*Tabernaemontana rotensis* (Kaneh.) P.T.Li *Tabernaemontana semperflorens* Perrier *Tabernaemontana subglobosa* Merr. *Tabernaemontana thailandensis* P.T.Li *Tabernaemontana vitiensis* Seem. *Tabernaemontana pandacaqui*, known as windmill bush and banana bush,[5] is a species of plant in the dogbane family Apocynaceae. Description *Tabernaemontana pandacaqui* grows as a shrub or tree up to 14 m (50 ft) tall. Its flowers feature white or pale yellow corolla lobes.

The fruit is orange, red or yellow with paired follicles, each up to 7 cm (3 in) in diameter.[6] Distribution and habitat *Tabernaemontana pandacaqui* is native to China, Taiwan, Thailand, Malesia, Papua New Guinea, Australia and many Pacific islands.[4] It is found in a wide variety of habitats, particularly in drier areas.[6] The species is also reportedly naturalized in the Windward Islands, Trinidad and Tobago and Panama.[4] References ^ 1880 illustration from Francisco Manuel Blanco (O.S.A.) - Flora de Filipinas, Gran edicion ^ Yu, S.-X.; Qin, h.; Botanic Gardens Conservation International (BGCI); IUCN SSC Global Tree Specialist Group (2019).
