Siemens. The future moving in.

Uncompromising design, innovation and technology.

Imagine a world where functional doesn't mean boring, where outstanding becomes the standard and where you are no longer pressed for time. Welcome to the new world of Siemens.

Introducing co-ordinated and intelligently designed appliances by Siemens. Discover the entire built-in range – for even more flexibility and time-saving solutions that help with our increasingly busy lifestyles. An oven that saves time, speeding up your cooking by up to 50% with varioSpeed. Award-winning dishwashers featuring the world's only Zeolith® drying system; a technological innovation that sets new standards for performance and energy efficiency. Fridge freezers with hyperFresh food preservation technology and outstanding freezers that never have to be defrosted. Not to mention high performance built-in washing machines. All working together to create a spectacular built-in kitchen for your home.

Stunning design that co-ordinates with the rest of your living space as well as high quality materials come as standard with all Siemens appliances. Offering you the perfect balance between modern design and innovative technology, Siemens appliances sit seamlessly together in your home.

New for 2017

This year, Siemens introduces a range of new products across categories that take home appliances a step further into the future.

Discover more about the following appliances and highlight features for 2017 which further enhance the Siemens built-in range of appliances:

Wi-Fi enabled appliances with Home Connect 6-7
The hob which extracts: inductionAir 52-53
Cooling combinations with modularFit 102-103
Dishwashers with brilliantShine system 128

Leading the way with uncompromising design and incredible performance, continue reading to find out about the latest range of Siemens appliances.

Intelligent technology that works behind the scenes.

From state-of-the-art cooling appliances to seamless laundry care, our machines thrive behind cabinet doors. Siemens built-in appliances have been designed to integrate into any kitchen layout, no matter how niche. For example, fridges and freezers can sit side-by-side, or above and below, adapting to the natural flow of any home.

But it doesn't end there. Not only are the built-in appliances flexible in where they can be placed, the technology inside has also been developed to fit seamlessly around your life, no matter how busy you are. timeLight projects cycle information from your washing machine onto your kitchen floor, the brilliantShine system with Zeolith®-drying produces dry, polished glasses every time you use the dishwasher and hyperFresh keeps food looking and tasting great for longer. These hidden appliances are worth getting to know; the technology inside them is stand-out.

Built-in Dishwashers with spotless results

They may be behind a cabinet, but the technology in Siemens built-in dishwashers will always take centre-stage. varioFlex baskets and varioDrawers allow you to completely tailor the space in your appliance, whereas the brilliantShine system with Zeolith®-drying ensures that perfectly dry and polished glasses are produced every time. Installation options like openAssist also work with handleless cabinets for more flexible design options. Siemens built-in dishwashers bring high-performing technology into any kitchen design, proving that true intelligence always shines through.

Find out more from page 126.

Built-in Washing Machines for seamless kitchen designs

Siemens built-in washing machines fit perfectly behind any kitchen design, but their brilliance lies in their technology. These washing machines come equipped with antiVibration side panels, significantly reducing noise, and timeLight technology that projects the cycle status of any wash onto the kitchen floor for instant updates. Put this smart machine behind a sleek cabinet door, and watch beauty and brains truly come together for outstanding laundry care built-in.

Find out more from page 140.

Multiple Fridge Freezer combinations for the perfect fit

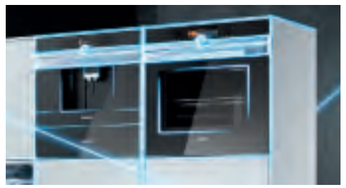
Thanks to modularFit, Siemens built-in cooling appliances can be tailored in size to fit within any kitchen design with multiple height and combination options for individual fridges and freezers. But it's not just their flexibility that makes them so remarkable. hyperFresh technology ensures that food is preserved for as long as possible by carefully monitoring the humidity. Finally, high-performance appliances can be integrated into your dream kitchen design.

Find out more from page 96.

Your home, all in one app.

As innovation moves on, new possibilities arise. Thanks to Wi-Fi-enabled Siemens home appliances with Home Connect functionality, they make their way into your home and enrich your everyday life.

One interface for all appliances



Ovens & Coffee Centre

- Recipe World offers you a wide range of delicious recipes – choose your favourite and send the ideal settings directly to the oven.
- Operate the oven intuitively from wherever you are, for instance to preheat it while you are on your way home.
- The coffeeWorld in your Home Connect App provides an additional variety of delicious coffee specialties from around the world.
- The coffeePlaylist enables you to transfer the beverage wishes of all your guests remotely to the appliance at once – the coffee centre will then prepare one after another.

Models shown: **HN678GES6B** single oven, **CT636LES6** coffee centre, **BI630CNS1B** warming drawer

Hobs & Hoods

- Remote monitoring gives you an overview of your appliance's current status – from wherever you are.
- Intuitively change and select settings on your appliances via the Home Connect App.
- Push notifications inform you about your appliances such as when the filters need replacing.
- Access 256 colours to set the ambient lighting of selected hoods with emotionLight Pro.

Models shown: **LC97FVW60B** hood, **EX975KXW1E** hob (launched September 2017)

Dishwashers

- Remote controlling lets you select options, and start programmes intuitively wherever you are.
- With the Tab Counter, you get Push Notifications whenever the supply of dishwasher tabs needs to be refilled.

Model shown: **SN678D06TG** built-in dishwasher

Fridge Freezers

- Cameras in the fridge let you check the contents of your fridge from wherever you are, whenever you want.
- Remote controlling allows you to intuitively select and activate the ideal setting for your refrigerator.

Model shown: **KG36NHI32** fridge freezer

Washing Machines & Washer Dryers

- Remote monitoring provides you with an easy overview of your appliance's current status – from wherever you are.
- Push notifications inform you when the cycle is finished and, for our i-Dos model, whenever the fill status of detergent or fabric softener is getting low.

Model shown: **WMH4Y890GB** washing machine **WT4HY790GB** washer dryer

Is an appliance Wi-Fi ready?
To see which of our appliances come with Wi-Fi-enabled Home Connect, look out for the **Wi-Fi ready** icon on each appliance page.

Discover even more about Home Connect.

To find out all about the exciting possibilities that Siemens Home Appliances with Home Connect have to offer, go to **siemens-home.bsh-group.com/uk/home-connect**

Home Connect is a service offered by Home Connect GmbH. To use Home Connect, you have to create a user account and register with Home Connect GmbH.

Ovens

Perfect built-in design

Siemens built-in ovens are designed to impress right from the kitchen planning phase, not only because they're so versatile in where they can be placed but their stylish design also ensures a sleek finish or coordinated look with other Siemens appliances. As they can be installed independently, they can fit in a 60cm high niche under the work surface, in a tall unit or in a bank of appliances, offering you maximum flexibility with your kitchen design, not to mention state-of-the-art technology and features which save you time when cooking.

Models shown: **CS658GRS6B** compact steam combination oven, **CM678G4S6B** compact pyrolytic oven with integral microwave and **BI630CNS1B** warming and accessory drawer

Outstanding taste, cooked in the time you have.

varioSpeed saves up to 50% of your time and allows you to adjust the cooking time to your own speed of life.

There are things in life that are worth spending more time on like a business meeting, a weekend adventure or getting to read a few more pages of a bedtime story. Whenever you find yourself in a situation where you want to spend your time differently, but not necessarily cooking, varioSpeed allows you to. No matter whether it's a little snack or a masterful salmon recipe, you can now adjust the cooking time to your own speed of life. Ultimately giving you all the flexibility your life requires.

varioSpeed

iQ700 Ovens with varioSpeed.
Twice as fast in combination: by choosing the integrated microwave function with a conventional cooking option, you can speed up the preparation of your dishes when you need to – without compromising on the quality you would expect. Save up to 50% of your time, to give you the freedom when you require it.

From desserts to roasts and even frozen food, varioSpeed can be conveniently selected to cook a variety of meals when you want to take your time on other things. For even more flexibility; cooking, reheating or quickly defrosting a meal at the end of the day is fast and efficient thanks to the simultaneous heating using microwaves, and a conventional cooking function such as 4D hotAir.

The easiest way to clean an oven: let the oven clean itself.

Thanks to **activeClean®** you don't have to worry about cleaning the oven. Just press a button, and your oven cleans itself.

activeClean®

iQ700 Ovens with activeClean®.
Enjoy preparing food without worrying about the consequences. No matter how creative it gets in the oven interior, you no longer need any chemical treatments to get it clean again – only the push of a button. Hassle-free, the oven cleans itself thoroughly with activeClean®. It does so by heating up to a very high temperature – turning all residues into ash, which can easily be wiped away. This process is called pyrolysis and is the most convenient and efficient way to clean the whole interior of your oven.

And now, even the telescopic rails, bars and tray are specially designed to be used with activeClean so you don't need to remove them at all. Only the wire shelf needs to be removed. activeClean® makes it possible to forget about the chore of cleaning your oven and gives you back your time to spend on the things you love.

activeClean® – ovens that clean themselves.

Healthy cooking. Made easy with steam.

Flavours, vitamins and nutrients are retained – the steam cooks your food gently yet quickly.

Model shown: **HS658GES6B**

Cooking purely with steam.

fullSteam

fullSteam
With the Siemens HS658GES6B multifunction fullSteam oven you can prepare delicious and healthy vitamin-rich dishes. Choose the fullSteam option from the 15 different functions and use only hot steam to cook the food, which is perfect for rice, fish and vegetables. You therefore retain the food's full flavour, colour, vitamins and minerals while cooking without fat or oil. The new iQ700 oven is easy to use, even for someone who has never cooked with steam before.

pulseSteam

pulseSteam
Siemens combination-steam ovens with pulseSteam are real all-rounders for more flexibility with your cooking. It's easy to cook with added steam while baking and roasting with hot air – with their multifunction options you have the perfect cooking method for any food, preserving everything that is important: flavour, smell, texture, vitamins and nutrients. And Siemens combi-steam ovens don't just work with hot air but also with top and bottom heating and grilling, so bread, cakes and roasts come out just right too: crisp on the outside and moist on the inside.

How does it work?
Siemens steam and steam combination ovens are quick and easy to install as they don't need plumbing-in.

Our fullSteam oven (HS658GES6B) has the temperature range indicated; whereas our pulseSteam models have three intensity levels which can be adjusted, depending on what is being cooked.

The removable 1 litre water tank (1.3 litre for steamer) is accessed behind the semi-automatic control panel making it more convenient and easier to refill, even during cooking. Water is fed into the oven cavity and heated by a fast and efficient steam generator, thermostatically controlled to allow pure steam temperatures of 30 – 100°C.

Model shown: **HR676GBS6B**

The ideal kitchen helper: cookControl Plus.

Pre-installed settings guarantee the best results for numerous dishes: cookControl Plus.

Simply select the required dish and enter the weight – the cookControl Plus function immediately provides full colour images with individual recommended settings for perfectly cooking the dish you want. Using cookControl Plus you can achieve the best results for a variety of meals with less to worry about and complete peace of mind.

Want to cook like a pro, without going to a lot of trouble? Thanks to Siemens innovative technology you can, because with cookControl Plus we have built a cookbook right into the oven.

This automatic cooking offers up to 70 programmes to ensure meat and fish are cooked to perfection. Just select the programme, then enter the weight of the food as well as your preferences like medium or rare. The oven will cook it to perfection without you needing to stand there the whole time.

If your using a roastingSensor or bakingSensor, cookControl Plus will automatically suggest the mode, time and temperature for your cooking. So why make it complicated when it can be simple? Siemens offers intelligent, cutting-edge solutions that make cooking and baking surprisingly easy and convenient.

More to explore.

roasting Sensor Plus

Achieve the best roasting results – easier than ever before: roastingSensor Plus.
Thanks to three measuring points, the innovative roasting thermometer is able to precisely and reliably measure the core temperature of your dishes. This allows you to use it with a wider range of foods and stops inaccurate temperatures that a single point would otherwise provide. Ideal for meat, poultry and fish, it can even be combined with the integrated microwave and the pulseSteam function. Without the need to keep checking, the roastingSensor gives you the freedom to get on with the rest of your cooking.

bakingSensor

An oven that can detect when the baking process is complete: the bakingSensor.
All that's left for you to do when baking: prepare the pastry or mix and select the required dish. Innovative sensor technology fitted inside the oven can automatically control the baking process for consistently delicious baking. The bakingSensor constantly measures the moisture levels in the oven interior and is therefore able to tell you when the dish is fully cooked and ready.

Microwave

More space in your kitchen and flexibility with your cooking: the integrated microwave.
The iQ700 ovens with integrated microwave can be used in combination with your regular oven or individually as a fully functional microwave (5 power levels up to 900W), offering more flexibility in your kitchen.

Simply the best.

They are top of the range for a reason.

Siemens iQ700 ovens have a range of high-end features that are consistent no matter which model you choose. With outstanding design and quality materials, you can be confident a Siemens oven will offer you the latest functions to cook with ease and enjoyment.

An oven door that opens and closes gently and quietly thanks to the intelligent mechanism: softMove.
For a calmer kitchen, when you open or close your oven door the intelligent dampers ensure that the oven door is left to open and close gently and quietly. Available on all iQ700 built-in ovens.

Everything put in a good light.
Depending on the model, there are different kinds of illumination inside the oven. Whether it's the standard Halogen light, LEDs or the most advanced Multilevel LED strip, they all provide a brilliant view of your dishes without having to open the oven door.

Illumination

4D hotAir

Best cooking results regardless of which shelf you choose: 4D hotAir.
Be flexible with your cooking. Choose which shelf you want to cook your food on, now with even more choice. The innovative technology of the fan motor enables optimum heat distribution around the interior of the oven, as the oven is programmed to change the rotating direction of the fan every few minutes. Your food therefore always turns out perfectly, just as you want it, no matter which shelf you choose to place it on.

Finally, pre-heating is no longer necessary and you can save time: the coolStart function.
Cooking frozen convenience food in the oven is now even faster thanks to the innovative coolStart function. Using an intelligent heating phase, you can now successfully cook frozen food quickly and without the need to wait for the oven to preheat. Simply place the frozen food into the cold oven, press start, and the dish will be ready according to the manufacturers' stated cooking time.

Ovens

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously innovative technology is the basis of these, our premium models.

A Quick Feature Guide

Reference key:

ecoClean® Model does have this feature

ecoClean® Model does not have this feature

Key functionality – Single Ovens

Energy **Energy efficient ovens** Most Siemens single ovens achieve a European Class A+ rating for energy efficiency. For better efficiency, certain models feature the hotairEco and conventional heat eco functions.

WiFi ready **Wi-Fi ready** With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

activeClean® **activeClean®** Heating the cavity up to 480°C, activeClean® burns away all dirt and grime to save time. The self-cleaning feature can also be used with pyrolytic proof telescopic rails and bars.

ecoClean® **ecoClean®** A direct coating that lines the back, roof and side of the oven, ecoClean® makes cleaning the oven easy. The coated area cleans itself while the oven is on or can be activated with a cleaning programme.

fullSteam **fullSteam** Enjoy healthier meals created by the power of steam. With juicy meats and crunchy vegetables cooked to perfection, culinary creations will be second to none.

pulseSteam **pulseSteam** Prepare perfectly juicy and crispy dishes with pulseSteam and other cooking functions like hot air to create a wider variety of meals that make the appliance more flexible.

cookControl Plus **cookControl Plus** Once the programme is selected and weight entered, the oven automatically selects the best setting, controls the cooking time and switches off when done.

varioSpeed **varioSpeed**
By choosing the integrated microwave function with a conventional cooking option, you can speed up the preparation of dishes by up to 50%.

Double Ovens

A Energy **Energy efficiency in main oven** Siemens double ovens achieve a European Class A rating for energy efficiency in the main oven.

B Energy **Energy efficiency in top oven** Siemens double ovens achieve a European Class B rating for energy efficiency in the top oven.

3D hotAir **3D hotAir** Can cook all types of food on up to 3 levels simultaneously to stop flavours and smells intermingling.

Bottom heating **Bottom heating** Heating the oven from the base, the Bottom heat setting is ideal for casseroles, curries, slow cooking and even bain marie's.

