossible to imagine a more disrespectful, ignorant and abusive proposition! Both the Athabasca Chipewyan First Nation and Mikisew Cree First Nation oppose this project - your panel MUST respect their position.

Furthermore, the Frontier Oil Sands project WILL add an unacceptable level of greenhouse gas emissions to Earth's atmosphere. Teck Resources' project is utterly at odds with the health and safety of Canadians, and incompatible with Alberta's 100 mega-tonne cap on tar-sands emissions. This proposed project WILL undermine Canada's emissions reduction targets, and WILL undermine our credibility on the world-stage where our country's required Paris Climate Accord commitment is concerned.

CANADIANS EXPECT BETTER!

The Teck Frontier Oil Sands Mine threatens endangered species, undermines Indigenous rights, and places Canada on the precipice of unleashing UNACCEPTABLE levels of greenhouse gas emissions!

As a taxpayer and voter, I demand you immediately reject this project!

Cordially,

Joanne Bentley

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

This absolute insanity is a very serious threat to our very survival on this planet!!! The greedy disgusting fools who can not think past the end of their own noses are completely out of control!!! Unfortunately, Trudeau does not have a clue about the consequences of lying to Canadians and the world that he is supporting climate change control, then shamelessly promotes opening up the world's filthiest and most toxic bitumen from the Tar Samds. To make things even worse, he plans to ship it through aging broken pipelines then fill tankers that will, without question, spew this filthy muck along the pristine Pacific Coast. Once this bitumen spills there is absolutely no way to clean it up and that will be the end of sea life there!! More than ever, we need strong, insightful leaders who understand the consequences of horrible decisions and choose wise ones instead!!

Sincerely,

Jocelyn Chouinard

Dear Joint Review Panel members,

Why in Gods name are we even considering the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The GHGs that would result from this project would put us completely at odds with our stated climate goals from the Paris Accord. To continue to expand tar sands exploitation with the knowledge of the climate catastrophe our offspring are facing is irresponsible and reprehensible.

The opposition of local First Nations and the destruction of caribou habitat should be enough reason to say no. The climate implications make no the only clear choice.

As the father of two teenagers I worry about the future they face as a result of the failures of our present leaders. Please say no to the Frontier Oil Sands Mine.

Sincerely,

John Hancorn

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. At a time when we desperately need to reduce greenhouse gas emissions and move rapidly away from the use of fossil fuels, this project must not be approved. To do so would be an irresponsible act.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

I urge you to reject this project.

Sincerely,

John Shearer

Joint Review Panel,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

First, as a business man of 40 years in Canada, I must inform you that the age of "mega project" is finished around the world if you care to follow energy developments & trends, or if you have traveled at all to various countries over the last few years.

Second, fossil fuel is obsolete, since the market for tar sands is shrinking exponentially, if you check:

- 1) data from peak oil
- 2) cost-effectiveness of energy efficiency & conservation achievements around the world, resulting in ever growing reductions in demand
- 3) economic & investment trends & emerging policies, which are divesting from fossil fuels (<10% growth rate)  
& investing in renewable energy (>40% growth rate over the last 10 years)
- 4) environmental controls, legislation & regulations
- 5) public demand for the protection of the environment
- 6) clear consensus (97%) of scientists on climate change
- 7) trends in board rooms & shareholder meetings

Thirdly, the more you promote dirty energy with such destruction on land, water & air, the more Alberta becomes the arm pit of North America, the pariah of the world community, with a black eye for energy development, tourism & business, & a denier of fact & evidence, to be reprimanded & sanctioned more & more by various groups & foreign governments

As a former consultant to Suncor, I am quite familiar with oil sands. I propose that instead, it would be far wiser, prudent & visionary with much more support internationally, for tar sands to be recycled into "silicon valley of the north" with many job creation opportunities & economic development.

In addition, I can clearly say, that such operations will result in major legal action against individuals who promote this development, with personal & corporate exposure for liability, due to the proven cancer & death rates from the pollution that has resulted so far.

In addition, the proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Approval of this project would be unprofessional, foolish or irresponsible.

Sincerely, Jorg Ostrowski, M. Arch. A.S. (MIT), B. Arch. (Toronto)

Dear Joint Review Panel members,  
In order to prevent run away global warming, we need to keep the tar sands oil in the ground. This mine should not be built. Instead, let the boreal forest in the area continue to consume carbon dioxide and produce oxygen.

Sincerely,

Jude Larkin

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

I am also doubting the economic returns of the Teck Frontier Oil Sands Mine. World oil prices are not showing any indication of rising beyond the \$50/barrel mark - with the United States looking to be oil self sufficient by 2020 as the Permian Basin is brought into play. Even if Teck Resources finds the capital to initiate the new mine, how is this initiative to ever show profit? And with regard to the Kinder Morgan pipeline - how would Teck Resources ever find the funds (under a \$50 price of oil) to pay the pipeline transport fees? I just cannot fathom how the Government of Canada or the Government of Alberta would not be tapped (yet again) to somehow arrange for public funds (which Canada increasingly does not have) to be used to somehow keep this operation alive.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. In addition, the economics of oil prices and pipeline fees indicate that there are few monetary incentives beyond government subsidies to support the project. I urge you to reject this project.

Sincerely,

Judy

Dear Joint Review Panel members,

For all the reasons stated in the following letter, please reject Tech Frontier Oil Sands Mine.

