QUALITY PURIFIES.

The efficient and sustainable treatment of water plays a decisive role in many industries. As one of the world's leading manufacturers of products for liquid purification, we have been offering our customers customized solutions for almost 80 years and are consistently developing our premium technologies. The proven **Lewatit®** ion exchange resins selectively remove ions from water and other liquid media and optimally complement each other with **Lewabrane®** reverse osmosis membrane elements. **Bayoxide®** iron oxide adsorbers bind impurities quickly, specifically, and reliably, and round off our product portfolio of solutions for water treatment. The quality of LANXESS allows us to keep our future clean. lpt.lanxess.com

Dear Readers,

Days of hard work and networking of the highest calibre, a day to remember – it's not often that we manage to surprise ourselves, but success can do that to you.

While Water Today opens its 14th edition of the Water Expo 2020, concurrently the WATMAN International Conference, we have the pleasure to host top officials and participants from across India and the world – Government officials, Municipal Administration Authorities, IAS officers, Water Board officials, Researchers, International Researchers to name a few at both the annual events.

A comprehensive coverage of our exhibiting participants awaits you inside, but the fact of the matter is that both events have grown in stature and relevance since their inception.

The idea of the WATMAN Conference theme – Sustainable Water and Wastewater Management Solutions for a Better Future was thought over much brainstorming sessions. Naturally, with the amount of water produced and being lost to leakage and improper management, water is a topic that strikes a chord with the people, the various governing bodies in the country and across the world. Hence, shouldn't there be an event showcasing and recognising the upgraded technologies and processes?

Bringing together India and international business executives, political decisions makers and leading researchers, Water Expo 2020 is a showcase for the most advanced technologies and solutions globally. I am confident that you will benefit from the exciting range of topics as well as the technological and business solutions that are presented in this event.

A comprehensive coverage of our exhibiting participants awaits you inside, but the fact of the matter is that the event has grown in stature and relevance since its inception. As Water Today continues to build a successful legacy, we step into 2020 with new opportunities in our vision. We look forward to the new challenges awaiting us.

With Best Regards,

S Shanmugam
Managing Director & Publisher – Water Today Pvt. Ltd.

VASUDHA AQUA

Why waste when you can reuse?

Greywater System and Rainwater Harvesting System for Household, Retail and Commercial Spaces.

Greywater is wastewater from your daily use - washing, cleaning, and bathing (except for the water from the toilet) In a world where fresh, clean water has become a precious commodity, Grey water Recycling can help you reduce your water bills as well as your water footprint. Vasudha Aqua is here to pave your way.

Water treatment using gravity and in real-time

Fit-and-forget design that needs no intervention

No storage tank and pump needed

No need of harsh chemicals

Treated water for reuse for all purposes other than drinking and cooking

Interested to conserve water in your home with our Greywater System?

Metro Water signs MoU with IWA

According to an official, Metro Water has become the first utility in the country to sign an MoU with the International Water Association (IWA). “The MoU will help the Metro Water to function towards making the city water-wise by adopting circular economy principles in water management,” the official said.

He added that the objective of the agreement was to provide training and education for water professionals, apart from encouraging knowledge development and research to promote positive changes in water management. Metro Water managing director TN Hariharan and executive director of the International Water Association Kalanity Vairavamoorthy signed the MoU at the Metro Water headquarters recently.

IWA is an international body headquartered in the United Kingdom, which has members in 140 countries. The main objective of the association is to develop research and projects focused on solutions for water and wastewater management.

With the Metro Water joining the International Water Association, the city’s water manager could work in concurrence with the association and take part in the workshops organised by IWA.

Varanasi to get new lease of life with new sewage treatment plants

Varanasi - a historical city regarded as the spiritual capital of India. It draws Hindu pilgrims who bathe in the Ganga River’s water and perform funeral rites. The city’s growing population and a huge influx of visitors has led to sewage generation which is much higher than its existing treatment capacity. Varanasi generates about 300 million litres per day sewage.

Under the Namami Gange programme, the National Mission for Clean Ganga has taken up several projects for the treatment of sewer. Work is in full swing to tap major drains flowing into the river and divert them to sewage treatment plants (STPs). The existing treatment capacity of sewage in Varanasi has been boosted with the inauguration of 140 MLD sewage treatment plant (STP) at Dinapur, built at a cost of Rs. 235.53 crore. The project funded by JICA is the first and the largest sewage treatment project to be implemented under the Namami Gange mission. The treatment plant uses green power from sewage (biogas) to significantly reduce the carbon footprint apart from lowering the operational cost. The 50 MLD STPs being constructed in Ramana will bolster the existing sewage treatment capacity of the city and take it up to 412 MLD which is adequate to meet the sewage treatment demand till 2035. This will stop untreated sewage from flowing into the Ganga at Varanasi. Out of 23 drains, 20 have already been tapped. The remaining 3, including Assi are being tapped through Ramana STP project.

The growing population of Patna is leading to an increased outflow of domestic wastewater

The existing sewage treatment plants in Patna have long outlived their utility; the old sewer lines are choked, and the untreated water flows into Ganga.

In order to revamp the sewage management system in the city, NMCG has approved 11 projects worth over Rs 3,500 crore that will involve laying down 1,140 km of sewerage lines and create sewage treatment capacity of 350 MLD. This would cover the sewage treatment requirements of the city up to 2035 when its sewage generation is estimated to be 320 MLD.

Yogendra Kumar, Executive Engineer, Bihar Urban Infrastructure Development Corporation Ltd (BUIDCO) said, “In Patna, sewage is not allowed to flow directly into Ganga. We are working to connect every household with a sewerage system. The household wastewater will be diverted to the main hole and then to an STP. The wastewater will be treated through SBR (Sequencing Batch Reactors) technology and used for irrigation purposes after chlorination”. Work on most projects under Namami Gange scheme in Patna is in the final stages. Beur and Karmalichak STPs will together treat 80 million litres of wastewater per day through a sewerage network of 277 kilometres. The estimated cost of the Karmalichak STP is about Rs. 77 crore and the Beur STP will cost Rs. 68 crore. Work on two other sewage plants, 60 MLD STP in Saidpur Pahari and another 60 MLD STP at Pahari, is also near completion.

On ‘Mann Ki Baat’, Prime Minister Modi Urges People To Conserve Water

Addressing the nation in the first edition of ‘Mann Ki Baat’ in 2020, Prime Minister Narendra Modi urged people to make a determined effort to conserve water. During the radio programme, PM Modi appreciated the on-going efforts across the country in this area and highlighted that people from all sections of society have wholeheartedly contributed towards the efforts of water conservation.

While reminding people to focus on employing innovative methods to deal with water stress PM Modi called upon them to share the stories of their efforts through pictures and videos with the hashtag ‘#jalshakti4India’ in order to inspire others. He said, “Today, the entire nation is eager to listen to the tales of our Jal Shakti champions. I request you to share your efforts or of those around you towards water conservation, through stories, pictures and videos.” The Prime Minister noted that ponds and tanks have been constructed in various areas and gave examples of water conservation efforts from Rajasthan, Uttar Pradesh, Uttarakhand, and Tamil Nadu.

FUSION MACHINE RENTALS YOU CAN DEPEND ON

MAKE SURE YOUR NEXT RENTAL IS READY FOR THE JOB AHEAD

Having the right equipment for the job is just as important as having the right pipe, fittings and fabrications. That’s why McElroy India offers a wide range of Polyethylene and Polypropylene pipe fusion machines and productivity equipment for either sale or rent. McElroy India’s rental is a certified program which ensures the rental fleets perform to McElroy’s expectations as well as yours.

McElroy India 8/4, Whitley Layout, Whitefield, Bangalore 560066, India

MCELROY INDIA OFFERS FUSION EQUIPMENT RENTALS FOR:

- Small Diameter (16mm to 180mm)
- Medium Diameter (63mm to 340mm)
- Large Diameter (225mm to 1200mm)
- Mechanical/HVAC/Plumbing Applications
- Productivity Tools
- Quality Assurance Accessories

Bursts reduced as game-changing DNS system addresses 'lost' air valves

In response to what is a serious industry-wide issue whereby the location of hundreds of thousands of air valves is not known, Designed Network Solutions (DNS) have introduced a new Critical Air Valve Monitoring System. According to DNS, the 'disappearance' of air valves means that across UK networks, some water companies have no idea if these valves are operational or fit for purpose – allowing expensive burst events and high levels of leakage to continue, unabated. The new DNS Critical Air Valve Monitoring System can log (at least) two main parameters:

Pressure within the main - and then alarms if the pressure drops to below 0.2Bar because at this point the air valve is at risk of opening. It also monitors the air valve environment and whether it is operating within atmospheric conditions, or if the air valve is submerged and therefore poses a significant contamination risk. Designed Network Solutions' (DNS) Director, Craig Stanners said: "For far too long, engineers have been unable to properly maintain air valves or address serious issues such as contamination, water quality, transient and water hammer; simply because they don't have access to the right information. Now, with a proper Air Valve Monitoring System, they can carry out their work far more efficiently, reducing surge and transient events – first because they'll know what's actually in the network – and secondly, because they'll be notified by an alarm to advise when an air valve is not working as it should be".

City of Houston Chooses VTScaDa Software for 400 MGD Water Purification Plant Expansion

To help meet the growing drinking water demands for the fourth largest city in the US, the utility is expanding the NEWPP to 400 MGD, making this one of the largest active capital water projects in the US at a cost of \$1.4 billion. When completed, it will occupy acres and include twin 108" diameter water mains. The selection was made by the City of Houston consultant, in collaboration with the Houston Waterworks Team, a joint venture between CDM Smith and Jacobs Engineering (formerly CH2M). After an extended evaluation of features, licensing, and support, the team chose VTScaDa from a short-list of four leading SCADA products. VTScaDa is a software used around the world in industries such as water and wastewater, oil and gas, power generation, broadcasting, and marine solutions. The expanded system is scheduled for completion in 2024.

Grundfos inaugurates digital lab in Asia-Pacific region

Global pump manufacturer Grundfos has inaugurated its digital lab in Singapore – the first of its kind by the industry leader in Asia-Pacific – as a strategic initiative to drive greater adoption of intelligent water solutions in the region. The lab will showcase Grundfos' range of iSOLUTIONS products, which leverage intelligent technology to deliver optimal performance, greater energy efficiency and reliability. These products are used for a wide range of applications across sectors – from water distribution and wastewater treatment by water utilities, pressure boosting and heating, ventilation and air conditioning in commercial buildings, to industrial applications such as washing, cleaning and industrial cooling.

Key solutions on showcase included the Grundfos SMART Digital XL DDA and DDE dosing pumps, which enable accurate chemical dosage across numerous production processes including drinking water, wastewater treatment, and industrial processing, reducing chemical consumption by 5 to 19 percent. Kim Jensen, Regional Managing Director of Grundfos Asia Pacific region, said that establishing a dedicated lab in the region is a demonstration of the company's confidence in Asia-Pacific's digitalization potential, as well as recognition of Singapore as the hub for this digital transformation, thanks to its Smart Nation ambitions. Asia-Pacific is poised for digital growth – by 2021, approximately 60% of the region's GDP will come from products and services created through digital transformation.

Mitsubishi Electric Develops AI-based Aeration Control Technology for Biological Wastewater Treatment

Mitsubishi Electric Corporation has announced the development of aeration control technology to reduce the electric power consumption for supplying air (aeration) to biological reactors which is essential for biological wastewater treatment. By leveraging the company's Maisart® artificial-intelligence (AI) technologies, the system accurately predicts the quality (ammonia concentration) of the water flowing into the reactor over the following few hours. The control of aeration levels at individual section of the reactor will achieve approximately 10% reduction in the total amount of aeration, compared to the conventional methods. This will lead to a reduction in the power consumption of biological wastewater treatment plants, which consume about 7 billion kWh of electricity annually, equivalent to about 0.7% of total electric power consumption in Japan. The company is currently verifying the stability and effectiveness of this technology with the cooperation of domestic wastewater treatment plants, and is aiming to commercialise operation control systems using the new technology within fiscal year ending in March 2021.

System Engitech Pvt. Ltd.

ASME Certified | ISO 9001 - 2015 Certified

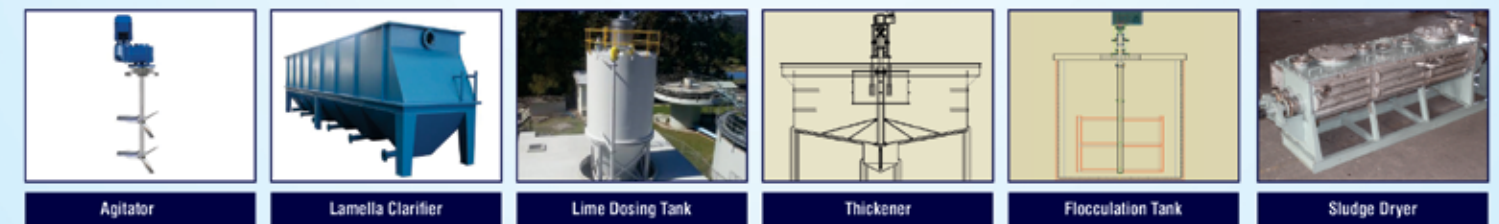

We are glad to introduce our organisation System Engitech Pvt Ltd that specializes in the business of Manufacturing and Supplying of wide range of Chemical & Pharmaceutical Process Equipment and ETP Equipment. We are also dealing in Turnkey projects. It has been more than two and half decades of successful journey from a humble beginning in 1993.

- We have been accredited by ASME for the manufacture and repair of pressure vessels under 'U' Stamp, 'NB' Stamp and 'R' Stamp certifications
- System Engitech is an ISO 9001:2015 company.

We Design, Manufacture and Supply of CHEMICAL & PHARMACEUTICAL PROCESS EQUIPMENT

We Design, Manufacture and Supply of EFFLUENT TREATMENT PLANT (ETP) EQUIPMENT

We Offer:

- Turnkey projects for Chemical & Petrochemical Industries
- Turnkey projects for Pharmaceutical Industries
- Manufacturing Equipment for ETP, STP & WTP

Registered office and Manufacturing Unit -1

Plot No. 4311/C, Road No. 4, Near Sagar Hotel,

Haya Water to Launch First PPP Project for Sewage Treatment Plant

In line with Oman’s increasing focus on enabling public private partnerships, Haya Water is preparing to launch its first Public Private Partnership (PPP) project in 2020 for a sewage treatment plant and associated infrastructure. Mid of 2019, Haya Water had signed a contract with KPMG for “preparing and implementing the PPP framework” for Haya Water’s wastewater projects. According to the release of the Oman PPP Law, the newly established Public Authority for Partnerships and Privatisation (PAPP) has approved the feasibility study for the project, thus clearing the way for the procurement process. This project is expected to be one of the first Sewage Treatment Plant (STP) projects in the Sultanate of Oman to be procured under the Oman PPP Law which was published in 2019. The proposed PPP Project package would include the design, financing, construction and operation of the Misfah Sewage Treatment Plant (STP) in the Wilayat of Basher with an average daily sewage treatment capacity of 40,000 m³/day and the design, finance and build of a 18km pipeline from the proposed Misfah STP to the existing STP at Al Ansab for the off-take of the Treated Effluent (TE). Located in the Al Misfah area, along the Ansab - Murayat road and in close vicinity to the Oman Cement Company plant, the Misfah STP is expected to divert all the tanker traffic currently served by the Al Ansab STP. Haya Water would be off-taker for the TE.0

Equitable access to water and sanitation still a challenge for Europe

According to the latest information from the WHO/UNICEF Joint Monitoring Programme for Water Supply, Sanitation and Hygiene (JMP), equitable access to water and sanitation is still a challenge for Europe. 31 million people in Europe do not have access to basic sanitation, 48 million people do not have piped water at home, and more than 300,000 people still practice open defecation, mainly in the countryside. The findings were generated through self-assessment by 11 countries: Armenia, Azerbaijan, Bulgaria, France, Hungary, North Macedonia, Moldova, Portugal, Serbia, Spain and Ukraine, and are available in the report the Human Rights to Water and Sanitation in Practice: Findings and lessons learned from the work on equitable access to water and sanitation under the Protocol on Water and Health in the pan-European region.

Intelligent Water Systems Challenge launches for third year

The Intelligent Water Systems Challenge is back for a third year to challenge participants to use innovation and data to help solve some of the most difficult issues facing water utilities. The goal is to demonstrate the value of intelligent water systems to utilities and foster adoption of smart water technologies, as well as give students, professionals, and technology experts the opportunity to showcase their talents and innovation with a focus on leveraging data using the tools to help utilities make better decisions.

The 2020 Intelligent Water Systems Challenge will run from January 15 to October 5, 2020. Scenarios will focus on collection systems, wastewater treatment systems, drinking water treatment systems, source water/watershed, and distribution networks. Teams with innovative solutions will be invited to present their results in person at WEFTEC 2020 in New Orleans for final judging. The winning team will receive a cash award of \$10,000 (\$\$13,483.70). The Challenge hosted by LIFT, a joint effort by The Water Research Foundation and the Water Environment Federation, is also supported by the American Water Works Association, BlueTech Research, Cleveland Water Alliance, IEEE Smart Cities TAC, Imagine H2O, International Society of Automation, and Smart Water Networks Forum.

TWIN LOBE / TRI LOBE AIR BLOWER

High Quality Product

High Quality Acoustic Enclosure/ Noise Canopy

High Quality Manufacturing Process

High Quality Internal Components

Acme Air Equipments Co. Pvt. Ltd., designs & manufactures high quality Rotary Lobe Air Blowers. Some of the Company features are :

- Rich & Quality Experience of 30 years in Pressure & Vacuum Applications
- Strong After Sales Services
- Customized Solutions
- Approved with Major PMC/EPC/LST Companies in India
- Experience of Working with Reputed PMC/EPC/LSTK Multinational Companies
- Supplied to Wastewater Treatment Plants, Textile, Cement, Power, Fertilizer, Pharmaceuticals, Steel, Oil & Gas, Chemical/Petrochemicals, Food & Dairy, etc.

TWIN LOBE / TRI LOBE ROTARY AIR BLOWERS FEATURES:

- Max. Capacity: 18,315 m³/hr.
- Max. Differential Pressure: 1.0 kg/cm²
- Rated for Continuous Duty
- Rugged Construction
- High Performance Guaranteed
- Long Life of Blower
- High Quality Internal Components

LANXESS digitises its global asset base

LANXESS is driving forward the digitisation of its production. The specialty chemicals company has implemented a self-service analytics system for time-series data in many areas of its global plant fleet. Almost two thirds of its roughly 120 plants were equipped with the self-service analysis platform TrendMiner from Software AG, including all major production sites in Germany, Belgium, the U.S. and India. Only smaller plants with less complex processes are not yet covered by the implementation.

With TrendMiner, production employees can autonomously analyse manufacturing processes and measurement data, detect patterns and trends in these data, and thus detect production irregularities. Typical applications include capacity increase, predictive maintenance, improvement of product quality or more efficient raw material and energy use.

Jörg Hellwig, Chief Digital Officer of LANXESS, emphasises the economic advantages for LANXESS. “The use of data analytics tools in production is a clear business case. Tests with TrendMiner have proven this. With the successful roll-out, LANXESS is now leveraging the optimisation potential throughout the Group.” Sanjay Brahmawar, CEO of Software AG, underlines the good cooperation. “We are thrilled with the outcome of the successful roll-out of TrendMiner to offer LANXESS end to end capabilities to drive their digital automation. Their openness and trust were the perfect basis for our intensive cooperation.”

China Water Environment Eyes \$500 Million IPO in Hong Kong

China Water Environment Group Ltd., backed by the nation’s state-owned investment holding company, is considering an initial public offering in Hong Kong that could raise more than \$500 million (\$674.8 million), according to people familiar with the matter. The water treatment company is working with advisers on a listing that could take place as soon as in the second half of this year, said the people, declining to be identified as the information is not public.

China Water Environment Group, founded in 2013, runs underground wastewater treatment plants across 19 cities in the country including Beijing and Shanghai, according to its website. State Development & Investment Corp. bought into China Water Environment Group last year and is now the biggest shareholder with a 43% stake. Citic Private Equity Funds Management Co. is the second-biggest shareholder. China Water Environment could be joining other Chinese firms in eyeing sizable Hong Kong listings this year, such as bottled water giant Nongfu Spring Co., which is looking to raise at least \$1 billion (\$1.3 billion), and lender China Bohai Bank Co. which is planning an IPO that could raise over \$2 billion (\$2.7 billion).

Quality at the core of Danfoss’ new digital displacement assembly facility

A new assembly line has been commissioned at Danfoss’s global Digital Displacement manufacturing and R&D facility near Edinburgh in Scotland – which will bring a new approach to precision assembly. The fully flexible facility has been custom designed from the ground up to assemble a new generation of Digital Displacement® pumps for off-highway and industrial customers. Production has already begun, with the first customer pumps rolling off the line in August 2019.

“This new area is unique in Danfoss,” says Dominika Babalska, Head of Operations, Digital Displacement, at the Edinburgh site. Rather than building a large, fixed production line, we have taken a modular approach allowing the shop floor to grow naturally together with customers’ needs. “Every pump that rolls off will have been quality assured at each step and is fully traceable from start to finish,” Dominika says. Central to this is a step-by-step production process built around five modular workstations. These have been developed to ensure the system has an unambiguous and clear process which can be followed easily – yet can be modified and changed as customer demand increases and volume ramps up.

Germans protest against Tesla Gigafactory

Around 250 Germans protested in the outskirts of Berlin where electric car startup Tesla is planning to build a gigafactory, saying its construction will endanger water supply and wildlife in the area. The U.S. carmaker announced plans last November to build its first European car factory in Gruenheide, in the eastern state of Brandenburg. Politicians, unions and industry groups have welcomed the move, saying it will bring jobs to the region, but environmental concerns drove hundreds of locals to the streets on Saturday. “We are here, we are loud, because Tesla is stealing our water,” protesters called. The protest came after a Brandenburg water association warned against “extensive and serious problems with the drinking water supply and wastewater disposal” for the proposed factory.

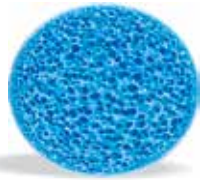

The carrier media of the future for most compact, efficient biological water and waste water treatment systems...

~ 5,500 m²/m³

Transchip 3.0

- Surface Area - 5500 m²/m³, 6 to 14 times higher than conventional media
- Removal Performance – 10 BOD
- Clogging – Anti clogging design
- Process Stability – Highly stable
- Savings in construction costs – 50%.
- Ease in upgradation – Very easy, can upgrade to 5 times the load
- Energy savings – About 30 to 50% due to parabolic design and low mixing requirement
- Savings in transportation costs – Yes, it occupies less space per m² and per m³
- Durability – 20 years guaranteed life...
- Reactor load rate – 3-6% of tank volume for STP

Conventional media

- Surface Area - 400 to 500 m² per m³
- Removal Performance – 30 BOD
- Clogging – Yes, frequently
- Process Stability – Not stable
- Savings in construction costs – Not much compared to ASP
- Ease in upgradation – Easy
- Energy savings – Not much
- Savings in transportation costs – No
- Durability – 3 to 5 years
- Reactor load rate – 30-40 % of tank volume for STP

Evoqua Technology Selected for Upgrade of PA Wastewater Treatment Plant

Evoqua Water Technologies, along with Nittany Engineering & Associates and sales partner Riordan Materials Corporation, recently completed the upgrade of the Bellefonte Borough Authority (BBA) Wastewater Treatment Plant located in Centre County, Pennsylvania. The treatment plant, which serves customers from both the Bellefonte Borough and surrounding townships, has a maximum capacity of 3.2 million gallons per day (MGD). The plant's effluent is discharged to Spring Creek, which is arguably one of the finest wild trout streams in Pennsylvania.