Defrost **Defrost** Circulating room temperature air away from airborne contaminants, the defrost setting will gently defrost large joints of meat or a delicate gateau.

ecoClean® **ecoClean®** A direct coating that lines the back, roof and side of the oven, ecoClean® makes cleaning the oven easy. The coated area cleans itself while the oven is on or can be activated with a cleaning programme.

hotairEco **hotairEco** For gently cooking selected dishes on one level without preheating. Using hotairEco will also save you around 30% more energy compared with standard functions.

Hot air grilling **Hot air grilling** Perfect for poultry and duck or smaller cuts of meat. The grill and fan operate alternately, which results in even crisp food and can use up to 30% less energy than traditional roasting.

Other product features

4D hotAir cooking
Ideal for all types of food, 4D hotAir allows you to cook sweet and savoury simultaneously on up to 4 shelves, without flavours and smells intermingling.

bakingSensor
Ideal for baking cake or bread. A sensor constantly measures the moisture levels in the oven and is able to tell you when the dish is fully cooked.

coolStart
No more preheating when cooking frozen convenience food. Using an intelligent heating phase, it's now possible to cook frozen food without waiting for the oven to preheat.

Dehydrate/drying
Ideal for homemade dried fruits or herbs. The drying function is based on hotAir using a temperature between 40 – 80°C.

Full width surface gril
Full width surface gril gives you precision grilling temperatures for a full width grill.

Intensive conventional heat
Using the top heating elements, with the powerful bottom element, this intensive setting is ideal for cheesecakes, crispy cake bases and tins that have poor heat conduction.

Intensive hot air/Pizza setting
Providing extra heat from the bottom of the oven and sides, Intensive hot air not only cooks food thoroughly, it's perfect for crisping pizza bases.

Keep warm setting
This setting keeps food warm until it's ready to serve, meaning food doesn't dry out or change in texture or taste.

Low temperature cooking
Cook meats & casseroles at low temperatures while keeping food juicy and tender without overcooking.

Microwave Now in a full size oven, the integrated microwave offers quicker cooking when used with other cooking functions, or can be used on its own up to 900W.

Plate warming function
Keeping plates and serving dishes warm, this setting ensures food stays warm once on the table.

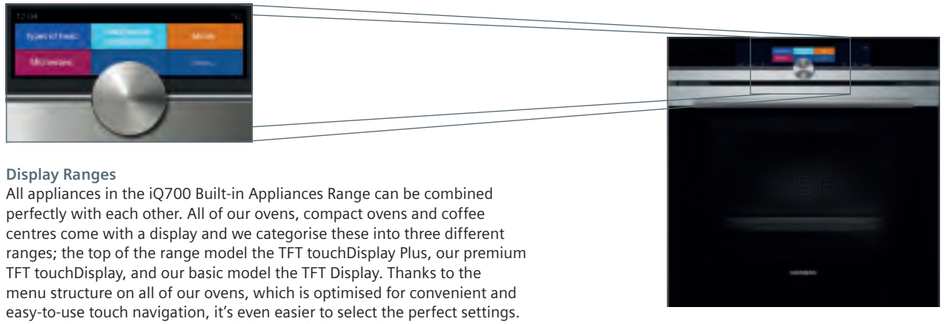
RoastingSensor Plus
The roasting thermometer is able to precisely and reliably measure the core temperature of your dishes while cooking.

Sabbath setting
Designed to keep precooked food warm for long periods of time, the Sabbath setting keeps the oven temperature between 85°C – 140°C, for 24 to 73 hours.

softMove
For a calmer kitchen, when you open or close your oven door the intelligent dampers ensure that the oven door is left to open and close gently and quietly. Available on all iQ700 built-in ovens.

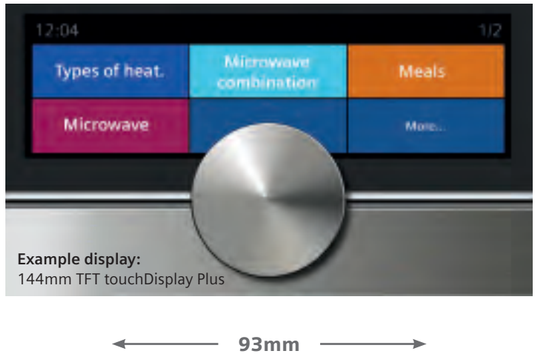
Top/bottom heating
For gently cooking selected dishes on one level.

Introducing our iQ700 TFT Display Types



Display Ranges
All appliances in the iQ700 Built-in Appliances Range can be combined perfectly with each other. All of our ovens, compact ovens and coffee centres come with a display and we categorise these into three different ranges; the top of the range model the TFT touchDisplay Plus, our premium TFT touchDisplay, and our basic model the TFT Display. Thanks to the menu structure on all of our ovens, which is optimised for convenient and easy-to-use touch navigation, it's even easier to select the perfect settings. Designed to serve one purpose: giving you full control.

144mm



Example display:
144mm TFT touchDisplay Plus

TFT touchDisplay Plus

TFT touchDisplay Plus
It's never been this easy to keep an eye on your cooking. Bigger size, brighter colours, higher contrast and better resolution. And now controllable with the touch of a finger. The new TFT touchDisplay Plus is the most innovative and intuitive user interface available for an oven.

Say goodbye to multiple dials and printed icons, the TFT touchDisplay Plus offers more than just control of your oven. It gives tips and information on each programme, full colour graphics and images, it can even suggest the correct way to cook your dishes with cookControl Plus. Clear to read from any angle, it's advanced yet easy-to-use technology for effortless cooking.

93mm

Example display:
93mm TFT touchDisplay

TFT touchDisplay

TFT touchDisplay
The slightly smaller TFT touchDisplay offers all the functionality of a touchscreen display with crisp text and images.

71mm

Example display:
71mm TFT Display

TFT Display

TFT Display
The TFT Display can be operated with touchControl buttons either side of the screen, yet still has clear programme information.

TFT touchDisplay Plus

Single multi-function oven with TFT touchDisplay Plus

The best in technology & design

TFT touchDisplay Plus

The largest TFT touchscreen has clear text and colour images, viewed from any angle, while programmes, options and settings can be chosen intuitively with ease.

Stunningly, uniquely Siemens, our iQ700 single ovens convey an elegant impression of absolute quality and intelligent innovation.

Experience a truly flexible cooking experience with Home Connect functionality and choose to speed up your dishes by up to 50% using varioSpeed. The sleek design fits perfectly into any modern kitchen and houses an impressive range of features like activeClean® and coolStart to help you save time.

Oven accessories.

Model shown: **HN678GES6B**
single multi-function oven with
TFT touchDisplay Plus

The perfect accessories, designed especially for your new iQ700 oven.

Why look elsewhere when we can supply original accessories that help you with your cooking. Great for tailoring your oven to your individual needs, you can choose between the telescopic rails, deep roasting pan or even a quality ceramic oven to table dish.

Thanks to the new design of our iQ700 oven and compacts range, roasting pans and wire racks are now universal and interchangeable between all enamelled oven cavities.

Telescopic rails

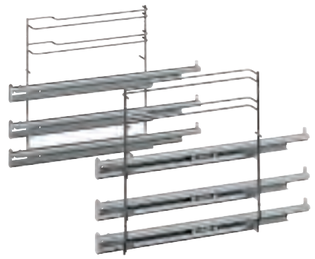
Convenient and easy to use, some Siemens iQ700 ovens with microwave feature a telescopic rail system with stop function as standard. For many other models, you also have the option to upgrade, with up to three levels. To make cleaning the oven even easier, all telescopic rails and bars are now pyrolytic-proof so they can be kept in the oven during the self-cleaning process. The shelves glide out effortlessly and safely so you don't have to reach inside a hot oven to check your food.

Other Accessories

Deep Roasting – Full width enamelled baking tray for iQ700 60cm single and 45cm compact ovens – HZ631070

Small Oven to Table Dish – HZ36D513P (part no. 573899)

Large Oven to Table Dish – HZ36D533P (part no. 573900)



3 level telescopic shelf rail for single oven with pyrolytic cleaning – We offer 1 level or 3 level telescopics, but for each there are different options, depending on the oven chosen

To view available accessories in the oven range please ask your retailer or visit **siemens-home.bsh-group.com/uk/store**

The finest ingredients. For the finest kitchen interiors.

Perfect built-in design.

Seamless design that complements every kitchen. All appliances in the iQ700 Built-in Appliances Range can be combined perfectly with each other. The iQ700 ovens, compact ovens, coffee centres and warming drawers all line up thanks to the coordinated front panels. It doesn't matter whether you arrange the appliances horizontally or vertically: the result always pleases the eye.

Even our iQ700 hoods have the same front panel design for a coordinating look throughout your kitchen.

Each oven features blue illuminated hard key buttons, integrated into a sleek, chrome-effect strip that provides the most important operations from turning the oven on to starting your cooking.

The central stainless steel disc control is a constant design feature across the range, with a precise operation that clicks when rotated to give you ultimate satisfaction when using each appliance. Combined with the touchscreen navigation, this method of operation is both familiar and intuitive.

The trend-setting iQ700 ovens feature a smaller profile oven door handle that blends into the stainless steel panels to offer more flexibility with handleless kitchen design, yet still having the highest build quality and feel. While the precise lines of the black glass and stainless steel create a definitive aesthetic worthy of any modern kitchen.

For optimum coordination, choose iQ700 single ovens and compact appliances with the same display type.

Compact appliances

For your dream kitchen

With the variety of appliances in our iQ700 compact45 built-in range, Siemens invites you to combine them to suit your preferences, for complete visual perfection. For a dream kitchen that you won't get tired of any time soon.

Siemens compact appliances fit in a 45cm high niche, and can be installed at hip height for particularly easy access. Depending on the model, the compact ovens are available with steam or integrated microwave. Thanks to Siemens coordinated design, it's easy to combine them together with a warming drawer, coffee centre and iQ700 single ovens.

Clockwise from left to right: **CT636LES6** compact45 coffee centre, **CM678G4S6B** compact45 oven with microwave, **HM678G4S6B** single oven with microwave, and roastingSensor Plus.

Beautifully coordinated compact appliances sit seamlessly with each other.

Models shown: **CM678G4S6B** compact45 oven, **BI630CNS1B** warming drawer, **HN678G4S6B** single oven and **LF91BA582B** island extractor hood

More functions for flexible living.

Siemens iQ700 compact appliances have it all.

From easier steam cooking with no need to clean, to keeping food warm, Siemens help make life easier.

activeClean®

Cleaning and de-scaling
Finished with a durable enameled interior, most Siemens compact45 combination ovens feature dedicated de-scaling and cleaning programmes. Selected iQ700 models feature activeClean®; heating the oven cavity up to 480°C to burn away all dirt and grime it leaves the oven clean, dry and ready to use again.

ecoClean®

ecoClean®
A direct coating that lines the back, roof and side of the oven, ecoClean® makes cleaning the oven easy. The coated area cleans itself while the oven is on or can be activated with a cleaning programme.

Drying programme
Saving the effort of wiping down the steam oven after use, the drying programme removes left over humidity inside the cavity of the oven by heating up for approximately 10 minutes. Afterwards, the door should be opened so residual steam can escape.

Warming Drawers
The ideal solution for warming plates, a Siemens warming drawer will also keep food warm for up to 1 hour, safely and hygienically. With an adjustable temperature of 40°C to 80°C the warming drawer is the perfect accessory to coordinate with Siemens iQ700 compact45 appliances, or can be installed alone.

Steam cooking. The healthy way to cook.

fullSteam

fullSteam
Ideal for vegetables and fish, pure fullSteam cooking has many health benefits as well as creating tasty dishes. Only hot steam is used to cook the food which is perfect for rice, fish and vegetables. You therefore retain the food's full flavour, colour, vitamins and minerals. The new iQ700 compact steam ovens are easier to use, even for someone who has never cooked with steam before.

pulseSteam

pulseSteam
Used in combination with a conventional cooking function, pulseSteam can be added with three intensities. Prepare perfectly crispy and juicy dishes, ideal for adding moisture and avoiding dried out food when reheating. It's also quicker to defrost food too. pulseSteam offers more flexibility in just one appliance.

How does it work?
Siemens steam and steam combination ovens are quick and easy to install as they don't need plumbing-in. The removable 1 litre water tank (1.3 litre for steamer) is accessed behind the semi-automatic control panel making it more convenient and easier to refill, even during cooking. Water is fed into the oven cavity and heated by a fast and efficient steam generator, thermostatically controlled to allow pure steam temperatures of 30 – 100°C.

iQ700

Exceptional design allied with seriously innovative technology is the basis of these, our premium models.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

A Quick Feature Guide

ecoClean® Model does have this feature

ecoClean® Model does not have this feature

Key functionality – compact45 Appliances

Energy **Energy efficient ovens** Siemens compact45 hot air and hot air steam appliances achieve a European Class A+ rating for energy efficiency.

activeClean® **activeClean®** Heating the cavity up to 480°C, activeClean® burns away all dirt and grime to save time. The self-cleaning feature can also be used with pyrolytic proof telescopic rails and bars.

fullSteam **fullSteam** Enjoy healthier meals created by the power of steam. With juicy meats and crunchy vegetables cooked to perfection, culinary creations will be second to none.

cookControl Plus **cookControl Plus** Offering you a variety of different programmes for fresh and frozen foods. Once the desired programme is selected and weight entered, the oven automatically selects the best setting, controls the exact cooking time and switches off when the meal is done.

WiFi ready **Wi-Fi ready** With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

ecoClean® **ecoClean®** A direct coating that lines the back, roof and side of the oven, ecoClean® makes cleaning the oven easy. The coated area cleans itself while the oven is on or can be activated with a cleaning programme.

pulseSteam **pulseSteam** Prepare perfectly juicy and crispy dishes with pulseSteam and other cooking functions like hot air to create a wider variety of meals that make the appliance more flexible.

varioSpeed **varioSpeed** By choosing the integrated microwave function with a conventional cooking option, you can speed up the preparation of dishes by up to 50%.

Coffee Centre

WiFi ready **Wi-Fi ready** With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

aromaDoubleShot **aromaDoubleShot** For coffee that is extra-large or extra-strong aromaDoubleShot supplies an extra boost when it is needed the most. Because the second shot uses a new set of beans, there is no compromise on flavour.

individualCupVolume **individualCupVolume** Precisely the right amount of coffee – exactly how you want it. individualCupVolume provides millilitre precision to cup sizes, so that your favourite coffee fits into your favourite cup perfectly.

myFavourite **myFavourite** Choose your ideal coffee settings to save as a favourite. myFavourite allow you and your family or friends to store their favourite settings in the menu to quickly select a custom coffee. Choose from options such as the strength or size of the coffee and then save with your name.

oneTouch function **oneTouch function** The simple yet stylish controls allow the serving of perfect coffee every time – ideal for impressing friends, as well as for day to day life.

sensoFlow system **sensoFlow system** Different coffees require the espresso shot to be heated at a different temperature to achieve the perfect result. sensoFlow does this automatically, providing you with a delicious beverage again and again.

Microwaves

Microwave **Microwave** The microwave can be used with different power levels up to 900W.

Small grill **Grill** Cook with a combination of variable quartz grill and microwave with power levels of 360W, 180W and 90W for browning of food while cooking.

144mm

Example display:
144mm TFT touchDisplay Plus

TFT touchDisplay Plus
It's never been this easy to keep an eye on your cooking. Bigger size, brighter colours, higher contrast and better resolution. And now controllable with the touch of a finger. The new TFT touchDisplay Plus is the most innovative and intuitive user interface available for an oven.

Say goodbye to multiple dials and printed icons, the TFT touchDisplay Plus offers more than just control of your oven. It gives tips and information on each programme, full colour graphics and images, it can even suggest the correct way to cook your dishes with cookControl Plus. Clear to read from any angle, it's advanced yet easy-to-use technology for effortless cooking.

93mm

Example display:
93mm TFT touchDisplay

TFT touchDisplay
The slightly smaller TFT touchDisplay offers all the functionality of a touchscreen display with crisp text and images.

71mm

Example display:
71mm TFT Display

TFT Display
The TFT Display can be operated with touchControl buttons either side of the screen, yet still has clear programme information.

Please note: Displays are not shown at actual size.

