## Product Range

Universal Spare Parts & Repair Solutions

## Quality by tradition - "Leading through innovation"

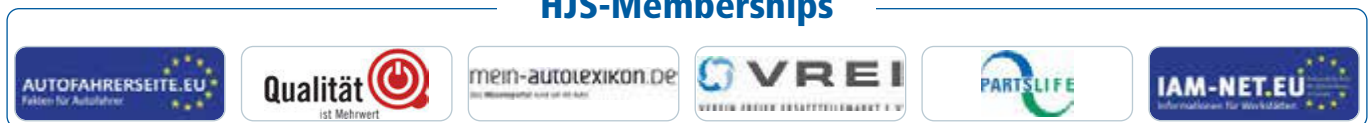

Any exhaust system is only as good as the weakest joint or fixture that holds it together. This is why the wholesale trade and garages which want to provide a quality service have been putting their trust into HJS assembly equipment for a long time. Every new development and upgrade takes into account the requirements workshops might have. Behind each and every part – no matter how small – is more than 30 years of experience and the entire scope of our HJS expertise, resulting in the best quality products available.

ist Mehrwert

### The perfect combination

- ✓ OE-quality standards in terms of product design and materials
- ✓ 3-year warranty
- ✓ Specifications according to vehicle manufacturer
- ✓ Easy assembly and rapid handling
- ✓ Great accuracy of fit
- ✓ Great workmanship, reliability and durability

### HJS-Memberships

# Stainless Steel Bellows

**HJS-interFLEX\***  
The better Flex Element!

- ✓ improved quality
- ✓ completely made from high grade stainless steel
- ✓ improves exhaust gas flow
- ✓ high durability due to exact matched components
- ✓ heat resistant even at extreme high temperatures
- ✓ 3 year warranty

Normal smooth wall flow with **interFLEX** (with inliner).  
low turbulence = low back pressure  
(only 1,6 mbar pressure loss at full load)

High turbulence due to exposed bellows (**without inliner**).  
high turbulence = high back pressure  
(8 mbar pressure loss at full load)

Common fault with **inner braid**:

Restriction due to damaged inner wire branding.

\*product launch March 2017

\* Tolerance can vary within +- 3 mm

The automotive industry is increasingly recognising the overwhelming advantages of installing highly flexible decoupling elements in exhaust systems. The great degree of flexibility they offer is the result of an optimum relationship between the wall thickness and the overall length of the coupling. Design and dimensioning are targeted not only at durability, but also comfort, (noise levels).

Use of the new SoftFlex bellows is not restricted to any specific automotive manufacturer but are suitable for installation in any type of vehicle. Put simply, it's never a good idea to replace "soft" flexible components with "solid" ones (and vice versa), because this would greatly, and most probably impermissibly, alter the performance of the exhaust system as a whole. SoftFlex bellows can be instantly recognised by the modified structure of their mesh (see photos).

When repairs become necessary, there's now a reliable and affordable alternative to replacing the entire catalytic converter.

**For easy installation:  
SoftFlex Bellows with Tubes  
one-sided & two-sided**

**Put your trust in HJS's SoftFlex bellows and benefit from our many years of experience in the business.**

- ✓ High-flexibility decoupling
- ✓ Compensation of thermal expansion
- ✓ Vibration damping/noise reduction
- ✓ Excellent gas tightness
- ✓ Corrosion resistance
- ✓ 3-year warranty

## Universal Bellows, flared Fitting

HJS-No.	Model	Remarks
83 00 8307	universal	Ø 54,5 mm x L 130mm
83 00 8308	universal	Ø 45,5 mm x L 127mm
83 00 8582	universal	Ø 60,5 mm x L 70 mm (e.g. Jaguar S-Type)

# Connection Pipes & Stepped Connection Pipes

## Small fault - huge impact

Incorrect tightening torques and inadequate mating surfaces frequently result in leaks, which in turn lead among other things to higher noise levels in the exhaust system. If necessary specifications/data are not adhered to, then this can lead to irreparable damage.