It is time to put our resources into clean renewable energies. Tar sand projects are so detrimental to the land, the forests, the inhabitants of the forests and the people. They are not renewal. They are destructive. Tar sand projects are not profitable or beneficial for our country.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

I urge you to reject this project.

Dear Joint Review Panel members,

We are in a climate and oceans disruption emergency. The survival of our species (and most life on Earth), the future of our children and grandchildren hangs in the balance. If you come down on the side of money, greed and profit, sure, go ahead and approve another dirty, polluting, carbon-intensive tar sands project.

But if you stand for life, health and survival, then you must reject this project. We must get our global greenhouse gas emissions to virtually zero as rapidly as possible.

Sincerely,

Julie Johnston

Dear Joint Review Panel members,

I am asking you ,the Joint Review Panel to pull your heads out of the tar sands and take note of what is happening world wide with respect to oil consumption. There is a major shift among the investment community to get out of oil stocks, ,Dutch Royal Shell and Berkshire Hathaway to name just 2. With oil now priced about \$45 / b and Volvo announcing the phasing out of the gasoline burning car it make no sense to increase oil sands extraction. With the onset of devastating forest fires at Fort Mac and BC it is morally wrong to approve further fossil fuel extraction for Teck Frontier Mine

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

June Wells

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 2:12:17 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project as proposed by Teck Resources.

This mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is targeted toward an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition. Approving this mine would also subject Canada to the embarrassment of having one of our UN World Heritage sites listed as endangered. Item 4 of the UNESCO request to Canada to "Conduct a systematic risk assessment of oil sands tailings ponds and an assessment of impacts to the Park from the proposed Teck Frontier Project and submit those to UNESCO's advisory bodies for review" is the least that should be required before making any decision on this mine.

Even worse, the project would produce an unacceptable level of greenhouse gas emissions at a time when your government has committed to reducing this product. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights, endanger a World Heritage Site and produce unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Kathryn Clouston

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments. This is unacceptable and should not be approved.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Kathryn Ogg

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Considerable work was done to develop an Ecosystems Management framework through the Cumulative Environmental Management Association. This multi-party work should not be ignored. Nor should the considerable efforts of the Mikisew Crew.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Kathy Porter

Dear Joint Review Panel members,

Why in heaven's name bring more oil to the surface, now of all times? The world is awash in oil and we are selling oil at rock bottom prices and, in some cases, at a discount.

If we are going to pay such a high cost for this, yet another, devastating assault on wildlife, the environment and relationships with First Nations, why not put it on hold until our country and our world can either extract the oil in a better way or is going down the tubes so badly that this damage won't amount to much.

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Lee Porteous

Dear Joint Review Panel members,

You have really got to be kidding me that you are even considering the Frontier Oil Sands Mine Project, proposed by Teck Resources.

In a day and age of climate action where we desperately need the carbon sequestration power of forests and where we clearly don't need more dirty fossil fuel projects, this proposed mine would contravene all of that as well as disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Leslie Anthony

Dear Joint Review Panel members,

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

It is unconscionable that the Frontier Oil Sands Mine Project, proposed by Teck Resources is even being considered. We must stop any further pipelines from being built. All oil extraction in the Tar Sands must stop now, and no new leases should be allowed. Canada must follow Germany's lead, and other countries who are following suit, and go fossil fuel free now. I urge you to veto any further extraction from the Tar Sands and shut this mess down for good.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

Sincerely,

Leslie Roxanne Stanick

---

Dear Joint Review Panel members,

How much habitat can we afford to lose. There are worldwide boreal fires driven, according to NASA, by volatile thunderstorm weather caused by global warming. These fires generate a significant amount of greenhouse gas.

What does this have to do with a mining company wanting to rip up more boreal forest? The answer is two fold: how much boreal forest do we have to decimate and do we really need to mine more tar sands, adding to global warming pollution.

The consequence of global warming is becoming more and more obvious according to scientists and that is why'm writing to express my most serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine, apart from the obvious pristine forest destruction, would disrupt critical habitat for endangered caribou and bison herds as well as undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Allowing this project to proceed will generate an unacceptable level of greenhouse gas emissions. Also, the Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

To restate the reasons for my opposition: The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Lillian Varcoe

---

Dear Panel members,

I'm writing to you about the serious issues I have with the Frontier Oil Sands Mine Project, proposed by Teck Resources.

This mine is problematic in several ways. The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local indigenous peoples who rely on the caribou and bison for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition. Under UNDRIP, Indigenous peoples have the right to free, prior, informed consent. This has not happened.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Lisa Descary

---

Dear Joint Review Panel members,

Along with many other Canadians I have serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. I grew up in the shadow of a Teck mine and am well aware of the impact their projects have.

Approval of this project would be a flagrant disregard of our governments' commitment to prevent catastrophic climate change due to human activity. It would ignore the recently formalized provincial cap on carbon emissions, as well as indigenous land rights. We should be reducing our country's reliance on fossil fuels, not scrambling to cash in on as much of them as possible for the benefit of a few at the cost of many.