Other product features – Compact Appliances

coolStart
No more preheating the oven when cooking frozen convenience food. Using an intelligent heating phase, it's now possible to successfully cook frozen food quickly and without the need to wait for the oven to preheat.

Defrost (steam)
Quicker than regular defrosting, steam defrosting gently puts moisture back into food as it defrosts. This speed allows spontaneous meals, without the need to pre-plan.

Dough Proving
The oven creates the perfect environment for proving dough, so you don't have to, leaving you to enjoy your time until the dough is ready.

Reheating (steam)
Using steam puts life back into food using moisture, making food taste just as delicious the second time round. A great solution if consumers need a meal in a hurry.

softMove
For a calmer kitchen, when you open or close your oven door the intelligent dampers ensure that the oven door is left to open and close gently and quietly. Available on all iQ700 built-in ovens.

TFT touchDisplay

Coffee centre with TFT touchDisplay

Stunningly, uniquely Siemens, our iQ700 coffee centre conveys an elegant impression of absolute quality and intelligent innovation for those passionate about coffee.

The design of the iQ700 coffee centre is perfectly aligned with the entire iQ700 series. To keep the sleek lines looking clean, all milk, water and bean containers are conveniently hidden behind the coffee centre's door, while the TFT touchDisplay and LED lights put each coffee in the spotlight.

Designed with easy access to the water tank, bean holder and insulated milk jug, the coffee centre has front access thanks to a hinged front panel – so it's quick to replace the water or beans. The milk tubes are also cleaned with steam after every coffee with milk and as most of the components are removable and dishwasher safe, they are also easy to clean. Easy to install, the machine requires no extra plumbing.

iQ700 CT636LES6 Black, stainless steel

Key features

- TFT touchDisplay
- oneTouch function
- Frothing nozzle
- aromaDoubleShot – provides flexibility in strength and size
- myCoffee: memory function saves up to 8 individual beverages with names to make your perfect coffee at the touch of a button
- sensoFlow system
- DoubleCup
- Separate container for pre-ground coffee – giving you the flexibility to create the perfect decaf coffee without the need to change the bean

Hobs

Induction, ceramic & gas hobs.

The Siemens hob range combines eye-catching design with razor-sharp looks, together with innovative technology and ergonomic design. All created to coordinate beautifully with other Siemens appliances.

Advanced technology in our hobs ensures your cooking is as enjoyable as possible with time-saving features that help you to get on with the cooking when you need to.

With the Siemens range of hobs, you can choose from a wide range of sizes, styles and cooking types to suit your needs and kitchen design. Continue reading to find out more.

Model shown: **EX875KYE1E**

Choosing the right hob for you.

Fits into your kitchen. Adapts to your life.

There are a variety of innovative features providing more comfort than ever before – and never before have they been so easy to operate: With the new TFT touchDisplays one finger is the key to flexibility. For example, one touch is all it takes and the cooktop automatically prevents pots from boiling over – thanks to the cookingSensor Plus.

Adapts to your needs: flexInduction Plus.
One thing less to worry about. With flexInduction Plus, your hob automatically knows how large your cookware is. This provides even heat with the use of an additional central zone if the hob detects that the pan is too large.

For 80cm flexInduction Plus hobs, there are two additional zones which are used for either the left or right flexInduction zones and cannot be used together. For 60cm flexInduction Plus hobs, no matter which side the pan goes over, a central zone is automatically added.

Any place is the right place: flexMotion.
Less hob operation, more cooking. flexMotion remembers the heat settings for individual pieces of cookware, so you can move them freely across the hob and the power level on the new cooking zone automatically adapts.

Power-up the heat by moving the pan: powerMove Plus.
powerMove Plus lets you separate your hob into three different heating zones. From roasting at the highest temperatures at the front to keeping food warm on a low level at the back – once selected the individual zones are activated by simply placing the cookware on them.

One thing less to worry about: cookingSensor Plus.
No more overboiling. Just attach the sensor to the pot and it will interact with the hob, signalling when a certain temperature has been reached and keeping it at that exact level.

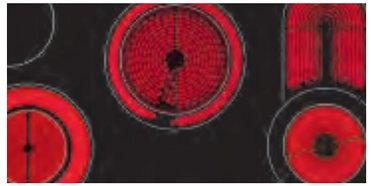
Pays attention to your pans: fryingSensor Plus.
Sensors in the cooktop measure the pan's temperature. Once a desired heat level has been reached, you receive a signal and the pan stays at that very level. Without worrying or burning, you will always get the very best results.

Exciting possibilities for planning your kitchen. Whether you plan to cook with gas or electricity, want to install in an island or smaller kitchen, Siemens offers a wide range of stylish hobs that are tailored exactly to you.

Induction
Induction cooking is recognised as being one of the quickest, safest and most efficient methods of cooking available. When a pan with a ferrous or magnetic metal base is placed on the hob, the coil situated below the ceramic surface uses an electromagnetic field to create heat, almost instantly heating the pan. With only the base of the pan heated, the cooking zone stays cooler.

Ceramic
The surface of a glass ceramic hob heats up quickly and conveniently, while also being easy to clean due to the smooth and even surface. The cooking zones glow red when they're on, unlike induction hobs and you can adjust the temperature of the cooking zones precisely, ensured by 17 power levels. Siemens highSpeed cooking zones are also optimised for fast cooking and heat up almost instantly. Ceramic hobs are also available with a double-circuit cooking zone and a special roasting zone. This makes your cooking experience incredibly flexible.

Gas
With Siemens gas hobs, pots and pans heat up quickly and your food is ready when you need it. Our gas hobs meet the highest safety standards and have modern burners with stepFlame technology to offer stepped power level adjustments which let you achieve the perfect heat distribution for your cookware. The surface finishes of Siemens gas hobs are glass, ceramic or stainless steel, depending on the model, with enamelled cast-iron pan supports – high-quality materials with high-quality workmanship, not to mention added style.



cookingSensor Plus
No more overboiling. Just attach the sensor to the pot and it will interact with the cooktop, giving a signal when a certain temperature has been reached and keeping it exactly at that level.

fryingSensor Plus
Select your desired heat and the pan will heat and maintain the right temperature automatically. Sophisticated sensors inside the hob will continuously measure the temperature and regulate the pan temperature with high precision.

Brilliant extraction, neatly hidden away.

Enjoy worry-free cooking and cleaning.

inductionAir venting hob
The inductionAir venting hob gives you the freedom to design your kitchen how you want to, with the added benefit of hassle-free cleaning. The innovative design means that the grease filters fit into an entirely detachable liquid tray unit which is designed to completely protect against spillages and over-boiled liquids.

How does it work
All parts of the inductionAir venting hob are neatly arranged in a liquid tray unit, accessed from the top of the hob. Each of the parts are dishwasher proof, including the cast iron and black glass air inlet grid, the 2-in-1 grease filter and the liquid tray. Each part is also separate to save space in your dishwasher.

Protects from spills
As a first layer of protection, the cast iron and black glass air inlet grid is designed to limit the flow of liquids into the ventilation module. As a second layer of protection, the liquid tray captures up to 200ml from day-to-day cooking and can be easily discarded. As a special layer of protection, up to 2 litres of liquid can be held in the liquid safety tank, accessed from beneath the appliance, protecting the appliance from further damage. This means you can focus on your cooking with complete peace of mind.

Hob features

flexInduction
This flexible cooking area is tailored to your needs, enabling you to use a small area for small pans, or the entire zone for large cooking pots.

fryingSensor Plus
Sensors in the hob measure the pan's temperature. Once a desired heat level has been reached, you receive a signal and the pan stays at that very level.

cookingSensor Plus
No more overboiling. Just attach the sensor to the pot and it will interact with the hob, signalling when a certain temperature has been reached and keeping it at that exact level.

powerMove Plus
powerMove Plus lets you separate your hob into three different heating zones – once selected, the individual zones are automatically activated simply by placing the cookware on them.

Hood features

climateControl Sensor
Once activated, the climateControl Sensor takes care of all ventilation level adjustments for you, controlling normal as well as intensive levels. The sensor constantly detects the level of odours in the air and automatically adjusts the motor level.

This fully automatic control of the hood means you can focus on your cooking and ensures you have the most efficient and quietest extraction level selected at all times.

iQdrive
The iQdrive is our most efficient, most durable and most powerful brushless motor, designed to operate your hood with maximum extraction performance and at the same time lowering the sound level.

cleanAir filters
When installed in recirculating mode, the inductionAir venting hob can be used with our cleanAir filters to effectively absorb odours and provide cleaner air for your kitchen.

Induction cooking – the cool heat.

Induction

Induction cooking

Induction cooking is recognised as being one of the quickest, safest and most efficient methods of cooking available. When a pan with a ferrous or magnetic metal base is placed on the hob, the coil situated below the ceramic surface uses an electromagnetic field to create heat, almost instantly heating the pan. With only the base of the pan heated the cooking zone stays cooler.

Easier to clean and safer to use, because the ceramic cooking top is warmed only by the heat transferred back from the cookware and its contents, spillages are less likely to burn on, and there is normally no need to wait for the glass to cool down before simply wiping it over with a cloth. And if you turn on an induction hob without having a pot or pan on it, there is no risk of burning yourself, because the hob itself doesn't heat up.

Speed. Energy-efficiency. Style.

Our traditional induction hob range features automatic pan recognition, ensuring that only the pan in contact with the surface heats up. Induction cooking is quicker than gas and much more energy efficient, allowing you to enjoy speedy food whilst being kinder to the environment.

Be in control of the uncontrollable

A busy lifestyle can involve being pulled in many directions. Should that happen while you're cooking, controlPanel pause will shut down all power at the touch of a button, ensuring that your meal isn't ruined. At the second touch all will resume as if you were never interrupted.

Automatic pan recognition

Energy-efficiency is at the heart of Siemens products, and is at the heart of automatic pan recognition. Only the area of the hob in contact with the pan receives energy, meaning energy isn't wasted by heating the entire unit. Not only will this lower your carbon footprint, but it will also reduce your utility bills.

Faster cooking made quicker

powerBoost increases the power output of selected zones by 50%, allowing precision heat when you need it most – perfect when time is of the essence.

Perfectly framed.

Induction hobs are perfect for a wide variety of cooking and come in a range of finishes enabling you to make your kitchen truly bespoke.

With their slim 4mm profile and tough, stain and scratch resistant wipe-clean surface, it's easy to see why our smooth, high-gloss finish glass induction hobs are the perfect choice for many people.

Stainless steel side trim

Great for blending in with your existing kitchen and worktop or maybe a Teppan Yaki Domino hob, a facetted induction hob with slim steel side trim features a slightly raised edge around its circumference.

Stainless steel frame

Perfect for coordinating with your kitchen, hood and other Siemens appliances, this modern flat frame design has a sleek stainless-steel frame around its edge to contain spills and protect the glass edge.

Flush-fitting design

The flush-fitting smooth glass finish makes this induction hob practical and easy to clean, whilst sitting flush and neat in your contemporary kitchen.

Bevelled-edge design

A traditional bevelled-edge design induction hob is easily blended into any kitchen aesthetic, yet still features all the great flexibility of an induction hob.

Enjoy a new cooking experience.

flexInduction

flexInduction

A hob that fits in with your lifestyle, flexInduction is no-compromise cooking at its best.

Siemens flexInduction hobs are a must for diverse cooking. The cooking area can be tailored to your needs, enabling you to use a small area as traditional induction hobs with four or five separate zones, for boiling rice, for example, or you can choose to link the zones together to form one zone for larger cooking pans. The new extended cooking surface can accommodate pans of any size, even several pans placed anywhere on the surface at the same time. With all the advantages of induction cooking, flexInduction also includes boost settings, automatic pan recognition and touchSlider controls.

Each flexInduction zone uses four innovative elongated oval inductors beneath the glass, each of which can act independently to sense the presence of cookware on the hob. Only if cookware is detected will the individual inductors work, ensuring efficient operation whether a 10cm diameter milk pan is placed in one corner or a large griddle plate covers the whole zone. With only specific areas active at any particular time, no energy is wasted. And for an even more versatile cooking experience the newly designed triple flexInduction hob provides the ultimate in flexible cooking with three flexInduction zones, fitting in with your lifestyle, flexInduction is no-compromise cooking at its best.

TFT touchDisplay

Put your finger on innovation: TFT touchDisplay.

With the innovative TFT touchDisplay, you can now get the most out of your Siemens induction hob. The full colour touch screen is intuitive and easy to use with clear information about your hob's status at all times as well as additional settings that open up a new world of possibilities. Choose the settings for each individual cooking zone and combine the zones as you like – for example, for different sizes of cookware and various accessories. Access a new world of recipes which can help you cook the perfect dish in just a few simple steps, complete with images and clear text. Take control of your Siemens induction hob and enjoy the advanced design with perfectly prepared meals.

dual lightSlider

Dual lightSlider

Operate with intuition. The new dual lightSlider lets you easily select and join the cooking zones of the iQ700 Induction Hobs via one neatly arranged interface that illuminates when the hob is turned on. To adjust the power level of the cooking zones simply slide your finger along the lit scale or select the desired power level directly with precise control. When the hob is switched off, the controls are completely invisible for a sleek finish to your kitchen. As there are no protruding parts, cleaning is made even easier.

touchSlider

touchSlider

The ergonomic touchSlider sits flush to the appliance and allows you to slide your finger across the power level scale to the desired setting, with control advances in half-levels from 1 to 9. You can also touch the desired level directly for faster adjustments to the cooking zone temperature.

Gas hobs. High performance, high speed.

Our top-of-the-range models feature beautiful and durable black ceramic glass hob bases, with cast iron pan supports for a contemporary look. They are designed to coordinate with other appliances in the iQ700 range, and can be combined seamlessly with iQ700 domino and electric hobs. Low profile, single piece burners on the glass complete the sleek appearance.

Model shown: ER9A6SD70 90cm ceramic glass gas hob.

Introducting the ground-breaking innovation in gas hobs: stepFlame. Offering 9 precise power levels to give you the control of an electric hob, with gas.

stepFlame technology
No more leaning over to check the flame size, no more hoping that it is at the right heat level. All this guesswork has been removed fom cooking with gas. From now on, whatever level you choose – you'll get exactly the heat and the flame size you need. It's just as easy to operate as it sounds. That is stepFlame technology: a groundbreaking innovation to precisely control the flame. Your meals will be delicious, and your guests will be delighted.

LED display with residual heat indicator
Together with the new stepFlame technology, selected gas hobs feaure an LED display which clearly shows the power level you have selected at a glance. For added safety, the LED display also shows whether there is any residual heat from the hob indicated by a capital 'H' for hot and a lower case 'h' for warm.

Wok burners
Siemens gas hobs feature wok burners that deliver 3.3kW, 4.0kW, 4.2kW, 5.0kW or 6.0kW of power depending on the model, meeting the increasing demand for high speed cooking. But it is not just about power; they can be turned down to just 0.3kW – perfect for simmering. For the ultimate in flexibility, our 6.0kW and 5.0kW burners are dual control – the inner and outer flame rings can be adjusted independently via a single control.

Dishwasher-safe pan supports
All gas on ceramic glass model feature pan supports that are treated with a special patented coating which resists discolouration and the damaging effects of a dishwasher.

Flame failure safety device
All Siemens gas hobs feature a flame failure safety device, which cuts-off the supply of gas to the individual burner should the flame be somehow accidentally extinguished.

Control like never before.

One thing less to worry about: cookingSensor Plus.
No more overboiling. Just attach the sensor to the pot and it will interact with the cooktop, giving a signal when a certain temperature has been reached and keeping it exactly at that level.

Model shown: **EX975KXW1E**

The Siemens hob range combines razorsharp design, together with innovative technology. All created to coordinate beautifully with other Siemens appliances.

Hob Accessories

For additional cooking flexibility Siemens provide a range of accessories for our flexInduction hobs.

For more details on the range of accessories available please ask your retailer or visit siemens-home.co.uk/store

Griddle pan – Specially designed for use across four flexInductors the griddle pan maintains an even heat, perfect for frying steak.

