*"WE'VE GOT  
IT LICKED!"*

# Tracesure Cu/I boosts health of pedigree Limousin herd

A herd of pedigree Limousins bolused with Tracesure Cu/I to counter a trace element deficiency are producing vigorous calves.

The Jerman family run a herd of 100 pedigree Limousins and commercial Belgian Blue/Limousins in mid Wales.

They breed bulls for the pedigree market and any heifers that are surplus to the farm's breeding replacement needs are sold.

The cattle were first bolused with Tracesure Cu/I three years ago when it was discovered they were deficient in copper. Not only has the slow-release bolus supplemented against that deficiency but the cows' offspring have benefitted too.

"We have found that the calves are much more thrifty when they are born. They are up and sucking," reports Fiona Jerman, who farms in partnership with her husband, Chris, and son, Matthew, at Glangwden, Trefeglwys, near Caersws.

"We are convinced the bolus has helped with scour problems. In the past we would get the odd case but we don't really want to have scours on the farm at all and this spring we had virtually nothing."

The benefits of Tracesure Cu/I are

apparent in the cattle's coats. "Their coats look much better, they are looking much more thrifty," Fiona adds.

The Jermans exhibited two animals at this year's Royal Welsh Show. Not only was their bull the reserve champion in the Elite Junior Bull championship but their heifer was named the best bred female in Wales in the Limousin section.

The cattle are bolused twice a year – at turnout in the spring and at housing in the autumn. Tracesure Cu/I slowly releases iodine, copper, selenium and cobalt over a six-month period.

Tracesure Cu/I will continue to be part of the system at Glangwden. "We are very pleased with the bolus and we will be continuing to use them in the future," says Fiona.

Top stockmen make sure with **Tracesure**

# Foreword

*H David Leggat, Executive Chairman, United Auctions*

Stirling Bull Sales, February 2013, has the largest number of herd sires that we have offered for many years, giving unrivalled choice for prospective purchasers.

Our thanks go to the Bank of Scotland, who again is our main sponsor. We look forward to welcoming Sandy Hay and his team from the bank who will be present throughout the sales and will be happy to discuss any banking queries you may have.

The format of the February sales has been changed with native breeds plus Limousins being sold in the first week and all other continentals sold in the second week. The complete programme of events is detailed in this catalogue.

All the sales will be conducted under the auspices of their respective breed societies. Over the years, much work has been done to improve the health status of the cattle we offer. Herd health information is contained in the index in the catalogue and on cards above the bulls in the pens. Health scheme providers are present at the sales and will be available to answer any questions you may have.

We are pleased to announce that the last remaining unit at Stirling Agricultural Centre is now occupied by BCS Hendricks Ltd, Insurance Brokers, who are long established insurance brokers with particular experience in the rural field. The BCS Hendricks team will be present at Stirling Bull Sales to discuss your insurance requirements.

In a welcome return, it is good to see our Hereford section being given official status with an entry of 10 bulls.

A new entrant to the sales is the Wagyu breed in the form of a consignment of embryos from local breeder Scottish Wagyu Ltd, Blackford.

United Auctions look forward to welcoming you to Stirling Agriculture Centre.

## Foreword

*Sandy Hay, Head of Agriculture for the Bank of Scotland*

The Stirling Bull Sales are an important event in the Scottish farming calendar and one which the Bank of Scotland is pleased to support again this year. Our long association with United Auctions and the world famous Bull Sales underlines our ongoing commitment to the agricultural industry and especially of the livestock sector in Scotland.

The global economic recovery has taken more of a "backseat" in terms of farming headlines this year, with the prolonged wet weather, which has affected virtually all parts of the country taking the front page. The weather impact has been felt across all sectors, whether through increased feed, forage and bedding costs, or simply the fact that large swathes of land have been sodden and less productive for much of the year.

However, let's not lose sight of the positives in the last 12 months. Cattle prices, both store and finished, have continued a steady increase to their now record levels. A contributing factor will have been the limited supply, both at home and abroad, underpinned by a decline in the national breeding herd. While these higher prices will be welcome, the reality is that the higher costs will have kept margins tight. As a bank, with a dedicated and experienced agricultural team we have recognised that some farmers will need additional support through the coming spring and possibly well into the next harvest period. It is important to plan ahead, work out your financial requirements and speak to your bank manager at an early stage so we can work together to ensure the best outcome for your business.

Our Agriculture team are able to offer discounts on already historically low interest rates, because of our involvement in the Government's Funding for Lending Scheme and the National Loan Guarantee Scheme. So whether you are an existing client or a prospective client, we would be delighted to discuss the opportunities and benefits that these rates could provide to your business. It may be for a planned investment, land acquisition, financing new machinery, expanding your livestock numbers or a full review of your current banking facilities - our team of specialist agricultural managers will be available to assist you to choose the best options to finance your business.

On behalf of the Bank of Scotland, the major sponsors of the Stirling Bull sales for 2013, we look forward to meeting you at this year's event.