Teck has a poor track record for respecting the environment and peoples that are affected by their projects. They should not be allowed to proceed with this project.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

**Date:** July 19, 2017 3:35:13 PM

---

- Dear Joint Panel Review members,
- 
- I am writing to express my opposition to this proposed mine which will destroy critical habitat for endangered caribou and bison herds. This violates Canada's legal commitments under the Species at Risk Act and international treaties dealing with biodiversity.
- 
- This proposed mine also violates the rights of the Athabasca Chipewyan and Mikisew Cree First Nations who firmly oppose the mine. The proposed mine area is deemed so sensitive and important that the Athabasca Chipewyan First Nation declared it off limits to industrial development.
- 
- I am also very concerned that this proposed mine will exacerbate climate change when we need to be taking urgent action to reduce green house gas emissions.
- 
- This mine also increase the likelihood of toxic chemicals leaking into sensitive watersheds that flow into the Wood Buffalo Park World Heritage Site.
- So the proposed mine should be rejected and no more time and tax payer money wasted on such projects which should never see the light of day.
- 
- Thank you for the opportunity to comment. Best regards,
- 
- Louise Taylor
- <personal information removed>
- 
- It's directly linked to the Kinder Morgan pipeline: Teck Resources has signed contracts to ship oil through Kinder Morgan's Trans Mountain pipeline. Pipelines like Trans Mountain are only needed if new tar sands projects are

built. If we kill the Teck Frontier Mine, it will erode Kinder Morgan's business case, and help kill the pipeline. [6]

Please consider signing this Change.org petition calling for a new Class A provincial park in the Selkirk Mountains that would protect grizzly bears, mountain caribou, bull trout and the Incomappleux's ancient forest:  
<https://www.change.org/p/protect-bc-s-ancient-inland-temperate-rainforest>.

Please be social and share. Many thanks.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

To allow the destruction of a forest that is hundreds of years old and will take that long to grow back to the size it is now, is egregious beyond measure. I have lived in that country and I know the size of those old trees are way smaller than say, British Columbia. It can never be regrown in many life times.

I am also aware of the way Caribou range through that area and they quite frankly, have more rights to that land than some pernicious corporation. This is greed unfettered.

Sincerely,

Lynette Fiddler

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

IS THERE A WAY BY GOD YOU THINK OF CARING FOR OUR MOTHER EARTH THE ONLY PLACE TO LIVE, AND CHOOSE TO PROTECT INSTEAD OF DESTROY WITH THESE PRJECTS THAT KILL, WILD ANIMALS, POLLUTE OUR ENGRONMENT, HURT US. PLEASE, PLEASE SAY "NO" TO PROFIT, AND YES TO HEALTHY CANADIANS AND OUR LAND!!

Sincerely,

Margarita Flores

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

As difficult as it may seem, it is now time to conduct business differently and treat our planet and the people, plants, animals, lakes, rivers and oceans with the utmost respect. Scientists are telling us that we have only a three year opportunity to halt the climate changes that will make life impossible on many parts of our earth.

I believe that the vast majority of people want to do the right thing with their lives but have been so immersed in their jobs and way of life that it seems impossible to make a change. But it can be done. Already many companies and individuals have made the switch from oil and gas extraction to the creation of sustainable energy. They have realized that cutting down forests and polluting rivers and lakes is no longer necessary. Examples have shown that there are more jobs available in the sustainable energy field while more money can be made than by remaining stuck in the old ways of depending on fossil fuels.

I encourage all involved to reject the Teck Frontier Mine plan which is so destructive and reactionary. Let's all get behind new and positive sustainable energy projects that will give our children and grandchildren the chance to live as comfortably and happily as our generation has done.

Sincerely,

Marilyn

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds.

It would undermine the treaty rights of local First Nations who rely on them for food and cultural practices.

The mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition. To fail to recognise that their no means no would be in breach of the United Nations Declaration on the Rights of Indigenous Peoples, and would indicate a failure to engage in meaningful consultation.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the federal official emissions reduction target for 2030, let alone the reductions necessary to play our part in achieving the Paris target of "well below 2degC of warming".

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Mark Bigland-Pritchard

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. To start, there is no market for this oil -- the price of oil on world markets simply does not allow this mine to generate a profit without massive government subsidies, and the government cannot hope to meet its commitments under the Paris Climate Accord if it subsidizes more tar sands development.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Dear Joint Review Panel members,

Please stop the Frontier Oil Sands Mine Project, proposed by Teck Resources.

We do not need more development of tar sands, we have plenty already. If we allow this development, we will wreak greater havoc on our environment getting the oil out of the ground and transporting it over our precious land and then through precious waterways to ship it to China or other far away place. All so that a few wealthy people can make even more wealth.

Where's the benefit to Canadians? There is no net 'real' benefit, just made up silly projections.

Sincerely,

Marlene Knight

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 19, 2017 10:34:15 AM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would

- \*disrupt critical habitat for endangered caribou and bison herds and
- \*undermine the treaty rights of local First Nations who rely on them for food and cultural practices.

In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project

- \*would produce an unacceptable level of greenhouse gas emissions.
- \*is incompatible with Alberta's 100 MT cap on oil sands emissions, and
- \*would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

I urge you to reject this project.

Sincerely,

Mary Ruddy

**Subject:** The \$20- Billion Teck Frontier Mine...  
**Date:** July 22, 2017 4:06:18 AM

---

Dear Joint Review Panel  
members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. The whole shebang is against the wellness of life, against the fight to stop Global Warming, against the rights of First Nations who do not have money but do have a sense of what belongs to the future and know how to keep themselves in harmony with life itself, and along with most of us, do not want, will not allow this travesty to go ahead. We do not need more pollution and loss of wellbeing; we do not need more Co2 in this era of fossil fuels; most certainly we do not need dirty tar sands oil that will morph into the destruction and fouling of our pristine coastal waters--and life itself. We do not want you and will no have you you, and you must curb your needless greed.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Mary Russell Russell

**Date:** July 18, 2017 10:39:13 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I really believe that Tar Sands oil should remain in the ground.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

MaryEllen deGrace

**Date:** July 20, 2017 7:40:15 AM

---

Dear Joint Review Panel members,

I'm writing to express my concerns about Teck Resources' proposed Frontier Oil Sands Mine.

