

## Sapindaceae

The Checklist of Coastal Forests lists 20 Genera, 25 Species

I am growing

Deinbollia borbonica  
Lecaniodiscus fraxinifolius  
Majidea zanguebarica

Propogation

Grow from seed.  
Seed must be cleaned and sown as soon as possible—  
within a day is best. The seed takes about 2–3 weeks to  
germinate with bottom heat or a warmer ambient temperature.  
Sapindaceae butterflies /moths

Growing Rare Plants - Geoff Nichols

Sapindaceae are host plants to:

Charaxes varanes- Pearl Charaxes  
Euphaedra neophron - Gold-banded Forester
