<b>SPECIES</b>	Eucalyptus siderophloia
<b>COMMON NAME</b>	Northern grey ironbark
<b>ORIGIN</b>	Queensland
<b>DESIGN USE</b>	Coastal plant or in reforestation

### HEIGHT

30m - 40m

### SPREAD

8m - 10m

### HABIT

A tall tree, with a deeply-furrowed, black bark, which is hard and close in the mature trees, but laminated in the younger ones, and this distinguishes the tree from *E. paniculata*. A slow growing, long-lived tree, very hardy.

### FORM

Tall and upright with abnormal leaves that are particularly large and leathery, measuring many inches in the length and breadth.

### FLOWERS

Flowers are white, or cream.

### FLOWERING PERIOD

Late winter to spring

### FRUIT

It is turbinate, on a rather thick pedicel, and angular at the base.

### VARIATIONS

### BARK / TRUNK

Bark persistent throughout, grey-black, 'ironbark'.

### CLIMATIC TOLERANCES

Can only tolerate light frosts. Salt-spray tolerant.

### HORTICULTURE

Prefers full sun. Prefers clay soil. Propagates by seed.
