Resumen Ejecutivo

Esta publicación contiene información detallada sobre el comercio exterior de Puerto Rico para el año fiscal 2022. El objetivo de este documento es asistir al gobierno, al sector privado, y a toda entidad o persona interesada en satisfacer las necesidades de información referentes al comercio de mercancías de Puerto Rico.

Las estadísticas del comercio exterior constituyen un importante componente del Sistema de Cuentas Nacionales de Puerto Rico. Para comprender la importancia del comercio exterior en nuestra balanza de pagos, el Subprograma de Análisis Económico tiene otras dos publicaciones disponibles: Estadísticas Seleccionadas del Comercio Exterior de Puerto Rico y Balanza de Pagos y Posición de Inversión Internacional de Puerto Rico.

Los datos se presentan en una tabla resumen con las cifras de exportaciones e importaciones por país, así como el balance comercial para Puerto Rico con estos países. Otras tablas contienen secciones separadas para las exportaciones y las importaciones, en un formato de mercancía por país. También se incluyen los totales para los principales grupos de productos. Para cada artículo presentamos el código correspondiente a seis dígitos de acuerdo al Sistema de Clasificación Industrial de América del Norte (SCIAN o NAICS, en inglés). El Sistema de Clasificación Industrial de América del Norte reemplazó el Sistema de Clasificación Industrial, y ha provisto un sistema consistente de análisis económico para los tres países miembros del Tratado entre México, Estados Unidos y Canadá (T-MEC).

Agradecemos la colaboración de la División de Comercio Exterior del Negociado del Censo de los Estados Unidos, que proporciona las estadísticas mensuales de comercio exterior que permiten la preparación de esta publicación y al personal de la Junta de Planificación que laboró en la producción de dicho documento.

Executive Summary

This publication presents detailed information on Puerto Rico's external trade for fiscal year 2022. The objective of this document is to assist the government, the private sector, and all interested entity or individual, in fulfilling the need for Puerto Rico's merchandise trade data.

The external trade statistics represent an important component of Puerto Rico's System of National Accounts. To understand the overall importance of external trade in our balance of payments, the Subprogram of Economic Analysis has two other available publications: Estadísticas Seleccionadas del Comercio Exterior de Puerto Rico (Selected Statistics on Puerto Rico's External Trade), and Balanza de Pagos y Posición de Inversión Internacional de Puerto Rico (Puerto Rico's Balance of Payments and International Investment Position).

The data are presented in a summary table with the exports and imports figures by country, as well as Puerto Rico's trade balance with these countries. Other tables contain separate sections for exports and imports, in a merchandise-country format. It also includes totals for major commodity groupings. We include, for each commodity, its corresponding six-digit North American Industry Classification System (NAICS) code. The North American Industry Classification System replaced the U.S. Standard Industrial Classification system (SIC) and has provided a consistent system for economic analysis for the three United States-Mexico-Canada Agreement (USMCA) member countries.

We acknowledge the collaboration of the Foreign Trade Division of the U.S. Bureau of the Census, which provides the monthly external trade statistics enabling the preparation of this publication, as well as the Puerto Rico Planning Board staff which worked in the production of this document.

6. Shipments of Merchandise from Puerto Rico to the U.S. Virgin Islands, by Commodity: Fiscal Year 2022
(Embarques de mercancía desde Puerto Rico hacia Islas Vírgenes EE.UU. por artículo: Año Fiscal 2022) 645

PUERTO RICO' S EXTERNAL TRADE DATA SYSTEM AND DEFINITIONS

Introduction

The external trade data system of Puerto Rico incorporates all transactions of merchandise between Puerto Rico and the United States, U.S. Virgin Islands, and foreign countries. The U.S. Bureau of the Census compiles this information. Currently, the Subprogram of Economic Analysis of the Puerto Rico Planning Board receives the monthly information containing detailed statistics of the transactions by commodity, mean of transportation, weight, value, quantity, and country. This data is processed according to our specific needs of information in different types of tabulations. There are three basic geographic classifications: United States, foreign countries, and the U.S. Virgin Islands. Puerto Rico is a Customs district within the U.S. Customs territory and tariff system.

Shipments between Puerto Rico and the United States

Statistics on shipments from the United States to Puerto Rico, and on shipments from Puerto Rico to the United States, are compiled from the Electronic Export Information (EEI) filed by the U.S. Principal Party in Interest (USPPI, the person or legal entity in the United States that receives the primary benefit, monetary or otherwise, from the export transaction). Statistics on shipments from Puerto Rico to the United States are compiled from automated data submitted through the Customs Automated Commercial System and from import documents filed with Customs officials. The value is based on the transaction price including inland freight, insurance and other charges to the border point or seaport. It is classified as Free Alongside Ship (FAS) value at the port of embarkation. It should not include ocean freight, marine insurance, or other charges incurred beyond the port of embarkation.