# RETTIE'S PEDIGREE SERVICES

## LIVERY, SALES, SHOWS & ADVISORY SERVICE

# **BLCS PREMIER COLLECTIVE SALES**

## **FOREWORD**

### **NEW LIMOUSIN HERD HEALTH RULES**

This British Limousin Cattle Society Sale is being held under the progressive new herd health rules which were introduced by the BLCS at nominated premier Collective Society Sales from May 2011. All vendors are to be members of, and in adherence to, the terms of a CHeCS licenced Herd Health Scheme.

Commenting, BLCS Chairman Peter Kirton says: "Going down this very positive health route is another major long-term step forward for the Limousin breed. Purchasers, both pedigree and commercial, want to buy breeding stock with a known health status. It is very much an expectation that this new policy will build on that principle and will be widely welcomed."

The Society's new health policy at sales has two principal elements:

Part 1. From 1st May 2011, herds selling at the premier Collective Society Sales have to be members of, and adhering to, the terms of a CHeCS approved Herd Health Scheme. At a minimum, this must include a whole herd test for Johne's disease.

Part 2. From 1st May 2011, all animals male and female, including calves at foot, presented at the premier Collective Society Sales be EITHER from a BVD Accredited Herd within a CHeCS approved Herd Health Scheme OR to have been BVD tested virus free. All animals forward will be required to be BVD vaccinated prior to sale with an approved vaccine. Pregnant animals must have had testing and vaccination completed prior to service. Vaccination of calves at foot to be in accordance with CHeCS guidelines and recommendations.

The new Herd Health at Sales policy is now in place at all premier BLCS Collective Sales (Stirling February & October; Carlisle February, May, October & December; Brecon May & November).

# LIMOUSIN BULLS

The Vendors' Index includes a condensed version of the Herd Health information submitted at point of entry by the vendor. For further information, please see Explanatory Notes & copy of the Herd Health Declaration form also included in the catalogue.

# **IMPORTANT NOTICE FOR PURCHASERS & VENDORS**

## **WARRANTIES**

Unless otherwise stated, all bulls and females are sold under Auctioneers General Sale Conditions. With reference to breeding warranties, the sale is held under the sale conditions of the NBA with the exception of the following:-

Charolais – British Charolais Cattle Society Conditions

Aberdeen-Angus – Aberdeen-Angus Cattle Society Conditions

Buyers purchasing bulls may request through the Auctioneers that the warranty is deferred in accordance with the relevant conditions. As the granting of a deferment is the prerogative of the vendor, buyers are advised to establish before the sale a vendor's willingness to defer a warranty.

## **INSURANCE**

Purchasers are reminded that the 'risk' on purchased lots falls on them at the 'fall of the hammer'. Vendors' 'luck penny' insurance is sometimes offered to purchaser. Purchasers should establish exactly what is covered by this, ie what type of cover and for how long. Vendors are respectfully requested only to refer to insurance at the rostrum if it is mortality insurance; reference to fertility insurance is of no interest to buyers and can cause confusion.

## **CATTLE HEALTH CERTIFICATES**

United Auctions strive to increase awareness of herd health in both the commercial and the pedigree sector. Health certificates have been produced which are used by many vendors at our sales. Purchasers should satisfy themselves as to the health/vaccination status of lots in which they are interested in advance of them being auctioned. This information is displayed above the animal or in the Vendor's Index at the front of this catalogue

## **PRIVATE SALES**

Vendors and purchasers are reminded that any private sale in our premises must be booked through our office otherwise warranties will not be applicable.

## **TELEPHONE BIDS**

Facilities for bidding by telephone are available only by prior arrangement with the Auctioneers.

## **TB**

Cattle consigned from one and two year testing parishes are subject to a retest within 60 and 120 days of purchase, the expense of such tests to be borne by the purchaser.

## **EXPORT SALES**

At present animals cannot be exported direct from the Stirling Sales. Vendors offering lots subject to retest must notify our office in writing of any conditions they have offered to potential overseas buyers.

# OFFICIAL SALE RULES

All animals entered for sale under the auspices of any breed society shall be sold subject to and in accordance with the following rules.

1. The consignor must be a member of the relevant Breed Society. All animals must be clearly tattooed and/or tagged and registered in the Herd Book of the relevant Society by the Breeder, or in the case of imported animals, have been registered in the Herd Book of the country of origin and entered in the Herd Book of the relevant Society.
2. Should any dispute arise as to the identification in the Herd Book of the relevant Society of any animal exposed for sale as to the pedigree of any such animal, such dispute should be referred to the Council of the relevant Society or such Sub-Committee as the Council may appoint as Arbiters and their decision shall be final.
3. The Council of the relevant Society may, prior to any Sale, nominate and appoint a Panel of its members to inspect any animal forward at the Sale, in order to ascertain that such animals are fit for inclusion in the Sale. The members so appointed shall, in consultation with the Auctioneers, be the sole judges as to whether or not such animals be may included in the Sale and shall have power to debar from the Sale any animal which they consider is not of a fit standard. No consignor will have any claim for damages in respect of any animal which is rejected under this rule.