**1**  
Overlapping clamp ends ensure excellent gas tightness.  
For connection pipes larger  $\varnothing$  50 mm  
(see chart connection pipes, NOT for type B)

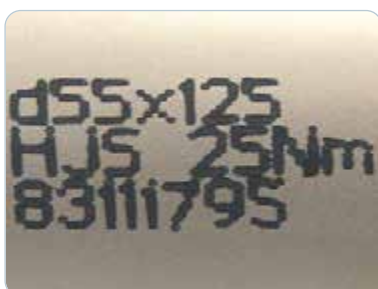

**4**  
Double wall, high performances  
Stainless Steel Pipes

**2**  
Reinforcing beads guarantee high dimensional stability and good clamping.  
(NOT for type B)

**5**  
Fixed Clamps, for a perfect application

**3**  
Unambiguous assignment ensured by markings  
✓ Diameter and length  
✓ Tightening torque (Nm)  
✓ Part number

# Universal Clamps

## Quality that stands the test

- 1 Optimised connection fit thanks to a optimised carriage bolt head
- 2 Overlapping clamp ends ( $\varnothing$  51,5 / 55,5 bis 68,5 mm)
- 3 Use of hardened washers
- 4 Strength of shape thanks to extra beads

The details make the difference:

Lock washer squeezed out and destroyed; that can't happen with a standard washer

Bolt thread damaged due to inadequately dimensioned design

Bolt hole damaged and clamp ends deformed due to lack of beads

## Clamps Type VAG, galvanised

## Catalytic Converter / DPF® / Silencer Repair Pipes

### Is the mounting bracket or flex pipe from the catalytic converter/DPF® damaged?

Even though the catalytic converter / DPF® / silencer is still intact, the whole unit usually needs to be replaced when just the inlet or outlet pipe is damaged. With the repair pipe solutions from HJS, you can repair the exhaust system quickly and easily at a low price.

Example: BMW flex pipe from the catalytic converter/DPF® damaged

The HJS solution:

BMW repair pipe **HJS-No. 83 00 8325**

Example : Chevrolet flex pipe from the exhaust system damaged

The HJS solution :

Chevrolet repair pipe **HJS-No. 91 40 0077**

### The clever alternative

- ✓ including mounting parts (not included in weld-in versions)
- ✓ exact fit
- ✓ long durability / stainless steel
- ✓ 3-years warranty

# EGR\* Repair Pipe Honda (\*Exhaust Gas Return)

## Bellow pipe from EGR-Rohr damaged?

Don't bother replacing the whole EGR pipe!:

Simply replace the damaged bellow pipe with the weld-in solution from HJS!

Bellow pipe cracked

**INSTALLATION INFORMATION:** Product pictured from inlet side

## The clever Alternative

- ✓ additional heat shielding of the bellows for more durability
- ✓ load distribution over 50% more bellows

**HJS-No. 91 43 0000**

Suitable for OE-No.:  
**18725-RL0-G02**

**NEW**

Is the flange from the catalytic converter or exhaust system broken?  
HJS offers the **economical solutions!**

Picture shows flange connection from a BMW 530 i

Simply replace the rusted and damaged series flange with **the** new innovative repair solution **without** removing any exhaust component. The catalytic converter, silencer and intermediate pipes don't need to be replaced!

**Universally** versatile for all exhaust systems with **50 mm Ø-tubes** and loose flange!

- ✓ Saves removing or replacing the catalytic converter, silencer or intermediate pipe.
- ✓ Complete repair kit including fastening material
- ✓ Quick and easy installation