This mine would destroy habitat for endangered caribou and bison herds, and undermine the treaty rights of local First Nations. The Athabasca Chipewyan First Nation has declared the region off limits to industrial development, and the Chipewyan First Nation and Cree First Nation oppose the project. I urge the panel to respect their opposition.

The mine would also produce an unacceptable level of greenhouse gas emissions, and is incompatible with Alberta's 100 MT cap on oil sands emissions. This would also undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I strongly urge you to reject this project.

Sincerely,

Matt Taves

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

In my opinion this proposal suggests collusion between Teck Resources, Kinder Morgan and Trudeau's Liberal government. The approval of the Trans Mountain pipeline now makes sense. I would have to wonder how much money is going into the Liberal party coffers from these two corporate entities.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

Canada may not be as vulnerable as other nations to the early effects of climate change, but the planet will suffer from these decisions. Canadians have no right to expect others to bear the brunt of the disaster that is coming especially as we are one of the highest per capita contributors to global warming. We must transition away from fossil fuels as quickly as possible. This project will threaten that goal.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Meredith Dickman

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Tar sands oil is particularly polluting, and as the world moves speedily toward lower cost solar and wind power. both of which have some problems but neither of which is nearly so environmentally damaging and polluting, any further mining of tar sands for oil should be a complete non-starter. Just LEAVE IT IN THE GROUND!

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Dear Joint Review Panel members,

I'm appalled that this letter needs to get to you in just 2 days before some sort of deadline. We have totally failed the country the land and people who live in the Tar Sands precincts.

Stop all expansion for 25 years;

Begin to clean up the tailing ponds (if that is possible);

Begin to monitor - in a leading edge manner - the seepage into ground water hydrology that is occurring from existing tailing ponds; and,

Make that data public.

Sincerely,

Michael Holloway

**Subject:** Reject the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 1:47:25 PM

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I strongly urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Michelle Chornell

The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

In this age of global warming and climate change we must not permit the continued expansion of tarsands development!

I am urging you to reject this proposal. For me one of my major concerns is that neither of the First Nations, the ones most impacted by this project are opposed and have not given their consent. That's enough for me, especially because they have already been significantly impacted already by other projects within their traditional unceded territories!

Respectfully,

Mike Gildersleeve

Mission, BC

Sincerely,

Mike Gildersleeve

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The level of destruction from such a project is inconceivable to me. We also know now that there is no clean up plan or method for effluent from tar sands mining. It is all sitting there in settling ponds, while government and industry try to find a way to clean it up.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Nancy Smith

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Your government has made many promises regarding taking affirmative action against climate change . . . your approval of this project will seriously negate all your words.

With regard to this government's promise to honour and respect the rights of Canada's indigenous peoples, this would be a good time to start doing exactly that!

The time is now for this government to start "walking the walk" and stop "talking the talk".

Please be true to your promise to those Canadians whose vote you garnered in the last election. We believed you then and we want to continue believing in you!

Thank you.

Sincerely,

Nancy Veals

**Date:** July 20, 2017 5:36:22 PM

---

Dear members of the Joint Review Panel,

I am deeply concerned about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would further disrupt critical habitat for endangered caribou and bison herds - already in grave danger - and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. As you know, the mine would be built in an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both they and the Mikisew Cree First Nation oppose the project. I strongly urge you to respect their opposition to your project.

In addition, this project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions and would also undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. Please, for the sake of your grandchildren and mine, take immediate action to reject this project.

Best wishes.

Sincerely,

Nancy Allan

---

Dear Joint Review Panel members,

Like many citizens, I have serious concerns about the Frontier Oil Sands Mine Project proposed by Teck Resources.

It would rip up huge swaths of pristine boreal forest in Northern Alberta, destroying critical habitat for caribou and bison herds that are already teetering close to extinction. It would also violate the rights of local First Nations, unleash a flood of global warming pollution, and pollute sensitive watersheds that flow into Canada's largest World Heritage Park.

Teck Resources strategy is to keep a low profile, hoping they can sneak their filthy mine through the review process before the public learns how dangerous it is.

Please do not approve this dirty, unjust and, frankly, disgraceful project.

Sincerely,

Nancy Belmore

**Date:** July 18, 2017 10:02:29 PM

---

Dear Joint Review Panel members,

I send this message to ensure that the Frontier Oil Sands Mine Project proposed by Teck Resources is not approved by the JRP.

I listened to Justin Trudeau proclaiming to the world that "Canada is back" as a full participant in the fight against climate change. There is no way that Canada follows through on those empty words when the JRP approves continued Tar Sands expansion.

The proposed mine destroys critical habitat for caribou and bison herds. It undermines treaty rights of local First Nations. So much for honouring Canada's signature on UNDRIP which stipulates Free, Prior and Informed Consent by First Nations in regards to developments in their territories. The Athabasca Chipewyan First Nation declared this area off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project.