Trade with foreign countries

Data on exports of merchandise from Puerto Rico to foreign countries is also compiled from the EEI filed by the USPPI or their agents through the Automated Export System (AES). Each EEI represents a shipment of one or more kinds of merchandise from one exporter to one foreign importer on a single carrier. Filing the EEI is mandatory under Chapter 9, Title 13, United States Code. Qualified exporters or their agents submit EEI data by automated means directly to the U.S. Census Bureau. Published data on imports of merchandise from foreign countries is compiled primarily from automated data submitted through the U.S. Customs' Automated Commercial System. Data are also compiled from import entry summary forms, warehouse withdrawal forms and Foreign Trade Zone documents as required by law to be filed with the U.S. Customs and Border Protection.

The value of the shipment is based on the transaction price including inland freight, insurance, and other charges to the place of embarkation. Merchandise in transit shipped through Puerto Rico from one foreign country to another is not considered as an export. Imported merchandise which has cleared customs, and which is re exported without further processing, is classified separately as exports of foreign merchandise, but included as part of exports and classified according to the official schedules.

Country of destination is defined as the place where the merchandise is to be consumed or used, either in further processing or final manufacturing. In the event the exporter does not have enough or definite information as to the ultimate destination of the shipment, it is credited for statistical

purposes to the country to which it is consigned. Since 1982, import data is presented in terms of customs value, defined as the price paid for merchandise exported to the U.S., excluding U.S. import duties, freight, insurance and other charges incurred in bringing the merchandise to the United States. Before 1982, import data was presented as FAS value, which was defined as the transaction value of imports at the foreign port of embarkation.

Shipments between Puerto Rico and the U.S. Virgin Islands

In the case of shipments between Puerto Rico and the U.S. Virgin Islands, the data is also collected from the EEI filed by the USPPI, and includes information compiled from automated data submitted through the Customs Automated Commercial System and from import documents filed with Customs officials. The value shown is the customs value, which is the value of imports as appraised by U.S. Customs. Commodity information is reported according to the classification schedules of the U.S. Department of Commerce.

Classifications

As part of the U.S. Customs system, the commodity classification systems used are the same as those presented in the Schedule B for exports and imports to or from the United States, and the Harmonized Tariff Schedule Annotated for imports from foreign countries. Both systems are based on the Harmonized Commodity Description (HS) and the Coding System.

Sources of information of external trade statistics

The annual report External Trade Statistics is one of the publications in which Puerto Rico's trade data is presented to the public. It includes a detailed set of statistics by commodity and country using the HS, and remains current prior to any review of such data by the US Department of Commerce. Summary tables for each fiscal year are included in the Statistical Appendix of the Economic Report to the Governor, in Selected Statistics on Puerto Rico's External Trade, and in Puerto Rico Balance of Payments and International Investment Position. We reiterate our willingness to assist users of this information.

SISTEMA DE DATOS DE COMERCIO EXTERNO DE PUERTO RICO

El sistema de las estadísticas del comercio exterior de Puerto Rico incorpora todas las transacciones de mercancía entre Puerto Rico y Estados Unidos (EE.UU), las Islas Vírgenes de los EE.UU. y países extranjeros. Esta información es recopilada por el Negociado del Censo de los EE.UU. Actualmente, el Subprograma de Análisis Económico de la Junta de Planificación de Puerto Rico recibe mensualmente la información que contiene estadísticas detalladas de las transacciones por artículo, medio de transportación, peso, valor, cantidad y país. Las cifras se procesan de acuerdo a las necesidades específicas de información solicitada. Existen tres clasificaciones básicas: Estados Unidos, países extranjeros e Islas Vírgenes de EE.UU. Puerto Rico es un distrito de aduanas dentro del sistema aduanero y arancelario de EE.UU.

Envíos entre Puerto Rico y Estados Unidos

Las estadísticas sobre los embarques desde los Estados Unidos hacia Puerto Rico, y desde Puerto Rico hacia los Estados Unidos, se compilan a partir de la Información de Exportación Electrónica (Electronic Export Information o EEI, en inglés) presentada por la parte principal interesada de los Estados Unidos (U.S. Principal Party in Interest o USPPPI, en inglés, la persona o entidad legal en Estados Unidos que recibe el beneficio primario, monetario o no, de la transacción de exportación). Las estadísticas sobre los embarques desde Puerto Rico a los Estados Unidos se compilan a partir de datos automatizados enviados a través del Sistema Comercial Aduanero Automatizado (Customs Automated Commercial System, en inglés) y de los documentos de importación presentados a los funcionarios de Aduanas. El valor se basa en el precio de la transacción, incluido el flete interno, el seguro y otros cargos hasta el punto fronterizo o el puerto marítimo. Se clasifica como valor franco al costado del buque (Free Alongside Ship o FAS, en inglés) en el puerto de embarque. No debe incluir fletes marítimos, seguros marítimos u otros cargos incurridos más allá del puerto de embarque.