# 2-piece Flange BMW

# Repair Flange for VAG Catalytic Converters

**HJS-No. 82 11 4300**

for Exhaust pipe 91 11 1606

Suitable for OE-No.:  
1J0.254.301 C

Manufacturer Model	Type	Engine code	HSN/TSN	Disp. (l)	kW	Year of constr.	for Reference
<b>Seat</b>							
Leon I 1.4	1M	BCA	7593/475/ABO	1,4	55	01/02 - 10/05	91 11 1606
Toledo II 1.4	1M	BCA	7593/439/ABG	1,4	55	01/02 - 10/05	91 11 1606
<b>Skoda</b>							
Octavia I 1.4	1U	BCA	8004/351/352/AAU/ ABG/ABP/AHJ	1,4	55	01/02 - 12/10	91 11 1606
<b>VW</b>							
Golf IV 1.4	1J	BCA	0603/419/488	1,4	55	03/02 - 06/06	91 11 1606
Bora 1.4	1J	BCA	0603/470/480	1,4	55	03/02 - 05/05	91 11 1606

You need the repair flange 82 11 4300 when replacing the OE part with the HJS exhaust pipe 91 11 1606.

# Repair Flange for VAG Catalytic Converters

**HJS-No. 82 11 4300**

for Exhaust pipe 91 11 1607

Suitable for OE-No.:  
**1J0.254.300 P**

Manufacturer Model	Type	Engine code	HSN/TSN	Disp. (l)	kW	Year of constr.	for Reference

## Flared Pipe Connectors for French Vehicles

### Cost-efficient OE repair solution

- ✓ Saves replacing the centre or rear silencer
- ✓ Universal repair kit, incl. V-Shape or 2-Piece Pipe Clamps
- ✓ Quick and simple to fit
- ✓ 3-year warranty

Although the centre and rear silencers are intact, corrosion is frequently found in the area of the joints. Flared Pipe Connectors from HJS enable the exhaust system to be repaired quickly and cost-effectively to restore full functionality.

# Flared Pipe Connectors for French Vehicles

## Pipe Connectors with V-Shape Clamp

HJS-No.	Inside-/Outside-Ø	Length

## Rusted mounting bracket – Vehicle inspection failed!

TÜV considers rusted and broken exhaust mounting brackets a major fault and requires repair along with another vehicle inspection. This causes considerable additional costs, especially when the catalytic converter or silencer needs to be replaced.

## HJS offers a low-cost OE repair solution

You can simply replace the faulty series mounting bracket with the new innovative HJS repair solution. The catalytic converter and exhaust system do not need to be replaced.

- ✓ Saves replacement of the catalytic converter, intermediate pipe, centre- and rear silencers
- ✓ Complete repair kit including rubber mounts
- ✓ Fast and easy assembly

## OE-Repair Solutions for Mercedes-Benz vehicle

HJS replaces the faulty series mounting bracket with the new innovative repair solution.

- ✓ Saves the replacement of the catalytic converter and/or silencer system
- ✓ Complete repair set including fitting materials and rubber mounts
- ✓ Quick and easy installation

## OE-Repair Solution VAG

Is the mounting bracket of the muffler or the intermediate pipes broken?  
HJS now offers a **quick and easy** replacement solution!

You can replace the broken series bracket with the HJS replacement solution.

- ✓ Cost-effective repair solution for high quality exhaust systems
- ✓ Complete repair kit including rubber-metal parts
- ✓ Quick and easy installation

HJS-No. 82 11 4317

## Heat Shield

A 0.5 mm thick aluminum sheet serves as a carrier material and gives the heat shield the necessary stability for the mounting on the vehicle undercarriage.

The heat shield contains a 2.0 mm thick Aluminum-Keravlies-material which is heat resistant up to 1,000 °C.

