### Tanzania Health Research Coordinating and Regulatory Bodies

The Tanzanian health research architecture is supported by three main foundations, namely the Ministry of Health and Social Welfare (MoCS&T); and the Ministry of Education and Vocational Training.

The main bodies responsible for the coordination and regulation of health research in the country are: the Tanzania Commission for Scientific and Technological Research; the Tanzania National Health Research Forum; and the Tanzania Food and Drugs Authority.

## Research licensing and clearance process

### Map description

Tanzania's local IRECs review protocols from Tanzanian researchers **(1a)** before being submitted to NIMR for clearance **(2)**. IRECs may also review research proposal: researchers or collaborators **(1b)**. Proposals submitted by foreign researchers may be directly reviewed by NIMR **(1c)**. Scientific and ethical clearance is granted by N-subcommittee of MRCC which is NIMR's medical research coordinating committee. Once MRCC/NHRERC judges the research to be scientifically and ethically sound, it grants **(3)**. Copies are sent to the Chief Medical Officer of the Ministry of Health and Social Welfare **(4)** and to the Director General of COSTECH **(5)**. COSTECH is charged with research licenses to national and foreign investigators, for what a scientific and research clearance certificate is required **(6 -7)**. Clinical trials must be registered with the Drug Authority. For a clinical trial certificate to be issued, the research proposal must have obtained an ethical clearance certificate issued by any approved institute of research and a research permit issued by COSTECH **(8-10)**.

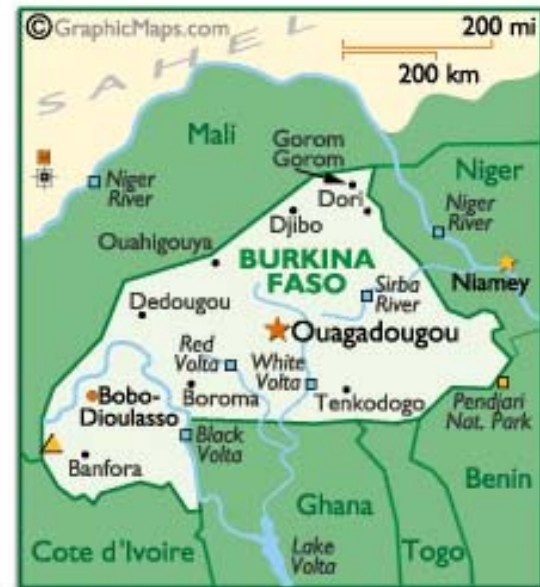

### Research licensing

The Tanzania Commission for Science and Technology (COSTECH) is the government organ in charge of research licensing, as stated by Government Circular MPEC/B/...

## Research Projects

Year	Country	Title Of Research	Principal Investigator	Institution (Promoter)
2002	Senegal	Contribution à la recherche des IST/SIDA en milieu insulaire (Iles du Saloum)	Dr Marie Sarr	MSP - Ministère de la Santé et de la Prévention
2002	Senegal	Epidémiologie des infections sexuellement transmises et facteurs de vulnérabilité chez les homosexuels masculins à Dakar, Sénégal	Dr Ibrahima Ndoeye	PNLS - Programme National de Lutte contre le Sida
2002	Senegal	Essai clinique randomisé et en double aveugle pour mesurer l'impact d'un traitement intermittent associant artésunate et sulfadoxine/pyriméthamine (SP) sur la morbidité palustre en Afrique sub-saharienne, impact d'une telle intervention sur l'immu	Dr Badara Cissé	Gates Malaria Programme, London, UK
2002	Senegal	Etude des interactions parasitaires: aspects épidémiogénétiques et immunologiques	Mr Jean Yves Le Hesran	IRD - Institut de Recherche pour le Développement
2002	Senegal	Etude ouverte multicentrique de l'efficacité et de la tolérance de artésunate 100mg/j et méfloquine 125mg/j donnés en une prise quotidienne unique pendant trois jours chez l'enfant pour le traitement du paludisme non compliqué à Plasmodium falciparum en A	Pr Oumar Faye	Pharmaceutical Research Development and Manufacture