Accessories code: HZ390522

Teppan Yaki – Heating extremely quickly the Teppan Yaki is great for fast Japanese cooking. Perfect for a cooked breakfast or a healthy stir-fry, the pan comes in two sizes that fit across either three or four flexInductors.

Accessories code: 2 sizes available 40x20cm HZ390512 and 30x20cm HZ390511

Roasting dish with steamer – Perfect for use with flexInduction hobs this multipurpose dish is a must when cooking for a crowd. A removable steamer insert is available to compliment this dish and perfect for steaming vegetables.

Accessories code: Roasting dish HZ390011 and steamer insert HZ390012

Hobs

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously innovative technology is the basis of these, our premium models.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality equipped with an attractive selection of smart features.

iQ100

Appliances with superb quality and practical design.

A Quick Feature Guide

Reference key:

flexInduction — Model does have this feature

flexInduction — Model does not have this feature

Key functionality – Induction

Wi-Fi ready With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

combiZone allows you to connect two induction zones together, suitable for larger pots and pans.

powerBoost increases the power output of selected zones by up to 50% to provide quicker heating and cooking times.

touchControl Thanks to advanced touchControl technology, Siemens hobs can be operated by simply touching the surface. This means the controls are seamlessly integrated into the surface and make cleaning even easier.

Width Our hob range is available in a range of widths to suit your kitchen design and needs.

flexInduction The flexInduction cooking area is tailored to your needs, enabling you to use a small area for small pans, or the entire zone for large cooking pots.

TFT touchDisplay Operate your iQ700 induction hob with a large touchscreen colour display giving you an excellent overview of settings and intuitive control.

touchSlider The stylish and ergonomic touchSlider allows you to simply slide their finger across the touchSlider temperature scale to the desired setting. All 60cm models are controlled with one single 9.5cm touchSlider control, while the extra wide models have one, four or five touchSlider controls.

Ceramic

Width Our hob range is available in a range of widths to suit your kitchen design and needs.

touchControl Thanks to advanced touchControl technology, Siemens hobs can be operated by simply touching the surface. This means the controls are seamlessly integrated into the surface and make cleaning even easier.

controlPanel Lock With the childproof lock button, you can quickly and easily protect the hob against unauthorised operation. The childproof lock blocks all the hob's functions at the touch of a button. Locking is cleared by pressing the button again and holding down for a few seconds.

touchSlider The stylish and ergonomic touchSlider allows you to simply slide their finger across the touchSlider temperature scale to the desired setting. All 60cm models are controlled with one single 9.5cm touchSlider control, while the extra wide models have one, four or five touchSlider controls.

Gas

Width Our hob range is available in a range of widths to suit your kitchen design and needs.

Cast Iron Cast iron pan supports are designed to withstand even the heaviest of pots and pans and provide a sleek finish to each hob. All can be removed for easier cleaning and iQ700 models have dishwasher safe pan supports.

Power Level Display Thanks to a display next to each control, the exact power level is clearly displayed so you can see what power you are cooking with at a glance.

stepFlame technology No more leaning over to check the flame size. All this guesswork has been removed from cooking with gas thanks to stepFlame technology which gives a range of flame levels for more control with your cooking.

Black Glass Finished in a contemporary black glass design to coordinate with other Siemens appliances and seamlessly fit into your kitchen.

frontControl Gas hobs with frontControl feature all controls at the front of the appliance for easy control.

Stainless Steel Finished in a high quality stainless steel design to complement your kitchen.

Wok burner Siemens gas hobs feature wok burners to deliver higher power, meeting the increasing demand for high speed cooking.

inductionAir: Our best induction hob, now even better

Combining induction technology with powerful extraction, the iQ700 inductionAir hob is intelligently designed for your kitchen.

The inductionAir System combines two great appliances: a flexInduction hob and the revolutionary new integrated ventilation. Thanks to this space-saving concept, you can enjoy more freedom and create an outstanding kitchen design.

- Stainless steel side trim

Hoods

Outstanding performance, intelligently designed.

Your kitchen is not only a place to cook, it is a place to entertain, relax after a hard day's work, or spend time with friends and family.

Siemens hoods work hard to keep your kitchen space fresh, and full of cleaner air whilst also providing ambient lighting. There's a hood for all kitchen designs, including the new inductionAir which combines our advanced flexInduction hob with a high-performance extractor for even clearer views in your kitchen.

Whether you choose a top-of-the-range iQ700 wall chimney hood, the state-of-the-art downDraft hood, a classic chimney hood or a canopy hood integrated into your kitchen cupboards. The majority of Siemens hoods come with a quiet and energy efficient motor so you can enjoy your living space.

Model shown: **LC97FVW60B** chimney hood

How to choose your hood.

With the trend for open-plan living, a quiet, efficient and powerful extractor is essential to deal with the strong cooking odours and grease-laden air that can otherwise linger throughout the house. There are two vital points to consider when choosing a hood; the first is whether you want the hood to be ducted or recirculated, and the second is its power rating. Here are some helpful pointers.

Model shown: **LC97FVW60B** chimney hood

Ducted or recirculated?

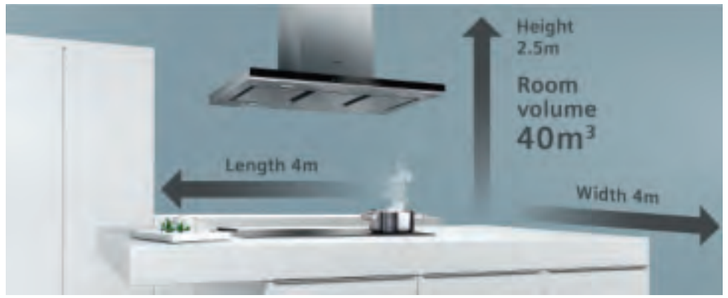
For optimum performance, your extractor hood should be ducted to the outside of the house, so that the extracted air is vented outside. But sometimes this is not practical, so most Siemens hoods can also operate in recirculating mode; where the air is passed through the metal filter to remove grease, and then through a carbon filter to remove odours before being directed back into the kitchen. Although the extraction rate is slightly lower when using this method than ducted extraction and the carbon odour filter will need to be replaced, recirculating the air offers an energy efficient benefit; cool air is retained in the home in the summer and warm air does not vent out during winter months.

The power to perform

A chosen hood must be powerful enough to effectively remove moisture and cooking odours from a kitchen. The hood should be able to change the air in the kitchen 12 times per hour.

Using this quick calculation, consumers can check whether a hood is sufficiently powerful.

Firstly, calculate the volume of the kitchen (HxWxD metres). Next multiply that figure by 12. The resulting figure is the ideal extraction rate required. Match this to a lower power level on the hood to avoid having to run at full power for increased efficiency.



For example

Room: 4m x 4m x 2.5m = 40m³
12 changes per hour in intensive operation: 12 x 40m³ = 480m³/h
So the hood must achieve >480m³/h in intensive mode.

iQdrive

State-of-the-art efficiency
Siemens iQ700 hoods feature innovative technology that saves energy. This is thanks to the highly efficient, durable brushless iQdrive motor which is powerful, but requires very little energy to run. Capable of handling smoke and grease in the most challenging cooking situations, and specially designed to last longer, the motor comes with a 10-year motor guarantee and a 5-year parts and labour guarantee.

Enjoy a fresher kitchen.

Model shown: **LD97AA670B** downDraft hood, **EX875KYE1E** flexInduction hob

The finishing touch for your kitchen

Our iQ700 range of hoods banish unwanted steam, grease and cooking smells efficiently. No more misted windows or greasy surfaces – just fresh-smelling surroundings. Plus they benefit from a fully coordinated design with all other Siemens iQ700 appliances.

We know that a kitchen is not only a place to cook; it is a place to entertain, relax after a hard day's work, or spend time with friends and family. The powerful motors in our cooker hoods and the specially designed housing mean an even quieter operation and fewer disturbances for you.

climateControl uses an ultra-sound sensor to detect the level of steam or air and adjusts the extraction power automatically. You can use the intensive setting to temporarily boost the extraction rate to cope with particularly demanding cooking conditions, for instance when stir-frying. Models that feature this will revert back to normal automatically after ten minutes so you don't have to remember to switch it back yourself.

Automatic ventilation. Ideal for removing strong, lingering cooking odours like curry or fish, or simply to keep your kitchen fresh throughout the day the interval operation setting will turn the hood on to ventilate the kitchen for a couple of minutes every hour. Some models even have an automatic run-on facility, the hood works for an additional ten minutes to deal with any lingering cooking odours before switching itself off.

Beautifully designed, the hoods feature fascia and control options that coordinate with Siemens iQ700 ovens and compact appliances. These include the sleek touchSlider and standard electronic soft buttons. When you are busy cooking, you shouldn't have to stop to think about how your cooker hood works. That's why we put a lot of effort into making our hoods intuitive and easy to use. Our lighting contributes to this too, using energy-efficient and long-lasting LEDs to perfectly illuminate your hob as well as making it an attractive feature.

modulAir domino hood. Flexibility in design.

Model shown: **LF16VA570B** modulAir domino hood.
Please see page **82** for more information.

Integrated worktop ventilation for a fresh and clear kitchen space.

Effective extraction without limitation

Kitchen designs are unique to all of us, so it's important to have a range of extraction that offers more flexibility. The new Siemens modulAir worktop ventilation allows various combinations with domino hobs as well as full size hobs that opens your kitchen to more possibilities. This space-saving installation solution fits perfectly, so the hood is right where it is needed: next to the hob for effective extraction. Worktop ventilation models are available in ducted and recirculation mode, both powered by the powerful, energy efficient and quiet iQdrive motor.

Seamlessly integrated with a sleek design

Siemens worktop ventilation can be seamlessly integrated into the worktop for easy kitchen planning, especially with island installations. They also give you a clear and uncluttered view in open plan kitchens, perfect for realising the most impressive kitchen designs.

Easy operation comes as standard with the sleek touchControl functionality that not only looks good but makes the hood quick to clean. And as it is placed next to the hob, it's easier than ever to focus on your cooking while adjusting the intensity of the hood.

There are many different combinations to fit worktop ventilation with your preferred hob choice. Ventilation can fit between individual domino hobs or either side of a larger hob for more flexibility in designing your dream kitchen.

When an everyday object turns into a design icon.

emotionLight Pro: Choose between 8 different pre-installed colours.

And choose between 256 colours with the Home Connect App.

New

emotionLight Pro

WiFi ready

Home connect

Today, more and more homes are equipped with open kitchens that blend with the other rooms and become a regular part of the living area. This type of kitchen needs matching appliances to make them appear seamless and impressive to look at.

The Decorative hoods create a seamless statement in your kitchen with the same materials such as black glass, the two-zone stainless steel panel, matching chrome lines and consistent controls.

Your extractor hood, your style, your light: emotionLight Pro

Your extractor hood now adapts to your taste. Simply choose between many different background light colours – for an extractor hood that matches your preferences. The colour range is extendable via the Home Connect App.

Programmed for convenience

The intuitive user interface allows you to control your Decorative hood exactly as you want it. Control the fan setting, the LED light and the colour of the emotionLight Pro as well as extended functions like the boost mode without any challenge. Furthermore, you can set an automatic delay to let the hood shut itself off after you've finished cooking – for even more convenience.

Hoods

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously innovative technology is the basis of these, our premium models.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality equipped with an attractive selection of smart features.

iQ100

Appliances with superb quality and practical design.

A Quick Feature Guide

Key functionality

Width Indicates the width and size of the hood. Siemens offer a wide range of hoods to fit different sized niches and with our range of hobs. For optimal results, the cooker hood should be at least as wide as the hob.

emotionLight Pro Adapt the colour of your lights to your taste. Choose between a range of different background light colours directly from the hood or access an extended colour range using the Home Connect App.

Light type: Halogen This type of lighting offers a bright light when cooking.

climateControl sensor The climateControl sensor automatically adjusts the power level of the hood dependent on the level of steam, leading to a pleasant ambiance in the kitchen without having to manually adjust the power yourself.

Energy efficient hoods Siemens hoods feature innovations that make them incredibly energy efficient to run, from our durable and quiet brushless iQdrive motor to LED lighting.

Light type: LED A range of hoods from Siemens are equipped with state-of-the-art LED lighting, ensuring the hob is illuminated evenly and clearly.

touchControl Intuitive operation for your hood: touchControl is seamlessly integrated into the front of the hood and operated by the touch of your finger. Cleaning is also even easier.

Wi-Fi ready With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

Other product features

Intensive setting
The intensive setting creates a powerful boost of extraction, perfect for tackling demanding food such as stir fry or steamed vegetables. This ensures moisture is properly eradicated, without misting windows and keeping the kitchen air fresher.

Boost Position
The Boost Position is enabled by slightly pulling the front panel out to capture more steam and draw more air through the hood, which is particularly effective when frying meat or fish.

touchSlider control
Control the power level by simply sliding a finger across the front of the hood using the touchSlider control. A clear LCD display also shows which functions are currently active. As there are no protruding buttons, hoods with touch controls are also easy to keep clean.

modulAir Domino Hood

modulAir domino hood shown with flexInduction domino hob: **EX375FXB1E**

For flexible kitchen planning, our iQ700 modulAir domino hood conveys an elegant impression of absolute quality and intelligent innovation.

The modulAir system efficiently removes unpleasant odours directly next to your cooking, providing more flexibility in open-plan and island kitchen designing. Easily create flexible cooking options combined with electric or gas domino hobs.

iQ700 **LF16VA570B**
Stainless steel

Key features

- touchControl with 7-segment display
- 3 power levels + 1 intensive settings – for stronger smells
- Automatic intensive revert
- Metal grease filter – dishwasher safe
- Max. extraction rate (normal): 540m³/h
- Max. noise level: 67dB re 20 µPa (power level 3 ducted circulation)

downDraft Hood

downDraft shown with flexInduction hob: **EX875KYE1E**

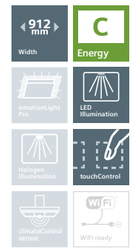
For a unique way of extracting, our iQ700 downDraft hood is ideal for installation in an island for open plan kitchens.

Conveniently placed under the worktop, the elegant and unobtrusive downDraft hood can be automatically raised when needed and then lowered when not in use at the touch of a button. Advanced extraction for a sleek finish to your kitchen.

iQ700 **LD97AA670B**
Stainless steel and black glass

Key features

- touchControl – experience intuitive control
- Electronic control and power level display
- 3 power levels + 2 x intensive settings – power boost for extra strong smells
- 1 x LED light strip
- softLight with dimmer function – creates ambiance
- Max. extraction rate (normal): 450m³/h
- Max. noise level: 61dB re 20 µPa (power level 3 ducted circulation)



Remote control

Remote Control

With a hood installed in the ceiling it's important to have complete control. Siemens ceiling hoods come with a remote control to change and manage each setting with ease.

Installed out of the way, our iQ700 ceiling hood conveys an elegant impression of absolute quality and intelligent innovation.

With this ceiling hood, experience powerful extraction and excellent lighting thanks to the advanced iQdrive motor and LED lights, ideal for installation in open plan kitchens and spaces that require out-of-sight extraction.

iQ700 **LF959RE55B** Stainless steel **90cm**

Key features

- Electronic controls via remote control
- 3 power levels
- Intensive setting – for stronger smells
- 1 x LED glass-panel 28W
- Automatic intensive revert
- softLight with dimmer function
- Metal grease filter – dishwasher safe
- Max. extraction rate (normal): 450m³/h
- Max. noise level: 56dB re 20 µPa (power level 3 ducted circulation)

iQ700 **LF959RB51B** Stainless steel **90cm**
LF959RB21B Matte white **NEW** **90cm**

New

Key features

- Electronic control via soft touch button control
- Remote control
- 3 power levels + 1 intensive setting – powerBoost for extra strong smells
- 4 x LED lights
- softLight with dimmer function – creates ambiance
- Intensive operation revert (4 minutes)
- Automatic after-running – ensure no smells linger
- Grease filter saturation indicator
- Max. extraction rate (normal): 570m³/h
- Max. noise level: 64dB re 20 µPa (power level 3 ducted circulation)

iQ700 **LF16RH560** Stainless steel **90cm**

Key features

- touchControl with 7-segment display
- 3 power levels + 1 intensive settings – for stronger smells
- 2 x LED lights
- Automatic after-running
- Automatic intensive revert
- softLight with dimmer function
- Metal grease filter – dishwasher safe
- Max. extraction rate (normal): 780m³/h
- Max. noise level: 63dB re 20 µPa (power level 3 ducted circulation)

touchSlider control

touchSlider

Control your Siemens hood with ease by simply sliding your finger along the touchSlider to select the power level. Stunning design meets sleek control with touchSlider.

