New for 2022-2023

“What’s new?” is a favorite question of growers, tree buyers and specifiers. This year, we’re pleased to answer this question by presenting a collection of top performers: A new Planetree, a slender hornbeam, a swoon-worthy Japanese maple, a dogwood, two incredible redbuds, a trio of tree-form shrubs, and three popular conifers are sure to please. Some are new and others are time tested favorites. All are grown to our high standard of quality.

Greetings Friends,

The past year has been one of challenges and victories, of celebrations taking place against a backdrop of change, and of looking back at our roots as we look forward to a bright future. Despite the combined challenges of labor shortages, transportation and supply chain issues, wild weather, and a pandemic, it was a good year. Thanks to our dedicated employees and loyal customers, we not only survived 2021, but flourished.

The celebration of our 75th anniversary took place during what added up to be the best year in our company history. We were thrilled and thankful that over 400 customers, friends and family gathered in our arboretum last August to celebrate our collective history and our promising future.

Focusing on the future, you'll see many signs of our new direction in this catalog. These include an increase in conifer offerings, with more to come; a significant increase in Japanese maples, grafted oaks, ginkgos and other specialty trees; a 10% increase in our bare root product line and a significant expansion of fruit tree production.

Also contributing to the future success of our customers and our company are our efforts to innovate and mechanize by investing in new equipment and cutting-edge technology. We're answering customer needs for more and better trees by expansion in both our container and field production. The latter will be augmented by our acquisition of Northwest Shade Trees, founded by Schmidt family members in 1973.

Adding this industry-leading producer of specimen B&B trees will help us serve you better by growing more B&B conifers and larger caliper shade trees, plus additional bareroot production. The 354 acres will bring our total production acreage to more than 3,000 and will allow us to achieve our goal of a two-year cover crop in all our field rotations. And best of all, the addition of the NWST team of superb tree growers will complement the great team we have at JFS.

And speaking of great teams, this year marks the retirement of key team members, with more to come. Many of today's nursery industry leaders are reaching retirement age, and so are ours. We're fortunate that the Schmidt family has an excellent generational succession plan in place that ensures a smooth transition to third generation leadership. Frank III, Jan, and Jean retired from their everyday duties in 2021 and are enjoying retirement even more than they had imagined – traveling, fishing, hunting, gardening, relaxing, and enjoying grandkids and family and friends.

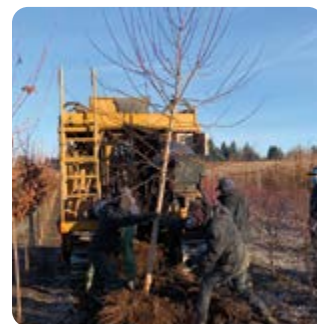

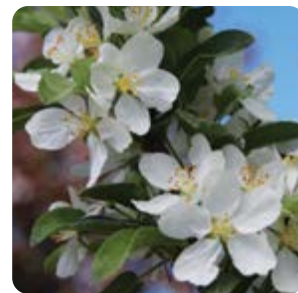

We'll also miss the presence of longtime key employees retiring in 2022. These include Inside Sales Lead Tammy Bowman, Farm Manager Richard Lang, Inventory Manager Tom Cullen and Receptionist Elyn Rackley. Sales representatives hired as long as 34 years ago have passed the baton to their successors. We thank Larry Biddle, Ian McLaren, Joan Cartwright and Mike Leisher for their many years of excellent customer service in the field. We wish for many more years of active, healthy and happy retirements for all.

We hope as travel restrictions ease and life begins to resemble some normalcy that we will see more of you at the nursery. In the meantime, we wish you all a productive and successful season! Thank you again for your continued trust in our trees, our people, and in the future.

Sincerely,

Ben Rough
Chief Executive Officer

Our Mission

Innovation and integrity guide our commitment to grow exceptional trees while providing outstanding service and support to our customers and the horticultural community.

Our team accomplishes this mission by leveraging decades of institutional knowledge and green industry partnerships while pursuing continuous improvement in all endeavors.

Our family-run company fosters an environment of fairness, respect and mutual success where our team can thrive as we lead the way in producing trees for a greener, healthier world.

Our management team blends varied knowledge and skill sets in guiding and supporting our year-round work force of approximately 350 employees. The leaders pictured here have served a collective 328 years at JFS. Our field workers account for hundreds of additional years of work experience at our nursery. Together, we tend to the countless details of sales, production, marketing, communications, human resources, finance, shipping and customer service and are here to serve you.

Our inside sales staff works closely with our regional sales representatives to provide you with personalized customer service tailored to your local market needs.

Inside Sales

July, 2022, marks the retirement of Tammy Bowman, who has served JFS for 27 of her 40 years in the tree business. We thank her for providing cheerful, friendly, efficient customer service all these years. The Schmidt family and her co-workers wish her happiness, health and adventure in her well-deserved retirement. As we finalize transitions and customer support, please contact the office with any questions you may have.

The Schmidt Family

Our Diamond Anniversary celebrated in 2021 marked the passing of the baton from second to third generation leaders of the nursery. J. Frank Schmidt III, Jan Schmidt Barkley and Jean Schmidt Webster are enjoying active retirements while continuing to advise via our Board of Directors. Frank serves as Chairman of the Board, while Jan chairs the Frank & Evelyn Schmidt Family Charitable Foundation.

Three of Frank and Evelyn's grandsons help to steer the nursery into the future via Board membership: John Schmidt,

Gordy Webster and Sam Barkley, who also manages our High Forest Farm propagation division. The board includes four independent advisors who assist our experienced management team in sustainably pursuing the family's principles and long-term objectives of growing the finest trees in the business.

Working together with a dedicated family of employees, we continue to uphold Frank and Evelyn's vision of growing beautiful, durable, fairly-priced trees for generations to come.

Guidelines for Ordering

Placing Orders

Bare Root, B&B, Root Bag and Container orders are booked separately. Discount schedules unique to each product line are listed on page 87. Bare root trees must be ordered in bundled quantities as shown.

Your regional sales representative will be pleased to assist you in placing your orders. You may also contact our customer service department.

For best availability of stock, customers are urged to place orders nine months prior to shipping. Prompt placement of orders is especially important for newer cultivars and other high-demand items.

Minimum Orders

Plant material cannot be booked unless the minimum order requirements listed below are met.

\$1,500 minimum for trees to be picked up at the nursery.

\$3,250 minimum for shipments to be arranged by JFS via common carrier.

These minimums may be a combination of all product types.

Prices stated are F.O.B, Boring, Oregon.

Bare Root Bundled Quantities

Size	No./ Bundle
Branched	
2 ft. - 6 ft.	10
1" - 1¼"	5
1½"	3
1¾" - Up	2
Whips	
12" - 10'	10
Multi-Stem	
12" - 3'	5
4' - Up	3
Top-Graft/Specialty	
All grades	5

Shipping

Bare root, B&B and root bag trees are available only for spring shipping, as noted in the Terms of Business Transactions on Page 86. Container material may be shipped year-round.

By request, our transportation department will assist you in coordinating shipping of full and partial loads aboard temperature-controlled trucks provided by common carriers. In most cases, freight charges will come directly from the logistics company and are separate from nursery stock invoices.

Customers may arrange shipping via their own trucks or by contracted carriers. Our transportation department must be given at least five (5) business days' notice before customer-arranged trucks arrive for pickup.

