

CHECK-LIST OF MOSSES OF THE FORMER USSR СПИСОК МХОВ ТЕРРИТОРИИ БЫВШЕГО СССР

Abstract

The list includes 59 families, 269 genera, 1172 species and 75 infraspecific taxa of mosses, those are known for the territory of the former USSR. Among these 44 species and 1 variety are considered as dubious. For the accepted species the distribution within the territory of the former USSR is indicated, 20 regional divisions are recognized. Synonyms and systematical arrangement are also provided.

This check-list is the result of collaboration among many bryologists from the territories comprising the former USSR. A preliminary database was compiled from the literature by E.A. Ignatova and M.S. Ignatov, and the latter also established the regional divisions. Subsequently, the records for each territory were verified by the following experts who also added some omitted or unpublished data, as well as many valuable comments:

ARC: O. M. Afonina and I. V. Chernyadjeva (EURO, WS), L.R. Kannukene and Afonina (ES), Afonina (BE);

EUR: Afonina, R. N. Schljakov and L. A. Volkova (NW), G. V. Zheleznova (NE), A.P. Dyachenko, Zheleznova (N-UR), Kannukene (B), O. M. Maslovskiy and G. F. Rykovskiy (BLR), Ignatov (C), L.Ya. Partyka and V.M. Virchenko (W), Partyka (K), A.N. Mordvinov (E), Dyachenko and Ignatova (S-UR);

CAUC: V. A. Manakyan;

SIB: L. V. Bardunov, Ignatova and Chernyadjeva (E), Bardunov, S.G. Kazanovskiy, Ignatov (S)

FAR EAST: V.Ya. Cherdantseva (S), Cherdantseva and Chernyadjeva (N);

MID AS: U. K. Mamatkulov.

Valuable comments on taxonomy of *Bryum* and *Drepanocladus* s.l. were done by Schljakov.

Then the database was completed and supplemented with the list of synonyms.

The final editing, including checking nomenclature, taxonomic decisions and synonymy, was done by Ignatov¹ and Afonina².

Настоящий список представляет собой результат совместной работы многих бриологов бывшего СССР. Предварительная база данных была составлена по литературным материалам Е.А. Игнатовой и М.С.Игнатовым, который также предложил районирование территории. Этот первоначальный вариант был проверен специалистами по отдельным регионам, которые также дополнили его новыми данными и дали свои комментарии:

ARC: О. М. Афонина и И. В. Чернядьева (EURO, WS), Л.Р. Каннукене и Афонина (ES), Афонина (BE);

EUR: Афонина, Р. Н. Шляков и Л. А. Волкова (NW), Г. В. Железнова (NE), Железнова, А. П. Дьяченко (N-UR), Каннукене (B), О.М.Масловский и Г.Ф.Рыковский (BLR), Игнатов (C), В. М. Вирченко и Л. Я. Партика (W), Партика (K), А. Н. Мордвинов (E), Дьяченко и Игнатова (S-UR);

CAUC: В. А. Манакян;

SIB: Л. В. Бардунов, Игнатов и С. Г. Казановский (S), Бардунов, Чернядьева, Игнатова (E);

FAR EAST: В. Я. Черданцева (S), Черданцева и Чернядьева (N);

MID AS: У. К. Маматкулов.

Существенные уточнения по таксономии *Bryum* и *Drepanocladus* s.l. были сделаны Шляковым.

После этих региональных дополнений в базу данных был включен список синонимов.

Окончательная редакция списка, включая проверку номенклатуры, синонимики и вопросы таксономии, принадлежит Игнатову¹ и Афониной².

INTRODUCTION

A check-list of mosses for the whole territory of the former USSR has never been prepared, so it is natural that we have been faced with enormous problems. Regarding many problematic taxa, we felt that any attempt at resolution now would be premature, since many groups are in desperate need of revision. Particularly poorly known and putatively ill-defined species are marked with an "[?]" ; however, these are not numerous and this designation has been used mainly for species that are known from the type material only (for example, Philibert described 20 species of *Bryum* from the Terskey-Alatau Mountains in Middle Asia; it has been impossible to evaluate these, but specific rank for all of them seems improbable).

Familiar/ generic treatment is based principally on Brotherus' (1924-1925) system, but some newly established genera and ideas of classification (Vitt, 1984, Buck & Vitt, 1986, etc.) have been incorporated. Narrow generic conceptions are accepted. However, if another approach is preferred, the appropriate combination can easily be found because synonyms and accepted names are combined.

