## CONSERVATION CODES FOR WESTERN AUSTRALIAN FLORA

**T: Threatened Flora** - Specially protected under the Wildlife Conservation Act 1950, listed under Schedules 1, 2 and 3 of the Wildlife Conservation (Rare Flora) Notice (which may also be referred to as Declared Rare Flora). Taxa which have been adequately searched for and are deemed to be, in the wild, either rare, at risk of extinction, or otherwise in need of special protection, and have been gazetted as such. The assessment of the conservation status of these species is based on their national extent.

Ranking:

CR - Schedule 1 - taxa that are extant and considered likely to become extinct or rare, as critically endangered flora, and therefore in need of special protection.

EN - Schedule 2 - taxa that are extant and considered likely to become extinct or rare, as endangered flora, and therefore in need of special protection.

VU - Schedule 3 - taxa that are extant and considered likely to become extinct or rare, as vulnerable flora, and therefore in need of special protection.

**EX: Presumed extinct Flora** - Specially protected under the Wildlife Conservation Act 1950, listed under Schedule 4 of the Wildlife Conservation (Rare Flora) Notice (which may also be referred to as Declared Rare Flora). Taxa which have been adequately searched for and there is no reasonable doubt that the last individual has died, and have been gazetted as such. Threatened flora are ranked according to their level of threat using IUCN Red List categories and criteria. For example *Acacia splendens* is specially protected as Declared Rare Flora under the Wildlife Conservation Act 1950 and is a threatened species with a ranking of Critically Endangered.

EX - Schedule 4 - taxa that are presumed to be extinct in the wild and therefore in need of special protection.

A list of the current rankings can be downloaded from the Parks and Wildlife Threatened Species and Communities webpage at <http://dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/>.

Taxa that may be threatened or near threatened, but are data deficient or have not yet been adequately surveyed to be listed under the Wildlife Conservation (Rare Flora) Notice, are added to the Priority Flora List under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status, so that consideration can be given to their declaration as threatened flora. Taxa that are adequately known and are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened list for other than taxonomic reasons, are placed in Priority 4. These taxa require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

### 1: Priority One: Poorly-known species

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations, but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.

### 2: Priority Two: Poorly-known species

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations, but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.

### 3: Priority Three: Poorly-known species

Species that are known from several locations, and the species do not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations, but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.

### 4: Priority Four: Rare, Near Threatened and other species in need of monitoring

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for Vulnerable.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

The conservation codes for Western Australian flora and fauna can be downloaded from the Department's website at:

<http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing>.

\*Species includes all taxa (plural of taxon - a classificatory group of any taxonomic rank, e.g. a family, genus, species or any infraspecific category i.e. subspecies, variety or forma).

## KEY TO CODES USED IN LIST

<b>STATUS</b>	Conservation status of taxon - refer to definitions.	
T	Threatened Flora (Declared Rare Flora - Extant)	
X	Presumed Extinct (Declared Rare Flora - Extinct)	
1	Priority One - Poorly known Species	
2	Priority Two - Poorly known Species	
3	Priority Three - Poorly known Species	
4	Priority Four - Rare, Near Threatened and other species in need of monitoring	
<b>RANK</b>	The threat category the taxon is recognised as in Western Australia (see definitions)	
CR	Critically Endangered	
EN	Endangered	
VU	Vulnerable	
EX	Extinct	
<b>CRITERIA</b>	The criteria that the taxon meets to be listed under the category of threat. Categories and criteria follow IUCN guidelines. <a href="http://www.surrey.ac.uk/technical/documents/categories-and-criteria">http://www.surrey.ac.uk/technical/documents/categories-and-criteria</a>	
<b>EPBC</b>	The category that the taxon is listed under the Commonwealth's Environmental Protection and Biodiversity Conservation Act 1999. Note this list is maintained by the Commonwealth and the official list should be sourced at the Commonwealth's website <a href="http://www.environment.gov.au/cgi-bin/secret/public/threatenedlist.pl?wanted=flora">http://www.environment.gov.au/cgi-bin/secret/public/threatenedlist.pl?wanted=flora</a>

<b>RECOVERY PLAN</b>	Whether the taxon has a Recovery Plan (RP), Interim Recovery Plan (IRP) or Multiple Species Plan (MSP).	
<b>CHANGE CODE</b>	Type of change that has occurred:	
ADDITION	Added to list - new entry to State (WCA or Priority) or Commonwealth list (EPBC), if already on one state list and needs to be changed to another see either upgrade or downgrade.	
UPGRADED	Species that is on the Priority list has been upgraded to Threatened or Presumed Extinct under the Wildlife Conservation Act.	
CAT_CHG	The category under which a species is listed (e.g. EPBC Act VU to EN or Priority 1 to P3) has been changed.	
DOWNGRAD	A Species has been downgraded from Threatened or Presumed Extinct under the Wildlife Conservation Act to the Priority list.	
NAME_CHG	Species has undergone a name change.	
OTHER	Records a change to other details not related to Conservation status (e.g. Location and Recovery Plan details).	
DELISTED	Species removed from the particular list it was on. Note that a taxon may be delisted from the 'Priority' list and added to the 'WCA' list or vice versa. Delistings should be reviewed in the context of other additions, upgrades or downgrades.	
RELISTED	Species has been added to the list which it was once previously listed on.

## RECOMMENDING CHANGES TO THE LIST

### Threatened Flora

Threatened flora listings are reviewed annually and changes are recommended by the Threatened Species Scientific Committee (TSSC). Nomination forms to add species to, or delete species from the current Threatened (Declared Rare Flora) lists or recommend a change in category can be downloaded from the Department's Website on the 'Call for public nominations for listing (and delisting) of threatened plants and animals' page <http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing/118-call-for-public-nominations-for-listing-and-delisting-of-threatened-plants-and-animals> . Further information on the listing process and nomination guidelines can also be downloaded from this page.

TSSC meetings are usually held near the end of the first quarter of the calendar year. The closing date for nominations for TSSC meetings is the last Friday of January that year.

Species will remain listed under their current status until the recommendations are approved by the Minister for Environment and are listed in the next Wildlife Conservation (Rare Flora) Notice which is published in the government gazette.

### Priority Flora

You do not have to fill out a nomination form to nominate a species for the DPAW Priority list as it is not considered by the TSSC.

To nominate a species for priority listing, contact the Department's Senior Botanist, Species and Communities Branch with your recommendation or email [flora.data@dpaw.wa.gov.au](mailto:flora.data@dpaw.wa.gov.au) . Your email should contain the information required to demonstrate how the species meets the Priority category you recommend. Nominations for Priority species may be sent at any time of year, and changes may be made to the Priority Flora list at any time of year.

Changes to Priority Flora are done frequently as new information is received and reviewed. A combined Threatened and Priority Flora List is "published" after changes to the Threatened Flora list are made as a way of disseminating information and providing a reference point for such a dynamic list. As changes to the Threatened Flora list only occur once or twice a year, the published version of the Priority List soon becomes out of date due to the changes since publication and is hence not available on the web. However, due to the need to have this information readily accessible to the public, the WA Herbarium updates the conservation status of species on its FloraBase website to be aligned with Species and Communities Branch's official Priority list and hence can be referred to for the currency of conservation codes. <http://florabase.dpaw.wa.gov.au/>

For further information on listing of Threatened or Priority Flora please contact Species and Communities Branch on 9219 9511.
