Watch Movies and Listen to Music with Wireless Headphones

The PLVWR1440 also has a built-in IR transmitter, which lets you watch movies with IR-compatible wireless headphones -- so everyone can enjoy the ride in peace and quiet.

A full-function wireless remote is included, so you can safely change channels and adjust settings without having to get out of your seat.

Multiple RCA Connectors Lets You Design Your System the Way You Want

The PLVWR1440 comes with one video input and a video and stereo output. The extra video input cable lets you use your in-dash DVD player to play movies through the PLVWR1440, so the entire vehicle can watch the same movie, while audio is played through the vehicle's speakers. You can also directly connect your player to the car's audio equipment using the audio output cables, and the video output cable

lets you hook up an extra monitor to the player.

More Convenient Features

Built-in Dual Dome Lighting

Whether you're travelling through a dark tunnel or on the road at night, the PLVWR1440's powerful dome lights help you find and load movies easily with just a click of the button.

Swivel Screen

The monitor swivels up to 45 degrees left and right, so you can adjust it to fit your viewing pleasure.

Built-in Monitor Controls

You can also tweak your monitor's display using the built-in monitor controls. Too much contrast? Not enough saturation? No problem! Just use the included full-function remote to wirelessly adjust your monitor's settings so you can get a picture that's perfect for you.

Find out how our RCA connectors work

WIRING

Read all wiring precautions. If you are not sure of the connections, contact your authorized dealer.

1. Disconnect the negative (-) lead of the battery before making any power connections.
2. When creating passage holes for the power wires, use grommets to eliminate any sharp edges created during drilling. This will protect the wire from being nicked and causing a short circuit.
3. When connecting the ground lead, fasten the ground lead (black) securely to a clean metal plate on the vehicle.