## CONDITIONS OF SALE

### A. SALE

1. All animals exposed for sale are the bona fide property of the vendors at the time of the sale, and are free of all liens, charges and encumbrants.
2. The highest bidder shall be declared the Purchaser (subject to Rule C(3)). The Auctioneers reserve the right to refuse any bid without giving a reason for so doing. All bids shall be in guineas and cattle will be sold in guineas (one guinea being equal to £ 1.05).
3. The Vendor has the right to fix a reserve price and to announce such price before, during or at the conclusion of the bidding. The right to bid by or on behalf of the Vendor in terms of the current Sale of Goods Act is expressly reserved. The Vendor, or his duly authorised representative, must be with the Auctioneer at the Sale of the catalogued animal to accept or reject the final bid.
4. Each animal forward at the sale must be exposed for sale by auction before any private sale shall be permitted or recognised by the Auctioneers.
5. Immediately after the sale of an animal, the price thereof shall be paid by the Purchaser in cash to the Auctioneers. On the price being paid the Purchaser shall receive from the Auctioneers a written removal order and shall at his own expense remove the animal within one day of the sale or within such other period (if any) as may be laid down by the Auctioneers at the commencement of the Sale. No animal shall be removed without the Auctioneers' written removal order and any animal so removed shall be recovered by the Auctioneers summarily without any further warrant.

6. TERMS OF SALE – CASH INTEREST CHARGEABLE FROM DATE OF PURCHASE AT 8% OVER BANK OF SCOTLAND BASE RATE. Purchases shall be governed by and constructed in accordance with the law of Scotland and the non-exclusive jurisdiction of Glasgow Sheriff Court is prorogated to this contract
7. In the event of any purchaser not paying for and not removing the animal purchased in compliance with Rule A (5) hereof the Auctioneers in their sole discretion may, without the consent of the vendor either (a) sue the Purchaser either in their own name or in the name of the vendor for the price and interest thereon at the rate of two per cent per annum above the current Bank of Scotland Base Rate and for the keep of and other expense incurred by them in connection with such animal or (b), resell the animal either publicly or privately and on behalf of the vendor recover from the defaulting Purchaser the deficiency (if any) attending such resale and interest thereon as aforesaid together with the keep and all other expenses. The defaulting Purchaser shall have no right to object to the Action taken by the Auctioneers. In the event of there being any surplus after paying interest, keep and other expenses as aforesaid, such surplus shall be paid to the defaulting Purchaser
8. All animals are the risk of the Vendor before sale. Immediately after the purchase of each animal is declared, the risk of the animal shall pass to the Purchaser, but until the price is paid, the right of property shall not pass and delivery of the animal may be suspended.
9. In the case of animals sold privately within the premises of the Auctioneers the risk and the passing of property thereof shall be governed by the bargain made between the parties and Rule A (7) shall not apply thereto. Animals withdrawn from the Auction may be sold by private treaty on the Auction premises. Private sales will be held to the Vendors' guarantees of fertility and must be put through the Official Auction record by the Appointed Auctioneers.
10. No undertaking by the Auctioneers or their servants to take charge of any animal after the sale or to forward it to its destination shall be held to impose on the Auctioneers any legal obligations or invalidate any of these Rules.
11. No Liability whatsoever is undertaken by the Auctioneers for the accuracy or otherwise of the statements appearing in this Catalogue or made at the sale. The Vendor is responsible for such statements and for any error, omission or mis-statement.
12. (a) If a bull from which semen has been stored is offered for sale, it must be stated in the catalogue (and if different circumstances have arisen since the catalogue was printed, the correct and up-to-date circumstances must be announced from the auctioneer's rostrum at time of sale) whether the semen so stored is to pass with the ownership of the bull or whether it is to be retained by the vendor. If it is retained by the vendor, then he must declare if he is reserving the right to sell or gift such semen for pedigree and/or commercial use. If such declaration fails to be made it will be assumed that any semen retained is for the vendor's own use only and cannot be sold or gifted for pedigree or commercial use.  
  
(b) If a female in calf to a royalty bull is offered for sale, it must be stated in the catalogue (and if different circumstances have arisen since the catalogue was printed, the correct and up-to-date circumstances must be announced from the auctioneer's rostrum at time of sale) whether the payment of the royalty for the subsequent registration of the unborn calf will be the responsibility of the vendor or the vendee. If such declaration fails to be made it will be assumed that payment of the royalty will be the responsibility of the vendor.