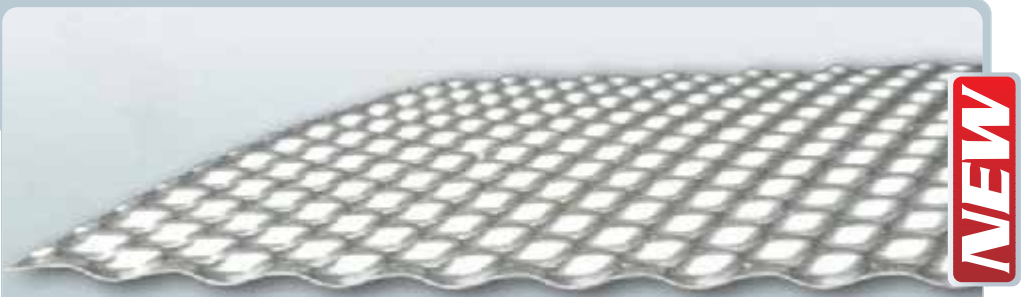

HJS-No.	Description	Thickness	W x L
90 60 3150	Heat Shield	2,5 mm	330 x 330 mm
90 60 3151	Heat Shield	2,5 mm	330 x 500 mm
90 60 3152	Heat Shield	2,5 mm	330 x 660 mm

## Stainless Steel Heat Shield without Insulation

Protection for insulation material on exhaust pipes, catalytic converters, turbo chargers and silencers

also for universal applications

HJS-No.	Description	Thickness	W x L
83 00 0015	Material: 1.4828; formable	0,1 mm	250 x 500 mm
83 00 0035	Material: 1.4828; formable	0,1 mm	500 x 500 mm
83 00 0030	Material: 1.4828; formable	0,1 mm	500 x 1000 mm
83 00 0040	Material: 1.4828; formable	0,1 mm	1000 x 1000 mm

## Stainless Steel Heat Shield with Insulation

Protection for insulation material on exhaust pipes, catalytic converters, turbo chargers and silencers

Including 5 mm thick insulation material, heat resistant up to 1000°C

Self adhesive (single side)

also for universal applications

HJS-No.	Description	Thickness	W x L
83 00 0020	Material: 1.4828; formable	0,1 mm / 5 mm	250 x 500 mm
83 00 0025	Material: 1.4828; formable	0,1 mm / 5 mm	500 x 500 mm

# EPDM Rubber Mountings Display and Storage Boards for German models

## The proven range of Rubber Mountings

HJS's range of Rubber Mountings for high-volume German models is presented clearly on a Wall Board equipped with guide cards. This means the parts are readily to hand whenever you need them.

### EPDM – for heavy duty use

- ✓ High temperature- and ageing resistance
- ✓ Excellent weather durability
- ✓ High UV- and ozone stability
- ✓ Low abrasion
- ✓ Heat and chemical resistance

### Often invisible when fitted – but highly effective!

# DPF<sup>®</sup> Connecting Hoses

## Universal Repair Kits DPF<sup>®</sup> Connecting Hoses

### Fault message: Diesel particulate filter

When the DPF<sup>®</sup> indicator lamp on the dashboard lights up, it doesn't always mean that the diesel particulate filter needs to be replaced immediately. Unfortunately, a frequent reason for premature visits to the workshop is that a marten – a type of weasel – has bitten into the connecting hoses between the DPF<sup>®</sup> and the differential pressure sensor. This problem is growing, because the high-temperature-resistant silicone hoses are at the top of these rodents' favourite-foods list. What makes this even more annoying is the fact that a number of vehicle manufacturers demand a ridiculously high price for their replacement hoses or offer them only in connection with pressure sensors.