The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions which undermines Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine does not belong in a Canadian economy of the 21st Century. It tightens the Fossil Fuel noose around our economic necks when we need to invest in renewable energy projects.

As climate change is caused by human activities like increased carbon emissions, how many Fort McMurray fires, BC fire storms, droughts and floods are acceptable before you say STOP.

I sent this message to say STOP now. No Frontier Tar Sands Mine Project wanted in Canada in 2017.

With Hope For Real Change Now,

Onni Milne

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

The now is the time to solicit businesses to create energy projects that are considered GREEN. Projects that by definition damage and destroy the environment and do nothing to ameliorate our current climate change problems are just plain suicidal. In fact for regulatory bodies to approve them is just murderous.

Can you sleep in peace by approval?

No new tar sands projects until the pollution curve is well reversed!

Sincerely,

P Vinish

---

Dear Joint Review Panel members,

I'm writing to say that the Frontier Oil Sands Mine Project, proposed by Teck Resources is 'not acceptable' on so many levels and must not go through.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

It is time to listen to the people and we are saying 'we have had enough corporate bullying' on projects that put dirty fossil fuel economy ahead of the rights of our Aboriginal Peoples, their health and livelihood, the health of environment and all that it supports ...including the rest of us!

Sincerely,

Pamela

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Despite the damage already done, it is not too late to stop and think seriously about what projects like these cost in REAL terms, to the long term well being of people and the planet.

This is an appeal to sanity, and to decency. This is in acknowledgment that the human species is better than this, can rise above this level of destruction, all for fast cars and baubles, glass towers, and smoke.

More and more of us are ready to look at things differently. To live better, simpler lives, that value all life on earth. I hope you are, too.

Sincerely,

Pamela Woodland

---

Dear Joint Review Panel members,

We have PROFOUND concerns about Teck Resources' proposed Frontier Oil Sands Mine Project.

THIS would be a CATASTROPHIC step BACKWARD and an embarrassment to CANADA, even if the following were not at stake and they ARE:

--> The proposed mine would disrupt critical habitat for endangered caribou and bison herds.

--> They threaten to undermine the treaty rights of local First Nations who rely on them for food and cultural practices. FACT! The mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development.

--> BOTH the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

THOSE considerations ALONE should be grounds for STOPPING this proposed atrocity. AND, it would ALSO produce an UTTERLY UNACCEPTABLE level of greenhouse gas emissions.

YOU, of course, KNOW THIS: The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, AND would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

I URGE you in the strongest possible voice (for myself AND the voiceless) to REJECT this project.

Sincerely,

Paula Gordon

Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Get Tech to cut their losses in coal and diluted bitumen, and get them back to being just a miner of commercial minerals - at less profit, but with more responsibility.

Sincerely,

Peter Saegert, P.Eng.

---

To the Joint Review Panel:

I am writing to express serious concerns about the Frontier Oil Sands Mine Project proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100-megaton cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

In conclusion, the Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Peter Schmolka

**Date:** July 24, 2017 7:27:11 PM

---

To the panel members of the joint review,

I'm writing to express my disapproval for the Frontier Oil Sands Mine Project, proposed by Teck Resources.

It is apparent that the proposed mine would damage critical habitat for endangered caribou and bison herds and undermine the treaty rights and affect the livelihood of local First Nations who rely on them for food and cultural practices. I am aware that the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to these kinds of industrial developments. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

I consider that the project would contribute an unacceptable level of greenhouse gas emissions in an already dire situation. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Peter Whitbourn

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions.

Furthermore, tailings pond reclamation is woefully inadequate with current mining operations and there is no guarantee that these ponds will ever be reclaimed. Witness the inordinate number of "orphan wells" in Western Canada from the current economic downturn. There is a real risk that these also will never be cleaned up by their perpetrators. I urge you to reject this project.

Sincerely,

Peter Wilson

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The federal government endorsed and stated in May 2016 that it would implement the United Nations Declaration on the Rights of Indigenous Peoples, which requires free, prior, and informed consent of First Nations in such circumstances. Canadians are watching to see if Canada will really turn away from the pattern of exploitation and denial of native rights that historically has had appalling consequences.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

A livable future depends on serious reduction in carbon emissions: the wildfires now raging are but one hint of what otherwise lies ahead. Canada needs to meet its international commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. As an octogenarian long committed to conservation, I urge you to reject this project.

Sincerely,

Phyllis Creighton

---

To the Joint Review Panel Members,  
greetings, from Dr. Rainey Hopewell in Victoria, BC.

I'm writing to express my astonishment, frustration & dismay concerning the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I expect & depend upon you to respect their opposition.

The project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

This project distracts us from the main endeavour facing us: the transfer of our attention, energy & spending from petroleum to green energy projects. It would also piss away many millions of dollars that could be spent on green energy initiatives at this crucial time when time is running out.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights, prolong our addiction to fossil-fueled energy, unleash unacceptable levels of greenhouse gas emissions, squander public monies, damage our faith in elected officials, & trample public hope for a livable future. I'm trusting you to reject this project.

Sincerely,

Rainey Hopewell

**Date:** July 18, 2017 9:58:16 PM

---

Joint Review Panel members:

I state below the reasons why you must deny this above-note Teck Resources proposal.

This mine would disrupt critical habitat for endangered caribou and bison herds; also it undermines the treaty rights of local First Nations who rely on these animals for food and cultural practices. In fact, the proposal involves an area that the Athabasca Chipewyan First Nation declares off limits to any industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation are against all such activities and it is your responsibility to respect their opposition.