13. If a female offered for sale has been used as an embryo donor the fact that she has been flushed must be stated in the catalogue along with the number of embryos collected complete with their sire/sires up until the time of the donor being offered for sale.
14. In the event of a female carrying a transferred embryo being offered for sale, the number of embryos collected at the same time as that carried by the female entered for sale must be stated in the catalogue.
15. Animals infected by contagious diseases i.e., warts, ringworm etc, will not be accepted for sale unless accompanied by a vet's certificate indicating that treatment has been given and the condition is no longer contagious.
16. Apart from the Bull and Female breeding warranties printed in the catalogue or others specifically given by the Vendor in this catalogue or made at the sale, animals are sold subject to their condition and to all faults, excepting the case of animals suffering from total or partial blindness.
17. Should any animal be sold subject to passing tests or retests full details of these must be declared by the Vendor to the Auctioneers prior to the sale. The bargain shall not be deemed to be concluded until the results of such tests/retests are notified to the Auctioneers.
18. No Rosettes or Sashes won at other Shows or Tests to be affixed to Show animals.
19. The Auctioneers reserve the absolute right to take blood samples from any animal presented at Shows and Sales and to have the sample independently analysed at a certified Laboratory. A sample will also be given to the Vendor for his own use.
20. All Bulls must have a nose ring and all entries must be either double-haltered in their stalls or pens, or secured with a strong halter and a neck band.

#### **B. COMMISSION**

1. The Auctioneers shall charge and deduct a commission of 5p per £1.05 from the price of all animals sold, including those which may be sold privately in their premises at the time of sale. Any Society Levy ruling will also be deducted.
2. The Auctioneers shall be entitled to charge against the owner two and a half per cent on the price bid or £25 per animal whichever is the greater on all animals put through the sale ring and withdrawn.
3. The Auctioneers shall not be entitled to charge commission on animals sold which fail a re-test (see Rule A (17)) but shall be entitled to make a charge against the owner of £100 per animal.
4. In the foregoing Rules, the word "animal" shall be held to include a dam and a calf when sold together.

#### **C. GENERAL**

1. Without prejudice to the foregoing Rules, it is hereby expressly declared that the Vendor by selling and the Purchaser by purchasing any animal shall be bound by the above Rules notwithstanding the terms of any statutory enactment or custom of trade to the contrary.
2. The Auctioneer is the Judge of the Sale, to whom all disputes and differences of any kind which may arise at and in relation to the Auction either between Vendors and bidders or among bidders themselves shall be referred and his decision shall be final and binding on all parties.

3. Any dispute as to any matter for the settlement of which no provision is made within these rules, shall be referred to an Arbiter or Arbiters to be appointed, failing agreement between or amongst the parties by the Auctioneers. The decision of the Arbiters so appointed shall be final and binding on all parties to the dispute. Any Arbitration under this clause shall be subject to the provision of the Arbitration Act for the time being in force in Scotland and shall be deemed to be a reference to Arbitration thereunder.
4. Members of any Society who enter cattle for sale in the catalogue and who do not present their animals will be subject to the following fines – Male entries £100.00, Female entries £100.00. A Veterinary Surgeon’s Certificate or reasonable grounds for withdrawal will, if accepted, eliminate the member from such a fine.
5. After Society inspections, all animals are identified by lot numbers. These numbers must remain on lots while they are on the market premises.

### **IMPORTANT NOTICE TO PROSPECTIVE PURCHASERS**

The animals in this catalogue are offered for sale subject to the National Beef Association’s standard

#### **Terms and Conditions of Sale.**

These Terms and Conditions of Sale contain limitations to your rights, and prospective purchasers should appraise themselves of the contents before the Sale commences. They have been drafted to form a fair and reasonable basis for the contract between the vendor and the purchaser to give you, as prospective purchasers, confidence in the animals offered for sale. They are available in a booklet which is obtainable upon request from the Auctioneers, and all purchasers will be offered a copy when they settle their accounts. Revised bull warranty charge: £6 split evenly between vendor and purchaser; revised female warranty charge: £4 split evenly between vendor and purchaser – these charges covering the cost of warranty arrangements and providing funds for other NBA activities.

Please note that asterisks appear in the following Clauses:-

4.1

4.2

5.1

5.1.1 (“twenty-eight months” and “twenty-four months”)

5.2

5.2.1 (“twenty-eight months” and “twenty-four months”)

5.3

5.4

5.5.3

5.6.3

5.7.3

8.1.2.1 (b)

8.1.2.2 (b)

The asterisks appear against ages and gestation periods, which vary from breed to breed.

### **FEMALE GUARANTEES**

We would draw your attention to the NBA breeding warranties which state that cows 10 years of age and over on the date of sale are excluded from the female breeding warranty.

# **NATIONAL BEEF ASSOCIATION**

**Serving the UK Beef Industry**

- The NBA promotes the research and development of breeding techniques for pedigree cattle and commercial beef farmers across the UK.
- The NBA represents the interests of the UK's pedigree breeders and commercial beef producers in meetings with a range of organisations across the UK and in Europe.
- The NBA fights for the re-instatement of pedigree cattle and a wider range of beef on EU and international markets and for a more positive attitude from the authorities towards the development of more semen sales – especially in South America, The Far East and Australia.
- The NBA wants more UK consumers to eat more UK beef – and more UK farmers to produce more UK cattle.
- The NBA is the only specialist organisation that is devoted exclusively to furthering the interests of the beef farmer and the beef industry.

