P179927 - Building Institutional Capacity in the Maritime Security Sector

This course will assist maritime security practitioners and decision-makers better understand current and emerging threats in order to prepare and implement appropriate service, inter-agency and regional responses at the operational and strategic levels. The course will cover risk analysis, maritime governance, enhancing maritime domain awareness (MDA) capabilities by demonstrating current operational doctrine, organization and global “best practices” for the planning and execution processes to protect a nation’s territorial seas and exclusive economic zone (EEZ).

P159200 - Principles of Defense Acquisition Management

This course provides a theoretical examination of defense acquisition and logistics management combined with practical application in a variety of national settings. International best practices are discussed along with the challenges associated with implementation.

P159202 - Principles of Defense Procurement and Contracting

This course provides a theoretical and practical examination of all phases of the contracting process. International best practices are examined along with the challenges associated with institutionalizing efficient and effective procurement systems.

P179069 - International Defense Acquisition Negotiations

This course focuses on planning and preparing for negotiations with an emphasis on negotiation of complex issues international armaments contracts. Extensive in-class negotiations are conducted. Participants learn their negotiating style tendencies and how and when to adapt their negotiation style given the behavior and goals of the parties.

P179018 - Civil-Military Responses to Terrorism

This course provides a holistic understanding of terrorism as one of many transnational threats all governments face. The program utilizes case studies and a table top exercise to stimulate discussion which assists in providing participants with the insight needed to design successful strategies to defeat terrorist networks, protect citizens and property, and address the root causes of terrorism.

P179548 - Civil-Military Approaches to Maritime Security

This course covers transnational maritime threats (terrorism, armed robbery at sea, smuggling and trafficking of arms, drugs and people, IUU fishing, cyber, and pollution), and provides tools, strategies, and best practices to address those threats. It emphasizes how to enhance maritime domain awareness, maritime governance, port security, institutional capacity, and human capital development.

P170001 - Executive Program in Defense Decision Making

The goal of this seminar is to empower participants with the knowledge and skill sets needed to be effective decision-makers, and act as agents of change to transform their security institutions to address ever-evolving national security challenges.

P179840 - Women in Strategic Defense and Security Decision Making

This course supports partner nations as they develop and implement gender policies aimed at augmenting the representation and prospects for women in security and defense institutions. It provides practical, strategic, and political insights into women’s inclusion and promotion within decision and policy making processes.

P170475 - Civil Military Coordination in Disaster Relief

This course develops a comprehensive understanding of how national governments organize and use their armed forces to support domestic disaster response and international operations. It emphasizes cross-community understanding that focus the ways that armed forces, government civilian agencies, nongovernmental organizations, and inter-governmental organizations can work more effectively alongside each other in disaster relief.

P170024 - Defense Governance

The goals of this course are to empower participants with the knowledge and skill sets to successfully govern defense institutions in whole-of-government planning and operations and to bolster efficiency and effectiveness within and between defense institutions in order to better address national security challenges.

P170030 - Managing Internal Conflict

This course explores the causes of and responses to conflict within a country such as violent religious fundamentalism, terrorism, ethnic & communal violence, separatism, and insurgency. Many countries must confront these situations at home as well as abroad, such as during peace operations. Participants learn and practice conflict analysis techniques, gain exposure to prevention and political-military response strategies, and discuss security sector capabilities needed to respond effectively.

P179928 - National Resilience for Defense and Security

This course will orient participants to successful ‘whole-of-government’ resilience models, in which all facets of society contribute to keeping their nation safe, sovereign, & functional. It will emphasize planning considerations and capabilities requirements for countering full-spectrum threats and hazards that target the civil population and their access to security, timely and reliable information, and essential goods and services.

P179929 - Energy Security and Critical Energy Infrastructure Protection

This course will orient participants to successful ‘whole-of-government’ efforts to develop and assess plans, policies and procedures related to energy security and resilience. It will explore government coordination with the civil and private sectors, reflecting the interconnected and interdependent nature of energy security stakeholders in ensuring uninterrupted energy.

P179896 - Strategies & Capabilities for Multi-Dimensional Threats

This course aims to equip participants with the skills and knowledge needed to identify complex and interactive threats, analyze and identify the institutional gaps that preclude meeting those threats, and prepare appropriate responses at the strategic and operational levels. It emphasizes “whole-of-government,” interagency, and regional responses to multi-dimensional threats.

P173019 - Security and Irregular Migration

This course delves into comprehensive, rights-based approaches to address causes, effects, and challenges of irregular migration. Participants explore strategies for the management and treatment of irregular migrants, including the forcibly displaced. The curriculum fosters critical appreciation of whole-of-government approaches that are used to deter bad actors, strengthen society, secure the homeland, and meet foreign policy goals.

P179931 - Institutional Capacity Building for Logistics

This course provides participants an opportunity to better comprehend and apply logistics management concepts and principles to build and strengthen their logistics institutional capacity. It examines eight logistics topics including logistics governance and operational planning. The course is a mixture of readings, lectures, discussions, and small group application cases and exercises.

P179897 - Securing the State: Building Institutions for National Security

This course equips participants with the skills needed to utilize capabilities-based assessments to identify capability gaps in the security and defense arenas. The course uses a mix of lecture, interactive small group sessions, simulation exercises, and discussion with subject matter experts to explore how to prepare national security institutions to address the national security threats. The course offers approaches to ensure healthy civil military relations and interagency coordination to ensure effective, whole-of-government responses to national security challenges.

P179898 - Strategies and Capabilities for Cyber Challenges

This course equips participants with the knowledge and skills to understand cyber threats, vulnerabilities and their consequences for national security and military operations. Instructors highlight the importance of a comprehensive approach that applies whole-of-government coordination, regional collaboration, and public-private partnership to counter cyber-enabled malicious actors across the spectrum of conflict.
