Successful Cases

Fleet Management Solutions

- Easy identification of problem vehicles/drivers.
- Automatic allocation
- Reduce maintenance costs
- Fuel consumption estimation
- Increasing work efficiency
- Quality and process optimization
- Fast dispatching

Logistics Management Solutions

IoT promises far-reaching payoffs for logistics operators and their business customers and end consumers. These benefits extend across the entire logistics value chain, including warehousing operations, freight transportation, and last-mile delivery.

- Monitor the status of assets, parcels, and food in real time
- Automate business processes to eliminate manual interventions
- Improve quality and predictability
- Operational efficiency, safety and security
- Lower costs
- New business models
- Better customer experience

Scooter & Bike Sharing Solutions

The revolution of urban mobility

Maximize carbon emission reductions

Prevent traffic jams

Better manage parking and traffic safety

Saving resources and time

Cost-effective

Solve last-mile problem

Livestock Tracking Solutions

- Know generic history, breed and demographics
- Maintaining the quality and health of livestock
- Capture, store and monitor important data on real time
- Reduce the chances of contamination or diseases
- Increasing work efficiency
- Quickly search a missing animal
- Store the data of vaccination and inspection

Personal Tracking Solutions

- Increased safety
- More independence
- Self-esteem and confidence
- Carer costs minimized
- Prolong living in own home
- Maintain normal routines
- Peace of mind for family members and carers