This sale is held under NBA Auction Rules and Conditions of sale, incorporating NBA Bull and Female Breeding Warranties, to provide buyers with a high quality, fully guaranteed product. Revised bull warranty charge: £6 split evenly between vendor and purchaser; revised female warranty charge £4 split evenly between vendor and purchaser – these charges covering the cost of warranty arrangements and providing funds for other NBA activities.

# INDIVIDUAL HEALTH DECLARATIONS – SUPPORTING THE PURCHASE OF HEALTHY STOCK

All cattle with individual health declarations should have an A3 copy, signed by the testing laboratory, for display in the sale pen, and an A4 copy containing more detailed information to be passed on to the purchaser.

1. **Herd** accreditation is shown in column (1), indicated by a white coloured box adjacent to the appropriate disease. The number of years the herd has been accredited (months if less than one year), the date of the last clear herd TB test and the TB testing interval is given. If the herd has passed qualifying tests towards Johne's accreditation but is not yet accredited, the number of clear annual tests is shown beside the Johne's qualifying box.
2. Results for **individual** testing are shown in column (2) and are colour-coded as follows:

<b>Antibody negative</b>
<b>BVD antibody positive</b>
<b>IBR or Leptospira hardjo antibody positive</b>

Note that bulls with positive BVD antibody titres (green box) and no known history must not be used for 10 weeks after testing as they can carry the virus for this time after infection. Pregnant females that test positive for antibodies to BVD will not be given pen cards unless the animal was known to be antibody positive or fully vaccinated prior to service.

3. The date of **vaccination** is given in column (3). Where marker vaccination has been given for IBR, this is indicated. Further details on vaccination are given on the accompanying A4 sheet.

--	---

This information is intended as a guide to the cattle health declaration. **It is important to remember that there are no absolute guarantees of freedom from disease.**

All newly purchased stock should be routinely isolated and tested if required before introducing them to existing stock. If in doubt ask for advice on biosecurity from your own or health scheme vets.

Cattle health declarations and guidance have been developed by an all industry stakeholder group facilitated by the NFUS.

All testing has been carried out by a CHeCS registered laboratory to ensure the highest level of assurance.

# A User's Guide to Estimated Breeding Values

10. Further Information

## 1. Estimated Breeding Values

Many factors influence the appearance and performance of a bull, so selecting 'by eye' alone can be misleading. The only accurate way of assessing the genetic potential of an animal (i.e. what it can pass on to its calves) is by using Estimated Breeding Values (EBV's) and Indexes. These are produced by Signet using a system known as BLUP (Best Linear Unbiased Predictor) and are calculated from animals' individual performance records as well as those of all their known relatives, where the effects of the environment (feeding, management, disease, climate etc) are sifted out to leave an estimate of the genetic value for each trait, as follows...

EBV	What Does the EBV Indicate?	Look for...
<b>Birth Weight (kg)</b>	Genetic potential for calf weight at birth	<b>High negative EBVs</b> if you want low calf birth weights
<b>Calving Ease (%)</b>	Ease with which a bull's progeny will be born	<b>High positive EBVs</b> if you want less assisted calvings
<b>Maternal Calving Ease (%)</b>	Ease with which a bull's daughters will calve	<b>High positive EBVs</b> if you want less assisted calvings
<b>Gestation Length (days)</b>	Genetic potential for gestation length	<b>High negative EBVs</b> if you want short gestation lengths
<b>200 Day Milk (kg)</b>	The maternal component of 200 day growth (i.e. the contribution that the milking and maternal abilities of a bull's daughters make towards their calves' growth at 200 days of age)	<b>High positive EBVs</b> if you want daughters to wean heavier calves
<b>200 Day Weight (kg)</b>	Genetic potential for growth from birth to 200 days of age	<b>High positive EBVs</b> if you want high growth rates to weaning
<b>400 Day Weight (kg)</b>	Genetic potential for growth from birth to 400 days of age	<b>High positive EBVs</b> if you want high growth rates to finishing
<b>Muscle Depth (mm)</b>	Genetic potential for muscularity and potential to increase lean meat yield	<b>High positive EBVs</b> if you want good calf conformation
<b>Fat Depth (mm)</b>	Genetic potential for leaner carcasses	<b>High negative EBVs</b> if you want to produce leaner carcasses or take calves to heavier weights without penalty for fatness
<b>Age at 1<sup>st</sup> Calving (%)</b>	Genetic potential for early sexual maturity	<b>High negative EBVs</b> for a greater proportion of heifers that hold to 1 <sup>st</sup> service