In respect to varietal/ subspecific status we are in agreement with the statement by Anderson & al. (1990) that there is no real difference between the two, and we have used only variety, except in a few cases where suitable combinations are lacking. The category of form is ignored.

In regard to the citation of authority names, many publications were consulted extensively and it is enormous task to mention all of them. Some recent check-lists were especially useful (Anderson & al., 1990; Corley & al., 1981, Ireland & al., 1987; Iwatsuki & Noguchi, 1973; Koponen & al., 1977), and many corrected names and ideas were compiled from them. Where indirect evidence of authorship is involved, we prefer to follow the Anderson & al.(1990) format of citation. This position seems more progressive and is the current practice with phanerogamic nomenclature. Concerning "Bryologia Europaea", however, we disagree in some details with Anderson & al.(1990) simplification of "Bruch et Schimp. in B.S.G." for volumes I-IV and "Schimp. in B.S.G." for vols. V-VI. According to the preface in vol.I, Bruch worked with Schimper on *Fontinalis*, *Dichelyma* and *Climacium*. Also, according the later Schimper publications (1855, 1860) it is clear that *Physcomitrella* was established by Schimper alone, while *Homalia* was done jointly by Bruch et Schimper. Unfortunately Schimper's papers are not correspond well with each other and so in some other instances where Bruch's participation may have been significant (for example, in *Hygrohypnum* and *Brachythecium*) we have left the citation as "Schimp. in B.S.G.". Guembel traditionally has been considered not to be a taxonomist, but according to Schimper (1855, 1860), he dealt with at least three taxa of Amblystegiaceae, including *Hypnum* (*Warnstorffia*) *exannulatum* Guemb. in B.S.G.; *Amblystegium* (*Campylium*) *polygamum* B.S.G.; *Amblystegium* (*Leptodictyum*) *curvipes* Guemb. et Schimp. in B.S.G.

The regional records are based on herbarium specimens or, in some instances on literature records, when we have been confident of their validity. In less certain cases, we tried to check specimens, and if it was not readily possible records were omitted (if there were serious doubts) or designated with a "?", which indicate that the record needs to be confirmed.

The regional divisions are based primarily on those in "Flora of the USSR" (1934-1960) and "Flora Europaea" (1964-1980), but some modifications have been made as follow: 1) if possible, administrative borders are used for the delimitation of regions, which facilitated the use of many regional data based on administrative units, especially in the European part of the former USSR; 2) we avoided dividing bryologically richer and more explored area. For this reason the Urals are treated as a unit jointed to Europe, rather than divided into European and Asiatic slopes, and the border between West and East Siberia has been shifted somewhat westward to follow the border of Tumen and Krasnojarsk Provinces (instead of Yenissej River)

THE REGIONAL DIVISIONS:

- ARC** - Arctic floristic province, as it is delimited by Yurtsev et al. (1978);
EURO - European Arctic, eastward up to Polar Ural Mountains, the Novaya Zemlya Island also belong to this subregion;
WS - West Siberian Arctic, from the foot of eastern slope of Polar Ural Mts. eastward to the administrative border of Tyumen and Krasnojarsk Provinces;
ES - East Siberian Arctic, eastward to the Magadan Province;
BE - Beringian Arctic (within the Magadan Province);
EUR - European part of the former USSR plus Asian slopes of Ural Mountains., excluding Arctic;
NW - North-West: Murmansk and St.-Petersburg (Leningrad) Provinces and Karelian Republic;
NE - North-East: Arkhangelsk Province and Komi Republic, excluding Ural Mountains;
N-UR - Northern Part of Ural Mountains within Komi Republic and Tyumen Province;
B - Baltic countries (republics): Estonia, Latvia, Lithuania and also Kaliningrad Province;
BLR - Belorussia;
C - Central Russia (Pskov, Novgorod, Vologda, Kostroma, Tver (Kalinin), Smolensk, Moskva (Moscow), Vladimir, Yaroslavl, Ivanovo, Nizhnij Novgorod (Gorkiy), Kirov (Vyatka), Bryansk, Kaluga, Orel, Lipetsk, Belgorod, Tula, Tambov, Ryazan, Kursk, Penza, Voronezh Provinces and Udmurtia, Tatarstan, Marijskaya, Mordovian and Chuvashian Republics);
W - West: Ukraine (Krym excluded) and Moldova;
K - Krym (Crymea) Peninsula;
E - East (or South-East) European Russia: Rostov-on-Don, Saratov, Volgograd, Astrakhan, Ulyanovsk and Samara (Kujbyshev) Provinces and Kalmykian Republic;
S-UR - Southern part of Ural: Perm, Czelyabinsk and Orenburg Provinces and Bashkirian Republic, and also part of Ekaterinburg (Sverdlovsk) Province within the range of Ural Mountains;
CAUC - Caucasus: Armenia, Azerbaijan, Georgia and Stavropol and Krasnodar Provinces;
SIB - Siberia: northward to Arctic floristic province, westward to the Ural Mountains, southward to the Kazakh Republic' border, eastward to the borders of Magadan, Khabarovsk and Amurskaya Provinces;