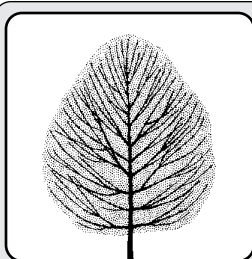

Order Changes

Changes to orders are welcome if made in a timely manner. Advance notice of five (5) business days prior to loading is required for JFS or customer-arranged trucks. Advance notice of at least three (3) business days is required for local order pickup.

Payment

Payment in advance of shipments is required unless credit is established. We accept Visa®, MasterCard® and Discover® or Online ACH Payment.

For additional terms of business transactions and shipping information, please see page 86.

Tree Drawings and Size Ratings

Tree shape and growth habit change as a tree grows. Young trees are often upright, while older ones of the same cultivar may become spreading. "Mature" size of a tree varies by climate, landscape site characteristics and how long the tree lives. City trees rarely reach the size and age of their counterparts in native forest stands.

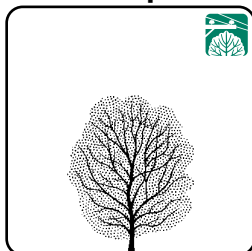

In a city situation, trees that reach 30 years of age generally grow slowly beyond that time. Therefore, the size ratings and growth habits shown in this catalog are our best estimates for a healthy 30 year old tree grown under "average" city conditions.

©J. Frank Schmidt & Son Co. tree form illustrations

Our grading standards follow the American Standard for Nursery Stock. Approved by the American National Standards Institute, Inc. (ANSI) and updated in 2014, the 97-page document is available from AmericanHort® Resources section at <https://www.americanhort.org/nursery-standards>

 **Schmidt Introductions**

Our dedication to improving urban forests includes extensive research and development efforts, plus collaboration with tree breeders around the world. Over the years, J. Frank Schmidt & Son Co. has introduced or co-introduced more than 110 cultivars to the trade, including the renowned Red Sunset® Maple in 1966.

If you have a promising new tree, we invite you to explore our program of testing, evaluation and introduction. Outstanding candidates are co-introduced under a shared royalty agreement.

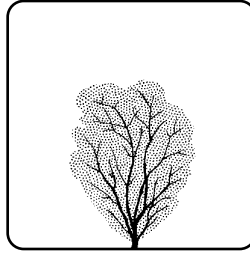

Schmidt introductions are indicated throughout the catalog by our logo in the upper left hand corner of the Treeform illustration box. You'll find multiple photos and downloadable fact sheets for each tree in the Introductions section of our website.

Learn more about each of our introductions by visiting www.jfschmidt.com/introductions

Acer palmatum dissectum 'Orangeola'
Orangeola Japanese Maple

New '21

Zone: 5
Height: 8'
Spread: 12'
Shape: Weeping
Foliage: Laceleaf, deeply dissected
Fall Color: Bright orange red

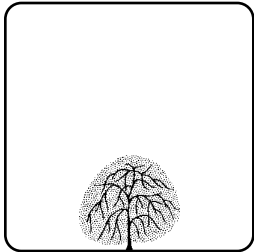

Foliage emerges bright orange red and matures to rich reddish green. A summer flush of new growth presents a unique, two-tone overlay of orange red atop the mature foliage, all of which darkens to red in autumn and then erupts with fiery orange red tones. Observed to perform better in hotter, sunnier locations than other red-foliaged *A. p. dissectum* cultivars.

Acer palmatum dissectum 'Red Dragon'
Red Dragon Japanese Maple

New '21

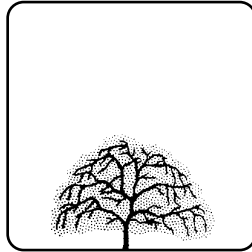

Zone: 5
Height: 6'
Spread: 8'
Shape: Weeping, compact
Foliage: Laceleaf, burgundy red
Fall Color: Scarlet red

Delicate, deeply dissected leaves emerge scarlet in spring and mature to a rich burgundy shade. Even in late summer, its heat-resistant foliage is darker and more purplish red than that of Crimson Queen. An eruption of scarlet red foliage flows along its gracefully cascading branches in autumn. Vigorous and compact, it's a perfect fit for small garden spaces and container culture.

Weeping Laceleaf Japanese Maples

Two distinct forms of Weeping Laceleaf Japanese Maples (*Acer palmatum dissectum*) are grown at our nursery. Our practice of staking to approximately three feet in height before allowing the upper branches to cascade to the ground creates classic, low-growing forms that hug the landscape. Designated in the catalog and stock available lists as "low head," they complement the taller forms that we grow.

We create tall forms by developing a central leader that is staked to a height of approximately five feet. From this height, the naturally weeping branches cascade gracefully to the ground. Unless designated as "low head," our weeping laceleaf Japanese Maples are grown in this way. Both forms present unique design options for incorporating these graceful trees into the landscape.

Branched

Low Branch

A slender column of deep green summer foliage transforms to candle-bright leaves in autumn. A perfect shade tree for space-challenged gardens and street-side plantings!

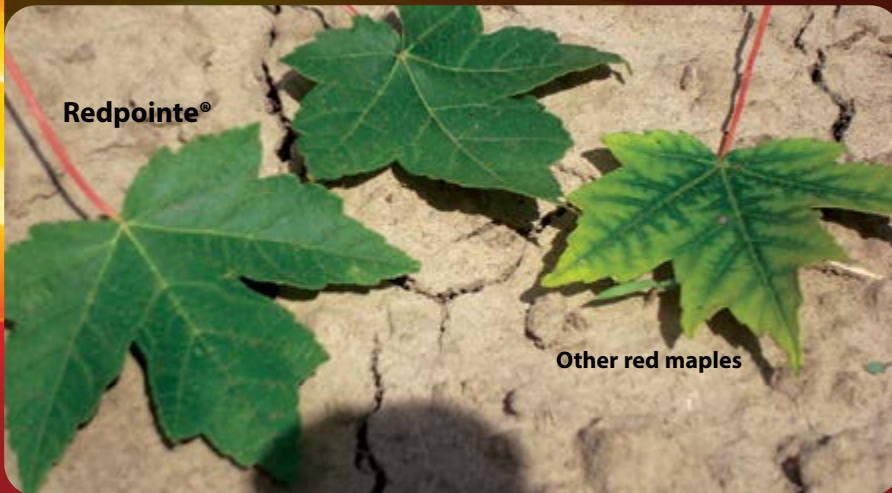

Redpointe[®] Maple

Acer rubrum 'Frank Jr.' PP 16769

Redpointe[®] Maple is growing its way to greatness. Since its introduction in 2006, the striking, broadly pyramidal shade tree has become our best-selling tree, and for good reason. Quickly embraced by our customers as “a grower’s tree,” its strong central leader and upright, symmetrical and balanced growth habit make it an easy-care tree in the nursery. This mannerly growth habit translates to its being a low maintenance tree in the landscape.

A+ fall color is always delightfully bright, and summer foliage deliciously dark green throughout the growing season, even in hotter regions where other red maples suffer. Tolerance of drought, heat and cold, plus improved pest and disease resistance and tolerance of higher pH soils add up to its being a top seller across the continent.

Autumn Fest[®] Maple

Strong upright growth and reliable, early fall color make this a stand-out in the nursery and on the streets. Vigorous, with a good central leader, it is faster growing with a more upright shape than typical of sugar maples.

