When the lights go out, TRUGLO® TRITIUM NIGHT-SIGHTS transition from crisp white dots to glowing green dots for superior visibility in low-light conditions or even complete darkness.

BUILT TO BE TOUGH. You're on the go and count on your handgun to be rugged and reliable. Your sights should be held to the same standard—which is why TRUGLO TRITIUM NIGHT-SIGHTS are machined from solid steel and treated with a **FORTRESS FINISH** to handle just about anything.

SWISS TRITIUM elements provide a bright and consistent glow, providing an excellent sight picture in low-light or even complete darkness. Tritium does not require batteries or any light exposure—it simply glows!

SMOOTH, SNAG-FREE DESIGN won't catch on clothing and fits standard holsters.

WHEN BRIGHTNESS COUNTS™

TRITIUM HANDGUN SIGHT TECHNOLOGY

TRUGLO TRITIUM NIGHT-SIGHTS contain a tiny vial of gaseous Swiss Tritium, which glows in the dark. Tritium does not need batteries and does not need to be charged with light—it simply glows. The illumination of Tritium naturally decays over time. A sight that is 12 years old should be approximately half as bright as a new sight. Please note that a dim sight is not defective. It is the result of the expected and normal decay of the Tritium.

CLEANING & CARE

TRUGLO TRITIUM NIGHT-SIGHTS are intended to be a direct replacement to steel factory sights. Standard gun oils and rust preventatives can be used on the sights. Do not use bore cleaner, acetone, or other harsh solvents on your sights as it may damage or degrade the finish.