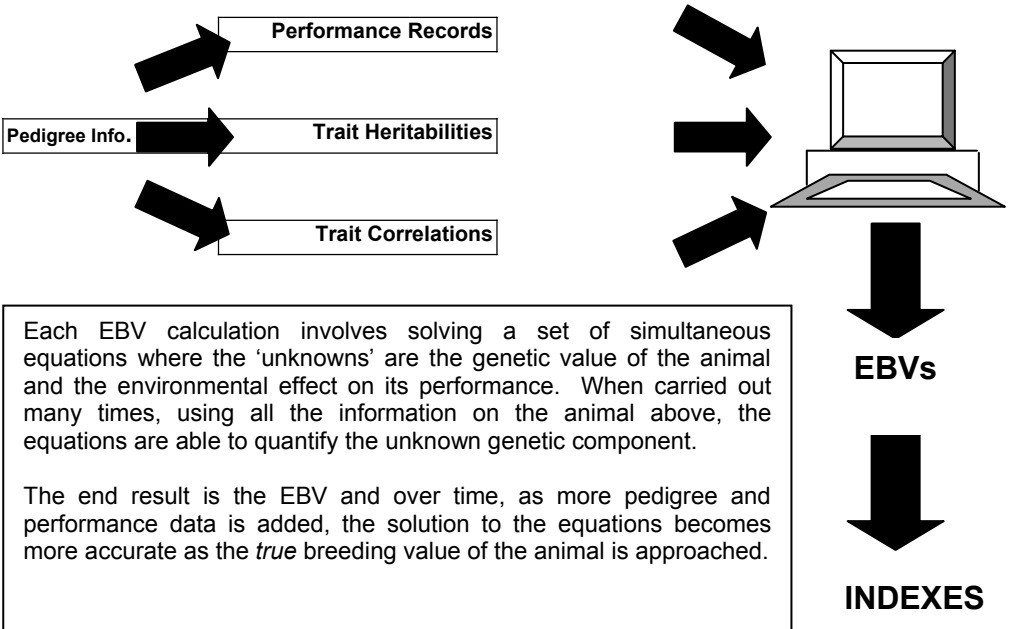

<b>Longevity (years)</b>	Genetic potential for long life in the breeding herd	<b>High positive values</b> for animals likely to remain in the herd for longer
<b>Calving Interval (days)</b>	Genetic potential for the time taken to get back in calf	<b>High negative values</b> to breed cows that get back in calf quickly
<b>Docility (%)</b>	Genetic potential for being calm when handled	<b>High positive values</b> for animals that are likely to be more calm when handled
<b>Scrotal Circumference (cm)</b>	Genetic potential for scrotal size. Linked to male serving capacity and puberty of daughters.	<b>High positive values</b> for animals with higher likely serving capacity and earlier maturing daughters.

## 2. HOW ARE EBVs CALCULATED?

EBVs are calculated using information from several sources:

- Measurements from the animal itself
- Measurements from the animal's herd mates (known as 'contemporaries' \*)
- Measurements from the animal's relatives and their contemporaries
- The degree to which one trait influences another (known as a 'correlation' \*)
- The degree to which each trait is passed on to the next generation (known as 'heritability' \*)

\* Terms explained below

### Heritability and Correlations

#### Heritability

This is a term used to describe the strength with which traits are inherited and it varies depending on the trait in question. Generally:

- Traits associated with reproduction and survival have low heritabilities
- Milk production and early body size have medium heritabilities
- Later growth and carcass traits (i.e. fat and muscle) have relatively high heritabilities

Where traits with relatively good heritability are concerned, when something is known of the performance of one or both parents, then a prediction can be made as to how the offspring will perform and BLUP uses this 'knowledge' to enhance the accuracy of its EBV calculations.

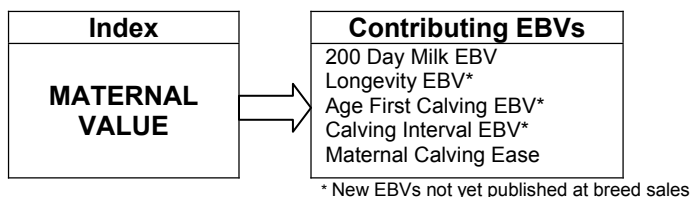

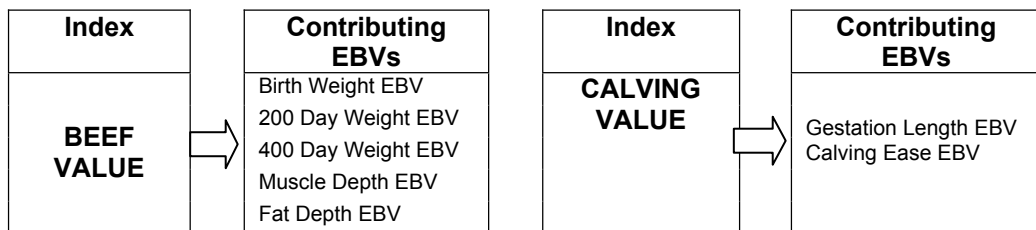

### Correlations

This term describes the direction and strength of the association between two traits. For example, some traits are highly positively correlated, such as 200-Day Growth and 400-Day Growth, whilst others are highly negatively correlated, such as 400-Day Growth and Calving Ease. When something is known of one trait but perhaps not another, a prediction can be made based on what is known about the correlation between them. This again enhances the accuracy of the EBV in question and helps deal with situations where records for a trait are limited or unavailable.