Spread: 20'
Shape: Upright oval
Foliage: Light green, silvery beneath
Fall Color: Bright yellow to burgundy red
Fruit: None observed

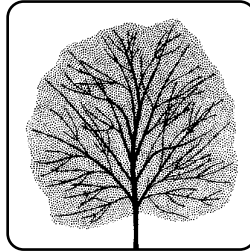

A standout seedling, grown from seed collected from a witch's broom, was selected by Dr. William Hoch in Wisconsin for its uniquely compact growth habit and excellent branch structure that forms a remarkably symmetrical, upright oval tree. During more than 20 years of close observation, neither flowers or seeds have appeared on the parent tree.

Flashfire® Maple

Dark green, heat resistant leaves cast cool summer shade before turning the brightest red color of any sugar maple adapted to Southern growing conditions.

Vigorous growth, open branch angles, a strong central leader and improved mildew resistance recommend it as the best of the cultivars originating from seed collected in the Caddo Mountains of western Oklahoma.

Moonrise™ Full Moon Maple

Zone: 5
Height: 18'
Spread: 10'
Shape: Upright oval
Foliage: Red maturing to lime green
Fall Color: Medley of red, orange, gold, green

NEW 2023

Emerging leaves of bright red, orange and salmon overlay the lime yellow to green tones of older leaves throughout spring and well into summer. Lime green if grown in shade and golden yellow in full sun, foliage has good sun tolerance even in hotter climates where many Japanese maples struggle.

Birch Singles for Clumping

Bare root birch liners designated as 'singles for clumping' are the best choice for growers aiming to develop finished clump-form trees that are vigorous and balanced in relation to the caliper of each stem. Graded by height and caliper, they can be planted in the field or in containers. The reduced royalty* on each stem offers growers an affordable option for creating their own "style" of clump form birches by planting on preferred spacing in combinations of three, four or more. Because each sapling has its own root system and more room to develop, the resulting trees develop trunks of similar or equal caliper and a pleasing, natural-looking balance.

Heritage® Birch Singles for Clumping
4 and 5 foot.

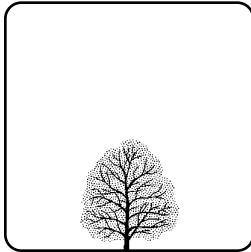

Newly containerized
Singles for Clumping

*Liners offered as 'Singles for Clumping' are to be used only for the purpose of growing clump-form trees.

Carpinus betulus 'Lucas'
Lucas Columnar Hornbeam

Zone: 5
Height: 30'
Spread: 10'
Shape: Narrow, columnar
Foliage: Dark green, thick
Fall Color: Brownish to golden yellow

Dense, tightly columnar form stays narrower than the widely planted 'Fastigiata'. Thick, durable leaves turn from golden yellow to brown and provide winter interest by persisting through the winter months. Tolerates high pH and heavy soils and can be tightly sheared as a narrow hedge or screen.

PRAIRIE SENTINEL® HACKBERRY

Discovered on a rocky, barren plateau in Western Kansas, this tightly fastigate native tree of the prairie forms a narrow spire that's a perfect fit for narrow streets in the toughest climates. Adaptability to heat, cold, drought and poor soils recommends it for difficult urban sites.

Cercidiphyllum japonicum 'Biringer' PP 21711
Hanna's Heart® Katsura Tree

Royalty \$1.00

New '22

Zone: 4b
Height: 27'
Spread: 15'
Shape: Upright oval
Foliage: Dark green
Fall Color: Yellow to orange

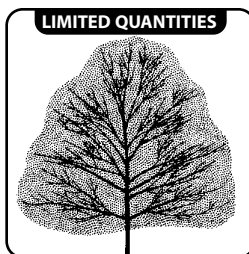

The smaller, narrower stature of this mannerly Katsura is a good fit for today's garden landscapes. Dark green, distinctively heart-shaped leaves are thick and heavily textured when young. It has demonstrated good hardiness in Zone 4b, with fall colors lasting a bit longer than others of the species.

2023

Zone: 5
Height: 15'
Spread: 15'
Shape: Rounded
Foliage: Multi-colors; red, orange, yellow, green
Fall Color: Medley of reds, burgundy, yellow, orange
Flower: Bright pink

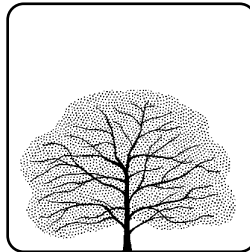

Bright pink flowers of spring are upstaged by heart-shaped leaves that deliver a season-long, kaleidoscopic array of bright colors that change from shades of deep burgundy to red to burnt orange, bright yellow, green and gold. This controlled cross of Ruby Falls and The Rising Sun takes the species to a dramatic new level. Introduced by North Carolina State University.

NEW
2023

Zone: 5
Height: 10'
Spread: 4'
Shape: Weeping
Foliage: Golden yellow to lime green, heart shaped
Fall Color: Golden yellow
Flower: Lavender pink

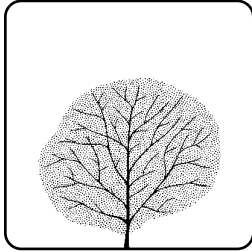

Lavender pink blooms that tumble from gracefully weeping bare branches are followed by orange-tinged, heart-shaped golden leaves. True to its name, its heat and sun tolerant foliage presents a cascade of golden foliage that matures to lime green in late summer.

NEW 2023

DISEASE RESISTANCE: Powdery mildew

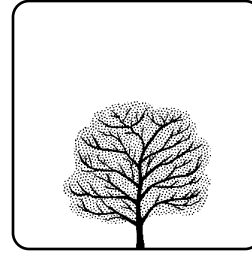

Very large blooms are borne at a young age by this handsome selection of a beloved Southeastern US native tree. Excellent resistance to powdery mildew and reliably bright red fall color are among reasons to grow this resilient, adaptable cultivar that was developed at the University of Tennessee Institute of Agriculture.

Foliage: Cutleaf, burgundy
Fall Color: Burgundy to orange
Flower: Slender red catkins in late winter
Fruit: Small hazelnuts

New '22

DISEASE RESISTANCE:
Eastern filbert blight, Oregon strain

Deeply dissected burgundy leaves mature to bronze-green in late summer. Small edible hazelnuts can develop if a suitable pollinator is nearby. Developed and introduced by Oregon State University, this unique, ornamental form of European Hazel is easily maintained as a small spreading shade tree.

Thornless & Seedless Honeylocust

All cultivars we offer have been selected as outstanding plants for a variety of characteristics. All are considered essentially thornless and seedless. However, there are reports from around the country of occasional production of fruit and/or thorns by several cultivars. Unusual weather conditions seem to be the key factor in this. When thorns or seeds are produced in one season, the tree generally reverts back to its normal growth habit the following year.

Fall Color: Yellow
Fruit: Sparse

New '21

Narrowly upright growth habit makes this storm resistant Honeylocust a great fit for street tree plantings where branches must be pruned up for traffic clearance. Found in South Dakota by Plantsman Greg Morgenson, the parent has never been observed to have suffered ice or snow damage. Nor has it produced seed, although we can make no claim of its being seedless under all growing conditions.