Ideal for installation over island units, our iQ700 island hoods form an elegant design feature for your kitchen.

The new Siemens island cube hood is suspended from four cables over your island. The black glass and stainless steel strip design coordinates with other Siemens built-in appliances, while LED lights illuminate your worktop perfectly.

- Grease and charcoal filter saturation indicators
- Max. extraction rate (normal): 400m³/h
- Max. noise level: 67dB re 20 µPa (power level 3 ducted circulation)
- Re-circulation only

Flat Chimney Hoods

climateControl sensor

The innovative climateControl sensor measures vapours and cooking smells while you are cooking and automatically adjusts the extraction rate accordingly. When you're finished, it operates in after-running mode until all the odours are extracted before automatically shutting off.

With modern design, our iQ700 chimney hoods convey an elegant impression of style, quality and intelligent innovation.

For kitchens which demand modern design, the flat chimney hood is available in an elegant black or white glass finish. With advanced features such as the climateControl sensor and emotionLight Pro, the remarkable design and powerful performance of this hood allows you to create a highlight in your kitchen.

Box Chimney Hoods

The best in technology & design

iQdrive

The motor in Siemens high-performance extractor hoods is unrivalled when it comes to power. The brushless iQdrive motor with patented Siemens technology is able to remove kitchen smells and steam quietly, even when running at the highest extraction rate.

Designed to coordinate with other Siemens appliances, our iQ700 chimney hoods are the ideal solution for many kitchens.

With a sleek design of black glass and stainless steel, the Siemens box chimney hood is also designed to perform. With the efficient, quiet and powerful iQdrive motor, expect high extraction rates for a range of cooking while keeping noise to a minimum.

Cooling

Refrigeration appliances of the future. Today.

Clever ideas and innovative technologies in trend-setting design – Siemens built-in cooling appliances provide the ultimate way to store food flexibly and correctly for even more freshness.

From our smallest built-in fridge to our most impressive aCool models, each appliance brings you more freshness and convenience.

Now you're finally able to combine Siemens cooling appliances exactly the way you want – with the right combinations for every individual requirement, taste and kitchen design. Arrange appliances traditionally or side-by-side for even more built-in combinations.

Models shown: **CI30RP01** aCool fridge and **CI24WP02** aCool wine cabinet

Fresh, fresher, hyperFresh.

hyperFresh technology

Reduce food wastage and take control of what you eat and when with hyperFresh. By providing the ideal environment, the hyperFresh Technology storage system keeps your food fresh for as long as it needs to – and even longer – so you can enjoy your food whatever comes up in your life.

hyperFresh Premium.
Fresh for up to **three** times longer.

Enjoy fresher food for up to three times longer thanks to hyperFresh Premium. Simply select the kind of fruit and vegetables you want to store with the new control and let the drawer regulate how much humidity your food receives. With the drawer, fish and meat can also be stored at the perfect temperature.

hyperFresh Plus.
Fresh for up to **twice** as long.

The new hyperFresh Plus drawer doesn't just store fruit and vegetables, it provides them with the right conditions to keep them fresh for up to twice as long. Whether it's fruit or vegetables, simply switch the control and the humidity will be adjusted for optimum storage of your food.

hyperFresh.
Enjoy freshness longer.

The hyperFresh drawer offers freshness for longer thanks to the rippled bottom which allows cool air to circulate around your fruit and vegetables easily. As a result, you can see the quality and feel the freshness.

hyperFresh 0°C drawers.
Custom freshness for fish and meat: available in all hyperFresh models.

The two hyperFresh 0°C drawers are especially designed for the cooling needs of fish and meat. Keep them fresher in ideal conditions near 0°C for up to two times longer. The separate compartments also avoid unpleasant smells to transfer and both boxes can be easily pulled out with one hand to make room for other foods and drinks, cooling them down quicker and providing refreshing drinks sooner.

aCool: Superb styling, superb freshness.

aCool appliances allow you to create bespoke designs that are both elegant and functional to suit your individual taste.

Bespoke combinations to suit your needs.
Models shown: **CI24WP02** aCool wine cabinet, **FI24DP32** aCool freezer with indoor ice and water dispenser, **CI30RP01** aCool fridge

Discover our most sophisticated cooling appliance range: aCool.

Although they may be behind closed doors our elegant and functional range of built-in cooling appliances will become the talking point of any kitchen.

aCool appliances are designed for the ultimate in refrigeration and freezing for your kitchen. Designed to impress, they feature ample storage space and ensure your kitchen sets the statement it deserves. The modular range means that you have the choice to fit each appliance in different combinations.

The aCool range includes fridges, freezers and a wine cabinet as well as a French-Door fridge freezer in one unit. aCool accessories are sold separately, please speak to your preferred kitchen specialist for installation options and more information.

Telescopic storage shelves.

Unique storage solutions.

In-door ice and water dispensers.

Individual flare

For professional quality storage and care of wine, both white and red, choose the elegant and stylish aCool wine cabinet. Great for showcasing large collections, there is room for up to 98 bottles, all beautifully presented and conveniently accessible on telescopic storage shelves, and with two independently adjustable temperature controls the system can accurately maintain temperatures from 5°C to 18°C.

Sophisticated storage, stunning functions

With a digital display that shows the precise temperature and helps navigate easily through the operating menus, a door sensor that sets off a warning alarm if the door is left open for any reason; aCool appliances from Siemens feature top of the range technologies.

Outstanding design features

Seamlessly integrated into the sidewall of the fridge for maximum illumination and no loss of fridge space, the LED lighting is both energy efficient and practical. Available on selected aCool freezers, a conveniently placed in-door ice and water dispenser delivers chilled water, crushed ice and ice cubes at the touch of a button.

Create a combination to fit your lifestyle.

Shown combination:
GI38NA55GB + KI81RAD30

Thanks to a wide range of full-size fridges and freezers in a choice of sizes, it's now possible to create combinations that fit your lifestyle.

The new modularFit appliances are freely combinable
You need a kitchen that matches your lifestyle. That's why you're finally able to combine the cooling and freezing appliances exactly the way you want – with the right combinations for every individual requirement and taste. But the flexibility doesn't stop with the way you can arrange your kitchen. With unique and innovative cooling technologies the appliances even enrich your everyday life.

The new cooling and freezing appliances convince with their innovative combinability and integrated extras
Siemens modularFit appliances come with a new feeling of flexibility and exciting innovations like hyperFresh and noFrost technology. The simple installation as well as an energy efficiency category up to A++ round out the overall picture and guarantee a maximum of flexibility and freshness.

Explore the benefits of modularFit:

hyperFresh premium
hyperFresh premium keeps your food fresh for up to three times longer.

Anti-condensation technology
The anti-condensation technology enables you to combine the modularFit appliances in different heights.

easyInstallation
Thanks to easyInstallation almost all brackets, including screws for fixing, are pre-assembled.

Energy saving
The energy efficiency category up to A++ saves you both electricity and money.

modularFit allows you to combine your appliances over and under each other or side by side – with a lot of different possibilities.

Combine your cooling and freezing appliances the way you want: modularFit.
Whether it's on top or next to each other: thanks to the anti-condensation technology you are able to match cooling and freezing appliances however you like. The innovative technology prevents build-up of moisture between the appliances. Adapt your cooling experience to your kitchen and your life – with modularFit.

Designed for an easy life.

easyLift door trays – raise or lower to meet your requirements.

Model shown: **GI31NAE30G**

Clever ideas and innovative technologies in trend-setting design – Siemens range of built-in fridges and freezers store food flexibly for maximum freshness.

Storage space that adapts to your needs

Expect nothing but convenience with easyLift shelves. Even when full, you can raise or lower the shelf by 6cm to make room for taller items – ideal for serving jugs.

easyLift door trays

Ideal storage for large bottles in the fridge door, the shelf can be adjusted to meet the flexible requirements of your lifestyle – even when full.

easyLift shelves – even when full, you can raise or lower the shelf.

With noFrost technology you'll never have the job of defrosting the freezer again.

noFrost

You never need to defrost the freezer again

Who has time to defrost the freezer? Those with a Siemens noFrost freezer do, because there simply is no need to. Using an air circulation system to remove humidity and stop frost and ice building up on the freezer walls and packaging your freezer will look after itself. No longer will you have to run-down your freezer to defrost and remove the ice build-up. Hassle free, you can enjoy fresher food, no more soggy packaging and a frost free freezer for life.

lowFrost

lowFrost. Because life's too short

For those models that come with lowFrost, life is still made easier. lowFrost reduces the build-up of frost by up to 50%, meaning that you don't need to defrost the freezer as often, only once every 3 to 4 years. Designed to save you time and provide added convenience, you can spend your time on the things you enjoy, not defrosting your freezer.

Discover innovative technology and design.

Explore our range of refrigeration appliances to find the right one for you, whether you are looking for a specific combination to suit your lifestyle or want to keep your food tasting its best for longer.

A++ Energy

Minimum energy consumption

Packed with energy efficient solutions, a Siemens cooling appliance is perfectly designed for convenience and practicality. The most important energy efficiency technology is designed to keep your food fresher for longer. Storing foods at their optimum humidity and temperature creates less food wastage, meaning fewer trips to the supermarket and cutting food bills.

Designed to aid in keeping food fresh, the multiAirflow System circulates air around the fridge evenly, meaning that temperatures on all shelves are maintained. This cools down new warmer food entering the fridge 40% faster than a standard fridge ensuring freshness as well as saving energy, as the motor doesn't need to work as hard.

When you're on holiday or a business trip, Holiday Mode will ensure that food in the freezer stays cold enough to maintain freshness whilst reducing its energy output. Our fridges also feature a warning alarm that signals when the door has been left open, ensuring that energy isn't needlessly wasted and preserving the food inside.

Elegant, energy efficient lighting

LED lighting is the most efficient lighting available. Now integrated seamlessly into the side walls of most fridges, they give maximum illumination and no loss of fridge space. The freezer drawer is also lit in the same way with bright, non-glare light.

Magnetic door seals

Cleaning the door seals has never been easier with removable magnetic door seals. Peeling the seals away gives you the convenience of an easy clean, and should they ever need to be replaced you only need to replace the seals – not the entire door.

Precise temperature control at your fingertips

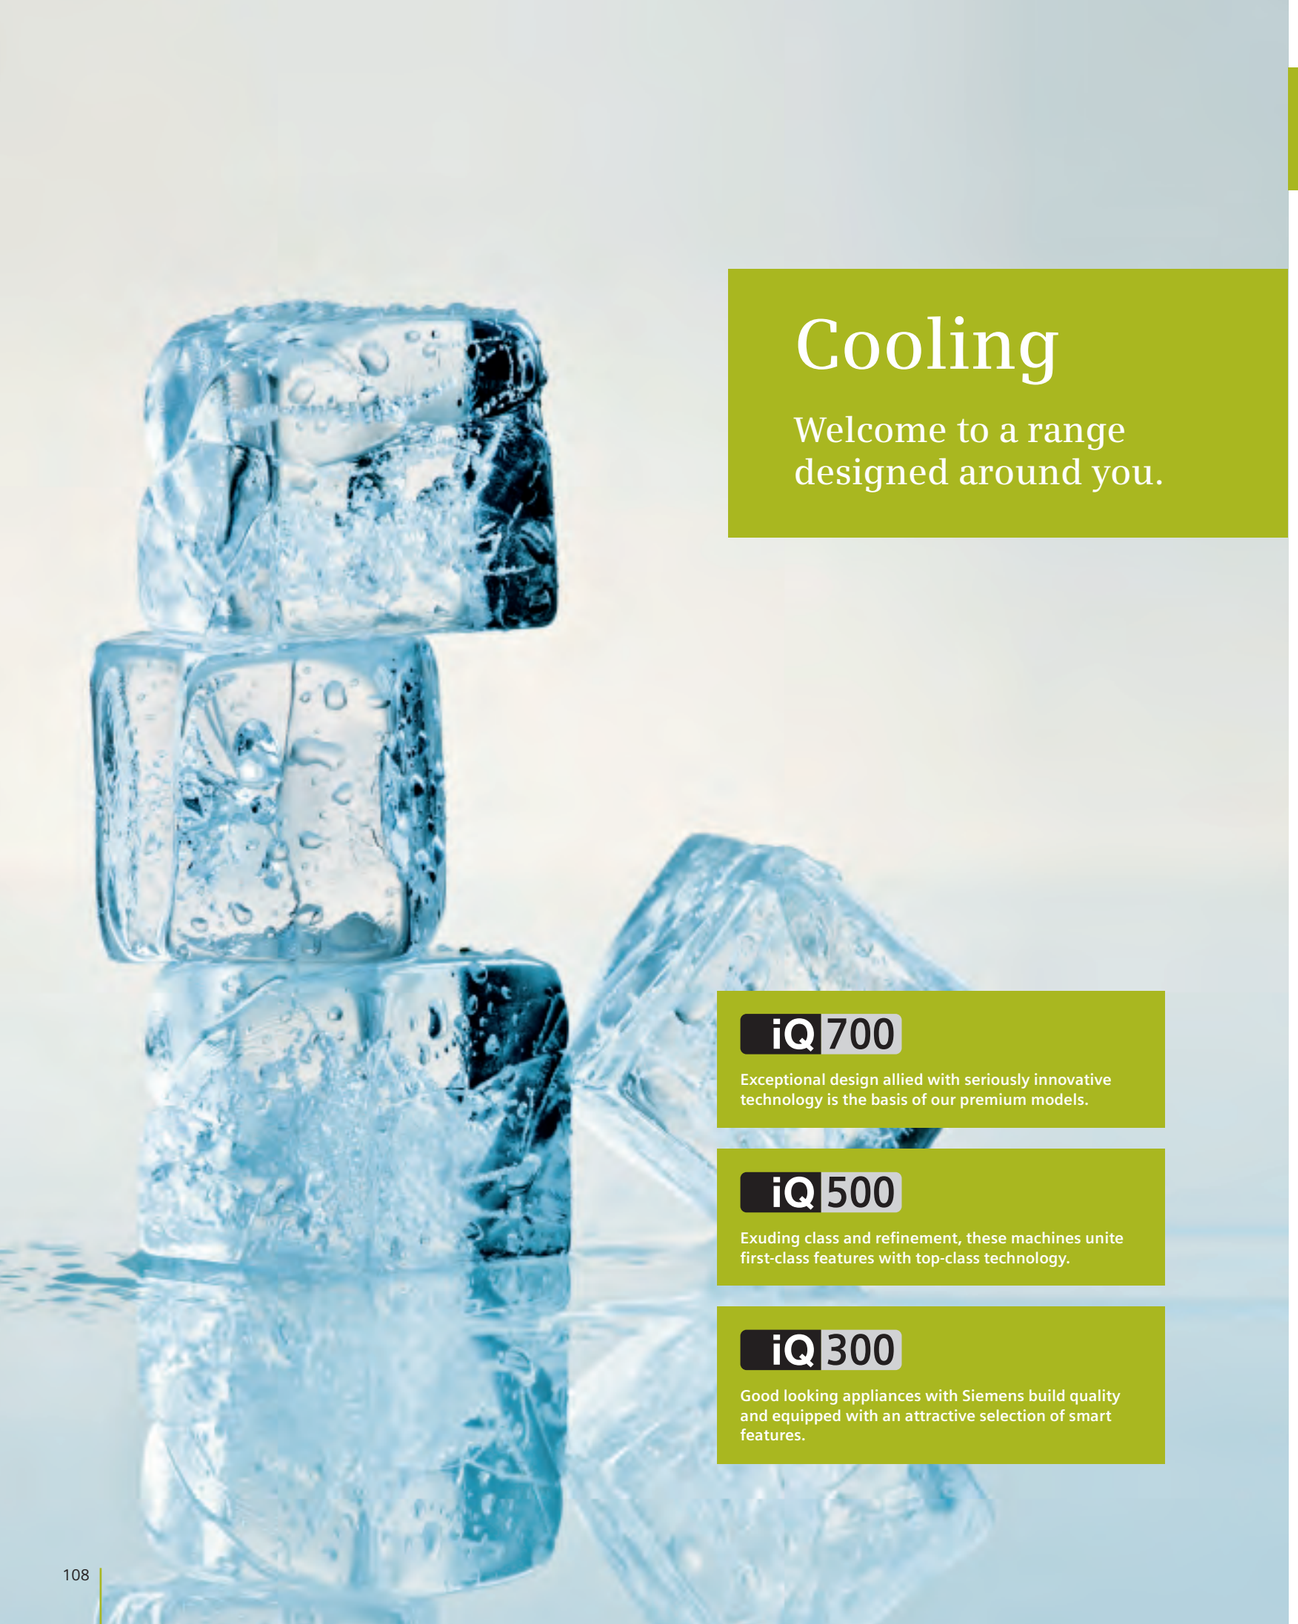
With easy to use electronic controls Siemens fridge freezers never leave you in the dark. The electronic display allows you to precisely set and change the temperature of your fridge and freezer and select certain modes, such as Holiday Mode, putting the power of your new fridge freezer at the end of your finger tips.