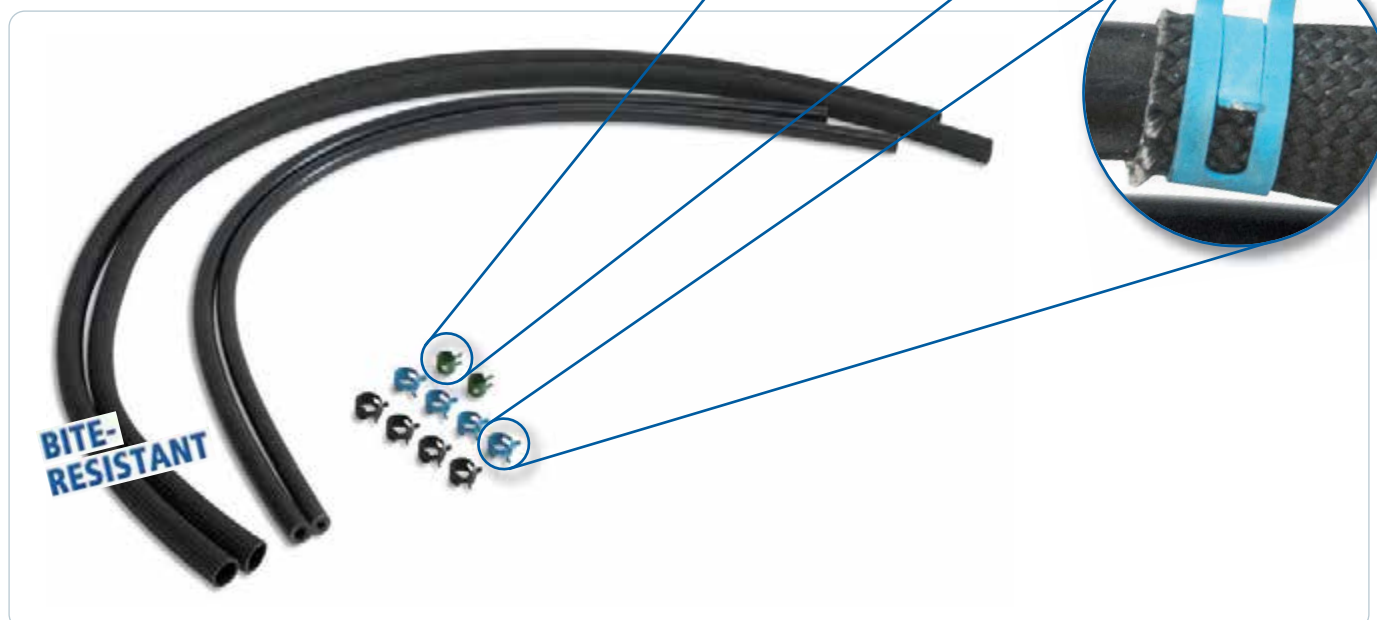

### The repair solution from HJS

All new repair kits from HJS contain two high-temperature-resistant silicone hoses, each of which are one metre long and have a diameter of 5 and 6.5 mm respectively. These are the diameters used by almost all vehicle manufacturers for the hoses that connect the DPF<sup>®</sup> and the differential pressure sensor. The high silicone content of our hoses means that they can be bent to pass through very tight bends and can therefore also be used in place of preformed hoses.

The hoses are made of high-quality, high-temperature-resistant silicone so that they will withstand the high temperatures that build up in the vicinity of the diesel particulate filter.

To provide reliable protection for the replaced silicone hoses against further bites by rodents, two additional, bite-resistant antirodent hoses are included with each kit. These have been developed specifically for this purpose and have been approved by the automotive industry.

The scope of these kits is completed by hose clamps, in order to ensure that the hoses are installed and secured properly between the DPF<sup>®</sup> and the differential pressure sensor.

## Repair kit – Connecting hoses

### HJS-No. 92 09 0001

Universal Repair Kit  
DPF® Connecting Hoses

Components also separately  
available!

#### HJS-No. 92 09 0051\*

Silicone hose ø 5 mm, L = 1 m

#### HJS-No. 92 09 0061\*

Silicone hose ø 6,5 mm, L = 1 m

\*See page 162

#### HJS-No. 92 09 0071

Anti-rodent hose  
ø 13 mm, L = 1 m

#### HJS-No. 92 09 0081

Anti-rodent hose  
ø 14 mm, L = 1 m

#### HJS-No. 92 10 1000\*

Hose clamps, each 10 pieces

\*See page 163

**Contents:** High-temperature-resistant silicone hose, 5 mm dia., 1 m long  
High-temperature-resistant silicone hose, 6.5 mm dia., 1 m long  
Anti-rodent hose (13/14 mm dia.), 2 x 1 m for both silicone hoses  
Hose clamps, 10 pieces

The anti-weasel-hosing is temperature resistant up to +350°C  
(-40°C till +250°C, short term +350°C)

The silicon hosing is temperature resistant up to +300°C  
(Constant temperatures +180°C to +300°C)

In order to prevent any kind of damage, it is necessary to shorten the DPF® connecting hoses to the length of the original OE part.