Hibiscus (Rose of Sharon, Hibiscus)

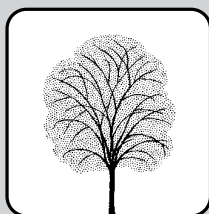

Appreciation for its beauty grows to new heights when this classic garden shrub is presented as a small, single-trunked tree. Small green leaves grow along soft, graceful stems to set a dense, contrasting backdrop for the large, colorful multi-petaled flowers that bloom throughout the summer months and into autumn. **Height: 12' | Spread: 8' | Zone: 5**

Hydrangea (Tree Form)

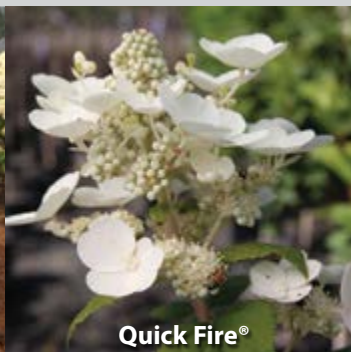

Good things come in small packages, and the same can be said for hydrangeas grown as small trees. These stunning, easy-care, tree form shrubs bring beauty to eye level and lend a formal air to container and landscape plantings. Adaptable to varied soils and hardy through USDA Zone 3, their sturdy trunks, strong stems and upright growth habit support bright waves of flowers that bloom summer through autumn. A great addition to the cutting garden, tree hydrangeas are a source of colorful, long-lasting flowers whether arranged fresh or dried.

A dominant central leader, strong branch attachment and upright angles add up to a storm-resistant structure. Compared to others of the species growing nearby, the parent tree growing on a residential street in Oregon defoliates early and has suffered no ice or snow damage. Seed production has been extremely light to none.

Rootstocks for Crabapples

Our ornamental crabapples are offered on three distinct apple understocks; domestic, hardy seedling and RightRoot® crabapple rootstock.

Domestic

This "old standard" rootstock still gives the best growth rate and produces a very uniform, deep root system. Roots go deep to find water in dry areas, and provide extremely good anchorage. Its main disadvantage is heavy suckering. It is also slightly less cold hardy.

Hardy Crabapple Seedling

Dolgo crabapple seedlings are excellent rootstocks for the coldest areas. They produce well-branched root systems, and have a growth rate that is close to that of Domestic. This is the rootstock to have in areas where temperatures drop to -30 °F. with no snow cover. In years of Dolgo seed shortage, we may substitute different but equally hardy crab seedlings, such as *Malus antonovka*.

Right Root® CRABAPPLE ROOTSTOCK

Ornamental crabapples are truly trouble free garden trees when grown on RightRoot® crabapple rootstock. Proven to be the best all-around performer in our multi-year trials, this time-tested clonal understock virtually **eliminates suckering**.

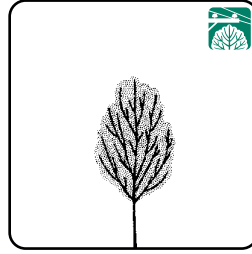

In addition to having the lowest number of basal suckers in our tests, trees grown on RightRoot® understocks have better anchorage and vigorous growth rate. Additional reasons to choose this improved understock include:

- Extremely cold hardy
- Growth rate is close to that of domestic
- Produces a faster growing tree than EMLA 111
- Resists collar rot
- Does not develop burr knot
- Symmetrical root structure is a good balance of fibrous and structural roots
- Adapts well to various soils, including wet or dry sites

Baby Blue Eyes Spruce

Picea glauca var. *densata*

Black Hills Spruce

Zone: 3
Height: 30'
Spread: 20'
Shape: Broadly pyramidal
Foliage: Bluish-green needles

Needle-like foliage emerges bright green and matures to bluish green. This compact, slow growing conifer is a naturally occurring variety of white spruce native to South Dakota. Well suited for life on the Great Plains, it is a good fit for residential landscapes and windbreaks. Tolerant of dry soils and road salts.

Container
#15 4 foot

Picea pungens 'Fat Albert'

Fat Albert Blue Spruce

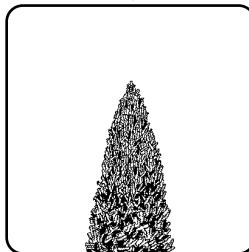

Zone: 2
Height: 15'
Spread: 12'
Shape: More broadly pyramidal
Foliage: Silvery-blue needles

Container
#25 6 foot

Picea pungens 'Iseli Fastigiata'

Iseli Fastigiata Spruce

Zone: 3
Height: 25'
Spread: 10'
Shape: Tightly columnar
Foliage: Blue green needles

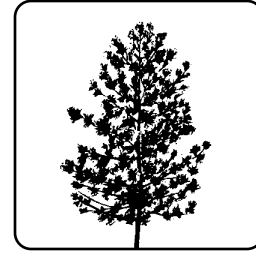

Stiffly upright branches form a column of steely blue foliage. Selected in 1965 by Iseli Nursery, this unique and moderately fast-growing selection of Colorado Blue Spruce is a good fit for tight spaces and is effective as a landscape exclamation mark.

Container
#25 6 foot

Picea (Spruce)

Picea pungens 'Baby Blue Eyes'

Baby Blue Eyes Spruce

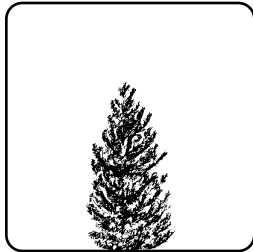

Zone: 4
Height: 25'
Spread: 15'
Shape: Broadly pyramidal
Foliage: Blue-green needles

Rich, silvery blue color distinguishes this slow growing, semi-dwarf selection of the Rocky Mountain native spruce. A good central leader and upright pyramidal form are among reasons to choose this densely branched symmetrical conifer for small space gardens.

Monumental® Planetree

Royalty \$1.00

Zone: 5
Height: 60'
Spread: 45'
Shape: Broadly pyramidal
Foliage: Green
Fall Color: Yellow

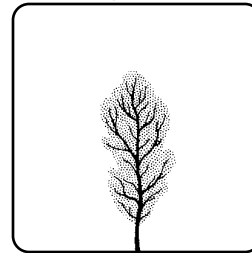

DISEASE RESISTANCE: Anthracnose
Upright branches radiate at 45-60° angles from a strong and straight central stem and leader, forming a dense, symmetrical broadly pyramidal canopy. Clean, green, disease resistant foliage turns yellow before falling in autumn to reveal the bright, light grey bark of branches and trunk.

Own Root American Elm

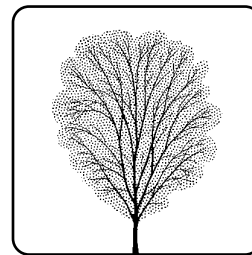

As disease resistant elm cultivars become more available in the nursery trade, be sure yours are grown on their own roots or on disease resistant rootstocks! Asian hybrids will retain their disease resistance whether propagated "own root," or budded or grafted onto *U. pumila* or *U. parvifolia* rootstocks. Because American elm cultivars are not compatible with these rootstocks, they are sometimes budded or grafted onto American elm rootstock. This is an unacceptable practice that negates their disease resistance. "Own root" propagation is the only proven way to propagate disease resistant American elms, and the method we use to assure you of healthy trees.