Furthermore, the Frontier project would:

- produce an unacceptable level of greenhouse gas emissions; it is incompatible with Alberta's 100 MT cap on oil sands emissions
- undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments
- threaten endangered species, undermining Indigenous rights
- unleash unacceptable levels of greenhouse gas emissions.

It is your responsibility to protect everyone living in Canada from this mine.

Sincerely,

Richard Brownlee

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

We need to be putting resources into green energy. Volvo has just committed to all electric vehicles (or hybrid) by 2019. And we should be recognizing that oil usage is about to drop drastically - perhaps not over night, but we need to prepare for the new technologies.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I understand the desire for jobs right now, but is this the way? Fossil Fuels are the past, and Tar Sands oil makes an outmoded product even worse. Especially when you consider the land footprint and obscene volume of fresh water turned to waste water. Let's not pretend that the will be cleaned up in a reasonable period, either. The company will ask for a decades, or a century, of delay. By then oil will not be used, these massively profitable companies will have ceased to exist, and your grandchildren will carry the cost burden and environmental burden.

All this aside, how can we reject the treaty rights of the First Nations? Rejecting the laws and treaties signed in the past is the last thing massive oil companies need to see, because as corporations gain more rights in the coming years, they will be in a similar position to reject our rules for things like toxic clean up costs. We cannot normalize this behaviour.

For 40 years we've known that Canada needs to become a finished product producer and not a raw materials supplier. Why not make that statement loud and clear.

Please reject this project. We need to create renewable energy, which will create more jobs, and more sustainable jobs.

Thank You

Robert Haines

the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and

unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Dear Joint Review Panel members,

The Frontier Oil Sands Mine Project, proposed by Teck Resources must not go ahead.

The mine proposal ignores the treaty rights of local First Nations. This is an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project. As sovereign nations under the Canadian Constitution we must respect their rights.

The project flies in the face of the Paris Climate Accord.

The Teck Frontier Oil Sands Mine  
eject this project.

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and the panel must respect their opposition. If this development was happening in your neighborhood, or near the rivers that flow into it, I doubt it would be such an attractive choice.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Robert Ritchie

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

It's hard to believe that a mine like this is even being considered with the volatility in oil prices and when BC has just elected an anti-pipeline government. And what about clean up costs which many experts estimate will exceed the financial benefits.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. Sending this product West, storing it temporarily in Burnaby and shipping it in tankers through the port of Vancouver pose far too many risks. Why should the futures of so many people in these BC communities be jeopardized to make fortunes for people who do not live

any where, even remotely, close to here.

It is time to invest in sustainable and/or renewable energy sources, not hydrocarbon fuels.

Sincerely,

Rod Ramage

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

This project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

Climate change has become a critical environmental, economic, ethical and moral issue. Just two days ago the Larsen-C ice shelf in Antarctica broke up and calved a trillion ton ice-berg into the sea. We cannot ignore the destructive legacy we are passing to our children by continuing to expand fossil fuel production.

Furthermore, the proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and most important of all, unleash unacceptable levels of greenhouse gas emissions upon the world. I urge you to reject this project.

Sincerely,

Roland Alcock

---

Dear Joint Review Panel members,

I hereby wish to state my total opposition to the Frontier Oil Sands Mine Project proposed by Teck Resources.

Clearly climate change is confronting us with severe and costly conditions with very hot, dry weather unusually early and monster fires destroying vast swathes of forest and grassland along with many homes. The proposed mine would only add to the many projects which already have us set for a disastrous future if current trends continue.

How can the project even be considered when species as critically endangered as the caribou and bison would suffer? When we talk about the natives of this land, these animals are among the true natives who have been here for millennia, and we are wiping them out, one big, environmentally-damaging project at a time.

Then the Chipewyan First Nation has stated its opposition to the project, knowing that this will add to the misery already heaped upon them by Tar Sands projects dumping toxic waste into the Athabasca River. The Chipewyan are not the only First Nation to oppose the project. The Mikisew Cree have also stated their objection, full realizing the irreparable destruction the project would cause.

Much of the opposition to this project is because of the danger it presents to watersheds. Watersheds should be absolutely off limits to all industry. Any interference by man in a watershed has to be seen for what it is, endangering the country's water supplies.

These are among the reasons this Frontier Oil Sands Mine Project should be turned down. Whatever short-term gain might be foreseen, the project most certainly will have dangerous, costly, long-term consequences for all of us.

Sincerely,

Rosalind Britten.

Rosalind

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

My father was a mining engineer with Teck Cominco for approximately 35 years. He was also a naturalist interested in maintaining wildlife habitat and he would abhor this proposed development, as do I. We both oppose.

Sincerely,

Sally Hammond

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

And WHY open up more tar sands when the pipeline to B.C. will be cancelled?

You have no need to increase production in this world of climate change!

Put your money into green energy and employ people that way!

Sincerely,

Salome Waters

Dear Joint Review Panel members,

I'm writing to express my very serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

I live in the Interior of BC and the effects of climate change are not in the future - the smoke has travelled east as far as Brandon, Manitoba. At what point do we as a society realize that time has run out on our polluting way of life?

We must stop such things such as further tar sands production no matter WHAT the economic fallout might be.

