

# HAVE YOU SEEN THIS FLOWER?

*Grevillea maxwellii*  
Maxwell's grevillea

YES I HAVE SEEN THIS FLOWER AND WOULD BE PLEASED  
TO HELP WITH INFORMATION ON ITS DISTRIBUTION.

NAME .....

ADDRESS .....

..... PHONE .....

This small spreading shrub grows to just over 1m tall and 1.5m across and has an attractive layered appearance. Its leaves have 3 to 6 lobes each of which are divided into 3 lobes. Large red flowers are borne at the ends of its branchlets which usually bend downwards. It flowers from August to September.

CALM is working with the community to conserve Maxwell's grevillea on private property and public owned land, including road reserves. CALM can help private property owners to look after this species, if it occurs on their property.

We are interested in finding out the distribution of this plant in your area. If you have seen this flower, we would like to hear from you. You can help by returning the detachable form below.

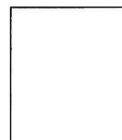

If you would like more information please contact **Sarah Barrett** at CALM Phone: (08) 9842 4500 - Fax: (08) 9841 3329 or Community Representative **Penny Moir** on (08) 9847 2024.

Your help in conserving our rare flora is really appreciated.