(Elm - Less Common Species and Hybrids)

Ulmus chenmoui 'JAB Morton'

Summer Elixir[™] Elm

Royalty \$2.00

New '22

Zone: 5
Height: 35'
Spread: 30'
Shape: Rounded
Foliage: Dark green
Fall Color: Yellow, tinged red and purple

INSECT RESISTANCE: elm leaf beetle

DISEASE TOLERANCE: Dutch elm disease

Vase-shaped in youth, this relatively small and compact elm develops a rounded shape with age. New growth may be flushed with pink or red before maturing to green. Selected by nurseryman/arborist Jim Barborinas as the best of *Ulmus chenmoui* seedlings shared by Dr. George Ware of Morton Arboretum.

TreeLocatorSM

TreeLocatorSM is among the many ways we help our customers market their trees. It's designed to build relationships between our customers and tree specifiers including landscape architects, designers, urban foresters and landscape contractors.

Tree specifiers:

Can't find a local source for trees described in our catalog and reference guide? We invite you to call or fax our Oregon office with your "want list" of the trees we grow. We'll match your needs with growers in your area who have purchased our liners for growing on to finished size. We'll provide their names so you can call them directly for availability. We're sure you'll find TreeLocatorSM to be a useful tool for finding the finest trees.

Growers:

TreeLocatorSM helps to bridge the gap between the demand for some of our newer cultivars and unusual varieties, and local availability. When you purchase our liners for planting and growing on to landscape size, your company name and purchase history is entered into our TreeLocatorSM database. This is shared with specifiers who call us in search of the finest trees. It's working - ask your Schmidt sales representative for examples of tree sales that occurred for our customers, thanks to referrals from TreeLocatorSM.

Request a TreeLocatorSM query, customized just for you, by calling 1-800-825-8202 or filling out the form at www.treelocator.info

UTILITREESTM

Trees worthy of our UtiliTreesTM designation are those best suited for planting in the restricted zone between street and sidewalk and beneath utility lines. Their short stature at maturity makes them less likely to tangle with overhead lines.

Pedestrian-friendly branching is compact or vase-shaped to allow

for pruning without destroying the shape of the tree. These disease and pest-resistant cultivars require minimal maintenance and are tolerant of varied soils, climates and urban growing conditions.

Landscape architects, urban foresters, utility company arborists and other tree specifiers are invited to use our TreeLocatorSM service to find these trees in their region, grown to landscape size by our customers.

Visit www.utilitrees.com to download a PDF that contains all of our UtiliTreesTM selections.

Our UtiliTreesTM selections are identified throughout the catalog with this icon.

Fruit Trees

Backyard orchard culture is a hot trend that gains new converts every year. Health conscious gardeners want to eat fresh and eat local, and nothing is fresher, or more local, than juicy nutritious fruits plucked from one's own trees.

You can capitalize on this gardening trend by offering a collection of ready-to-plant fruit trees. These sturdy, well-branched bare root trees established in #7 containers are an ideal size for home gardeners, who find delight in harvesting fruit in the first season after planting. Four-in-one combinations fit perfectly in small gardens.

We offer the most popular and best-selling varieties as well as unusual cultivars and rare interspecific hybrids. Use this table to choose the best combination to suit your local growing conditions and customer preferences.

Photos and detailed descriptions of our fruit trees, their approximate ripening times, recommended pollinizers, rootstocks and other details are found at www.jfschmidt.com/fruit.

Find individual listings in the orange boxes, listed by genus on these pages.

Whips

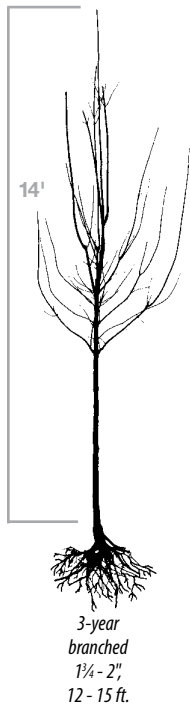

Whips are almost always one-year-old tops. They range from being completely unbranched to being lightly branched on the lower stem. Ash, Linden, Honeylocust and Kentucky Coffee Tree will generally be completely free of branches. Some species branch naturally at a young age, and others do not. Red Maples, and to a lesser extent Sugar Maples and Crabapples, tend to branch freely off one-year growth. Any branches above 2 or 2½ feet from the ground are left on whips to help increase caliper and thus provide a sturdier stem.

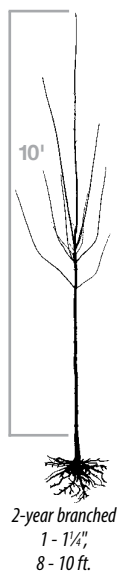

1-year whip
7 - 8 ft.

Branched Shade Trees

Varieties including Honeylocust, Ash, Birch, Linden, Oak and some Maple have naturally straight central leaders and radiating lateral branches. Varieties that are not free branching, such as Sugar Maple and certain oaks, are topped while dormant to promote symmetrical branching during the next growing season.

3-year
branched
1 1/4" - 2"
12 - 15 ft.

2-year branched
1 - 1 1/4"
8 - 10 ft.

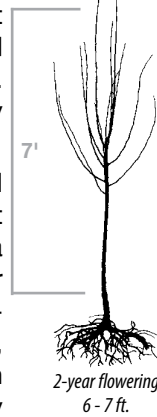

A single dominant straight leader is then established by hand taping the top shoot. Varieties that branch well are not topped. In either case, the resulting tree has a straight leader and symmetrical branching. In general, 6-8' and 1"-1 1/4" grade trees are two years old. Most trees of larger sizes are three years old, possessing fuller heads and more secondary branching.

ing tree has a straight leader and symmetrical branching. In general, 6-8' and 1"-1 1/4" grade trees are two years old. Most trees of larger sizes are three years old, possessing fuller heads and more secondary branching.

Branched Flowering Trees

Flowering Crabapples, Cherries and Hawthorns are generally 2-year-old trees topped at 4 to 5 feet, depending on cultivar. A leader is reestablished by taping. Certain Flowering Pear, Plums, Snowbell and others have dominant central leaders and branch well naturally. These are generally untopped.

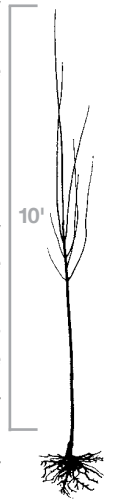

Head height, symmetrical branching and straight central leader create a structural foundation for a premium quality caliper tree for the growers, while the heavy branch structure and full canopy serve the needs of the garden center and those growers who service garden centers by finishing bare root trees in containers.

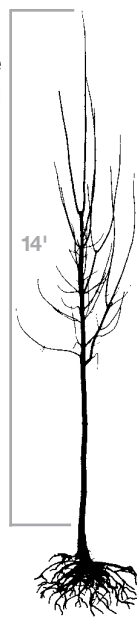

2-year flowering
6 - 7 ft.

Light Branched Trees

These trees have the same general form as our regular branched grade. Caliper is the same, but, light branched trees differ in having fewer and/or shorter branches. Often a good, economical choice for growers who are lining out trees, as they generally thin out and prune back branches at planting time. Landscapers and garden centers may prefer to use regular branched grade trees, as they don't have the time to let a light branched tree mature to a saleable form.

2-year light
branched
1 - 1 1/4"
8 - 10 ft.

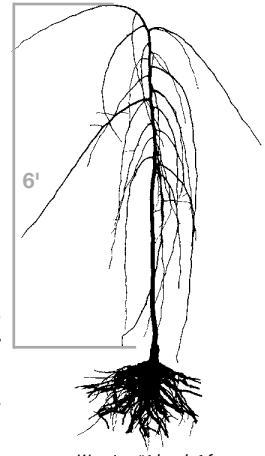

3-year light
branched
1 1/4" - 2"
12 - 15 ft.