## 3. BREEDING INDEXES

It is often desirable to select animals on the basis of more than one EBV. Indexes focus on specific breeding goals and combine the appropriate EBVs in to a single figure based on their relative economic value. This is widely regarded as the most efficient method of selecting on a number of traits at once.

Signet currently produces three beef Indexes, as follows:

**When using an Index it is important that your breeding objective is broadly similar to that of the Index in question, otherwise you may unwittingly change aspects of your herd that you did not necessarily want to.**

## 4. ACCURACY

An Accuracy Value is published next to every EBV and Index. Accuracy Values are expressed as a % and indicates the quantity and quality of records used to produce the EBV or Index.

Several things affect the accuracy of an EBV or Index, namely:

- The amount of information on the trait from the animal itself
- The amount of information on the trait from relatives of the animal
- The heritability of the trait concerned
- The amount of information from the animal and its relatives on traits correlated with the trait of interest and the strength of the correlations which vary between different traits.
- The number of herd mates from the same management group recorded ('contemporaries').

### Scaling for Low Accuracy

An important feature of BLUP EBVs is that they are scaled to account for the amount of performance information on which they are based. EBVs based on very little information get adjusted towards the average EBV and this adjustment applies to both high and low EBVs.

This prevents animals gaining very high or very low EBVs as a result of a few very good or very poor records and is designed to protect the user from risk. The more information available on an animal and its relatives, the less the EBVs are adjusted.

**Accuracy Values indicate how similar an animals' EBVs are to its true breeding value. They predict the likelihood that an animals EBVs will change over time**

## 5. EBV INDEXES

To aid interpretation at breed sales, all Limousin EBVs are presented in index form based around an average of 100 with an approximate range of 70 to 130. For example:

	Calving Value	200 Day Milk (kg)	200 Day weight (kg)	400 Day weight (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
EBV	LM -4C	-1	+25	+34	+3.40	-0.20	LM +23
Accuracy %	85	54	75	73	68	66	73
Index	77	98	112	106	111	111	108

## 6. MATERNAL EBVS

Many commercial and pedigree producers are breeding their own female replacements and need to identify bulls with superior maternal attributes.

### 200 Day Milk EBV

One of the most important maternal EBVs is the 200 Day Milk EBV – indicating the degree to which 200 day milk is influenced by maternal performance – e.g. milkiness and general mothering ability.

As well as predicting breeding potential for growth to 200 day of age, the 200 day weight can be used to assess an animal's breeding potential for milking ability.

Consider the performance of the grand-offspring of a bull. The weights of all of his grandprogeny are influenced by his growth genes, but only those produced by his daughters are affected by his genes for milk.

If the grandprogeny produced by his daughters are constantly heavier than those produced by his sons, then this is likely to be due to his superior genes for milk production.

#### Interpretation

A bull with an EBV of +4 for 200-Day Milk is expected to produce heifer calves which will have above average maternal characteristics leading to their calves being 2kg heavier at 200-days than calves from heifers sired by a bull with an EBV of 0.

### Maternal Calving Ease

This EBV predicts how easily a bull's daughters will calve. It should not be confused with the Calving Ease EBV which predicts how easily a bull's progeny will be born.

The Maternal Calving Ease EBV is calculated from calving records and is expressed as a % indicating the proportion of unassisted calvings.

#### Interpretation

A bull with a Maternal Calving Ease EBV of 2% will produce females that have 1% more unassisted calvings than a bull with an EBV of 0.

**EBVs are also produced for:** Longevity, Age at First Calving and Calving Interval but these are not yet published at breed sales.

## 7. How to Use EBVs and Indexes

EBVs are expressed in the same unit as the recorded trait (e.g. kg for 400-Day Weight, mm for Muscle Depth etc) and are relative to a Breed Benchmark, which is updated and published annually.

### Limousin Breed Benchmark 2012

Trait	BOTTOM			AVERAGE	TOP		
	1%	10%	25%		25%	10%	1%
Gestation Length (days)	3.8	2.0	1.2	0.6	-0.1	-0.9	-2.5
Calving Ease (%)	-7.9	-5.7	-3.7	-2.2	-1.0	-0.2	1.1
Maternal Calving Ease	-0.9	-0.1	0.3	0.7	1.1	1.7	2.0
Birth Weight (kg)	3.4	2.4	1.8	1.4	0.9	0.4	-0.4
Calving Value	LM-4C	LM-2C	LM-1C	LM0C	LM1C	LM2C	LM5C
200-Day Milk (kg)	-6	-3	-2	-1	1	2	5
200-Day Weight (kg)	-5	5	11	18	25	31	44
400-Day Weight (kg)	-6	11	20	31	43	53	76
Muscle Depth (mm)	-0.9	0.5	1.2	2.0	2.9	3.9	5.7
Fat Depth (mm)	0.4	0.1	0	-0.1	-0.2	-0.3	-0.5
Beef Value	LM5	LM12	LM16	LM21	LM25	LM30	LM40
Maternal Value	LM-22V	LM-10V	LM-3V	LM3V	LM11V	LM18V	LM26V

**When using EBVs it is important to remember that although they can be compared between herds, they can not be compared between breeds.**

Using the Breed Benchmark, compare and contrast the EBVs and Indexes of the two young bulls below.