W - Western Siberia: Tyumen, Kurgan, Omsk, Tomsk and Novosibirsk Provinces, also including the lowland part of Ekaterinburg Province and excluding the part of Tyumen Province within the range of Ural Mountains;

E - Eastern Siberia: Krasnoyarsk Province (southern part excluded as explained under SIB:S), Yakutian Republic and northern part of Irkutsk Province (see note under SIB:S);

S - Southern Siberia: Altaiiskij, Kemerovo and Chita Province, southern parts of Kraskoyarsk (northward to Angara River) and Irkutsk (northward to ca.57°N) Provinces and Tuva and Buryat (Buryatskaya) Republics;

FAR EAST - Magadan, Khabarovsk, Primorskaya, Sahalienskaya, Kamchatskaya and Amurskaya Provinces;

N - Magadan, Kamchatskaya Provinces and northern part of Khabarovsk Province (southward to Uda River Basin);

S - Khabarovsk (southern part), Primorskaya, Amurskaya and Sahalienskaya Provinces;

MID AS - Kazakhstan, Tadzhikistan, Kirgizstan, Turkmanistan, Uzbekistan.

ВВЕДЕНИЕ

Для территории СССР в целом справочный список мхов ранее не составлялся и совершенно естественно поэтому, в данной работе мы столкнулись с множеством проблем. В отношении объема многих видов существуют разные точки зрения, но предпочтение той или иной отдать сейчас невозможно, поскольку изученность этих групп еще совершенно недостаточна. Принимая ту или иную трактовку мы, однако, старались всегда отразить в синонимике возможность и другого понимания таких таксонов. Только наиболее критические и, по-видимому, излишне описанные виды отмечены в списке [?] - эти случаи относятся преимущественно к видам, известным только по типовым коллекциям (например, Филибер описал с Терской-Алатау в Средней Азии около 20 видов *Bryum*; переизучить эти материалы в процессе подготовки настоящего списка было невозможно, но вместе с тем видовой статус всех этих видов очень сомнителен).

Семейства и роды трактуются в целом в соответствии с системой Бротеруса (Brotherus, 1924-25), но ряд описанных впоследствии родов, а также новейшие идеи по классификации семейств (Vitt, 1984, Buck & Vitt, 1986, и др.) также приняты во внимание. Узкое понимание родов представляется нам более предпочтительным. Однако бриологи, желающие сохранить традиционное широкое понимание таких родов как *Grimmia*, *Hylocomium*, *Drepanocladus* и др., смогут выбрать соответствующую комбинацию с выверенным цитированием авторов среди синонимов.

В отношении разновидностей и подвидов мы полностью разделяем точку зрения авторов североамериканского списка (Anderson & al., 1990) - на практике между ними нет разницы. Поэтому мы старались использовать только статус разновидности. В тех немногих случаях, однако, когда соответствующая комбинация отсутствует мы включали в список и подвиды. Категория формы опущена.