Weeping & Head Grade Trees

Weeping and top-grafted forms of Flowering Cherry, Crabapple, Mulberry, Redbud, and others are graded by head quality.

Certain compact forms of Crabapple, Cherry, Hydrangea, Ninebark, Tree Lilac and others are also graded by head quality.

Heavy select and *#1 head* grades should be used for landscape installations and quality garden center sales. *#1 light head* and *#2 head* grades are lighter and less full, and therefore offered at a lower price. They are an economical choice for growers who line out stock for several years.

Weeping #1 head, 6 ft.

Multi-Stem, Clump and Singles for Clumping

A variety of trees are grown with multiple stems, and identified herein as "multi-stem" or "clump."

Multi-stem trees are created by stubbing a plant just above ground level and encouraging several stems to grow from that single root. Multi-stem varieties include Maples, Redbud, Crabapples, Serviceberries and more.

Clump forms are offered in our container and Root Pouch® product lines. Clumps are created by arranging several individual young plants within the container. Birch, Aspen and Goldenrain Trees are grown in this manner.

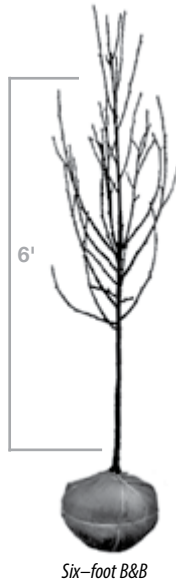

Multi-stemmed
6 ft.

Growers can create their own unique birch clump forms by customizing the number of stems, planting angles and spacing between stems. See Page 23 for details on our "Singles for Clumping" grade.

Balled & Burlapped Trees

B&B trees are appropriate for lining out in the field, landscape installation, immediate garden center sales, or containerizing for future sale. Our B&B line complements bare root production by offering balled and burlapped trees of varieties that are difficult to handle bare root. Some varieties are offered B&B as well as bare root so growers can choose the type of liner that works best for them.

Six-foot B&B

Containerized Trees

Our containerized trees are a much different product than traditional “container-grown” trees that are propagated in containers and grown to larger size by shifting up to a larger container size as the plant matures. By “containerized,” we mean that most of our deciduous trees are field grown to nearly finished size, harvested bare root, and then established in containers to make them available for year-round sales. Containerized in a bark medium in early spring, trees receive intensive care throughout the growing season that includes careful pruning, fertilization, weed control and optimal irrigation.

During their years in the field, special cultural techniques including pruning, transplanting and undercutting help to tailor trees for finishing in containers. Unlike many “container-grown” trees, our field-grown, containerized trees have strong, straight trunks with heavy caliper in relation to height. Generously graded by height and caliper as well as container size, our trees are generally larger than those sold by container or box size alone. They possess balanced, well-developed root systems that quickly establish themselves first in the container, and then in the landscape. A portion of our B&B crop is also containerized in order to make our conifers, Japanese maples and other species available throughout the year.

Our garden center and landscape trees are offered in plastic pots that range in size from #5 to #25. Our largest container trees grow in 28" and 32" plastic-lined wire baskets, measured by the diameter across the top.

Red Sunset® Maple
#10 Container

Root Bags

Field-grown trees in root bags have better survival rates and more vigorous first season growth than bare root plants of the same varieties. Inside the bag, roots penetrate the fabric but are constricted, causing a proliferation of roots with high carbohydrate reserves.

Small ball sizes make them easier to handle and lighter to ship than B&B products. Although the cost is higher than that of a bare root tree of the same grade, the advantages of speedier growth and quicker establishment after transplanting make them a good value.

What's good for tree roots is also good for the environment. Our fabric containers, whether destined for above ground or in ground production, are made from 100% recycled materials, a mix of natural fibers and resins made from recycled plastic water bottles. Root Pouch representatives tell us that our nursery's use of their products since 2012 has helped to divert more than 1.5 million water bottles from our country's landfills.

An inside look at the root development in our field-grown root bags

Vigor LINER®

Our VigorLiner® product line is primarily composed of deciduous trees that are difficult to produce and transplant via bare root methods. Some varieties that are traditionally produced bare root are also offered as VigorLiner® trees so growers can choose the best option for their production process.

Depending on their needs, trees are established in Root Pouch® fabric containers or in our specially designed air-pruning containers. The latter feature evenly spaced, vertical slots that eliminate circling roots and produce fibrous root systems. Improved air circulation and drainage reduce incidence of root disease.

Root Pouch® fabric containers retain moisture more readily than the slot-style containers while offering the same advantages of root pruning and prevention of circling roots. These brown fabric bags are an above-ground version of the Root Pouch® fabric bags that we use in our fields with great success. Distinctive for their ground-hugging shape that reduces the incidence of toppling over in the wind, they feature stout fabric handles that make them easy to manage in the nursery, garden center, or in the fields at planting time.

Air-pruned, branched, white root tips found in both types of containers are visible evidence of the healthy, vigorous root systems we produce in our VigorLiner® program.

Specimen tree growers find our VigorLiner® trees to be excellent field liners. Container growers praise them as ideal for shifting up into larger containers. While they may be planted year-round, growers in milder climates find VigorLiner® trees to be tailor-made for fall planting. This practice encourages root establishment in the fall and winter that will support vigorous spring growth.

Grow Straight[®]

Plant Growth Control Stake

The Schmidt Grow Straight[®] stake is used by growers internationally with renowned success. It is a metal device scientifically designed to eliminate “dog-legs” 100%.

In addition to growing straight trees, the Grow Straight[®] stake also provides other advantages. It will:

Protect the shoots against wind, storms, animals and other dangers.

