

HP COMPAQ 8710W MOBILE WORKSTATION

POWER TO PERFORM.

Most powerful HP Mobile Workstation

HP recommends Windows Vista™ Business

Unprecedented mobile power and performance

The HP Compaq 8710w Mobile Workstation redefines power on the move by combining the visualization power of NVIDIA's next-generation graphics controller with the computational power of Intel[®] Core[™]2 Duo Processors² into a sleek 17-inch diagonal widescreen mobile workstation.

Contains highly graphic material

Workstation-class graphics provide full OpenGL and DirectX 10 support and are fully ISV-certified. When docked, Dual Link DVI support lets you run ultra-high resolution monitors in their native resolution. The HP Compaq 8710w also enables a true 64-bit computing environment with support for up to 4 GB of system memory.

Work in high definition

The optional Blu-ray DVD+/-RW SuperMulti DL drive³ lets you play and burn up to 50 GB of high-definition content on a single dual-layer Blu-ray disc, while the HDMI connector provides an easy way to connect to high-definition televisions and displays with one convenient cable (sold separately).

Top performance in the office and beyond

Intel® Centrino® Pro¹⁰ processor technology helps reduce the total cost of operating and managing your PCs with built-in remote manageability and proactive security. The HP Compaq 8710w also offers an integrated Media Reader, a full-sized keyboard with separate numeric keypad, and compatibility with HP Universal Accessories.

HP Professional Innovations help you focus on your business

Built to protect. An array of multi-layered, customizable security solutions help defend your network, your applications, and your data. The new Drive Encryption for HP ProtectTools encrypts all information on the hard drive volume so it becomes unreadable to an unauthorized person. Built to simplify. Boost your productivity while maximizing simplicity with features such as HP QuickLook. Quickly browse your email, calendars, and contact information with a touch of a button whether your PC is turned on or not. 14 Built to last. Reliable features such as HP DuraKeys, HP DuraFinish, magnesium alloy support structure, and HP 3D DriveGuard help your notebook go the distance.

HP recommends Windows Vista™ Business

1. Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwareregs.mspxT and www.microsoft.com/windowsvista/getready/capable.mspx for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor. 2. Dual Core is a new technology designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. 3. For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8 GB (for XP) and 10 GB (for Vista) of system disk is reserved for the system recovery software. 4. Do not copy copyright-protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. Double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately. Note that DVD-RAM cannot read or write to 2.6 GB Single Sided/5.2 GB Double Sided - Version 1.0 media. 5. Shared video memory (UMA) uses part of the total system memory for video performance. System memory dedicated to video performance is not available for other use by programs. 6. The specifications for the 802.11n WLAN are draft specifications and are not final. If the final specifications differ from the draft specifications, it may affect the ability of the notebook to communicate with other 802.11n WLAN devices. 7. Wireless access point required and is not included. Availability of public wireless access points limited. 8. The term "10/100/1000" or "Gigabit" Ethernet indicates compliance with IEEE standard 802.3ab for Gigabit Ethernet, and does not connote actual operating speed of 1 Gb/sec. For high speed transmission, connection to a Gigabit Ethernet server and network infrastructure is required. 9. HDMI cable sol separately. 10. Select models only. Some functionality of Intel Centrino Pro, such as Intel Active management technology and Intel Virtualization technology, requires additional 3rd party software. Availability of future "virtual appliances" applications is dependent on 3rd party software providers. Compatibility of this generation of Centrino Pro technology-based hardware with future "virtual appliances" and Microsoft Windows Vista operating system is to be determined. 11. TPM module disabled where not permitted by law. 12. Sold separately or purchased as an optional feature. 13. HP Fast Charge recharges your primary battery up to 90% within 90 minutes when the system is off. HP Fast Charge does not apply to 9 cell primary and 12 cell Ultra Capacity batteries. 14. Windows Vista models only. 15. Maximum memory capacities assume 64-bit operating systems. Microsoft® Windows® XP (32-bit) supports 4 GB (with Microsoft 32-bit, the amount of usable memory will be dependent upon your system configuration. It may be less than 4 GB); 32-bit Linux can support up to 8 GB.