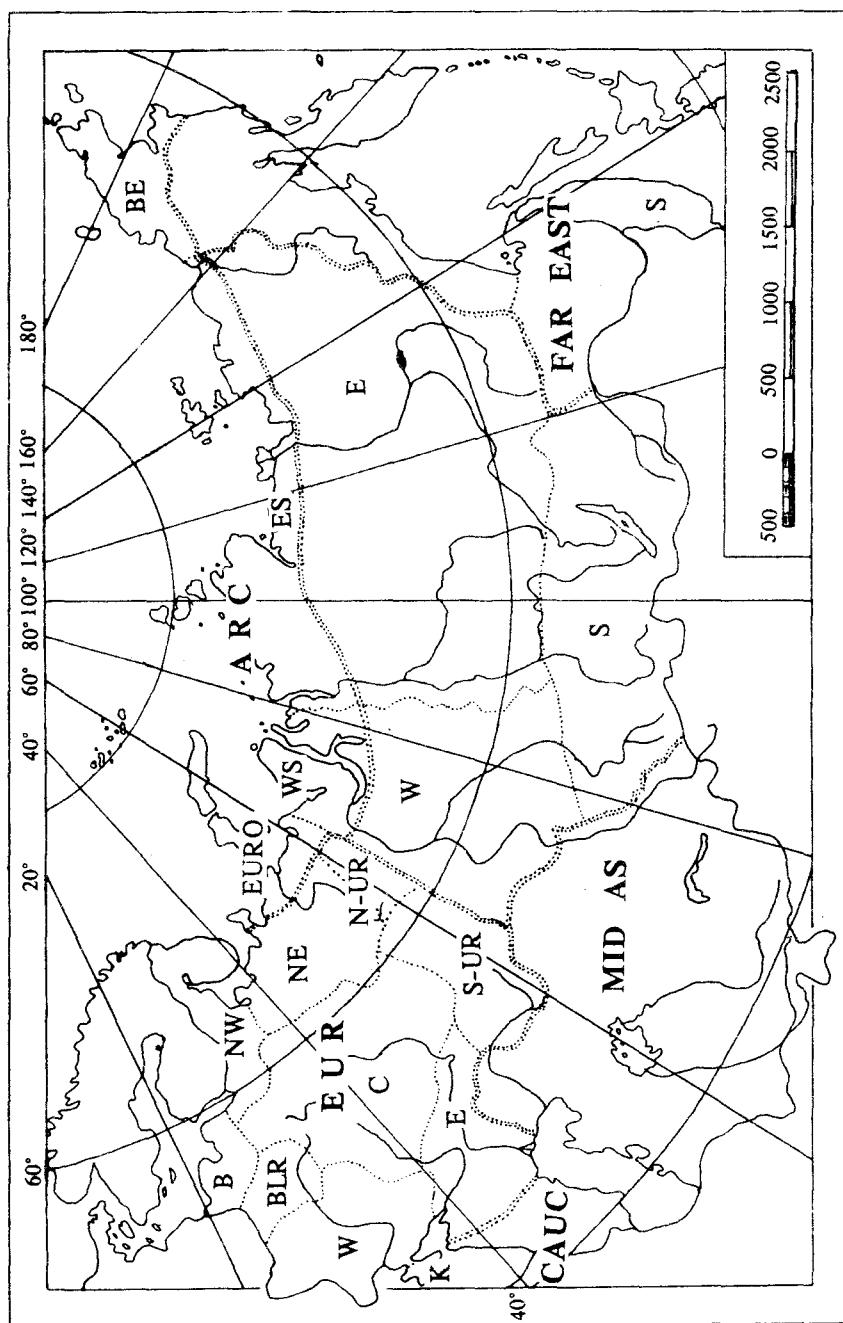

Fig. 1. *The regional divisions of the territory of the former USSR* Районирование территории бывшего СССР.

Цитирование авторов таксонов основано на многих источниках, даже простое перечисление которых потребовало бы составления солидной библиографии. Особенно часто мы консультировались в недавно опубликованных справочных списках Северной Америки, Канады, Европы, Японии и др. (Anderson & al., 1990; Corley & al., 1981, Ireland & al., 1987; Iwatsuki & Noguchi, 1973; Коропен & al., 1977). Следуя североамериканским авторам мы даем полную номенклатурную цитату, в которую включены и непосредственные авторы описания и авторы публикации. Иногда из-за этого цитирование оказывается громоздким. Последнего, конечно, можно избегать принимая обычные упрощения ("A.. in B.." заменяя на "A..", а "C.. ex D.." - на "D.."). Удобные для неспециальной литературы, они, вместе с тем, не могут быть широко рекомендованы. Непрямое указание на авторство видов учитывается, поскольку этот принцип становится признанным в ботанической номенклатуре всех групп растений. В отношении цитирования "Bryologia Еuropaea" мы однако в некоторых деталях расходимся с авторами североамериканского списка, предлагающими упрощенный вариант: Bruch et Schimp. in B.S.G. для I-IV томов; Schimp. in B.S.G. для V-VI томов. Как явствует и из введения, и из последующих работ Шимпера (Schimper, 1855, 1860) *Physcomitrella* была описана Шимпером одним, а *Homalia* и *Fontinalis* - Брухом и Шимпером вместе. Брух, очевидно, принимал участия и в обработке *Brachythecium* и *Hygrohypnum*, но в отношении этих родов указания Шимпера разноречивы и для них мы оставляем "Schimp. in B.S.G.". Гюмбель обычно не считается автором описаний вовсе, но согласно Шимперу (и многим авторам XIX века) имел отношение к описанию по крайней мере 3 видов: *Hypnum (Warnstorffia) exannulatum* Guemb. in B.S.G.; *Amblystegium (Campylium) polygamum* B.S.G.; *Amblystegium (Leptodictyum) curvipes* Guemb. et Schimp. in B.S.G.