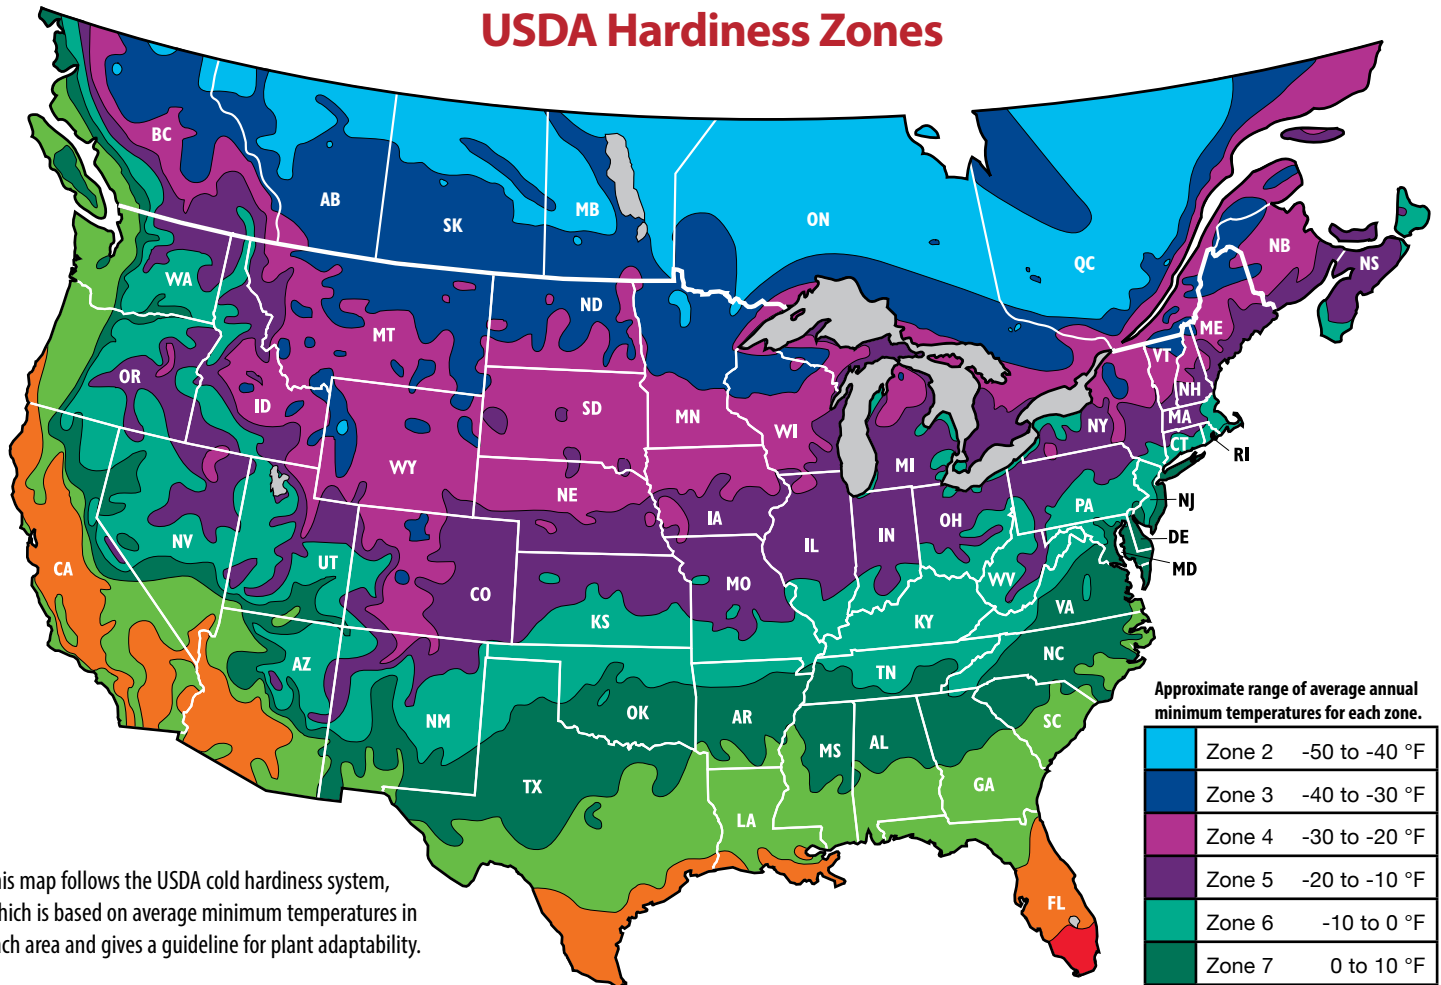

Provide a stronger union.

Eliminate the need for training stakes in many cases.

Please contact us for pricing and details on purchasing.

USDA Hardiness Zones

Approximate range of average annual minimum temperatures for each zone.

Zone 2	-50 to -40 °F
Zone 3	-40 to -30 °F
Zone 4	-30 to -20 °F
Zone 5	-20 to -10 °F
Zone 6	-10 to 0 °F
Zone 7	0 to 10 °F
Zone 8	10 to 20 °F
Zone 9	20 to 30 °F
Zone 10	30 to 40 °F

This map follows the USDA cold hardiness system, which is based on average minimum temperatures in each area and gives a guideline for plant adaptability.

Plant material in our catalog is rated with a USDA zone number, which is correct to the best of our knowledge. Zones can be divided further into “a” or “b”. When used, “a” refers to the colder half of the zone and “b” to the warmer half.

For example, Zone 4a indicates temperatures of -25 to -30 °F. However, we cannot be responsible for hardiness since growing conditions, site selection and unusual winter weather will affect winter survival.

Color Your Walls!

Our colorful, informative wall posters are back! Each of the five posters features 22 of our finest trees. They are perfect for framing and fit into standard 24" x 36" poster frames. They are great sales tools and are ideally suited for hanging in your nursery office, garden center, design studio, classroom or botanical garden.

Poster sets are hand-delivered to our customers by our sales representatives, and distributed free of charge at the many green industry trade shows we attend each year.

Please contact our office to receive a set by mail.

Variety Specific Marketing

Extraordinary trees from our breeding and selection programs are introduced through various channels including our variety-specific marketing campaigns. We've developed colorful brochures with coordinated envelopes; eye-catching postcards, downloadable fact sheets and traffic-stopping banners. Unique websites and Facebook pages are utilized to alert growers, nursery buyers, tree specifiers and consumers about the outstanding features of our new introductions. Each website includes wholesale and retail sources lists (by state) to help connect growers and garden centers with buyers.

Custom Picture Tags

Big, bright, beautiful picture tags are sure to increase your tree sales. Each custom tag features an eye-catching photograph, a detailed description of the tree, and a Tree Form drawing that portrays size and shape at maturity. On the reverse, you'll find a second photograph, planting instructions, and space for you to customize the tag with your nursery name, retail price or other information. Custom picture tags are provided on container material sized from #5 – #25. They are also available for purchase at \$.50 each to accompany your bare root, B & B, root bag, Root Pouch® or VigorLiner® order.

Pre-pricing service for container trees

Simplify and save time and labor by using our product pre-pricing service for container trees. For \$.60 per item, your plants will be shipped with pre-hung waterproof retail strip tags that include your nursery name and retail price, corresponding barcode, Latin and common names and container and plant size.

We will email a copy of your order accompanied by our Pre-Pricing Worksheet. The worksheet will include a fillable column for pricing items on your order, however, we highly recommend offering retails for ALL items on the worksheet or providing a formula to calculate your retail pricing. Formula calculation helps simplify and expedite the process of adding retails and assures order additions at any time will arrive to you pre-priced.

Trunk Wraps

Eight of our most popular containerized trees in #5 to #15 sizes are shipped with colorful trunk wraps that illustrate seasonal features, mature form and planting instructions. These unique point-of-purchase aids are sure to inspire garden center shoppers to buy. Also available to bare root and B&B customers for \$1.50 each, we currently offer trunk wraps for these cultivars: Redpointe® and Armstrong Gold® Maples, Crimson Sunset® and Urban Sunset® Maples, June Snow™ Dogwood, Espresso™ Kentucky Coffee Tree, Emerald City® Tulip Tree and Royal Raindrops® Crabapple.

Find more information about this program at www.jfschmidt.com/trunkwraps

The deadline for submitting retail pricing is **MARCH 15th**.

ORDERS:

New customers must submit a customer information form and credit application (if credit is requested). Orders must make minimum dollar requirements listed on page 4 and are subject to acceptance by our credit department before being acknowledged. J. Frank Schmidt & Son Co. may choose to cancel items off orders should stock be damaged or destroyed through causes beyond our control or unforeseen adjustment in inventory. Customers will be notified of any changes to their orders.

