# INTRODUCTION

This year BOSS Audio Systems proudly celebrates our 23rd consecutive year supplying the mobile entertainment industry. Being in business that long has taught us many lessons...

Two of our most valuable lessons learned are the importance of being committed to our customers and the necessity of having a true passion for the mobile entertainment industry. We confront big challenges head-on and pride ourselves on their completion. We hold ourselves accountable to our customers by maintaining large inventories of quality product to ensure on-time delivery. We conduct stringent quality control checks on ALL of our products both before they're shipped from our manufacturing plants and once again after they reach our world headquarters in Oxnard, CA. As an international company selling in over 170 countries worldwide, we continually set very high standards to stay on top. One such standard is our commitment to providing the best products and the best warranties in the industry. These high standards allow our customers to rest assured that they're getting the best.

Our full line of mobile audio and video equipment includes everything needed to build a car, truck, or boat system. Our DVD players are incorporated into in-dash receivers and overhead mounted monitors as well as stand-alone units. We have in-dash monitors in sizes from 3.2" to 8".

BOSS Audio head units give you several ways to interface your audio system with an iPod® or MP3 player: highlighted by our "Patent Pending" model which features a slide out docking station.

Our seven series of power amplifiers and loudspeakers, ARMOR (New for 2011), CHAOS EPIC (New for 2011), CHAOS EXXTREME, OUTCAST, ONYX, PHANTOM, and RIOT (New for 2011) provide power levels and configurations to fit any system requirement and budget. Our BOSS Marine products offer the rugged performance you need to be compatible with the Marine environment; it is for that reason that BOSS Marine is the ideal choice for your boat, personal watercraft, or off road vehicle. The BOSS Link family of installation accessories ensures that you'll have what you need to reach the optimum performance from your equipment.

You, our customer, are the focal point of our business. All of our expertise, product development, quality control, and hard work are concentrated towards complete satisfaction.

# IN-DASH ELECTRONICS

As a leader in Mobile Entertainment, Boss Audio offers the broadest selection of mobile multimedia and CD/MP3 products in the industry. In-dash, single and double-DIN units with AM/FM/CD/DVD capabilities displayed and controlled on anywhere from a 3.2" to 8" TFT monitor. Motorized and non-motorized, touch screen and non-touch screen, with or without Bluetooth®, with or without full iPod® control, Boss Audio Multimedia and CD/MP3 models cover all the bases at the most competitive price points.

# AMPLIFIERS AND LOUDSPEAKERS

The heartbeat of your 12 volt system is your power supply and speaker system. With seven amplifier and six speaker lines, BOSS Audio offers something for every category and budget.

## Outcast AMPLIFIERS AND SUBWOOFERS

Outcast Power Amplifiers are designed for those who make their own rules. The only authority we recognize is you and your need for power. These Amps will easily drive your speakers to the limit and they are loaded with all the features you'll need to customize the response of your system.

# ARMOR AMPLIFIERS

Why sacrifice performance for the sake of convenience? With a slimmer chassis, ARMOR is the perfect amplifier when space is limited, and power is required. Indeed, this combination of feature-rich performance and put-it-anywhere convenience is hard to find in the automotive environment; so much so that the ARMOR may well be forging its own product category.

# PHANTOM AMPLIFIERS

The Phantom power Amplifiers are a BIG hit. This line-up of seventeen power sources is guaranteed to cover any, and all, applications. The Phantom two and four channel full range models will match perfectly with your speaker system. MOSFET Amplifiers deliver power to spare while bass boost and built-in high and low pass crossovers allow you to customize your cabin to your taste. If your need is ultimate power, phantom has three Class "D" powered Monoblock Amplifiers and one MOSFET Monoblock to satisfy all applications.

# PHANTOM SUBWOOFERS

Low frequency sound reproduction is the first thing you'll notice when you hear a super-sub. The subcussion you feel is the second, and in the case of the phantom maybe even the third. Combine that with extraordinary cosmetics and our new Phantom "cast" Subwoofers will guarantee you a position in the winner's circle.

# RIOT AMPLIFIERS

Your first view of the RIOT Series may deceive you. The elegant lines are a textbook exercise in minimalist design. From this point on, however, its power and reproductive authenticities will be anything but minimal. Perhaps the only thing more extensive than the features showcased is the enjoyment you'll derive from them. This is only one reason BOSS Audio has led the way in 12 Volt Entertainment for almost a quarter of a Century.

# MARINE RECEIVERS, AMPLIFIERS AND LOUDSPEAKERS

When you're out having fun on your boat you don't have time to worry about harsh conditions in the marine environment. Boss marine head units have coated circuit boards to seal out moisture. High-tech waterproof materials and special UV-protection coatings for plastic surfaces provide resistance to corrosion from salt water and chlorine. Switches and CD compartments are sealed to keep water out. We offer a variety of "combo kits" with complete systems that are popular with consumers and help with your retail presentation.