The innovative BioMag system infuses magnetite – fine, fully oxidized, iron ore particles – into biological floc, enhancing secondary clarification. The system increases settling rates, capacity, performance and stability, and meets enhanced nutrient removal (ENR) permits. For the BBA, the BioMag system was incorporated into the existing plant providing excellent clarification performance at high clarifier loadings and lower ammonia emissions. As a result, the plant includes a 41% organic capacity increase to treat higher future influent loadings, a significantly improved sludge treatment process with cleaner, better screened biosolids, and better odor control.

During the construction process, the complexity of the project increased with record rainfalls. The success of this project was a result of the thorough evaluation of treatment options to provide the lowest capital and operational costs for the plant, while providing the best effluent quality when compared to other treatment technologies available.

Energy recovery wins \$16.6 million of Water Awards

Energy Recovery, Inc. has announced total awards of \$16.6 million (\$22.3 million) to supply PX® Pressure Exchangers® (PX) and related equipment and services to multiple desalination facilities in the Middle East. The awards include Energy Recovery's first contract to support the conversion of a mega-project (>50,000 cubic metres per day) thermal desalination facility to more cost-efficient seawater reverse osmosis (SWRO) desalination technology.

“These awards cap a record-breaking year for Energy Recovery, and we are pleased to see a trend we have long anticipated – the conversion of thermal desalination capacity to large-scale SWRO facilities – move from our pipeline to our backlog,” said Robert Mao, Energy Recovery Chairman and Interim President and Chief Executive Officer. “Much of the Middle East's installed capacity is thermal desalination, which was largely built before technologies like the PX greatly improved the economics of SWRO. As older thermal desalination facilities reach the end of their useful life, owners and operators are evaluating the path forward. These facilities are needed to maintain current water supply, so they cannot be decommissioned without a replacement plan. Longer-term, the current thermal capacity of more than 20 million cubic metres per day creates an additional layer of growth potential for Energy Recovery.”

PUB seeks to boost rainfall forecasting capabilities with radar technology

National water agency PUB has developed a rainfall monitoring and prediction system capable of providing early heavy rainfall warnings, enhancing its response time to potential flash floods that may occur across Singapore. The system merges the rainfall monitoring capability of X-band radars – which are typically used for localised weather monitoring, as well as air traffic control and maritime vessel navigation – with a nowcast model that forecasts the movement, growth and decay of rainclouds, enabling it to produce forecasts 30 minutes ahead of a rainfall event. It augments the data that PUB currently receives from the Meteorological Service Singapore for rainfall alerts.

In 2016, PUB started working with the Hydroinformatics Institute Pte Ltd, as well as industrial electronics firm Furuno Singapore Pte Ltd, to develop a system that can provide quantitative rainfall forecast data. Three X-band radars – which are compact and suited for monitoring rainfall within short ranges of 30-50km – were installed in the northern, eastern and western parts of Singapore. Since their implementation in end-2018, the system has been able to produce 30-minute rainfall forecasts with an accuracy of 65%.

Trump Administration issues WOTUS replacement

At an event at the Colorado Springs Pioneers Museum, U.S. EPA Region 8 Regional Administrator Gregory Sopkin and Lt. Col. Robin Scott, Deputy Commander of the U.S. Army Corps of Engineers (USACE)-Albuquerque District, announced the changes. According to a statement by the EPA, “The rule provides a new, clear definition for ‘waters of the United States’ (WOTUS) — delivering on President Trump’s promise to finalize a revised definition for “waters of the United States” that protects the nation’s navigable waters from pollution and will result in economic growth across the country.”

Critics argue the changes will set the U.S. further back, repealing protections guaranteed by the Clean Water Act. “This is not just undoing the clean water rule promulgated by the Obama administration. This is going back to the lowest level of protection we’ve seen in the last 50 years,” Collin O’Mara, president and CEO of the National Wildlife Federation, told The Hill. “This is a staggering rollback.”

EPA Administrator Andrew Wheeler said the new Navigable Waters Protection Rule “strikes the proper balance between Washington and the states in managing land and water resources while protecting our nation’s navigable waters, and it does so within the authority Congress provided.”

SUEZ renews contract to operate one of the largest wastewater recycling plants in the US

West Basin Municipal Water District has renewed its contract with SUEZ to operate and maintain the Edward C. Little Facility in El Segundo, CA, and its three satellite plants. The five-year renewal, worth a total of c. €67 million, began January 1, 2020 and runs through the end of 2024.

The Edward C. Little facility is one of the largest water recycling operations of its kind in the United States, producing about 150 000 m3 of water every day and conserving water resources in one of the nation’s most drought-prone regions. From 1994 to date, SUEZ has thus helped West Basin produce more than 750 million m3 of recycled water.

The facility produces five different qualities of custom-made recycled water to meet the specific needs of West Basin’s municipal, commercial and industrial customers (gardens watering, irrigation, supplying industrial boilers and cooling towers and indirect drinking water). Edward C. Little also produces 45 000 m3 of barrier water every day for aquifers replenishment that protects South Bay’s coastal groundwater reservoirs from seawater intrusion from the Pacific Ocean.

Rotork actuators help deliver fresh water

Rotork’s electric and pneumatic actuators have been installed at two sites in Germany with 39 GT pneumatic piston actuators and 13 CK modular electric actuators to be used at two municipal water works which supply the town of Lohr am Main, in Bavaria and surrounding areas.

At both sites water is extracted from six springs and two deep wells while the treatment takes place at seven waterworks. The actuators, which have been installed on butterfly and gate valves ranging from 2-12 in, are being used to drive isolation valves on the water stream to allow filtering, storage and distribution to take place. Underground containers with capacity for 5,500 m³ store the treated water before it is distributed through a pipeline network which is around 180 km long.

Rotork’s GT range of single and double-acting pneumatic piston actuators offer torques from 2.4 to 15,300 Nm and air pressure of 2 to 10 bar and is suitable for use in hazardous areas. The watertight CK range actuators are suitable for all valves in non-hazardous locations and can operate under the stress of high temperatures and strong vibrations by using separately mounted controls.

Oil-catching sponge could be solution for 100 billion barrels of oil-contaminated wastewater generated every year

Drilling and fracking for oil under the seabed produces 100 billion barrels of oil-contaminated wastewater every year by releasing tiny oil droplets into the surrounding water. Most efforts to remove oil from water focus on removing large oil slicks from industrial spills but these aren’t suitable for removing tiny droplets. Instead, scientists are looking for new ways to clean the water.

Now, researchers at the University of Toronto (U of T) and Imperial College London have developed a sponge that removes over 90% of oil microdroplets from wastewater within ten minutes.

After capturing oil from wastewater, the sponge can be treated with a solvent, which releases the oil from the sponge. The oil can then be recycled; the sponge, ready to be used again.

The sponge improves upon a previous concept: lead author Dr. Pavani Cherukupally, now of Imperial’s Department of Chemical Engineering, had developed an early version of the sponge during her Ph.D. at the U of T. Although the previous sponge removed more than 95% of the oil in the samples tested, it took three hours to do so — far longer than would be useful in industry.

ROMEMBRA

ROMEMBRA™ is a reverse-osmosis membrane element, developed using Toray's advanced polymer technology. The extensive lineup is used in a variety of applications. Potable & industrial water production through desalination of seawater & brackish water, wastewater reclamation from treated effluent, recovery of valuables in various industries, and concentration & separation applications of food industries.

Toray Industries, Inc.
Code: A100

NOV Mono Sludge Cake Pumps

NOV Mono has designed and manufactured its largest W Range progressing cavity pumps ever built. The four pumps have been ordered for two major wastewater treatment plant upgrade projects, and at 11-metres long they will have double the size and double the capacity of pumps normally used for this type of sludge cake application. The pumps will be used in a duty/standby configuration on a Cake Reception and Buffer Silo unit. This unit will house four feeder channels to transfer sludge cake from the silos into the specially-designed, 4-metre long hoppers of the W Range pumps. Injection points have been included in the hoppers so that additional material can be blended in to create the required degree of dry solids sludge.

NOV Mono
Ref Code: A101

E.2 Pump-Less Volute (PLV) Kit

The E.2 Series are energy-efficient, Dry Motor circulators designed for a wide range of applications. They include a permanently lubricated mechanical seal that can be replaced quickly and easily. Featuring improved durability and enhanced protection against leakage and water damage to electrical components, the key design elements of the E.2 Series include:

- New water slinger to protect motor against water intrusion
- Larger, stainless steel shaft
- Sealed, permanently lubricated bearings
- Bellows-style mechanical seal with silicon carbide wear surfaces

Armstrong Fluid Technology
Ref Code: A102

BA100K

The compact, dry self-priming dewatering and sewage pump has a capacity of over 190 m³/hour (836 US GPM) and a maximum head of 22 mwc (73 ft.). This is not only due to the large free passage of 82 mm (3.23"); the unit is driven by a single-cylinder diesel engine with a calculated maximum fuel consumption of 1.75 litre/hour.

Featured characteristics of the DriveOn® Technology include:

- Service interval of 1500 operational hours
- 65% less maintenance to the diesel engine
- 25% savings in engine oil

BBA Pumps
Ref Code: A103

Mechanical VACUUM EVAPORATORS for Effluent Treatment with NO STEAM, NO BOILERS & NO HEAD ACHE!!!

- NO Steam
- NO Boiler
- NO Pollution
- Fully Automatic
- Skid Mounted

- NO Choking
- NO Fouling
- Auto Descaling
- Very Compact
- Least OPEX (25P/Lit)*

Treat Your Emulsified Water (Coolant Oil, Lubricants, Soap...) at your Premises..!

Very Suitable For High TDS Effluent Water..!!

Treat Your Existing RO REJECT WATER TOO

Recover up to 97% of Pure Water @ <150ppm TDS...!!

Very Suitable for Chemical, Pharma, Textile, Leather, Automobile...!!

Lowest Process Cost (25paise/Lit) approx.

Recover NOT ONLY WATER...but ALSO ENERGY SPENT...!!

Very Energy Efficient than STEAM MECHANICAL EVAPORATORS...!!

Lombardyne Enviro Techniques
- Heat Pump Operated Vacuum Evaporators

5/8, First Floor, Jaya Complex, T.V.S. Nagar Thadagam Road

FIP Instrumentation & Monitoring

Key Features

- Single and dual parameter monitors
- Efficient and cost-effective solution
- Useful combinations of output options
- Guided calibration procedure
- No need for instruction manual
- Mistake free setting
- Long Distance visible screen
- Leading-edge alert message
- More info displayed

Glynwed Pipe System (Asia)
Ref. Code: BO 100

WWR series

The WWR series by Alfaa UV, an ISO 9001:2000 certified company and a leader in its field. Alfaa UV has been disinfecting water for pharmaceutical, food, beverage, and other industrial applications to the highest standard. This same commitment to disinfection has prompted Alfaa to develop the WWR series to address the growing need for a reliable & environmentally responsible way to disinfect and reuse wastewater in these water starved times.

Alfaa UV
Ref. Code: BO 102

SCP-TP Process Controller

The SCP-TP Controller is designed to complement a dual solenoid control valve and can switch easily between settings for level control, upstream and downstream pressure management, flow control and position control. The SCP-TP also offers ON/OFF control and can be configured with a 4 – 20mA control motor such as the Singer 420 DC pilot mounted control motor. The SCP-TP is equipped with easy to use digital input controls and user selectable digital output alarms. Added features such as data logging, which logs all sensor feedback and set-point data as well as trending graphs, can be used for system analysis for water loss prevention and overall system pressure management.

Singer Valve
Ref. Code: BO 101

IN-Line And End-Suction Pumps

This product platform exceeds the requirements of the updated 2015 ErP regulations with a Minimum Efficiency Index (MEI) rating of 0.4 and provides significantly improved energy savings of up to 23 percent. Additionally, its expanded and optimised hydraulic coverage makes this new series suitable for a much broader range of industrial applications. e-series pumps can be supplied with an optional Xylem Hydrovar variable speed drive. The motor-mounted, space-saving Hydrovar is 'plug-and-play' and automatically adjusts operating speeds to optimise pumping system efficiency. As a result, it can provide up to an additional 70 percent reduction in energy costs depending on the application.

ASIA WATER 2020

31 Mar – 02 Apr 2020
Kuala Lumpur, Malaysia

ASIAWATER 2020 is making its 11th edition on 31st March - 2nd April 2020 at the Kuala Lumpur Convention Center (KLCC). This sought after exhibition provides a sea of trade opportunities for players from every sector in the water industry to elevate their business further and strengthen networking among each other. This 3-day exhibition will be accompanied by free-to-attend conferences, technology seminars, and presentations from industry experts discussing the prospects, latest technologies, current and future issues whirling around the water and wastewater industry.

OZWATER 2020

05-07 MAY 2020
Adelaide, Australia

Ozwater is the Australian Water Association's annual international water conference and trade exhibition attracting 3,500+ water professionals from Australia and abroad every year. The theme for Ozwater'20 is Thirst for Action and represents the need for continued action to meet the Sustainable Development Goals and the growing demands being placed on water from an environment, population and industrial perspective. It also reflects the Australian and global water sector's desire to be a leader in delivering a sustainable water future.

YOUR TRUSTED SUPPLY CHAIN PARTNER FOR ENTIRE RANGE OF WATER TREATMENT CHEMICAL NEEDS.

STP/ETP/ZLD

- ◆ PAC: Powder & Liquid
- ◆ Zetag range of Polyelectrolytes (Anionic & Cationic) for STP, ETP
- ◆ Triwat – Decoloring Aid, Deoiling Aid and coagulation Aid
- ◆ Biopolymers for biological system – SBR, MBR
- ◆ Defoamer –Water & Silicone based
- ◆ Sludge Dewatering Polyelectrolytes
- ◆ RO Antiscalants
- ◆ MEE Antiscalants

DESALINATION/WTP

- ◆ Magnafloc LT 27 – Food Grade Polyelectrolyte for Drinking Water and Sugar Industry
- ◆ Magnafloc LT 7991 – Coagulation Aid
- ◆ RO Antiscalants
- ◆ RO Cleaning Chemicals
- ◆ Dewatering Polyelectrolytes

MINING/M-SAND

- ◆ Magnafloc range for ore beneficiation, thickeners and settlers
- ◆ Rheomax range for thickeners & tailing management
- ◆ Powder Flocculants for Alumina Refinery
- ◆ Organic Pellet Binder for Pellet Plants
- ◆ Super Absorbent Polymer (SAP)
- ◆ Dust suppressor

INDUSTRIAL WATER TREATMENT

- ◆ Cooling Tower/Boiler Water Treatment Chemicals
- ◆ EDTA
- ◆ Biocides-Oxidizing & Non Oxidizing
- ◆ Scale Inhibitors & Corrosion Inhibitors
- ◆ Deposit Control Agents
- ◆ Fuel Oil Additives
- ◆ Oxygen Scavenger
- ◆ Methane Sulfonic Acid

10th ANNUAL SWAN CONFERENCE

SWAN, the Smart Water Networks Forum is the leading global hub for the smart water sector. A UK-based non-profit, SWAN brings together leading international water utilities, solution providers, academics, investors, regulators, and other industry experts to accelerate the awareness and adoption of “smart,” data-driven solutions in water and wastewater networks worldwide. SWAN Members receive full access to all SWAN research reports, regional workshops, webinars, select free passes to the SWAN 10th Annual Conference, global networking and speaking opportunities, marketing exposure, as well as the opportunity to take a lead role in advancing the water sector.

INDO WATER EXPO & FORUM 2020

INDO WATER 2020 is the biggest Expo & Forum for the fast growing water, wastewater and recycling technology in Indonesia. This show will bring together over 10,000 industry professionals and experts also over 550 exhibitors from 30 countries. It is proven platform for industry professionals to get updated on the latest trends and developments and to build valuable partnerships. It is also where water supply & sewerage companies, consultants, contractors, industrial wastewater treatment professionals and decision makers look for cost-effective solutions and technology.

WATMAN 2020

WATMAN 2020 International Conference

To be held on 13th & 14th February 2020 at Chennai Trade Centre

The theme of WATMAN 2020 International Conference

Sustainable Water and Wastewater

Management Solutions for a Better Future

will focus on a diverse range of issues confronting in the water & wastewater industry.

AGENDA

Sessions		DAY 01 – 13 th February 2020
Session I		Decentralized Water Recycling Potentials
Session II		Latest Trends & Technologies in Desalination
Session III		Expanding Horizons in Industrial Effluent Treatment
Session IV		Reduce, Reuse and Recycle for a Sustainable Development in Future
Sessions		DAY 02 – 14 th February 2020
Session I		Cost-Effective Solutions for Wastewater Recycle & Reuse Technologies
Session II		IoT & AI in Water Management Solutions & Planning for a Sustainable Future
Session III		Industrial Wastewater Management: Recent Trends & Analysis
Session IV		Water Harvesting and Water Audit

C.R.I. FLUID SYSTEMS
Pumping trust. Worldwide.

One Stop Pumping Solutions...

WATER CAREER 2020

Water Career is a One-Stop Database Source of talented Water & Wastewater Professionals

Water Career is the Human Resource Management division of Water Today Pvt. Ltd. Water Career is the largest and fastest growing talent pool of database of water and wastewater professionals. Water industry is a niche market with full of opportunities, we are the only company in India offering exclusive HR recruitment solutions to water and wastewater industries.

We believe in offering the best of potential and talented professionals to satisfy your requirements to attain your goals and objectives. We have a list of highly proficient profiles spanning across various categories, functions and expertise levels to cater the growing demand of Water and Wastewater Industries.

Water Today offers guidance to candidates for navigating the complex terrain of this industry. We can help you to find a job that is right for you. A world of diversified job opportunities awaits you.

Register with Water Career

We also promote specific vacancies in this field and attract response from a focused audience, through our various marketing initiatives such as print magazine, web portal, direct marketing & exhibitions. To register with Water Career, write to us at careers@watertoday.org, info@watertoday.org

BIONICS ENVIRO TECH™

An ISO 9001 : 2015 CERTIFIED COMPANY

SCIENTIFIC MANUFACTURER OF NANOZYME CULTURE FOR
EFFLUENT TREATMENT PLANT (ETP), SEWAGE TREATMENT PLANT (STP)
COD & BOD REDUCTION, SLUDGE LESS PROCESS BY NANOZYME BIO-CULTURE™

Bionics Enviro Tech: Bionics Enviro Tech is an industry world leader in the field of biological waste water treatment By Manufacturing Nanzoyme bio culture and implementing in all industries. With presence in all states, Bionics Enviro tech with Strong research & Development and a passion for innovation is offering purely Nanzoyme technologies with wide range of solutions mainly focused on COD, BOD Reduction, Zero Sludge process, Zero Pollutant load in directed at addressing waste water challenges in all industries effluent treatment Plants (ETP), Sewage treatment plants (STP), Common Treatment plants(CETP) and Anaerobic Digester (AD) of any scale, any sector across the world with track record.

Executive Director: Dr.M. Parameswari Sasikumar, Executive director Ph.D., Agriculture Science with specialization in industrial waste water treatment heads the research and development of the company. Dr. M. Parameswari has more than 20 years of experience in university and industrial research, monitoring of industrial effluent treatment plants. She has published Doctoral research in dye industries effluent in to difference research journals international 20 research articles and national 16 research articles and also published research papers in international and national conference and seminar 35 papers.

BIONICS TECHNOLOGIES
(BIONICS GROUP OF COMPANIES)
NANOZYME TREATS WASTEWATER

INDUSTRIES WE SERVE:

- Dye & Textile Industries
- Pharmaceutical Industries
- Paper And Pulp Industries
- Tanneries And Leather
- Milk & Dairy Industries
- Food Processing Industries
- Breweries, Wine, Alcohol Plant
- Chemical Industries
- Municipal Sewage Water

MERITS OF USING NANOZYME:

- Sludge less process (Zero Sludge)
- Avoid Chemical Uses
- Low Cost Treatment Technology,
- Reduction of aeration Time & Blowers
- Reduction of >50% of Electricity Usage
- Degradation of Organic Pollutants & Heavy Metals
- Digest the suspended and floating organic debris.

NANOZYME APPLICATION:

- Aeration Tank
- Anaerobic Digester –UASBR
- MBR (Membrane Bioreactor)
- Collection and Equalization Tank
- Common Effluent Treatment Plants (CETP)
- Effluent Treatment Plants (ETP)
- Sewage Treatment Plants (STP)

98 % COD & BOD REDUCTION

ZERO SLUDGE

COLOUR & ODOR REMOVAL

DISSOLVED OXYGEN (DO)(4 to 11)

MLSS & TSS REDUCTION

COD & BOD REDUCTION, SLUDGE LESS PROCESS

AERATION TANK EFFLUENT TREATMENT PLANTS (ETP/CETP):	
NANOZYME-BET-ETP-7001	< 500 COD
NANOZYME-BET-ETP-7002	500-2000COD
NANOZYME-BET-ETP-7003	>2000 COD

SEWAGE TREATMENT PLANTS (STP/CSTP)
NANOZYME-BET-STP-9011
NANOZYME-BET-STP-9012
NANOZYME-BET-STP-9013

ANAEROBIC CULTURE:
NANOZYME BET-ANA-9001
NANOZYME BET-ANA-9002
NANOZYME BET-ANA-9003

NANOZYME APPLICATION DOSAGE (20 Kg / 100 KLD)		
NANOZYME	Day of Dosage	Nanozyme Application Dosage (600 liters)
1 st Dosage	1 st Day	50 liters
2 nd Dosage	3 rd Day	50 liters
3 rd Dosage	5 th Day	50 liters
4 th Dosage	7 th Day	30 liters
5 th Dosage	Alternated days	30 liters

MADHYA PRADESH UTTAR PRADESH PUNJAB & ALL OTHER STATES

ABS Watertech India Pvt Ltd

ABS WATERTECH INDIA PVT LTD is pleased to introduce ourselves as one of the leading supplier in PAN INDIA & South –Asian countries for all kinds of Water and Waste Water treatment Plants & chemicals. We are in the market since last 15 years and our excellent business with many Govt., Semi-Govt., private sectors & Exporters to Srilanka, OMAN & QUITAR with repute and supplying the materials with their utmost satisfaction.