PRICES:

Prices are quoted in US Dollars, and replace all previous prices offered by J. Frank Schmidt & Son Co. Prices do not include freight costs or royalties. (additional fees may apply outside of the U.S.)

CANCELLATIONS:

All order cancellations must be received **prior to the deadlines below**. Please keep in mind late cancellations may jeopardize future allocation percentages and/or fill rates.

December 1st

Bare Root, B & B and Root Bag Material Cancellations after Dec. 1st will receive a 10% restocking fee (\$250.00 minimum)

April 1st

Container and VigorLiner® open orders will be released to open availability April 15th if shipping dates have not been confirmed.

SHIPPING:**DOMESTIC & CANADIAN:**

Prices for trees are FOB freight collect J. Frank Schmidt & Son Co. All shipments travel at the risk and cost of the purchaser. Our responsibility ceases and title is transferred on delivery to the common carrier. In the unlikely event damage or loss may occur, we stand ready assist you with claims against the carrier.

Freight is billed separately by either JFS or the carrier and is due within 10 days of invoice date as required under federal ICC regulations. Failure to make prompt payment of freight bills may jeopardize the scheduling of future shipments, and/or placement of future orders with J. Frank Schmidt & Son Co.

J. Frank Schmidt & Son Co. strongly recommends refrigerated transportation for all plant material. In the event that the purchaser chooses to use unrefrigerated transportation or over the rail, the purchaser agrees to indemnify and hold harmless J. Frank Schmidt & Son Co. and the carrier(s) for all losses or liabilities.

Shipments requiring phytosanitary and/or fumigation:

Direct expenses incurred for phytosanitary certificates and fumigation of trees as required for shipment will be passed on to the Purchaser.

INTERNATIONAL:

Prices are F.C.A. J. Frank Schmidt & Son Co. All transportation arrangements, costs and risks are the responsibility of the purchaser. Our responsibility ceases on delivery to carrier. Direct expenses incurred for phytosanitary certificates and fumigation of trees as required for shipment to international destinations will be passed on to the Purchaser

SHIPPING TIMEFRAMES:

Bare Root, B & B, and Root Bag shipping season:

January 1 – May 31st

B & B material shipped after May 15th is subject to a 10% maintenance fee.

Claims for bare root trees shipped **after May 1st** may not be considered under full plant guarantee.

Container and VigorLiner® shipping season:

Orders for current catalog year crop must ship before June 30.

TERMS:

Payment terms for approved open credit accounts are NET 30 days from invoice date.

Open credit account agreements incorporate all terms and conditions contained herein, on our invoices and any other referenced documents, supplements or amendments.

Terms and Conditions of sale include: The Catalog, invoices, bills of lading, letters of agreement, credit applications and all information supplied by the customer. All are components of this sale contract.

A service charge of 1½% per month (18% per annum) will be assessed on all overdue accounts.

All customers must provide JFS with a valid resale certificate, in the event you are unable to provide a valid resale certificate JFS reserves the right to cancel your order and/or charge you the appropriate sales tax for the state that the product is delivered to.

For new orders with an immediate ship date, we offer the convenience of using your Visa®, MasterCard®, Discover®, or Online ACH Payment. Customers will be charged the appropriate credit card fees associated with the transaction.

Any change in Customer Ownership will require a new Credit Application

Download our Credit Application from our website by clicking on the Downloads button on the home page: www.jfschmidt.com.

J. Frank Schmidt & Son Co. holds a security interest in all nursery stock sold and may require such documents as needed to perfect such interest.

Where applicable, J. Frank Schmidt & Son Co. may request information required to send lien or bond claim notices as required by state and/or federal law to preserve its rights to file a lien or bond claim.

Deposits for international orders are non-refundable.

PLANT GUARANTEE:

J. Frank Schmidt & Son Co. expressly warrants that all trees purchased are true to name and in good, healthy condition when they leave the nursery and holds itself in readiness, on proper proof, to replace all such nursery stock that may prove otherwise. J. Frank Schmidt & Son Co. expressly disclaims any other warranty, expressed or implied, as to productiveness or growth, as to results secured in transplanting, or any other consequential damages. This warranty is not transferable and is void if payment of the contracted price for all nursery stock shipped is not made in full when due. THIS WARRANTY IS IN LIEU OF ALL OTHER WRITTEN OR ORAL, EXPRESSED OR IMPLIED WARRANTIES. J. FRANK SCHMIDT & SON CO HEREBY EXPRESSLY DISCLAIMS ANY SUCH WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

CLAIMS:

Claims for any tree death found upon arrival of nursery stock must be submitted within 10 days after delivery to be considered for credit. Questionable trees for claim must be evaluated in-person with your Outside Sales Representative. Evaluations and other general claims will be submitted to JFS then reviewed in September at which time appropriate credits will be considered. Bare Root, Ball & Burlap and Root Bag claims will not be accepted for credit if submitted after October 15th. We shall in no case be liable for any sum greater than the amount originally received for said nursery stock. Product claims stemming from damage incurred during transportation should be made with the transportation company.

PLANT PATENTS:

All Nursery Stock bearing plant patent identification numbers have been produced under license from the patent owners. Propagation or reproduction of these varieties without permission of the plant owner is in violation of plant patent law.

DISPUTES:

In the event a dispute arises as to the enforcement of any of the terms or provisions of this agreement, J. Frank Schmidt & Son Co. will be entitled to all costs incurred including, but not limited to attorney fees, whether or not any legal proceeding is initiated. In any action to enforce this agreement, the prevailing party shall be entitled to recover its costs, disbursements, and attorney fees in connection with such action and any appeal or review. Should it become necessary to file suit to enforce this agreement, such suit shall be brought in the County of Clackamas, State of Oregon.

Our product lines are sold under these two discount schedules which are designed to maximize your volume discount opportunities. While calculated separately, purchases under each product line schedule accumulate throughout the sales year (July 1 – June 30) extending discounts on your orders to the highest possible levels.

The earned dollar volume is re-calculated per shipment and includes any remaining products on order. Discounts are given per the dollar volume at the time of shipment and are not retroactive.

Royalties owed to patent and trademark owners are stated throughout the catalog, beneath the name of each plant to which they apply. Royalties are *in addition* to the price of the plant. Designated separately on your invoice, royalties are collected by us and paid to the owner of the rights.

Prepayment Discount Rebate

Open credit accounts may earn a 4% (APR) prepayment discount between the prepayment date and invoice date. The percentage is reviewed annually for adjustment to ongoing rates. The rebate is credited to your account once all shipments are completed.

Visit Us!

We invite you to see for yourself what sets our nursery apart from the others. We are proud of the wide range of high quality trees that we grow, and would like to show them to you. A personalized tour of our fields will help us to serve your plant needs better than ever.

The J. Frank Schmidt, Jr. Arboretum is always available for customer use and enjoyment. Established in the 1980's, it showcases over 400 species and varieties of deciduous trees, plus numerous shrubs and conifers. The show of flower, fruit, foliage and form changes daily throughout the year. The Schmidt family and staff welcome your visit. We encourage you to bring your camera and enjoy.

Our bumper stickers have declared it for years, now find out why...

TREES ARE THE ANSWER

www.TreesAreTheAnswer.info is your go-to resource designed to help you and your customers choose, grow and care for trees.

As growers, it's important that we promote the trees we grow as solutions to a broad range of environmental, economic, human health and social problems. Dozens of links will reveal tools you can use to leverage the value of trees. Bookmark it today!
