

Philips
Foot Control

Accessory

LFH 2210/2310/2330/2320

Experience ergonomics

The ergonomic design of the new Philips Foot Control range sets new standards in terms of usability in the professional dictation arena. The development is based on detailed research into the movements made during transcription. The requirements for usage have been incorporated into its design: because it inclines gently from the centre, the user can switch easily and smoothly between the various functions. Transcriptionists can stop and start dictations with only a slight movement of the heel, without lifting the foot unnecessarily, which both increases efficiency and makes the device a pleasure to work with.

Pathbreaking design

- Ergonomic design sets new standards in terms of professional usability and comfort
- Developed in cooperation with ergonomists and professional end users

Efficient handling

- Slim design for minimized physical strain due to less foot movement
- Anti-slip bottom elements keep the foot control in the right place

Advanced versatility

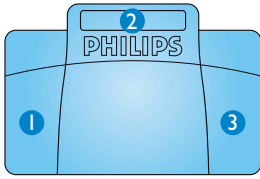

- Configurable pedal functions for tailoring the foot control to your personal preferences
- Four different models allow you to choose the device that fits best to your working habits

PHILIPS
sense and simplicity

Product highlights

Ergonomically designed

The new Foot Control range was developed in close cooperation with hospital ergonomists, and professional end users in order to guarantee a perfectly smooth transcription process with minimal physical strain.

Incorporates 30 years of experience

Philips Speech Processing has designed foot controls for more than 30 years. Based on this experience, as well as on customer requirements Philips has now created the world's most ergonomic foot control range for dictation and transcription systems.

Configurable to individual needs

The pedal functions of the Foot Control can easily be adapted to one's personal preferences to further facilitate the use of the device (for Foot Control 2330).

Benefit from easy setup and maintenance

The Foot Control is easy to deploy and configure. A silent setup option allows the easy installation of device drivers and the remote configuration tool enables the administrator to quickly make configuration changes to the foot controls in the network through a centralized user interface.

Everything you need

Philips accessories are designed to help you make the most of your Philips dictation devices. They guarantee optimal results and ensure that your Philips products enjoy a long life.