#### **Important!**

We recommend measuring the inner-Ø of the OE connecting hose!

10 Pieces, ø 11,0 - 12,5 mm (green)

10 Pieces, ø 12,5 - 14,0 mm (blue)

10 Pieces, ø 13,5 - 15,0 mm (black)

## Repair Kit DPF® Pressure line

### The new & cost-effective repair solution from HJS

Is the DPF® connecting tube rusted through, blocked or damaged? Is the DPF® threading damaged?

**That's no problem with the HJS DPF® connecting tube repair kit!**

Installation example:

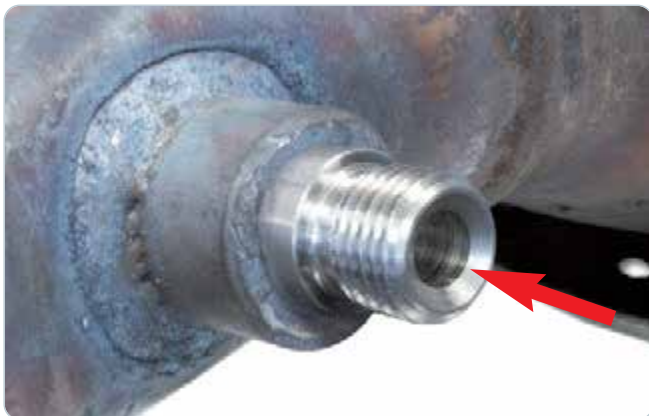

1. Remove or cut off the damaged connection tube from the DPF®.

2. Drill screwed connector to 16mm (max. 3 mm deep)  
Drill welded connector to 10mm (max. 3 mm deep)

**! Take necessary precautions that no metal splinters can enter the filter housing.**

3. Insert replacement connector.

4. Screw on connector tube and weld connector to the DPF®

5. Remove connector tube and bend according to original tube using adequate bending pliers. Attach connecting tube using the original mounting part.

- ✓ Saves replacing the OE Series DPF®
- ✓ Complete repair kit including rubber-metal parts

# Repair solution for temperature sensor connectors

## The new & cost-effective repair solution from HJS

The temperature sensor can't be removed?

Or has the threading been damaged?

**That's now not a problem with the new and low-cost temperature sensor connectors from HJS.**

Installation example of HJS part no. 92 10 2062 on a dismantled DPF® with seized temperature sensor:

1. Remove DPF® according to manufacturer's instructions.  
Cut off defective Temperature sensor (sensor tube).

2. Left: After removal of sensor line  
Right: Temperature sensor removed; Threading damaged

3. **Caution!**  
**Remove** centering bit before using  $\varnothing$  25mm hole saw

4. Cut out temperature sensor connection using a  $\varnothing$  25 mm hole saw **without** centering bit.  
**! Special precautions must be made, that no debris remains in the filter housing.**

5. Deburr drilled hole.  
Carefully remove any splinters from housing

6. Insert HJS repair connector and weld in.

# HJS – Your specialist for

- ✓ **Diesel particulate filters**  
For cars, vans, recreational vehicles, trucks and buses

- ✓ **Replacement diesel particulate filters**  
Standard replacement parts manufactured as always in line with "Original HJS Quality"

- ✓ **Catalytic converters**  
*bluEmission*®, upgrade and manifold catalysts

- ✓ **Mounting parts**  
Universal parts and repair solutions for exhaust systems

- ✓ **Exhaust pipes**  
Series-produced replacement pipes & repair pipes

- ✓ **Sensor technology and Accessories**  
Differential pressure, Temperature and MAP sensors,  
DPF® connecting hoses, Sensor repair connections, Pressure lines