The Companies we represent are

- BWA – WATER ADDITIVES
(NSF certified products such as Antiscalants (Flocon / Belclene range), Corrosion Inhibitor (Belcor range), Desalination Chemicals (Belgard, Belsperse, Belite)
- WALCHEM (Auto Controller & Monitoring Systems)

Our Products & Services:

Water & Waste Water Management

Waste Water Treatment Plant – Design, Erection and Commissioning of Industrial RO, ETP, STP, WTP, Domestic RO Plants, AMC, Operation and Maintenance of Treatment Plants, etc.,

Utility Plant Water Treatment Management

HVAC – Process units, Cooling Tower Water, EVAPCO – Closed Loop CT, Chillers, Boilers, Desalination System, Swimming pool, ETP, STP, RO Treatment Chemicals.

Aguaclan Water Purifiers Private Limited

AGUACLAN - Asia's No 1 Stainless Steel Dual Technology Water Purifiers, which was founded by Mr.C Guruswamy who has been bred in the water purifying industry for over a decade and has his roots firmly fixed in the fields of filtering, Super cleaning and liquid purification for more than 25 years. Accompanied by a group of passionate and highly self driven individuals, we strive to bring safe and clean water to every person.

We proudly present our wide range of water purification system - Water Purifier/ Water Coolers/ Water Dispenser/ RO Systems/ATM water vending machine and STP solutions. Our mission is to provide clean and healthy drinking water so as to hinder the water borne disease. Being on the verge of water crisis, clean water has become a distant dream for many people and we wanted to change this for the better. We could not find any better way to put this other than our motto "WE CARE WHAT YOU DRINK". The change may be small but the change is imminent and we invite you to be a part of it.

Why choose us: Our products are tailor made and you always have the liberty to customize the products as per your needs. We believe in the process that everything starts with the customers and ends with the customers.

You can customize from our below list of purification methods:

Spun Filter(Pre-Filter), Activated Carbon Filter(Pre Filter), Antiscalant (Increases the Life of Ro membranes), Sediment Filter, RO, TDS Stabilizer(maintains mineral level in water), Post Carbon, Alkaline (maintains PH), UV(Ultra-Violet) treatment, Ozonisation.

We are an organization who strongly recommend Eco-Friendly products. So we only manufacture Stainless Steel Eco-friendly Products. With no doubt and objection you can purchase our products for your requirement.

Address: 4/104- G, Cheran Co-Operative Industrial Estate, Somayampalayam Post, Coimbatore -641108.

Air-O-Water

Roxy Exports Limited, which specializes in the manufacturing of electrical panels and communication equipment, introduced Atmospheric Water Generators in India under the name Air-O-Water.

The Air-O-Water is exactly like nature's way of producing water from the moisture in the air. The Air-O-Water uses a one-of-a-kind, reliable and adaptable technology which creates water from the humidity in the air, giving you fresh, bacteria-free, pure drinking water. Moreover, this water is completely untouched by contaminants in the ground or any other surfaces, unlike piped water.

This Air-O-Water technology has a global presence and is widely used for retrieving water from the environment and its purification. The patents owned by Air2Water contain 156 claims on various technologies including re-circulation, UV & Ozone sterilization and air filtration.

All India Association of Industries (AIAI)

All India Association of Industries (AIAI), established in 1956 in Mumbai has been serving trade and industry for over 50 years. The AIAI, with its core mission being 'building bridges of prosperity through industry', has over 1500 members and through its affiliates it represents over 50,000 industries. Nearly 70 percent of its members arise from the SME sector. AIAI represents its members effectively on various national and regional level panels and also with financial institutions on economic, trade and fiscal issues, among other things.

AIAI organizes seminars, workshops, trade exhibitions, B2B meetings, takes trade delegations overseas, and promotes domestic and internationally trade, investment and technology transfer through networking activities. It has signed agreements for cooperation with more than 200 international trade bodies and chambers of commerce covering most of the Industrial world. This promotes bilateral trade.

TW ULTRA FILTRATION MEMBRANES STREAM SERIES

Membranes Made in India for India

Ultrafiltration(UF) is a pressure-driven membrane based separation process to remove suspended solids, bacteria, virus, endotoxins and other pathogens to produce water with very high purity and low silt density.

Why Theway Membranes?

- Made in India
- Ready availability
- Excellent after sales service and support
- Customisable membranes to replace existing membranes (One-to-one replacement possible)
- Over 300 existing satisfied customers
- Unrivalled pricing

Merits of Theway UF Membranes

- Increased flux
- Increased Hydrophilicity
- Exceptional service life
- Higher resistance to fouling
- Higher resistance to scaling
- Lower pressure requirement
- Wide range of MWCOs
- Superior mechanical strength
- Finer and sharper pore size distribution
- Premium chemical resistance

Anandi Specialities & Services (P) Ltd.

We take immense pleasure in introducing to you Anandi Specialities & services and BePure Tech Pvt. Ltd. having 28 years of experience in water treatment sector.

Our is a leading manufacturer and wholesale distributor of water treatment and commercial water purification systems. Since its inception, ANANDI SPECIALITIES & SERVICES AND BE PURE has offered a wide range of pre-engineered as well as custom engineered solutions for all water purification needs.

By providing O&M services to various industrial/Commercial sectors, we have treated water from waste water and and recycle back to process thereby reducing extraction of precious ground water .

Our objective is to satisfy each customer with the most technologically advanced, cost effective, latest and innovative solutions.

Vision:

“Our vision is to reach out to all the water purification needs in the globe and develop the most innovative solutions with unmatched quality, for them

TURNKEY PROJECTS FOR ENVIRONMENT MANAGEMENT

Waste Water Treatment Plants

- Zero Liquid Discharge (ZLD) Plants
- Activated Sludge Biological Treatment
- Diffused Aeration system for Bio Plant
- Bio Sludge Disposal System
- Anaerobic Treatment Plants
- Advanced Oxidation Plant
- Wet Air Oxidation Plants
- MBR & MBBR ETP Plants
- UF & RO Plants

Air Pollution Control Plants

- Venturi Scrubbers & Packed Towers
- Exhaust System Vent Scrubbers
- Ammonia & Solvent Recovery Plants
- Odour Control System & Bio Scrubbers
- Organic Fumes Adsorption Plant
- Catalytic NOx Control System
- ACID Fume Scrubbing Systems

Chemical Waste Incinerators

- Solid & Liquid Waste Incinerators
- Organic Fumes & Waste Gas Incinerators
- Rotary Kiln Incinerators
- Drum Pyrolysis
- Bio Sludge Disposal System
- Flue Gas Treatment for Incinerator
- Air Pollution Control for Incinerator

Our strength

- Experienced team of Chemical Engineers
- Core competence in process and detailed engineering
- Long term and trustworthy services
- Motivated and results-driven achievers and team leaders.
- Strong organizational and team building skills combined with the ability to work under various situations to achieve deadlines.
- Significant experience of executing turnkey projects all over India and China.
- Highly efficient in a fast-paced environment while coordinating with numerous time-sensitive projects.
- Effective time management and prioritizing abilities.
- Total commitment to customer satisfaction.

Antichem Equipments

We are pleased to introduce ourselves as one of the leading manufacturers of Non-Metallic and Metallic Pumps in India since 2005 From Salem, TamilNadu. Our Product range includes solid injection moulded Polypropylene (PP) and polymer lined pumps with lining materials: PPH, PVDF, FEP, PFA and Investment Casting (CF8M) for Metallic pumps and also (Cast Steel, SS-304, SS-316L, Alloy 20, Hastalloy-B, Hastalloy -C, And CD4MCU and Etc... Which is Under Trade Brand ANTICHEM

The application range covers highly corrosive acids, alkalis, solvents and other corrosive fluids used in the Chemical Process, Petrochemical process, Refinery, Power Generation, Food Processing, Oil Extraction, Bulk Drug Manufacturing, Effluent Treatment, Steel and similar core Industrial sectors Marketing and distribution is handled Via Multiple Sales and Independent Distributors cross India. 25 Years of experiences providing solutions for liquid transport need ensure high quality of standards. We are certified to ISO 9001: 2015.

GOLDFINCH™ offers ...

Optimized Operating Cost for your Concentration/ Water Extraction Solution using...

FORWARD OSMOSIS TECHNOLOGY....

In association with **Aquaporin A/S, Denmark**

Lab Facilities

HFFO Membrane

Typical FO Skid

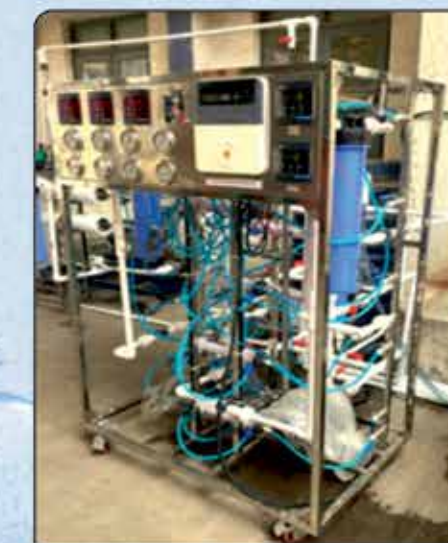

Applications

- Pre-concentration of wastewater before Evaporation
- Recovery and concentration of valuables
- Leachate treatment
- Water Extraction for process reuse while reducing volume of wastewater

Advantages

- Lower membrane fouling
- Lower energy consumption, lower operating Cost
- Better retention of solutes

We provide FO solutions integrated with Innovative Draw regeneration for high TDS wastewater

Industrial Pilot Plant

Goldfinch is a leading company with more than 3 decades of experience providing cost effective solutions in industrial wastewater treatment and ZLD projects. **GOLDFINCH™** provides a one-stop solution with its wide range state of art offerings.

Aqua Natural Plus

AQUA NATURAL PLUS is an ISO 9001:2008 Certified Company based at Chennai and leading manufacturing of Mineral Water water plant project related machineries. We install entire Mineral Water/Packaged Drinking water plant (fully Automatic as well as Semi Automatic) on turnkey basis. We provide end to end services right from plant design to getting ISI license. We also provide Marketing help to customers to sell their products in the market. We supply and install entire project as per Indian Standard Specifications IS 14543:2004

RO Plant:

- Water Treatment / Purification Plant
- Bottle Rinsing, Filling and Capping Machine Automatic 20 Liter Jar Washing
- Pouch Packaging Machine Cup / Glass Rinsing
- Filling And Sealing Machine
- Blow Moulding Machine (For Making Pet Bottles)
- "ISI" Mark Consultancy & Laboratory Supply

Aqua Revolutions

Aqua Revolutions was started as a industry on Oct 2008 by Mr.Raja Kathirvel, Chennai, Tamil Nadu, and India to manufacture and supply water and waste water treatment plants to various industries.

Aqua Revolutions Produced and Supplied High Quality water& waste treatment machineries to various industries by outsourcing most of the processes. Sewage treatment plants are the major customers. We also have developed Innovative technology of their business in the field of Waste water and sewage treatment plant water manufacturing.

AQUA REVOLUTIONS can provide Quality Water Treatment Solutions to companies in Chennai, In Tamil Nadu and many places in South India, and elsewhere, exclusively in the Reverse Osmosis based systems. We understand how increased competitiveness, environmental awareness and stringent health and safety regulations have critically impacted on the commercial aspects in Water production, use and Conservation to minimize losses and maximize profits. Besides a Standard Product Folio we can also offer Custom-built Plants & equipments. We combine professional expertise with attention to detail to specifically ensure that the system and solutions designed, supplied or maintained by us operate safely, efficiently and effectively.

Watermaster

Aquamec Ltd.

Watermaster | Aquamec Ltd.

Cleaner, safer and better functioning waters with fewer machines and less money - The Amphibious Multipurpose Watermaster Dredger does the work of many separate machines.

Multipurpose Watermaster can take out polluted sediments and excess siltation from waterways by suction dredging. It can remove trash and invasive aquatic vegetation by excavating and raking. It can reinforce shorelines by pile driving to prevent erosion and to enhance functionality and the safety of urban areas. Watermaster can also help in the building, maintaining and developing of water infrastructure, such as marinas, piers and flood-walls.

We at Watermaster/Aquamec create and supply smart ecological solutions for heavy-duty works in shallow waters. Our mission is to offer the most versatile, most mobile and most reliable amphibious dredging vessels on the market. The strong Watermaster Classic V is the pinnacle of our continuous development and innovation work. It offers an unprecedented combination of mobility and heavy duty dredging capacity.

Hundreds of amphibious multipurpose Watermaster dredgers are currently solving shallow water projects in over 70 countries worldwide.

Asahi Filter Fabrics Pvt. Ltd.

Asahi Filter Fabrics Pvt. Ltd., have been established in 1992, in order to meet the needs of Customers in Filtration Media. We supply Non-woven and Woven Filter media for all air/gas filtration applications in all the industries.

Our Company in 1994 have set up our own manufacturing facilities in Chennai to fabricate and sew our full range of filters. Our close liaison with raw material suppliers ensure that the very latest fibers and finishes are available.

A full range of custom manufactured filter bags available in both Non-woven & woven filter media for all types of bag housing including pulsejet, mechanical shake and reverse flow cleaning systems.

We assist in choosing the most suitable material and offer solutions to many kinds of technical filtering conditions in Filtration processes.

We cater to Foundries, Cement Industry, Lead Industry, Pharma Industry, Food Processing Industry, Oil Industry, ETP Plants etc., for their specific process application.

AsahiKASEI

Asahi Kasei India Pvt Ltd

- Asahi Kasei is a leading company of MF/UF membranes manufacture for water treatment such as drinking water, waste water treatment and desalination.
- Asahi Kasei successfully developed and employed TIPS (Thermal Induced Phase Separation) PVDF membranes for outstanding physical strength and chemical resistance which realized long-term operational reliability.
- As proven track record, there are over 800 drinking water plants employing Microza in the United States and there are all of major Singapore Newater plants (sewage effluent recycle plants) employing Microza.
- With more than 30 years experiences in water industries, Asahi Kasei Microza has been operating successfully over 2,000 sites all over the world.

Microza UF/MF Introduction

Type	UNA-620AB	UNA-620A	UHS-620A
Material	Pressurized	Pressurized	Submerged
Configuration	TIPS-PVDF	TIPS-PVDF	TIPS-PVDF
Flow Direction	Hollow fiber	Hollow fiber	Hollow fiber
Pore Size	Outside-In	Outside-In	Outside-In
Membrane Area	0.1 um	0.1 um	0.08 um
	65 m ²	50 m ²	50 m ²

Atharva Energy

Our products are used in virtually every industry, worldwide: aerospace engineering, automotive engineering, chemical and process industries, electrical resistance heating, oil and gas extraction industries, petrochemical processing, pollution control and waste processing, power generation, thermal processing and heat treatment.

Our Corporate Strategy :

We intend to be a major player in our key businesses, and to offer our customers State-of-the-Art products and services.

We focus on:

- Long term availability of our products
- Sustainable growth based on an adequate profit
- Solid financial basis
- Long term customer and suppliers relationship
- Readiness for continuous change
- Professional and human competence of our partners and employees

Our 10 Principles:

- We want to be among the leading solution providers for North India industries.
- Our core businesses are pneumatics, hydraulics, Water & Waste Water environmental technology.
- Our core competences are engineering, logistics and services.
- The motto, "Enriching your success", describes our target of supporting our customers with high competence, availability, service beyond average and flexibility on their way to market success.
- We want to be present all over India with uniform branding.

Automation Connect

AutomationConnect is India first End to End B2B Portal exclusively for Industrial Automation conceived and headed by an industrial automation pioneer & veteran. The portal is the Automation Exchange Platform for industrial automation ecosystem comprising of Automation endusers (manufacturing industries), Automation vendors, OEMs, System Integrators, Consultants, Automation Technology experts, Automation students and many more who are related to automation. AutomationConnect are Online Media partners to leading event organizers and Online Media publishers to PR firms, consultants, Automation association bodies.

Automation Connect is a dedicated Automation Exchange and caters to:

- End User Industry who use Automation extensively for their Production, Monitoring & Control and Data Acquisition requirements. Industries like Automotive, water, Steel, Paper, Cement, Sugar, Oil & Gas, Ports, Material Handling, Textiles, Rubber & Plastics, Pharmaceuticals, Food & Beverages, Chemicals, Metals, Power, Printing/Packaging etc can look for automation providers.
- Automation Vendors who manufacture and/or distribute Automation products to the industry can showcase their products & solutions.
- OEMs who use Automation products extensively to manufacture equipment for the industry can look for providers.
- Systems Integrators who offer Automation Solutions to the industry by integrating automation products can showcase their business
- Consultants who are involved in design and engineering as well as those who would be influencing decisions of appropriate automation technology to end users industry mentioned above can look for clients by their presence
- Automation Technology Experts who contribute to the development of newer technologies can showcase their expertise

FILTER ELEMENTS FOR ALL YOUR FILTRATION NEEDS!

FILTER CARTRIDGES

- Spun
- Wound
- High Flow
- Pleated Polypropylene
- Hydrophobic PTFE
- Hydrophilic PTFE, PES, Nylon 66

BAG FILTERS

- Absolute
- Needled Felt PE
- Needled Felt PO
- Extended Life
- Oil Adsorption
- Mesh
- Tie-on
- Custom Bags

FILTER HOUSINGS

- Cartridge Housings
- Bag Housings
- High Flow Housings
- PP Housings
- Strainers
- Custom Housings

APPLICATIONS

- Trap filtration
- Waste water rejection
- Pre-filtration
- Haze removal
- Bacteria removal
- Sparging
- Clarification
- Precipitate removal
- Impurity removal

Ben And Gaws Private Limited

BEN & GAWS PVT. LTD, has grown to become one of the most preferred privately-owned engineering company by manufacturing superior and innovative 'bolted panel' liquid storage tanks, grain storage silos and material handling equipment for different industries like grain milling, seed plants, breweries, ethanol plants, fire fighting, rainwater harvesting, industrial and domestic water treatment, oil & gas, power plants, other manufacturing and Processing plants etc. Our engineering and technical expertise combined with exceptional qualities and continuous focus on customer satisfaction put us at the forefront of these verticals. BEN & GAWS follows latest German standard for designing, product development and manufacturing, as an alternative it also offers latest American and Indian standards depending on end-user's requirement, location and nature of application. Partnering reputed European as well as top Indian designing institutions and organizations, we are relentlessly developing and improving our products to suit all possible applications at all possible weather conditions and locations.

Our mission: Our mission is to meet the needs of the end-users accurately and to provide unparalleled quality of material and reliable after-sales service to ensure headache free operation of the supplied equipment and solutions in long run.

Safety Statement: The safety at workplace and health of our employees are our outmost priorities.

Quality Statement: Delivering work of the highest quality is essential when constructing infrastructure assets that must stand the test of time. Our quality leaders are skilled in their craft and provide governance and assurance across all projects.

Advantages:

- 1. 50 Years life expectancy
- 2. Brute Strength
- 3. Cost Effective
- 4. No Corrosive even in harshest environment
- 5. Zero leakage

FILTRAN FABRICS

Solution for filtration

MANUFACTURER OF INDUSTRIAL FABRICS

GERMAN TECHNOLOGY
WITH INDIAN MAKE

About us: FILTRAN FABRIC is the first Indian company to make filter cloths with German technology. We offer a variety of filter cloths for various applications. Since our company is located at cotton city of south India Tirupur. We are able to produce International standard fabrics with low manufacturing cost. We have our R&D team for testing and choosing suitable filter fabrics for suitable application.

Quality Policy: We Are committed to providing customers with services of the highest possible level of quality. In order to achieve this. We are continually improving processes, products and services, meeting and exceeding customer satisfaction at all times.

Products

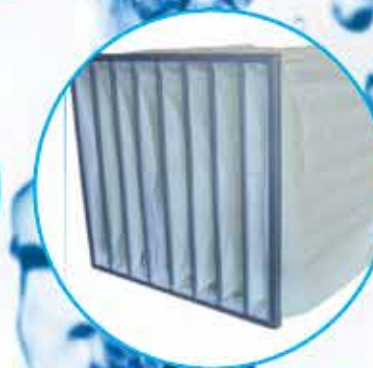

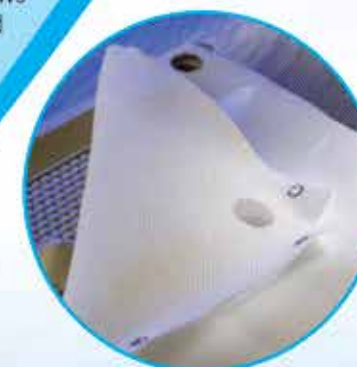

- Filter Press Cloth
- Centrifuge Bags
- Nutsche Filters
- Fluid Bed Dryer Bags
- Sparkler Filter Pads
- Disc Filter Bags
- Vacuum Belt Filters
- Rotary Vacuum Drum Filter Cloths
- Filter Papers

Industry we serve

- Pharma
- Chemical
- Oil and Fats
- Ceramics and Granites
- Mining
- Waste Water and effluent Treatments
- Dyes and pigments
- Food and beverages
- Other process Industries

Why Choose us ?

Filtran Fabrics staffs are having decades of experience in solid liquid separation which helps to create right filter fabrics for your application. We are register supplier for Top filter press and process equipment manufacturer in India and Asian countries through which we can guide to choose right machinery for your application . We have our Technical team to visit your premises for any day any time any where for your filtration Challenge

Bionics Enviro Tech

About Bionics Enviro Tech: Bionics Enviro Tech is an industry world leader in the field of biological waste water treatment By Manufacturing Nanozyme bioculture and implementing in all industries. With presence in all states, Bionics Enviro tech with Strong research & Development and a passion for innovation is offering purely Nanozyme technologies with wide range of solutions mainly focused on COD, BOD Reduction, Zero Sludge process, Zero Pollutant load in directed at addressing waste water challenges in all industries effluent treatment Plants (ETP), Sewage treatment plants (STP), Common Treatment plants(CETP) and Anaerobic Digester (AD) of any scale, any sector across the world with track record.

About Executive Director: Dr.M. Parameswari Sasikumar,Ph.D., Agriculture Science with specialization in industrial waste water treatment heads the research and development of the company. More than 20 years of experience in university and industrial research.

Effluent Treatment Plants (ETP/CETP): Aeration Tank - Nanozyme-BET-ETP-7003 >2000 Cod

Anaerobic Culture: Nanozyme BET-ANA-9003. **Sewage Treatment Plants (STP/CSTP):** Nanozyme-BET-STP-9013

Merits Of Using Nanozyme

Parameters	% Of Reduction	Parameters	% Of Reduction
Odor Removal	100%	Avoid Chemical	100%
Colour Removal	100%	Increases Dissolved Oxygen (DO)	Min 3-Max 6
Sludge Degradation	Zero Sludge	Save Electricity & Reduce Aeration Time.	50-70%
Chemical Oxygen Demond(COD)	95-100%	Degradation Of Organic Pollutants & Heavy Metals	70-90%
Biological Oxygen Demond (BOD)	95-100%

K-PACK Systems Private Limited – ISO 9001: 2008

Leading manufacturer of wastewater treatment solutions focused on performance and flexibility designed to yield clean water, recover energy and resource recovery

Products

Complete Sewage Treatment Solutions

We provide end to end Solutions for all your Sewage Related issues. Our new Advanced Membrane Bio-Reactor

Benefits of K-Pack MBR:

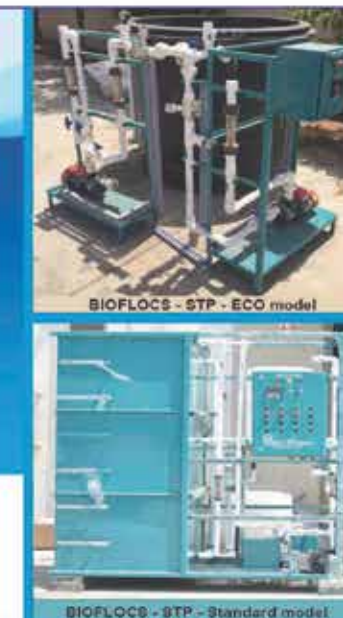

- Better COD/BOD reduction compared to ASP, MBBR, FAB and others.
- Lower sludge production
- Higher nutrient removal compared to conventional process.
- Lower footprint
- Better treated water quality

Specialists in waste water treatment with over 27 years experience in the field.