### Bull A

Analysis Date	Calving Value	200 Day Milk (kg)	200 Growth (kg)	400 Growth (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
24/10/2008	LM1C	4	28	42	4.1	-0.1	LM27
EBV							
Accuracy %	57	42	72	69	69	62	63
Index	100	120	122	117	128	103	120

100 day wt	200 day wt	300 day wt	400 day wt	500 day wt	Scanned
118	253	378	556	710	Yes

**Signet**  
MLC's Signet Breeding Services

### Bull B

Analysis Date	Calving Value	200 Day Milk (kg)	200 Growth (kg)	400 Growth (kg)	Muscle Depth (mm)	Fat Depth (mm)	Beef Value
24/10/2008	LM4C	-5	30	52	2.0	0.3	LM25
EBV							
Accuracy %	59	43	73	68	66	60	64
Index	120	86	124	125	107	76	116

100 day wt	200 day wt	300 day wt	400 day wt	500 day wt	Scanned
126	256	385	568	755	Yes

**Signet**  
MLC's Signet Breeding Services

- Each bull has been fully weight recorded (i.e. they both have a complete set of 100-day adjusted weights), scanned (the box says 'Yes') and possesses satisfactory accuracy figures, given their age.
- Both bulls have EBVs for growth and carcass traits that are above the breed average, but in several ways their characteristics differ:
  - > Bull A has a higher Muscle Depth EBV
  - > Bull B has the highest EBVs for growth rate (weight) EBVs
  - > Bull A has a 200-Day Milk EBV in the Top10% of the breed
  - > Bull B has a Calving Value in the Top 10% of the breed

Bull A would be the most suitable out of the two for a unit where conformation takes high priority. The high 200-Day Milk Weight EBV would also make it suitable for herds where female replacements are retained for breeding.

The high Calving Value of Bull B indicates that it would be more suitable for mating to heifers. It could also be used in herds where a priority is to improve growth.

### Remember

When trying to establish just how much influence a bull will pass on to his progeny it is important to remember to halve the value of the EBV, since the other half of a calf's genes comes from the cow.

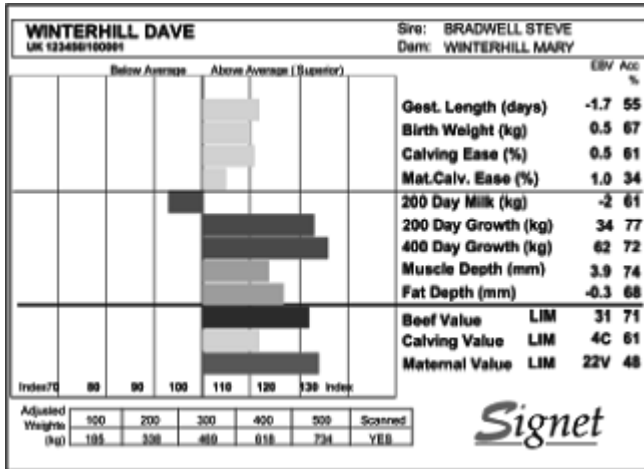

For example, a bull with a 400-Day Growth (weight) EBV of +62 is estimated to have the genetic potential to be 62kg heavier at 400 days of age compared to a bull with an EBV of 0.

Based on their sire's genetics, his calves would be expected to be 31kg heavier at that age when compared to calves by a bull with an EBV of 0, since they only inherit half of their growth genes from their sire (the other half coming from their dam).

## 8. UNDERSTANDING SALE CARDS AND CATALOGUES

### Estimated Breeding Values on Sale Cards

EBVs and Indexes are produced on sale cards as shown below:

Bars that lie to the right of the central line indicate the EBV/Index is above breed average (and the further it is to the right, the higher above breed average it is). Similarly, bars to the left of the central line indicate the EBV/Index is below breed average (and the further to the left it is, the further below average it is).

In sale catalogues, the same figures are produced in table format similar to the examples of Bull A and Bull B above. The EBV Index (bottom line) will quickly indicate where values lie in relation to the breed average. The Breed Benchmark printed in the front pages of the catalogue will allow further refinement of this.

## 9. EBV and PEDIGREE INFORMATION JUST A CLICK AWAY

EBV and pedigree information on all Limousin cattle are just a few internet clicks away...

**Step 1:** Click the 'Basco Online Herd Book' button on the Limousin Society homepage ([www.limousin.co.uk](http://www.limousin.co.uk))

**Step 2:** In the 'All Breeds Quick Search' box type the name or ear number of the animal you are interested in or click on the 'Breeder Search' button to look at all animals belonging to or bred by a particular breeder.

The site will then tell you the animal's owner/breeder details, its EBVs, its pedigree and list its progeny with full links to all of their information.

## 10. FURTHER INFORMATION