People and groups who have a regulatory function have a great responsibility to not cave in to economic interests. We must act in the realization that all of us (company shareholders and government ministers included) need to breathe, have drinking water and food - the time to 'bite the bullet' has certainly come.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Sam

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

First of all, let's get to the point. Sustainable energy is already available. I feel it would be better for the economy to create infrastructure projects based around that, rather than by creating carbon-based oil projects that will soon be undesirable anyways due to the switch to carbon-neutral economies that must inevitably happen in our society.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

**Subject:** Please Decline the Frontier Oil Sands Mine Project  
**Date:** July 18, 2017 6:14:14 PM

---

Dear Members of The Joint Review Panel,

We are writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for enrisked caribou and bison herds and would undermine the Treaty Rights of local First Nations who rely on them for foods and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has pronounced as off limits to industrial development(s). Each of the Athabasca Chipewyan First Nation(s) and the Mikisew Cree First Nation(s) decline the project, and I urge the panel to regard their declension(s).

Further-more, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and the project would undermine Canada's ability to achieve the emissions reduction(s) targets required to meet our Paris Climate(s) Accord(s) commitment(s).

The Teck Frontier Oil Sands Mine would enrisk species, and would undermine Indigenous Rights and would unleash unacceptable levels of greenhouse gas emissions. I urge you to decline the project.

Sincerely and Friendly,

Shahun Popatia,

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

We are in the middle of numerous wildfires, all sparked from a couple of thunderstorms and being fueled by extremely dry forests, which no doubt are a result of climate change. It does not require a scientist to realize the scope of what the future holds with extreme weather patterns becoming a reality. Why would anyone want to contribute to the extinction of the human race by allowing such a large environmentally destructive project like the Frontier Oil Sands Mine to go through?

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Those who support such carbon intensive projects may not expect to suffer directly from the worst effects of continuing this pollution, but their legacy as

contributors to this disaster will always be remembered.

Why does the Liberal Party do their best to alienate the generations that will be most affected by these decisions by ignoring and denying the

overwhelming evidence? I'm almost at a loss in understanding why they don't understand the science. The obvious reason - that the Liberals

are in the pockets of the polluters - is unappealing to me but it may be the only one that makes sense.

Sincerely,

Steve Ellis

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Steve Haas

**Date:** July 18, 2017 11:40:04 PM

---

Hello:

I am disheartened to hear of a new assault on my province at the hands of Teck Resources, which intends to build a new mine approximately 110 km north of Fort McMurray despite:

- the clear and present danger of burning more fossil fuels;
- the low EROI of tar sands products;
- the damage to the local environment, and effects upon local wildlife;
- the issues surrounding native land claims and usage rights;
- the difficulty and danger of transporting dilbit for processing;
- the continuing harm done to the Alberta economy in failing to diversify.

I urge you to stop this project before it starts. There are cleaner, safer, and more profitable ventures that will provide similar employment, but without the negative effects outlined above.

Steve Hansen Smythe  
Calgary, AB

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to get on the right side of History and reject this project.

Sincerely,

Steven M. Bush

Dear Joint Review Panel members,

I am shocked that yet another open pit tar sands mine the size of the one being proposed by Tech Rosouces in Northern Alberta is even being contemplated after all of the destruction that has already occurred in this northern part of our beautiful country through the development of the Tar Sands.

Not only have the wildlife and the forests of the region been severely affected already, but it has also altered the lifestyles of the inhabitants in the area tremendously, and especially the First Nations population, who depend on the caribou and the bison for their food. In addition it would severely affect the water supply of the region, since so much water is required to extract the resource.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Sue Stangel

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

It's definitely time to stop further oil and gas exploration and extraction. This mine will just add to all the current problems as outlined below and add to the huge tailings ponds which I understand will already cost most to clean up than the value of the oil extracted.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Dear Joint Review Panel members,

You all know that this mine is not really needed as i have done research and globally there are so many other areas that have not even been exploited which hold great riches. All we are asking here is to stop this right here as the affected area is just simply too beautiful to waste in this way. We are currently losing some 200 species per day and this is reason enough not to take this step.

The damages far outweigh the necessity of this, plain and simple. It is beyond me how corporations now make all the decisions instead of the people who inherently really own this land. As no one will even read my comment i will project this out to Universal justice to severely punish those who further hurt mother earth.

Sincerely,

Susanne Dietrich

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources and about the review panel process.

1. Due diligence.

Have you each already decided on an outcome? Is your decision motivated by one or more values? What are those values? Who do those values represent? Can your mind be changed by facts?

2. Consultation.

Is everybody concerned or affected by the proposal at the table? If not, who is accountable? Who do you speak for? Have you got us all covered? Who speaks for nature?

3. Is there a requirement for TFM to return the area to its original state? Is there a requirement for TFM to be careful about our environment? What have they pledged to us. Are there fines if they don't keep their promises? Will you shut them down if they break their commitments? Or, is governance going to disappear? To whom will TFM be accountable?

What could go wrong? Make a list! For each item on your list, think through (before you decide) using Randy Parks' "THEN WHAT HAPPENS?"

Sincerely,

T. J. Jones

Dear Joint Review Panel members,

I'm saddened that this government continues to make the same pointless mistakes that the Conservatives did. I understand Canada is currently a heavily resource based economy, but this time needs to come to an end as quickly as possible. The risks to our own prosperity and survival as a species are very real and even more urgent.

This mine you're trying to pass approval for is a bad idea, ruining important a completely free and effective carbon sequestering, oxygen producing, area. Not to mention the habitat you'll be destroying and the rights you'll be violating of the local First Nations.

