

LILACS 2022

Everything will be available in a
100% recyclable pot (PP)
in the colour 'dark beige'.

SYRINGA VULGARIS

These are the most 'famous' lilacs, especially because of their typical lilac scent. The lilacs are in bloom from mid April to May. The flowers have a pleasant sweet scent. They are single or double (filled) and form large flower plumes.

After a few years, the plants show their full bloom. The plants have heart-shaped leaves. The adult height varies per species from 2 to 3,5 meters.

SYRINGA VULGARIS

VARIETY	COLOUR	HEIGHT	PREMIUM SELECTION AVAILABLE	SYRINGA BARE ROOT AVAILABLE

SYRINGA VILLOSAE

This group of lilacs forms numerous flower plumes at an early age. These varieties are therefore available from May to June as rich flowering, compact plants. The flowers have a spicy,

seasoned scent. The plants have elongated leaves. As an adult plant they reach a height varying per species, from 1,2 to 2 meters.

SYRINGA VILLOSAE

VARIETY	COLOUR	HEIGHT	PREMIUM SELECTION AVAILABLE
Syringa (V) 'Agnes Smith'	white flower, floriferous end may-june	1,6-2m	✓

MINI LILAC

The compact growth makes these lilacs ideally suited for a pot on the patio. Some varieties are also suitable for forming a wonderfully scented and low-growing hedge. The mini lilacs flower in April-May and have a sweet scent, a single variety

gives extra flowering in august. Without (shape)pruning, the plants can reach 0,8 to 1,5 meters, depending on type

MINI LILAC

VARIETY	COLOUR	HEIGHT	PREMIUM SELECTION AVAILABLE
Syringa 'Josée'	floriferous, deep rose flowers, re-bloom in august	1,2-1,5m	✓
Syringa meyeri 'Palibin'	small-leaved, compact grower, pink-purple flowers	0,8-1m	✓
Syringa persica 'Alba'	pure white flowers over the whole branch, fine leaves	1,2-1,5m	

MINI LILAC LICENSE®

These lilacs have a special colour or characteristic, and may only be multiplied for a royalty fee. The varieties are compact and ideally suited for a pot on the patio. Some varieties are also suitable for forming a wonderfully scented low-growing hedge. The first bloom is in April-May, but a single variety has

a strong second bloom in August or even blooms throughout the summer. They have a lovely sweet lilac scent. The adult height varies per species from 0,6 to 1,5 meters.

Syringa 'Pinnatifolia'	leaf like Sorbus, white, single flower	2-3m	

PREMIUM SELECTION

This includes plants with an extra heavy sorting. We have made this sorting from a selected assortment in 5 litre container. These plants are provided with an extra large label with a clear appearance on the fragrance experience. A 'quality' butterfly fixed at the top of the plants, makes it

complete. For the consumer, the choice is made clear by presenting the range in uses: **LARGE, MEDIUM, SMALL**. This, together with various POS materials and a website with consumer information, makes it a successful concept.