# MARINE CD RECEIVERS WITH iPod®

The iPod® has revolutionized the way we listen to music on dry land. Now together with BOSS Marine, the iPod® has conquered the high seas. Boss Audio introduces our amazing iPod® Docking System to the Marine division. You plug your iPod® into the MR1560DI, replace the weatherized face plate, and access your music via your head unit. Your iPod® remains safely protected from the marine environment and protected from theft or being misplaced. Top that off with touch button interface and you will be the envy of the harbor.

## FULL DETACHABLE FRONT PANEL

Insert iPod® into head unit and replace head plate. This provides FULL iPod® CONTROL from front panel.

## MOTORCYCLE/UTV SPEAKERS AND AMPS

### ATV20

OFF ROAD/MARINE SOUND SYSTEM FEATURING 6.5" MARINE SPEAKERS AND 1.5" WATER PROOF TWEETERS

### ATV20 FEATURES:

- Fully Marineized
- 450W Max Power
- Frequency response: 45-25kHz
- Sensitivity: 90dB
- Water Proof Poly Injection Cone
- Soft Dome Diaphragm high performance Tweeter
- 3.5mm input jack
- Compatible with audio output of iPod® and other MP3 players
- Speakers powered by internal Amp
- Plug and play for easy installation
- Includes (2) heavy duty zip ties and (2) heavy duty straps with Velcro® for any mounting position
- Ideal for ATV/UTV, Jet Ski or Snowmobile

### MC300

MOTORCYCLE/UTV AMPLIFIED SPEAKER SYSTEM

### MC400

MOTORCYCLE/UTV SPEAKER AND AMPLIFIER SYSTEM

### MC500

MOTORCYCLE/UTV SPEAKER AND AMPLIFIER SYSTEM WITH USB/SD PORTS AND FM TUNER

### MC500 FEATURES:

- Weatherproof
- Chrome 3" Speakers
- USB and SD ports • FM Tuner
- 3.5mm Audio input
- Remote control
- 600W Max Power

### MC400 FEATURES:

- Weatherproof
- Chrome 3" Speakers
- 3.5mm Audio input
- Handle Bar mount
- Rotary volume control
- 600W Max Power

### MC300 FEATURES:

- Weatherproof • 2.5" Speakers
- Built-in Power Amplifier
- 3.5mm Audio input
- Handle Bar mount • Volume control
- 400W Max Power

## PRODUCT DISPLAYS

**BOSS**<sup>®</sup>  
AUDIO SYSTEMS

*Because a display is the most effective way to demo product BOSS engineering has redesigned our in-store display to look better, sound better, and present more audio and video product than ever before. We build each display to order, and you select the mix to best suit your sales plan.*

This display is set up to house three CD receivers, one DVD player and an equalizer of your choice. The upper section of the display is built to house flip down monitors. As an option, one of the flip-down Monitors can be a DVD/monitor flip-down combo unit (such as BV12.1BGT) which will operate independently from the rest of the video system. As another option, a headrest monitor can be installed in that area. We've also installed a CAM20 or CAM10 connected to a monitor (people love to see themselves on the screen).

In the center section, which houses the Receivers, EQ, and DVD unit, you have room to select one pair of speakers in each of these sizes: 6x9, 6-1/2 inch, 5-1/4 inch, and now available a 4 inch. The bottom section positions the two 12-inch subwoofers at a studio-monitor angle designed to optimize its listening field at 4 to 5 feet.

In the section below the speakers, you may choose three or four Amplifiers to supply all the audio power needed.

For systems with multiple monitors we use a BV-AM5 to boost the video signal. For radio reception we'll install a MRANT-10 (AM/FM antenna) and an antenna splitter (for the multiple receivers).

Your BOSS in-store display will be delivered with all products installed. To have you display plug-in-ready, a power supply will also be installed at an additional cost.

Please contact your BOSS account manager for additional information concerning our display purchase program.

**Dimensions:**  
80" (H) x 36" (W base) x 31-3/8" (D)

We offer an in-store display to show off and demonstrate the unique features of MARINE products. You can order the display system in one of three configurations shown here.

# BOSS LINK INSTALLATION ACCESSORIES

Your car's factory electrical system does not provide the maximum power source needed for Amplifiers. Dimming headlights, distortion, and weak bass are signs your Amp isn't getting enough power. A Boss capacitor quickly releases stored electricity when your Amp needs it most (like during heavy bass notes). Our digital voltage meter let's you know the available power.

The background of the advertisement features a vibrant party scene. In the foreground, the silhouettes of a crowd of people are visible, many with their hands raised in the air. Above them, large, flowing, wavy shapes in shades of yellow, orange, and red create a sense of movement and energy, resembling light trails or smoke. The overall lighting is dark, with the party scene illuminated by blue and white lights.
