## The 3rd Business and Financial Report in 1945

(from April 1st, 1945, to March 31st, 1946)

### 1. Business report

This term was under the last part of the war and naturally the management of securities market experienced a very difficult business because of a conspicuous decrease of volume of transaction due to the increasingly critical economic situation and the extremely inconvenient means of communication as a result of the repeated air-raids which occasioned recurring damages

to market and brokerage buildings.

Under these circumstances, the Exchange tried to accommodate itself to the changing phase of war, and, for purposes of stabilizing security price to perform our proper mission as best as we could, taking over the market manipulation business which had been conducted in conformity with the Government orders by the War-time Finance Bank, and, in view of the critical circumstances adopting various measures including the suspension of the marketing of "Due July" long-term transaction.

Then a day came when U.S.S.R. joined the war against Japan and the termination of the war was brought about August 15, 1946, while the Exchange had to suspend its whole business on August 10th.

With the Imperial Rescript, proclaiming its termination the war came to a sad end to us.

Since the termination of the war, the Exchange has been trying to reopen the market with several remedial measures. However, we have not succeeded to reopen the market so far.

As abovementioned, the Exchange could not gain much success in business, on account of a marked decrease of commissions for sales, which was an unfortunate and inevitable consequence of the decrease both of volume of transaction and business days.