Comercio con países extranjeros

La información para las exportaciones de Puerto Rico con países extranjeros también se compila a partir de la EEI presentada por la USPPPI o sus agentes a través del Sistema Automatizado de Exportación (Automated Export System o AES, en inglés). Cada EEI representa un envío de uno o más tipos de mercancías de un exportador a un importador extranjero en un solo transportista. La presentación de la EEI es obligatoria en virtud del Capítulo 9, Título 13, Código de los Estados Unidos. Los exportadores calificados o sus agentes envían datos de EEI por medios automatizados directamente a la Oficina del Censo de los EE.UU. Los datos publicados sobre las importaciones de mercancías desde países extranjeros se compilan principalmente a partir de datos automatizados enviados a través del Sistema Comercial Automatizado de Aduanas de los EE.UU. Los datos también se compilan a partir de los formularios de resumen de entrada de importación, formularios de retiro de almacén y documentos de la Zona de Comercio Exterior, según lo exige la ley ante la Oficina de Aduanas y Protección de Fronteras de los EE.UU.

El valor del embarque se basa en el precio de la transacción, incluido el flete interno, el seguro y otros cargos al lugar de embarque. La mercancía en tránsito enviada a través de Puerto Rico desde un país extranjero a otro no se considera una exportación. Las mercancías importadas que han despachado las aduanas y que se reexportan sin procesamiento adicional, se clasifican por separado como exportaciones de mercancías extranjeras, pero se incluyen como parte de las exportaciones y se clasifican de acuerdo con las listas oficiales.

El país de destino se define como el lugar donde se va a consumir o usar la mercancía, ya sea en el procesamiento posterior o en la manufactura final. En el caso de que el exportador no tenga información suficiente o definitiva sobre el destino final del envío, se le acredita con fines estadísticos en el país al que se le envía. Desde 1982, los datos de importación se presentan en términos de valor en aduana, definido como el precio pagado por la mercancía exportada a los Estados Unidos, excluyendo los aranceles de importación de EE.UU., el flete, el seguro y otros cargos incurridos para llevar la mercancía a los Estados Unidos. Antes de 1982, los datos de importación se presentaban como valor FAS, que se definía como el valor de transacción de las importaciones en el puerto de embarque extranjero.

Envíos entre Puerto Rico y las Islas Vírgenes de los Estados Unidos

En el caso de envíos entre Puerto Rico y las Islas Vírgenes de los EE.UU., los datos también se recopilan de la EEI presentada por la USPPi, e incluye información compilada a partir de los datos automáticos enviados a través del Sistema Comercial Automatizado de Aduanas y de los documentos de importación radicados con los funcionarios de aduanas. El valor que se muestra es el valor en aduana, que es el valor de las importaciones según lo evaluado por la Aduana de los EE.UU. La información sobre los bienes (commodities) se informa de acuerdo con los itinerarios de clasificación del Departamento de Comercio de los EE.UU.

Clasificaciones

Como parte del sistema de aduanas de EE. UU., los sistemas de clasificación de commodities utilizados son los mismos que en los Estados Unidos: el Anexo B (Schedule B) para las exportaciones e importaciones hacia o desde los Estados Unidos y el Arancel Armonizado Anotado (Harmonized Tariff Schedule Annotated) para las importaciones desde países extranjeros. Ambos sistemas se basan en la Descripción de Mercancía Armonizada (Harmonized Commodity Description o HS, en inglés) y el Sistema de Codificación.

Fuentes de información de estadísticas de comercio exterior

El informe anual Estadísticas de Comercio Exterior (External Trade Statistics) es una de las publicaciones en la que los datos comerciales de Puerto Rico se presentan al público. Incluye un conjunto detallado de estadísticas por producto y país utilizando el HS y mantiene su vigencia previa a cualquier revisión de dichos datos por el Departamento de Comercio de Estados Unidos. Las tablas de resumen para cada año fiscal se incluyen en el Apéndice Estadístico del Informe Económico al Gobernador, en las Estadísticas Seleccionadas del Comercio Exterior de Puerto Rico y en la Balanza de Pagos y Posición de Inversión Internacional de Puerto Rico. Reiteramos nuestra disposición de asistir a los usuarios de esta información.