Perfect for entertaining...

bigBox

Storage made easy with bigBox

Big enough for your lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining.



Cooling

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously innovative technology is the basis of our premium models.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality and equipped with an attractive selection of smart features.

A Quick Feature Guide

Reference key:

airfresh Filter — Model does have this feature

airfresh Filter — Model does not have this feature

Key functionality

The key functionality shown applies to all cooling products. Please note, each type of cooling product will have their own separate icons.
Product types: American Fridge Freezers, aCool, Fridge Freezers, Built-in Fridges, Built-In Freezers, Built-under Fridges and Built-under Freezers.

Energy efficient cooling Nearly every cooling appliance in the new Siemens built-in range is up to 20% more energy efficient than its equivalent A-rated appliance. And our energy-saving iQ500 coolConcept fridges, freezers and fridge freezer use an incredibly efficient 40% less energy than an A-rated appliance.

bigBox Big enough for any lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining.

Heavy duty softClose The heavy duty softClose hinges dampen the closing of the door even when shut forcefully to keep your kitchen feeling calm. They are thoroughly tested to withstand constant opening and closing.

Hinge There are two types of hinges available on our built-in cooling appliances. Either a **fixed hinge** which allows the furniture door to be directly attached to the appliance door, or a **sliding hinge** which is attached to the furniture cabinet.

iceDispenser These models are able to dispense ice when needed thanks to a plumbed water connection. Depending on model, ice is available as cubes or crushed.

LED Illumination Integrated seamlessly into the side walls of our cooling appliances, LED lighting is very efficient and gives maximum illumination of your fridge and freezer.

noFrost Intelligent noFrost technology completely stops the build-up of frost and ice – for life. Not only a time saver, noFrost also ensures that the cavity space within is not compromised by frost build-up.

superFreeze When activated, superFreeze makes sure that warmer food added to the freezer doesn't raise the freezer temperature, stopping food partially defrosting.

waterDispenser Models with a waterDispenser are able to dispense water thanks to a plumbed water connection. For fresh and cool drinking water whenever you need it.

5 Year Warranty Available on our range of American style side by side fridge freezers, the 5 year warranty covers parts and labour. Also available on our range of freestanding appliances.

Wi-Fi ready With Wi-Fi enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

Fridge Freezer split Our range of fridge freezers are available in a variety of sizes with different splits of fridge areas and freezer areas. Alternatively, you can create a bespoke split using separate fridge and freezer units stacked or paired side by side.

Height Our built-in cooling appliances are available in a range of heights to fit your kitchen design and available space.

hyperFresh technology hyperFresh technology is designed to store your food correctly and keep food fresher for longer. hyperFresh Premium keeps food fresh for up to 3 times longer than standard food drawers.

In-door LCD display Precision control at the touch of a button. The in-door LCD dispaly allows the optimum temperature for food to be maintained easily, which in turn keeps your food fresher for longer.

multiAirflow System moderates the fridge temperature when new food is added, cooling down food 40% faster than a standard fridge.

superCool When activated, superCool ensures that warmer food entering the fridge does not increase the fridge temperature, which can affect other food. Guaranteed food quality as standard, time and time again.

Telescopic rails Easy to access drawers with telescopic rails. Powerful enough to take the weight of drawers and their contents, telescopic rails provide convenience when preparing meals.

Wine rack A wine rack is available on some models which is the perfect place to store wine of all varieties and make the best use of space in your fridge.

Other product features

activeCooling
Keeping the temperature correct in all areas of the fridge, an interior fan ensures a constant, even distribution of cool air.

airFresh filter
Neutralises odours in the fridge, ensuring that smells don't transfer between foods. Enjoy a fresh smelling fridge every time you open the door.

antiFingerprint
Keeps the fridge looking sleek and spotless on the outside, adding to the overall ambiance of the kitchen.

hyperFresh premium
The "dry" zone and "dewpoint" zone within these drawers determine how much humidity food receives. Storing foods at their optimum humidity can help them last up to 3 times as long. This creates less food wastage, meaning fewer trips to the supermarket and cutting down on food bills.

hyperFresh plus drawer
Be in control with the innovative humidity control, food can last twice as long in the specialist drawer. Not only does this keep in nutrients and minerals that help to create a delicious meal, but as food lasts for longer fewer trips to the supermarket are required – saving you time, effort and money.

hyperFresh
Keep food fresh in this fruit and vegetable drawer with rippled bottom which allows cool air to circulate around your food easily.

hyperFresh 0°C drawers
Food such as fish and meat benefit from temperatures close to 0°C, yet this can damage other food stored in the fridge. These boxes store meat and fish at the optimum preservation temperature, whilst allowing other food in the fridge to be chilled at around 4°C.

easyLift door trays
Ideal storage for large bottles in the fridge door, the shelf can be adjusted to meet the flexible requirements of consumers lifestyle – even when full.

easyLift glass shelf
Expect nothing but convenience with easyLift shelves. Even when full, you can raise or lower the shelf by 6cm to make room for taller items – ideal for serving jugs.

freshProtectbox
Provides the optimum temperature for individual foods, allowing them to stay fresher for longer. Fresh ingredients are critical to delicious meals, but also count for less wastage and fewer trips to the supermarket – saving you, the consumer, time and money.

Holiday Mode
By slightly reducing energy output, holiday mode ensures that food stays cool whilst on holiday or a long business trip; it's smart technology to help reduce energy bills.

lowFrost
Designed to save time and provide added convenience. It reduces frost build-up, meaning the freezer only needs defrosting once every 3 to 4 years.

softClose
Adding to the ambiance of any kitchen, the softClose door retracts effortlessly and creates minimal noise. In addition to aesthetics, a softClose ensures that items within the fridge aren't disturbed from a heavy impact, meaning no spills to clean.

varioShelf
Pull out as a normal shelf, or collapse half the varioShelf under itself and create extra height on the shelf below for bottles. The varioShelf is a convenient feature for consumers that need to adapt the space in their fridge.

Choosing the right hinge: fixed and sliding.

Siemens built-in cooling appliances are available with specific types of hinges that either aid the installation and design of your kitchen or can be matched for replacement appliances.

Fixed hinge
A fixed hinge means that the furniture door is mounted to the appliance door.

Advantages of a fixed hinge mean that Siemens can offer softClosing doors that automatically close at an angle of approx 15°-20° so you don't accidentally leave the door open. The installation also offers better access to the appliance interior and due to the optimised width, higher energy efficiency with competitive volume.

Sliding hinge
A sliding hinge means that the furniture door is mounted at the kitchen cabinet body as well as a sliding rail to connect the fridge and furniture door.

aCool Built-in Cooling Appliances

The best in technology & design

noFrost

Intelligent noFrost technology completely stops the build-up of frost and ice – for life. Not only a time saver, noFrost also ensures that there is no frost on the freezer walls or packaging.

Stunningly, uniquely Siemens, our iQ700 aCool Fridge Freezer conveys an elegant impression of absolute quality and intelligent innovation.

aCool Built-in Cooling Appliances

Professional quality storage

The aCool wine cabinet features two independently adjustable temperature controls, meaning the system can accurately maintain temperatures from 5°C to 18°C for the ideal storage of red and white wine.

The best in technology & design

Our stunning iQ700 aCool Wine Cooler conveys an elegant impression of absolute quality and intelligent innovation.

Thanks to the aCool modular range, this wine cabinet can be installed next to a range of other aCool appliances or on its own. The two independently controlled temperature zones and glass door with UV filter to protect wine from UV damage means the wine cabinet is perfectly suited to correctly storing your wine. Telescopic rails and LED lights allow you to showcase your collection in style.

Dishwashers

Innovative features for inspiring results.

Siemens dishwashers feature modern design and innovative ideas that make life easier.

Be fascinated by maximum flexibility thanks to practical innovations, such as height-adjustable baskets and foldable racks, stylish innovations such as door openAssist and timeLight floor projection, all working together to provide you with the perfect balance between modern design and innovative technology.

Whether you're serving dinner for family or hosting a party for friends, Siemens dishwashers ensure that you'll have sparkling clean dishes and glasses quickly.

Model shown: **SN678D06TG** fully integrated dishwasher

Welcome to a new era of dishwashing.

Model shown: **SN687D06TG**
fully integrated dishwasher

Innovative features for inspiring results: brilliantShine system.

Great moments start with small details. Such as brilliantly dry and shiny glasses directly out of your dishwasher – without any special effort or additional polishing.

That's what the new brilliantShine system with Zeolith® Drying is made for: creating the perfect conditions to start every day with a highlight, and sparkling glasses that you can be proud of.

Experience three perfectly synchronised, innovative features in just one washing cycle – for a brilliant shine directly out of your dishwasher. Refine your everyday life with limitless sparkling highlights.*

There are three factors in dishwashing that influence the shine of your glassware: temperature, cycle time, and the use of detergent.

The new brilliantShine system offers three intelligent solutions that take care of these factors:

- Zeolith® Drying uses a natural mineral to produce ideal heat conditions
- The Shine&Dry option swills all residues of detergent with extra rinsing water
- The Glass 40°C programme reduces the cycle time in order to be especially gentle for delicate glasses

*Depending on the detergent, the properties of the glassware, and the way it is placed in the dishwasher, the cleaning and drying results may slightly vary.

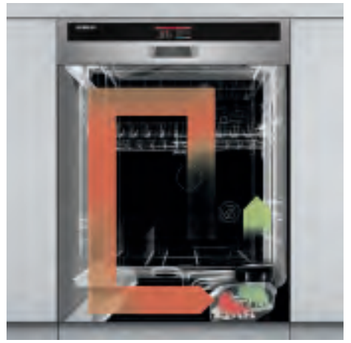
Saving energy naturally. Energy efficiency meets cutting edge design.

Using advanced drying technologies, Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of naturally occurring mineral, has the astonishing ability to absorb moisture and convert it to heat.

What does this mean for you? The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This results in perfect drying, with less energy usage.

The Zeolith® mineral is stored in the depths of the dishwasher; this regenerates itself and keeps working for the entire lifetime of the machine. Combine this with the economy 50°C programme to get brilliant results with minimal energy.

Drying phase – Zeolith® absorbs moisture and converts it to heat energy.



Cleaning phase – As the mineral is heated during the cleaning cycle, it is recharged and ready to absorb moisture once more.

Clever lighting to give you the wow-factor.

Model shown: **SN678D01TG** fully integrated dishwasher

Lighting innovations that create ambiance in your living space and keep you informed, Siemens dishwashers feature an internal blue emotionLight that has the wow-factor; once you've seen it in action you'll be sure to want to show off brilliantly cleaned glasses in your own home.

Cool glow of emotionLight
Creating a relaxed ambiance, the emotionLight uses LED lights to reflect off your brilliantly-cleaned glasses and create a cool blue glow emanating from inside your dishwasher when you open the door, and switching off again when you close it. The LED lights never need to be changed and will last the lifetime of your dishwasher.

timeLight: check the status of the cycle easily
Useable on any surface of any colour, the innovative timeLight projects the remaining time as well as other essential information of the dishwasher cycle onto the floor. With quiet dishwashers, this solution lets you know the dishwasher is running at a glance, so you can avoid opening the door mid-cycle.

infoLight: see if the dishwasher is running
With fully integrated dishwashers that are so quiet, it's helpful to know when a cycle is running. infoLight projects a beam of light onto the floor which appears whenever the dishwasher is running.

openAssist

A modern handleless kitchen deserves appliances that can fit seamlessly with their surroundings, yet still offer excellent results. With door openAssist you can open fully integrated dishwashers by simply touching the front of the unit, making loading and unloading easy. This removes the need for a handle and is the ideal choice for designer kitchens.

Added extras designed to make life easier.

With cutting-edge technology, Siemens dishwashers give you more than just clean dishes.

Machine Care with Siemens dishwashers
For excellent results when washing and drying, it's important to look after your dishwasher correctly. With Siemens Machine Care, the dishwasher will notify you when a cleaning cycle is recommended to be run, when you should clean your filter, and when to replenish salt or rinse aid. This involves the running of a high temperature programme to leave your dishwasher sparkling clean and free from grime and bacteria that could build up with lower temperature washes.

varioHinge
Siemens built-in dishwashers with varioHinge ensure your kitchen design can be completely flexible with the installation of your dishwasher. Perfect for cabinet doors in handleless kitchens, or designs with low baseboards and longer cabinet panels, the varioHinge allows the cabinet door to be pushed upwards when opened to avoid the door catching. The varioHinge reduces the bottom gap between cabinet doors too for a seamless finish to your kitchen.

TFT Display
The clearTextTFT Display integrated into the top control panel of our iQ700 dishwashers matches the seamless design of our handleless openAssist models. The clearText TFT Display shows all selected programme information at a glance. What's more, the information button allows you to quickly discover available programmes and options with ease, as well as see the exact start, end and running times.

Explore the iQ range of dishwashers, where exceptional quality comes as standard.

varioSpeed Plus
Ever needed your dishes cleaned quickly, forgotten to put the dishwasher on in the morning, or simply need clean plates before your guests arrive? That's why we've introduced varioSpeed Plus, the perfect time saver. varioSpeed Plus reduces the time it takes to wash and dry a full load down to a third.

Ideal when you need your cutlery and plates in a hurry, just press the varioSpeed Plus button in conjunction with your desired programme* and it will run the dishwasher significantly faster without compromising on wash quality. Used together with the Eco 50 programme, varioSpeed Plus will wash and dry a full load in just over an hour. Giving you time saving solutions when you need them the most, and sparklingly clean dishes in super swift time.

*Except quick wash 45°C programme

rackMatic™
Ever found yourself loading and unloading the dishwasher because the last pan doesn't fit? rackMatic™ conveniently allows you to raise and lower the height of the top basket, even when the dishwasher is full. With the simple press of a lever you can adjust the basket to suit your washing needs. This increased flexibility ultimately saves you time, letting you get back to more important things.

dosageAssist
Ensuring that your dishes receive the best possible clean every time, dosageAssist quickly and evenly dissolves your dishwasher tablets throughout the entire machine, leaving no mess for you to clean at the end of the cycle. Rather than the detergent tablet dropping to the bottom of your machine, it falls into an innovative basket at the front, allowing it to dissolve completely leaving no mess and a brilliant clean.

extraDry
Why spend time towel-drying plasticware when extraDry does it for you? extraDry is designed to make sure that plasticware comes out of the dishwasher bone dry – no more water droplets, no more hand drying, saving you time.

halfLoad
Great for couples and smaller households, the halfLoad function lets you place items anywhere in the dishwasher. Ideal for smaller loads, it uses up to 20% less water and 10% less energy to produce a brilliant clean. A dishwasher uses water and energy most efficiently when run with a full load. However, halfLoad offers a resource saving option for when you can't wait until the dishwasher is full.

