**Ameren Illinois Quarterly Jobs Creation Report**

**Q2 2012**

**Period Starting**

**4/1/2012**

**Period Ending**

**6/30/2012**

The following report includes Job Creation metrics as defined by the Ameren Illinois Modernization Action Plan (MAP). These metrics include:

Section 1 - Total number of Full Time Equivalent (FTE) jobs created during the reporting period

Section 2 - Total number of employees as of the last day of the reporting period

Section 3 - Total number of FTE hours in each job classification/job title

Section 4 - Total number of incremental employees and contractors in support of the investments included in the MAP for the reporting period

Ameren Illinois may provide revisions to previously submitted reports through subsequent quarterly reports.

**Section 1**

Total number of FTE jobs created during the CURRENT reporting period

Category	FTE
Employee Jobs	18.09
Contractor Positions	83.43
Induced Jobs	0
<b>Total FTEs</b>	<b>101.52</b>

**Definition:**

Ameren Illinois is required to report FTE metrics to the ICC demonstrating that at least 450 full-time equivalent jobs were created in the State of Illinois in a peak program year. The FTE metric is a calculation used to convert full-time and part-time jobs into comparable metrics.

$$\text{FTE} = \frac{\text{Total number of MAP hours worked in a period}}{\text{Available hours in the period; 2080 hours per year with a proration of 520 hours for quarterly reporting}}$$

The total number of MAP hours worked in a period consists of employees working a MAP project, those employees in direct support and indirect support of a MAP project, as well as contractors working a MAP project and their indirect support of a MAP project. Additional productivity factors and manual adjustments have been made towards compensable hours; these adjustments vary based on category of FTE. Induced jobs will be used for annual reporting based on declarations validated through subsequent reports provided by the University of Illinois.

**Section 2**