Blowchenn Machines

We are one of the leading manufacturers of semi automatic and automatic stretch blow moulding machines in India. A team of experts with vast experience in blowing, mould making and design came together and with their combined experience designed and manufactured a series of blow moulding machines with leading technology, aimed at providing the optimized solution for the industry. Our machines are designed to provide perfect blowing with minimum wastage and optimum power consumption. Our vast industry experience and domain knowledge has translated into a series of machines with robust construction, simple layout and design which will ensure long life and maintenance free, trouble free performance. Based on our continuous improvement program, our machines are constantly update to incorporate the latest technology. This will enable our customers to have a competitive advantage in the bottle blowing industry. Located at Chennai a port city and commercial hub of south India, we are strategically located to ship our products all over the world with minimum freight cost and lead time.

Bluemoon Fibre Tech India Pvt Ltd

Overview

- Incepted in 2003 and Rebranded in 2011 as “Bluemoon Fibre Tech India Private Limited” in Chennai
- A dedicated plant for GRP/FRP filament wound Pipes under subsidiary as “Bluemoon Composite Private Limited”
- ISO 9001:2015 certified
- Registered as Micro Industry under MSME.

Products

- Manufacturer of FRP, GRP, GRE and PP-FRP products
- Range of Products
 - GRE Pipes (Epoxy Based & Polyester Based)
 - Gratings
 - Storage and Dosing Tanks
 - Structural Profiles
 - Scrubber and Exhaust System
 - Cable Trays
- Range of Services
 - Corrosion Resistance Lining
 - Design and Installation of Structural Profiles
 - Installation & Commissioning of Pipes & Fittings
 - Design and Installation of Scrubber and Odour Control Systems

Applications

- Aeration Pipes
- Dosing Tanks (Acid and Alkali)
- Preparation Tanks
- Chemical Feed Pipes
- Settling Tanks (Primary and Secondary)
- RO Reject Tanks
- Effluent Drain Pipes
- Measuring Tanks (Acid and Alkali)
- Separation Tanks

Blufox Eco Ventures LLP

Blufox is the leading supplier of Water treatment & Waste Water Treatment equipments in India. We are the supplier of MBR Membranes & Ultrafiltration Membranes in India. Also we are the mfg. of the MBR Based Sewage Treatment Plants & Effluent Waste Water Treatment Plants. Blufox is also known for Zero Liquide Discharge(ZLD) Technology across India with its latest innovative technologies with less foot prints / zero chemicals/ No RO Plants / NO ETPs & No Evaporators.

Description:MS-FSF MBR modules are made with reinforced hollow fibre PVDF membranes. The Hollow Fibres have tensile strength with excellent chemical resistance.0.1 Micron pore size provides superior rejection rate of TSS , bacteria, viruses. Compared with conventional treatment, FSF MBR module produce extremely high quality permeate, Due to high mixed liquor suspended solids (MLSS).FSF-MBR can greatly reduce the over all treatment plant foot print and operation cost.

Features:

- High hydrophilic PVDF membrane
- Reinforced hollow fibre membranes
- Reduce treatment plant footprint
- Long service life
- Consistent and stable flux performance
- Energy Saving due to low operating pressure

Applications:

- Municipal Sewage Water Treatment & Reuse
- Ideal Green Building Projects which needing water Reuse
- Landfill Waste Water Treatment
- Industrial Waste Water Treatment
- Textile Waste Water Treatment

Address: 801, Valentina Business Hub, Near Shell Petrol Pump, L.P. Savani Road, Surat - 395009 (Gujarat)

Bluwat Chemicals Co. Ltd

Bluwat Chemicals is a professional supplier of water treatment chemicals in China. We provide our customers both traditional and innovative products to ensure optimum control in a wide variety of applications, which including treatment of drinking water, waste water, process water. We are trying our best to be the professional manufacturer and service supplier to reduce your treatment cost.

Bluwat chemicals produce BWD-1 Water Decoloring Agent, Polyacrylamide/PAM, PHPA, Polyaluminium Chloride, Polydadmac, Polyamine, BWG Bio-cleaning agent, etc. Our products are exporting to more than 80 countries, mainly used in water treatment industry, paper industry, mining industry, oil & gas drilling and sugar industry, etc.. Our BWD Water Decoloring Agent are specially used for color removal and COD reduction for textile & dyestuff wastewater, paper wastewater and other industries.

A SIMPLE & ROBUST FILTRATION SYSTEM

AUTO BACK WASH FILTER For water & waste water filtration

Applications

- Side stream filtration (Sea/River/Canal)
- Condenser / Nozzle protection
- Intake water filtration
- Membrane protection
- Nozzle protection
- Desalination Plants.

Features

- Online filtration, no personal intervention is required
- Units are capable to handle very high flow rates with less footprint
- Water wastage is < 1%
- Consistency in outlet water quality
- Energy efficient technology
- Uniform cleaning
- Plug & Play Technology
- No extra pump required for Backflushing
- Stand by filter not required

Canadian Crystalline Water India Ltd.,

CANADIAN CRYSTALLINE WATER INDIA LTD., with over four decades of commitment to quality in developing and delivering indigenous cost effective solutions in Water and waste water treatment, we have been pronounced globally as pioneers in the industry. Since 1969 CANADIAN CRYSTALLINE has been involved in delivering custom made solutions addressing the following needs:

- Process water for Industries.
- Drinking water supply at all needy places.
- Urban sanitation,
- General water treatment, Process Water Treatment and Desalination.
- Waste water treatment, Effluent Treatment, Effluent Recycling and Zero Discharge Plants.

CANADIAN CRYSTALLINE is also involved in driving the market towards innovative bottled water projects. Cold Press Juice Plants, Alkaline Water and Soft Drink Plants. We Manufacture, Supply, Install and Commission complete range Machineries required for Bottled Water Industry like Water Processing Equipments, PET Bottle Blowing Machines, Rinsing, Filling Capping Machine, required labeling and packaging machineries. Owning a 97% market share in Indian bottled water brands, CANADIAN CRYSTALLINE is an authority in bottled water projects and have spearheaded such projects globally, successfully installing over 7000 plants world wide.

With a 350 strong work force our corporate headquarters functions from a four storied, 15,000 sq. ft. "CANADIAN CRYSTALLINE Towers" in Chennai where all data transfer and communication systems are in place. The CANADIAN CRYSTALLINE factory is located 12 Km near Chennai city manufacturing a wide range of equipments. The company employs the best of engineering skills with excellent infrastructure to manufacture quality products.

Cauvery Electronics Consultants

We are specialized in design and manufacturing of CECON Ozonators in Chennai, India. The company is headed by Dr R. Narayanan, who holds a Ph.D from IIT Mumbai. He also has over 25 years of industrial experience.

Our product range includes:

1. CECON Air Cooled Ozonators (2 – 20 GPH)
2. CECON Water Cooled Ozonators (25 – 300 GPH)
3. CECON Ozonation Systems for STP, ETP, Swimming Pools, RO Plants Etc
4. CECON Ozonator Accessories – Venturi Injector, Ozone Leak Monitor Etc

Please refer to our website www.ceconozonators.com for more details.

We can supply, install and maintain our CECON Ozonation Systems all over India. Customers may contact us for their specific requirements

Address: 13, Link Road, Maduvankarai, Guindy, Chennai – 600032.

We Manufacture Side Channel Blower, Turbine Blower, Ring Blower, Regenerative Blower, Twin Lobe Roots Blower, Centrifugal Blower and Rotary High Vacuum Pump.

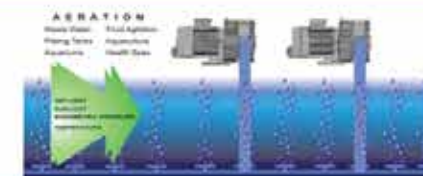

INDUSTRIAL BLOWERS

- Ring / Turbine Blower
- Side Channel / Regenerative Blowers
- Twin Lobe Rotary Blower
- Centrifugal Blower
- Turbo Vacuum Pump
- Rotary Vacuum Pump
- Diaphragm Vacuum Pump

APPLICATION:

- Aquaculture Aeration / Fish & shrimp Farming
- Jacuzzi & Swimming pool Aeration
- Waste water Treatment plant
- Compact ETP & STP

CEID Consultants and Engineering Pvt Ltd

CEID Consultants and Engineering Pvt Ltd, is a Turnkey EPC company which provides complete solution for Setting up Biogas Bottling and Bio fertiliser plant. Ceid Installed the India's First Biogas Bottling plant in the year 2008 and also has installed the India's biggest biogas Bottling and Bio fertiliser plant in Gujarat. The plant handles 240 tons waste per day and produces 6000 Kg of CBG and 40 tons of solid fertiliser per day. CEID Plants are PLC SCADA controlled fully automatic plants.

All the plants operate on CSTR (Continuous Stirrer Tank Reactor) Technology and can handle multi feed like Cowdung, press mud, vegetable waste, Flower waste, Spent wash, Napier Grass, Coffee waste, Agro waste etc.. As on date CEID has successfully installed 24 projects across various states in India and currently doing 27 projects in 9 states in India. CEID is doing projects for North Delhi Municipal Corporation, East Delhi Municipal Corporation, South Delhi Municipal Corporation and Greater Chennai Corporation.

CentPro Engineering Pvt.Ltd

With reference to our discussion, we are glad to introduce our organization CentPro Engineering Pvt. Ltd. that specializes in the business of manufacturing and providing turnkey solutions in leading chemical technology and process equipment. CentPro Engineering Pvt. Ltd is a Pune, India based company with well-equipped manufacturing facility in Bhosari MIDC, Pune, India.

Process Design & Engineering

Capabilities for an efficient and robust design for all kind of process equipment and pressure vessels. Extensive Experience and competency in design compliance with national and international codes like,

- ASME Section VIII Div-1&2
- TEMA Standard
- API-650/620
- PD 5500
- IS 2825

Material Handling Capability

- Stainless Steel: SS304, SS304L, SS316, SS316L, SS316Ti
- Exotic Material:: SS Duplex, Super Duplex, Hastelloy, Inconel, Incoloy, SS904L (UNS N08904)
- Carbon Steel : SA-516 Grade 60, SA-516 Grade 60, LTCS
- Explosion Bonded materials with various material combinations.

Our Product Domain:

- Evaporation Plants
- Turnkey Plants
- Water and waste water treatment plants
- Distillation Plants
- Caustic Recovery Plants
- Process Equipment (All type)
- Zero Liquid Discharge Plants

Industries we cater to:

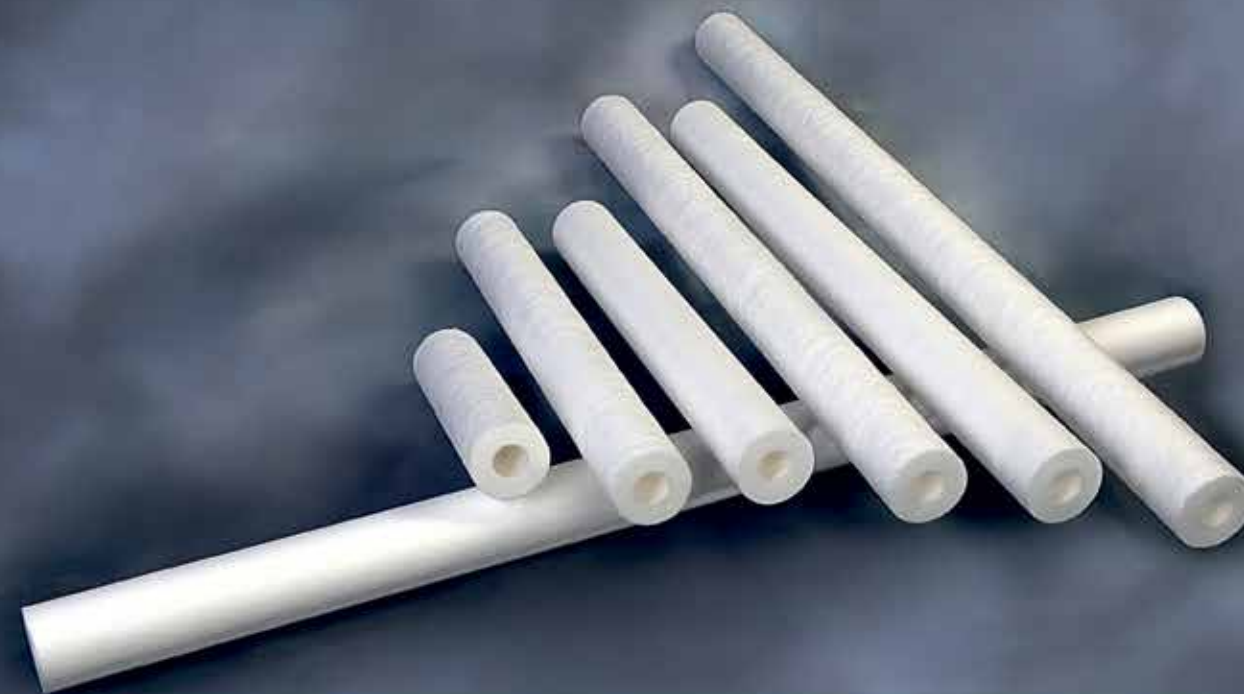

- Chemical
- Textile
- Pharma
- Dyes
- Petrochemical
- Automobile
- Food

Chennai Bottling Systems

We provide complete bottling solutions for packaged drinking water plants all over India, and we give customized solutions for packaged drinking water plants. We strive to provide best of class technology to reduce man power and complete automation. The company is committed to quality products and environmental safety.

Product Profile

Manufactures and exporters of automatic bottle filling machines ranges from 30 bpm to 100 bpm, automatic bubble top bottle filling machines ranges from 60 bph to 300 bph bottle blowing machines, semi-automatic auto drop pet bottle blowing machines 800 bph, shrink tunnels, conveyor systems, complete water processing plants with pre filtration RO plants, post filtrations ozonator, semi and automatic shrink wrapping machines. In addition to offering broad range of products, the company undertakes turnkey projects from concepts to commissioning.

CPC Water Treatment Solution Pvt Ltd

CPC emerged in 2010 with a clear motive of providing solutions & services in the field of instrumentation and to exhibit a clear differentiation in the market for providing amicable & affordable instrumentation and automation solution. The three verticals has built up an enviable reputation and carved a place of pride venturing into the field of water and waste water treatment and Renewable energy management. It is the determination to transform every challenge into opportunity to seize every opportunity to ensure growth. A highly applauded and awarded group of Companies.

- CPC PROCESS CONTROL INSTRUMENTATION
- CPC WATER TREATMENT SOLUTION PVT LTD
- CPC GREEN ENERGY ENGINEERING PVT LTD

The pride of CPC itself for having tremendous amount of talent and a dedicated work force and its philosophy is to create value for client's satisfaction through a culture of continuous service and solutions.

Our Strength: The manufacturing Of CPC envisions is to play an indispensable role in a global supply chain. Manufacturing strategy to produce a superior quality product suitable functionality, structural integrity, and conformance to established industry standards and practices which provides consistency of product quality, optimum availability, and superior customer service, while maintaining efficiency of operations and profitability necessary to continue product improvement and customer satisfaction

Our Network: Business operations and the network spread across the southern part of India having Chennai as head quarter and factory. Sales and service support offices at Hyderabad and Bangalore. Our network is further expanded globally with sales support partners located at Dubai for Middle-east and Egypt Region & at Malaysia for Asia pacific Region.

Address: No: 7A, IIInd Floor, School Road, Secretariat Colony, Ambattur OT, Chennai-600 053.

Deerfos Membranes Co. Ltd.

DEERFOS MEMBRANES Institute is leading the development of various creative membrane products. As a part of water treatment business, we have developed Hollow Fiber UF (Ultra-Filtration) , MBR(Membrane Bio Reactor) Membranes by using PVDF(Polyvinylidene fluoride) with pure domestic technology into high strength Even membrane and we'd like to advance into global market as well as domestic market. We have a Manufacturing process from the production of UF & MBR membrane to the manufacture of end product module. We are involved in handling large amount of water treatment such as Industrial dirty water, wastewater and rain water with small space and cost; besides, we manufacture and sell eco- friendly membrane that purifies, separates and enriches liquid material by taking advantage of perfect removal function of fine solid matter particles, bacteria and pathogenic microorganism.

Certificate & Patent:

ISO 9001, ISO 14001 certification acquired "Korea Standard Certification NET(New Excellent Technology)" certification acquired "NSF" Certification acquired

Patent Registration:

- "Highly porous membrane using that and preparing method thereof"
- "Manufacturing-method separation-film having elevation durability"
- "Hollow fiber membrane module and preparing method theses of"
- "High performance hollow fiber membrane using that and preparing method thereof"

Dunamis Machines

Machinery manufacturer founded in 1999 which has dedicated itself to manufacture and supply of machineries for the beverage industry.

Product Basket:

- PET Bottle Blow Molding Machines with Accessories
- PET Bottle Rinsing, Filling and Capping Machines

Major Benefits for buying Fully Automatic PET Bottle Blow Moulding Machines from Dunamis Machines

- We have introduced Air Recovery System so the total connecting load for the machine with accessories is only 28 H.P. for giving an output of 2000 BPH
- Book type mould closing technology reduces the blowing cost to only 6 paisa

Dunamis Machines focus is on achieving International quality standards, cost effectiveness and adherence to committed delivery schedule in order to achieve total customer satisfaction. The manufacturing facility comprises of Assembly Units, Fabrication Shops and Testing Units. The Assembly shop is equipped with the necessary Machines, Tools & Components, Materials, etc... for efficient production. We devote ourselves to technical research in order to build up a good reputation & brand equity. A Dedicated service team is always ready to attend to the needs of our esteemed customers. Our company ensures global quality and easily serviceability

Vision: Empowering Packaging Automation

Earth Fokus

There is no doubt that we care for the earth but preventing water scarcity cannot be accomplished simply through goodwill. We need to help prevent this crisis and do our part towards the preservation of freshwater bodies. We had our humble beginning in the year 2017, with the objective to work on conserving the environment. What started as a home project took off into a start-up.

Our name speaks to our belief of environmental conservation.

At Earth Fokus, we develop sustainable solutions for problems that affect our environment. The technology we design will not just support our surroundings but also equip the future for self-sustenance. By focusing on creating products that utilize non renewable energy, Earth Fokus commits to initiating a revolution.

Our solutions are based on 5 simple steps:

- 1) Identifying the problem
- 2) Analyzing the problem
- 3) Ideating several viable solutions
- 4) Research & Development, and
- 5) Choosing the best solution.

Our designs are not just motivated by functionality but also by modern designs which are efficient. And budget-friendly!

and Level Switches

Eco Fresh Carbon

ECO FRESH CARBON is one of the prime manufacturer and exporter of Coconut shell based steam activated carbon. Our company started in the year 2008, and have gone through so many researches in the field of activated carbon. We achieved upto the level of 100 CTC super carbon , and supplied to our various customers across the globe. We concentrate more on Quality side as well as timely delivery. So we follow the motto of "RIGHT QUALITY AT THE RIGHT TIME".

Our products are high porous and high activity activated carbon manufactured by steam process of activation from chosen coconut shell charcoal. Our well equipped QC department has various latest testing equipments as per ASTM norms & we strictly follow ASTM procedures for all testing.

Water Treatment: ACTIVATED CARBON is widely used in the treatment of municipal ,industrial waste water , sewage water and process liquids which contain a wide range of organic and inorganic pollutants . Activated carbon adsorbs these pollutants from the waste in aliquid phase, acting as the optimum purification solution.

We can able to Supply

Ultra Filtration Membrane

Inge - Our Patented Multibore® UF membrane combines seven individual capillaries in a highly robust fiber. The capillaries have an internal diameter of 0.9 mm or 1.5 mm. Our T-Rack® system require up to 70 percent less space than a conventional rack system.

Water Treatment Chemicals

With our Cutting-Edge expertise in water treatment chemicals BASF provides most advanced chemical solutions that delivers cost savings but also operate the process at peak efficiency.

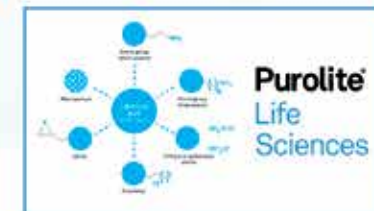

Industrial Pumps

Ebara is the leader in developing energy-saving pumps that help reduce industrial energy consumption. With its wide range of series, Ebara has got reliable pumps for all popular industries.

Resins

Purolite - the leading manufacturer of quality ion exchange, catalyst, adsorbent and specialty high-performance resins is the only company that focuses 100% of its resources on the development and production of resin technology.

With our wide range of dosing systems our proven design principles guarantee a high standard of quality and precision that delivers reliable, accurate performance under the toughest conditions.

Water Solutions

Elite Automations

Elite Automation was founded by Mr.Edwin B.E., in the year 2013 at Porur Chennai and Established with the Vision and Mission of dedication, sincerity and commitment to deliver superior quality products in the field of Automatic Water Bottle Filling Machine from 30BPM to 90 BPM.

Elite Automation is managed by a team of young, enthusiastic, self motivated professional with extensive knowledge in Instrumentation Engineering we work with process industries and grow along with them, to achieve operational excellence and improve efficiency with reduced cost and hence preferred by high end industries.

Elite automation focuses in the field of automatic bottle filling machine – Design, Manufacturing, Engineering, Supply and Commissioning towards complete customer satisfaction.

Salient Features:

1. Machine capacity various from 30BPM to 90BPM.
2. No Bottle - No filling - No capping - No wastage.
3. Variable speed through frequency drive.
4. Single phase machine available.

Evergreen Technologies

EVERGREEN TECHNOLOGIES established in 2002 is an ISO 9001 : 2015 Certified Company and a Leading Player in “Bottled Water” Industry. With 1000 of Customers in India and Transnational, We are a Vertically Integrated and Professionally Managed Organization led by a Dynamic Team of Qualified Technocrats. We have Designed, Manufactured, Erected and Commissioned “BOTTLED WATER” Purification / Treatment Plants of varying sizes starting from 1000 LPH to 50000 LPH on Turn Key Basis. We have well experienced Engineers, Technicians, Chemist, Microbiologists and Other Related Professionals. These Employees are Sufficiently Qualified and have been Groomed to be Specialists in their Respective Departments.