Please reject this project on its own merits; I don't have a secret agenda to hurt our economy or naively think we're going to be done with resources immediately. But I'm serious that we need to make hard decisions that will come with some degree of discomfort in order to secure our future. It's the kind of forward thinking that we need, please make the right decision and reject the Teck Frontier Mine.

Sincerely,

Terence Nathan

Dear Joint Review Panel,

I'm writing to express my complete opposition to the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Canada and the world cannot afford another tar sands mine. I have visited the threatened land as well as the active mining area north of Fort MacMurray, and I am deeply ashamed that, in 2017, my country could plan an extension of such devastation.

Canada itself does not need this energy. Everyone knows that this dirty stuff will be shipped overseas. Only one entity will enjoy any benefit — the private owners of Teck Resources. Thus there are so many graveful harmful aspects to this project and only one upside, for a few. It's simply immoral.

If you care at all for the future of the planet, you have no choice but to reject this project. Thank you for your careful attention.

Sincerely,

Thomas Holzinger

Dear Joint Review Panel members,

At a time when we must desperately slow climate change, reduce our carbon footprint and save as much of the Boreal Forest as possible, I wish to tell you I have very serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources. The Boreal Forest is home to dwindling herds of caribou and bison along with untold thousands of threatened songbirds that make the forest their home. It cannot be further compromised by a damaging open pit tar sands mine. This land is also essential for the well-being of our indigenous peoples, the Athabasca Chipewyan and Mikisew Cree First Nations. Please do not allow the destruction of more Boreal Forest that would take centuries to recover from this.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

---

Dear Joint Review Panel members,

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Please don't give in to corporate greed and wholesale destruction so a few can get rich, whilst our children and theirs will have nothing except a desolate landscape and climate change.

Do the morally right and environmentally correct thing and deny this tar sands project.

Sincerely,

Tristan Cole

Dear Joint Review Panel members,

As a veteran biologist and naturalist, I cannot believe that at this point in our fight against climate change that any company would propose a project like the the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Not only would the project disrupt critical habitat for endangered caribou and bison herds but it undermines the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. The Frontier project is incompatible with Alberta's 100 MT cap on oil sands emissions, and would undermine Canada's ability to achieve the emissions reduction targets required to meet our Paris Climate Accord commitments.

The Teck Frontier Oil Sands Mine would threaten endangered species, undermine Indigenous rights and unleash unacceptable levels of greenhouse gas emissions. I urge you to reject this project.

Sincerely,

Verna J Higgins

Dear Joint Review Panel members,

What part of climate change and Canada's part in reducing our footprint right here in Canada did Alberta and Ottawa not understand? Worldwide, fossil fuels are slowly being replaced or wiped out entirely, will Canada move backward and become a dinosaur while every other nation becomes sustainable with alternative energy?

And let us not forget - these very same polluting corporations are refusing to clean up the abandoned wells as well as the tailings and Alberta is now looking at all of Canada and its taxpayers to chip in to help them pay billions for cleanup. We would not let a child smash and destroy their toys then turn around and buy them new ones while picking up their broken ones? These companies need to be held accountable as they are not good citizens

I'm writing to express serious concerns about the Frontier Oil Sands Mine Project, proposed by Teck Resources.

Dear Joint Review Panel members,

I'm writing to express direct opposition to the Frontier Oil Sands Mine Project, proposed by Teck Resources.

In a world where investors are backing away from fossil fuel companies, where "leave it in the ground" movements have sprung up on either side of the Atlantic, where new renewable energy projects are outstripping all fossil fuel projects combined, and in which the goal of keeping the average global temperature increase to below 2 degrees Celsius (let alone 1.5 degrees Celsius, and Catherine McKenna loudly proclaimed), approving this project, at this time, is ecological insanity.

And we only have this one global ecosystem.

The proposed mine would disrupt critical habitat for endangered caribou and bison herds and undermine the treaty rights of local First Nations who rely on them for food and cultural practices. In fact, the mine is proposed for an area that the Athabasca Chipewyan First Nation has declared off limits to industrial development. Both the Athabasca Chipewyan First Nation and the Mikisew Cree First Nation oppose the project, and I urge the panel to respect their opposition.

Furthermore, the project would produce an unacceptable level of greenhouse gas emissions. Dear Joint Review Panel members,

Just say NO to the proposed expansion of Teck Frontier Mine!!!

It endangers the World Heritage site of Wood Buffalo National Park; it infringes on the territories of several indigenous tribes, who have already said NO to it; it completely endangers the fragile habitat of migration routes for caribou and bison, as well as the habitat for other wildlife; and it is only necessary to provide additional oil to feed the Kinder-Morgan pipeline.

This pipeline, while technically already approved by the government is going to be the source of a revolution by the Canadian people that our government has never seen – it is an outrageous proposition for so many reasons, not least of them being MORE danger to fragile ecosystems, and infringement of indigenous peoples' territories.

If we do not participate in foreign countries' use of oil as a power source, then we help reduce the world's global warming pollution – not forgetting the cap on Alberta's tar sands emissions.

Furthermore, we need more investment in green technologies, not Big Oil, which is an industry that is going to shrink in the coming years with the impending boom in electric vehicles, and the increasing outcry against plastic products. We need to be more forethoughtful of what the future is bringing to Canada, and not on big corporations current bottom line.

Sincerely,

Wendy Blacoe