Указания на распространение видов по регионам основано преимущественно на гербарных материалах, но иногда и на литературных данных, когда они не вызывали сомнений. В сомнительных случаях мы старались проверить образцы, а если этого не удавалось указания не учитывалось (если были серьезные основания сомневаться в правильности определений) или приведены со знаком ? (что означает - "указание нуждается в подтверждении").

Районирование базируется в целом на схемах, принятых во "Флоре СССР" (1934-1960) и "Flora Еuropaea" (1964-1980). Некоторые изменения были предприняты в двух направлениях: 1) где возможно, мы старались использовать для разграничения флористических районов административные границы - несмотря на очевидное несоответствие, данный подход оправдан тем, что подавляющее большинство флористических данных (и содержание этикеток, и публикации) относятся к областям или республикам (особенно в европейской части б.СССР); 2) мы избегали проводить границы по местам повышенного видового разнообразия мхов. Поэтому а) европейские и азиатские склоны Урала рассматриваются нами вместе, в составе европейского района; б) граница между Западной и Восточной Сибирью смешена несколько к западу от долины Енисея и идет по границе Тюменской области и Красноярского края.

Районы

ARC - арктическая флористическая область в смысле Юрцева и др. (1978).

EURO - европейский сектор, проходящий на восток до Полярного Урала включительно, о. Новая Земля также относится к этому сектору;

WS - западносибирский сектор, на восток до границы Тюменской области и Красноярского края (несколько западнее Енисея);

ES - восточносибирский сектор, на восток до Магаданской области;

BE - Берингийский сектор (весь - в пределах Магаданской области);

EUR - европейская часть бывшего СССР, плюс Урал целиком, минус арктическая флористическая область и части Краснодарского и Ставропольского краев;

NW - северо-запад: Мурманская и Санкт-Петербургская (Ленинградская) области и Карелия;

NE - северо-восток: Архангельская область и республика Коми без территории Северного и Приполярного Урала;

N-UR - территория Приполярного Урала и Северного Урала в пределах республики Коми и Тюменской области;

B - государства Балтии (бывшие республики): Эстония, Латвия, Литва, а также Калининградская область;

BLR - Белоруссия;

C - центр Европейской России: Псковская, Новгородская, Вологодская, Костромская, Тверская (Калининская), Смоленская, Московская, Владимирская, Ярославская, Ивановская, Нижегородская (Горьковская), Кировская (Вятская), Брянская, Калужская, Орловская, Липецкая, Белгородская, Тульская, Тамбовская, Рязанская, Курская, Воронежская области и республики Удмуртия, Татарстан, Марийская, Мордовская, Чувашская;

W - запад: Украина (без Крыма), Молдова;

K - Крым;

E - восток (юго-восток) Европейской России: Ростовская, Саратовская, Волгоградская, Астраханская, Ульяновская и Самарская (Куйбышевская) области и Калмыкия;

S-UR - южная часть Урала: Пермская, Челябинская и Оренбургская области и Башкирия, а также часть Екатеринбургской (Свердловской) области в пределах Уральских гор;

SIB - Сибирь: на север до Арктики, на запад до Урала (граница пересекает территории Тюменской и Екатеринбургской областей), на юг до границы Казахстана, на восток до границ Магаданской и Амурской областей и Хабаровского края.

W - Западная Сибирь: Тюменская (часть ее в пределах Уральских гор отнесена к EUR:N-UR), Курганская, Омская, Томская и Новосибирская области, а также равнинная часть Екатеринбургской области;

E - Восточная Сибирь: Красноярский край (без южной части, которая отнесена к SIB:S), Якутия и север Иркутской области;

S - Южная Сибирь: Алтайский край, Кемеровская и Читинская области, а также юг Красноярского края (на север до р. Ангара), Тувинская и Бурятская Республики и южная часть Иркутской области (южнее 57° с.ш.);

FAR EAST - Дальний Восток: Магаданская, Амурская, Сахалинская, Камчатская области, Приморский и Хабаровский края;

N - Магаданская и Камчатская области и север Хабаровского края (на юг до бассейна р. Уда);

S - Хабаровский (южная часть) и Приморский края, Амурская и Сахалинская области;

MID AS - Казахстан, Таджикистан, Киргизстан, Туркменистан, Узбекистан.