We offer BOTTLED WATER PROJECTS on Turn Key Basis, Including Water Purification System, Automatic PET Bottle & Jar Filling Machine, PET Stretch Blow Moulding, Pouch Packing Machine & Quality Control Laboratory as per WHO / BIS / ISO / SLS - (Srilankan Standards).

We offer Consultancy Services for establishing Turn Key Bottled Water Project.

e-Water Mission India Pvt. Ltd

Greetings from e-Water Mission India Pvt. Ltd !!!

WATER & WASTE WATER ENGINEERING, TREATMENT & MANAGEMENT SOLUTIONS...

e-Water Mission India Pvt. Ltd are committed to a cleaner and greener environment and developing progressive technology for meeting the requirements of new and existing plants and industries for environmental sustainability without compromising that of future generation, EARTH & HEART are one soul. We are continuously striving to provide technological solutions and performance excellence to our Customers with service excellence and sustainable solutions. We continuously working for "Supply of advanced products & Services with good quality with competitive cost, we have been enjoying good trust from our customers and achieved continued and stable growth".

e-Water Mission India Pvt. Ltd. is providing solutions for the treatment of wastewater, industrial water, process water.

Our Services (Simple Solution for Complex Problem):

1. Unique Technologies in: Sludge Handling: Sludge Dewatering Screw Press, Drum Filter, Low Temperature Dryers
2. Primary Treatment: Three phase separator's, Low space clarifiers
3. Zero Liquid Discharge plant: Vacuum Evaporator, MEE
4. Biological Treatment: MBBR, SBR, ASP
5. High Strength Waste: Anaerobic C.S.T.R.; Contact Digester
6. Speciality Chemicals: Decolorizer, Defoamer, Dewatering polyelectrolyte, Heavy metal removal, Coagulants & Flocculants, etc
7. Services: Customized Solution: Primary Treatment, Bio-culture development, plant audit / improvement, Legal / Technical Services

Ezzi Hardware

We are the Leading Manufacturer, Dealer, Stockists of PP and Metal valves, Fittings and other accessories for both Industrial and Domestic purpose. Since 2001, Ezzi Hardware has become one of the most leading and trusted company for providing valves, fitting and other accessories for both domestic and industrial purpose in and around Chennai, Tamil Nadu and India. We also manufactures own products as per the requirements of our customers. We have a wide distribution network that has enabled us to carve a niche and ensure our clients get timely delivery of products at competitive prices. We pledge to be a good and responsible corporate citizen in the communities where we live and work. We offer a quality range of Valves and Fitting For both Domestic & Industrial Purpose, We provide some of products like Ball valve, Diaphragm Valve, Foot valve, Flow Indicator, Strainers, Fittings & accessories. Apart from these we offer quality products from many leading brands like PATH, CRI valves, INTERFITINDIA, GOLDEN, ASTRAL CORZAN & our own products . Our products are used in following industries:

- Water Treatment Plants
- Thermal Power
- Manufacturing Industries
- Aeronautics
- Mining
- Petrochemical
- Marine Sector
- Refinery
- Energy
- Construction
- Railway
- Water Stations
- Boiler industry
- Oil & Gas

Green Concept Technology India Pvt Ltd

We are the International representative for Innovative Water & Waste Water Treatment and Recycling Technologies from Europe, Japan and Singapore.

Aqua-life, Poland - Innovative technology for Seawater Desalination and Industrial Water Recycling System.

Power: 3.1kw/m³ of permeate

TDS Handle up to: 35,000 to 1,00,000 ppm

Recovery: 35% min to 95% Max. With single stage RO.

We are the authorized dealer of India, Srilanka, Bangladesh & Maldives

Eco-Oxidizer™- Advanced Oxidation Process: Treating all types of Industrial Effluent without coagulation & oxidation chemicals.

Eco oxidizer can handle up to 300,000 ppm of COD

Applications: Textiles removal of Colour, Hardness, High COD/BOD, Cyanide, High TSS, Heavy metals, Ammonia, H₂S,

SWRS –ZERO waste concept, Europe-For solid waste management handling equipment. High speed of composting technology (16-24 Hrs only) and completely eliminates Odour, Leachate and Landfill cost.

Applications: For municipal waste, Food waste, Medical waste, STP and Landfill.

Address: SF No. 170, Door No: 6/163, Rangasamuthiram, Panikkam Patti (Post) Palladam. Thirupur.641664.

Green Tech Enviro Systems

Water and Waste water Solution Innovative solutions to improve efficiency, energy recovery, water recycling and sustainability

Green Tech is Technology Company established in the year 2007 for the execution of turnkey projects in Water, wastewater, sewage treatment plants & recycling of the same. Green Tech has international synergetic partners in the field of water & waste water engineering field and has been promoted by experienced technocrats having more than two decades of onsite and abroad experiences with team of engineers, Technical experts involved in most economical and advance technical solutions for water, wastewater, sewage treatment plants & recycling of the same as a turnkey services including process design and Optimization, engineering procurement and construction management, pilot testing, fabrication, installation, Commissioning, operation and maintenance as well as Design-Build-Own-Operate (DBOO) solutions.

Green Tech have a large clientele base in India and abroad around 500 clients covering more than 1000 numbers of various equipment and successfully completed more than 100 turnkey industrial water treatment, effluent treatment and sewage treatment plants with capacity ranging from 10 Cum/day to 50000 Cum/day for various industrial sectors like power plants, sugar, fertilizer, paper, pharmaceutical, distillery, confectionery, electroplating, chemical textile, leather etc.,

System Division

- Dyeing effluent recycling plant with evaporator
- Reverse osmosis plant
- Industrial waste water treatments
- Recycling of waste water treatment plants
- Pilot skids for conducting on field trials and etc
- Water treatment plants
- Municipal waste water treatment plants
- Membrane desalination treatment plants
- Membrane bio-reactor
- SBR /MBBR based sewage treatment plant

Address: No: 14-A, Galaxy Road, East Ayanambakkam, Chennai – 600 095, Tamilnadu – India.

Greenrich Grow India Private Limited

Greenrich Grow India Private Limited is into providing Eco-friendly Waste Management & Environmental Solutions by converting the Food Waste into Organic Manure / Planting Media without the support of electricity or mechanical energy in the brand name MyGreenBin. My Green Bin has come up with a unique solution to this by formulating the organic waste into extremely effective bio-fertilizers, a project initiated by leading Environmentalist, Architect and Project management consultant.

We are in this industry of waste management since 2010. We have designed, patterned and moulded fibre glass bins, which is more authentic since it has good quality of aeration to prevent bad odour. We are the pioneer in giving the best range of products in Aerobic Composting for Home, Community, Institutions and Bulk Waste Generators. We provide micro solutions where waste is composted at SOURCE from 1 ltr to 1 Ton per day, to the ever growing problem of waste piling up in the cities, thereby making the environment green by encouraging organic farming and re-establishing the Eco System by Nourishing the Soil with high Microbial content of Compost. We are specialized in providing Onsite solutions for Biodegradable Waste and have successful installation records of setting up Bulk Digesting Units for huge Bulk waste generators. More than the commercial viability, the social responsibility urge initiated us to promote on mass scale.

Aerobic Composters @ MyGreenBin Hassle free, easy to use, easy to maintain and easy to convert your organic waste to organic manure.

- Greenrich Home Composters - Ideal for Home composting for family of 3 - 15 members, available capacities 20 ltrs, 25 ltrs, 50 ltrs, 120 ltrs. One set of Composter will digest 1 ltr – 6 ltrs of waste per day
- Greenrich Community Composters - Ideal for Community composting for 15 - 80 Families, available capacities 250 ltrs, 400 ltrs, 600 ltrs, 800 ltrs & 1000 ltrs. One set of Composter will digest 15 ltrs – 80 ltrs of waste per day

H2O BAZAAR

H2Obazaar.com

H2obazaar.com a unique e-market place for water and wastewater industry is transforming as a leading B2B Website in its category. One can find enormous business resources and information like new products, emerging technologies and exciting business opportunities in the water and wastewater markets. H2obazaar.com strives as an endeavor to empower your business through the world-wide-web, connecting you to national and international Manufactures, Suppliers and Buyers.

We work as a neutral platform bringing together global buyers and sellers, while providing you an opportunity to expand your business. Our business solutions to the South-East Asian water industry include the likes of a wide array of online services, directory services, our monthly Magazine (Water Today -The Magazine) and our International exhibitions. Through offering these solutions for the last 13 years, we have helped all our customers to reach their target audience. Our portal is an ideal forum for buyers and sellers across the globe to interact and conduct business smoothly and effectively. H2obazaar.com offers an integrated business solution to take your business to a new height. Our customized services are aimed at complete promotion of your business at all levels. In addition to your presence on our platform, we also promote your URL, further enabling buyers and sellers to find you in the most efficient and quickest way possible.

Hanna Equipments (India) Pvt. Ltd.

HANNA Instruments is a world leader in the manufacture of analytical instrumentation. Headquartered in USA, HANNA has a global presence in 43 countries worldwide, offering more than 3,000 products to a wide range of industries. Our products include pH meters, Titrator, Photometers, COD Meters and many more. These products are useful in all the major industries like Agriculture, Aquaculture, Food & Dairy, Water Treatment etc.

Perpetual Innovation.

HANNA's research and development teams continuously challenge themselves to improve existing technologies and invent new testing techniques. These efforts have led to HANNA revolutionizing the world of testing.

- World's first tablet size multiparameter for pH/EC/DO analysis
- World's first pH electrode HALO with Bluetooth Technology
- World's first single parameter line of auto titrators.

Hanna Equipments (India) Pvt. Ltd. is the local face of Hanna Instruments in the INDIA. It operates from its Navi Mumbai headquarters to foster better relationships with its Indian customers and offer expert local support. HANNA Equipment's' mission is to supply its customers with practical, affordable solutions for their testing needs.

Hatco Systems

HATCO SYSTEMS is the proprietor concern run by Technocrat Entrepreneur with two decades of experience in water and water line products established on 2006 handling various projects across India. 100% eco friendly products knowing environmental needs and mass controlling the pollution in water for various industries. HATCO SYSTEMS offers total water solution right from Design, to Erection & Commissioning of Water treatment plants and associates with Consultants, Architects, Builders, All type of Industrials, Hospitals, Hotels, Schools, Colleges, Shopping complex, and OEMs. HATCO SYSTEMS offer complete range of water treatment products, like Sand Filters, Activated Carbon Filters, Softeners, Iron Removal Filters, DM Plants, Ultra Filtration Plants, Reverse Osmosis Plants, UVs, Ozonators, Packaged Drinking Water Plants, Waste Water Treatment Plants, Oil Removal Plants, Effluent Treatment Plants, Evaporators, Sewage Treatment Plants, Swimming Pools and Domestic Water plants. Also offers Pumping Systems, Booster Systems and Hydro-pneumatic Systems.

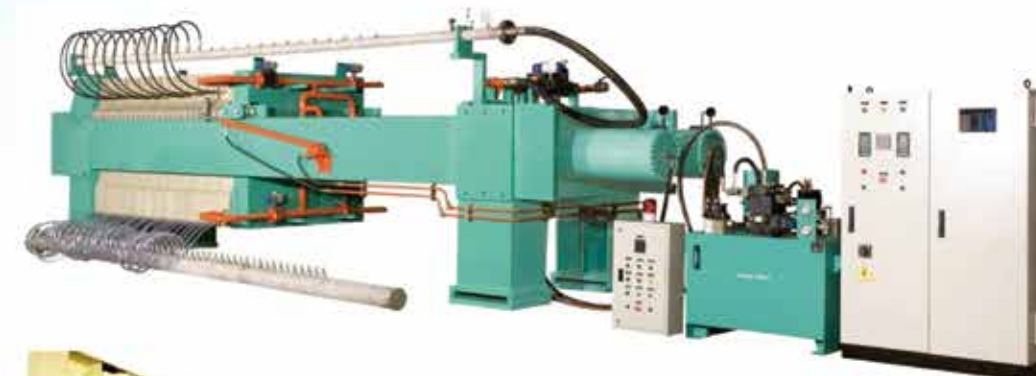

HATCO SYSTEMS newly launches NANO products from Germany such as resin, absorber, media and chemicals. Highlighted products which reduce brine, Back wash, No regent chemicals environmentally friendly products WIDE APPLICATION. HATCO SYSTEMS also tied up with world famous FLAGSHIP companies for microbial products and Aerators, Aspiration Aerators, Micro bubble generators to meet waste water segment to treat in high standard level and minimize the chemical consumption and power. HATCO SYSTEMS has sales network team to find out the exact requirement of client and give proper solution through our engineering team. HATCO has its own team of servicing is always available to attend to all your service calls solve all the problems in the plants. We also undertake AMC and O&M. HATCO SYSTEMS has manufacturing facilities in Chennai with engineering back round to manufacture high quality standard of products. We offer wide range of water management systems and complete package of Zero % discharge systems in the main land of the Industries. We are also offering technical consultancy to OEMs that are at par with the industrial standards.

Indian Environmental Association (IEA)

The Indian Environmental Association (IEA) was formed in the year 1996 for the benefits of environmental professionals. Today, the IEA has about members spread all over India and the members include Engineers, Scientists, Planners, State Pollution Control Boards, Operators, Non-Government organizations etc.

The IEA has chapters in India. We also have an NRI chapter in the USA, which communicates with us via e-mail. The IEA is a recognized Member Association of the Water Environment Federation (WEF), USA and enjoys all the benefits and assistance from them. The IEA is governed by the Board of Directors, which changes every two years.

Typical programs of the Association include annual conference, topical mid-year conferences, seminars on current issues as well as training programs on air pollution, CETPs, hazardous wastes, membrane technologies, CRZ issues, etc. The IEA has assumed the role of "opinion builder and watchdog" on issues related to environment and development. It is achieved by arranging various Round Table discussions. Five Round Tables were held so far on the following themes. At the end of each Round Table, recommendations of the Round Table were sent to the concerned authorities including Ministry of Environment and Forest, the Government of India, New Delhi, Industry Associations, Member Associations of Industrial Estates, etc. for their consideration and action.

Indo American Water Systems

FILTERS INDIA: Filters India is a sister concern of Indo American Water Systems established in the year 2005. We own and operate a manufacturing facility of water treatment systems, Domestic RO membranes, and PP wound filter cartridges under brand names of 'PROFILT' & 'BAYWOUND' at Vizianagaram. Our Credentials extend beyond experience, expertise and components to ensure highest quality of our products. We have a group of well trained technicians whose innovative skills are exemplary and ensure quality of our products.

Products We Offer

- RO Membranes
- Ion- Exchange Resins
- FRP Vessels
- Bag Filters
- Anti Scalant Chemicals
- Cooling Tower / Boiler / ETP Chemicals.
- Activated Carbons
- Membrane Housings
- Filter Cartridges
- Upvc Multi Cartridge Housings
- Disinfectants

Innovation Filter Systems Private Limited

With close to 20 years of experience in the design and manufacture of high performance filtration and separation systems, we supply critical equipment to some of the leading names in the most demanding industries all over the world.

Our filtration and separation technology is widely used at leading worldwide companies and in major development projects, all requiring a guarantee of equipment performance. We serve worldwide markets with innovative value adding solutions such as Industrial Filtration, Impurity removal, Customised filtration solutions and Oil skimming solutions.

We have a track record of producing high quality products backed by a commitment to total customer service, and a wealth of in-house manufacturing and value-adding designing solutions.

Our technical application teams also have considerable expertise in applied filtration technology, thus ensuring most of our products are market leading innovations. We have joined hands with Friess GmbH and able to make Tube Type Oil Skimmers in India with design same as Friess GmbH. Also we have joint collaboration with Transor Filter GmbH for production of "Make in India" filtration systems with German standards.

Ishan Paryavaran Pvt Ltd

The company ISHAN PARYAVARAN PVT, Ltd, thanks to its long-lasting conceptual work, makes up one of the strongest Waste water treatment companies that is concerned with the Design, development, production and the delivery of water treatment equipment, focused especially on the branch of waste water treatment and water treatment. Basically deals in Etp's, STP's, Dm plants The company ISHAN PARYAVARAN, Ltd gains a dominant position in Indian perhaps in the northern regions market due to its big proficiency and its products are evaluated even abroad, to where it exports successfully. The company Ishan paryavaran, Ltd works with a very strong developmental department, cooperates with colleges, remarkable specialists of the branch of waste water and water treatment. That is why the most of the products are designed to meet newer demands in fast moving technology

HISTORY: The history of the company goes back to the beginning of the 1988's as Ishan Engineers, when its current owners began to develop and deliver equipment for waste water treatment. They used fully their experience of around 27 years, by establishing a new company with the target of becoming a strong player in the market. The main strengths of ISHAN PARYAVARN, Ltd are: high-quality technical products and a comprehensive range of services in the branch of waste water and water treatment. The company adapts quickly to the requirements of the pollution control board legalization. As a result of this we Satisfactory stands as largest amount of network both in India and abroad. We have touched around 350+ satisfied customers in a short span. We at Ishan not only provide waste water treatment products but our sister concern ISHAN CONSULTANTS also helps valued customers for undertaking annual contracts to operate and maintain various plants, thus extending its activities with production, delivery and assembly of water treatment systems for various industry. It follows with the experience of nearly ten years of tradition and collaboration of coworkers in this branch. Production activity is aimed at supply of equipments at the highest level with efficiency.

Jet Vacuum Systems Private Limited

Valued among our customers across the world for manufacturing and exporting a broad array of optimum quality Ejector Systems & Condensers, Jet Vacuum Systems Pvt. Ltd. came into existence in the year 2007 at Vadodara, Gujarat. We offer a wide range of Steam Jet Ejector, Multi Effect Evaporators, Thermo Compressor, Water Jet Ejector etc. Appreciated for their high performance, rugged construction, low maintenance, minimum energy consumption and longer severing life, the offered range is used in pharmaceuticals & drug industry, fine chemicals, textile industry, paper industry, evaporation and lab application in chemical industry.

On-time delivery of the offered range of ejector systems has helped us in winning the trust of our valuable customers. With our large production and storage capacity, we have been able to take bulk orders. By conducting various quality assurance procedures, we assure that the premium quality of the offered range is never compromised. We have appointed a team of experts and set up a huge infrastructure facility to meet the precise needs of our valuable customers in the most efficient manner. We also follow customer centric approach and transparency in all the business dealings, to meet the utmost satisfaction of our customers in the most efficient manner.

JUMO India Private Limited

JUMO India Pvt. Ltd. is a 100 % subsidiary of JUMO GmbH & Co. KG. Our parent company M/s JUMO GmbH & Co, Germany is one of the leading manufacturer of process Control Instrumentation which is established for last 70 years. JUMO products are premium & field proven as a key instrument for keeping product quality and high efficiency production in various process and industries. In addition, JUMO products have excellent durability, easy operability as well as reliability and high accuracy.

Looking at the excellent response for the entire product range in the India, the Indian subsidiary was formed in August 2008. Main aim is to support Indian market with wide variety of offerings in field control instruments. All the instruments supplied through INDIA are manufactured as a complete assembly at our state of the art facility in Fulda, Germany.

JUMO offers comprehensive portfolio of measurement, control and recording technology. Our range of products includes devices for measurement of Temperature, Pressure, Humidity, Level & carrying out Liquid Analysis. In addition to measurement, our automation portfolio offers vast range of products from simple panel indicators to PLC. As a producer for sensor and automation solutions JUMO offers optimal components for water and wastewater. Other than sensors and devices for the most important parameters of liquid analysis, the JUMO products proven and also innovated solutions for water treatment, the tasks include measuring and controlling Pressure, Level, Flow and Temperature. Equipping water, process and wastewater treatment plants with high -quality measurement and control components will be an area to which increased attention will be paid within the framework of industry 4.0. Here, increased demands towards operational safety as well as ecological and economic aspect play just as much part as the trend towards a wastewater-free water cycle (ZLD- Zero Liquid Discharge)

Kaveri Plasto Container Pvt Ltd

KAVERI PLASTO CONTAINER PVT LTD, BANGALORE Manufacturer, Supplier & Exporter of Brand KAVERI Plastic Water Storage Tanks other Rotational/Blow Molded products. Manufacturing capacity is 60 to 20,000 Ltrs Water Storage Tanks an ISO 9001:2015 certified & ISI mark license (In range of 200 to 10,000 Ltrs). Brand KAVERI Water Storage Tanks is registered at various prestigious department Like NSIC, MES, Karnataka State Police Housing Corporation Ltd. CPWD, BSF etc. We have commercial tanks like Double Layer, Triple Layer, House Hold drums, Loft tanks, Sump tanks, Chemical containers, Industrial containers, Chemical Drums, Heavy Duty Plastic Pallets, Processing Trolleys. Brand KAVERI delivering brilliant products & service since 1990 as most trusted company. Our products have been used in various applications domestic, commercial, Industrial, warehouse & manufacturing.

Custom built products: We execute other jobs like automobile parts, Underground products, Chemical Lab`s products . We can develop any type of new products in to Rotational moulding.

Quality: We only purchase FDA approved raw material from ISO Certified companies. That can maintain high quality standards of raw material. The Vendours provide Test Certificates for each consignment that confirm to IS 12701:1996 Standards. Highly experience & technically qualified team in manufacturing Water Storage Tanks which conduct Type Tests on finished tanks to confirm IS 12701:1996 Standards. As ISO Certified firm, our strict Quality policy is to certify our products are delivered high quality only. Which builds confidence into our dealers & channel Partners to support END customers with durable quality at affordable prices.

Support: We lead Sales & Support shoulder to Shoulder to satisfy END Customers. Our Technical team support`s and provides solution for their requirements. We invest in technologies to upgrade a value chain in the industry, grows with clear synergies of markets and clients.

Address: Plot No 19G, Bidadi Industrial Area, Sector-1, Bidadi, Ramanagara Taluk, Karnataka-562109.

Time to CHANGE for BETTER... RO Panels & Water ATMs

ROCon 11 (ABS Body)

ROCon 11 GSM (Metal Body)

RO 11 Easy

KEY FEATURES

- Microcontroller Based Software Technology with Complete RO Logic Pre-programmed
- RO Control Panels with GSM Connectivity, Pressure Transmitter, Temperature Sensor, PH Sensor, Level Sensors Connection Available.
- Provision to connect Raw Water Pump, High Pressure Pump, HPS, LPS, Auto MPV, Flush Solenoid Valve, Dosing Pump, Two Flow sensors etc
- Protection from Dryrun, Overload, Low Voltage & High Voltage for RWP and HPP
- **MODEL OPTIONS:** Panel RO 11 / RO 13 / RO 33 Universal / RO 33 DOL & Star Delta upto 20 Hp.

GET REAL TIME REPORTS ON DISPLAY

For RO Control Panel:

- RWP & HPP Current
- Conductivity / TDS
- Flow Rate
- Plant Run Hours
- Voltage etc.

For Water ATMs:

- Number of Coins Collected
- Number of Card Swipes
- Total Card Recharges
- Total Amount Collected
- Total Volume Dispensed etc.

