### 1 Introduction

Frontier Silicon's UNDOK App is an application, for Android Smart Devices, that allows users to control Venice 6.5 - based audio units running, IR2.8 or later, software. Using UNDOK you can navigate between the speaker's listening modes, browse and play content remotely as well as manage Wi-Fi Multiroom groups of speakers.

The App also provides a convenient way to display RadioVIS content, on your connected Smart Device, for DAB/DAB+/FM digital radio units without a suitable display.

Connection is via a network (Ethernet and Wi-Fi) to the audio device being controlled.

#### Note: Control of Multiroom groups is not available via Ethernet.

The UNDOK App runs on any Android Smartphone or tablet running Android 2.2 or later. An Apple iOS version is also available.

Note: For brevity, "Smart Device" is used in this guide to mean any Smartphone or tablet running a suitable version of the Android operating system.

## 2 Getting Started

UNDOK can control an audio device via a WiFi Network connection. Before UNDOK can be used to control an audio device you must first establish a connection between the Smart Device running UNDOK and the audio unit(s) you wish to control by ensuring they are both connected to the same Wi-Fi network.

#### 2.1 Network Connection Setup

Ensure your smart device is connected to the required Wi-Fi network (see the documentation for your device for details). The audio devices to be controlled should also be set up to use the same Wi-Fi network. To connect your audio devices to the appropriate network either consult the documentation for your audio device or alternatively audio devices based on Frontier Silicon's Venice 6.5 module can be connected to your chosen network remotely via the UNDOK app. The 'Set up audio system' option on the UNDOK Navigation Menu walks you through the various setup stages via a series of screens. Once a stage is completed, to proceed to the next screen, swipe from right to left. Alternatively to go back a stage swipe from left to right.

You can abort the wizard at any stage by pressing the back button or exiting the App.

## 3 How to...

How to	Page number
To add or remove devices to/from a multi-room group	Page 7

## 4 **Operation**

This section describes the functionality available with UNDOK organized by the Navigation Menu options.

The primary navigation tool is the Navigation Menu that can be accessed at any time either by tapping on the i icon in the top right-hand corne

#### 4.1 Menu options:

The menu options and the functionality available are described in greater detail in the following sections.

		09:28 .ul 📚 🐻 🚍				
My Home	This is where you manage the speaker devices used to output the audio. Presents options for	IRDFMA 30589066bde4 📿 🐵

#### **5** Create Groups

To create a group	Create a group by tapping (a) the app will suggest a default name for the group which you can overwrite as required. Note: the group name can be up to 32 characters and contain letters, numbers, spaces and most characters available on a standard qwerty keyboard.	
To add devices to the group	Check the device to share with the main device After each change in the group structure, the My Home list info is refreshed.	
To refresh the screen	Tap the 💽 arrow circle in the header.	
To ungroup or remove a group	Tap the delete group button If the group is empty the group is deleted.	
To select a group	Tap on a group title to select the group.	SI

## 6 Now Playing Screen

Once an audio source has been selected, the now playing screen show details of the current track in the chosen audio mode. The display will vary dependent on the functionality available in the audio mode and the images and information associated with the audio file or broadcast currently playing.

		-
	Controlling a single audio device: the slider at the bottom of the screen adjusts the volume	10:24 대 ( 중 전 📟 ← Group 1 년 🚦
To control speaker	Tap the speaker icon on the left of the volume slide to mute the speaker (when muted the icon has a diagonal line through it).	SOURCE NOW PLAYING BROWSE

#### 10.2 Setup new speaker

The UNDOK speaker setup wizard helps configure a suitable audio device to connect to the user's Wi-Fi network. The wizard is accessible from the Navigation Menu and Settings screen.

A series of screens walks you through the various stages. To proceed to the next screen swipe from right to left. Alternatively to go back a stage swipe from left to right.

You can abort the wizard at any stage by pressing the back button or exiting the App.

Your audio device (in WPS or Connect mode) should appear under Suggested Audio Systems. Listed under Other will be available Wi-Fi networks as well as potential audio devices.

If your device does not appear in either list; check it is switched on and in the correct connection mode.

To rescan for potential devices/networks the Rescan option is available at the bottom of the Other list.