No need to do separate washes with intensiveZone.

intensiveZone
With intensiveZone, you can wash delicate glasses and burnt cooking pans in the same wash. The higher temperature and increased spray pressure in the lower basket ensures stubborn stains are removed, whilst delicate items are protected in the top basket. This means there is no need to separate washes in to different loads for two cycles, and no need to soak heavily soiled pans overnight saving time. And with iSensoric, the water volume sensor ensures an optimal amount of water within the dishwasher at all times.

varioFlex basket systems offer total flexibility in your dishwasher

varioFlex Pro basket system and varioDrawer Pro
varioFlex Pro creates extra room for pots and pans. With an optimised lower basket design for large plates and adjustable tines highlighted with blue touchpoints, your dishwasher can adapt to any load quickly and easily. Adding a third shelf for cutlery, varioDrawer Pro removes the need for a cutlery basket and creates more space, even for espresso cups.

varioFlex basket system and varioDrawer
The varioFlex basket system offers more options for loading your dishwasher with selected adjustable basket racks, while the varioDrawer removes the need for a cutlery basket leaving more space in the lower basket. Flexible elements in the baskets are indicated by darker grey colouration, and in some models blue coloured touch points.

varioFlex Pro basket system

varioFlex basket system

10 year anti-rust warranty
Due to advanced materials and manufacturing technologies, in addition to our standard appliance warranty, we provide a free warranty against rusting-through of the dishwasher's inner cavity.

Siemens recommends using Finish dishwashing products
Siemens has tested and recommends using Finish dishwashing products. For the ultimate clean and shine, plus added protection against corrosion, Siemens recommends new Finish Quantum Shine & Protect.

Dishwashers

Welcome to a range designed around you.

iQ700

Reserved for our premium dishwasher range. iQ700 stands for exceptional design allied with seriously intelligent and innovative technology.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality and equipped with an attractive selection of smart features.

Model shown: **SR66T090GB**
fully integrated slimline dishwasher

A Quick Feature Guide

Model shown: **SN678D06TG**
fully integrated dishwasher

Key functionality

Energy efficient class All Siemens built-in dishwashers are rated at least A+ for energy efficiency.

Wi-Fi ready With Wi-Fi-enabled Siemens home appliances and Home Connect, you can manage your home appliances from wherever you are and discover more possibilities to make your life easier.

emotionLight The emotionLight uses LED lights to create a cool blue glow emanating from inside your dishwasher.

infoLight Projects a beam of light onto the floor to show the dishwasher is running.

openAssist Open fully integrated dishwashers by simply touching the front of the unit.

timeLight Useable on any surface of any colour, timeLight projects the remaining time of the dishwasher cycle on to the floor.

varioDrawer By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket and creates more space. Also available in varioDrawer Pro for added flexibility.

Zeolith® is a naturally occurring mineral that converts moisture to heat. This heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of the dishwasher for the drying process.

Reference key:

Model does have this feature

Model does not have this feature

Other product features

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle.

duoPower (Slimline only)
Benefitting from 2 spray arms under the top basket as opposed to just one, duoPower ensures that dishes in all areas of the dishwasher receive the best possible clean.

extraDry
Designed to make sure that plasticware comes out of the dishwasher bone dry.

halfLoad
Great for couples and smaller households, run the dishwasher with half a load and use less water and energy compared to a full load.

hydroDry
The hydroDry system extracts moisture from the air in the machine efficiently, leaving the contents of the dishwasher to dry hygienically without the need for external air.

hydroSafe
Cuts off the water supply from the tap if a leak is detected, even if the dishwasher isn't in use. Precision protection for your kitchen.

hydroSensor
Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.

Hygiene Plus
Great for cleaning chopping boards, food containers and utensils, the hygiene option kills 99.9% of bacteria and germs. Providing a simple solution to the upkeep of your family's health, the final rinse heats up to 70°C regardless of the cycle you choose.*

*Not on delicate programme.

intensiveZone
Delicate glasses and burnt cooking pans can be put into the same wash so there is no need to separate washes in to different loads.

loadSensor
By monitoring that the optimum amount of water is flowing through the dishwasher throughout the cycle, loadSensor helps to ensure that dishes are cleaned thoroughly.

Silence Programme
This programme is an adapted Eco 50°C programme that achieves a noise reduction of 2 dB by decreasing the spray pressure and extending the run time.

rackMatic™
Conveniently allows you to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

Shine&Dry
Straight from dishwasher to table, Shine&Dry delivers streak-free shining glasses.

varioDrawer Pro
By adding a third shelf for cutlery, varioDrawer Pro removes the need for a cutlery basket and creates more space.

varioFlex Pro basket
Creating extra space for pots and pans by adjusting slats to suit different loads, the inside of the dishwasher is constantly adaptable.

varioHinge
The varioHinge is the optimal solution for installing your dishwasher as the fully integrated front panel moves up slightly when the machine is opened. This removes the need to have large gaps when dishwashers are installed at a high level.

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality.

Fully Integrated Dishwasher

brilliantShine system

brilliantShine system

Experience three perfectly synchronised, innovative features in just one washing cycle – for a brilliant shine directly out of your dishwasher.

Stunning design and intelligent technology, our iQ700 dishwasher features brilliantShine system with Zeolith® drying, giving you brilliantly dry and shiny glasses directly out your dishwasher.

This Wi-Fi ready iQ700 dishwasher allows you to take control wherever you are and receive notifications with the Home Connect app. Keeping your energy consumption to a minimum, this model uses Zeolith®, a naturally occurring mineral, to create the heat and energy.

Home Laundry

High-performance Washing Machines for seamless kitchen designs.

Siemens have created a built-in laundry range that is cleverly designed and quietly energy efficient, developed to make laundry easier and less of a chore.

Model shown: **WI14W500GB**

Model shown:
WI14W500GB

Designed to make laundry less of a chore.

Our machines take full advantage of the latest technology and innovation all behind closed doors.

Cleverly designed and quietly efficient our built-in washing machines and washer dryers work away behind closed doors, producing beautifully clean clothes without ruining the beautifully clean lines of your living space.

A+ Energy

Washing machines

B Energy

Washer dryers

Built in to a modern kitchen or utility room, Siemens washing machines and washer dryers not only look great, they perform too. With state-of-the-art technology they are extremely energy efficient, easy to use and save time and money.

From the sophisticated sensor technology and cutting edge engineering to the carefully designed range of programmes and options offered, our built-in laundry appliances are designed from the ground up to help manage the range and complexity of modern textiles.

hydroSafe

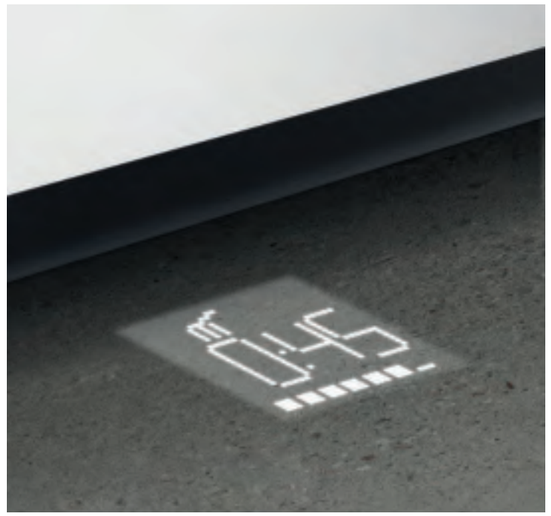
hydroSafe

Guarantees 100% lifelong protection against water damage. If a leak does occur, hydroSafe immediately cuts off the water supply from the tap.

Extremely Quiet

Extremely quiet

Our built-in washing machines are some of the quietest on the market, which also set the benchmark for low noise when spinning. Thanks to the antiVibration side panels, any noise from vibrations is significantly reduced. Now you can relax in the comfort that your Siemens built-in laundry appliance will minimise any noise when running so you can entertain, relax or get on with your day without disturbance.



timeLight

timeLight

Stay in control and let the laundry fit around you. The timeLight projects the remaining cycle time and programme status onto any floor surface to keep you informed at a glance – which is visible without opening the cabinet door.

8 kg Capacity

8kg Capacity

The iQ700 built-in washing machine comes with a generous 8kg capacity, perfect for ensuring you always have enough room for every load. This results in fewer washes and better use of your time.

Home Laundry

Welcome to a range designed around you.

iQ700

Exceptional design allied with seriously intelligent and innovative technology is the basis of our premium model.

iQ500

Exuding class and refinement, these machines unite first-class features with top-class technology.

iQ300

Good looking appliances with Siemens build quality equipped with an attractive selection of smart features.

A Quick Feature Guide

Reference key:

Extremely Quiet — Model does have this feature

Extremely Quiet — Model does not have this feature

Key functionality – Washing machines

Energy efficient washing machines All Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine.

Drum clean An automatic alert after 20 washes to run the Drum Clean programme on a 90°C or 60°C wash keeps the appliance clean and odour free.

hydroSafe Guarantees 100% lifelong protection against water damage. If a leak does occur, hydroSafe immediately cuts off the water supply from the tap.

rapid15 Washes, rinses and spins lightly soiled clothing in just 15 minutes, designed for those with hectic lives this wash cycle will clean clothes when you're in a hurry.

Capacity The large 8kg drum capacity is the perfect size to hold more laundry and reduce the number of loads you have to wash.

Extremely Quiet Thanks to the brushless iQdrive motor and antiVibration side panels, Siemens built-in washing machines are particularly quiet in their class.

iQdrive with 10 year motor warranty The iQdrive motor is covered with a 10 year motor warranty for additional peace of mind and incredible performance.

timeLight Projects the remaining cycle time and programme status onto the floor to keep you informed at a glance.

Washer dryers

Energy efficient washer dryers All Siemens washer dryers automatically adapt the wash time and energy consumption to the amount of laundry in the machine.

Extremely Quiet Our washer dryers are designed to be as quiet as possible while still offering excellent performance and results when washing and drying, so you can get on with your day without any disturbance.

rapid15 Washes, rinses and spins lightly soiled clothing in just 15 minutes, designed for those with hectic lives this wash cycle will clean clothes when you're in a hurry.

Washing Capacity The large 7kg washing capacity ensures you can wash clothes with fewer loads.

Drum Clean An automatic alert after 20 washes to run the Drum Clean programme on a 90°C or 60°C wash keeps the appliance clean and odour free.

hydroSafe Guarantees 100% lifelong protection against water damage. If a leak does occur, hydroSafe immediately cuts off the water supply from the tap.

Washing + Drying The continuous washing and drying cycle is suitable for loads up to 4kg. This cycle will first wash the clothes on your chosen setting and once finished, automatically switches to drying the clothes for ease and speed.

Drying Capacity The 4kg drying capacity ensures you can dry clothes effectively.

Other product features

autoLoad
Removes the guesswork from laundry, automatically selecting the correct programme for your clothes to produce the best results. All you need to do is add detergent and laundry – the machine will do the rest.

aquaTronic wash system
The perfect wash for delicates. Water enters the drum from three sides to quickly soak the delicate fabrics, eliminating the dry friction within the drum, delivering a more gentle wash action for delicate fabrics, while the flat sided paddles do their work.

flexiTime
Designed for when speed is the only option, flexiTime reduces selected laundry cycles by up to 30%.

Fluff clean
A ten minute fluff removal cycle on washer dryers that removes fluff deposits in the machine, a light indicates when this is needed.

Foam detection system
Detects if too much foam has been created in the wash, if so, it will adjust the drum movement and add an extra rinse cycle if necessary.

Night wash programme
Specially designed to wash and dry up to 4kgs overnight.

rapid60
Perfect for washing large amounts of clothes, fast, rapid60 washes 5kg in 60 minutes, with A class results.

reloadFunction
The reload function allows the machine to be paused and the door opened at the next safe opportunity. It's the perfect solution when an extra item needs to be added to the load.

Washing Machines

iQ700 WI14W500GB
White — New

Key features

- Capacity: 8kg
- Noise (wash) – 41dB (A) re 1pW
- Noise (spin) – 67dB (A) re 1pW
- Max. spin speed: 1400rpm
- timeLight – projects the remaining cycle time onto the floor
- varioPerfect – change the setting on some washes to what is most important to you; time or energy
- Special programmes – rapid60, darkwash, shirts/blouses, textile guard, mixed load, hygiene, rapid15, duvet, drum clean with reminder, rinse/spin/drain, delicates/silk
- Time delay – wash when the time is right for you
- Large display – for easy navigation
- Energy consumption per cycle – 0.78kWh (full load 60°C cotton programme)
- Moisture content % on dry load after max. spin – 53%
- Estimated annual energy and water consumption (wash 220 full loads) – 137kWh; 9900 litres

Knowledge and expertise, where you need it, when you need it.

Siemens customer service

Siemens Home Appliances is part of BSH Home Appliances – winner of the Domestic and General Total Excellence and Quality Award for 2016.

Purchasing a Siemens appliance gives you access to our expert customer service team; for the lifetime of your appliance. With 2-5 year manufacturer's warranties on offer, multi-award winning products to choose from and assistance from an outstanding customer service department, you can be assured that the appliance you are buying will offer peace of mind.

Expert advice

Siemens Customer Service staff are full of knowledge and expertise, whether you have a simple question, want to order a spare or replacement part or require an engineer to visit your home. With engineers based locally across the country*, no one is better suited to help, and all Siemens repairs are analysed in advance so that we bring the correct replacement spare parts likely to be needed on the first visit**.

This is all supported by our outstanding online services, available 24 hours a day.
Visit **siemens-home.bsh-group.com/uk** for product information, downloadable brochures, videos, instruction manuals and FAQs.

Telephone:
UK: **0344 892 8999** – Options 3 and 4
IRL: **(01) 450 2655**

Original replacement spare parts

Order replacement parts online and access exploded diagrams to help you locate the correct part. As a manufacturer we only use original spare parts and we keep a comprehensive range of parts available for up to ten years.

Telephone:
UK: **0344 892 8999** – Option 2

Greener products, cleaner planet.

Investing in the future, Siemens is committed to protecting the Earth's natural resources.

More than 80 percent* of the environmental impact occurring over a home appliance's lifetime is attributable to the usage phase. This is why, over the last few decades, BSH developers have been focusing on designing appliances that consume less energy, water and detergent. Environmental protection and energy efficiency are core topics within our corporate strategy.

What does this mean to you?

Our innovative energy-saving solutions from leading energy saving motors, to the brightest white, low-energy (LED) light can save you money and decrease your energy usage.

Energy saving comes automatically

Supporting environmental initiatives, the EU energy efficiency label is carried on all appliances, with class A+++ being the most energy efficient – reinforcing our focus on reducing energy consumption of our appliances, reducing our carbon footprint, and passing on this energy saving to you, the consumer.

*Source: BSH Bosch und Siemens hausgerate GMBH, Our Super Efficiency Portfolio.

World-class performance. Minimum environmental impact.

World-class performance

The Siemens i-Dos washing machine eliminates overdosing, cuts longer wash cycles and reduces unnecessary extra rinsing. This saves up to 7,000 litres of water and 11 litres of detergent per year, whilst cutting down the average cycle time by 14 minutes – amounting to a saving of two full days per year in the machine's running time.

All Siemens washing machines automatically adapt the wash time and energy consumption to the amount of laundry in the machine. Decreasing a washing machine's cycle time by up to 65%, speedPerfect is ideal for getting through laundry quickly, whereas ecoPerfect reduces the machines energy output by up to 50% by lengthening the time of a cycle. All of our core range of models carry the most efficient A+++ energy rating.

All Siemens fridge freezers have a minimum A+ rating for energy efficiency. All freestanding A++ and A+++ cooling appliances are now supplied with a green power cable and the freezers come with two green ice packs to help identify them as being super efficient.

Much is the same for dishwashers with all of the Siemens range rated at least A+ for energy efficiency. Siemens dishwashers with Zeolith® set the standard for A+++ energy efficiency. Zeolith® science combined with our smart energy-saving hydroDry technology helps to make our innovative dishwashers super efficient.

In buying a Siemens product you can expect outstanding world-class performance, as well as a clear conscience.

Keep up to date with all of Siemens' activities.

