

European Union September 2018

Phase out of halogen bulbs and candles

The process of gradual phase out of inefficient, energy-consuming electrical devices has been continuing in Europe for a few years already. Lighting is a part of it, and many halogen lamp types are gradually being phased out from the European market. However, not every type of halogen lamp is being banned from the European market at the same time.

The changes in EU lighting legislation are being implemented gradually, so that sufficient choice of energy saving alternative products is available.

What does it mean for **halogen products** from September 2018 onwards

On 1st September 2018, mains voltage halogen non-directional lamps (bulbs and candles) will not fulfil EU eco-design requirements.* This means that they can no longer be produced or imported for resale into the EU. Any remaining halogen bulbs and candles on commercial stock can still be sold out after this date.

* Stage 6 DIM1 (Commission Regulation (EU) 2015/1428 of 25 August 2015 amending Commission Regulation (EC) No 244/2009 with regard to ecodesign requirements for non-directional household lamps)

Is this a reason for concern? Absolutely not!

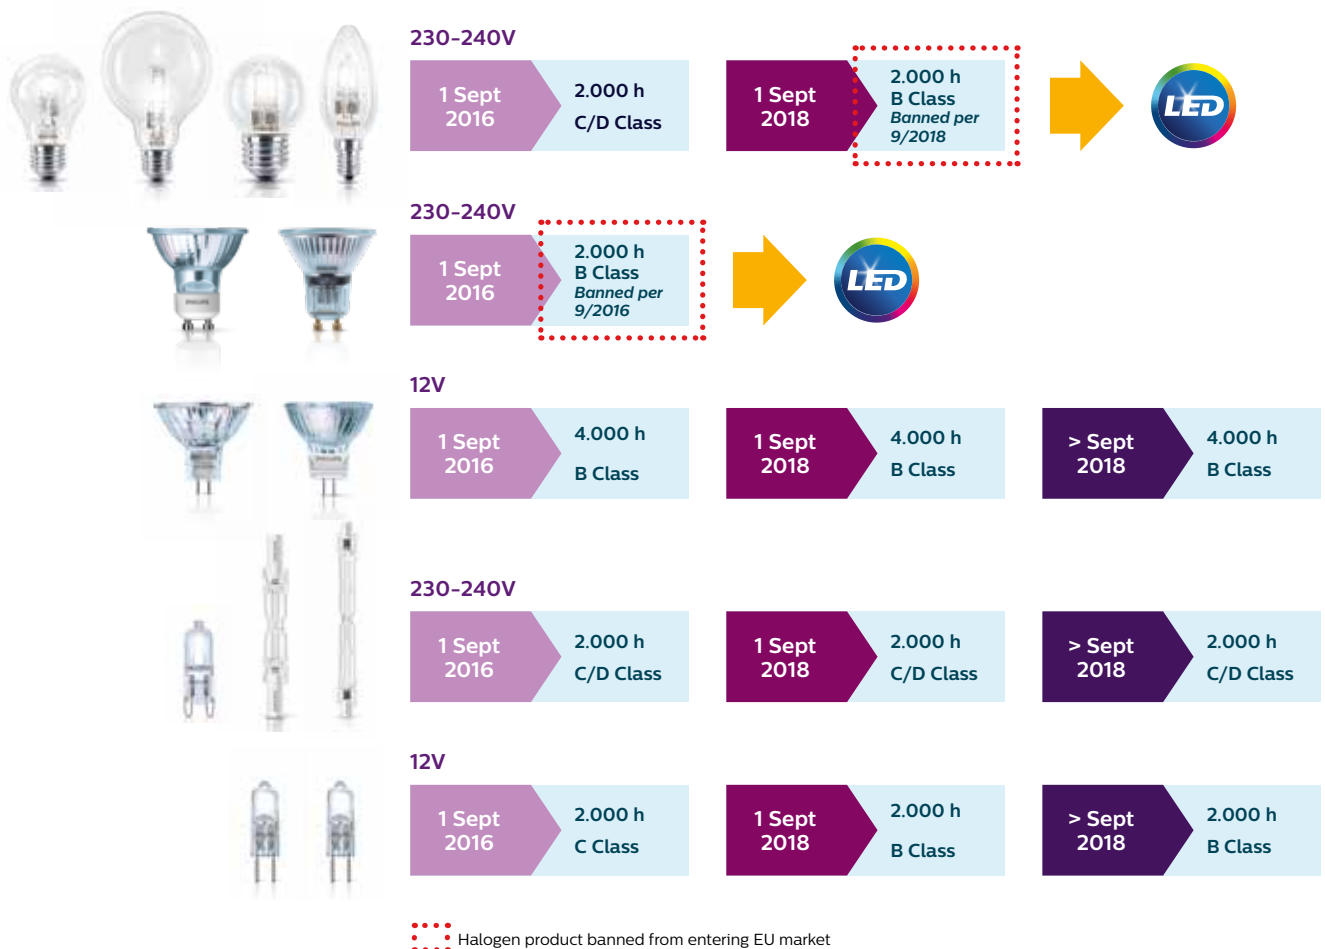

Philips offers a compelling range of LED alternatives to replace the banned 230–240 V halogen bulb and candle lamps. LED bulbs and candles come in a wide variety of shapes, finishes, colors and price points acceptable by local markets. Moreover, most LED bulbs and candles come in both a dimmable and non-dimmable version, and with a choice of packaging types.

In this leaflet you will find our recommended LED replacements for the halogen bulbs and candles.

Some types of halogen lamps: like capsules, linear, low voltage reflectors lamps - will still be available and can be sold in EU.

See also the overview below.

Legislation overview for Halogen lamps

All impacted lamps are being upgraded to comply

Below lamps are impacted by the third stage of the ErP legislation. Here you will find our recommended, efficient and cost-effective upgrades and / or LED replacements for the impacted lamps.