WATER ATM DISPENSERS: Any Time Water Systems

- Smart Card Based Water ATM
- Single /MultiCoin Based Water ATM
- Smart Card & MultiCoin Combo Water ATM
- Water ATMs with Multiple Tap Connection, Battery Backup, GSM facility, Separate Taps for Normal & Chilled Water Available

SUBMERSIBLE AUTOMATION

KDP 99 Series (MS)

MANUFACTURED BY

Winner of DST - LOCKHEED MARTIN INDIA INNOVATION GROWTH AWARD 2013

An ISO 9001:2015 Certified Company

Kaveri Water Storage Tanks

Product: - Water Tanks for Drinking Water Application.

Brand KAVERI is a Bangalore based manufacturer of WATER STORAGE TANKS since last 30 years. Are Mission to deliver Quality and Service. We understand Drinking Water storage application and that's why we manufacture tanks that are tested by recognised third party agencies for its typical application and are safe for use of drinking water. Kaveri tanks are available in a wide range of sizes; colours and applications.

Size Range: 200 Ltrs to 20,000 Ltrs for Storage application.

Colours available: Outer Black, Blue, Yellow and White. Natural for Indoor application.

Product Range:

- a. Water Tanks: Double Layer, Triple Layer, ISI Mark (Embossed) Tanks.
- b. Chemical Tanks: CST Model (Full lid Open) – Single Layer; WST Model - Single Layer and Double Layer.

Application: Water Storage Tanks, Chemical Storage Tanks, storage of Raw Water, RO Units, Water Treatment Plants etc.

Brand KAVERI is an ISO 9001:2015 certified company and has an ISI mark license issued by Bureau of Indian Standards (In range of 200 to 10,000 Ltrs). Our Water Storage Tanks are registered with various persitgeous department Like NSIC, MES, Karnataka State Police Housing Corporation Ltd. CPWD, BSF etc. Our product is one of the most trusted in terms of Rotational (Roto) Storage Containers/Tanks. And has deployed in a wide range of applications in domestic, commercial, Industrial, Warehouse and manufacturing facilities.

Keerthi Pumps

We Keerthi Pumps, is an ISO 9001-2015 certified, AEO & MSME company specialized in the manufacturing of non-standard and standard pumps in iron and special steel constructions, We cater a wide range of products with more than 350 models specific to the requirements of all industrial sectors such as Fire Fighting, Paper, Petrochemicals, Sugar, Fertilizer, Desalination, Air Conditioning, Bulk Water Supplies, Dewatering, Mining etc., We manufacture to International standards & specifications and export products to USA, Africa, Middle East, Singapore, Bangladesh, Nepal and other countries for more than 10 years. Our products are being marketed in the brand name KEERTHI.

We are following the below mentioned International standards in our products and process.

KEERTHI PUMPS DESIGN STANDARDS.

- WATER PUMPS - DIN 24255 & AMP; EN 733
- ANSI CHEMICAL PROCESS PUMPS - ANSI B 73.1
- MIXED FLOW PUMPS - DIN 24256
- AXIAL FLOW – TYPE KAF
- HORIZONTAL SPLIT CASING – TYPE HS
- SLURRY/ SEWAGE PUMPS - DIN 24256
- VERTICAL PUMPS- TYPE VO
- CHEMICAL PROCESS PUMPS - DIN 24256 & AMP; ISO 2858
- PULP AND PAPER STOCK PUMPS - DIN 24256
- FIRE PUMPS - DIN 24255 & AMP; EN 733
- DEWATERINGPUMP – TYPE DWA
- MULTISTAGE CENTRIFUGAL PUMPS
- AIRCONDITION PUMPS - DIN 24255 & AMP; EN 733

KEERTHI PUMPS FLANGE STANDARDS.

- WATER PUMPS - DIN ND 16 & AMP; OPTIONAL ANSI B 16.5
- PULP AND PAPER STOCK PUMPS - ANSI B 16.5
- ANSI CHEMICAL PROCESS PUMPS - ANSI B 16.5
- MIXED FLOW PUMPS - ANSIB 16.5&BS 10TABLED

Kilburn Engineering Limited

KILBURN is one of the leading company in manufacturing of various types of dryers in India. We have been manufacturing & supplying various types of Dryers since last 40 years to various customers in India as well as abroad. The Dryers being manufactured are of different designs and for various products. KILBURN offers various types of dryers as following,

- Sludge Dryer
- Rotary Dryer, Rotary Kiln, Rotary Cooler, Rotary Calciner
- Paddle Dryer, Paddle Cooler
- Fluidized Bed Dryer & Cooler
- Vibrating Fluidized Bed Dryer & Cooler
- Spin Flash Dryer, Flash Dryer
- Converised Dryer, Band Dryer

Pilot plant facility is also available at KILBURN R&D centre for testing of material to ensure optimum sizing of dryer.

Kitten Enterprises Pvt. Ltd

Since 1995, Kitten Enterprises Pvt. Ltd. has offered solutions for purity to the food and beverage, pharmaceutical, chemical, microelectronics, oil and gas, industrial manufacturing, power generation, water and automotive industries. Based in Navi Mumbai - Maharashtra and with a new plant in Ahmedabad - Gujarat, Kitten provides innovative and cost-effective products for companies that need to compete in the aggressive global market.

Today, we manufacture a wide range of products: filter elements, housings and complete systems. All products are designed to reach maximum purity standards at the highest quality requirements. We listen to our customers' needs and strive to satisfy every requirement with every order.

We produce elements and housings to global standards such as PED 2014/68/EDU and our quality system is certified to ISO-9001:2015. When customers require customized solutions, our design staff listens to their requirements and develops individually tailored systems, housings and even filtration elements.

Kitten is also certified to affix the CE marking on our products for the European Community. With these achievements, we have become the preferred supplier for many high value companies. For 25 years now, Kitten has provided quality filtration products to industries all over India and the world. Our success is based on our solid technical expertise and superior customer service. Our goal is to exceed our customers' expectations in providing solutions to their filtration needs.

Visit our stand - E12 to discuss your filtration requirements and let us know how Kitten can help you keep your products and processes clean. Our goal is to be your global partner for purity!

Modular Solar Roof Top Waste Water Treatment : We have developed for the first time Modular Solar Roof Top Waste Water Treatment / ETP & STP mounted on prefab structure using algae

Advantages:

- 1 Ground Space is not required – can be mounted on Roof Top (Any Type)
- 2 Reduction in operation cost – 90%
- 3 RO rejects evaporation can be done
- 4 Nutrient removal including ammonia
- 5 BOD & COD reduction
- 6 PH Correction
- 7 No – Fossil Fuel
- 8 No – Maintenance,
- 9 No – Ariation
- 10 No – Mechanical Moving Part except pump.

Krishna Industrial Services

Our company KIS (Krishna Industrial Services) was established in the year 1992 by A.Hariharan, Proprietor. He is a chemistry graduate from R.K.M Vivekanandha college and has a 3 years work experience in manufacturer of ion exchange resins in unit at gummudipoondi. The company started doing trading activities in laboratory Glasswares, Chemicals and instruments. Then in 1994 resale of acids and chemicals was ventured. Supplies were made to SSIS,MSUS and collected a good client base., The company also had a sister concern in the name of vikaash chemicals for manufacturing pharmaceutical excipients.

As we had a good customer association with pharmaceutical formulation units in the Tamilnadu, Kerala & Karnataka ion exchange india Ltd.,(IEIL) appointed us as a stockiest for pharma grade resin in the year 2004. In 2009 we got associated with thermax for trading their water treatment resins. In the year 2011, the company got associated with aquanomics systems limited (ASL) a group company of IEIL and started selling products of ASL and became a house for complete range of water treatment components and chemicals it also started a group of company in the name of Ananth's Aqua Associates for servicing OEMS with resins, chemicals, Vessels, Valves, Membranes, Pumps, Dosing pump, Media, Carbon and many more. In the year 2012 the company got associated with Georg Fischer a switzerland Company, for stocking their UPVC pipes & fittings and became their exclusive stockist for south india In 2013 The child company Krishna aqua services is born for domestic water purifiers and plans for a good satisfactory customers with prompt service and emerging as KIS Group and is aiming for a yearly turnover of 50 crores by 2015.

KWS Evaporators Pvt. Ltd.

We are glad to introduce us as one of the leading manufacturer of Multiple effect Evaporators in INDIA. Our business is run by team of technocrats who have very good experience in their respective field of operations. We manufacture different type of evaporators such as Falling film, Forced circulation, Natural Circulation and Pan Evaporators, Chiller Crystallizers, Basket Centrifuges and Pusher Centrifuges etc.

We design, fabricate, erect and commission the evaporators as per our client requirements and are highly energy efficient and reliable from the operational point of view.

For effluent treatment where ever the zero discharge norms of TNPCB have to be met, the only choice is to go for the multiple effect evaporators followed by Crystallizers. Here the main object to reduce the outflow from the effluent treatment plant and recover water and salt in pure form in order to reuse it in the process. We have manufactured and commissioned more than 100 plants for this application.

Kymik Engineering Pvt. Ltd.

KYMIK Engineering is the only Manufacturers, Exporter & Turnkey Project Solution provider, for all your Storage Requirement. KYMIK has been set up by qualified professionals with considerable experience in the Liquid Storage Industry

All our Storage Tanks are Custom made as per clients requirement and specification.

Storage Tank We Manufacture:

1. Bolted Panel Tank (3 Kl to 5000 Kl).
2. Zinc-Aluminum Tank (3 Kl to 5000 Kl).
3. GI Panel Tank (FM 4020 Compliance).
4. Fusion Bond Coated Tank.

Why Kymik Storage Tank: Kymik is undoubtedly your preferred choice for all your Storage Requirement. The Entire team of Kymik is Efficient & Effective to deliver optimum solutions. We work with honesty and integrity without compromising on the Quality & Production Cost.

Kymik's Tank Application: Water Tank, STP Tank, WWTP Tank, DM Water Tank, Fire Water Tank, Drinking Water Tank, Rain Water Tank, Fish Farming Tank, Aeration Tank, Industrial Water Tank.

Kymik'S International Presence: Bhutan, Nepal, Sri Lanka, Nigeria, Philippines Thailand, Myanmar Middle East.

LANXESS India Private Limited

LANXESS is a major global solution provider for liquid purification with almost 80 years of experience in water treatment and purification applications. With Lewatit® ion exchange resins, Bayoxide® iron oxide adsorbers, and Lewabrane® RO membrane elements, LANXESS holds a leading position in the development and production of three premium separation technologies for water purification, desalination, and process stream treatment. Production sites are located in Leverkusen, Bitterfeld, and Krefeld, Germany, and in Jhagadia, India. Our high-performance products are used in numerous industries to treat and purify water and other liquid media – industrial process water treatment, food processing solution purification, and wastewater treatment being the best-known fields of application. Energy suppliers use our products for the production of boiler feed water and steam, for condensate polishing, and water treatment in cooling towers.

Lewabrane® RO membrane elements are available for all water types, such as seawater, brackish water, and low-salinity water, for use in industrial and potable water applications. Apart from unique polyamide membrane chemistry, which provides the user with stable salt rejection and flow performance at changing feed conditions, a novel feed spacer technology has been implemented. The alternating strands design (ASD) offers a feed channel with improved feed water distribution and lower fouling tendencies. All Lewabrane® products are compliant with NSF/ANSI Standard 61.

The comprehensive design software LewaPlus® can calculate Lewabrane® RO and Lewatit® ion exchange (IX) arrays within the same software platform. It allows the designer to simultaneously optimize both the RO and IX configuration, which is unique in the industry.

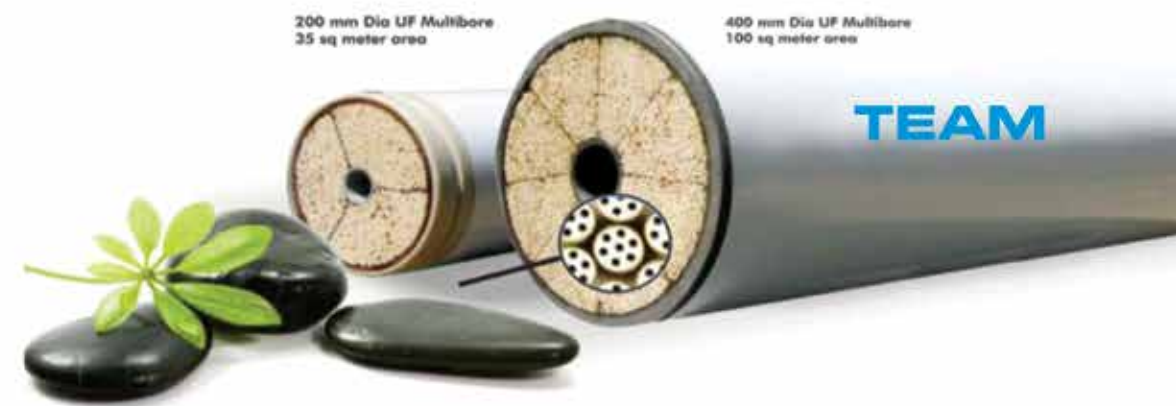

The most important brands & products:

- Lewatit® ion exchange resins

SINGLE BORE / MULTIBORE ULTRA FILTRATION MEMBRANES

High Mechanical Strength
Reduced Foot Print

UF Applications

- Boiler Feed Water – Colloidal Silica Removal
- Pre – treatment R/O – Reduction of SDI
- Drinking Water – Removal of pathogens, bacteria
- Treated sewage – TSS / Turbidity / SDI Reduction
- Process Effluent Recycling – TSS / Turbidity / SDI Reduction
- CT Blow down Recycling – TSS / Microbes / SDI Reduction
- Pre – treatment to desalination – SDI Reduction
- Brine Clarification – Chlor-Alkali - TSS / Turbidity Reduction

Advantages of MHT UF Membranes

- Low Operating Pressure (0.5 to 0.8 Bar)
- High Performance anti-fouling Characteristics
- Operation in Dead End / Cross Flow modes
- MWCO range 10KD / 100KD
- Same UF feed pump used for Forward Flush A&B
- Reduces Foot Print with 100m² membranes
- Elimination of Pre-coat Filters (Brine Clarification)
- Lower Power Consumption

Lexcru Water Tech Pvt. Ltd.

LEXCRU Water Tech Pvt. Ltd. is one of the most recognized and trusted brands globally for Water Purifiers such as Reverse Osmosis (RO)/Ultra Filtration/NANO Filtration and Water Purification components including RO Booster Pumps, RO membranes and filters.

Today LEXCRU's product range includes a complete collection of water purification components such as RO Systems, Bracket, Filter Wounds, Housing, Membrane and Pump among others.

Its competitive industry prices and constant technological innovation. Lexcru's most popular product, the RO booster pump known for its 'silent pump', limited power and an average a lifespan of more than two years was recently awarded the "Best Water Pump (Domestic)" award for third time running by the Water Digest Awards in association with UNESCO and ASSOCHAM in 2018-19. The company also received the 'Best Water Membrane Manufacturer' award at the same event.

Guided by their vision to provide safe potable water to all, LEXCRU ensures that their are available at competitive industry prices. LEXCRU is one of the few Indian companies to have its products approved by the CE, ROHS and FDA.

In a nutshell, it can be said that LEXCRU Water Tech Pvt. Ltd. has become a global force to reckon with in the OEM water purification industry.

LiquidSky

LiquidSky licences and supports the latest technologies to build a better world. With a focus on water, we bring to India, technologies that: Treat industrial waste water, cleaning and reuse through zero liquid discharge:

Replace traditional Multiple Effect Evaporators with compact skid mounted units with a 25 year lifecycle. Our equipments are manufactured to the highest quality standards, using super duplex material, which allows us to tackle the most aggressive waste water, and ensure a long life of our equipments. Very low maintenance and a long life make our equipments much cheaper on a lifecycle cost, compared to traditional evaporators.

We recover 95% of the wastewater in pure distillate form which can be recycled back to the production process. The 5% concentrate is treated in a vacuum concentrator and turned into solid sludge which can be taken away by a waste disposal company.

A REFLECTION OF PURITY

Guddi Plastcon, the name with a mission to design, develop and produce a range of products for water & waste water treatment is a well established & recognised organisation formed in the year 1988 and have been pioneers since then.

The leading OEM's of the international and the Indian market have acknowledged Guddi Plastcon as the most reliable source of suppliers that deal in components for water & waste water treatment.

Not only does Guddi Plastcon manufacture the premium quality products but also promises to make it available at the most competitive prices with quick delivery time.

OUR PRODUCTS

Plastic Filter Nozzles

Under Drain Collection Systems For Sand Gravity Filters

Plastic Media For Bio-tower

Distribution & Collection Systems

Bottom Collection Systems

Multi Port Valves

Tower Packing & Hallow Balls

Machine Factory

We, M/s. Machine Factory, Have Great Pleasure To Introduce Ourselves As One Of The Leading Manufacturer of PET Bottle Blow Moulding Machine and PET & Plastic Shredder Machines Based In Redhills, Chennai, India. We Have Emerged With A Reputation For The Quality Products As Well As Prompt Service. Since, we have our Own Factory to Manufacture the Accessories & Necessary Parts of the Blow Machines; we can capable to vend the machineries in better Competitive rates to our Customers. We have a team of highly trained and experienced professionals to manufacture machineries and who are working hard to maintain the Sales & Service throughout the year. We have the huge Ware House facility to keep the Machineries for Demo to prove the quality to our Customers. We Guarantee Competitive Rates Along With Excellent & Quality Products. Delighted customers are key to our success & we strive to achieve this key every second. We offer our Machine in both standard and Customized Specifications to meet customer requirements. Our machines are designed with at most care to eliminate all limitations of the existing Machinery. We develop PET bottle blow machine that build tangible long-term value. Machine Factory is a wide leader in complete machine line solutions. We focus on bottle blowing machine quality and product durability for enhanced hygiene to ensure optimum quality of our product to the consumer.

Madras Chamber of Commerce and Industry

The Madras Chamber of Commerce & Industry (MCCI) is one of the premier industrial promotion organizations in Southern India and is currently into its 184th year of service to trade and industry. Established in 1836, the Madras Chamber is the oldest chamber of commerce and industry in Tamil Nadu and is one of the five promoter chambers of the Associated Chambers of Commerce & Industry of India (ASSOCHAM), New Delhi.

The Madras Chamber has been an integral part of the growth of commerce and industry in the southern region. Almost all leading industries and businesses in Tamil Nadu, family owned enterprises, publicly traded companies, multinational corporations and SMEs are our members. It would not be an exaggeration to say that a large proportion of industrial investment in Tamil Nadu is accounted for by the members of MCCI.

Over the decades, the Chamber has been a responsible and credible voice of trade and industry and has worked closely with the State and Central Government on various issues.

The Chamber has been a pioneer in bringing new initiatives such as a Centre for Vocational Training and Skill Development, Sustainable Chennai Forum, Start-up Entrepreneurial Eco System (SEE), Food For Thought (FFTs), Women Directors Forum among others.

Leveraging the knowledge and resource bases of various expert committees, the Madras Chamber plays a formidable role in policy making and advocacy in addition to providing the services such as Arbitration services, networking opportunities to promote business through various meetings, workshops, round tables, visit of overseas delegations, trade facilitation and B2B linkages.

Madras Hardtools Pvt. Ltd

Madras Hardtools Pvt. Ltd. is an ISO 9001:2008 certified company established in 1972 having their head quarters in Chennai. Distributor in South India for “Usha Martin” make Wire Ropes & Wires. Having factory-cum-warehouse at Puduvoil on NH5, before Gummidipoondi. Manufacturing of Mech. spliced and Hand spliced Wire Rope Slings and Lifting Equipments, Polyester Web Slings, Distributor for “YOKE” for the Master Link, Assemblies, and Hooks etc. and Channel Partner for Crosby Products. Best equipped company in India possessing 3000 Ton USA National make Hydraulic Press & 300 Ton Test Bed and admitted as a member of AWRF, USA & ISSA, U.K. Producer of Green Power by Windmills & Solar Power Systems.

MHT PET DIVISION: Manufacturing of PET Preforms, PET Bottles, HDPE Caps. Machineries presently available with them are the state-of-the-art-Technology of L&T/Toshiba make injection moulding Machines-5 Nos. with Chillers & Dehumidifiers and Precision 16/24/32 cavity Moulds. Also blowing machines of capacity 200ml to 20Ltr. Importing PET Resins from China & Taiwan to sell locally. Proposed to manufacture Preforms for soft drinks like Juice, Soda, Pharma, etc. Erected 630 KW HT Line & 200 KWp solar power system to supply uninterrupted power supply for Injection moulding Machines.

AWARDS: The company have bagged MOITA (Market of India Trade Awards) Chennai Edition 2019 Super Star recognition in Industrial Supply Category & ZEE Business Dare to Dream Awards Session 2 in association with SAP - Company of the Year – Manufacturing.

Marcus Blowin

Packaging Automation Through Robotics:

Your Gateway to Productivity for Automatic Bottling System and Your packaging partner, from conception to commercialization, Marcus Blowin is one of the pioneers in PET blow moulding technology. We have been developing tailor-made solutions in Automation Robotics for about nine years and along the way have accumulated expertise in design and production of packaging for foods & beverages.

Our Blowing Machines have High Productivity, Low Power Consumption, Easy Operation, Low maintenance costs, Precise and Programmable controls with Human Machine Interface (HMI), Low cost of Blowing, operator safety, secondary compression to eliminate parting line. Machine construction materials that are reliable and the best combination you can get in the PET world.

Marcus Blowin Says” 24/7 Customer Service is our Top Priority “

Maxwell Additives Private Limited

Nature Of Business: Maxwell Additives Pvt. Ltd. is a leading Chemicals manufacturer since 1988. SUJAL, OLKLIN & KLINMAN are our registered brands in Water Treatment Chemicals. Our uniqueness in the manufacturing of speciality chemicals that is Organophosphates, Polymers & Benzalkonium Chloride makes us a gem in this market. PHOSPHOMAN, POLYMAN & DEBAC are our registered brands in Speciality Chemicals. We are also growing in cleaners & sanitizers range. KLINMAN, OLKLIN & DEBAC are our registered brands in Cleaning. Recently launched Hygiene & Disinfectants products range.

Mission: We continuously serve in the field of cleanliness drive which is very much inevitable for healthy and hazard-free life with unique class of best quality.

Goal: Our Goal is to give the best quality products, at an affordable price, to keep our human folks as well as environment clean, safe and healthy. By virtue of this, the company has been able to source the products at very competitive prices and can supply the same with guaranteed specifications and delivery commitments.

Membrane Engineering Pvt Ltd

Membrane Group aims to improve the quality of life and the efficiency of your processes by providing State-of-the-Art Water and Wastewater Treatment Components. With over 30 years of experience, Membrane Group has been supplying Systems for both Pure Water as well as Wastewater Components to Industries and Companies around the world. It's always our ambition to add value to our customers by providing them with technologies and systems that help them recycle maximum amount of wastewater. In India, we represent the following Global Leaders for their complete range of Water & waste water treatment components:

- 1) LG Chem - Complete Range of Reverse Osmosis Membranes
- 2) MEMSTAR USA- Complete Range of Ultra Filtration Membranes
- 3) MITSUBISHI CHEMICALS, JAPAN - Membrane Bio Reactor Systems
- 4) KURITA, JAPAN - Specialized Water Treatment Chemicals
- 5) PENTAIR - CodeLine Housings, Structural Tanks, Filtration Solutions, Valves etc
- 6) AQUAPORIN, Denmark - Forward Osmosis Membranes

Together, we are committed to minimizing water wastage by recycling every drop of water.

Membrane House

Hunan Ovay Technology Co Ltd (OVAY) is located in Zhuzhou, Hunan. The registered capital of Ovay is 100 Millions. Ovay Focuses on Researching , Manufacturing and Marketing of RO, NF, UF and MF Membrane material & Elements. It is one of the limited enterprises that have the capacity to manufacture the dry membranes at global scale.

Ovay has a high-tech elite team composed by several PhDs, Masters and Overseas Talents to look after its own one research and development centre along with two high-tech industrial Units as well. Ovay hosted or participated in 3 national projects, 1 CAS project and 1 school-enterprises project. Until now Ovay owned 16 national patents that include 10 invention patents and published several scientific papers in renewed core periodicals at home and abroad.

After long term technical reserve, there are more than 40 kinds of self- developed RO Membrane products that have been widely recognised in the trade and the performance reaches the international advanced level. Cooperation project of Ovay and Domestic well known university filled with technical gap and break up monopoly in hollow fibre Ultra Filtration Membrane and Hollow fibre Micro Filtration membrane products by Foreign Companies.

MICBAC India

MICBAC India is one of the largest manufacturers and global supplier of high-quality Activated carbon used in a growing range of Waste water treatment industry, Water filtration, Oil refineries, Air purification, Gold recovery, food and pharmaceutical industry. Further more, As MICBAC India expanded and evolved, we have extended our production line to Activated Carbon briquettes, Anthracite Filter Media, Manganese DiOxide Filter media, Filter Media Sand as well as Hard Coke.

We have an annual production capacity of 20,000 Metric tonnes including Wood based Activated Carbon, Coal based Activated Carbon and Coconut Shell based Activated Carbon. We are always ready with humongous stock and ready to take bulk orders 24x7. Having significant production capabilities and supply capability, We can transport 1000 M.T to any country at any point of time and ensure regular and uninterrupted availability of consistent quality products for our customers. Our strict quality assurance procedures ensure that the delivered product meets and exceeds the specified requirements with excellent customer service, each and every time.

We have the vision to be the most respected, dynamic and sustainable in global Activated Carbon business, our leadership strives every day to ensure that we are an effective partner to our customers, developing and delivering product consistently and responsibly for your needs.

With a passion for innovation, MICBAC India has also concentrated on research and development to ensure the company retains its flexibility to accommodate custom solutions and evolving industry demands.

Microtek Technologies

Warm Greetings from Microtek Technologies!!!

We take pleasure to inform you that We are Exclusive Distributor for ,Hach Company India, USA(A Div. of DHR Holding India Pvt Ltd.) USA who are Pacesetters in Manufacturing of Analytical and Lab/Online water analysis like:

Full range of wet chemistry analysis:- Benchtop/ Portable pH, DO, ISE, Conductivity Meter, Turbidity Lab BOD, COD Colorimeters, Spectrophotometer etc. Includes online analyzers for the measurement of pH, DO, Conductivity, Turbidity, BOD, COD Analyzer etc.

Titration Systems, Reagents, Standards, Microbiology, Test Kits & Test Strips

TOC Analyzers: for Ultra-Pure Water & Waste Water Applications.

Services for all lab instruments: We, at Microtek Technologies, are very focused on the kind of market segments we target and hence we are growing at a fast pace. This company is owned and run by complete technocrats who have 10 years of experience in this field. We have a wide range of instruments which cater to Research Institutes, Pharmaceuticals, Chemical Industries, Biotechnology, Life Sciences, Universities, Power Plants, Food Industries etc.

While providing the best of equipments to our customers, we cater to service required by our customers in regards to installations, breakdowns if any and hence we have put a Service team in place to cater to these needs.

Nishu Enterprise

Nishu Enterprise was established way back in the early 90s as manufacturer of Water Treatment Plants. The Company was founded on the philosophy to lead product development through technology and innovation. Little wonder, the Company saw expansion as it entered areas of turnkey execution & total system approach by applying its extensive know-how, innovative product development & commitment to superior services.

Involvement & Innovation: At Nishu, we don't have off-the-shelf solutions. We listen to the client's requirements, analyze their water source, improvise a treatment technique, engineer the plant and produce an advance purification system to meet the exact required specifications. Our forte lies in the ability to draw on all available techniques and assure you the most objective recommendation and provide you a one-stop solution.

Our Mission: To convert the available source of water to the specific quality of water required by: Industries: For process/Pharma/Utilities Individual & Community: For personal hygiene (cleaning, washing) and health (drinking, cooking). Environment & Life: To treat industrial effluent and give back the environmentally chemical-free water. This is achieved by superior engineering and innovation coupled with stringent quality control practices to provide the best purification system you can rely

Customized Solutions: Unlike other water treatment manufacturers, we at Nishu don't have quick-fix solutions. We believe each water problem is unique and that is why each water solution has to be unique. A thorough understanding of your water problem, a systematic approach to the solution and a meticulously thought-through the design of treatment plant is the method Nishu follows to ensure you get the quantity and quality of water you require. Tell us your water problems. Tell us your water requirements. We'll bridge the gap effectively.

Nivedhan Water Solutions Pvt Ltd

Established in Nivedhan Water Solutions 2003 is one of the fastest developing brand of Nivedhan Water Solutions Pvt. Ltd. in Chennai involved the marketing and servicing of Reverse Osmosis technology based water purification systems, SOFTENERS, and IRON REMOVAL PLANTS. Within the short span of 11 years, its possible for us to set up 7 branches in South Chennai and 3 Branches in North Chennai and obtain a strong customer base of nearly 30,000 households, Hospitals, Schools, Collages, Hostels and Restaurants.

Our Aqua Cure Systems brand products are available in 4 Models, shapes, colors and are fitted with high quality imported raw materials. In early 2009 we have been accredited with ISO 9001:2015 by BSCIS Certification Pvt. Ltd. for our commitment to achieve complete customer satisfaction by means of supplying quality products to all our customers, timely response to customer needs and providing prompt service guarantee.

Recently we have launched 5 more products in our another brand of Odrops to fulfill the people's dream of getting pure water to protect their family from water borne diseases

MISSION STATEMENT: We Strive to provide "Superior Quality Water Purifiers" to our Customers for residential applications. We focus on continuous and strict "Quality Standards to ensure High Quality, Reliable, Effective, RO Water Purifiers" that is easy to use, install and maintain.

Ozone Engineers

We Believe In Supply Quality Products In The Best Prices

OZONE ENGINEERS is One of the leading manufacturers and Exporters of Ozone Generators, Oxygen Concentrators, Ozone accessories and allied product based in Coimbatore Tamil Nadu. We manufacture Ozone Generators from 500 mg to 1 KG machine for various water and Air applications. Since last 7 years we are catering to more than 300 OEM'S, Corporates clients and Government sectors all over India and overseas. By focusing on the continuous improvement of Engineering research, customer satisfaction, top quality products, clean manufacturing practices and best after sales services we are having good number of regular clients with us.

We manufacture the lowest cost, highest quality ozone products by utilizing diverse application expertise to serve multiple markets while maintaining the optimum balance of innovation, quality, cost, safety and ozone efficiency.

OXYGEN Concentrator: In 2018 we launched our Industrial Oxygen Concentrator OxyNxtGen™ in two models of 5 LPM & 10 LPM (ONG-Series) and supplying to many customers with good satisfactory results.

Ozone Generator Ranges :

IAE Series - 2 gm/hr to 10 gm/hr | Built-in Oil free Air Compressor.
 IA Series - 2 gm/hr to 5 gm/hr | With Display | Built-in Oil free Air Compressor.
 EO Series - 5 gm/hr to 30 gm/hr | Air Cooled System | External Oxygen Source.
 WO Series - 10 gm/hr to 1 kg/hr | Water Cooled System | External Oxygen Source.
 IO Series - 10 gm/hr to 150gm/hr | Water Cooled System | Inbuilt Oxygen Source.
 SD Series - Skid System Integrated | Ozonator | Oxygen | Ozone Injection | System with Ozone Contact Tank

ENVIRO ENGINEERING

TECHNOLOGY GROUP

AN ISO 9001 -2010CERTIFIED COMPANY

Enviro is now offering Design, Engineering, Manufacturing and Exporter of all Kind of WTP/ STP/ETP Systems and Equipment
Enviro Valves and Beliefs are Aligned with Responsibility Towards Business

PARTIAL LIST OF OUR PRODUCT:

- ✦ MECHANICAL BAR SCREENS (CORSE / FINE/STEP)
- ✦ AGITATOR / FLASH MIXER
- ✦ FLOCCULATORS
- ✦ OIL REMOVAL SYSTEM
- ✦ DAF SYSTEM
- ✦ AERATOR (FLOATING / FIXED)
- ✦ CLARIFIERS (FULL BRIDGE / HALF BRIDGE)
- ✦ CLARIFLOCCUALTOR (FIXED / MOVING BRIDGE)
- ✦ THICKNERS
- ✦ FILTERS
- ✦ UF SKID
- ✦ RO SKID
- ✦ FILTERPRESS (PLATE / BELT)
- ✦ DRIVE HEADS

Pack Tech Systems & Equipments

Since 1999

Premix Carbonator with Chilling Plant for soft drink beverage

Pasteurizer for beverage and milk.

RO Plant for water treatment

Water / Juice PET bottling Machine - Rinser, Filler and Capper

Gravity filler for distillery

20 ltr bubble top jar / Unibloc rinsing, filling and capping system

Hygienic SS monobloc pump

- We are manufacturers and suppliers of Automatic bottling machinery for Glass and PET bottles. Our product includes
- Glass Bottle Washer
 - Carbonators
 - Pasteuriser
 - Glass bottle Filler/crowner for juice, milk, carbonated soft drinks
 - Uniblock Rinser/Filler/Capper for PET bottles
 - SS/EP Slat chain, belt, Roller conveyors for packing industries.
 - PET bottle Cooling, Warmer tunnel
 - Sleeve shrink tunnel.

THESE MACHINERY ARE WIDELY APPRECIATED FOR THEIR STURDY CONSTRUCTION, RELIABILITY AND OPTIMUM PERFORMANCE.

Pure N Safe Water Technologies Pvt. Ltd.

Pure N Safe Water Technology Pvt. Ltd. is ISO 9001:2015 & ISO 14001:2015, NSF certified and has been at the forefront of innovation since 2011. We have been awarded various organization for best innovation products in different product categories during last few years.

Mission: "To provide total water treatment solutions by combining the best practices, technologies and infrastructure available globally and then in-house researched & developed optimally which are cost effective, reliable and "Pure and Safe".

Products: Our products are built as per international standards. This gives us advantage to have presence in other countries apart from Indian Market. Our group company is in Singapore and associates in Europe facilitate new technology and product development for global market including India. Pure N Safe water technologies Pvt. Ltd provides entire spectrum of water & Wastewater treatment products.

Specialty Filtration Media:	• Iron Removal	• Fluoride Removal	• Arsenic Removal
	• Nitrate Removal	• Heavy Metal	• Radio Nuclei Removal
POE (Point Of Entry Products):	• Sand Filters (Filtration up to 3 Microns)	• UF Systems.	• Water Conditioners
	• Specialty Filtrations units	• Softeners	
	• Reverse Osmosis (RO) Purifiers.	• Components – Membranes, FRP Vessels, Multiple Valves, Pumps.	
POU (Point Of Use):	• Residential RO units	• UF + UV Purifiers.	• Non – Electric Purifiers. Softeners.
	• Water Conditioners.	• Gravity Filters including removal of Arsenic and Fluoride.	
	• Components – Membranes, Pumps, SMPS, UV, Inline Filters, SV.

Raisunsoft Solutions Pvt Ltd

Raisunsoft Solutions Pvt Ltd a CAD/CAM/CAE Solutions provider. Our vision is to help customers to Implement Solutions and Technologies that Reduce Time, Improve Quality and Increase Profitability. The solutions we offer futuristic technologies of Rule-based Design, Discrete Event Simulation, Mixed Reality, IOT, Virtual Reality, Augmented Reality, Artificial intelligence our hardware solution from most advanced 2D CAD Mouse and 3D Space Mouse with world fastest CAD Workstation with 5.1 and we also help our customers to Build World class Customer Experience Centres. We provide Engineering Process Automation Services, by developing Software modules. Our solution for water treatment plants is from Technical Data sheet to final Construction drawings and Bill of Quantities. Our User-friendly solution is developed with high degree of accuracy in commonly used user-friendly platforms such as CAD/Office Excel/Data base etc. Our solution generates pre-audited engineering documents, consistent engineering deliverables with high quality accurate BOQs of Civil, Mechanical, Piping and associated electrical and instrument BOQs. This gives us a minimum of 60% savings in Engineering manhour efforts.

Viswa Esurvey Jal Suite manoeuvre seamlessly through the field data, drafting, designing and producing quality final output drawings with high precision, minimizing the time to a greater extent. Our solutions are specially designed to accomplish water distribution and pipe line works. Hydraulic design is made simple without compromising on the accuracy and quality. Generation of optimized Longitudinal section is a gem by its own, while considering all the given constrains for design and actual site requirements. production of final drawings is customised in a unique way to achieve the submittals with minimal time and resources with a single click in our solution. Viswa Esurvey Jal suite ensures above 70% productivity gain in each of the project.

Rostfrei Steels Pvt. Ltd.

ROSTFREI STEELS PVT. LTD. an ISO 9001:2015 and having FM4020 Approved products with its excellent service, product quality and proven track record, has established itself as the premier OEM manufacturer and turnkey service-provider of LIQUID STORAGE TANKS & SOLID STORAGE SILOS. Our products range from highly customised ZINCALUME and GLASS-FUSED-TO-STEEL Tanks and Silos best fit for storage of seeds, grains, pure water, waste-water, oil, chemicals, molasses, Biogas digesters etc. ROSTFREI has executed more than 8000 installations in approximately 25 countries worldwide.

ROSTFREI has earned a reputation of providing expert multifarious services to our venerated clientele that includes designing, manufacturing, supply, installation, erection and completion of various types of liquid tanks used for numerous types of applications. Rostfrei Steels offers the comprehensive services for tanks & silos in the sector of water infrastructure, solid waste management, agricultural infrastructure. We complement these services with wide ranging assistance in optimization of operation of new or rehabilitated water plants, private and government water schemes. We offer solutions from concept to commissioning and go the extra mile by holding the hand of the customer till Operations & Maintenance of the tanks.

Our Products:

- Liquid Storage Tanks
- Hopper Bottom Silo
- Biogas Digester Tanks
- Zincalume Tanks
- Flat Bottom Silo
- Glass Fused Steel Tanks
- Material Handling Equipments
- Grain Storage Silos
- Fittings & Accessories

Positioning of Tanks:

- Overhead Tank
- On the ground Tank
- Elevated Tank
- In the Basement
- Semi-Underground Tank

S.ABBAS & CO

S. ABBAS & CO. was founded in the year 1979 by Late Mr. ABBAS FIDAHUSEIN. We are in the business of Valves, Water Meters, Flow Meters, Pipes and Fittings. In the last three decades we have grown and established our company in the market through good quality of materials service and Goodwill of our esteemed customers.

We are AUTHORISED DISTRIBUTOR of **FEDREL** Flow Meters (M/s V.A VALVES, JALANDHAR, INDIA); we have been awarded ISO 9001 -2000 by TUV Germany in the year 2005. Our Association with **FEDREL** Flow Meters, Jalandhar is for more than 5 years and they are one of the finest manufacturers of all complete range of Flow & Water Meters in India, they are manufacturing Flow Meters & Water Meter since 2007.

Over the years **FEDREL** has become a Synonymous name for Flow & Water Meters. Today **FEDREL** offers a wide range of Domestic & Industrial mechanical water meter, Turbine, Oval Gear, Electromagnetic, Ultrasonic, Vortex Steam, BTU, AMR, Pressure Transmitter and Ultrasonic Level Transmitter Metering Solutions for measuring and transferring fluids, lubricants and fuels. These solutions are not only Robust and Dependable but also easy to use.

FEDREL Approvals: CE (Conformity of Europe), ISO (International Standard Organization), IP-68 (Ingress Protection), ISI (Bureau of Indian Standards), FCRI (Fluid Control Research Institute), DJB (Delhi Jal Board), MCGM (Municipal Corporation of Greater Mumbai), SITARC (Scientific and Industrial Testing & Research Center) and many more.

BIRM A8006

IRON AND MANGANESE REMOVAL MEDIA

PHYSICAL PROPERTIES

Color	: Black
Bulk Density	: 36 -38 lbs./ ct. ft.
Mesh Size	: 12X50
Specific Gravity	: 2.0 gm/cc
Effective Size	: 0.48 mm
Uniformity Coefficient	: 2.7

Uses:
BIRM Filter Media is used to remove Iron and Manganese content from the water source.

Advantages:

- Under ideal conditions, chemical are not required for maintenance and hence, low maintenance cost.
- Efficiency of iron removal is extremely high.
- Cost of labor is negligible.
- Maintenance is very easy periodic backwash is only required for smooth functioning.
- Extremely durable with long shelf life and product life.
- Widely used in water treatment plants in all arena's including domestic, commercial and industrial.

Application:

Widely used in Water treatment plants in all arena's including domestic, commercial and industrial

avcon[®]
Pioneer Spirit in Valve Automation

A designer who saw 55 years back future in Solenoid Valves to give you Quality product at affordable price.

"Fit & Forget" Products

Solenoid valves suitable for almost all applications.
2-way solenoid valves 6mm to 200mm for all Industrial Electric Supply.
3-way solenoid valves are available from 15 mm to 40 mm.

Our Other Most Popular Range of Products :

Angle Seated & Straight Patterned Pneumatic Valves, Ball & Butterfly Valves with Pneumatic & Electric Actuators, Gas Regulation & Control Products & Gas Trains, Pneumatic & Electric Control Valves

Saravana Chem Dyes

Saravana Chem Dyes is one of the leading distributions of water treatment chemicals and equipments in South India having head quarters at Erode, Tamilnadu, India. The company was setup in 1983 and driven by experienced team with prompt and professional service. Our proud partners are,

- **INGE** - Multibore ultrafiltration membrane.
- **BASF/SOLENIS** - RO Antiscalants/ Flocculant / Coagulant / Speciality chemicals/ Sugar Processing Chemicals / Cooling & Boiler Treatment Chemicals
- **PUROLITE RESIN** - Iron Removal/ Fluoride Removal/ Heavy Metals removal/ Removal of Arsenic/ Removal of traces of Oil/ Industrial softening/demineralization.
- **EBARA** - Fluid transfer Pumps for all sort of Industry with 100 years experience.
- **PROMINENT** - Metering Pumps and Acid transfer Pump.
- **ECOTEC STP SYSTEMS** - Affordable sewage treatment plant with very low operation cost.

Our Key Strengths:

- 35 Years in service
- Fully equipped Water Quality Laboratory
- Trained sales and Service Team

Smart Water Solution

India's Fastest Growing Manufacturer of Booster Pumps, RO Adapter & Spun / Housing.

Booster Pumps: We manufacture Booster Pumps, which has noise-free operations without any kind of vibration. Easy to install and highly durable, these are manufactured using precision engineered components. Also, these pumps can sustain constant pressure and can be availed with in-built voltage controller for maximum reliability.

RO Adapter: We are the leading Manufacturers & Supplier of RO Adapter Delivering Complete Satisfaction with 6 Months Replacement Warranty Our RO Adapter presents complete safety device for all other electric parts in water purifier.

Spun / Housing: We manufacture these by utilizing high grade raw material, sourced from the most trusted vendors. These products are highly demanded among the clients due to their effectiveness & promptness. Made of high quality polypropylene filter media, Filter Cartridge is designed cost-efficiently to catch particulate suspended solids in the water sources. It reduces Sand, Slit, Dirt and Rust particles. It can be used as a pre-treatment for residential water treatment systems.

smart Aqua Technologies

smart is leading suppliers and manufacturers of all kind of filtration products under one roof. Our products are used in many of the countries with satisfactory. We are importing and manufacturing the filtration products FOR AIR, WATER, OIL, FUEL, GAS AND ALL OTHER Critical application of Filters. Our products are:

1. Filter cartridges, Filter bags in SS, PP, Rubber, Glass Fibre, and Needle Felt & Cotton. Cartridge Filter, Bag Filter & Basket Filter Housings in SS, UPVC & PP.
2. PRE, HEPA, Turbine, Paint Booth, Automobile, Hydraulic, Gas, Oil Filters Centrifuge bags and dust collectors.
3. Pleated Filter Cartridges PP, PTFE & PVDF different model like 222 fin, code 7, Code 3 & code 8 fin etc.,
4. Strainers in PP, SS, MS for Water & oil application
5. MBBR packing Materials
6. All kinds of RO, Water Treatment Chemicals & Swimming Pool Chemicals.
7. Turnkey Project of RO Plants, WTP Plants & STP Plants

SMART is the answer for all your Filtration needs under one roof

Snow Wash & Co

We, M/s. Snow Wash & Co., is an industry leader within the manufacturer of FMCG Products. We are manufacturing Complete Set of Home Care Products such as, Detergent Powder, Liquid Detergent, Dish Wash Liquid, Floor Cleaner, Glass Cleaner, Toilet Cleaner, Bathroom Cleaner, Fabric Conditioner, Multi Purpose Cleaner & Etc., We have gained a reputation for quality and efficiency. Competitively priced Although quality is never compromised we are able to offer prices to meet almost any budget. We offer an accurate and accelerated response to customer requirements through an honest and open attitude to business coupled with an enthusiastic professionalism that all staffs are committed too. We incorporate our current standard stock items and customer requested formulations, all formulated by our in house laboratory chemist and testing facilities. As well as offering high performance products, our Sales Team, backed up by our Head Office are experienced and thoroughly trained and therefore ideally suited to offer a range of support services including Material Safety Data Sheet training (which is compliant with the latest chemical regulations), product training, site surveys and even direct delivery on a national basis to all sites if required. We are an ISO 9001 accredited cleaning products manufacturing company. We promote and do Own label design Enabling your company name to appear on the products.

Water Filter Cartridge

GELTRON

Candle Characteristics:

- Specially designed as per BIS standard.
- Manufactured in an ISO9001:2015 setup.
- Food grade certified.
- Imported High strength polypropylene Yarn used.
- Manufactured on fully automatic imported machines.
- Available in 5 Micron as well as 1 Micron option.
- Multi Layered Depth Filter design for filtration as well as longer life.
- Can be cleaned by back flushing water hence less service cost.
- Hygienically packed in a completely sealed bag.

Sophisticated Industrial Materials Analytic Labs Pvt. Ltd.

Incorporated in the year 1988, SIMA LABS is offering EPC services in the field of environment management & control; and testing services in the field of environment, life-sciences, pharmaceuticals, food products & building material. In the field of water and waste water treatment we have experience of more than 1000 successful turnkey projects of ETP / STP / WTP / CETP / ZLD / Recycling Plants in diverse sectors like automobile, steel, mines, bio-refineries, breweries, distilleries, real estate, government universities, ranging from capacities of 100 m³/day to 1000 m³/day. We also take up annual maintenance contracts of our installations. The company has treated more than a 300 million liters* of waste water cumulatively over its 3 decades of existence.

On the analytical testing and research front we are a NABL, MoEF, BIS, FSSAI accredited with fully equipped laboratories in New Delhi, Haridwar, Jammu .

Our laboratory and project team is supported by 15 marketing offices spread all across the length and breadth of India.

Spectralab Instruments Pvt. Ltd.

Spectralab Instruments Pvt. Ltd. is ISO 9001: 2015 manufacturing company having its facility at Rabale Navi Mumbai. We are in the manufacturing of sophisticated Analytical / Laboratory instruments for more than three decades. We have a strong R&D team & stringent quality checks throughout Quality Control department. Further we have a well-developed analytical lab for application development & support. We cater in the field of Water & Waste Water, Food, Pharma, Oil & other chemical industries in their QC & R&D Departments & also in the academic & research fields.

Food & Pharma: Potentiometric Titrator, Karl Fischer Titrator, Coulometric Karl Fischer Titrator, Kjeldahl Nitrogen Analyzer, Melting Point, Melting Range

Pollution Monitoring Instruments: COD Digestion Apparatus, COD Titrator, BOD Monitor, Thermoreactor, Handy Sampler, Composite Sampler, pH Meter, pH, Conductivity – TDS Meter, DO Meter, Conductivity Meter, pH ION Meter, Fluoride Meter

General Instruments: Multipoint Magnetic Stirrer, Mini Cooling system, DFR, Ultrasonic Cleaning Bath.

Water & Waste Water Samplers: Aquamatic (U.K.) programmable vacuum sampler to collect repeatable and accurate effluents samples. They are certified by MCERTS standard (UK) and also international standard for waste water samplers, ISO 5667-10. Portable, wall mounted or stationary systems, refrigerated and non-refrigerated versions available. Proper sample collection, tracking and preservation techniques are employed to meet regulatory and project specific requirements.

Sample extraction can be time based or triggered by external sources such as flow meters, level sensors, pH meters, PLC's etc. for project specific applications. All products meet relevant standards & Compliances to GLP, IEC, ASTM, APHA, IP/BP/USP with validation, Calibration, Traceability & Documentation.

Spray Engineering Devices Limited

Spray Engineering Devices Limited (SED) having Head Office at Mohali, Punjab and three manufacturing facilities at Baddi (Himachal Pradesh) is pioneer in the field of Evaporation, Heat Exchanger, Condensation and Crystallization. Established in 1992 from a modest start of manufacturing of spray nozzles, SED today has established its existence in more than 40 countries by providing innovative technological solutions for sugar & allied industries. SED has emerged as one of the fastest growing technology driven company, striving to provide world class integrated energy efficient equipment and solutions for entire sugar sector across the globe. SED has revolutionized the water sector by providing most efficient water recovery and recycling solutions through low temperature evaporation technology based on MVR system. This patented technology is operating without use of heat i.e. boiler, steam, cooling water etc. eliminating use of Fossil & Non-Fossil Fuel Boiler, Condenser & Cooling Tower units etc. The technology is highly efficient and eco-friendly for concentration of any type of industrial effluents or domestic wastewater. It recovers upto 99% high quality clean water by concentrating wastewater/effluent and reducing its mass/volume to negligible providing environment friendly solution. This multiple low temperature evaporator is running successfully and performing excellently in more than 50 plants globally from last 3 years on various applications in water sector. The recovered clear water is recycled back to the process and there is no need of pre and post treatment of the water.

BENEFITS OF LOW TEMPERATURE EVAPORATOR:

- Upto 99% clean water recovery and recycling
- No heat rejection unit
- Lowest foot-print area
- Wide applicability
- Low capital cost
- No external heat source requirement
- Minimal electric power demand
- High quality product
- Automated operation
- Minimum operational and maintenance cost

Surplus Management, Inc. / WaterSurplus

WaterSurplus was founded over thirty years ago as the creator of a global marketplace where buyers and sellers come together and generate value by redeploying surplus water treatment equipment. Through the years, the capabilities of WaterSurplus have expanded beyond surplus equipment to include the sale of new equipment and components; engineering and design services and custom turn-key equipment solutions. Our core expertise lies in reverse osmosis equipment and RO membranes, ion exchange resin and media filtration. Areas of focus include water reuse, potable water, beverage and general industrial applications. Today, WaterSurplus continues to develop and commercialize intellectual property and offers unique water treatment solutions across industries and around the world.

WaterSurplus has done business in India for several years and we are making a push to significantly increase our presence in the Indian market. We are looking for water treatment professionals with knowledge of their local markets who can take advantage of our inventory and assistance to better serve the needs of their customers. We are also looking for end users and municipal (governmental) agencies who can benefit equally from our offerings.

WaterSurplus is headquartered in Loves Park, Illinois.

Tamilnadu Water Treatment Equipment Sellers Association - TWTESA

The association of TAMILNADU WATER TREATMENT EQUIPMENT SELLERS ASSOCIATION- TWTESA is formally established in 2016 in Chennai with 9 members who all are from through over TAMILNADU. The prime objective of the association is to promote and encourage the WATER Industry field by providing individual motivation, supportive confidence, technical seminars and marketing seminars to association members. Bring the Quality Products and Quality Technician to the field is a main achievement of the association. And also the member's life will be secured by necessary insurance and need full activities. Through over Tamilnadu the retailers of the RO Industry will take together and make a good network with them for easy communication about field knowledge and also to solve their legal issues by association with their unity.

Toshio Technology Private Limited

At Toshio, we strive to be the industry leader in wastewater pumps and equipment segment. Company offers complete pumping solution for sewage, effluent and dewatering applications. Products are designed to operate in tough conditions to pump water with solid particles.

With decade of experience, Toshio specializes in non-clog submersible pumps manufacturing, service and continues to invest in the fluid dynamic design, motor efficiency enhancement and R&D of various metal alloys. Toshio follows stringent quality standards to ensure uniformly high quality products.

The success of Toshio brand has been based on unyielding commitment and attitude to technical excellence and unparalleled dedication to customer service. Our honesty and integrity have further contributed dedicated to a long term sustainable relationship with all our customers.

Toshio creates and fabricates stainless steel radial pumps and weight boosting frameworks for applications including drinking and process water. With regards to pressure driven productivity, unwavering quality and quality, our pumps and frameworks are among the best on the planet.

Vasthi Instruments Private Limited

VASTHI INSTRUMENTS PRIVATE LIMITED company which deals in the business in our major products like Water Quality Analyzers, Stack Emission monitoring system, CEMS, Gas analyzers & Detectors, Dew point meters and Air Quality Monitoring Systems & etc... It is one of the most leading manufacturing company and service provider in all over INDIA. We are the manufacturer of high -tech environmental monitoring equipment, analytical instruments, industrial process and industrial safety products. We have integrated fields including microelectronics, tele communication, software, electrical and electrical engineering and other area of technology. We trade with many corporate customers, including domestic and foreign also.

VASTHI in a very short span has become one of the most leading company which we supplied with very higher corporate companies. We have the following products for Water quality monitoring systems.

1. Online COD Analyzer
2. Online BOD Analyzer
3. Online TSS Analyzer
4. Online PH & ORP Analyzer
5. Online COD,BOD,TSS,ORP & PH Analyzer for ETP & STP analyzer'
6. Ammonia-Nitrogen water quality online Automatic Analyzer

Water Quality Association (WQA)

The Water Quality Association (WQA) is a not-for-profit association for the residential commercial, and industrial water treatment industry. WQA represents more than 2,500 member companies around the globe. Our membership is comprised of equipment manufacturers, suppliers, dealers and distributors of water quality improvement products and services. WQA proudly serves as an educator of water treatment professionals, certifier of water treatment products, public information resource and voice of the water quality improvement industry.

About WQA Product Certification
Certified Products Have a "Leg Up" in the Marketplace

Finding quality products in a marketplace flooded with options can be challenging. How can you tell if a product is safe, reliable, durable and capable of meeting the claims made on its packaging and literature? WQA's Certified Product Listings are available to help connect consumers with water treatment products that have been tested and certified to industry standards. WQA's Gold Seal Product Certification Program ensures that the product is constructed or formulated from safe materials, the claims listed on the packaging are backed by test data, and the product will hold up under normal usage conditions.

WQA maintains a complete listing of all products and components that have earned the Gold Seal and Sustainability Marks. Only products that pass the rigorous testing requirements of industry standards, pass annual manufacturing facility audits, and comply with WQA's Certification Schemes can be found in this listing For Further information about ANSI/ NSF standards or Membership in different countries around the world contact :

CHENNAI CHLORO SYSTEM

CHENNAI CHLORO SYSTEM is one of the leading manufacturers of gas Chlorination system, Chlorine Evaporator Systems (Electrically Heated). Comprehensive Chlorine Tonner Leak Absorption / Neutralization System and Chlorine Safety Equipment in India. Chlorinator is a device to provide a continuous and constant supply supply of metered Chlorine in the safest possible manner. Chlorinator find application in Drinking Water, Cooling Water Waste Water Treatment, Chemicals & Fertilizers, Refineries, Petrochemicals, Sugar, Steel, Textile & Paper Pulp Industries, Pharmaceutical Formulation Aquaculture Units, Pesticides & Food Industries, Corporations & Water Boards and other industrial Applications. Gas Chlorination Systems is Classified into two types namely Vacuum-feed Type and Gravity-feed Type of Gas Chlorination Systems with capacities ranging form 100 Gms/hr to 200 Kgs/hr can be provided. Depending upon the client's requirements, the mode of operation gas chlorinator is Automatic and Semi Automatic can be also provided.

- Vacuum Feed Type Chlorination System - Frame Mounted / Floor Mounted / Wall Mounted / Cylinder / Tonner Mounted.
- Gravity Feed Type Chlorination system.

Frame Mounted Vacuum Feed Gas Chlorinator

Floor Mounted Vacuum Feed Gas Chlorinator

Wall Mounted Gas Chlorinator

Tonner Mounted Gas Chlorinator

Electrical Heated Chlorine Evaporator

Chlorine Leak Absorption System

FRP Hood for Chlorine Tonner

Water World

The company was formed as a proprietary concern by Mr. B. Ali Akbar in September 1999 to produce & supply of purified packaged drinking water under the brand “Fresh Water” with “Reverse Osmosis” process at Puduvoil, before Gummidipoondi, on NH5 just 40km away from Chennai City registered with FSSAI & BIS and Member of CII (Confederation of Indian Industry). It has also been registered under MSME development Act, 2006. Mr. Ali Akbar is a well-known industrialist and the Managing Director of Madras Hardtools Private Limited, a company in existence for about a half century. He is also a member of various notorious clubs like Chennai Cosmopolitan, Gymkhana, Boat Club, Chennai Cricket Club, First City Club, Country Club, Alumni Club (Anna University), Lovedable Club, Hindustan Chamber of Commerce and Andhra Chamber of Commerce.

Installed Capacity: The installed capacity of the plant is 2,40,000 liters per day and is presently producing 1,20,000 litres per day. The company is selling 20 ltrs, 12 ltrs, 2 ltrs, 1 ltr, 500ml and 300 ml bottles. A full-fledged QC lab has been set up with all modern facilities to test quality of water.

Process: The Water purification is effected by a state-of-art ‘Reverse Osmosis’ process which is one of the best methods in the industry today and which is acclaimed by the IBWA (International Bottled Water Association) as a method that can “remove most chemical and microbiological contaminants”.

The Technical Team: Mr. Prabash Pathi who is Plant in-charge has been in Water processing and purifying industry for more than 15 years with rich experience gained in this field. He is being assisted by two micro biologists, two lab assistants, two plant operators and 20 workers.

Xylem, Inc.

Xylem is a leading water technology company committed to “solving water” by creating innovative and smart technology solutions to meet the world’s water, wastewater and energy needs.

In a world of ever-growing challenges, Xylem delivers innovative water technology solutions throughout the cycle of water. Our technological strength across the life cycle of water is second-to-none. From collection and distribution to reuse and return to nature, our highly efficient water technologies, industrial pumps and application solutions not only use less energy and reduce life-cycle costs, but also promote sustainability.

Our Products and Services: Xylem offers a portfolio of products and systems designed to effectively meet the demands and challenges of transporting, treating, testing water and wastewater. From pumps to smarter aeration to advanced filtration to chemical-free disinfection to monitoring & control solutions, Xylem’s experts evaluate the varying needs of customers and help them find the right solutions for their application. Through the brands that have been trusted for decades, Xylem offers hundreds of solutions backed by a comprehensive, integrated portfolio of services designed to ensure that water and wastewater equipment keeps running at its best.

Xylem is headquartered in Rye Brook, New York.

Yaha Water Systems Private Ltd

YAHA Water Systems provides comprehensive solutions for Water and Waste Water Treatment, Sea/River Water Intake & Distribution Systems, Industrial Cooling Water and Process Water Treatment.

We pride ourselves on having an average experience of 45+ years in Conceptualising, Designing, Integrating and Delivering Sustainable, Customer-Centric Water Engineering Solutions. Cooling Water System, Drinking Water Plants, Intake Water Systems and Under Drain Systems for Rapid Gravity Filters are the water filter systems we supply to our customers.

Efficient, reliable and sustainable engineered solutions to enable recycle and reuse of water is our forte. Use of promising technology coupled with state-of-the-art equipment and products provides a level of quality standards that are high in performance and reliability. Safe drinking water for homes and communities, industrial waste water treatment, water treatment to meet quality requirements for any industry process, recycling and recovering water for reuse, reducing waste and pollution and protecting the environment by crafting products that pioneer the 'Recycling and Reuse' of water are few of the processes that Yaha Water Systems excels at. Water is a precious commodity and several steps need to be taken to save water. At Yaha Water Systems we are encouraged by the thought of recycling and reusing water and have therefore created systems that ensure the same.

Zero Mass Water

Zero Mass Water's SOURCE Hydropanels are a proprietary technology that produces high quality drinking water from only sunlight and air.

SOURCE Hydropanels are a category-defining technology that can produce water in climates ranging from arid desert to tropical rainforest by combining highly adsorbent hygroscopic material with solar thermal and PV technologies. SOURCE Hydropanels are the only available air-to-water technology that can operate completely off-grid and that can produce water from air with as little as 10% Relative Humidity.

We are currently looking for commercial and government partnerships to execute and deliver largescale drinking-water projects in India, particularly where:

- Water scarcity and contamination creates challenges for rural and peri-urban communities that cannot be solved by traditional water infrastructure.
- Commercial entities require a sustainable and renewable alternative to bottled water.

Zero Mass Water is headquartered in Scottsdale, Arizona.

Microscience

Microscience in the Waste Water Management: Microscience was established 15 years ago after having experience of handling analytical instrumentations dealt with reputed imported instruments catering to the Research Institutes, Universities and Industries but to the recognition of the environmental challenges faced by various industries Microscience became specialized to deal with Process and monitoring equipment's both online & offline systems, In addition Microscience has a team of technicians to treat waste water generated in the Industries, hotels, hostels etc., and successfully running STP'S WTP'S Etc., Our Products: Hach Co USA., Spectrophotometer, BOD Track, COD Systems, Turbidity Meters, DO Meters, PH/TDS/COND ETC.,

MICROSCIENCE in the Solid Waste Management: Microscience along with an Excel Industries from Mumbai, which is a long-standing pioneer in the field of Municipal Solid Waste Management in India. Over a span of 25 years we have developed and perfected a cost-effective and efficient method for the treatment and processing of municipal solid waste. Comprising of a mix of innovative, products processes and proprietary equipment, our systems are extremely effective for waste management of various capacities.

Applications: Proper treatment of Organic Waste using Bioculum converts it into a rich source of stable organic manure that can be used as a Bio Organic enricher.

Bioculum is suitable for treating and composting all kinds of organic wastes generated by:Hotels, Canteens, Restaurants, Slaughterhouses Municipalities, Food Processing Units, Households, Agriculture Operation etc., Turn your Garbage into Bio Manure in 10 days & 2 days

Our Products: ORGANIC WASTE CONVERTER, OWC-30, 60,130,300 & 500 Bioneer: 50,100,200,300&400 Single & Dual Shredder Machines

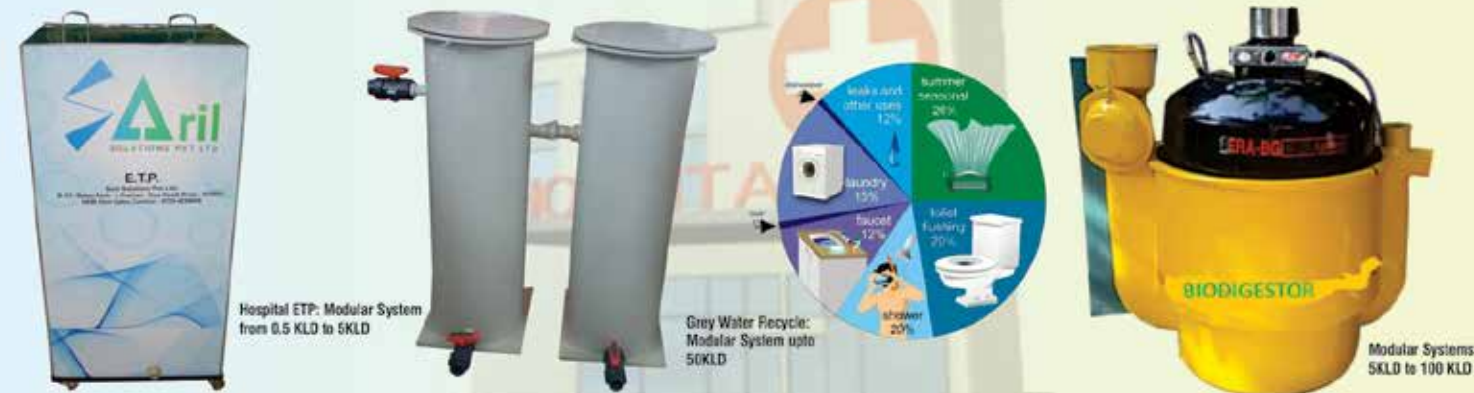

Address: 281-9th Etn, Gandhipuram, Coimbatore-641 012

KAMAKSHI CONSULTANCY
Plumbing & Fire Fighting Consultants

We Design for the

- Drainage System
- Water Supply System
- Rainwater Harvesting System
- Hot Water Supply & Return System
- Water Treatment Systems

For the Following Buildings:

- Factory Building,
- Schools & colleges,
- Hospitals,
- Theaters, Mall Complexes,
- Residential High Rise Buildings,
- Town Ship Projects,
- Resorts etc.

We Support The Client In The Cost Estimation, Fixing The Contractor And Technical Support During Execution At Site.

Will Prepare The Tender Documents & Bill Of Quantities And Technical Specifications And Support The Client For The Entire Plumbing & Fire Fighting Works.

Rootech Services

- Manufacturer Of Rootech Roots Blowers & Roots Pumps
- Rootech Is The Right Solution For Roots Blowers & Roots Pumps
- Indepth Subject Knowledge & Strong Hold On Product Technology
- Believe In Delivering User Friendly Product
- Prompt Pre & Post Customer Care /support
- Experienced Team Is Ready To Assist You For Any Query Subject To Roots Blowers & Roots Pumps
- 100% Dry Air 10 M3 To 10000 M3/hr Working Pressure: 0.6 Kg/cm2 (air Cooled) Ultimate Pressure: 1.0 Kg/cm2
- 100% Dry Air For Aquaculture Application
(Our Aqua design blowers rated for continuous operation 24x7. Oil & Grease chambers separated from air chamber so that in case of oil seal failure, oil will not mix with air chamber and in result no mortality loss to prawn seeds and prawns)
- Roots pumps 100%-dry pumping & vacuum up to .001 torr with back up pump

AQUA-XL Water Analysing Kits

- Easy to use
- Analysis based on standard methods.
- Saves time
- Reliable & accurate
- Cost effective
- Portable & User friendly

Our Various Parameters

▲ Total Hardness	▲ Tannin	▲ Copper
▲ Calcium Hardness	▲ Chromate	▲ Fluoride
▲ Acidity Hardness	▲ Zinc	▲ Total Iron/Hydrazine
▲ Sulphite	▲ Iodine	▲ Molybdate
▲ Alkalinity	▲ Ozone & PH	▲ Chromium
▲ Nitrite	▲ Hydrogen Sulphide	▲ Ammonia
▲ Chloride	▲ Formaldehyde	▲ OAC
▲ Free Chlorine	▲ Soluble Iron	▲ COD
▲ Dissolved Oxygen	▲ Bromine	▲ Sulphate
▲ Hydrogen Peroxide	▲ Phosphate	▲ Chlorine
▲ Amine	▲ Silica	▲ Chlorine Dioxide
▲ Carbon Dioxide	▲ Nitrate	▲ Phosphorate

- All Water Treatment Plans & Equipment's
- All Water Treatment Chemicals
- All Filter Media
- Pebbles
- Silix
- Green Sand
- Anthoxide
- Mno2
- Activated Corban
- Facilities Chemicals

AM Ozonics Pvt Ltd

Ozone Generator using world class Technology with inhouse R&D and Testing facility from AM Ozonics Pvt Ltd.

Features:

- Most advanced technology used worldwide.
- IP – 55 rated to work in moist and dusty environment
- Enclosed electrode to prevent sparking and ozone leakage
- High barrier quartz dielectric used to give higher electrode life
- SS 316L electrode housing gives consistent high ozone output.
- Oil immersed high voltage transformer for zero breakdowns
- ELCB protection with optional LOTO facility.
- Ozone contactor & mixing systems.
- Advanced oxidation system also provided
- Resonance inverter technology using latest IGBT to give high ozone concentration at low power requirements.
- Protection provided : Sparking protection, Over temperature protection, Cooling water failure protection, Oxygen flow failure protection.
- Optional accessories: Dissolved ozone sensor, Ambient Ozone leak detection system, Ozone analyser, Ozone destructor.

DESIGNED, MANUFACTURED AND SERVICED BY AM OZONICS PVT LTD
Head Office: 321, Hammersmith Industrial Estate, off Sitaladevi Temple Road, Mahim (West) Mumbai - 400 016.

Editor's Note

Welcome to Water Expo 2020,

The world is experiencing dramatic changes. Global warming, the accelerated growth of the world population and scarcity of water and energy resources are all contributing to the growing need for immediate and sustainable solutions.

The conservation and judicious use of water, a precious and integral element, stands at the heart of these solutions. Every active industry, including the energy industry, is in need of advanced water technologies to power tomorrow's solutions.

The answer lies in smart management of resources including comprehensive information gathering, data analysis and the providing of rapid responses that are precise, reliable and economical. During Water Expo 2020, we will examine some of the challenges and special benefits unique to the realm of investments in water solutions. We'll also take a look at some new business models that can connect brilliant ideas to available funding.

I look forward to spending time with you at Water Expo 2020, where you will have the opportunity to meet innovative entrepreneurs, local and international investors and government officials. Additionally, we will brainstorm solutions to current challenges and plan cooperative ventures for the future.

Water Today's Water Expo 2020 serves as a full-service help center for international investors interested in investigating direct investment and joint ventures in India. The Expo provides as a platform to potential investors and serves as a resource for investment related information.