- ducted / recirculating power level Minimum	58 / 54	
- ducted / recirculating power level Maximum	66 / 67	
- ducted / recirculating power level Intensive	75 / 75	
Motor power (W)	170	
OPTIONAL ACCESSORIES		
Wireless temperature sensor	HZ39050	
Set of four pans (3 x pans, 1 x sauté pan)	HZ390042	
Rectagular roasting pan with lid (approx. 320 x 200mm)	HZ390011	
Steamer pan insert of use with HEZ390011 roasting pan	HZ390012	
Teppan Yaki (approx. 300 x 200mm)	HZ390511	
Teppan Yaki (approx. 400 x 200mm)	HZ390512	
Griddle plate (approx. 400 x 200mm)	HZ390522	
cleanAir recirculating kit	HZ381500	
Exhaust kit	HZ381400	

■ Yes, model has this feature. – Feature not available for this model.

All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

[1] Max 3 sensors at any time; one WSP provided.
[2] Air flow and noise declarations made in line with CECED Code Of Conduct.
[3] Measured according to EN61591 on largest pipe diameter.
[4] Sound pressure measured according to EN60704–2–13 on largest pipe diameter.
[5] Sound power measured according to EN60704–3 on largest pipe diameter.

■ Yes, model has this feature. – Feature not available for this model.

All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

[1]Max 3 sensors at any time. "Ready" identifies products with feature enabled, sensor available as additional purchase. If sensor is supplied, number supplied is detailed.
[2]On 60cm model, the single centre aux inductor can work only with either the left or right zones. On the 80cm models, there are two aux inductors, one allocated each to the left and right zones. No bridge is possible to use 2 aux zones together.

Teppan Yaki (approx. 400 x 200mm)	–	–	–	–	–	–
Griddle plate (approx. 400 x 200mm)	–	–	–	–	–	–

■ Yes, model has this feature. – Feature not available for this model.
All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

[1]Max 3 sensors at any time; one WSP provided.
[2]On 60cm model, the single centre aux inductor can work only with either the left or right zones. On the 80cm models, there are two aux inductors, one allocated each to the left and right zones. No bridge is possible to use 2 aux zones together.

■ Yes, model has this feature. – Feature not available for this model.

All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

[1]Dual circuit means standard outer flame ring plus 2nd inner flame ring.

[2]High power output for rapid heating – especially valuable for flash and wok frying.

[3]Dual control means the inner and outer rings of a dual circuit burner can be controlled independently.

[4]Diamond refers to the visual layout of the burners – i.e. Diamond shape as opposed to normal square layout for 60cm hobs.
Diamond layout offers:
– greater convenience / accessibility with 2 large pans at the same time.
– compared to models with wok on the rear zones, you can work with larger diameter wok pans without touching the rear wall and forcing the pan off centre over the burner.
– no need to reach over front zones to access the higher power burners.
– compared with a model with a wok at the front left there is a safety argument as it offers a good compromise between easy access and child safety.
– compared to wok front level, the extra distance to control dials allows a higher power wok burner to be used without making the controls too hot and offering added convenience in terms of power available.

[5]Pan supports can be cleaned in the dishwasher. Supports have special additional coating and hand finishing of enamel.

[6]For round based pans.

*** With fitted oven underneath, possibly more; see space requirements for the oven

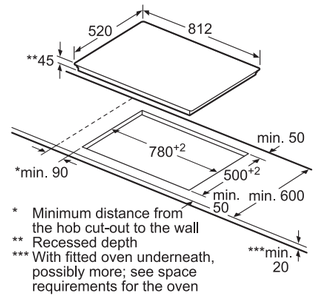
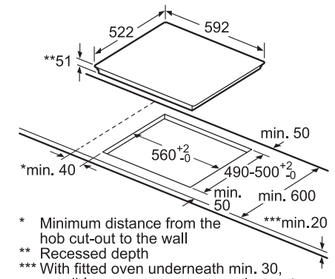
quickLite ceramic hob ET875FCP1D



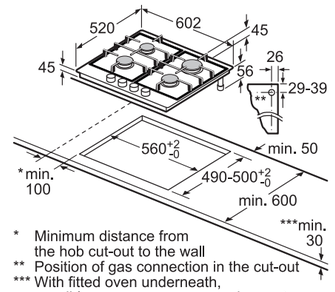
* Minimum distance from the hob cut-out to the wall
** Recessed depth
*** With fitted oven underneath, possibly more; see space requirements for the oven

quickLite hob ET651HE17E



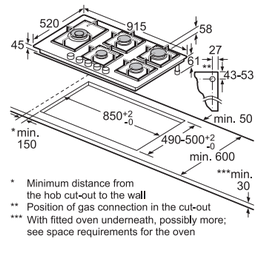
* Minimum distance from the hob cut-out to the wall
** Recessed depth
*** With fitted oven underneath min. 30, possibly more; see space requirements for the oven

Gas hob ER6A6PD70

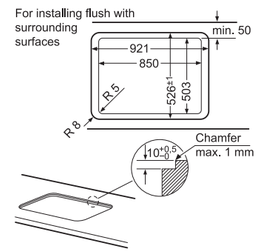


* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

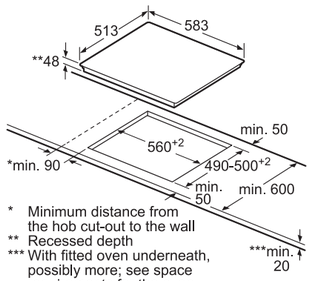
Gas hob EP9A6SB90



* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven



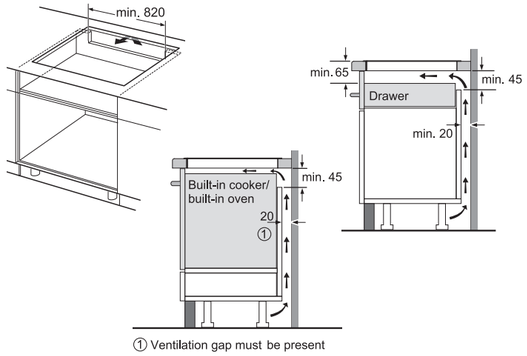
quickLite ceramic hob ET645CEA1E



* Minimum distance from the hob cut-out to the wall
** Recessed depth
*** With fitted oven underneath, possibly more; see space requirements for the oven

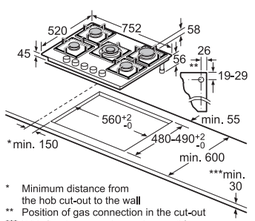
For all flexInduction, induction and quickLite ceramic hobs

Below are diagrams for installtion applicable to all flexInduction, induction and quickLite ceramic hobs

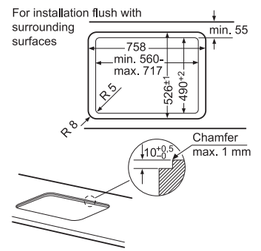


① Ventilation gap must be present

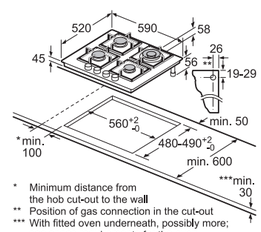
Gas hob EP7A6QB90



* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven



Gas hob EP6A6HB20



* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

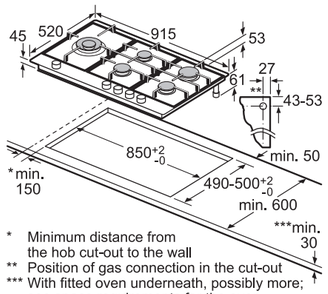
Siemens cannot accept responsibility for incorrect planning or installation as a result of the use of these line drawings.

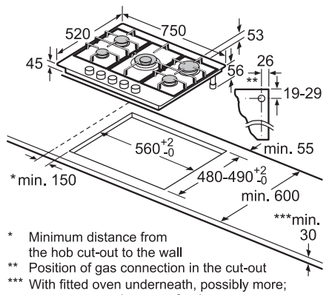
Hob Technical Diagrams

Gas hob EC9A5SB90



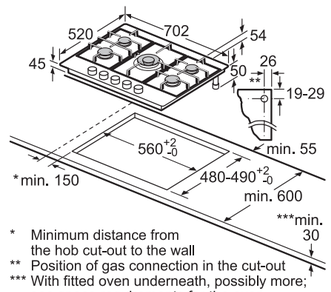
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Gas hobs EC7A5RB90 and EC7A5QB90



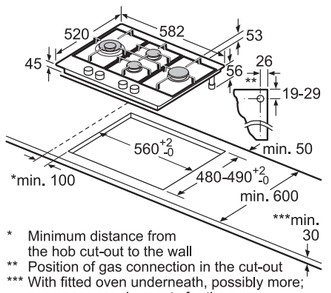
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Gas hob EC715RB90E



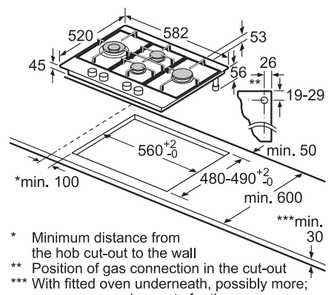
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Gas hobs EC6A5IB90, EC6A5HC90 and EC6A5PB90



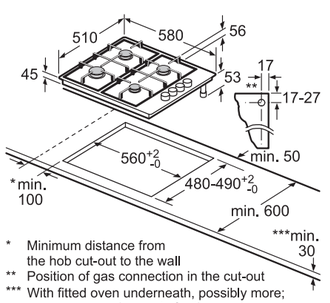
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Gas hobs EG6B5HB60 and EG6B5PB60



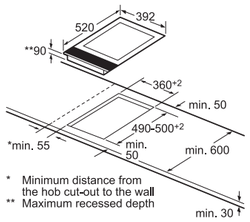
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Gas hobs EB6B5HB60 and EB6B5PB60



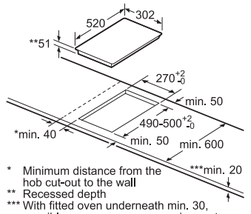
* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

Teppan yaki domino hob ET475FYB1E



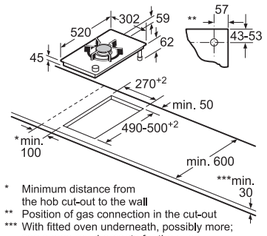
* Minimum distance from the hob cut-out to the wall
** Maximum recessed depth

flexInduction domino hob EX375FXB1E



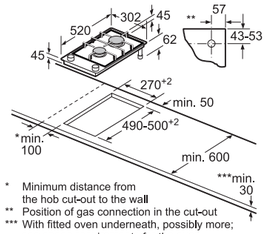
* Minimum distance from the hob cut-out to the wall
** Recessed depth
*** With fitted oven underneath min. 30, possibly more; see space requirements for the oven

Wok domino gas hob ER3A6AD70



* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

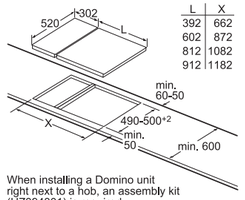
Domino gas hob ER3A6BD70



* Minimum distance from the hob cut-out to the wall
** Position of gas connection in the cut-out
*** With fitted oven underneath, possibly more; see space requirements for the oven

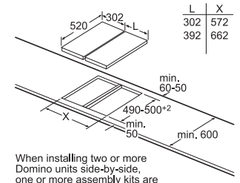
Domino hob combination installation

Below are diagrams showing the possible combinations for installing your Domino hob



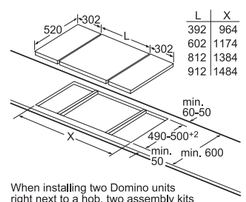
L	X
392	662
602	872
812	1082
912	1182

When installing a Domino unit right next to a hob, an assembly kit (HZ394301) is required.



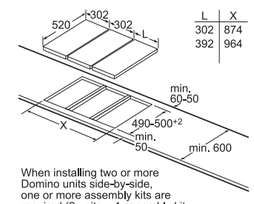
L	X
302	572
392	662

When installing two or more Domino units side-by-side, one or more assembly kits are required (2 units = 1 assembly kit, 3 units = 2 assembly kits, etc).



L	X
392	964
602	1174
812	1384
912	1484

When installing two Domino units right next to a hob, two assembly kits (HZ394301) are required.



L	X
302	874
392	964

When installing two or more Domino units side-by-side, one or more assembly kits are required (2 units = 1 assembly kit, 3 units = 2 assembly kits, etc).

Domino combination possibilities with corresponding device and cutout dimensions

Width type:	30	40	60	70	80	90		
Device width:	302	392	602	710	812	912		
	A	B	C	D	L	X

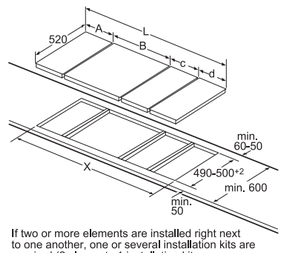
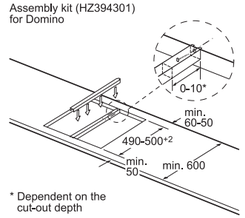
2x30, 1x60	302	302	602	-	1206	**1174**		
2x30, 1x70	302	302	710	-	1314	**1282**		
2x30, 1x80	302	302	812	-	1416	**1384**		
2x30, 1x90	302	302	912	-	1516	**1484**		
1x30, 2x40	302	392	392	-	1086	**1054**		
1x30, 1x40, 1x60	302	392	602	-	1296	**1264**		
1x30, 1x40, 1x70	302	392	710	-	1404	**1372**		
1x30, 1x40, 1x80	302	392	812	-	1506	**1474**		
1x30, 1x40, 1x90	302	392	912	-	1606	**1574**		
3x40	392	392	392	-	1176	**1144**		
2x40, 1x60	392	392	602	-	1386	**1354**		
4x30	302	302	302	302	1208	**1176**		
3x30, 1x40	302	302	302	392	1298	**1266**		
2x30, 2x40	302	302	392	392	1388	**1356**		
1x30, 3x40	302	392	392	392	1478	**1446**		



If two or more elements are installed right next to one another, one or several installation kits are required (2 elements 1 installation kit, 3 elements 2 installation kits, etc.).

Cutout dimension (X) depending on the combination see table:

Assembly kit (HZ394301) for Domino



* Dependent on the cut-out depth

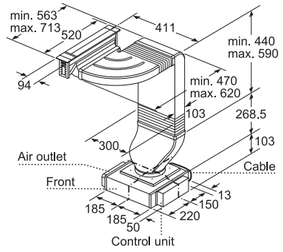
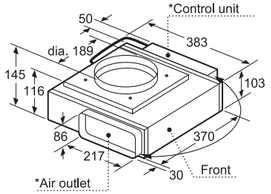
Hood Technical Diagrams

Domino hood LF16VA570B



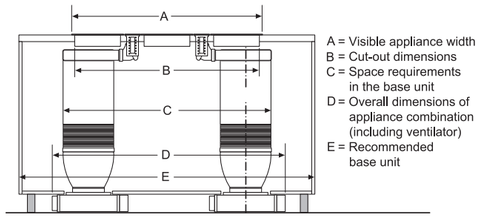
Pipework must not run underneath a barbecue grill/deep fryer/teppanyaki/lava grill.

The air outlet and control unit can be swapped with one another.
If required, the control unit can be secured to the kitchen units wall.



* The air outlet and control unit can be swapped with one another
If required, the control unit can be secured to the kitchen unit wall

Combination: 2 × ventilation elements, 3 × Dominos 30 cm



A = Visible appliance width
B = Cut-out dimensions
C = Space requirements in the base unit
D = Overall dimensions of appliance combination (including ventilator)
E = Recommended base unit

Combination options with corresponding appliances and cut-out dimensions

Width type: (cm)	10	30	40	80
Appliance width: (mm)	94	302	392	812

Ventilation element	Direction of pipework for the ventilation element		Hob/Domino	A	B	C	D	E
1x10	left or right		2x30	698	666	744	max. 845*	min. 900

■ Yes, model has this feature.
– Feature not available for this model.

[1]Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.
[2]The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.
[3]We would recommend our dishwashers are connected to the mains water supply where possible.
However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.
Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint

■ Yes, model has this feature.
– Feature not available for this model.

[1]Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.
[2]The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.
[3]We would recommend our dishwashers are connected to the mains water supply where possible.
However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.
Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint
