Foreword by the Decimal Classification Editorial Policy Committee

The journey from Edition 22 to the published version of Edition 23 has seen significant developments within the world of Dewey Decimal Classification (DDC): developments within the schedule have been matched by those within the process for change, and by expansion in the technical framework that supports the use of DDC.

Work on Edition 23 began in March 2004 with a planning retreat to discuss the direction and aims of Edition 23; the retreat included members of the Decimal Classification Editorial Policy Committee (EPC), the Dewey editors, invited researchers in knowledge organisation from OCLC and elsewhere, and a representative from the DDC translation community. The areas of development in Edition 23 include those that were highlighted but could not be incorporated in Edition 22 and those that have emerged during the cycle of production for Edition 23.

Edition 23 includes extensive changes and updates in the terminology used throughout the schedules and tables to improve currency and accessibility for classifiers. There is significant development of schedule areas impacted by rapidly changing technology over the life cycle of Edition 23 such as computing, and extensive changes to aid interoperability between the different language translations that have been developed during the process of Edition 23.

Edition 23 has continued the best practice established during work for earlier editions by seeking expert advice from as wide a community as possible both within and beyond the DDC user base to ensure we continue to represent accurately complex knowledge areas and continue to improve the international applicability of the DDC schedules. This new edition is the work of a wide community including the editors, EPC, the European DDC Users' Group (EDUG), and colleagues from translation projects. Each has contributed to the proposed areas for review and discussions about new schedules to ensure accuracy and relevancy for as wide a community as possible.

The revision process aims to improve the currency of the schedules, whilst continuing to be sensitive to the use of DDC as a shelving tool. Any major changes inevitably bring challenges to libraries not least the costs of relocating and re-labelling stock. To help alleviate these problems expansion and revision have been preferred to relocation where possible. Significant changes have only been made after careful thought and debate of the relative merits of each action.

During preparations for Edition 23 the DDC has moved in new directions and is increasingly used beyond the traditional application as a classification at shelf. DDC is now widely used as a tool for organising materials in the Web, as a tool for gathering management information to support collection development, and as a tool for mapping thesauri or natural language subject schemes. DDC is moving into the digital environment with much to offer the arena of online knowledge management. The challenges are many, but the value of DDC in emerging areas of information management has begun to form a significant part of the discussions that shape the development of the classification.

Decimal Classification Editorial Policy Committee (EPC)

EPC was established in 1937 to serve as an advisory body to the DDC. In 1953, it was reconstituted into a joint committee of the Lake Placid Foundation and the American Library Association (ALA). In 1988, when OCLC acquired the DDC, Forest Press requested that the EPC continue its advisory role to the DDC.

The ten-member international board works closely with the DDC editors to suggest changes, facilitate innovations, and monitor the general development of the DDC. EPC acts as a channel for national committees and library communities beyond OCLC and the Library of Congress, gathering information from the user community to provide feedback and commentary to the editors. After the publication of Edition 22, EPC opened its private mailing list to include representatives of national libraries and translation teams; comments and suggestions received from this broader group have contributed to the development of Edition 23. In 2008, EPC members elected a chair from the United Kingdom; this marked the first time the post had been held by someone from outside North America. EPC also had another first during the period of development of Edition 23: a member from South Africa.

Since the publication of Edition 22, the following people (accompanied by the affiliation they had or now have as members) have served on EPC:

Migell Acosta (County of Los Angeles Public Library)

Richard Baumgarten (Johnson County [Kan.] Public Library)

Chew Chiat Naun (University of Minnesota)

Janice M. DeSirey (Hennepin County [Minn.] Library)

Lucy Evans (British Library), vice-chair, 2001-2004

David Farris (Library and Archives Canada)

Jonathan Furner (University of California, Los Angeles)

Andrea Kappler (Evansville Vanderburgh [Ind.] Public Library)

Caroline Kent (British Library), chair, 2008-

Jessica MacPhail (Racine [Wis.] Public Library)

Lyn McKinney (Billings [Mont.] Senior High School)

Anne Robertson (Australian Committee on Cataloguing), vice-chair, 2004–

Deborah Rose-Lefmann (Northwestern University)

Sandra Singh (Vancouver [B.C.] Public Library)

Andrea Stamm (Northwestern University), chair, 2000–2005

Arlene Taylor (University of Pittsburgh)

Welna van Eeden (University of South Africa)

Beacher Wiggins (Library of Congress)

Deane Zeeman (Library and Archives Canada), chair, 2006-2007

EPC would like to say an especially huge thank you to Joan S. Mitchell, editor in chief, and the current assistant editors of the Dewey Decimal Classification: Julianne Beall, Rebecca Green, Giles Martin, and Michael Panzer. We also thank former assistant editors Jonathan Furner and Winton E. Matthews, Jr., who contributed to Edition 23. EPC ac-

Foreword

knowledges with gratitude the energy, patience, diligence and passion that the Dewey editorial team brought to the production of every paper, and every meeting during the cycle for the new edition of DDC.

Caroline Kent
Chair, 2008—
Decimal Classification
Editorial Policy Committee

Acknowledgments

The publication of Edition 23 comes 135 years after the publication of the first edition of the Dewey Decimal Classification. The fact that the DDC continues to flourish as a relevant knowledge organization tool today is in no small part due to contributions of the worldwide community of Dewey users. The Dewey editorial team's ongoing interactions with the Dewey user community have helped to shape the content, representation, and use of the system.

We are extraordinarily grateful to the current and past members of the Decimal Classification Editorial Policy Committee (EPC). EPC members represent and bring the voice of the user to the table. EPC's guidance and critical review are essential in ensuring that the DDC continues to be a useful knowledge organization tool in a wide variety of environments and applications.

We acknowledge the contributions of the American Library Association (ALA), Chartered Institute of Library and Information Professionals (CILIP), and the European DDC Users' Group (EDUG) for their ongoing advice on the content and strategic direction of the DDC. Each of these organizations has committees that meet regularly to review proposals related to the DDC. We acknowledge the suggestions of Dewey Breakfast/Update attendees at ALA, American Association of School Librarians, and the Public Library Association conferences. We are also grateful for the advice of participants in International Dewey Users Meeting (formerly known as the Dewey Translators Meeting), held each year in conjunction with the World Library and Information Congress (IFLA General Conference and Assembly).

We thank national libraries throughout the world, our translation partners, and members of translation advisory teams who reviewed proposals and made suggestions throughout the tables and schedules. We are especially grateful for advice provided in history, geography, language, literature, and politics. We acknowledge the contributions in the aforementioned areas of the staff and/or translation teams associated with the following institutions (contributions to additional areas are noted below):

There were three formal review committees during the development period associated with the publication of Edition 23; all were established by EDUG. The following is a list of EDUG review committees and membership:

EDUG 340 Law Working Group: Yvonne Jahns (Deutsche Nationalbibliothek), chair; Federica Paradisi (Biblioteca nazionale centrale di Firenze).

EDUG 370 Education Working Group: Anne-Céline Lambotte (Université de la Méditerranée), chair; Kate Bunting (Leeds Metropolitan University); Bodil Gustavsson (Stockholms universitetsbibliotek); Caroline Kent (British Library); Karin Kleiber (Österreichische Nationalbibliothek); Patrice Landry (Swiss National Library); Ingebjørg Rype (National Library of Norway).

EDUG 930 Archaeology Working Group: Magdalena Svanberg (National Library of Sweden), chair; Bjørn Bandlien (University of Oslo Library); Patricia Bellec (Bibliothèque nationale de France); Brigitte Bernhard (Deutsche Nationalbibliothek); Ines Castellano-Colmenero (National Museums Scotland); Vera Uhlmann (Swiss National Library).

Many colleagues associated with the DDC at OCLC and the Library of Congress have made significant contributions to the development of Edition 23. First and foremost are the contributions of the current assistant editors of the Dewey Decimal Classification: Julianne Beall (Library of Congress), Rebecca Green (OCLC), Giles Martin (OCLC), and Michael Panzer (OCLC). Their scholarship, dedication, and commitment to our users are reflected throughout the Dewey Decimal Classification. We are also grateful to two former members of the Dewey editorial team for their continuing involvement and counsel. Jonathan Furner (UCLA) served as assistant editor 2005–2006 and was appointed a member of EPC in 2009. Winton E. Matthews, Jr., served as assistant editor 1985–2008 and returned to the Dewey editorial team in 2009 as a part-time consultant.

We are fortunate to have our editorial headquarters at the Library of Congress in the Dewey Section, where editorial work on the DDC is performed under an agreement between OCLC and the Library of Congress. The Dewey Section is currently headed by Eve M. Dickey. The section is part of the U.S. General Division, of which Karl E. Debus-López is chief. The Dewey Section was formerly the Decimal Classification Division, which Dennis M. McGovern headed 2002–2008, followed briefly by Jeffrey Heynen and Randall Barry as acting chiefs before the appointment of Mr. Debus-López. Dewey Section staff and other classifiers at the Library of Congress have continuously supported the editorial efforts by offering an expert view of new topics and areas requiring updating. In addition to assistant editor Julianne Beall and former assistant editor Winton Matthews, the following present and past Library of Congress staff members have also contributed to the development of Edition 23: Darlene Banks, Randall Barry, Mark Behrens, Anita R. Blaine, Michael B. Cantlon, Larry Ceasar, Karl E. Debus-López, Eve M. Dickey, Nate Evans, Ruth Freitag, Herbert Garrett, Donald Hardy, Jeffrey Heynen, Henry Lefkowitz,

Dennis M. McGovern, Nobuko Ohashi, Letitia J. Reigle, Robert Roth, Ida Shelton, Chay Tang, Cosmo Tassone, Carolyn Turner-Dixon, Dorothy A. Watson, and Ruby T. Woodard.

The staff and management of OCLC have provided the support and resources to enable the DDC to grow as a knowledge organization system. Thanks are due in particular to Jay Jordan, President and CEO; Robin Murray, Vice President, Global Product Management; and Karen Calhoun, Vice President, Metadata Applications. We also acknowledge our debt to the previous vice presidents to whom the Dewey editorial and business operations reported during the course of the development of this edition, Phyllis B. Spies and the late Gary Houk. We are immensely grateful to current and past OCLC staff members associated with business operations related to the Dewey Decimal Classification: Robin Cornette, Libbie Crawford, Steve Sattler, Eliza Sproat, Robert Van Volkenburg, and Christy Wallace. We also acknowledge the editorial assistance of Brad Gauder and Phil Schieber in final preparation of the front matter associated with this edition, and Rick Limes for the cover.

We thank Lorcan Dempsey, Vice President of OCLC Research & Chief Strategist, for his ongoing support of knowledge organization research. We especially note the numerous and ongoing contributions of Diane Vizine-Goetz and the Knowledge Organization Group in OCLC Research: Carol Hickey, Andrew Houghton, J.D. Shipengrover, Roger Thompson, and Harry Wagner. We also acknowledge the many contributions of other current and past OCLC Research staff, particularly Eric Childress, Jean Godby, Thom Hickey, Ed O'Neill, Stuart Weibel, and Jeff Young.

In addition to the contributions of editorial, business, and research team members, we are grateful to the following development team members who worked on ESS 4.0, the editorial support system from which Edition 23 was produced: Becky Babyak, Judy Barnes, Tom Baumgartner, Dena Bovee, Jui-wen Chang, Ho-chun Chin, Larry Evans, Amin Haghighi, Lenore Jones, Vicki Kushnir, Keith MacLaury, Barbara Norgard, Haiyan Qian, David Richards, Dave Ripp, Gary Shurgin, Mike Teets, Ed Tripp, Peter Werling (Pansoft), Dan Whitney, Marty Withrow, Jane Woodward, and Johan Zeeman. We are also grateful to Vicki Kushnir, Dan Whitney, and Marty Withrow for the support of ESS 3.0, the predecessor to the current system.

While work proceeded on Edition 23, OCLC introduced WebDewey 2.0, a new end-user web version of the DDC. In addition to the editorial, business, and research teams, the following staff worked on WebDewey 2.0: Helene Babich, Janet Bickle, Linda Bingham, Dena Bovee, Jui-wen Chang, Jim Clover, Erin Crego, Kristin Gain, Louann Gault, Amin Haghighi, Rob Hermance-Moore, Megan Hopkins, Maureen Huss, Jon Krause, Esther Lund, Joanne Murphy, Girija Parvate, Jeff Price, Renee Register, David Richards, Mike Robinson, Steve Smith, Dave Stallard, Megan Stypczynski, Linda Swope, Jeff Wallace, Peter Werling (Pansoft), Jane Woodward, and Johan Zeeman. Prior to the introduction of WebDewey 2.0, the following staff continued to support the delivery of updates to users in the original WebDewey: Greg Beaty, Jim Clover, and Amin Haghighi.

Underpinning the work on development and distribution of the DDC is a new representation based on the MARC 21 formats for Classification and Authority data. We collaborated on updates to the MARC 21 formats with colleagues at Deutsche Nationalbibliothek, the Library of Congress, and OCLC. The proposed changes were later approved by the ALA Machine-Readable Bibliographic Information Committee.

We have also begun to experiment with Dewey linked data and semantic web representations of the DDC; several members of the worldwide Dewey community have ad-

vised us on this endeavor. In addition to OCLC staff members, we are particularly grateful for the advice received from Marcia Lei Zeng (Kent State University), and the following members of the EDUG Technical Issues Working Group: Gordon Dunsire (University of Strathclyde), chair; Ulrike Reiner (Verbundzentrale des Gemeinsamen Bibliothekenverbundes [GBV]); and Lars Svensson (Deutsche Nationalbibliothek).

During the course of development of Edition 23, we lost six influential leaders and treasured colleagues:

David Balatti (Library and Archives Canada, and former EPC chair and member): among his contributions is the directive never to let an option be a substitute for a decision.

Dr. Luigi Crocetti (former president of Associazione italiana biblioteche): the leading Dewey expert in Italy, he oversaw the translation and publication of five editions of the DDC into Italian, starting with the Italian translation of Abridged Edition 11 in 1987.

David Farris (Library and Archives Canada, and EPC member from 2008 until his death in early 2011): the editor of Canadian Subject Headings (CSH), he worked on the prototype CSH–DDC mapping and advocated for the representation of Canadian topics in the DDC.

Magda Heiner-Freiling (Deutsche Nationalbibliothek): the force behind the first German translation of the DDC, the co-founder of EDUG, and the visionary who saw the power in making Dewey numbers "speak."

Gary Houk (OCLC): Electronic Dewey, Dewey for Windows, and WebDewey were launched under his executive leadership.

Peter J. Paulson (OCLC, and former executive director of Forest Press): he was a strong supporter of Dewey translations and a tireless promoter of the worldwide use of Dewey.

In closing, we thank the entire worldwide Dewey community, to whom this edition is dedicated

Joan S. Mitchell Editor in Chief Dewey Decimal Classification OCLC, Inc.

New Features in Edition 23

Overview

Edition 23 is the product of a new approach to development of print editions of the Dewey Decimal Classification. Like its predecessor Edition 22, it was prepared in the context of the web, but Edition 23 is the first to be produced as a by-product of the underlying database instead of as the sole focus of editorial development. Editorial development efforts since the publication of Edition 22 have focused on short-term and long-term updates. The long-term updates have been held for simultaneous introduction in the print and web versions of Edition 23, but most of the short-term updates have been continuously distributed to users. We have used WebDewey as our chief vehicle for delivering updates to our users. We have also featured selected new numbers and changes to the DDC on a monthly basis on our web site (www.oclc.org/dewey). All of these updates have been incorporated into Edition 23, plus additional updates.

In addition to the overall goal of keeping pace with knowledge, changes have been motivated by classifier efficiency and emerging requirements in machine representation and application. Our efforts have been informed by interaction with the worldwide community of Dewey users.

Major Changes in Edition 23

Edition 23 features a complete overhaul of the representation of groups of people, significant revisions to several standard subdivisions, numerous updates throughout the tables and schedules, and some structural changes. During the production cycle for Edition 23, we have migrated to a new editorial support system, adopted a different underlying data format, and introduced a new data distribution model. A brief discussion of the major changes follows.

GROUPS OF PEOPLE

We regularly reconsider the provisions for groups of people in the DDC. In the review concurrent with the development of Edition 23, we focused initially on the phrase "kinds of persons" in the caption at Table 1—08 and elsewhere in the DDC. Users are sometimes confused about the difference between "kinds of persons" in Table 1—08 versus "persons treatment" in Table 1—092; more troubling is the unintended interpretation of "kinds of persons" as a definitive classification of people. We replaced "kinds of persons" with "groups of people" in Table 1—08 and elsewhere in the DDC. At the same time, we deleted "History and description with respect to" entirely from the caption at Table 1—08 and elsewhere in the DDC. We also substituted "Groups of people" for "Social groups" in the caption at 305 and elsewhere in the DDC.

We have long known that "persons treatment" itself is a confusing phrase, and questioned whether to continue using it in Table 1 —092. We changed the caption at Table 1 —092 to "Biography," and made a slight revision to the caption at Table 1 —09 at the same time (now "History, geographic treatment, biography" instead of "Historical, geographic, persons treatment"). There is a significant expansion for collected biography of groups of people by various attributes in Table 1 —092.

We have adopted consistent use of "people" versus "persons" when we are referring to a group of people by a specific attribute, e.g., homeless people. In a few cases, the term "persons" has been retained when it is part of the common name for a group of people, e.g., "stateless persons." Similar changes to terminology have been introduced in the Relative Index. In addition, we have replaced the current "Persons" index array with three new entries: Person (Legal concept), Persons (Individuals), and People. The index term for groups of people in general is "People"; the general index term for individuals is "Persons (Individuals)."

We have made small adjustments throughout Table 1 and 305–306 in the developments for groups of people by specific attributes. These changes are reflected elsewhere in the DDC, especially in 155 Differential and developmental psychology, 331 Labor economics, and 362 Social problems of and services to groups of people. In a related change, we have adjusted the preference order in 302–307 Specific topics in sociology and anthropology to topic first and the group of people second, e.g., friendship in women 302.34082, *not* 305.4 Women.

STANDARD SUBDIVISIONS

In addition to the changes in Table 1 with respect to groups of people and biography described in the previous section, there are other changes to standard subdivisions in Edition 23. Adjustments to specific standard subdivisions are highlighted under Table 1 in the selected list of changes in Edition 23 below. There are also several general improvements to the presentation of standard subdivisions in Edition 23. In records for standard subdivisions that introduce special expansions not found in Table 1, a new note is featured in the record: "Notation X from Table 1 as modified below." For example, the note "Notation 01 from Table 1 as modified below" is included in the record for 370.1 Philosophy and theory, education for specific objectives, educational psychology; there are several expansions under 370.1 that are not part of —01 Philosophy and theory in Table 1. In places where a standard subdivision concept has been displaced to a special provision, we have ensured that an add note appears under the special provision if addition in parallel to the standard Table 1 provision is desired. We have also looked carefully at provisions for standard subdivisions in add tables throughout the tables and schedules, and applied the same rules. In Table 1, we realized that the special provisions in the add tables under --08, --0901-0905, and —093-093 were incorrectly labeled as "standard subdivisions" in Edition 22. Subsequently, we have introduced a note under each noting that the provisions are "special notation," and have added the necessary preference instructions to each of the add tables in Table 1, plus the necessary notes to each entry.

In Table 3B, the notation labeled "Standard subdivisions" in the add table under —1–8 Specific forms lacked the usual initial 0 and thus did not look like regular standard subdivisions. We moved the contents of the add table from —1–8 to —1 Poetry as explicit subdivisions of the latter number, and revised the instructions under the rest of the forms in —1–8 to add using the notation following —100 in —1001–1009.

Major Updates: Tables

In addition to the aforementioned changes to groups of people and standard subdivisions, we have introduced several major updates in Edition 23 in Tables 2–6. In the heading for Table 2, "Persons" has been replaced by "Biography." There are significant expan-

sions within the table for geographic areas in the ancient world, Italy, Switzerland, Sweden, Finland, Turkey, Indonesia, Vietnam, and Canada. In Table 3C, there is a significant expansion of —3 Arts and literature dealing with specific themes and subjects that draws the notation in closer alignment with parallel subjects in 001–999. In Table 4, there is a special expansion under —014 Communication; semantics, pragmatics, languages for special purposes. Tables 5 and 6 feature expansions for peoples and languages, respectively.

MAJOR UPDATES: SCHEDULES

We have updated 004–006 Computer science (and parallel provisions in 025.04 Information storage and retrieval systems and 621.39 Computer engineering) to reflect current technical trends. In 155 Differential and developmental psychology, we have provided for topics of environmental and applied psychology to be applied to groups of people. There is a revised and expanded development for logic in 160 Philosophical logic and 511.3 Mathematical logic (Symbolic logic).

In 200 Religion, we have initiated updates of provisions for the Orthodox Church and Islam; further work is planned on both of these areas after the publication of Edition 23.

In addition to the changes to groups of people, there are several major changes throughout 300 Social sciences. In 320 Political science (Politics and government), we have introduced revisions and expansions for ideologies and political parties. In 340 Law, we have updated and expanded provisions for the European Union and criminal courts. There is also a parallel expansion for criminal law to match the expansion for criminal offenses in 364 Criminology. The headings and developments at 366 Secret associations and societies and 369 Associations have been revised, and comprehensive works on associations have been relocated from 366 to 369. Several significant updates have been introduced in 370 Education to generalize provisions from an international viewpoint with respect to levels of education, kinds of schools, specific subjects in primary education, and policy issues in education. We have updated provisions for food and clothing in 390 Customs, etiquette, folklore (and related provisions in 640 Home and family management, 660 Chemical engineering and related technologies, and 680 Manufacture of products for specific uses).

The updates to languages in Table 6 are reflected in similar provisions in 400 Language. Throughout 400 Language, addition of Table 2 notation has been regularized for geographic variations of languages; special provision is no longer given for the country or countries where use of a language predominates.

There are numerous expansions featured throughout 610 Medicine and health, notably in nutrition, therapy, and diseases. We changed the heading at 690 from "Buildings" to "Construction of buildings," and expanded for special topics and parts of buildings. Similar changes to special topics and parts of buildings have been introduced in 720 Architecture and 721 Architectural materials and structural elements (the heading at 721 has been changed from "Architectural structure," which in turn has been discontinued from 721 to 720). Another change in a heading at the three-digit level occurs at 710, where "Civic and landscape art" has been replaced with "Area planning and landscape architecture."

The revised headings at 740 Graphic arts and decorative arts and 760 Printmaking and prints reflect the relocation of graphic arts from 760 to 740. There is a significant update at 741.5 Comic books, graphic novels, fotonovelas, cartoons, caricatures, comic strips. We have relocated cinematography and videography from 778.5 to 777 (a number that was last in use in Edition 14), and have introduced a major revision and expansion for the topics at the latter number.

In 780 Music, we have updated the distinction between 781.62 Folk music and 781.63–.66 Popular music for music that originates within and is associated with an ethnic or national group, and introduced a provision for hybrid styles in the add table under 781.63–.66. We have also eliminated distinctions among specific styles of rock music in 781.66 Rock (Rock 'n' roll); all are classed in 781.66. There are significant expansions throughout 796 Athletic and outdoor sports and games to address the variety of sports engaged in at the international level.

As in 400 Language, the updates to languages in Table 6 are reflected in similar provisions in 800 Literature (Belles-lettres) and rhetoric. We have made minor adjustments to literary period tables throughout 800, including recasting the notation in the special table for literary periods of Canada under 811–818 Subdivisions for specific forms of American literature in English from standard to optional notation.

The changes to geographic areas in Table 2 are reflected in 900 History, geography, and auxiliary disciplines; in addition, historical periods have been updated throughout 900.

STRUCTURAL CHANGES

We introduced two changes to modernize the structure of the classification for machine display and retrieval, and user convenience. The first is an elimination of dual headings. Dual headings are headings with two distinct terms separated by four hard spaces. In many cases, one of the topics of the dual heading has been moved to a class-here note. For example, the dual heading "Life sciences Biology" at 570 is now simply "Biology" in Edition 23; the topic "life sciences" has been moved to the class-here note under 570.

The second structural change is the elimination of unbalanced spans in the schedules and tables. Records for spans in the tables and schedules are used to bring together information about a range of numbers or to provide add instructions. Generally, the numbers at both ends of the span have the same length, e.g. 810-890, 342-349, 616.1-9, 943.01-05, and 333.335-339. This makes it easy to identify which numbers fall underneath the span in the hierarchy, and at what level the span is in the hierarchy. Sometimes, however, the numbers at each end of the span have a different length, e.g., 305.805-89 Specific ethnic and national groups; this can cause confusion in the print and electronic editions with respect to the position of the span in the hierarchy. As part of the development of Edition 23, we have reviewed each unbalanced span. For example, 305.805-89 has been replaced by two spans, 305.805-809 and 305.81-89.

DATA REPRESENTATION

The print version of Edition 23 has been produced using the fourth generation of the Editorial Support System (ESS), introduced in 2010. During the development of Edition 23, we have migrated the representation of DDC data from a proprietary format that has been in place since Edition 20 to a new data format based on the MARC 21 formats for Classification and Authority data. When we distribute the data for printing, for inclusion in WebDewey, and to translation teams and other users, we transform the representation from the internal MARC formats to a MARCXML representation. There are also other representations of the DDC data, e.g., SKOS.

Selected List of Changes in Edition 23

A complete list of relocations, discontinuations, and reused numbers, plus comparative and equivalence tables for the major revision of cinematography and videography, is available immediately following Tables 1–6. A selected list of new numbers, revisions, and expansions in Edition 23 follows.

Selected Changes in the Tables

TABLE 1. STANDARD SUBDIVISIONS

| 0141 | Discourse analysis New number |
|---------------|---|
| 0286 | Green technology (Environmental technology) Revised |
| 0681 | Organization and financial management Fund raising for festivals relocated from —079* |

Introduction to the Dewey Decimal Classification

About the Introduction

- 1.1 This Introduction explains the basic principles and structure of the Dewey Decimal Classification (DDC) system.
- 1.2 The Introduction is intended to be used in conjunction with the Glossary and the Manual. The Glossary defines terms used in the Introduction and elsewhere in the Classification. The Manual offers advice on classifying in difficult areas, and explains how to choose between related numbers.

Classification: What It Is and What It Does

- 2.1 Classification provides a system for organizing knowledge. Classification may be used to organize knowledge represented in any form, e.g., books, documents, electronic resources.
- 2.2 Notation is the system of symbols used to represent the classes in a classification system. In the Dewey Decimal Classification, the notation is expressed in Arabic numerals. The notation gives both the unique meaning of the class and its relation to other classes. The notation provides a universal language to identify the class and related classes, regardless of the fact that different words or languages may be used to describe the class.

History, Current Use, and Development of the Dewey Decimal Classification

- 3.1 The Dewey Decimal Classification—conceived by Melvil Dewey in 1873 and first published in 1876—is a general knowledge organization tool that is continuously revised to keep pace with knowledge. The system is further extended through number building, interoperable translations, association with categorized content, and mappings to other subject schemes.
- The DDC is published in full and abridged editions by OCLC Online Computer Library Center, Inc. The abridged edition is a logical truncation of the notational and structural hierarchy of the corresponding full edition on which it is based, and is intended for general collections of 20,000 titles or less. Both editions are issued in print and electronic versions; the electronic versions are updated frequently and contain additional index entries and mapped vocabulary. OCLC owns all copyright rights in the Dewey Decimal Classification, and licenses the system for a variety of uses.
- 3.3 The DDC is the most widely used classification system in the world. Libraries in more than 138 countries use the DDC to organize and provide access to their collections, and DDC numbers are featured in the national bibliographies

of more than sixty countries. Libraries of every type apply Dewey numbers on a daily basis and share these numbers through a variety of means (including WorldCat). Dewey is also used in a variety of applications on the web in support of categorization, browsing, and retrieval.

- The DDC has been translated into over thirty languages. Since 1988, authorized translations of the full and abridged editions of the DDC have been published or are under way in Arabic, French, German, Greek, Hebrew, Icelandic, Indonesian, Italian, Norwegian, Russian, Spanish, Swedish, Turkish, and Vietnamese. The DDC Summaries, the top three levels of the Dewey Decimal Classification system, have been translated into Afrikaans, Arabic, Chinese, Czech, French, German, Hebrew, Italian, Norwegian, Portuguese, Russian, Spanish, Swedish, and Vietnamese.
- One of Dewey's great strengths is that the system is developed and maintained in a national bibliographic agency, the Library of Congress. The Dewey editorial office is located in the Dewey Section of the Library of Congress, where classification specialists annually assign over 60,000 DDC numbers to records for works cataloged by the Library. Having the editorial office within the Dewey Section enables the editors to detect trends in the literature that must be incorporated into the Classification. The editors prepare proposed schedule revisions and expansions, and forward the proposals to the Decimal Classification Editorial Policy Committee (EPC) for review and recommended action.
- 3.6 EPC is a ten-member international board whose main function is to advise the editors and OCLC on matters relating to changes, innovations, and the general development of the Classification. EPC represents the interests of DDC users; its members come from national, public, special, and academic libraries, and from library schools.

Overview of the Dewey Decimal Classification

CONCEPTUAL FRAMEWORK

- 4.I The DDC is built on sound principles that make it ideal as a general knowledge organization tool: meaningful notation in universally recognized Arabic numerals, well-defined categories, well-developed hierarchies, and a rich network of relationships among topics. In the DDC, basic classes are organized by disciplines or fields of study. At the broadest level, the DDC is divided into ten *main classes*, which together cover the entire world of knowledge. Each main class is further divided into ten *divisions*, and each division into ten *sections* (not all the numbers for the divisions and sections have been used).
- 4.2 The main structure of the DDC is presented in the DDC Summaries in the beginning of volume 2. The first summary contains the ten main classes. The second summary contains the hundred divisions. The third summary contains the thousand sections. The headings associated with the numbers in the summaries have been edited for browsing purposes, and do not necessarily match the complete headings found in the schedules.

4.3 The ten main classes are:

| 000 | Computer science, information & general works |
|-----|---|
| 100 | Philosophy & psychology |
| 200 | Religion |
| 300 | Social sciences |
| 400 | Language |
| 500 | Science |
| 600 | Technology |
| 700 | Arts & recreation |
| 800 | Literature |
| 900 | History & geography |

- 4.4 Class 000 is the most general class, and is used for works not limited to any one specific discipline, e.g., encyclopedias, newspapers, general periodicals. This class is also used for certain specialized disciplines that deal with knowledge and information, e.g., computer science, library and information science, journalism. Each of the other main classes (100–900) comprises a major discipline or group of related disciplines.
- 4.5 Class 100 covers philosophy, parapsychology and occultism, and psychology.
- 4.6 Class 200 is devoted to religion.
- 4.7 Class 300 covers the social sciences. Class 300 includes sociology, anthropology, statistics, political science, economics, law, public administration, social problems and services, education, commerce, communications, transportation, and customs.
- 4.8 Class 400 comprises language, linguistics, and specific languages. Literature, which is arranged by language, is found in 800.
- 4.9 Class 500 is devoted to the natural sciences and mathematics.
- 4.10 Class 600 is technology.
- 4.11 Class 700 covers the arts: art in general, fine and decorative arts, music, and the performing arts. Recreation, including sports and games, is also classed in 700.
- 4.12 Class 800 covers literature, and includes rhetoric, prose, poetry, drama, etc. Folk literature is classed with customs in 300.
- 4.13 Class 900 is devoted primarily to history and geography. A history of a specific subject is classed with the subject.
- 4.14 Since the parts of the DDC are arranged by discipline, not subject, a subject may appear in more than one class. For example, "clothing" has aspects that fall under several disciplines. The psychological influence of clothing belongs in 155.95 as part of the discipline of psychology; customs associated with clothing belong in 391 as part of the discipline of customs; and clothing in the sense of fashion design belongs in 746.92 as part of the discipline of the arts.

NOTATION

- 4.15 Arabic numerals are used to represent each class in the DDC. The first digit in each three-digit number represents the main class. For example, 500 represents science. The second digit in each three-digit number indicates the division. For example, 500 is used for general works on the sciences, 510 for mathematics, 520 for astronomy, 530 for physics. The third digit in each three-digit number indicates the section. Thus, 530 is used for general works on physics, 531 for classical mechanics, 532 for fluid mechanics, 533 for gas mechanics. The DDC uses the convention that no number should have fewer than three digits; zeros are used to fill out numbers.
- 4.16 A *decimal point*, or dot, follows the third digit in a class number, after which division by ten continues to the specific degree of classification needed. The dot is not a decimal point in the mathematical sense, but a psychological pause to break the monotony of numerical digits and to ease the transcription and copying of the class number. A number should never end in a 0 anywhere to the right of the decimal point.

PRINCIPLE OF HIERARCHY

- 4.17 *Hierarchy* in the DDC is expressed through structure and notation.
- 4.18 Structural hierarchy means that all topics (aside from the ten main classes) are part of all the broader topics above them. The corollary is also true: whatever is true of the whole is true of the parts. This important concept is called hierarchical force. Certain notes regarding the nature of a class hold true for all the subordinate classes, including logically subordinate topics classed at coordinate numbers. (For a discussion of notes with hierarchical force, see paragraphs 7.10–7.16 and 7.19–7.21.)

Because of the principle of hierarchical force, hierarchical notes are usually given only once—at the highest level of application. For example, the scope note at 700 applies to 730, to 736, and to 736.4. The words "Description, critical appraisal ..." found in the scope note at 700 also govern the critical appraisal of carving in 736 Carving and carvings, and of wood carving in 736.4 Wood. In order to understand the structural hierarchy, the classifier must read up and down the schedules (and remember to turn the page).

4.19 *Notational hierarchy* is expressed by length of notation. Numbers at any given level are usually *subordinate* to a class whose notation is one digit shorter; *co-ordinate* with a class whose notation has the same number of significant digits; and *superordinate* to a class with numbers one or more digits longer. The underlined digits in the following example demonstrate this notational hierarchy:

| <u>6</u> 00 | Technology (Applied sciences) |
|--------------|--------------------------------------|
| <u>63</u> 0 | Agriculture and related technologies |
| <u>636</u> | Animal husbandry |
| <u>636.7</u> | Dogs |
| 636.8 | Cats |

- "Dogs" and "Cats" are more specific than (i.e., are subordinate to) "Animal husbandry"; they are equally specific as (i.e., are coordinate with) each other; and "Animal husbandry" is less specific than (i.e., is superordinate to) "Dogs" and "Cats."
- 4.20 Sometimes, other devices must be used to express hierarchy when it is not possible or desirable to do so through the notation. A see reference leads the classifier to subdivisions of a subject located outside the notational hierarchy. A centered entry (so called because its numbers, heading, and notes appear in the center of the page) constitutes a major departure from notational hierarchy. A centered entry is used to indicate and relate structurally a span of numbers that together form a single concept for which there is no specific hierarchical notation available. In the DDC, centered entries are always flagged typographically by the symbol > in the number column.

Classifying with the DDC

5.1 Classifying a work with the DDC requires determining the subject, the disciplinary focus, and, if applicable, the approach or form. (For a discussion of approach or form, see paragraph 8.3.)

DETERMINING THE SUBJECT OF A WORK

- 5.2 Classifying a work properly depends first upon determining the subject of the work in hand. A key element in determining the subject is the author's intent.
 - (A) The title is often a clue to the subject, but should never be the sole source of analysis. For example, *Opera* could be the title of a work on the familiar dramatic musical art form or on the web browser Opera. Likewise, a title with specific terms that are subdivisions of a field may in fact use such terms symbolically to represent the broader topic. For example, titles containing terms like chromosomes, DNA, double helix, genes, and genomes may use these terms symbolically to represent the whole subject of biochemical genetics.
 - (B) The table of contents may list the main topics discussed. Chapter headings may substitute for the absence of a table of contents. Chapter subheadings often prove useful.
 - (C) The preface or introduction usually states the author's purpose. If a foreword is provided, it often indicates the subject of the work and suggests the place of the work in the development of thought on the subject. The book jacket or accompanying material may include a summary of the subject content.
 - (D) A scan of the text itself may provide further guidance or confirm preliminary subject analysis.
 - (E) Bibliographical references and index entries are sources of subject information.

- (F) Cataloging copy from centralized cataloging services is often helpful by providing subject headings, classification numbers, and notes. Such copy appears in online services, and on the verso of the title page of many books as part of Cataloging-in-Publication (CIP) data. Data from these sources should be verified with the book in hand, since the cataloging record is based on prepublication information.
- (G) Occasionally, consultation of outside sources such as reviews, reference works, and subject experts may be required to determine the subject of the work.

DETERMINING THE DISCIPLINE OF A WORK

- After determining the subject, the classifier must then select the proper discipline, or field of study, of the work.
- The guiding principle of the DDC is that a work is classed in the discipline for which it is intended, rather than the discipline from which the work derives. This enables works that are used together to be found together. For example, a general work by a zoologist on agricultural pest control should be classed in agriculture, not zoology, along with other works on agricultural pest control.
- 5.5 Once the subject has been determined, and information on the discipline has been found, the classifier will turn to the schedules. The summaries are a good means of mental navigation. The headings and notes in the schedules themselves and the Manual provide much guidance. The Relative Index may help by suggesting the disciplines in which a subject is normally treated. (For a discussion of the summaries, see paragraph 7.1; for a discussion of the Manual, see paragraphs 10.1–10.6; for a discussion of the Relative Index, see paragraphs 11.1–11.15.)
- 5.6 If the Relative Index is used, the classifier must still rely on the structure of the Classification and various aids throughout to arrive at the proper place to classify a work. Even the most promising Relative Index citations must be verified in the schedules; the schedules are the only place where all the information about coverage and use of the numbers may be found.

MORE THAN ONE SUBJECT IN THE SAME DISCIPLINE

- A work may include multiple subjects treated separately or in relation to one another from the viewpoint of a single discipline. Use the following guidelines in determining the best placement for the work:
 - (A) Class a work dealing with interrelated subjects with the subject that is being acted upon. This is called the *rule of application*, and takes precedence over any other rule. For instance, class an analytical work dealing with Shakespeare's influence on Keats with Keats. Similarly, class a work on the influence of the Great Depression on 20th century American art with American art.
 - (B) Class a work on two subjects with the subject receiving fuller treatment.

(C) If two subjects receive equal treatment, and are not used to introduce or explain one another, class the work with the subject whose number comes first in the DDC schedules. This is called the *first-of-two rule*. For example, a history dealing equally with the United States and Japan, in which the United States is discussed first and is given first in the title, is classed with the history of Japan because 952 Japan precedes 973 United States.

Sometimes, specific instructions are given to use numbers that do not come first in the schedules. For example, at 598, the note "class comprehensive works on warm-blooded vertebrates in 599" tells the classifier to ignore the first-of-two rule and class a work on birds (598) and mammals (599) in 599, which is the comprehensive number for warm-blooded vertebrates.

Also disregard the first-of-two rule when the two topics are the two major subdivisions of a subject. For example, collection systems (628.142) and distribution systems (628.144) taken together constitute 628.14 Collection and distribution systems. Works covering both of these topics are classed in 628.14 (not 628.142).

(For a discussion of the first-of-two rule versus preference order, see paragraph 9.6; for a discussion of comprehensive numbers, see paragraphs 7.16 and 7.19–7.20.)

- (D) Class a work on three or more subjects that are all subdivisions of a broader subject in the first higher number that includes them all (unless one subject is treated more fully than the others). This is called the *rule of three*. For example, a history of Portugal (946.9), Sweden (948.5), and Greece (949.5) is classed with the history of Europe (940).
- (E) Subdivisions beginning with zero should be avoided if there is a choice between 0 and 1–9 at the same point in the hierarchy of the notation. Similarly, subdivisions beginning with 00 should be avoided when there is a choice between 00 and 0. This is called the *rule of zero*. For example, a biography of an American Methodist missionary in China belongs in 266 Missions. The content of the work can be expressed in three different numbers:

| 266.0092 | biography of a missionary |
|--------------|---|
| 266.02373051 | foreign missions of the United States in China |
| 266.76092 | biography of a United Methodist Church missionary |

The last number is used since it has no zero at the fourth position.

MORE THAN ONE DISCIPLINE

5.8 Treating a subject from the point of view of more than one discipline is different from treating several subjects in one discipline. Use the following guidelines in determining the best placement for the work:

- (A) Use the *interdisciplinary number* provided in the schedules or Relative Index if one is given. An important consideration in using such an interdisciplinary number is that the work must contain significant material on the discipline in which the interdisciplinary number is found. For example, 305.231 (a sociology number) is provided for interdisciplinary works on child development. However, if a work that is interdisciplinary with respect to child development gives little emphasis to social development and a great deal of emphasis to the psychological and physical development of the child (155.4 and 612.65, respectively), class it in 155.4 (the first number in the schedules of the next two obvious choices). In short, interdisciplinary numbers are not absolute; they are to be used only when applicable. (For a discussion of interdisciplinary numbers, see paragraphs 7.16, 7.19–7.20, and 11.8–11.9.)
- (B) Class works not given an interdisciplinary number in the discipline given the fullest treatment in the work. For example, a work dealing with both the scientific and the engineering principles of electrodynamics is classed in 537.6 if the engineering aspects are introduced primarily for illustrative purposes, but in 621.31 if the basic scientific theories are only preliminary to the author's exposition of engineering principles and practices.
- (C) When classifying interdisciplinary works, do not overlook the possibilities of main class 000 Computer science, information & general works, e.g., 080 for a collection of interviews of famous people from various disciplines.

Any other situation is treated in the same fashion as those found in the instructions at More Than One Subject in the Same Discipline (paragraph 5.7).

TABLE OF LAST RESORT

5.9 When several numbers have been found for the work in hand, and each seems as good as the next, the following table of last resort (in order of preference) may be used as a guideline in the absence of any other rule:

Table of last resort

- (1) Kinds of things
- (2) Parts of things
- (3) Materials from which things, kinds, or parts are made
- (4) Properties of things, kinds, parts, or materials
- (5) Processes within things, kinds, parts, or materials
- (6) Operations upon things, kinds, parts, or materials
- (7) Instrumentalities for performing such operations

For example, surveillance by border patrols could be classed in either 363.285 Border patrols, or 363.232 Patrol and surveillance. Choose 363.285 since border patrols are a kind of police service, while patrol and surveillance are processes performed by police services.

5.10 Do not apply this table or any other guideline if it appears to disregard the author's intention and emphasis.

How DDC 23 Is Arranged

6.1 DDC 23 is composed of the following major parts in four volumes:

Volume 1

- (A) New Features in Edition 23: A brief explanation of the special features and changes in DDC 23
- (B) Introduction: A description of the DDC and how to use it
- (C) Glossary: Short definitions of terms used in the DDC
- (D) Index to the Introduction and Glossary
- (E) Manual: A guide to the use of the DDC that is made up primarily of extended discussions of problem areas in the application of the DDC. Information in the Manual is arranged by the numbers in the tables and schedules
- (F) Tables: Six numbered tables of notation that can be added to class numbers to provide greater specificity
- (G) Lists that compare Editions 22 and 23: Relocations and Discontinuations; Comparative and Equivalence Tables; Reused Numbers

Volume 2

- (H) DDC Summaries: The top three levels of the DDC
- (I) Schedules: The organization of knowledge from 000–599

Volume 3

(J) Schedules: The organization of knowledge from 600–999

Volume 4

(K) Relative Index: An alphabetical list of subjects with the disciplines in which they are treated subarranged alphabetically under each entry

Key Features of the Schedules and Tables

SUMMARIES

- 7.1 *Summaries* provide an overview of the structure of classes. Three types of summaries appear in the DDC:
 - (A) DDC Summaries, the summaries of the top three levels of the DDC, are found in front of the schedules in volume 2. (For a discussion of DDC Summaries, see paragraphs 4.2–4.13.)
 - (B) Two-level summaries are provided for each main class and division of the schedules and main numbers of Table 2 with subdivisions that extend beyond forty pages. See the summaries at the beginning of Table 2—4 Europe and 370 Education for examples of two-level summaries.

(C) Single-level summaries in the schedules and tables provide an overview of classes whose subdivisions cover between four and forty pages. For example, 382 International commerce (Foreign trade) has the following summary:

SUMMARY

| 382.0109 | Standard subdivisions |
|----------|--|
| .1 | General topics of international commerce |
| .3 | Commercial policy |
| .4 | Specific products and services |
| .5 | Import trade |
| .6 | Export trade |
| .7 | Tariff policy |
| .9 | Trade agreements |

ENTRIES

- 7.2 Entries in the schedules and tables are composed of a DDC number in the number column (the column at the left margin), a heading describing the class that the number represents, and often one or more notes. DDC numbers are listed in groups of three digits for ease of reading and copying. All entries (numbers, headings, and notes) should be read in the context of the hierarchy. (For a discussion of the principle of hierarchy, see paragraphs 4.17–4.20.)
- 7.3 The first three digits of schedule numbers (main classes, divisions, sections) appear only once in the number column, when first used. They are repeated at the top of each page where their subdivisions continue. Subordinate numbers appear in the number column, beginning with a decimal point, with the initial three digits understood.
- 7.4 Table numbers are given in full in the number column of the tables, and are never used alone. There are six numbered tables in DDC 23:
 - T1 Standard Subdivisions
 - T2 Geographic Areas, Historical Periods, Biography
 - T3 Subdivisions for the Arts, for Individual Literatures, for Specific Literary Forms
 - T3A Subdivisions for Works by or about Individual Authors
 - T3B Subdivisions for Works by or about More than One Author
 - T3C Notation to Be Added Where Instructed in Table 3B, 700.4, 791.4, 808–809
 - T4 Subdivisions of Individual Languages and Language Families
 - T5 Ethnic and National Groups
 - T6 Languages

Except for notation from Table 1 (which may be added to any number unless there is an instruction in the schedules or tables to the contrary), table notation

may be added only as instructed in the schedules and tables. (For a detailed discussion of the use of the six tables, see paragraphs 8.3–8.20.)

- 7.5 Some numbers in the schedules and tables are enclosed in parentheses or square brackets. Numbers and notes in parentheses provide options to standard practice. Numbers in square brackets represent topics that have been relocated or discontinued, or are unassigned. Square brackets are also used for standard subdivision concepts that are represented in another location. Bracketed numbers should never be used. (For a discussion of options, see paragraphs 12.1–12.7; for a discussion of relocations and discontinuations, see paragraphs 7.23–7.24; for a discussion of bracketed standard subdivisions, see paragraph 7.25.)
- 7.6 Standard subdivisions are also bracketed under a *hook number*, that is, a number that has no meaning in itself, but is used to introduce specific examples of a topic. Hook numbers have headings that begin with "Miscellaneous," "Other," or "Specific"; and do not contain add notes, including notes, or class-here notes. For example:

652.302 Specific levels of skill

[.302 01-.302 09] Standard subdivisions

Do not use; class in 652.3001–652.3009

NOTES

- 7.7 Notes are important because they supply information that is not obvious in the notational hierarchy or in the heading with regard to order, structure, subordination, and other matters. Notes may appear in the record for a number or a span of numbers. Notes may also appear at the beginning of a table. Footnotes are used for instructions that apply to multiple subdivisions of a class, or to a topic within a class. Individual entries in the Manual are also considered notes.
- 7.8 Notes in the schedules and tables generally appear in the following order: revision, former-heading, definition, number-built, standard-subdivisions-are added, variant-name, scope, including, class-here, arrange, add (including subdivisions-are-added), preference, class-elsewhere, see-reference, see-also reference, see-Manual, option, discontinued, and relocation notes.
- 7.9 The notes below do the following: (A) describe what is found in the class and its subdivisions; (B) identify topics in *standing room*, i.e., topics with insufficient literature to have their own number; (C) describe what is found in other classes; and (D) explain changes in the schedules and tables. Other notes are described in the sections on number building (paragraphs 8.1–8.22), citation and preference order (paragraphs 9.1–9.6), the Manual (paragraphs 10.1–10.6), and options (paragraphs 12.1–12.5).

Notes in categories (A) and (C) have hierarchical force (i.e., are applicable to all the subdivisions of a particular number). Those in category (B) do not have hierarchical force.

(A) Notes That Describe What Is Found in a Class

7.10 *Definition notes* indicate the meaning of a term in the heading. For example:

364 Criminology

Crime and its alleviation

7.11 *Scope notes* indicate whether the meaning of the number is narrower or broader than is apparent from the heading. For example:

700 The arts

Description, critical appraisal, techniques, procedures, apparatus, equipment, materials of the fine, decorative, literary, performing, recreational arts

7.12 Number-built notes identify and explain the source of built numbers included in the schedules and tables. Built numbers are occasionally included in the schedules or tables to provide additional information or to indicate exceptions to regular add instructions. For example:

353.132 63 Foreign service

Number built according to instructions under 352–354

Class here consular and diplomatic services

7.13 Former-heading notes are given only when the heading associated with a class number in the previous edition has been altered to such a degree that the new heading bears little or no resemblance to the previous heading, even though the meaning of the number has remained substantially the same. For example:

004.16 *Personal computers

Former heading: Microcomputers

7.14 *Variant-name notes* are used for synonyms or near synonyms. For example:

332.32 Savings and loan associations

Variant names: building and loan associations, building societies, home loan associations, mortgage institutions

7.15 Class-here notes list major topics in a class. These topics may be broader or narrower than the heading, overlap it, or define another way of looking at essentially the same material. Topics in class-here notes are considered to approximate the whole of the class. For example:

371.192 Parent-school relations

Class here parent participation in schools; comprehensive works on teacher-parent relations

Standard subdivisions may be added for any topic in a class-here note. (For a detailed discussion of the use of standard subdivisions for concepts that ap-

proximate the whole of a class, see paragraphs 8.3–8.12 and the beginning of Table 1.)

7.16 Class-here notes are also used to indicate where interdisciplinary and comprehensive works are classed. *Interdisciplinary works* treat a subject from the perspective of more than one discipline. For example:

391 Costume and personal appearance

Class here interdisciplinary works on costume, clothing (apparel, garments), fashion; casual wear (sportswear)

Comprehensive works treat a subject from various points of view within a single discipline. Comprehensive works may be stated or implied in a class-here note. For example:

641.815 Breads and bread-like foods

Class here yeast breads, comprehensive works on baked goods (stated)

-411 5 Highland

Class here *Scottish Highlands

(implied)

(B) Including Notes (Notes That Identify Topics in Standing Room)

7.17 *Including notes* identify topics that have "standing room" in the number where the note is found. Standing room numbers provide a location for topics with relatively few works written about them, but whose literature may grow in the future, at which time they may be assigned their own number. For example:

362.16 Extended care medical facilities

Including convalescent homes, sanatoriums for persons suffering from chronic diseases

Standard subdivisions cannot be added for topics in standing room, nor are other number-building techniques allowed.

7.18 Entries in the taxonomic schedules in 579–590 may have two including notes. The first including note contains the scientific taxonomic names at or above the level of family. The second one contains common and genus names. For example:

593.55 Hydrozoa

Including Chondrophora, Hydroida, Milleporina, Pteromedusae, Siphonophora, Stylasterina, Trachylina

Including hydras, Portuguese man-of-war

(C) Notes That Describe What Is Found in Other Classes

7.19 Class-elsewhere notes lead the classifier to interrelated topics, or distinguish among numbers in the same notational hierarchy. They are used to show pref-

erence order, to lead to the comprehensive or interdisciplinary number, to override the first-of-two rule, or to lead to broader or narrower topics in the same hierarchical array that might otherwise be overlooked. They may point to a specific number, or to a concept scattered throughout the schedules. All notes that begin with the word "class" are class-elsewhere notes, except when they begin with "class here." For example:

641.7 Specific cooking processes and techniques

Class specific processes applied to specific materials in 641.6; class specific processes applied to specific kinds of dishes, preparing beverages in 641.8

370.15 Educational psychology

Class interdisciplinary works on psychology in 150. Class psychology of a specific topic in education with the topic, plus notation 019 from Table 1, e.g., psychology of special education 371.9019

155.4 Child psychology

Class interdisciplinary works on child development in 305.231

7.20 See references lead from a stated or implied comprehensive number for a concept to the component (subordinate) parts of that concept in a different notational hierarchy. See references also lead from the interdisciplinary number for a concept to treatment of the concept in other disciplines. A see reference may point to a specific number, or to a concept scattered throughout the schedules. Each see reference begins with the word "For" and appears in italics. For example:

577.7 Marine ecology

Class here saltwater ecology

For salt lake ecology, see 577.639; for saltwater wetland and seashore ecology, see 577.69

305.4 Women

Class here interdisciplinary works on women, on females

For a specific aspect of women not provided for here, see the aspect, e.g., women's suffrage 324.623, legal status of women 346.0134

Throughout Table 2, see references (often in footnote form) lead from the implied comprehensive number for a jurisdiction, region, or feature to its subordinate parts in other classes. For example:

-411 5 Highland

Class here *Scottish Highlands

*For a specific part of this jurisdiction, region, or feature, see the part and follow instructions under —4–9

7.21 See-also references lead the classifier to related topics. They are reminders that minor differences in wording and context can imply differences in classification. Each see-also reference appears in italics. For example:

584.3 Liliidae

Class here Liliales, lilies

For Orchidales, see 584.4

See also 583.29 for water lilies

(D) Notes That Explain Changes or Irregularities in the Schedules and Tables

- 7.22 Revision notes warn users that there have been changes in the subdivisions of a class since the previous edition. A new schedule, complete revision, or extensive revision is always introduced by a revision note that appears first under the heading of the class affected. (For an example of a new schedule note, see 777 Cinematography and videography. There are no complete or extensive revision notes in DDC 23.)
- 7.23 Discontinued notes indicate that all or part of the contents of a number have been moved to a more general number in the same hierarchy, or have been dropped entirely. For example:

[025.393] Recataloging

Number discontinued; class in 025.39

154.632 Panic disorder

Use of this number for other types of dreams discontinued; class in 154.63

7.24 *Relocation notes* state that all or part of the contents of a number have been moved to a different number. For example:

—[755 811] Clifton Forge

Relocated to -755816

523.482 Optical, electromagnetic, radioactive, thermal phenomena

Pluto relocated to 523.4922

The former number is usually given at the new number, either in the heading or in the appropriate note. For example:

--755 816 Alleghany County

Including Clifton Forge [formerly —755811]

523.492 2 *Pluto [formerly 523.482]

7.25 Do-not-use notes instruct the classifier not to use all or part of the regular standard subdivision notation, but instead to use a special provision or standard subdivision notation at a broader number. When the whole standard subdivision is removed from use, the note appears under a bracketed standard subdivision; when only part of the standard subdivision is *displaced*, the part displaced is specified. For example:

[374.809] History, geographic treatment, biography

Do not use; class in 374.9

320.409 History and biography

Do not use for geographic treatment; class in 320.41–320.49

Do-not-use notes are also used to instruct the classifier not to use all or part of an add table provision, but instead to use a special provision.

343.014 *Discipline and conduct

Including desertion

Subdivisions are added for either or both topics in heading

For discipline and conduct of a specific service other than the army in general, see the service in 343.015–343.019, e.g., discipline and conduct of mercenary troops 343.015354, naval discipline and conduct 343.01913

[343.014 026 9] Courts and procedure

Do not use; class in 343.0143

*Add as instructed under 342-347

Number Building

8.1 The classifier will often find that to arrive at a precise number for a work it is necessary to build or synthesize a number that is not specifically listed in the schedules. Such *built numbers* allow for greater depth of content analysis. They are used only when instructions in the schedules make them possible (except for standard subdivisions, which are discussed in paragraphs 8.3–8.12). Number building begins with a base number (always stated in the instruction note) to which another number is added.

There are four sources of notation for building numbers: (A) Table 1 Standard Subdivisions; (B) Tables 2–6; (C) other parts of the schedules; and (D) add tables in the schedules.

(A) Adding Standard Subdivisions from Table 1

A *standard subdivision* represents a recurring physical form (such as a dictionary, periodical, or index) or approach (such as history or research) and thus is applicable to any subject or discipline that covers or approximates the whole of the meaning of the number. Here are a few examples with the standard subdivision concept underlined (in some cases an extra 0 precedes the standard subdivision according to instructions found in the schedules):

| 15 <u>0.5</u> | Philosophy and theory of psychology |
|--------------------|--|
| 230.0 <u>03</u> | <u>Dictionary</u> of Christianity |
| 340. <u>025</u> 73 | <u>Directory</u> of lawyers in the U.S. |
| 4 <u>05</u> | Periodical on language |
| 5 <u>07.8</u> | Use of apparatus and equipment in the study and teach- |
| | ing of science, e.g., science fair projects |
| 624. <u>0285</u> | Computer applications in civil engineering |
| 796.912 <u>092</u> | Biography of a figure skater |
| 808.0 <u>071</u> | Teaching of rhetoric |
| | |

Further instructions on using Table 1 are found at the beginning of Table 1. See also Manual notes on selected standard subdivisions.

8.4 Standard subdivisions are not usually listed in the schedules except where needed to fill out three-digit numbers, e.g., 605 Serial publications, and in a few other instances. Standard subdivisions may be listed in the schedules when the subdivisions have extended or narrowed meanings. For example:

535.220 287 Testing and measurement

(extended meaning)

Class here photometry

390.088

[Customs of] Religious groups

(narrowed meaning)

Do not use for occupational groups; class in 390.4

Standard subdivisions may also be listed to introduce an expansion featuring special notation (the subdivisions in the expansion are not standard subdivisions). Such standard subdivisions are accompanied by a special note. For example:

Philosophy and theory, education for specific objectives, educational psychology

Notation 01 from Table 1 as modified below

Sometimes, standard subdivisions are listed because references to other classes or the Manual are required. For example:

507.2 Research

Class research covering science in general in 001.4

See Manual at 500 vs. 001

507.21 Research methods

Class scientific method as a general research technique in 001 42

- 8.5 When standard subdivision notation from Table 1 is listed in Tables 2–6 and in the schedules, all of the notation's notes and subdivisions as given in Table 1 are applicable unless other instructions are given. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that 610.7 is listed, but not 610.8 or the subdivisions of 610.7, does not exclude the use of 610.8 or 610.71.
- 8.6 Notation from Table 1 Standard Subdivisions may be added to any number in the schedules unless there is a specific instruction to the contrary. The classifier should never use more than one zero in applying a standard subdivision unless instructed to do so. If more than one zero is needed, the number of zeros is always indicated in the schedules. When using standard subdivisions with numbers built by adding from Tables 2–6 or other parts of the schedules, be sure to check the table or schedule used for the segment preceding the standard subdivision for special instructions on the number of zeros.
- 8.7 The most important caveat with respect to standard subdivisions is that they are added only for works that cover or approximate the whole of the subject of the number. For example, a work on mockingbirds of California should be classed in 598.844, the number for birds of the Mimidae family (not 598.84409794, the number for birds of the Mimidae family in California). The classifier should not attempt to specify California because mockingbirds are in the including note under 598.844 and therefore do not approximate the whole of 598.844 Mimidae in California. Likewise, class a work on the De Havilland 98 Mosquito (a specific British World War II fighter-bomber) in the number for fighter-bombers 623.7463 (not 623.7463094109044, the number for British fighter-bombers in World War II).
- 8.8 Standard-subdivisions-are-added notes indicate which topics in a multiterm heading may have standard subdivisions added for them because the designated topics are considered to approximate the whole of the subject. For example:
 - 639.2 Commercial fishing, whaling, sealing

Standard subdivisions are added for commercial fishing, whaling, sealing together; for commercial fishing alone

Standard-subdivisions-are-added notes do not have hierarchical force beyond the standard subdivisions associated with the number itself. For example, the note under 639.2 governs the application of standard subdivisions to 639.2 itself, but not to 639.21–639.29.

8.9 Do not add multiple standard subdivisions to the same number except when specifically instructed to do so, and in the following instances. Standard subdivisions may be added to subdivisions of —04 Special topics that are specifically listed in the schedules. For example, standard subdivisions may be added to 155.9042 Stress, a subdivision of 155.904 Special topics in environmental psychology.

Standard subdivisions may also be added to special notation in the regular standard subdivision sequence. For example, under 370.1, there is an expansion for educational objectives at 370.11 Education for specific objectives. Standard subdivisions may be added to 370.11 and its subdivisions, since 370.11 and its subdivisions are special notation.

Standard subdivision concepts may be displaced to a special provision in the regular sequence of standard subdivisions or elsewhere; in either case, standard subdivisions may be added to the special provision. For example, 370.19 Psychological principles has been completely displaced to 370.15 Educational psychology, where the regular meaning of 370.15 (scientific principles) has been discontinued to 370.1. Notation 03 from Table 1, the standard subdivision for encyclopedias, may be added to 370.15 Educational psychology to represent an encyclopedia of educational psychology 370.1503.

The full range of standard subdivisions may also be added to standard subdivision concepts displaced to notation outside the regular sequence of standard subdivisions, e.g., the management of penal institutions in Great Britain 365.941068 (geographic treatment of penal institutions has been displaced from 365.09 to 365.9).

8.10 In many places in the schedules, there are numbers outside the regular sequence of standard subdivisions that look like standard subdivisions but are not standard subdivisions. If additional subdivisions are intended to be used at the special provision, an add note is provided. For example, at 027.009, a regular standard subdivision, geographic treatment is displaced to 027.01–027.09:

027.009 History and biography

Do not use for geographic treatment; class in 027.01–027.09

027.01-027.09 *Geographic treatment

Add to base number 027.0 notation 1–9 from Table 2, e.g., libraries in France 027.044

The special provision for geographic treatment at 027.01–027.09 is not a standard subdivision. If appropriate, standard subdivisions may be added to the resulting notation, e.g., libraries in France in the late 20th century 027.04409045.

8.11 Standard subdivisions should not be used where redundant, i.e., where the subdivision means the same as the base number, or where application of the standard subdivision would needlessly segregate material by aspects not emphasized by the author. For example, do not add notation 024694, which represents the subject for carpenters, to topics in 694, the number for carpentry, since works on a subject are written primarily for its practitioners. Likewise, do not add the subdivision of notation 0905 for the latest historical period to general works on a subject to represent the state-of-the-art because most users will expect to find such works in the main number. Special care should be taken in adding standard subdivisions to built numbers, since the standard subdivision applies to the whole number and not just to part of the number.

The table of preference at the beginning of Table 1 yields to two other rules, the rule of application and the rule of zero. By the rule of application, teaching financial management in hospital administration is classed in 362.110681, not 362.11071, even though notation 07 is above notation 068 in the table of preference. The rule of zero overrides the table of preference when standard subdivisions are displaced to notation outside the regular sequence of standard subdivisions (notation at nonzero positions or notation with fewer zeros), e.g., management of prisons in Great Britain 365.941068, not 365.068 as would be the case if prisons in Great Britain were classed in 365.0941. (For a discussion of the rule of application and rule of zero, see paragraph 5.7; for a discussion of displaced standard subdivisions, see paragraphs 7.25 and 8.9.)

(B) Adding from Tables 2-6

- 8.13 The classifier may be instructed to add notation from Tables 2–6 to a base number from the schedules or to a number from a table. A summary of the use of each table follows. Further instructions on using Tables 2–6 are found at the beginning of each table. See also the Manual notes for Tables 2–6.
- 8.14 Table 2 Geographic Areas, Historical Periods, Biography. The major use of Table 2 is with notation 09 from Table 1, where it can be added to every number in the schedule unless there are specific instructions to the contrary. For example, reading instruction in the primary schools of Australia is 372.40994 (372.4 reading instruction in primary schools + 09 History, geographic treatment, biography from Table 1 + 94 Australia from Table 2). Notation from Table 2 is also added through the use of other standard subdivisions from Table 1 (e.g., standard subdivisions 025, 074).
- 8.15 Area notation is sometimes added directly to schedule numbers, but only when specified in a note. For example:
 - 373.3–373.9 Secondary education in specific continents, countries, localities

Add to base number 373 notation 3–9 from Table 2, e.g., secondary schools of Australia 373.94

8.16 Table 3 Subdivisions for the Arts, for Individual Literatures, for Specific Literary Forms. These subdivisions are used in class 800 as instructed, usually following numbers for specific languages in 810–890. Table 3C subdivisions are also added as instructed to numbers in Table 3B, 700.4, 791.4, and 808–809.

Introduction

- 8.17 Table 4 Subdivisions of Individual Languages and Language Families. These subdivisions are used as instructed in class 400, following numbers for designated specific languages or language families in 420–490.
- 8.18 *Table 5 Ethnic and National Groups*. Notation from Table 5 is added through the use of standard subdivision 089 from Table 1, e.g., Ceramic arts of Chinese artists throughout the world is 738.089951 (738 Ceramic arts + 089 Ethnic and national groups from Table 1 + 951 Chinese from Table 5).
- 8.19 Table 5 notation may also be added directly to schedule numbers, but only when specified in a note. For example:

781.621–.629 Folk music of specific ethnic and national groups

Add to base number 781.62 notation 1–9 from Table 5, e.g., Spanish folk music 781.6261; then add further ...

8.20 Table 6 Languages. The major uses of Table 6 notation are to provide the basis for building a specific language number in 490 (to which notation from Table 4 is sometimes added) and to provide the basis for building a specific literature number in 890 (to which notation from Table 3 is sometimes added). Table 6 notation is also used in Table 2 under —175 Regions where specific languages predominate, and at various points in the schedules.

(C) Adding from Other Parts of the Schedules

8.19 There are many instructions to make a direct addition to a number from another part of the schedules. For example:

809.935 Literature emphasizing subjects

Add to base number 809.935 notation 001–999, e.g., religious works as literature 809.9352, biography and autobiography as literature 809.93592

In this example, the 2 in 809.9352 comes from 200 Religion, the 92 in 809.93592 from 920 Biography, genealogy, insignia.

8.20 In many cases, part of a number may be added to another number upon instruction. For example:

Primary education for specific objectives

Add to base number 372.011 the numbers following 370.11 in 370.111–370.119, e.g., character education 372.0114

In this example, 4 comes from 370.114 Moral, ethical, character education. Sometimes numbers are taken from more than one place in the schedules; in such cases the procedure for the second addition is the same as for the first.

(D) Adding from Tables Found in the Schedules

8.21 Add tables in the schedules provide numbers to be added to designated schedule numbers (identified by a symbol and accompanying footnoted instruction); these tables must be used only as instructed. For example:

616.973 *Contact allergies

Class here allergic contact dermatitis, allergies of skin

The asterisk in the entry above leads to the following footnote: "Add as instructed under 616.1–616.9." The add table at 616.1–616.9 is used only for diseases tagged with an asterisk or for diseases in class-here notes under headings tagged with an asterisk. Notation from the add table, such as 061 Drug therapy, may be used for 616.973 Contact allergies (tagged with an asterisk) and for allergic contact dermatitis and allergies of skin (in the class-here note).

8.22 Subdivisions-are-added notes indicate which terms in a multiterm heading may have subdivisions applied to them. For example:

*Dermatitis, photosensitivity disorders, urticaria

Subdivisions are added for dermatitis, photosensitivity disorders, urticaria together; for dermatitis alone

Citation and Preference Order

9.1 Citation and preference order must be considered when multiple aspects or characteristics of a subject (such as age, area, gender, historical periods, national origin) are provided for in the Classification, and a single work treats more than one of them.

CITATION ORDER

- 9.2 Citation order allows the classifier to build or synthesize a number using two or more characteristics (*facets*) as specified in instruction notes. Success in building a DDC number requires determining which characteristics apply to a specific work, and then determining from the instructions in the schedule the sequence in which the facets will be ordered.
- 9.3 Citation order is always carefully detailed in number-building instructions. For example:

909.04 [History with respect to] Specific ethnic and national groups

Add to base number 909.04 notation 1–9 from Table 5, e.g., world history of Jews 909.04924; then add 0* and to the result add the numbers following 909 in 909.1–909.8, e.g., world history of Jews in 18th century 909.0492407

For a work on the world history of the Jews in the 18th century, this note stipulates the following citation order for the individual facets of the full subject: world history + specific ethnic or national group + historical period. The historical period is introduced by the *facet indicator* 0.

PREFERENCE ORDER

9.4 If there is no provision to show more than one of the aspects or characteristics, it is a matter of preference (because a choice must be made among several characteristics).

Introduction

acteristics). Preference notes supply either an instruction or table establishing the order in which to make the choice. An example of a preference instruction is found at 305.9:

People by occupation and miscellaneous social statuses; people with disabilities and illnesses, gifted people

Unless other instructions are given, class a subject with aspects in two or more subdivisions of 305.9 in the number coming last, e.g., unemployed librarians 305.9092 (*not* 305.90694)

In this case, the base subject is a group of persons; the two characteristics are employment status and occupational status. The occupation of librarian (305.9092) falls after unemployed status (305.90694) in the DDC hierarchy; following the instructions in the preference note, the characteristic that must be chosen is librarian (305.9092). (For an example of a preference instruction using a classelsewhere note, see paragraph 7.20.)

9.5 An example of a table indicating preference order is found at 305:

305 Groups of people

Unless other instructions are given, observe the following table of preference, e.g., African American male youths 305.235108996073 (*not* 305.3889607300835 or 305.896073008351):

| People with disabilities and illnesses, | |
|---|---------|
| gifted people | 305.908 |
| Age groups | 305.2 |
| People by gender or sex | 305.34 |
| People by social and economic levels | 305.5 |
| Religious groups | 305.6 |
| Ethnic and national groups | 305.8 |
| Language groups | 305.7 |
| People by occupation and miscellaneous | |
| social statuses | 305.9 |
| (except 305.908) | |

Classifiers often must distinguish between preference order instructions and the first-of two rule in the same schedule. If the work treats two subjects, apply the first-of-two rule. If the work treats two aspects of the same subject, apply the preference order instructions. When the preference order instruction is to class with the last, the first-of-two rule and the preference order instructions may lead the classifier in opposite directions. For example, a bibliography of newspapers and pamphlets giving equal treatment to each would be classed according to the first-of-two rule in 011.33 (bibliography of pamphlets) rather than 011.35 (bibliographies of newspapers). A bibliography of microform newspapers (i.e., newspapers in microform form) would be classed according to the preference note at 011.1–011.8: "Unless other instructions are given, class a subject with aspects

in two or more subdivisions of 011.1–011.8 in the number coming last ..."; thus, the bibliography of microform newspapers would be classed in 011.36 (bibliographies of microforms) rather than 011.35 (bibliographies of newspapers). (For a discussion of the first-of-two rule, see paragraph 5.7.)

The Manual

- The Manual gives advice on classifying in difficult areas, and provides guidance on choosing between related numbers.
- See-Manual references in the schedules and tables refer the classifier to the Manual for additional information about a certain number, range of numbers, or choice among numbers. In some cases, the see-Manual reference refers only to a portion of a longer Manual note, or topic narrower than the numbers in the heading, e.g., "See Manual at 930–990: Historic preservation." The see-Manual reference is repeated in the entries for each of the numbers or number spans covered in the Manual note. For example, "See Manual at 004.21 vs. 004.22, 621.392" is listed in the entries for 004.21, 004.22, and 621.392.
- 10.3 Brief Manual-like notes are sometimes given directly in the schedule or table entry. For example:

631.583 Controlled-environment agriculture

Most works on use of artificial light in agriculture will be classed in 635.0483 and 635.9826

ARRANGEMENT AND FORMAT OF THE MANUAL

- 10.4 The Manual is arranged by table and schedule numbers, with the broadest span coming before entries for narrower spans or individual numbers. Manual notes are entered under the preferred or "if-in-doubt" number. If there is no if-in-doubt number, prefer the interdisciplinary number.
- 10.5 The Manual note heading summarizes the contents of the note. The terms in the Manual note headings need not match the terms associated with the same number(s) in the tables and schedules if the note is narrower than the number, or the note refers to more than one number. For example:

510

Mathematics

510, T1—0151 vs. 003, T1—011

Systems

10.6 If the Manual note is very long, or part of the note focuses on a topic narrower than the heading, subheadings may be provided. For example:

T1-068 vs. 353-354

Public administration and management in specific fields

Exceptions

(subheading)

The Relative Index

The Relative Index is so named because it relates subjects to disciplines. In the schedules, subjects are distributed among disciplines; in the Relative Index, subjects are arranged alphabetically, with terms identifying the disciplines in which they are treated subarranged alphabetically under them. For example:

| Hospitals | 362.11 |
|----------------------------|------------|
| accounting | 657.832 2 |
| American Revolution | 973.376 |
| animal husbandry | 636.083 21 |
| architecture | 725.51 |
| armed forces | 355.72 |
| Civil War (United States) | 973.776 |
| construction | 690.551 |
| energy economics | 333.796 4 |
| institutional housekeeping | 647.965 1 |
| landscape architecture | 712.7 |
| law | 344.032 11 |
| liability law | 346.031 |
| meal service | 642.56 |
| pastoral theology | 206.1 |
| Christianity | 259.411 |
| social theology | 206.762 11 |
| Christianity | 261.832 11 |
| social welfare | 362.11 |
| World War I | 940.476 |
| World War II | 940.547 6 |
| see also Health services | |

In some cases the term implies rather than states the discipline. In the example above, the discipline of architecture is listed, but the discipline of military science is implied by "armed forces."

The Relative Index is primarily an index to the DDC as a system. It includes most terms found in the schedules and tables, and terms with literary warrant for concepts represented by the schedules and tables. The Relative Index is not exhaustive. If the term sought is not found, the classifier should try a broader term, or consult the schedules and tables directly. The schedules and tables should always be consulted before a number found in the Relative Index is applied.

ARRANGEMENT AND FORMAT OF THE RELATIVE INDEX

11.3 Index entries are arranged alphabetically word by word, e.g., Birth order precedes Birthday. Entries with the same word or phrase but with different marks of punctuation are arranged in the following order:

Term. Subheading
Term (Parenthetical qualifier)
Term, inverted term qualifier
Term as part of phrase

Initialisms and acronyms are entered without punctuation and are filed as if spelled as one word. Hyphens are ignored and treated as a space. Terms indented below the main headings are alphabetized in one group even though they may be a mixture of disciplines, topical subheadings, and, to a limited extent, words that form phrases or inverted phrases when combined with the main heading.

- 11.4 Class numbers are listed in groups of three digits for ease of reading and copying. The spaces are not part of the numbers and do not represent convenient places to abridge the number.
- 11.5 See-also references are used for synonyms and for references to broader terms (but only when three or more new numbers will be found at the synonym or broader term), and for references to related terms (which may provide only one or two new numbers).
- 11.6 See-Manual references lead the classifier to relevant discussions in the Manual.
- 11.7 Numbers drawn from Tables 1–6 are prefixed by T1 through T6. (For a complete listing of table names and abbreviations, see paragraph 7.4.)

INTERDISCIPLINARY NUMBERS

11.8 The first class number displayed in an index entry (the unindented term) is the number for interdisciplinary works. If the term also appears in a table, the table number is listed next, followed by other aspects of the term. The discipline of the interdisciplinary number may be repeated as a subentry if the discipline is not clear. For example:

| Adult education | 374 |
|-------------------------------|------------|
| | T1—071 5 |
| federal aid | 379.121 5 |
| law | 344.074 |
| public administrative support | 353.84 |
| public support | 379.114 |
| law | 344.076 85 |
| special education | 371.904 75 |
| university extension | 378.175 |
| | |

11.9 Interdisciplinary numbers are not provided for all topics in the Relative Index. They are omitted when the index entry is ambiguous, does not have a disciplinary focus, or lacks literary warrant. In such cases, there is no number opposite the unindented entry. For example:

Introduction

| Coagulation | |
|--------------------------------|-----------|
| blood | 573.159 |
| human physiology | 612.115 |
| physiology | 573.159 |
| see also Cardiovascular system | |
| water supply treatment | 628.162 2 |

(For more information on interdisciplinary numbers, see paragraphs 5.8, 7.16, 7.19–7.20.)

TERMS INCLUDED IN THE RELATIVE INDEX

11.10 The Relative Index contains most terms found in the headings and notes of the schedules and tables, and synonyms and terms with literary warrant for concepts represented by the schedules and tables. The Relative Index also contains terms for the broad concepts covered in Manual notes.

Inverted phrases are avoided, except for personal and geographic names (see paragraphs 11.12–11.13). Qualifiers are used for homonyms, ambiguous terms, and most initialisms and abbreviations. The most common use of the term may not be qualified. Disciplinary qualifiers are avoided.

- The following types of names from Table 2 Geographic Areas are included in the Relative Index: (A) names of countries; (B) names of the states and provinces of most countries; (C) names of the counties of the United States; (D) names of capital cities and other important municipalities; and (E) names of certain important geographic features.
- 11.12 Also included in the Relative Index are the personal names of the following groups of persons: heads of state used to identify historical periods, e.g., Louis XIV; founders or revealers of religions, e.g., Muhammad; initiators of schools of thought when used to identify the school, e.g., Smith, Adam.
- Place names and other proper names are generally given in the form specified by the second edition, 2002 revision, 2005 update, of the *Anglo-American Cataloguing Rules* (AACR2), based on the names established in the Library of Congress authority files. If the AACR2 form is not the common English name, an entry is also included under the familiar form of the name.

Plants and animals are indexed under their scientific and common names.

The choice of singular form versus plural form follows ISO 999:1996, *Guidelines for the content, organization and presentation of indexes*. Count nouns are generally in the plural; noncount nouns and abstract concepts are generally in the singular. Parts of the body are in the plural only when more than one occurs in a fully formed organism (e.g., ears, hands, nose). Plants and animals follow scientific convention in the choice of singular form versus plural form, with the decision based on whether the taxonomic class has more than one member (e.g., Horses, Lion, Lipizzaner horse). Where usage varies across disciplines, the index entry reflects the form preferred in the discipline where interdisciplinary works are classified.

TERMS NOT INCLUDED IN THE RELATIVE INDEX

- 11.15 Terms usually not included in the Relative Index are:
 - (A) Phrases beginning with the adjectival form of countries, languages, nationalities, religions, e.g., English poetry, French cooking, Italian architecture, Hindu prayer books.
 - (B) Phrases that contain general concepts represented by standard subdivisions such as education, statistics, laboratories, and management; e.g., Art education, Educational statistics, Medical laboratories, Bank management.

When there is strong literary warrant for such a phrase heading as a sought term, it may be included in the Relative Index, e.g., English literature. When the phrase heading is a proper name or provides the only form of access to the topic, it may also be included, e.g., English Channel, French horns, Amharic literature.

Options

- 12.1 Some devices are required to enable the DDC to serve needs beyond those represented in the standard English-language edition. At a number of places in the schedules and tables, *options* are provided to give emphasis to an aspect in a library's collection not given preferred treatment in the standard notation. In some cases, options are also suggested to provide shorter notation for the aspect.
- Options are provided throughout the Classification to emphasize jurisdiction, ethnic or national group, language, topic, or other characteristic.
- 12.3 Options described in notes appear in parentheses and begin with "Option:". Options that apply to the full entry appear at the end of the entry; options to a specific instruction in the entry are indented under the appropriate note. For example, the following option appears at the end of the entry for 420–490:

(Option B: To give local emphasis and a shorter number to a specific language, place it first by use of a letter or other symbol, e.g., Arabic language 4A0 [preceding 420], for which the base number is 4A. Option A is described under 410)

- 12.4 Some *optional numbers* are enumerated in the schedules and tables and appear in parentheses in the number column. A special optional arrangement (222)–(224) for books of the Bible as arranged in Tanakh appears as a subsection of the Manual note for 221.
- 12.5 Arrange-alphabetically and arrange-chronologically notes are not placed in parentheses, but are also options. They represent suggestions only; the material need not be arranged alphabetically or chronologically. An example of an arrange-alphabetically note is found at 005.133 Specific programming languages: "Arrange alphabetically by name of programming language, e.g., C++."
- 12.6 Some national libraries and central cataloging authorities assign a few optional numbers, e.g., Library and Archives Canada uses C810 for Canadian literature in English and C840 for Canadian literature in French.

Most of the time, the responsibility for implementing an option rests with the local library. Libraries should weigh the value of using an option against the loss in interoperability of numbers. The library will not be able to use numbers assigned by other libraries, and other libraries will not be able to use the optional numbers assigned by the library. In addition, unless the option is widely used in a region, users may be confused by the alternate notation.

Close and Broad Classification

- The Dewey Decimal Classification provides the basic option of close versus broad classification. *Close classification* means that the content of a work is specified by notation to the fullest extent possible. *Broad classification* means that the work is placed in a broad class by use of notation that has been logically abridged. For example, a work on French cooking is classed closely at 641.5944 (641.59 Cooking by place + 44 France from Table 2), or broadly at 641.5 (Cooking).
- A library should base its decision on close versus broad classification on the size of its collection and the needs of its users. For example, a work on the sociology of sibling relationships in Canadian society would be most usefully classed in 306.8750971 (306.875 Sibling relationships + 09 Geographic treatment from Table 1 + 71 Canada from Table 2) in a research library or large public library. A small school library might prefer to class the same work in the broader number (306.875) without including the geographic facet in the notation. An engineering library might prefer close classification for works in engineering, but broad classification for disciplines outside science and technology.
- 13.3 The classifier should never reduce the notation to less than the most specific three-digit number (no matter how small the library's collection). A number also must never be reduced so that it ends in a 0 anywhere to the right of the decimal point.
- One aid to logical abridgment of DDC numbers is the segmentation device provided by the Decimal Classification Division of the Library of Congress and some other centralized cataloging services.
- 13.5 The abridged edition of the Dewey Decimal Classification is another source for broad classification.

More Information

- 14.1 Classifiers desiring a more in-depth introduction to the Dewey Decimal Classification may consult *Dewey Decimal Classification: Principles and Application*, 3rd ed., by Lois Mai Chan and Joan S. Mitchell (Dublin, Ohio: OCLC, 2003).
- More information about the use and application of the DDC, plus training materials, can be found on the Dewey web site (http://www.oclc.org/dewey/) and on 025.431: The Dewey blog (http://ddc.typepad.com/).

Glossary

The Glossary defines terms used in the Introduction and throughout the schedules, tables, and Manual. Fuller explanations and examples for many terms may be found in the relevant sections of the Introduction. An index to the Introduction and Glossary follows the Glossary.

Abridged edition: A shortened version of the Dewey Decimal Classification (DDC) system that is a logical truncation of the notational and structural hierarchy of the corresponding full edition on which it is based. The abridged edition is intended for general collections of 20,000 titles or less. *See also* **Broad classification; Full edition.**

Add note: A note instructing the classifier to append digits found elsewhere in the DDC to a given base number. *See also* **Base number.**

Add table: See Tables (2).

Application: See Rule of application.

Approximate the whole: When a topic is nearly coextensive with the full meaning of a DDC class, the topic is said to "approximate the whole" of the class. The term is also used to characterize topics that cover more than half the content of a class. When a topic approximates the whole of a class, standard subdivisions may be added. Topics that do not approximate the whole are said to be in "standing room" in the number. *See also* **Class-here note; Standard-subdivisions-are-added note; Standing room.**

Area table: An auxiliary table (Table 2) that gives geographic areas primarily, but also lists historical periods and several numbers for persons associated with a subject. Areas of the world are listed systematically, not alphabetically. Area table notation may be used with other numbers in the schedules and tables when explicit instructions permitting such use are given. *See also* **Tables.**

Arrange-alphabetically note: A note suggesting the option of alphabetical subarrangement when identification by specific name or other identifying characteristic is desired. *See also* **Option**.

Arrange-chronologically note: A note suggesting the option of chronological subarrangement when identification by date is desired. *See also* **Option.**

Artificial digit: A letter or other symbol used optionally as a substitute for digits 0–9 to provide a more prominent location or shorter notation for a jurisdiction, language, literature, religion, ethnic or national group, or other characteristic. *See also* **Option**.

Aspect: An approach to a subject, or characteristic (facet) of a subject. *See also* **Discipline**; **Facet**; **Subject**.

Attraction: See Classification by attraction.

Author number: See Book number.

Base number: A number of any length to which other numbers are appended. *See also* Add note.

Book number: The part of a call number that distinguishes a specific item from other items within the same class number. A library using the Cutter-Sanborn system can have D548d indicate David Copperfield by Dickens (where D stands for the D of Dickens, 548 stands for "ickens," and d stands for David Copperfield). *See also* **Call number:** Cutter number: Work mark.

Broad classification: The classification of works in broad categories by logical abridgment, even when more specific numbers are available, e.g., the use of 641.5 Cooking instead of 641.5972 Mexican cooking for a cookbook of Mexican recipes. Broad classification is the opposite of close classification. *See also* **Abridged edition; Close classification.**

Built number: A number constructed according to add instructions stated or implied in the schedules or tables. *See also* **Number building.**

Call number: A set of letters, numerals, or other symbols (in combination or alone) used by a library to identify a specific copy of a work. A call number may consist of the class number; book number; and other data such as date, volume number, copy number, and location symbol. *See also* **Book number; Class number.**

Caption: See Heading.

Category: See Class (Noun).

Centered entry: An entry representing a subject covered by a span of numbers, e.g., 372—374 Specific levels of education. The entry is called "centered" because the span of numbers appears in the center of the page in the print version of the DDC rather than in the number column on the left side of the page. Centered entries are identified by the symbol > in the number column.

Characteristic of division: See Facet.

Citation order: The order in which two or more characteristics (facets) of a class are to be combined in number building. When number building is not permitted or possible, instructions on preference order with respect to the choice of facets are provided. *See also* Facet; Number building; Preference order.

Class: (Noun) A category in the DDC formed on the basis of one or more characteristics and represented by a number. Classes explicitly provided in the tables and schedules are accompanied by a description consisting of a heading and often one or more notes. *See also* Division; Entry (1); Main class; Section; Subdivision. (Verb) To assign a class number to an individual work. *See also* Classify.

Class-elsewhere note: A note instructing the classifier about the location of interrelated topics. The note may show preference order, lead to the interdisciplinary or comprehensive number, override the first-of-two rule, or lead to broader or narrower numbers in the same hierarchical array that might otherwise be overlooked. See also Comprehensive number; Interdisciplinary number; Preference order.

Class-here note: A note that identifies topics that are equivalent to the whole of the class under which the note appears. The topic as a whole is classed in the number under which the note appears; parts of the topic are classed in the most appropriate subdivision of the number. Topics identified in class-here notes, even if broader or narrower than the heading, are said to "approximate the whole" of the number; therefore, stan-

dard subdivisions may be added for topics in class-here notes. Class-here notes also may identify the comprehensive or interdisciplinary number for a subject. *See also* **Approximate the whole; Comprehensive number; Interdisciplinary number.**

Class number: Notation used to represent a class in the DDC. See also Call number; Notation.

Classification: A logical system for the arrangement of knowledge.

Classified catalog: A catalog arranged according to the notational order of a classification system.

Classify: (1) To arrange a collection of items according to a classification system. (2) To assign a class number to an individual work.

Close classification: The classification of works to the fullest extent permitted by the notation. Close classification is the opposite of broad classification. See also Broad classification; Full edition.

Coextensive: Describes a topic equal in scope to the concept represented by the number.

Comparative table: A table provided for a complete or extensive revision that lists in alphabetical order selected topics accompanied by their number in the previous edition and their number in the current edition. *See also* **Equivalence table; Revision.**

Complete revision: See Revision (Complete revision).

Complex subject: A complex subject is a subject that has more than one characteristic. For example, "unemployed carpenters" is a complex subject because it has more than one characteristic (employment status and occupation). *See also* **Preference order.**

Comprehensive number: A number (often identified by a "Class here comprehensive works" note) that covers all the components of the subject treated within that discipline. The components may be in a span of consecutive numbers or distributed throughout the schedule or table. *See also* **Interdisciplinary number.**

Concept: An idea represented in full or part by a class.

Coordinate: Describes a number or topic at a level equal to another number or topic in the same hierarchy.

Cross classification: The accidental placement of works on the same subject in two different class numbers. This tends to happen when works being classified deal with two or more characteristics of a subject in the same class. Notes on preference order should prevent cross classification. See also **Preference order**.

Cross reference: See Class-elsewhere note; See-also reference; See reference.

Cutter number: The notation in a book number derived from the Cutter Three-Figure Author Table, the Cutter-Sanborn Three-Figure Author Table, or the OCLC Four-Figure Cutter Tables. The OCLC Four-Figure Cutter Tables are revised and expanded versions of the Cutter Three-Figure Author Table and the Cutter-Sanborn Three-Figure Author Table. See also **Book number.**

DDC: Dewey Decimal Classification.

DDC Summaries: A listing of the first three levels (main classes, divisions, and sections) of the Dewey Decimal Classification system. The headings associated with the num-

- bers in the summaries have been edited for browsing purposes, and may not match the complete headings found in the schedules. *See also* **Division**; **Main class**; **Section**; **Summary.**
- **Decimal point:** The dot that follows the third digit in a DDC number. In strict usage the word "decimal" is not accurate; however, common usage is followed in this edition's explanatory material.
- **Definition note:** A note indicating the meaning of a term in the heading.
- **Digit:** The smallest individual unit in a notational system. For example, the notation 954 has three digits: 9, 5, and 4.
- **Discipline:** An organized field of study or branch of knowledge, e.g., 200 Religion, 530 Physics, 364 Criminology. In the DDC, subjects are arranged by disciplines. *See also* **Subject.**
- **Discontinuation:** The shifting of a topic or the entire contents of a number to a more general number in the same hierarchy, or the complete removal of the topic or number. A topic or number is discontinued because the topic or concept represented by the number has a negligible current literature or represents a distinction that is no longer valid in the literature or common perception of the field. A note explaining its shift or removal accompanies a discontinued topic or number. Discontinued numbers appear in square brackets. *See also* **Relocation**; **Schedule reduction**.
- **Displaced standard subdivision:** A standard subdivision concept moved to a special provision in the schedule in place of its regular notation from Table 1. A do-not-use note is always provided at the regular location of the standard subdivision concept. *See also* **Do-not-use note:** Standard subdivisions.
- **Division:** The second level of subdivision in the DDC, represented by the first two digits in the notation, e.g., 64 in 640 Home and family management. *See also* **DDC Summaries**; **Main class**; **Section.**
- **Do-not-use note:** A note instructing the classifier not to use all or part of a regular standard subdivision notation, but instead to use a special provision or standard subdivision notation at a broader number. Also used to instruct the classifier not to use all or part of an add table provision, but instead to use a special provision. *See also* **Displaced standard subdivision.**
- **Document:** A generic term for all media capable of conveying, coding, and preserving knowledge. Documents may be books, journals, electronic resources, reports, sound recordings, motion pictures, etc.
- **Dual provision:** The inadvertent provision of more than one place in the DDC for the same aspect of a subject.
- Entry: (1) In the schedules and tables, a self-contained unit consisting of a number or span of numbers, a heading, and often one or more notes. (2) In the Relative Index, a term or phrase usually followed by a DDC number. (3) In the Manual, a self-contained unit consisting of a number or group of numbers, the associated headings or topics, and an extended instruction or discussion.
- **Enumerative scheme:** A classification system in which numbers for complex subjects are precombined and listed.

- **Equivalence table:** A table provided for a complete or extensive revision that lists in numerical order the classes of the current edition with their equivalent numbers in the previous edition (and vice versa). See also **Revision**.
- **Expansion:** The development of a class in the schedules or tables to provide further subdivisions. *See also* **Revision.**
- Extensive revision: See Revision (Extensive revision).
- **Facet:** Any of the various categories into which a given class may be divided, e.g., division of the class "people" into the categories of ethnicity, age, education, and language spoken. Each category contains terms based on a single characteristic of division, e.g., children, adolescents, and adults are characteristics of division of the "ages" category. See also Citation order.
- **Facet indicator:** A digit used to introduce notation representing a characteristic of the subject. For example, "0" is often used as a facet indicator to introduce standard subdivision concepts.
- **First-of-two rule:** The rule instructing that works dealing equally with two subjects that are not used to introduce or explain one another are classed in the number coming first in the schedules or tables.
- **Footnote:** An instruction that applies to many subdivisions of a class, or to a topic within a class. The affected subdivision or topic is marked with a symbol such as an asterisk. In the print version of the DDC, the footnote is located at the bottom of the page. In the electronic version, the footnote is included in the notes section of each class to which the instruction applies.
- **Former-heading note:** A note listing the heading associated with the class number in the previous edition. The note is used when the heading has changed so much that it bears little or no resemblance to the previous heading, even though the meaning of the number has remained substantially the same.
- Full edition: The complete version of the Dewey Decimal Classification (DDC) system. See also Abridged edition; Close classification.
- **Heading:** The word or phrase used as the description of a given class. Also called "caption."
- **Hierarchical force:** The principle that the attributes of a class as defined in the heading and in certain basic notes apply to all the subdivisions of the class, and to all other classes to which reference is made.
- **Hierarchy:** The arrangement of a classification system from general to specific. In the DDC, the length of the notation and the corresponding depth of indention of the heading usually indicate the degree of specificity of a class. See references and centered entries are used to indicate exceptions to the notational hierarchy. See also Centered entry; See reference.
- **Hook number:** A number in the DDC without meaning in itself, but used to introduce examples of the topic. Hook numbers have headings that begin with "Miscellaneous," "Specific," or "Other"; and do not contain add notes, including notes, or class-here notes. Standard subdivisions are always bracketed under hook numbers.

- **Including note:** A note enumerating topics that are logically part of the class but are less extensive in scope than the concept represented by the class number. These topics do not have enough literature to warrant their own number. Standard subdivisions may not be added to the numbers for these topics. *See also* Literary warrant; Standing room.
- **Indention:** Typographical setting of notes and subheadings below and to the right of the main entry term.

Influence: See Rule of application.

- **Interdisciplinary number:** A number (often identified by a "Class here interdisciplinary works" note) to be used for works covering a subject from the perspective of more than one discipline, including the discipline where the interdisciplinary number is located, e.g., the interdisciplinary number for marriage is 306.81 in Sociology. *See also* **Comprehensive number.**
- **Literary form:** A mode of literary expression such as poetry, drama, fiction, etc. Each form can be subdivided into kinds of forms, e.g., lyric poetry, comedy, science fiction, etc.
- **Literary warrant:** Justification for the development of a class or the explicit inclusion of a topic in the schedules, tables, or Relative Index, based on the existence of a body of literature on the topic.
- Main class: One of the ten major subdivisions of the DDC, represented by the first digit in the notation, e.g., 3 in 300 Social sciences. See also DDC Summaries; Division; Section.
- **Manual:** A guide to the use of the DDC that is made up primarily of extended discussions of problem areas in the application of the DDC. In the schedules and tables, see-Manual references indicate where relevant discussions are located in the Manual. See also **Manual note**.
- Manual note: An individual entry in the Manual. See also Entry (3); Manual; See-Manual reference.
- **Notation:** Numerals, letters, and/or symbols used to represent the main and subordinate divisions of a classification scheme. In the DDC, Arabic numerals are used to represent the classes, e.g., notation 07 from Table 1 and 511.3 from the schedules. *See also* **Class number.**

Notational synthesis: See Number building.

- Note: An instruction, definition, or reference that explains the contents and use of a class, or the relationship of the class to other classes. See also Add note; Arrange-alphabetically note; Arrange-chronologically note; Class-elsewhere note; Class-here note; Definition note; Discontinuation; Do-not-use note; Footnote; Former-heading note; Including note; Manual note; Number-built note; Preference order; Relocation; Revision note; Scope note; See-also reference; See-Manual reference; See reference; Standard-subdivisions-are-added note; Subdivisions-are-added note; Variant-name note.
- **Number building:** The process of constructing a number by adding notation from the tables or other parts of the schedules to a base number. Also called "notational synthesis." *See also* **Base number; Citation order.**

Number-building note: See Add note.

Number-built note: A note that states where the number building instructions may be found for a built number that is explicitly listed in the schedules or tables. Typically, such built numbers are listed for two reasons: to provide an entry for a built number under which other notes are required; or to provide an entry for a three-digit built number.

Number column: In the print version of the DDC, the column of numbers that appears in the left margin of the schedules and tables, and to the right of the alphabetical entries in the Relative Index.

Option: An alternative to standard notation provided in the schedules and tables to give emphasis to an aspect in a library's collection not given preferred treatment in the standard notation. In some cases, an option may provide shorter notation for the aspect. *See also* **Optional number.**

Optional number: (1) A number listed in parentheses in the schedules or tables that is an alternative to the standard notation. (2) A number constructed by following an option. *See also* **Option.**

Order of preference: See Preference order.

Period table: A table giving chronological time periods with their notation. For many literatures, period tables are given in the schedules. For works not limited to a particular language, the period notation is taken from Table 1 —0901–0905. *See also* **Tables.**

Phoenix schedule: See Revision (Complete revision).

Preference order: The order indicating which one of two or more numbers is to be chosen when different characteristics of a subject cannot be shown in full by number building. A note (sometimes containing a table of preference) indicates which characteristic is to be selected for works covering more than one characteristic. When a notation can be synthesized to show two or more characteristics, it is a matter of citation order. *See also* **Citation order.**

Preference table: See Preference order.

Prime marks: See Segmentation.

Reduction of schedules: See Schedule reduction.

Regularization: The replacement of special developments for standard subdivision concepts by use of the regular standard subdivisions found in Table 1.

Relative Index: The index to the DDC. It is called "Relative" because it shows the connection between subjects and the disciplines in which they appear. In the schedules, subjects are arranged within disciplines. In the Relative Index, subjects are listed alphabetically. Under each subject, the disciplines in which the subject is found are listed alphabetically. In the print version of the DDC, the disciplines are indented under the subject. In the electronic version, the disciplines appear as subheadings associated with the subject.

Relocation: The shifting of a topic from one number to another number that differs from the old number in respects other than length. Notes at both ends of the relocation identify the new and former numbers. See also **Discontinuation.**

- **Retroactive citation order:** In number building, the combination of characteristics (facets) of a class starting with a number coming later in the schedule as the base number, then adding as instructed from numbers earlier in the sequence.
- **Reused number:** A number with a total change in meaning from one edition to another. Usually numbers are reused only in complete revisions or when the reused number has been vacant for two consecutive editions.
- Revision: The result of editorial work that alters the text of any class of the DDC. There are three degrees of revision: Routine revision is limited to updating terminology, clarifying notes, and providing modest expansions. Extensive revision involves a major reworking of subdivisions but leaves the main outline of the schedule intact. Complete revision (formerly called a phoenix) is a new development; the base number remains unchanged from the previous edition, but virtually all subdivisions are changed. Changes for complete and extensive revisions are shown through comparative and equivalence tables rather than through relocation notes in the schedule or table affected. See also Comparative table; Equivalence table.

Revision note: A note that introduces a complete or extensive revision.

Routine revision: See Revision (Routine revision).

- **Rule of application:** The rule instructing that works about the application of one subject to a second subject or the influence of one subject on another subject are classified with the second subject.
- **Rule of three:** The rule instructing that works giving equal treatment to three or more subjects that are all subdivisions of a broader subject are classified in the first higher number that includes all of them.
- **Rule of zero:** The rule instructing that subdivisions beginning with zero should be avoided if there is a choice between the 0 subdivision and subdivisions beginning with 1–9 in the same position in the notation. Similarly, subdivisions beginning with 00 should be avoided when there is a choice between 00 and 0.
- **Scatter note:** A class-elsewhere, see-reference, or relocation note that leads to multiple locations in the DDC. *See also* Class-elsewhere note; Relocation; See reference.
- **Schedule reduction:** The elimination of certain provisions of a previous edition, often resulting in discontinued numbers. *See also* **Discontinuation.**
- **Schedules:** (1) Listings of subjects and their subdivisions arranged in a systematic order with notation given for each subject and its subdivisions. (2) The series of DDC numbers 000–999, their headings, and notes.
- **Scope note:** A note indicating that the meaning of a class number is broader or narrower than is apparent from the heading.
- Section: The third level of subdivision in the DDC, represented by the first three digits in the notation, e.g., 641 in 641 Food and drink. See also DDC Summaries; Division; Main class.
- **See-also reference:** (1) In the schedules and tables, a note leading to classes that are tangentially related to the topic and therefore might be confused with it. (2) In the Relative

- Index, a note leading to a synonym, broader term, or related term. (3) In the Manual, a note leading to related Manual notes.
- **See-Manual reference:** A note leading from an entry in the schedules or tables to additional information about the number in the Manual.
- **See reference:** A note (introduced by the word "for") that leads from the stated or implied comprehensive or interdisciplinary number for a subject to component parts of the subject in numbers other than direct subdivisions of the original number or span. *See also* **Class-elsewhere note.**
- **Segmentation:** The indication of logical breaks in a number by a typographical device, e.g., slash marks or prime marks. Segmentation marks indicate the end of an abridged number.
- Shelf mark: See Call number.
- **Standard subdivisions:** Subdivisions found in Table 1 that represent frequently recurring physical forms (dictionaries, periodicals) or approaches (history, research) applicable to any subject or discipline. They may be used with any number in the schedules and tables for topics that approximate the whole of the number unless there are instructions to the contrary. *See also* **Tables.**
- **Standard-subdivisions-are-added note:** A note indicating which topics in a multiterm heading may have standard subdivisions added to them. The designated topics are considered to approximate the whole of the number. *See also* **Approximate the whole.**
- **Standing room:** A term characterizing a topic without sufficient literature to have its own number, and considerably narrower in scope than the class number in which it is included. Standard subdivisions cannot be added to a topic in standing room, nor are other number-building techniques allowed. Topics listed in including notes have standing room in the class number, as do minor unnamed topics that logically fall in the same place in the DDC. To have standing room is the opposite of approximating the whole. *See also* **Approximate the whole.**
- **Subdivision:** (1) A subordinate member of a class, e.g., 518 Numerical analysis is a subdivision of class 510 Mathematics, and 518.5 Numerical approximation is a subdivision of 518. See also Class (Noun). (2) Notation that may be added to other numbers to make a class number appropriately specific to the work being classified. See also **Standard Subdivisions**; **Tables**.
- **Subdivisions-are-added note:** A note used where subdivisions are provided by add instructions indicating which topics in a multiterm heading may have subdivisions added to them. The designated topics are considered to approximate the whole of the number. *See also* **Approximate the whole.**
- **Subject:** An object of study. Also called topic. It may be a person or a group of persons, thing, place, process, activity, abstraction, or any combination of these. In the DDC, subjects are arranged by disciplines. A subject is often studied in more than one discipline, e.g., marriage is studied in several disciplines such as ethics, religion, sociology, and law. *See also* **Discipline.**

Subject catalog: An index to the contents of a collection. If access is provided alphabetically by words, it is called an alphabetical subject catalog. If access is provided by the notation of a classification system, it is called a classified catalog. *See also* **Classified catalog.**

Subordinate: Describes a number or topic at a lower (narrower) level than another number or topic in the same hierarchy. *See also* **Superordinate.**

Summary: A listing of the chief subdivisions of a class that provides an overview of its structure. *See also* **DDC Summaries**.

Superordinate: Describes a number or topic at a higher (broader) level than another number or topic in the same hierarchy. *See also* **Subordinate.**

Synthesis of notation: See Number building.

Table of preference: See Preference order.

Tables: In the DDC, lists of notation that may be added to other numbers to make a class number appropriately specific to the work being classified. The numbers found in a table are never used alone. There are two kinds of tables: (1) The six numbered auxiliary tables (Tables 1–6) representing standard subdivisions, geographic areas, languages, ethnic groups, etc. (2) Lists of special notation found in add notes under specific numbers throughout the schedules and occasionally in Tables 1–6. These lists are called add tables. *See also* **Add note.**

Terminal zero: The one or two zeros appended to the notation for a division or main class to form a three-digit number. A single zero is added to the two-digit notation for a division to form a three-digit number, e.g., 51 + 0 = 510 Mathematics. Two zeros are added to the single-digit notation for a main class to form a three-digit number, e.g., 5 + 00 = 500 Science. See also **Division; Main class.**

Topic: See Subject.

Unabridged edition: See Full edition.

Variant-name note: A note listing synonyms or near synonyms for a topic in a heading when it is awkward or inappropriate to include such information in the heading.

Word-by-word alphabetization: Refers to the filing of entries word by word, not letter by letter. For example, New York files before Newark in word-by-word alphabetization; Newark files before New York in letter-by-letter alphabetization.

Work: A distinct intellectual or artistic creation.

Work mark: The part of a book number that consists of a letter appended to the author (or biographee) designation to show the first letter of the title (or first letter of the surname of the biographer). See also **Book number.**

Index to the Introduction and Glossary

References to the Introduction are identified by paragraph numbers. References to the alphabetically arranged Glossary are identified by G.

Manual

Notes on Table Numbers

Table 1. Standard Subdivisions

T1-01

Philosophy and theory

The term philosophy and theory is treated as a single concept, covering the general or abstract principles applied to a field of activity or thought, such as science or art. Use T1—01 for a work discussing the discipline itself as a discipline, rather than its subject matter. Do not use T1—01 where theory constitutes the bulk of the subject matter of a field, e.g., nuclear physics. In philosophy subdivisions of 100, T1—01 itself is seldom used, though its subdivisions may be, and then only in the sense of theory and method of the topic.

Criticism

Use T1—01 for techniques and principles of criticism of a discipline. However, class the criticism itself in the same number as the subject of the criticism, e.g., criticism of Browning's poetry 821.8, of Frank Lloyd Wright's architecture 720.92, of Italian cooking 641.5945.

T1-015 vs. T1-0245-0246

Scientific principles vs. The subject for people in scientific and technological occupations

Use the number for the technology plus notation 015 from Table 1 for the scientific principles of a technology, e.g., mathematical principles of engineering 620.00151. In such cases the table of contents will often be organized by concepts found in subdivisions of the technology or will follow the table of contents found in common treatises on the technology. Conversely, use the number for the science plus notation 024 from Table 1 for the science if the work is written for technologists and engineers, e.g., mathematics for engineers 510.2462. In such cases the table of contents will be organized by concepts found in subdivisions of the science or will follow the table of contents found in common treatises on the science. If in doubt between science and technology, prefer the technology number.

When not to use either subdivision

Do not use T1—015 and T1—024 in 500 and 600 when there is a direct relationship between a science and a corresponding technology, e.g., do not use 540.2466 for chemistry for chemical engineers, or 660.0154 for chemical principles in chemical engineering.

Humor, satire, jokes

Any subject may be dealt with in a humorous or satirical manner. Use the number for the subject without T1—0207 for works where the humor involved is entirely

incidental to the serious treatment of the subject, e.g., a joke inserted into a lecture to provide respite from a serious mood. Use the number for the subject plus notation 0207 from Table 1 for works where the author's intention is serious, but where humor or satire is used to convey the author's message, e.g., political satire grounded in genuine political criticism. Use numbers in literature, usually T3B—802 (or T3A—8 + 02 or T3B—8 + 02), only for works where the subject merely provides the occasion for humor, the author's primary concern being to amuse, e.g., a collection of jokes about cats. If in doubt between literature and the subject, prefer the subject. If in doubt whether to use T1—0207, prefer the subject without it.

Use T3B—802 (or T3A—8 + 02 or T3B—8 + 02) for jokes; use T3B—807 (or T3A—8 + 07 or T3B—8 + 07) for humorous literary works without identifiable literary form. Use T3B—7 only for collections of humor or satire in more than one literary form, including both verse and prose. (Class works in a particular literary form, e.g., drama or fiction, with the form; class works in multiple forms of literary prose with prose.)

T1-0222 vs. T1-0223

Pictures and related material vs. Maps, plans, diagrams

Use T1—0222 for charts that are basically pictures of things, T1—0223 for charts that are basically maps or diagrams. Use T1—0222 for designs that give a visual impression of what something does or will look like, e.g., architectural drawings; use T1—0223 for designs that show details on horizontal or vertical planes (often as a preliminary to construction), or the arrangement and relations of parts showing how something works. Use T1—0223 for atlases, which are usually compilations of maps, plans, or diagrams, unless they are compilations of pictorial material. Use T1—0222 for anatomical atlases, which are usually picture-like. Use 001–999 without adding either standard subdivision for atlases that are simply heavily illustrated texts on a subject.

Use T1—0222 for comprehensive works, e.g., architectural drawings and plans 720.222. If in doubt between T1—0222 and T1—0223, prefer T1—0222.

T1 - 024

The subject for people in specific occupations

Use T1—024 for works that emphasize special instructions for people in specific occupations that general readers would not find useful, e.g., mathematics for engineers 510.2462. Do not use T1—024 for works that draw examples from one broad discipline or for one kind of professional user, but effectively cover the subject for the general reader, e.g., use 616.12 (not 616.12002461073) for a textbook on cardiology for nurses that would be equally useful to patients, relatives, or social workers.

Do not use T1—024 when it is redundant, that is, when it is directed towards people who would typically be expected to study the subject, e.g., engineering for engineers 620 (not 620.002462).

T1-025 vs. T1-029

Directories of enterprises and products

Use T1—025 for directories that describe business enterprises in a manner that serves people who run businesses; who invest in or lend money to businesses; or who want to sell ideas, products, and services to businesses. These directories typically emphasize organization, officers, and financial information. Use T1—029 for directories and catalogs designed to help customers obtain or evaluate products and services. If in doubt, prefer T1—025.

Directories of business and related enterprises

The guidelines in this section apply to directories that concentrate on enterprises and provide significant information about their organization, and sometimes also their officers, finances, and line of work. Use T1—025 with numbers from 001–999 for directories of persons and organizations that do not concentrate on enterprises, or that simply supply their names, addresses, and contact persons.

Limited to specific industries

Use T1—025 with subdivisions of 338.76 and related numbers for directories of enterprises in specific industries that emphasize organization, officers, and financial information. Related numbers are subdivisions of 338.8 that are divided by industry for business combinations; 332.1—6 for financial institutions; 333.33 for real estate businesses; 334 for cooperative enterprises; 368 for insurance enterprises; and 380 for enterprises engaged in commerce, communications, and transportation.

Because "organization" is a basic element of 338.76 and related numbers, the guidelines in the Manual note T1—025 vs. T1—0601–0609 do not apply. Use notation 025 from Table 1 with these numbers for listings of companies, even if there is significant general information on the companies.

In most cases, the arrangement of a directory by enterprises points to use of T1—025 with subdivisions of 338.76 and related numbers, unless there is a predominance of detail on products and services. In that case, use T1—029 as instructed below. If in doubt, however, prefer T1—025.

Not limited to specific industries

Use T1—025 with 338.7, 338.8, and their general subdivisions (those not limited to specific industries) for directories of enterprises that are not limited to a specific industry, e.g., directories of all business enterprises in France 338.702544, directories of multinational enterprises 338.88025.

Use 338.74025 only for directories explicitly limited to corporations. If the limitation is not explicitly stated, prefer 338.7025.

Use 338.767025 for directories of manufacturers that give financial and organizational information.

Use T1—025 with numbers in 381–382 for directories of merchants. Use 381.025 and 382.025 for chambers of commerce and boards of trade, even when the membership includes a wide cross section of business enterprises in an area.

Use T1—025 with numbers in 914–919 for telephone, city, and fax directories, and for business white pages (telephone directories largely limited to businesses) and yellow pages that are issued with general directories of people and organizations in an area. Use 338.7025, however, for business white pages and comprehensive fax directories of businesses that are not produced in connection with a directory of all people and organizations, and 338.02029 for yellow pages that are not produced in connection with a directory of all people and organizations.

Product and service directories and catalogs

Product and service directories may go by a variety of names, including trade catalogs and yellow pages. Yellow pages are usually not limited by specific industries. The guidelines in this section also apply to buyers' guides and consumer reports.

Limited to specific industries

Use T1—029 with numbers from 001–999 (other than 338.47 and related numbers) for directories of products and services in specific industries, e.g., information services 025.04029, chemical products of United States 660.02973, food and drink in Europe 664.00294. In all cases, use the number that represents making the products or producing the services, except when they are produced by three or more industries serving a single consumer industry. In such cases, use the number for the consumer industry, e.g., a directory of publishers, binders, and furniture makers serving libraries 020.29.

Not limited to specific industries

Use 338.4029 for wide-ranging product directories that emphasize products of secondary industries, or services and products of secondary industries. Use 338.02029 for wide-ranging directories that cover everything from farm produce and minerals to the output of secondary industries. If in doubt, prefer 338.4029.

Use 338.4029 (not 670.29) for directories of manufactured products, as they are then usefully classed with other comprehensive or wide-ranging directories.

Use 338.4700029 for comprehensive directories of services.

T1-025 vs. T1-0601-0609

Directories of persons and organizations vs. Organizations

Use T1—025 for works covering several or many organizations containing directory information, even if not called directories, i.e., works that supply addresses, key officers or contact people, phone numbers, and brief statements of purpose. These works may include directory information about component parts of individual organizations, and/or a limited amount of general information on structure and component parts. However, use T1—06 if there is significant general information (more than a page) per organization. Use T1—0601–0609 for works covering history, charters, regulations, membership lists, and administrative reports of an organization, and also for conference programs of an organization and organizational handbooks.

Use T1—06 for a combined organizational handbook and membership directory, even if the membership part predominates. However, use T1—025, plus the Table 2

notation for the area that the organization serves, if the organizational part consists of only a few preliminary pages followed by an extensive directory of members.

Use T1—025 for a membership list that includes addresses, as that is counted as a directory.

If in doubt, prefer T1—025.

See also discussion at T1—025 vs. T1—029.

T1--0285

Computer applications

Use T1—0285 for comprehensive works on data processing applied to a subject. Also use T1—0285 if 004 is the interdisciplinary number for the applied concept, e.g., digital computers T1—0285. Do not use T1—02854 by itself, since the digit 4 simply repeats the meaning of notation 0285. However, it is not redundant to add to T1—0285 the notation for subdivisions of 004, e.g., digital personal computers T1—0285416.

Do not add the digit 4 by itself to a number divided like 004–006 if the base number is limited to data processing and computer concepts, e.g., 651.8, 658.05.

Electronic resources and programs

Use T1—028553 for programs themselves and for works about programs, regardless of form (e.g., programs in electronic form, printed program listings bound into books). Do not use T1—0285 to indicate that a work is in electronic form, e.g., use 310 (not 310.285) for electronic census data.

Do not use T1—028553 for items that include both programs and data files, unless the data files are clearly of minor importance, e.g., small files intended merely to help beginners learn to use the programs.

If in doubt, do not use T1—028553.

T1-0601-0609

Organizations

Use subdivisions in T1—0601–0609 primarily for membership organizations and associations, but also for a selection of nonmembership institutions, foundations, and agencies that do not belong to the categories listed in class-elsewhere notes under T1—0601–0609. However, do not use T1—06 for nonmembership organizations if "organization" is inherent in the subject. For example, except as indicated below, do not use T1—06 with most subdivisions in 360 for social services. Under such numbers, use T1—09 for the basic organizations in specific areas, and for specific basic organizations, e.g., hospitals in China 362.110951. However, use T1—06 for associations that include the basic organizations and their staffs as members, e.g., hospital associations in China 362.1106051.

Use T1—06 also for administrative (in contrast to service) histories of institutions, e.g., administrative histories of hospitals (362.1106) or police agencies (363.206).

Do not confuse these histories with how-to works on management, which are classed in T1—068.

Do not use T1—06 for membership organizations if "membership organization" is inherent in the subject, e.g., in 366 Associations or 061–068 General organizations. T1—06 is not used with numbers for a religion because of the ambiguity of membership organization in religion, e.g., 296.06 is bracketed, and a reference leads to 296.67 where membership is inherent in the organization number.

Selection of area number

For membership organizations, use the area that is the chief focus of the membership, e.g., American Medical Association 610.6073. For local affiliated associations or chapters that have their own name, use the area number of the local organization, e.g., Massachusetts Medical Association 610.60744. For offices and chapters that take the name of the parent body, use the number of the parent organization, e.g., the Washington office of the American Medical Association 610.6073 (not 610.60753).

For nonmembership organizations, institutions, foundations, and conferences, use the area number of the headquarters. Also use the number of the headquarters for membership organizations whose area cannot be determined.

T1--068

Management

The subdivisions of T1—068 parallel the subdivisions of 658. Use 658 as a guide to selecting the correct subdivision of T1—068, e.g., information management 658.4038, therefore information management applied to automobile manufacturing 629.2220684.

T1-068 vs. 353-354

Public administration and management in specific fields

Use numbers outside 350–354 plus notation 068 from Table 1 for the management or administration of organizations, public or private, that directly perform the work within their scope. Use numbers in 353–354 for agencies that regulate, control, or support organizations that provide the actual services. For example, use 363.2068 (not 353.36216) for management of city police departments; use 364.62068 (not 353.39) for management of parole boards; use 385.068 (not 354.767) for management of a nationalized railway system.

A given field may have both public administration and management aspects. For example, use 385.068 for managing railroads, but use 354.76728 for managing agencies that regulate railroads; use 025.1974 for administering public libraries, but use 353.73 for administering agencies that support public libraries.

Exceptions

Use 353–354 for administration of activities specific to government (such as licensing, taxing, and gathering census information, that is, activities found in 352 that are not also found in 658) when applied to specific fields of public administration.

Foreign affairs are among the few major activities for which administration of an actual operation is classed in 353–354. Use 353.13 (*not* 327.068 or numbers in 327.3–.9, plus notation 068 from Table 1) for foreign affairs management. Similarly, use 353.17 (*not* 327.12068 or numbers in 327.123–.129 plus notation 068 from Table 1) for foreign intelligence management.

If in doubt, prefer the number outside public administration.

T1-072 vs. T1-0601-0609

Research vs. Organizations

Use T1—072 for organizations that conduct research, e.g., agricultural research stations in the United States 630.72073; but use T1—06 for membership organizations that primarily promote research, e.g., the American Association for the Advancement of Science 506.073. If in doubt, prefer T1—072.

See also discussion at T1-07201-07209 vs. T1-0721.

T1-07201-07209 vs. T1-0721

Geographic treatment of research vs. Research methods

Use the geographic treatment span for works on research in progress or being planned, or for works that consist of general descriptions of research projects and do not emphasize the research method. Also use the geographic treatment span for works on research organizations that perform or sponsor all or most of the research in their fields, even if they have names like agricultural experiment stations.

Do not use notation for a specific research method when it is redundant, e.g., historical research in history, experimental research in an experimental science such as chemistry.

However, use T1—0723 for surveys and data collection projects that concentrate on specific areas and concentrate on a single survey rather than on a number of projects.

If in doubt, prefer T1—07201–07209.

T1-074 vs. T1-029

Museums, collections, exhibits vs. Commercial miscellany

Use T1—074 for catalogs whose primary purpose is to promote knowledge or art, such as catalogs of collections; use T1—029 for catalogs whose primary purpose is to promote sale or distribution of products. Use T1—074 for catalogs of replicas, duplicates, and minor items when offered for sale in museum- or exhibit-like settings by noncommercial institutions. Also use T1—074 for auction catalogs (e.g., in art), and for catalogs of temporary exhibits of groups of artists, even if a succession of such exhibits provides most of the artists with their primary source of income. If in doubt, prefer T1—074.

T1-08 and 306.2-.6

Cultural institutions and groups of people

Use the interdisciplinary number for a topic pertaining to a cultural institution plus notation 08 from Table 1 for works on groups of people in relation to a cultural institution, e.g., racism in sports 796.089 (not 306.483), women in science 500.82 (not 306.45), police discrimination against minorities 363.208 (not 306.28). If the interdisciplinary number for the cultural institution falls in 306.2–.6, use the number for the institution or related topic plus notation 08 from Table 1, e.g., discrimination against retired women 306.38082.

T1-081 and T1-08351, T1-08352, T1-08421, T1-08422

Men and women, Males twelve to twenty and females twelve to twenty, Young men and young women

Use subdivisions for men and women only if the works explicitly emphasize the sex of the people treated. For example, do not use 363.370811 for men as a group with respect to fire fighting unless the work makes clear that *male* fire fighters are being contrasted with *female* fire fighters, or 364.3608351 for juvenile delinquents (a term often implying young men under eighteen) unless *male* delinquents are being contrasted to *female* delinquents.

T1-0882 and 200

Religious groups and Religion

Use subdivisions of T1—0882 in 200 to represent official or semiofficial positions of denominations and sects, e.g., Catholic teachings on socioeconomic problems 261.8088282.

Do not use T1—0882 for works of an individual except in the rare cases in which an individual's view has become an official statement of a group. That is, use 261.8 (not 261.8088282) for writings on Christian attitudes towards socioeconomic problems by persons who happen to be Catholic.

T1-09

History and geographic treatment of subjects and disciplines

Different numbers are occasionally provided for the history and geographic treatment of a subject and for the history and geographic treatment of the discipline within which the subject is treated, e.g., 364.9 is provided for history and geographic treatment of crime and its alleviation, while 364.09 is provided for comparable treatment of criminology. Use 364.9 for geographic treatment of offenses, offenders, causes, prevention, and treatment (when all are considered together). Use 364.09 for geographic treatment of criminology and of the principles and methods used in analyzing causes and remedies of crime. If in doubt, prefer the number for the history and geographic treatment of the subject.

Use T1—09 for either or both aspects where the distinction is not made between the subject and the discipline.

T1-09 vs. T1-089

History, geographic treatment, biography vs. Ethnic and national groups

Use T1—09, not T1—089, to identify distinguishing characteristics of a subject in an area where a specific group of people lives, e.g., Arab architecture 720.9174927 (not 720.89927); French desserts 641.860944 (not 641.8608941).

Regions where specific ethnic groups predominate

Do not use T1—09174 (regions where specific ethnic groups predominate) for treatment as groups of people since such use would practically duplicate the ethnic group numbers. For example, Arabs living in all areas where Arabs predominate constitute the overwhelming majority of all Arabs; therefore, use T1—089927 for treatment of Arabs as a group, and use T1—09174927 only for works about the area where they live, and works about styles prevailing in areas where they live.

T1--0901-0905

Historical periods

Do not use historical periods for subjects that have no significant history outside the period indicated, e.g., the history of railroads 385.09 (*not* 385.0903), but the history of railroads during the 19th century 385.09034. If in doubt, do not use periods.

Do not use the most recent period subdivision for works on current practice or the state of the art of a subject, since most users will expect to find these works in the base number. However, use the latest period number when the nature of the subject requires attention to the changing situation, e.g., 320.90511 for world political conditions in 2000–2009.

Use earlier historical periods only for retrospective works, not for contemporary works. For example, use 781.09032 for a current work on music theory of the baroque, but use 781 for a reprint of a treatise on music theory written in 1620 (when baroque music was in style).

T1-092

Biography

The following instructions apply also to notation 2 from Table 2 when numbers from Table 2 are added directly without the interposition of T1—09.

In the following notes the word "biography" is used for stylistic convenience; however, the instructions apply fully to description and critical appraisal as well as other aspects of treatment of individuals.

Do not use T1—092 for the actual works of a person except where instructed to do so at certain numbers in 700–779.

See also discussion at Table 3A: Biography; also at 170.92 vs. 171; also at 230–280; also at 200.92 and 201-209, 292–299; also at 220.92; also at 297.092; also at 300 vs. 600: Biography; also at 338.092; also at 362.1–.4 vs. 610; also at 610.92 vs. 615.534092; also at 615.53: Biography; also at 700.92; also at 709.2 vs. 381.457092; also at 779 vs. 770.92; also at 780.92 and 791.092; also at 780.92; also at 781.6; also at 784–788; also at 796.092; also at 913–919: Add table: 04: Biography; also at 920.008 vs. 305–306, 362; also at 920.009, 920.03–.09 vs. 909.09, 909.1–.8, 930–990; also at 930–990: Wars: Personal narratives; also at 930–990: Biography.

Comprehensive biography

Use the number for the subject of the person's most noted contribution for the comprehensive biography of the person. If the person made approximately equal contributions to a number of fields, use the number for the subject that provides the best common denominator, giving some extra consideration to the person's occupation. For example, use the university's area number under 378 for a physicist who became a science teacher, then head of a school of science, but went on to become a university president. Use 300.92 for a person who made significant contributions in political science, in university education, and the study of administrative and economic aspects of utility regulation, since that number provides the best common denominator for his work. However, use 610.92 for a famous woman doctor who also served as a feminist leader, wrote minor novels, and often served as a delegate to political conventions, unless there is an obvious emphasis on her avocations. Give weight to designations listed first in biographical dictionaries, but make allowances for the tendency to list occupation first even when a career transcends occupation.

If in doubt between a number for a discipline and a number for a specific subject within the discipline, prefer the number for the discipline, e.g., use 620.0092 rather than 621.092 for a mechanical engineer who also did important work in transportation and construction engineering.

Public figures

Biographies of public figures frequently present difficulties because the person may have filled several positions that are given varying emphasis by different authors, or may have filled one position that had many facets. Use 930–990 for comprehensive works on persons who held such positions. However, use a number reflecting one position or interest of a person's career if a biography emphasizes this, e.g., use 362.1092 for a biography emphasizing Wayne Morse's promotion of the National Institutes of Health, even though he was a U.S. senator. (See also Partial biography, below.)

A public figure may exert a wide-ranging impact upon the history of the jurisdiction served. For example, Daniel Webster is most famous as a U.S. senator, although he served twice as secretary of state and was also a lawyer and orator. In all these roles he influenced the history of his time. Use 973.5092 for his biography, rather than 328.73092 for his senatorial service, 327.730092 for his foreign relations service, or 349.73092 for his legal activities. However, if a person in a high office of general responsibility concentrated on a single important field, consider a number that identifies that field. For example, William Wilberforce's chief interest while serving as a British Member of Parliament was the abolition of slavery. Thus use

326.8092 for his biography, rather than 941.073092 for his impact on the general history of his period or 328.41092 for his legislative work.

Give greatest weight to the highest office reached, unless there is a clear reason to do otherwise, using the following table of preference:

- 1. Use 930–990 for monarchs, presidents, other heads of state, prime ministers, vice presidents, and regents, using the number for the period during which they held office. Also use 930–990 for public figures of any position or combination of positions who had a significant impact upon general history, using the period numbers that best approximate their period of influence. Candidates of major parties for the highest office of a country are also assigned history numbers, generally using the number for the period during which they ran for office, e.g., use 973.68092 for Stephen Douglas, who ran against Lincoln in 1860. Sometimes a candidate defeated for party nomination made enough difference in the outcome to warrant a history number for his comprehensive biography, e.g., use 973.923092 for Eugene McCarthy, who ran unsuccessfully for the Democratic presidential nomination in 1968.
- 2. Use the number for the field of service for cabinet members, e.g., use 327.440092 for a foreign minister of France.
- 3. Use 327.3–.9 for ambassadors and pre-World War II ministers plenipotentiary.
- 4. Use 328.4—9 for legislators not warranting a specific subject number, e.g., a floor leader, whip, or member noted for promoting legislative work. Biographers tend to concentrate upon legislators who left their mark on general history; so always consider the number in 900 for the area the legislature served before assigning another. Only occasionally will a work focus on a legislator's own constituency.
- 5. Use 327.3–.9 for diplomats below the level of ambassador or pre-World War II minister plenipotentiary; however, if associated with notable events, use the number for the events.
- 6. Use the number for field of service for public administrators not holding cabinet positions, if their contribution to the service was significant, e.g., use 363.25092 for J. Edgar Hoover, director of the U.S. Federal Bureau of Investigation; otherwise use 352–354.

Use the same preference for public figures of state, provincial, and local jurisdictions. Usually national office takes preference over other levels, but consider the weight of contributions. For example, DeWitt Clinton, the famous governor of New York, was briefly U.S. senator, and was a minor party candidate for president, but use 974.703092 for New York State history of his time for his comprehensive biography. Fiorello La Guardia served fourteen years as U.S. representative, and briefly as chief of the U.S. Office of Civilian Defense and as director of the United Nations Relief and Rehabilitation Administration; but use 974.71042092 for his biography, as he is best known as mayor of New York City.

Systems and laws named after people

Do not use T1—092 for a system or law named after a single individual, but *do* use it for treatment of the individual emphasizing biography, e.g., use 150.1952 for a work on Freudianism, but use 150.1952092 for a biography of Freud.

When an individual is named in a heading or notes, treat the system according to the standard rules for topics, but be liberal about adding notation 092 from Table 1 for treatment emphasizing the individual. For example, 576.52 (Laws of genetics) gives Mendel's laws in a class here note, so any subdivision may be added, e.g., use 576.5205 for serials on Mendel's laws, use 576.52092 for Mendel's biography. Conversely, 150.19434 (Neobehaviorism) gives systems of Guthrie, Hull, Skinner, Tolman in an including note, so standard subdivisions are not added, e.g., use 150.19434 for serials on systems of Skinner without addition of notation 05 from Table 1. However, use notation 092 for biographical treatment of any of these individuals, e.g., use 150.19434092 for a biography emphasizing Skinner's work on neobehaviorism

Families and close associates of the famous

Class a history of the immediate or extended family of a famous person with the biography of that person if the work strongly emphasizes the famous person. The same rule applies to the biography of a single relative or close associate of a famous person. However, if the relative or associate is important in his or her own right, or if the famous person is not strongly featured, class the life of the relative in the subject warranted by his or her own work, e.g., use 269.2092 for a biography of evangelist Ruth Carter Stapleton, sister of President Jimmy Carter, that treats the president only incidentally. If in doubt, do not use the number assigned to a famous person for a relative or close friend; prefer a number warranted by the biographee's own activities. Class a general family history in 929.2.

Partial biography

Class each partial biography featuring a specific contribution of a person with the contribution. However, use the comprehensive biography number for a work about the portions of a person's life that preceded the activity with which the person is chiefly associated, unless the work has significant alternative subject emphasis. For example, use 796.42092 for British Member of Parliament Christopher Chataway's earlier life as an athlete; but use 954.045092 for the childhood of Indira Gandhi, the number for her period as prime minister of India.

Biography associated with place rather than subject

Class an individual biography in the number most nearly covering the history and civilization of the place and time of the activity emphasized when a work is not clearly associated with any subject but is clearly associated with a place, even in cases when a person's activity may not approximate the whole of the most specific period, e.g., use 979.46104092 for the diary of a resident of San Francisco during the Gold Rush.

See also discussion at T1—0922 vs. T1—093–099; also at 930–990: Biography.

T1-0922

Collected biography

Use T1—0922 for a work on two people collaborating in the same field, e.g., the Wright brothers 629.1300922, Pierre and Marie Curie 530.0922. However, use T1—092 when the focus is strongly on one of the two.

Do not use area subdivisions for collected biography of groups that have a strong collective personal identity, even though all the members are known to have come from one particular area, e.g., the Beatles 782.421660922 (*not* 782.42166092242 or 782.42166092242753).

T1-0922 vs. T1-093-099

Collected biography vs. Specific continents, countries, localities

Collected biography covers description and critical appraisal of work, and geographic treatment covers description by place, by specific instance of the subject. Prefer T1—0922 over T1—093–099 for material limited by persons but emphasizing area aspects. However, use T1—093–099 when the intent of the author or compiler is to describe works of art characteristic of an area, or simply to describe such works in an area (even though the works may be listed under their producers). When the title and front matter do not reveal the intent, any discussion of style is an important indicator. A discussion focusing on the character and style of the individual producers indicates biography; one focusing on the characteristics of the place and times indicates geographic treatment. For example, use 730.92245 for a book on the style and character of sculptures by Cellini, Donatello, and Michelangelo, but use 730.94509024 for a book illustrating Italian Renaissance sculpture by describing the work of these same men. If in doubt, prefer T1—0922.

Use the area number if the text is largely confined to concise descriptions of works of technology or art (or to identifications and illustrations of them), even if persons are indicated in the title, e.g., descriptions of the works of six famous Italian sculptors 730.945.

However, use T1—092 without further subdivision for individual persons for all description and critical appraisal of works they have produced.

T1--0940902 vs. T1--0902

Medieval period in European history vs. 6th-15th centuries, 500-1499

Use T1—0940902 for works that are clearly focused on Europe in the Middle Ages and the medieval period, but use T1—0902 for works that attempt to cover the whole world during the period. However, the medieval record of many subjects outside Europe is poorly documented, so a work attempting worldwide coverage may in fact be predominantly about the subject in Europe. If in doubt, prefer T1—0940902.

Table 2. Areas, Periods, Biography

T2-162

Oceans and seas

Use T2—163–168 (*not* T2—3–9) for parts of oceans and noninland seas limited by either country or locality, e.g., use T2—16347 (*not* T2—752 or T2—7551) for Chesapeake Bay, an arm of the Atlantic Ocean that is almost surrounded by Maryland and Virginia.

Estuaries

Use the appropriate area number in T2—3–9 for estuaries that are parts of named rivers, but use T2—16 for estuaries that are parts of oceans and noninland seas, e.g., use T2—16347 (*not* T2—7553) for the York River, an estuary of the Chesapeake Bay.

Coastal waters

Use the number in T2—163–168 that includes the majority of the waters for comprehensive works on the coastal waters of a country, e.g., coastal waters of Russia T2—1632 (*not* T2—16334 or T2—16451), of the United States T2—1634 (*not* T2—16364 or T2—1643). If the areas are approximately equal in size, use the number coming first, e.g., coastal waters of Spain T2—16338 (*not* T2—16381), of Panama T2—16365 (*not* T2—1641).

T2-163 and T2-164, T2-165

Atlantic, Indian, and Pacific Oceans

Table 2 divides the world ocean into three parts—Atlantic, Indian, and Pacific Oceans. The Arctic Ocean is considered a sea of the Atlantic. There is no Antarctic Ocean, but provision is made in T2—167 for the extreme southern portions of the three oceans.

Divisions between the oceans are as follows:

Atlantic-Pacific: north, Bering Strait; south, a line drawn southeasterly from Cape Horn to the northern tip of Palmer Peninsula, Antarctica

Pacific-Indian: north, a line from Melville Island to Timor, thence through the islands of Indonesia to Singapore Strait; south, a line drawn south from Cape Howe, Victoria, Australia, on the 150° east meridian

Indian-Atlantic: north, Suez Canal; south, a line drawn south from Cape Agulhas. South Africa, on the 20° east meridian

Use notes and references to decide where to class connecting bodies of water, e.g., Bering Strait T2—16451 (*not* T2—16325 or T2—16327).

T2-3

Ancient world

The jurisdictions that existed in the ancient world are subdivided by modern regions and jurisdictions. For example, the ancient Iranian Plateau T2—357 is subdivided by the provinces of Iran, e.g., T2—35772 Persis is built using based notation 5572 from Table 2 for Fārs province. Ancient France T2—364 is subdivided by the regions and departments of modern France, e.g., T2—36439 Germania Superior is built using notation 4439 from Table 2 for Alsace.

T2-4-9

Modern world; extraterrestrial worlds

General arrangement of Table 2

The general arrangement of Table 2 is geographic rather than by political units, e.g., Hawaii T2—969 under Oceania, separated from the rest of the United States in T2—73–79; the Asian parts of Russia T2—57, separated from the European portion of Russia in T2—471–474.

Physiographic features and regions

Class a specific feature or region not named in the area table and that is wholly or almost wholly contained within a political or administrative unit with the unit; however, do not add further notation. For example, use T2—7421 for Mount Washington, New Hampshire; T2—75793 for Lake Moultrie, South Carolina; 917.5793 (not 917.579304) for travel connected with Lake Moultrie.

Class a river with the political or administrative unit in which the river's mouth is located, e.g., Escanaba River, Michigan T2—77494. However, if the upper part of the river is more important politically, economically, or culturally, class the river with that part, e.g., Tigris and Euphrates Rivers T2—5674 (*not* T2—5675).

Class general treatment of a specific kind of feature or region limited to a specific continent, country or locality with the continent, country, or locality plus notation 091 from the table under T1—093–099 in Table 1, e.g., rivers of Europe T2—4091693, rivers of England T2—42091693. However, do not add notation 091 for individual features or regions, e.g., Nile River of Egypt T2—62 (not T2—62091693). Class treatment of a specific kind of feature or region not limited to a specific continent in T2—1, e.g., rivers T2—1693.

Cities, towns, villages

Cities are not named in Table 2, except:

- 1. Major world cities, either with their own numbers, e.g., Amsterdam T2—492352, or in a note, e.g., Mecca T2—538
- 2. Smaller cities given their own numbers early in the development of the DDC, e.g., Guelph, Ontario T2—71343
- 3. The capital and largest city of each state of the United States, e.g., Pierre and Sioux Falls, South Dakota, at T2—78329 and T2—783371 respectively

- 4. Independent cities, e.g., Alexandria, Virginia T2—755296
- 5. United States cities coextensive with their counties (or parishes), e.g., Philadelphia T2—74811, San Francisco T2—79461
- 6. Cities, towns, and villages named to indicate boundaries of units when the boundaries are not readily available in reference works, e.g., throughout Australia T2—94 and the western provinces of Canada T2—711–712

Class a metropolitan area with the central city, e.g., the metropolitan area of Chicago T2—77311. Standard subdivisions may be added if appropriate.

Class general treatment of urban regions limited to a specific continent, country or locality with the continent, country, or locality plus notation 091732 (derived from notation 091 from the table under T1—093–099), e.g., urban regions of Europe T2—4091732, urban regions of England T2—42091732. Class treatment of urban regions not limited to a specific continent in T2—1732.

See also discussion at T2—41 and T2—42; also at T2—713 and T2—714; also at T2—93.

T2-4-9 vs. T2-3

Modern world; extraterrestrial worlds vs. Ancient world

Use T2—4–9 for those parts of the world more or less known to classical antiquity (the "Ancient world") when considered after the period of "ancient history," as well as other areas such as America in both ancient and later times. Use T2—3 for only the "Ancient world" during the period of "ancient history." For example, use T2—51 for later China and T2—31 for ancient China; T2—5694 for later Palestine and T2—33 for ancient Palestine; T2—44 for France and T2—364 for ancient Gaul; but use T2—7265 for both ancient and later Yucatán. The demarcation date between "ancient" and "later" varies from place to place and can be determined by examination of the terminal dates in classes 931–939, e.g., 931 China to 420, 933 Palestine to 70, 936.4 Celtic regions to 486. If in doubt, prefer T2—4–9.

T2-41 and T2-42

Scotland and England

The lower level authorities of England and the unitary authorities of England and Scotland may be referred to by a number of different names, most commonly District, Borough, or City. The term "City" does not necessarily refer to an urban locality. The Districts, Boroughs, and Cities are often named after an urban locality either within or approximately the same as the jurisdiction. If the urban locality is approximately the same as the jurisdiction, the locality is given in a class-here note. For example, Exeter City, the jurisdiction, and Exeter, the urban locality, are coextensive; thus, the table entry:

T2—42356 Exeter City

Class here Exeter

If the urban locality is not approximately the same as the jurisdiction, only the jurisdiction is given. The classifier can assume that were the locality to be given, it

would be in an including note. For example, Canterbury City, the jurisdiction, and Canterbury, the urban locality, are not coextensive; thus, the table entry:

T2-42234

Canterbury City

See also discussion at T2—4–9: Cities, towns, villages.

T2-713 and T2-714

Ontario and Quebec

In Ontario and Quebec, jurisdictions have the names of District, City, County, Municipality, Regional Municipality, Regional County Municipality, or Urban agglomeration. The term "City" does not necessarily refer to an urban locality. A District, City, County, Municipality, Regional Municipality, Regional County Municipality, or Urban agglomeration can be named after an urban locality within the jurisdiction. If the urban locality is approximately the same as the jurisdiction, the locality is given in a class-here note. For example, City of Toronto, the jurisdiction, and Toronto, the urban locality, are approximately the same; thus, the table entry:

T2-713541

City of Toronto

Former name: Metropolitan Toronto

Including East York, Etobicoke, North York, Scarborough, York

Class here Toronto

If the urban locality is not approximately the same as the jurisdiction, only the jurisdiction is given. The classifier can assume that were the locality to be given, the locality would be in an including note. For example, City of Gatineau, the jurisdiction, and Gatineau, the urban locality, are not approximately the same; thus, the table entry:

T2---714221

City of Gatineau

See also discussion at T2-4-9: Cities, towns, villages.

T2-73 vs. T2-71

United States vs. Canada

Use T2—73 if works about the United States and Canada are predominantly about the United States. Use T2—71 when Canada receives fuller treatment or the United States and Canada are given equal treatment. Use T2—7 only when the work also discusses areas in T2—72, even though Canada and the United States are assigned most of the numbers in the span. If in doubt, prefer T2—73.

T2-93

New Zealand

In New Zealand, the jurisdiction directly below the Region is referred to as either District or City. The term "City" does not necessarily refer to an urban locality. Districts and Cities are often named after an urban locality either within or approximately the same as the jurisdiction. If the urban locality is approximately the same

as the jurisdiction, the locality is given in a class-here note. For example, Auckland City, the jurisdiction, and Auckland, the urban locality, are approximately the same; thus, the table entry:

T2-9324

Auckland City

Class here Auckland

If the urban locality is not approximately the same as the jurisdiction, only the jurisdiction is given. The classifier can assume that were the locality to be given, it would be in an including note. For example, Dunedin City, the jurisdiction, and Dunedin, the urban locality, are not approximately the same; thus, the table entry:

T2-9392

Dunedin City

See also discussion at T2—4–9: Cities, towns, villages.

T2-99 vs. T2-19

Extraterrestrial worlds vs. Space

Use T2—99 for the various bodies of the universe moving through space, e.g., moon rocks 552.09991. Use T2—19 only for space itself. If in doubt, prefer T2—99.

Table 3. Subdivisions for the Arts, for Individual Literatures, for Specific Literary Forms

Number building

Examples of basic number building for works in an individual language by or about individual authors (with use of Table 3A) and by or about more than one author (with use of Table 3B) are given in this entry. Use the following elements to build the numbers: base number; form; period; kind, scope, or medium; notation 08 Collections or notation 09 Criticism (plus additional 0s in some cases); subform; additional notation from Table 3C and other tables. Detailed instructions for number building appear in Tables 3A and 3B.

Note: in the following discussion, "T3" refers to both Table 3A (individual authors) and Table 3B (more than one author).

More than one form

1. Works by or about more than one author: not restricted by period or form (Table 3B)

Base no. + notation 08 or 09

81 + 08 = 810.8 (an anthology of American literature)

2. Works by or about more than one author: restricted to a specific period but not to a specific form (Table 3B)

Base no. + notation 08 or 09 + period

83 + 08 + 006 = 830.8006 (a collection of 18th-century German literature)

3. Works by or about more than one author: not restricted by form or period, place of authorship emphasized (Table 3B)

Base no. + notation 080 or 09 + 9 from Table 3C + area notation from Table 2

869 + 080 + 9 + 81 = 869.080981 (an anthology of literature in Portuguese by Brazilian authors)

Forms T3—1-7

1. Works by or about an individual author: restricted to a specific form and period (Table 3A)

Base no. + form + period

$$82 + 1 + 3 = 821.3$$
 (Spenser's *Faerie Queene*)

2. Works by or about more than one author: restricted to a specific form but not to a specific period (Table 3B)

Base no. + form + notation 008 or 009

$$82 + 2 + 009 = 822.009$$
 (criticism of English drama)

3. Works by or about more than one author: restricted to a specific form, to a specific kind, scope, or medium, and to a specific period (Table 3B)

Base no. + form + kind, scope, or medium + notation 08 or 09 + period

84 + 3 + 01 + 08 + 07 = 843.010807 (a collection of 19th-century French short stories)

4. Works by or about more than one author: restricted to a specific form but not to a specific kind, scope, or medium; restricted to a specific period (Table 3B)

Base no. + form + period + notation 08 or 09

83 + 2 + 914 + 09 = 832.91409 (criticism of German drama of the second half of the 20th century)

Form T3—8 Miscellaneous writings

1. Works by or about an individual author: restricted to a specific form, period, and subform (T3A—8)

Base no. + form + period + subform

81 + 8 + 4 + 02 = 818.402 (a collection of quotations of an individual American author of the later 19th century)

2. Works by or about more than one author: restricted to a specific form, period, and subform (T3B—8)

Base no. + form + period + subform + notation 08 or 09

84 + 8 + 914 + 02 + 08 = 848.9140208 (a collection of quotations of several French authors of the later 20th century)

Table 3A. Subdivisions for Works by or about Individual Authors

Comprehensive numbers for authors, and numbers for individual works

Follow the criteria given below on language, national affiliation, literary form, and literary period in order to determine the comprehensive number for collected works, critical evaluation, or biography of an author. Use the same national affiliation and literary period for comprehensive works and for all individual works of an author; however, use the language and form appropriate for each individual work, even if different from the language and form selected for the author's comprehensive number.

Language

Class an author with the language in which the author writes.

If an author changes place of residence or national affiliation to a country with a different language but continues to write in the same language, use the language in which the author writes, e.g., use 891.7344 for a novel in Russian by Solzhenitsyn, even if the novel was written while he was living in the United States.

Class comprehensive works for an author who writes in more than one language with the language that the author used last, e.g., Samuel Beckett 848.91409. However, if another language is predominant, class with that language. Class individual works of such an author with the language in which they were originally written.

National affiliation

National affiliation affects the choice of number only for literature written in English (810 vs. 820) or if an option for identifying national literatures is used.

If an author changes national affiliation to a country with the same language as that in which the author has been writing, use the literature number appropriate for the author's adopted citizenship, e.g., class T. S. Eliot as a British author. Class all works of such an author, including individual works written before the change of citizenship, with the same national literature.

If an author changes place of residence, but not national affiliation, to another country with the same language as that in which the author has been writing, continue to use the literature number of the author's original country, e.g., class a Jamaican author living in London, but still retaining Jamaican citizenship, as a Jamaican author.

If information about an author's national affiliation is not readily available in the work being classed or in standard reference books, use the literature number of the author's country of origin, if known; or the literature number of the country in which the author's earlier works were published.

Literary form

For comprehensive works, use the form with which an author is chiefly identified, e.g., Jane Austen 823.7. If the author is not chiefly identified with one form, use T3A—8 Miscellaneous writings plus literary period plus notation 09 from the table at T3A—81–89, e.g., use 828.91409 for a late-20th-century English author who is

equally famous as a novelist, dramatist, and poet. For an individual work, use the form in which the work is written.

Literary periods

Use only one literary period for an author and all of the author's works, including works that may have been published earlier or later than the dates covered by that period. Determine the literary period in accordance with scholarly consensus about when an author flourished. For example, class an author commonly regarded as an early-19th-century writer as such, even if the author published literary works at the end of the 18th century. In the absence of scholarly comment, use the weight of bibliographic evidence to determine when an author flourished. For example, class an author who published one novel in 1999, one novel in 2000, one in 2001, and one in 2002 in the literary period beginning with 2000. If the period when an author flourished cannot be determined, use the date of the author's earliest known separate literary publication, disregarding magazine contributions, isolated student works, and juvenilia.

If a new name is known to be a pseudonym for an author whose literary period has already been established, use the established period for works attributed to the pseudonym. For example, if an English author began publishing at the end of the twentieth century and was assigned the period notation 914 for 1945–1999, then began publishing under a new pseudonym in 2001, use the same period notation 914 for works attributed to the new pseudonym (*not* 92 for 2000–).

Make an exception to the rule of only one literary period for an author if the author wrote in more than one language and flourished during different time periods in different languages: use the appropriate literary period notation for each language. For example, if an author began to flourish as a literary author in Russian during 1917–1945, use the period notation 42 for 1917–1945 for works by that author originally written in Russian. If that same author began to flourish as a literary author in American English after 1945, use the period notation 54 for 1945–1999 for works by that author originally written in English.

Biography

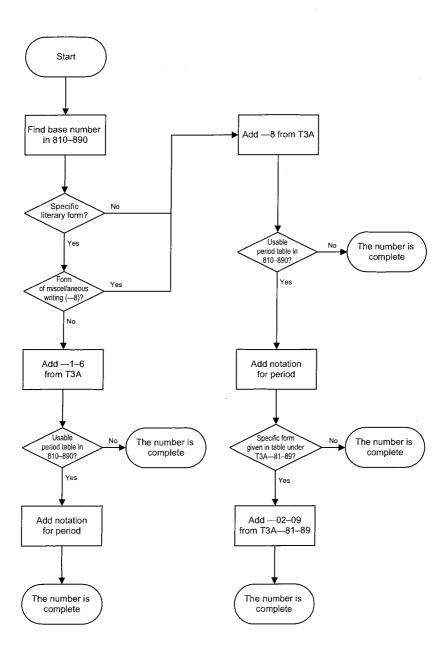

Do not use notation 092 from Table 1 for biography. Class literary diaries and reminiscences in T3A—8 plus period subdivision plus subdivision 03, e.g., Hemingway's *A Moveable Feast* 818.5203.

See also discussion at Table 3B vs. Table 3A.

Number building

Examples of number building are given in the *Manual* at the beginning of Table 3. Use the following flow chart as an aid to building numbers and as a supplement to the detailed instructions at Table 3A.

Flow chart A: Works by or about an individual author

T3A-2, T3B-2 vs. T3A-1, T3B-102

Drama vs. Dramatic poetry

Use T3—2 for poetic plays intended for theatrical presentation, such as the plays of Shakespeare and Marlowe, and poetic plays designed to be read rather than acted, such as Milton's *Samson Agonistes*. Use T3A—1 and T3B—102 for poetry that employs dramatic form or some element of dramatic technique as a means of achieving poetic ends.

Use T3A—2 and T3B—2045 for monologues typically intended for use in theatrical presentations featuring only one actor. Use T3A—1 and T3B—102 for dramatic monologues that are poems in which the speaker is a fictional or historical character speaking to an identifiable but silent listener at a dramatic moment in the speaker's life, such as Robert Browning's "My Last Duchess."

If in doubt, prefer T3A—2 or T3B—2.

T3A-8 + 02, T3B-802, T3B-8 + 02 vs. 398.6, 793.735

Anecdotes, epigrams, graffiti, jokes, jests, quotations, riddles, tongue twisters vs. Anonymous riddles from the oral tradition vs. Riddles as puzzles

Use T3A—8 + 02, T3B—802, T3B—8 + 02 for interdisciplinary works on riddles and for riddles by known authors, even though they may not seem at home amid belles lettres, especially juvenile riddle jokes. Use 398.6 for anonymous riddles from the oral tradition. Use 793.735 for riddles as a type of puzzle similar to logic puzzles.

If in doubt, prefer in the following order: riddles as jokes (T3A-8+02, T3B-802, T3B-8+02), 398.6, 793.735.

T3A-8 + 03 and T3B-803, T3B-8 + 03

Diaries, journals, notebooks, reminiscences

Use T3A—8 + 03, T3B—803, and T3B—8 + 03 for diaries and reminiscences of literary authors in which the life of the author or authors as such is of key interest. However, class the diaries and reminiscences of literary authors that emphasize some other subject besides the general life of the author with the subject emphasized, e.g., use 940.5472 for a diary compiled while the author was in a prisoner-of-war camp during World War II.

Table 3B. Subdivisions for Works by or about More than One Author

Preference order

The preference order in case of conflict between literary forms is spelled out at the beginning of the 800 schedule and in Table 3B under T3B—1–8. There are also preference orders in case of conflict among other aspects. The preference order for the four aspects expressed by means of Table 3C is as follows:

| Themes and subjects | T3C—3 |
|-----------------------------------|---------|
| Elements | T3C—2 |
| Qualities | T3C—1 |
| Works for and by groups of people | T3C-8-9 |

For example, use 811.00803581 (*not* 811.00809287) for a general anthology of poetry about war written by American women poets.

The preference given to literary period in relation to the four aspects expressed by means of Table 3C varies: for works treating more than two literatures or more than one form in one literature, literary periods have a lower priority than the aspects from Table 3C; for works treating a specific form in an individual literature, literary periods have a higher priority than the aspects from Table 3C.

Specific media, scope, kinds consistently have preference over both period and the aspects from Table 3C. However, the preference given to scope in relation to kind varies: for drama, scope has a higher preference; but for fiction, kind has higher preference.

Preference orders are always the same for both collections of literary texts and criticism of the texts.

Sometimes elements low in the priority listings can be added to a number after the higher priority elements. For example, use 813.540932162 for a critical appraisal of later-20th-century American fiction about ocean travel: 813 (American fiction) + 54 (period: later 20th century) + 09 (critical appraisal) + 32162 (theme: ocean travel). The period comes first because it has higher priority than the theme; but the theme can also be expressed. Use the same preference order for these additional elements, e.g., for critical appraisal of later-20th-century American fiction about ocean travel by women, the theme of ocean travel would be expressed by means of Table 3C, but the authorship by a member of a specific group of people would not be expressed, because themes appear higher in the priority listing.

Sometimes aspects low in the priority listings can be expressed only by means of standard subdivision notation from Table 1. In the example above of a critical appraisal of later-20th-century American fiction about ocean travel by women, use notation 082 from Table 1 to express the aspect of women: 813.540932162082. For another example, use 808.83935820973209034 for a collection of 19th-century fiction of several literatures about urban life: 808.839 (collection of fiction from more than two literatures displaying specific features) + 358209732 (theme: urban life) + 09034 (standard subdivision for the historical period of the 19th century). In the priority listing, theme comes before period; and once the theme has been

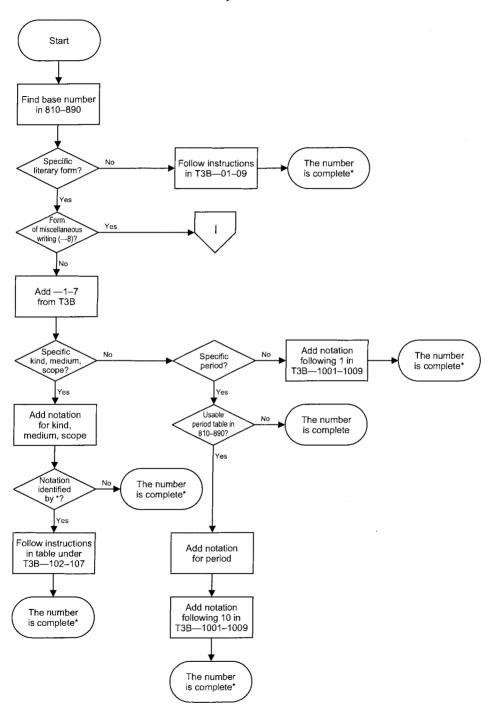

expressed, there is no way to express the period except by use of the standard subdivision.

See also discussion at Table 3B vs. Table 3A; also at T3B—08 and T3B—09; also at T3B—1; also at T3B—2; also at T3B—3; also at 808.8.

Number building

Examples of number building are given in the *Manual* at the beginning of Table 3. Use the following flow chart as an aid to building numbers and as a supplement to the detailed instructions at Table 3B.

Flow chart B: Works by or about more than one author

^{*}If appropriate, standard subdivisions may be added

Flow chart B for notation 8 Miscellaneous writings

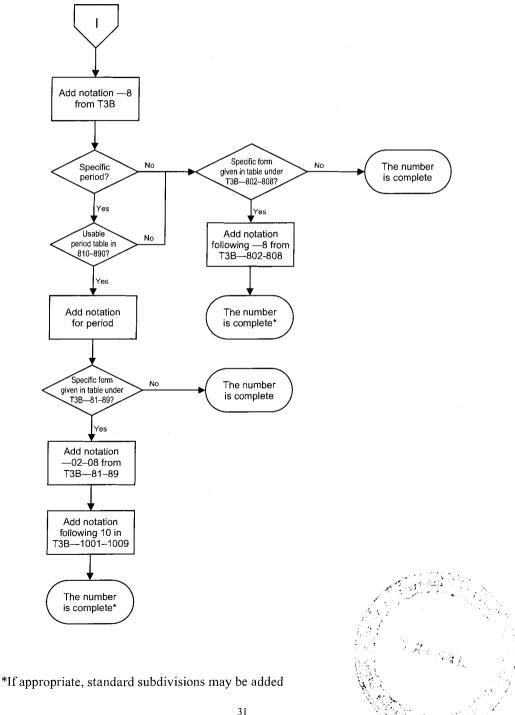

Table 3B vs. Table 3A

Table 3B. Subdivisions for Works by or about More than One Author vs. Table 3A. Subdivisions for Works by or about Individual Authors

Use Table 3B for an individual work by more than one author if the work is a collection where clearly defined parts are contributed by different authors.

Use Table 3A for an individual work by more than one author where the authors have collaborated so as to create a single whole and it is not easy (or at least not intended to be easy) to tell where the contribution of one author begins and the other ends. For example, use Table 3A for a play written in collaboration between Sir Francis Beaumont and John Fletcher.

If in doubt, prefer Table 3B.

T3B-08 and T3B-09

Preference order for collections and criticism of literature in more than one form

Here are examples illustrating the preference order for collections of texts (T3B—08) in more than one form from an individual literature (American literature used for the examples). The preference order is the same for criticism (T3B—09).

- 1. Specific themes and subjects, e.g., 810.80382 (religion)
- 2. Specific elements, e.g., 810.8024 (plot)
- 3. Specific qualities, e.g., 810.8013 (idealism)
- 4. Works for and by groups of people, e.g., 810.809282 (for children)
- 5. Period, e.g., 810.8003 (19th century)

See also discussion at Table 3B: Preference order.

T3B-091-099 vs. T3B-09001-09009

Literature displaying specific features or emphasizing subjects, and for and by specific groups of people vs. Literature from specific periods

If there is no applicable literary period table, T3B—09001–09009 cannot be used; moreover, do not add notation 0901–0905 from Table 1 to T3B—09 to show period, e.g., 20th-century Macedonian literature 891.81909 (*not* 891.81909000904).

However, the rule of zero gives T3B—091–099 priority over T3B—09001–09009. If the provisions of T3B—091–099 are used, then do not add any otherwise appliable literary period table. Instead, add notation 0901–0905 from Table 1 to indicate the provision of whether there is a literary period table for that literature, e.g., 0.93580904 for 20th-century American literature in English on historical and marical themes, use 891.819093580904 for 20th-century Macedonian literature on autorical and political themes.

T3B-1

Preference order for poetry

Here are examples illustrating the preference order for poetry (A) from more than two literatures and (B) from one or two literatures. The preference order is the same for collections and criticism.

A. Poetry from more than two literatures

(Collections used as example)

- 1. Specific kinds, e.g., 808.8142 (sonnets)
- 2. Specific themes and subjects, e.g., 808.819353 (friendship)
- 3. Specific elements, e.g., 808.81922 (description)
- 4. Specific qualities, e.g., 808.819145 (romanticism)
- 5. Period, e.g., 808.81033 (18th century)
- B. Poetry from one or two literatures

(Criticism of American poetry used as example)

- 1. Specific kinds, e.g., 811.03209 (epic)
- 2. Period, e.g., 811.5409 (later 20th century)
- 3. Specific themes and subjects, e.g., 811.009353 (friendship)
- 4. Specific elements, e.g., 811.00922 (description)
- 5. Specific qualities, e.g., 811.009145 (romanticism)
- 6. Works for and by groups of people, e.g., 811.0098924 (by Jews)

See also discussion at Table 3B: Preference order.

T3B—102-107, T3B—205, T3B—308 vs. T3C—1, T3C—3

Genres of poetry, drama, fiction vs. Arts and literature displaying specific qualities of style, mood, viewpoint or dealing with specific themes and subjects

Use the numbers for specific kinds of poetry, drama, and fiction for works belonging to specific literary genres, e.g., the genres of historical drama T3B—20514 and realistic fiction T3B—3083. Often the themes and other characteristics that mark specific genres can also be expressed by means of T3C—1 or T3C—3, e.g., works about historical themes T3C—358, works displaying realism T3C—12. Always prefer the genre number over the number derived from Table 3C for literary works belonging to a specific genre, e.g., a collection of historical drama T3B—2051408 (not T3B—20080358); criticism of realistic novels T3B—308309 (not T3B—300912). Add T3C—1 or T3C—3 to the genre number if it is not redundant, e.g., add T3C—358 for a discussion of historical themes in tragedy (T3B—2051209358), but not for a discussion of historical themes in historical drama.

Use T3C—1 or T3C—3 for literary works that display specific features and are not limited to a specific genre, e.g., a discussion of historical themes in serious and comic drama not limited by period T3B—2009358, a discussion of realistic elements in fiction of various kinds not limited by period T3B—300912. Use T3C—1 or T3C—3 also for literary works displaying specific features that might be regarded as marking a genre if no such genre is named for the relevant literary form in Table 3B, e.g., use T3B—200935878 for a discussion of western drama not limited by period as there is no mention of western drama under T3B—205 Specific kinds of drama. However, use genre notation 30874 from Table 3B for western fiction (not T3B—30095878).

If in doubt between Table 3B notation for genres and Table 3C notation, prefer the Table 3B notation.

Use notation from Table 3B only for literature (belles lettres); not for the arts, for films, or for radio or television programs. Use T3C—1 and T3C—3 to express genre for the arts, films, radio and television programs, e.g., use T3C—15 for science fiction in the arts, in films, in radio and television programs; but use T3B—308762 for science fiction as a genre of fiction. Use T3C—11 for experimental works in the arts, for experimental films, for experimental radio and television programs; but use T3B—807 for experimental literary works without identifiable literary form.

T3B-2

Preference order for drama

Here are examples illustrating the preference order for drama (A) from more than two literatures and (B) from one or two literatures. The preference order is the same for collections and criticism.

A. Drama from more than two literatures

(Criticism used as example)

- 1. Specific media, e.g., 809.225 (television)
- 2. Specific scope, e.g., 809.241 (one-act plays)
- 3. Specific kinds, e.g., 809.2512 (tragedy)
- 4. Specific themes or subjects, e.g., 809.29351 (Faust)
- 5. Specific elements, e.g., 809.2925 (stream of consciousness)
- 6. Specific qualities, e.g., 809.29145 (romanticism)
- 7. Period, e.g., 809.204 (20th century)
- B. Drama from one or two literatures

(Collections of American drama used as example)

- 1. Specific media, e.g., 812.025083548 (television plays on death)
- 2. Specific scope, e.g., 812.04108 (one-act plays)

- 3. Specific kinds, e.g., 812.051208 (tragedy)
- 4. Period, e.g., 812.5408 (collection of later 20th century, no focus), 812.540809287 (20th century, by women)
- 5. Specific themes and subjects, e.g., 812.008036 (weather)
- 6. Specific elements, e.g., 812.008027 (characters)
- 7. Specific qualities, e.g., 812.008015 (symbolism)
- 8. Works for and by groups of people, e.g., 812.008092827 (for girls)

See also discussion at Table 3B: Preference order.

T3B--3

Preference order for fiction

Here are examples illustrating the preference order for fiction (A) from more than two literatures and (B) from one or two literatures. The preference order is the same for collections and criticism.

A. Fiction from more than two literatures

(Collections used as example)

- 1. Specific kinds, e.g., 808.8383 (sociological)
- 2. Specific scope, e.g., 808.831 (short stories)
- 3. Specific themes and subjects, e.g., 808.839362 (animals)
- 4. Specific elements, e.g., 808.83922 (description)
- 5. Specific qualities, e.g., 808.83913 (idealism)
- 6. Period, e.g., 808.83034 (19th century)
- B. Fiction from one or two literatures

(Criticism of American fiction used as example)

- 1. Specific kinds, e.g., 813.0876209 (science fiction)
- 2. Specific scope, e.g., 813.01093581 (short stories about war)
- 3. Period, e.g., 813.5409 (later 20th century), 813.540932162 (later 20th century, about ocean travel)
- 4. Specific themes and subjects, e.g., 813.009351 (about King Arthur)
- 5. Specific elements, e.g., 813.00927 (characters)
- 6. Specific qualities, e.g., 813.00912 (naturalism)
- 7. Works for and by groups of people, e.g., 813.009896073 (fiction by African Americans)

See also discussion at Table 3B: Preference order.

Table 3C. Additional Notation for Arts and Literature

T3C-37 vs. T3C-15

The supernatural, mythological, legendary vs. Symbolism, allegory, fantasy, myth

Use T3C—37 for mythological themes closely tied to specific mythologies of the past, e.g., Roman mythology in Renaissance poetry. Use T3C—15 for abstract myths not tied to specific mythologies of the past, e.g., the myth of a search for lost innocence. If in doubt, prefer T3C—37.

Class specific mythological persons in T3C—351, specific groups of mythological people in T3C—352, mythology as a religious theme in T3C—382013.

T3C-93-99

Residents of specific continents, countries, localities

Use notation 93–99 from Table 3C primarily for the following:

- 1. Literature in a language by residents of a certain area within a country, e.g., a collection of American literature by residents of Illinois 810.809773.
- 2. Literature in a language by residents of a country other than the traditional homeland of the dominant literature of the language, e.g., a collection of Spanish literature by Chilean authors 860.80983. The residents of a country other than the traditional homeland may be either native or nonnative residents of the country, e.g., a collection of English literature by non-Japanese residents of Japan 820.80952.
- 3. Literature in a language by residents of several countries on the same continent from more than one period (only for works in which the literature of one country does not predominate), e.g., French literature by residents of France, Switzerland, Belgium 840.8094; French literature by residents of Africa 840.8096.

Do not use T3C—93–99 for literature in a language by residents of the traditional homeland of the dominant literature of the language except for residents of only part of the country, e.g., a collection of Spanish literature by residents of Spain 860.8, but a collection of Spanish literature by residents of Madrid 860.8094641.

Do not use T3C—943 for German literature by residents of the Federal Republic of Germany, but use T3C—9436 for German literature by residents of Austria.

Do not use T3C—973 for literature in English by residents of the United States, but use T3C—971 for literature in English by residents of Canada.

T3C-93-99, T3C-9174 vs. T3C-8

Literature for and by residents of specific continents, countries, localities and Literature for and by residents of regions where specific ethnic and national groups predominate vs. Literature for and by ethnic and national groups

Use T3C—93–99 rather than T3C—8 for groups that predominate in an area, e.g., a collection of English literature by people of Irish ancestry in Australia 820.8089162094, but a collection of English literature by people of Irish ancestry

in Ireland 820.809415; a collection of Spanish literature by Mexican-Americans 860.8086872073, but a collection of Spanish literature by Mexicans 860.80972; a collection of French literature by Arabs in France 840.808927044, but a collection of French literature by Arabs in North Africa 840.80961.

Do not use T3C—8 for the ethnic or national group so closely associated with the language that specifying the group would be redundant, e.g., a collection of Arabic literature by Arabs 892.708 (not 892.70808927); thus use 892.7080944 (not 892.70808927044) for a collection of Arabic literature by Arabs residing in France.

Do not use T3C—9174 (regions where specific ethnic and national groups predominate) for literature for and by ethnic and national groups since such use would practically duplicate the ethnic and national group numbers. For example, Arabs who are residents of all areas where they predominate taken together constitute the overwhelming majority of all Arabs, so T3C—8927 would be used for them rather than T3C—9174927. However, in most cases use of T3C—8 would be redundant. For example, most books about literature by Arabs from all areas where they predominate are about literature in Arabic, so that expressing the ethnic group Arabs with either T3C—9174 or T3C—8 would be redundant.

If in doubt, prefer T3C—93–99.

Table 4. Subdivisions of Individual Languages and Language Families

T4-1-5, T4-8 vs. T4-7

Description and analysis of the standard form of the language and Standard usage of the language (Prescriptive linguistics) vs. Historical and geographic variations, modern nongeographic variations

A language may have multiple standard forms. Use T4—1–5 and T4—8 for any of the standard forms, e.g., use 421.52 (*not* 427.994) for a work on standard Australian English pronunciation. Use 427.994 for a work on Australian English pronunciation only if it stresses the distinctive characteristics that make Australian pronunciation different from British or American pronunciation. If in doubt, prefer T4—1–5 and T4—8.

T4-3 vs. T4-81

Dictionaries of the standard form of the language vs. Standard usage of words

Use T4—3 for works intended for ready reference. Specialized dictionaries may be arranged in other ways besides alphabetically (e.g., picture dictionaries in subject order, thesauri in classified order), but the order must be appropriate for ready reference.

Use T4—81 for works intended to be read or studied in full in order to learn vocabulary. The works may be informal and entertaining, e.g., narratives for small children, or formally organized into lessons with quizzes.

If in doubt, prefer T4—3.

T4--7

Historical and geographic variations, modern nongeographic variations

Use of standard subdivisions

Add notation from Table 1 to T4—7 and its subdivisions according to the usual limitations on use of standard subdivisions. For example, use notation 03 from Table 1 and notation 03 from the table under T1—093—099 in Table 1 for dictionaries, e.g., a dictionary of Old High German 437.0103, a dictionary of Northern Yemeni Arabic 492.7709533203.

Where subdivisions are provided for early versions of a language, notes are used to override the rule of zero so that geographic variants of an early version of a language class with the early version, e.g., use 427.0209428 for Middle English dialects of northeast England. Use 427.9428 for modern dialects of northeast England and comprehensive works on Middle English and modern English dialects of northeast England.

Pidgins and creoles

Class a specific pidgin or creole as a variation of the source language from which more of its vocabulary comes than from its other source language(s). Class a pidgin or creole, which is customarily associated with a specific geographic area, in T4—709 plus the area number from Table 2 or in one of the subdivisions of T4—7 for geographic variations where they are provided in 420–490, e.g., the Krio language of Sierra Leone 427.9664.

Table 5. Ethnic and National Groups

Nationality and language

Table 5 Ethnic and National Groups and Table 6 Languages are both based on the traditional sequence of languages in 420–490, and therefore most numbers are developed in parallel. But separate tables are needed because language and nationality do not always match, e.g., there are Canadian people (T5–11 in Table 5), but no Canadian language; there is a Yiddish language (T6–391 in Table 6) but no Yiddish people.

Ethnic group and nationality

The generally preferred citation order is ethnic group over nationality, as nationality is normally given a low priority, and citizens and noncitizens of a country class in the same number. However, a different and atypical citation order is given at some specific numbers in Table 5, e.g., for Canadians of French and British origin, the prescribed citation order is nationality first (T5—11 Canadians), then ethnic group: T5—112 for Canadians of British origin, T5—114 for Canadians of French origin. Use the numbers T5—21071 (T5—21 people of British Isles + 71 Canada) and T5—41071 (T5—41 French + 71 Canada) only for persons of British and French origin in Canada who are not Canadian citizens. But in the absence of specific instructions to the contrary use the citation order given at the beginning of the table, e.g., Canadians of Ukrainian descent T5—91791071 (not T5—11). Use this same number for both Canadians of Ukrainian descent and persons of Ukrainian descent who are in Canada but not Canadian citizens.

In general, use the same number for both the majority ethnic group of a nation and the total population viewed as a national group, e.g., T5—94541 for both ethnic Finns and all citizens of Finland viewed as a national group. Usually, priority between ethnic and national affiliation is an issue only for minority ethnic groups, e.g., use T5-39704897 (T5-397 Swedes + 4897 Finland) for Finnish citizens who are ethnic Swedes, a minority ethnic group, because their ethnic group takes priority over their nationality. Use T5—94541073 (T5—94541 Finns + 73 United States) for Finnish citizens who are ethnic Finns in the United States, but use T5—397073 (T5—397 Swedes + 73 United States) for Finnish citizens who are ethnic Swedes in the United States, which is the number for all persons of Swedish descent in the United States. Their Finnish national origin is not expressed because of the low priority given to nationality. The exception to this rule occurs when the class number to which Table 5 notation is added defines the present location of the group, as in 940–999, so that it is possible to express both the present and the past location of the group, e.g., use 973.0439704897 for ethnic Swedes from Finland in United States history.

Special developments that allow expression of both ethnic and national affiliation are typically made only for the majority ethnic group in a nation, under the heading "national group," e.g., T5—6887 expresses both Spanish American ethnicity and Venezuelan nationality, while T5—9697292 expresses both African ancestry and Jamaican nationality. However, there is no special development to express both African ancestry and Venezuelan nationality because African Venezuelans are a minority in Venezuelan and cannot be called a "national group." Therefore the number for African Venezuelans in England (T5—96042) is the same as the number for persons of African ancestry in general in England; and Venezuelan nationality is not expressed (*except* when it is possible to express both present and past location, e.g., African Venezuelans in English history 942.00496087). Conversely, Table 5 numbers for Venezuelans of Spanish origin in England (T5—6887042) and Jamaicans of African origin in England (T5—9697292042) always express the national origins.

In some cases, special developments for national groups lead to the number for a national group being clearly different from the number for the largest ethnic group of the country. For example, the number for the Bhutanese as a national group is T5-91418; but the Bhotia, the largest ethnic group, speak Tibetan dialects and class as an ethnic group with the Tibetans in T5—9541. In some cases, the national group number for a country may not express the ethnicity of the majority of the population. For example, the national group numbers for all the modern nations of Latin America where Spanish is at least one of the official languages express Spanish-American ethnicity, though the majority of the population in some countries is of native American origin, e.g., Bolivia. Class works that discuss all the people of a nation in the national group number specified in the table. Class works that focus on a specific ethnic group with the ethnic group. Use the national group number for a work that focuses on a specific ethnic group if it expresses the appropriate ethnicity, e.g., use T5—6884 for works that discuss all the people of Bolivia and also for works that focus on the Bolivians who speak Spanish and follow Spanish-American customs; but use T5—98323084 for works that focus on the Quechua of Bolivia, T5—98324084 for works that focus on the Aymara of Bolivia.

Adding area notation

Area notation is normally added to a Table 5 number to signify location, e.g., sociology of Italians in England 305.851042. However, area notation is omitted whenever it is redundant, e.g., 973.046872 Mexican Americans in U.S. history (*not* 973.046872073).

African Americans

An atypical development for African Americans (T5—96073) gives extra emphasis to nationality for a minority group, while still preserving the usual citation order of ethnic group before nationality. The 073 signifies U.S. nationality rather than location; so area numbers can be added to it in the usual way, e.g., use T5—960730747 for U.S. citizens with African ancestry in New York State. However, this applies only to U.S. citizens; so use T5—960747 for noncitizens of African ancestry in New York State. There are no special developments for most ethnic groups in the United States, e.g., use T5—510747 for persons of Italian descent in New York State regardless of whether they are U.S. citizens. The Table 5 number for African Americans always expresses the U.S. national origin when used for areas outside the U.S., e.g., use T5—96073042 for African Americans in England. Conversely, the number for Italian Americans in England (T5—51042) is the same as for Italians in England (with the usual exception for history, e.g., Italian Americans in English history 942.00451073).

T5-112, T5-114 vs. T5-2, T5-41

Canadians of British origin and Canadians of French origin vs. British, English, Anglo-Saxons and French

Use T5—112 for Canadian citizens of British origin and T5—114 for Canadian citizens of French origin, even with numbers that already specify Canada, e.g., use 971.004112 for Canadian citizens of British ancestry in Canadian history. Use T5—112 or T5—114 for accounts of persons of British or French ancestry becoming Canadian citizens. Also use T5—112 and T5—114 for persons of British or French origin living in the territory that later became the nation of Canada if they are regarded as among the precursors of British or French Canadians or founders of the nation, e.g., the French in Canada 1600–1867 971.004114.

Use T5—2 and T5—41 for persons of British or French ancestry who were not and never became Canadian citizens, even though they may have resided in Canada or in the territory that later became Canada. For example, the inhabitants of the French colony Acadia in what is now Nova Scotia who were expelled in 1755 and became the Cajuns of today's Louisiana were never Canadian citizens; so use T5—410763 (not T5—1140763) for Louisiana Cajuns.

If in doubt, prefer T5—112 and T5—114.

T5—13 vs. T5—2073, T5—21073

People of United States ("Americans") vs. British, English, Anglo-Saxons in United States and People of British Isles in United States

Use T5—13 (*not* T5—2073 or T5—21073) for U.S. citizens of British ancestry, even with a number that already means United States, e.g., British Americans in U.S. history 973.0413. Use T5—13 for comprehensive works on both U.S. citizens

and non-U.S. citizens of British ancestry in the United States. Use T5—13 for accounts of persons of British ancestry becoming U.S. citizens. Use T5—2073 or T5—21073 for non-U.S. citizens of British ancestry in the United States. (Do not add 0 plus notation 73 if T5—2 or T5—21 is used with a number that already means United States, as it would be redundant, e.g., all noncitizens of British ancestry in U.S. history 973.042.) If in doubt, prefer T5—13.

T5-201-209 vs. T5-2101-2109

British, English, Anglo-Saxons by area vs. People of British Isles by area

Use T5—201–209 for people of British ancestry in an area when many of them are or have most recently been citizens of the United States, Canada, Australia, or New Zealand, e.g., people from the United Kingdom, the United States, Canada, and Australia in the Third World T5—201724. Use T5—2101–2109 for people of British ancestry in an area when they are or have most recently been citizens of the United Kingdom, e.g., people from the United Kingdom in the Third World T5—2101724. If in doubt, prefer T5—201–209.

T5-9435

Turks

Use T5—9435 for (a) the people of Turkey as a national group; and (b) people who speak, or whose ancestors spoke, Turkish (Osmanli Turks and their descendants), including those who are not Turkish nationals, e.g., Turkish Cypriots T5—943505693.

T5-96073

African Americans (United States Blacks)

The 073 in T5—96073 signifies U.S. nationality rather than location. It is never omitted even where it would be redundant if it simply signified location, e.g., 973.0496073 African Americans in U.S. history (as distinct from 973.0496 for noncitizens of African ancestry in U.S. history). Area subdivisions are added to it in the usual way, e.g., 305.8960730747 sociology of African Americans in New York (as distinct from 305.8960747 sociology of non-U.S. citizens of African ancestry in New York).

Table 6. Languages

The source of information about language families most used in recent revisions of Table 6 is *Ethnologue*, 15th edition (Dallas, Texas: SIL International, 2005; also on the Internet http://www.ethnologue.com/). However, Table 6 diverges from *Ethnologue* in many specific instances. Check Table 6 and the Relative Index first to find a specific language or group of languages. If nothing is found, consult *Ethnologue* to find the appropriate language family or group of languages.

T6-926

Linear A

It is not known what language is represented by the Linear A script used in ancient Crete (also known as Minoan Linear A). At one time the language was thought to

be a West Semitic language, and works on the script have been classed in T6—926 Canaanite languages for many years. If the script is deciphered and the language identified as a non-Canaanite language, then Linear A will be moved to the appropriate place.

T6--9639

Bantu languages

Groups and zones of Bantu languages were originally based on Malcolm Guthrie's *Comparative Bantu; an Introduction to the Comparative Linguistics and Prehistory of the Bantu Languages*, 1967–1971. These groups and zones appear in a modified and updated form in *Ethnologue*, 15th edition (Dallas, Texas: SIL International, 2005; also on the Internet http://www.ethnologue.com/). Most of the time, but not always, Table 6 follows *Ethnologue*. Check Table 6 and the Relative Index first to find a specific language or group of languages. If nothing is found, consult *Ethnologue*.

Notes on Schedule Numbers

001.9 and 130

Controversial knowledge and Parapsychology and occultism

Both 001.9 and 130 cover topics that cannot be disproved or be brought into the realm of certain and verifiable knowledge. Works that belong in either 001.9 or 130 include one or more of the following indicators:

- 1. A claim of access to secret or occult sources
- 2. A rejection of established authority
- 3. A pronounced reverence for iconoclasts, for laypersons-become-experts
- 4. An uncritical acceptance of lay observation of striking phenomena
- 5. A fixation on the unexplained, the enigmatic, the mysterious
- 6. A confidence verging on certainty in the existence of conspiracies and the working of malevolent forces
- 7. An acknowledgment of the powers of extraterrestrial beings or intelligences (other than religious beings)

Use 001.9 for phenomena not closely linked to humans. Use 130 for phenomena closely linked to human beings—the human mind, human capabilities and powers, human happiness. In case of doubt, and for interdisciplinary works, prefer 001.9.

004-006 vs. 621.39

Computer science vs. Computer engineering

Use 004–006 for works on (a) computer hardware from the user's viewpoint, (b) software or firmware, (c) comprehensive works on assembling the physical components and installing the software of a computer system, or (d) comprehensive works on the computer science and computer engineering aspects of a computer topic.

Use 621.39 for works that (a) treat computer hardware solely from the viewpoint of engineering, manufacturing, or repair and (b) do not treat software or the program aspect of firmware. Use 621.39 for works limited to assembling the physical components of a computer system, and for works treating the physical processes of manufacturing firmware chips, not discussing the programs embodied in those chips. Use 621.39 for works treating 004–006 concepts only if the 004–006 concepts are applied to 621.39 concepts, as in computer graphics programs to assist in design of computer circuitry 621.3950285668.

If in doubt, prefer 004-006.

004 vs. 005

Computer hardware and software

Use 004 for works on computer hardware and works treating both computer hardware and the "soft" aspects of computer systems—programs, programming, and data. Use 005 for works treating only these "soft" aspects. Use 005.1–.8 together with notation 0285 from Table 1 for works on hardware applied to topics named in 005.1–.8, e.g., parallel architectures for database machines 005.740285435. How-

ever, use 004.6 (*not* 005.71) for works on hardware for interfacing and data communications. If in doubt, prefer 004.

See also discussion at 004.6 vs. 005.71.

004.0151 vs. 511.1, 511.35

Computer mathematics

Use 004.0151 for works on mathematics applied to computers, and for comprehensive works on computer mathematics.

Use 511.1 for works on branches of mathematics in which objects can only have discrete or finite values, and hence can be represented on digital computers. These branches are often collectively referred to as "discrete mathematics" or "finite mathematics."

Use 511.35 for works on the theory of computer mathematics, without reference to practical implementations on real computers. Use 511.35 for works on Turing machines, because Turing machines are a theoretical concept. This subject is also called automata theory or machine theory.

If in doubt, prefer in the following order: 004.0151, 511.1, 511.35.

004.1

Computers and processors

In 004.1, its subdivisions, and similar numbers elsewhere in 004–006 and 621.39, computers and processors (central processing units) are treated for classification purposes as if they were the same. In fact they are not, but few works about processors can avoid discussing the other parts of the computer with which the processor must interact; hence works about specific types of computers and processors are typically not different enough to justify separate numbers.

Programmable calculators

Use 510.28541 rather than 004.1 for programmable calculators because they are limited-function computers, capable of working only with numbers, not alphabetic data.

004.1 vs. 004.24

Performance evaluation

Use 004.1 for general evaluations of computers, e.g., general evaluations of personal computers 004.16, of a specific kind of personal computer 004.165. Use 004.24 only for specialized works treating performance measurement and evaluation as an aid in designing or improving the performance of a computer system. If in doubt, prefer 004.1.

Add notation 029 from Table 1 to the number in 004.1 if the emphasis is on evaluation as a consideration in purchasing, e.g., evaluation and purchasing manuals for personal computers 004.16029.

004.1 vs. 004.3

Processing modes

Many computers, processors, and computer systems can be classified either by type of computer as defined in 004.1 or by processing mode.

Use 004.1 for works that discuss a computer, processor or computer system in general. Use 004.3 only for works that emphasize the processing mode.

For example, the Intel Pentium[®] processor is a microprocessor that supports multiprogramming, interactive processing, and multiprocessing. Use 004.165 for works discussing the Pentium in general. Use 004.357 for Pentium-based multiprocessing computers.

If in doubt, prefer 004.1.

004.11-.16

Types of digital computers

Use 004.11–.16 and 621.3911–.3916 only for works that emphasize the specific type of computer. Use 004 and 621.39 for works that refer to a particular type as an illustration of what computers in general do. For example, use 004, not 004.12, for a general introduction to computers written at a time when the only computers were mainframes. If in doubt, prefer 004 or 621.39 without subdivision.

Specific computers

Here, "numbers for specific computers in 004-006" include 004.125, 004.145, 004.165, 005.265, and numbers in 004-006 built using these numbers, e.g., 006.7765.

Use numbers for specific computers in 004–006 for works treating more than one computer or processor only if:

- 1. The work treats a single series of very closely related computers or processors (e.g., the Intel Pentium microprocessors 004.165); or
- 2. The work treats primarily one specific computer or processor but adds that it is also applicable to other similar machines (e.g., a work about programming the IBM PC® that says it can also be used as a guide to programming "IBM-compatible" computers 005.265).

Use numbers for specific computers in 004–006 for works that discuss a computer and its processor, e.g., a work about the Apple iMac® series of computers and the PowerPC® series of microprocessors 004.165.

If in doubt, do not use numbers for specific computers in 004–006.

004.21 vs. 004.22, 621.392

Systems analysis and design vs. Computer architecture

Use 004.21 for works on computer-based systems involving a computer, application programs, and procedures, usually also other hardware, often a database and

communications network, all working together to accomplish a task for the user. Use 004.21 for comprehensive works on systems analysis and design.

Use 004.22 for works focusing on the design and structure of the computer itself and on the computer in relation to its peripheral devices. Most works on computer architecture treat software or the program aspect of firmware as well as hardware; but in the discussion of programs, the focus is on system programs, which make the computer function properly, rather than on application programs, which accomplish user tasks. Use 004.22 for comprehensive works on computer architecture.

Use 621.392 for works that treat computer hardware but do not treat software or firmware.

If in doubt, prefer in the following order: 004.21, 004.22, 621.392.

004.6 vs. 005.71

Computer communications

Use 004.6 for comprehensive works on both the "hard" and "soft" aspects of computer interfacing and communications. Use 005.71 for comprehensive works on "soft" aspects—programming, programs, and data in interfacing and communications. Use 005.7–.8 for specific data aspects of interfacing and communications, e.g., error-correcting codes 005.72, data compression 005.746, data encryption 005.82. If in doubt, prefer 004.6.

004.6 vs. 384.3

Computer communication services

Use 004.6 for works on computer communication and its hardware in office and private use, works on computer science applied to the technological aspects of computer communication, practical works explaining how to use the hardware and software involved in computer communications, and interdisciplinary works.

Use 384.3 for works on economic and related aspects of providing computer communication services to the public, and works focusing on services and service providers, on broad issues of public good in relation to computer communication.

If in doubt, prefer 004.6.

004.6 vs. 621.382, 621.3981

Digital communications

Use 004.6 for works on digital communications that do not emphasize engineering, including works dealing with telecommunications and data communications engineering plus interfacing and communications in computer science.

Use 621.382 for works on digital telecommunications, or digital aspects of both telecommunications and data communications, that emphasize engineering. Use 621.3981 for works on computer data communications that emphasize engineering.

If in doubt, prefer in the following order: 004.6, 621.382, 621.3981.

See also discussion at 004.6 vs. 005.71; also at 004.6 vs. 384.3.

004.678 vs. 006.7, 025.042, 384.33

Internet and World Wide Web

The Internet and the World Wide Web (WWW) can be written about from various disciplinary viewpoints. Because the Dewey Decimal Classification is organized by disciplines, it is necessary to decide the focus of a particular work about the Internet or the WWW in order to choose the correct number.

Use 004.678 for works about the Internet or WWW if they contain a substantial amount of computer science material and at least some information about computer hardware, or if they include a comprehensive overview of the Internet as a system of hardware, software, communications protocols, and other aspects of computer communications included in 004.6.

Use 006.7 for general works about the use of HTML and XML to create hypertext documents on the World Wide Web, and works that discuss web page design or effective web pages.

Use 025.042 for:

- 1. Interdisciplinary works about the Internet and WWW that do not contain enough computer science material to be classified in 004.678, but that do contain some information science material
- 2. Information science works that emphasize search and retrieval, including use of web browsers and web search engines to facilitate search and retrieval on the Internet
- 3. Works that describe information resources available on the Internet or WWW, and on how to find information there

Use 384.33 for works on Internet access providers and works on economic and public policy issues concerning the Internet.

If in doubt, prefer in the following order: 004.678, 025.042, 006.7, 384.33.

005.1-.2 vs. 005.42

Application programming vs. Systems programming

Use 005.1–.2 for works on writing application programs and comprehensive works about writing both application and systems programs, including works about writing application programs that run on specific operating systems or user interfaces, e.g., writing application programs that run on the personal computer operating system MS-DOS 005.268, writing application programs that run on the personal computer graphical user interface Microsoft Windows 005.269. Use 005.42 for works about writing systems programs, e.g., writing operating systems 005.42, writing user interfaces 005.428. If in doubt, prefer 005.1–.2.

See also discussion at 005.3, 005.5 vs. 005.43–.45.

005.1 vs. 005.3

Programming vs. Programs

In this discussion, "other programming numbers" comprise 005.2, 005.42, 005.711, 005.712, 006.336, 006.337, 006.66 and 006.67. "Other numbers for programs" comprise 005.43, 005.5, 005.713, 006.338 and 006.68.

Use 005.1 and other programming numbers for works on writing programs, on software engineering, on modifying existing programs in ways that are typically done by computer programmers. Use 005.3 and other numbers for programs for works on using programs that have already been created by others, including works on writing macros of the kind that are typically written by end users of software packages.

Use 005.1 and other programming numbers for works on programming to achieve reliability, compatibility, portability, and other ideal qualities. Use 005.3 and other numbers for programs for works that discuss whether existing programs actually have these qualities.

Use 005.10218 and 005.150218 for standards for programs and program documentation that are aimed at programmers and documentation writers, to ensure that they produce good programs and documentation. Use 005.30218 and other numbers for programs for works that discuss standards to help users in selecting from among existing programs and documentation.

Use 005.14 for works on testing and measurement as part of program development. Use 005.30287 and other numbers for programs for works that discuss ways for users to test or measure programs as an aid in selection.

Use 005.1 or 005.2 for works devoted equally to programming and programs.

If in doubt, prefer 005.1 or other programming numbers.

005.101

Logic in computer programming

Use notation 01 from Table 1 only for specialized works with an intense focus on logical analysis. Typically such works treat symbolic (mathematical) logic; use notation 015113 for these works. Do not use notation 01 from Table 1 in 005.1–.2 for general discussions of logic in programming because logic is inherent in programming and is discussed in nearly every work about programming.

005.15 vs. 808.066005

Program documentation

Use 005.15 for comprehensive works on how to prepare program documentation; works on how to prepare the technical documentation needed by the personnel who will maintain, modify, and enhance the program (including such things as program source listings, program comments, flow charts, decision logic tables, file specifications, program function descriptions, program test history records, modification logs); works on how to prepare program users' manuals that focus on content rather than form; works on policies for program documentation.

Use 808.066005 for works that emphasize effective technical writing—that is, works that emphasize such things as organizing for clarity, writing appropriately for the intended audience, using good paragraph structure, preferring the active voice, using consistent terminology. Typically such works are concerned only with users' manuals.

If in doubt, prefer 005.15.

005.268 vs. 005.265, 005.269

Programming for specific operating systems, for specific computers, and for specific user interfaces

Numbers beginning with 005.26 are limited to personal computers. Similar numbers for other types of computers, with instructions for building numbers by adding notation from 005.26 numbers, are found in 005.22–.24 and 005.27.

Use 005.268 (and similar numbers for other types of computers) for works on writing software that runs on specific operating systems. Use 005.265 (and similar numbers for other types of computers) for works on writing software that runs on specific computers. Use 005.269 (and similar numbers for other types of computers) for works on writing software that runs on specific user interfaces other than the native interface of the computer operating system. (Class Microsoft Windows versions through 3.x in 005.269; starting with Windows NT and Windows 95, class Microsoft Windows in 005.268.)

See also discussion at 005.269 and 005.284, 005.3684, 005.384.

If two or three of these numbers are applicable to the same work, follow the preference note at 005 and class with the number coming last in the schedule (with the exception specified below). For example, if a work treats writing software that runs on a specific computer, on a specific operating system, and on a specific add-on user interface, prefer 005.269. Exception: If a specific computer has only one operating system, so that all programs that run on that computer also run on the operating system, e.g., the Apple iMac series of computers and Mac OS $X^{\text{(R)}}$, class writing programs that run on that computer and operating system with the computer in 005.265. Earlier and later versions of the same operating system (e.g., Macintosh System $9^{\text{(R)}}$ and Mac OS $X^{\text{(R)}}$) count as one operating system, even though the differences between the earliest and the latest versions may be great.

If in doubt, prefer in the following order: 005.268 and similar numbers, 005.269 and similar numbers, 005.265 and similar numbers.

005.269 and 005.284, 005.3684, 005.384

User interfaces

The native interface of an operating system is the user interface bundled inseparably with the operating system.

005.3

Programs

Class a program or programs designed to run on two types of computers with the predominant type if there is one, e.g., a program that runs on five mainframe com-

puters and one midrange computer 005.32. If neither of two types is predominant, class with the smaller type, e.g., a program for midrange and personal computers 005.36.

Class programs for a specific application in computer science with the application in 005–006, but never in 004. Among the numbers most frequently used for software besides 005.3 and its subdivisions are 005.43 for systems software and operating systems, 005.5 for general purpose application software (such as word processing programs and spreadsheets), 005.713 for interfacing and data communications programs, 005.74 for database management systems, and 006.68 for computer graphics programs.

Programs applied to a particular subject or discipline are classed with the subject or discipline, plus notation 028553 from Table 1, e.g., programs for tax accounting 657.46028553.

See also discussion at T1—0285; also at 005.1 vs. 005.3.

005.3, 005.5 vs. 005.43-.45

Application programs vs. Systems programs

Use 005.3 for collections of or works about multiple kinds of application programs, and for comprehensive works on application programs and systems programs. Application programs are programs that do things users want done, for example, electronic spreadsheets, statistical packages, word processing programs, desktop publishing programs, computer games, educational programs, tax preparation programs, inventory control programs.

Use 005.5 for general purpose application programs, such as spreadsheets, statistical packages, word processing programs.

Use 001–999 for application programs employed in a specific discipline, e.g., application programs employed in library operations 025.0028553, computer games 794.8.

Use appropriate subdivisions of 005.3 for works about application programs that run on specific systems, e.g., application programs that run on a specific personal computer operating system 005.3682.

Use 005.43–.45 for systems programs and works about them. Systems programs are programs that enable computers to function properly; in effect, they provide life support and housekeeping for computers. Systems programs accomplish little that interests users except to make it possible for application programs to run. Examples of systems programs are operating systems, utilities packages, user interfaces, and programming language translators.

If in doubt, prefer 005.3 and its subdivisions.

See also discussion at 005,3682 vs. 005.365, 005.3684.

005.3682 vs. 005.365, 005.3684

Programs for specific operating systems, for specific computers, and for specific user interfaces

Numbers beginning with 005.36 are limited to personal computers. Similar numbers for other types of computers, with instructions for building numbers by adding notation from 005.36 numbers, are found in 005.32–.34 and 005.37.

Use 005.3682 (and similar numbers for other types of computers) for application programs that run on specific computer operating systems, and comprehensive works on application and systems programs that run on specific computer operating systems. Use 005.365 (and similar numbers for other types of computers) for application programs that run on specific computers, and comprehensive works on application and systems programs that run on specific computers. Use 005.3684 (and similar numbers for other types of computers) for application programs that run on specific user interfaces other than the native interface of the computer operating system, and comprehensive works on application and systems programs that run on specific user interfaces other than the native interface of the computer operating system. (Class Microsoft Windows® versions 3.x in 005.3684; starting with Windows NT and Windows 95, class Microsoft Windows in 005.3682.)

See also discussion at 005.269 and 005.284, 005.3684, 005.384.

If two or three of these numbers are applicable to the same work, follow the preference note at 005 and class with the number coming last in the schedule (with the exception specified below). For example, if a work treats application programs that run on a specific computer, on a specific operating system, and on a specific add-on user interface, prefer 005.3684. Exception: If a specific computer has only one operating system, so that all programs that run on that computer also run on the operating system, e.g., the Apple iMac® series of computers and Mac OS X®, class programs that run on that computer and operating system with the computer in 005.365. Earlier and later versions of the same operating system (e.g., Macintosh System 9® and Mac OS X®) count as one operating system, even though the differences between the earliest and the latest versions may be great.

If in doubt, prefer in the following order: 005.3682 and similar numbers, 005.3684 and similar numbers, 005.365 and similar numbers.

See also discussion at 005.3, 005.5 vs. 005.43-.45.

005.74 vs. 005.436

File managers and file organization

Use 005.74 or 005.75 for a file manager in the sense of software that manages data files, providing the ability to create, enter, change, query and produce reports on a data file or data files. Use 005.436 for a file manager in the sense of software that is used to manage files and directories on a computer, providing the ability to delete, copy, move, rename and view files and directories. A file manager in this latter sense may be part of an operating system or a separate utility program. Use 005.436 for comprehensive works on both kinds of file managers.

Use 005.741 for works on file organization in the sense of the structure of data within a single file that permits access to the data. Use 005.436 for works on file

organization in the sense of the way that multiple files are organized on a disk or other storage medium.

If in doubt, prefer 005.74.

006.3 vs. 153

Cognitive science

Cognitive science is the interdisciplinary study of the mind and computers as information processing systems.

Use 006.3 for cognitive science if the goal is to produce computer systems with better artificial intelligence. Use 153 for cognitive science if the goal is to understand better how the human mind works. If in doubt, prefer 006.3.

006.35 vs. 410.285

Computational linguistics vs. Computer applications in linguistics

Use 006.35 for works on computational linguistics. Use 410.285 for computer applications in linguistics in general. For example, use 410.28553 for general software tools, e.g., programs that generate concordances. If in doubt, prefer 006.35.

006.37 vs. 006.42, 621.367, 621.391, 621.399

Computer vision, optical pattern recognition, and optical computers

Computer vision and optical pattern recognition

Computer vision and optical pattern recognition both involve recognition of forms, shapes, or other optical patterns for the purpose of classification, grouping, or identification; but computer vision makes extensive use of artificial intelligence for the complex interpretation of visual information, whereas optical pattern recognition involves only simple interpretation.

Use 006.37 or 006.42 for works on computer vision and optical pattern recognition that give substantial treatment to the computer programs needed to interpret optical patterns, and also for works treating computer-vision and optical-pattern-recognition devices from the user's point of view. Use 621.399 for works on designing and manufacturing the hardware for computer vision and optical pattern recognition. If in doubt, prefer 006.37 or 006.42.

Use 621.367 for works on devices that record and process optical signals while doing virtually no interpreting (either because interpretation is not needed or because interpretation is left to others—computers or humans), e.g., devices for image enhancement.

Optical computers

"Optical computers" is a term used to describe two different kinds of computers. Use 621.391 for works on optical computers that are general-purpose computers in which the central data processing mechanism is based on light (e.g., lasers). Use 006.37, 006.42, or 621.399 for works on optical computers that are special-purpose computers designed to process optical data, regardless of the type of central data processing mechanism.

011 - 017

Bibliographies and catalogs

The terms *bibliographies* and *catalogs* are used interchangeably in 011–017. The term *bibliographies* is more likely to be used in relation to works brought together on the basis of subject matter, authorship, time period, etc., while the term *catalogs* is more likely to be used in relation to works held in specific collections or offered for sale. The numbers in 011–017 apply equally to bibliographies and catalogs, regardless of the name given to a specific resource.

011.39 vs. 005.3029, 016.0053, 025.0422

Bibliographies of electronic resources

Use 011.39 for general bibliographies of electronic resources *not limited to computer programs* (*or software*). Use 005.3029 for annotated lists of programs with lengthy reviews that are used as buyers' guides, e.g., a collection of reviews of personal computer software 005.36029. Use 016.0053 for bibliographies and lists of programs and for annotated lists if the annotations are relatively brief. Use 025.0422 for bibliographies of web sites, as they are normally indistinguishable from directories of web sites. If in doubt, prefer 011.39.

See also discussion at 011-017; also at 025.04, 025.06 vs. 005.74.

016 vs. 026, T1-07

Bibliographies and catalogs of specific subjects vs. Libraries on specific subjects vs. Table 1 notation for resources for education, research, related topics

Use 016 or 026 for works describing books, manuscripts, recordings, and the like, unless the works also describe kinds of resources not found in libraries and archives or emphasize how to use the library or archival resources for study, teaching, and research.

Use notation 07 from Table 1 for comprehensive works on resources for education, research, and related topics in a specific subject. Many of these resources are found in subdivisions of T1—07, e.g., schools and laboratories, collections of objects (such as botanical collections), and financial support.

Use 016 for works about resources in a field that describe individual works, such as books and articles. Use 016 also for inventories and calendars of archives. Use notation 07 from Table 1 in 016 if the resources being described treat education and research, e.g., a bibliography of material on education and research in mathematics 016.5107.

Use 026 for works about resources in a field that give broad descriptions of whole collections held by libraries, archives, and other information organizations. Such works often include directory information about the institutions and organizations.

If in doubt, prefer in the following order: 016, 026, T1—07.

025.04, 025.06 vs. 005.74

Data files and databases

Although there are technical differences between data files and databases, they are treated as the same for classification.

Use 025.04 or 025.06 for works on the information science aspects of the automated storage and retrieval systems that make databases available: that is, the kinds of things that users need to know about the systems in order to benefit fully from them.

Use 005.74 for computer science aspects of databases: that is, the narrowly technical issues of designing, programming, and installing databases and database management systems.

Use 001–999 for the subject content of databases (and works discussing that content) as if the databases were books, e.g., encyclopedic databases 030, bibliographic databases 010, nonbibliographic chemistry databases 540. Do not use notation 0285574 from Table 1 except for works that focus on the computer science aspects of the databases rather than the subject content.

If in doubt, prefer 025.04 and 025.06.

See also discussion at 011.39 vs. 005.3029, 016.0053, 025.0422.

080 vs. 800

General collections vs. Literature (Belles-lettres) and rhetoric

Use 080 for essays and quotations collected for nonliterary purposes, e.g., quotations collected to answer reference questions about who said something familiar. Use 080 also for collections of writings, statements or quotations on a variety of topics, e.g., a collection of quotations by Winston Churchill on various topics 082. Use 800 for a collection of quotations if all or nearly all the quotations come from works of poetry, drama, or fiction. Also use 800 for a collection of essays or quotations if the intent of the collection, as revealed in prefatory matter, is clearly literary, e.g., to exhibit literary style. If in doubt, prefer 080.

081-089

General collections in specific languages and language families

Class collections originally written in one language or language family with that language or language family. Class collections originally written in two or more languages or language families with the predominant language or language family if there is one. If no original language or language family is predominant, but the work appears in one language as a result of translation, class it with the language in which it appears. Use 080 for collections in which the material appears in multiple languages with none predominant, even if accompanied by translations into the language of the intended audience.

130 vs. 200

Parapsychology and occultism vs. Religion

Use 130 for parapsychological and occult phenomena if they are not presented as religious, or if there is doubt as to whether they have been so presented. Use 200 for

works about parapsychological or occult phenomena if the author describes them as religious, or the believers and practitioners consider them to be religious. If in doubt, prefer 130.

Use I30 for knowledge reputedly derived from secret and ancient religious texts but not applied for religious purposes; however, use 200 for editions of the texts, even if annotated from an occultist viewpoint, e.g., discussion of occult traditions derived from the Zohar 135.47, but the text of the Zohar 296.162.

152-158 vs. 150.19

Specific topics in psychology vs. Psychological systems, schools, viewpoints

Certain schools and systems draw their fundamental principles from a few selected psychological topics. When such topics are used to illustrate a system, class with the system in 150.19, e.g., the subconscious, fantasies, and dreams used to illustrate psychoanalytic principles 150.195 (*not* 154). If in doubt, prefer the specific topic in 152–158.

153 vs. 153.4

Conscious mental processes and intelligence vs. Thought, thinking, reasoning, intuition, value, judgment

Many works that claim to be about thought and thinking or reasoning also cover subjects such as memory, communication, perception, motivation, and intelligence. Use 153 (*not* 153.4) for these broader works. Use 153 (*not* 153.4) also for works on "cognitive psychology." Use 153.4 only for works that focus narrowly on thought and thinking, reasoning, intuition, value, judgment. If in doubt, prefer 153.

153.7 vs. 152.1

Perceptual processes vs. Sensory perception

Use 153.7 for comprehensive works on sensory perception and perceptual processes in general, and works that focus on the active, interpretative mental processes associated with perception in general. Also use 153.7 for types of perception that involve more than one sense, e.g., space perception that involves vision and touch 153.752. Use 152.1 for works that focus on the receptive aspects of sensory perception and comprehensive works on perception by a specific sense, e.g., visual perception 152.14. If in doubt, prefer 153.7.

155

Differential and developmental psychology

Some works on the psychology of sensory perception, movement, emotions, physiological drives (152) and conscious mental processes (153) use as research populations people belonging to differential groups, or people subject to environmental influences, that are given in 155.3–.9. Use 152–153 for works in which there is clearly little or no interest in the distinctiveness of the group or influence, or in which the researcher has simply used convenient samples. This is particularly applicable to ethnic and national groups (155.8), adults (155.6), and social environment (155.92).

Sex psychology

Use 155.3 for a study on sex psychology, drawing almost exclusively upon adult middle-class whites, but showing only marginal interest in the class, age, or ethnic group of the respondents. Use 155.3 also for discussion of the social class, national, or ethnic bias of such research, as the interest is in the validity of the findings about sex psychology.

155.89 vs. 155.84

National psychology vs. Psychology of specific ethnic groups in areas where they are not predominant

Use 155.89 for the psychology of nations taken as a whole, and the psychology of ethnic groups that are predominant in an area constituting an independent nation. Use 155.84 for the psychology of ethnic groups taken as a whole and the psychology of ethnic groups in areas where they are not predominant. For example, use 155.89595 for the national psychology of Malaysia or the psychology of Malays in Malaysia; but use 155.849928 for the psychology of Malays taken as a whole, 155.8499280593 for Malays in Thailand. If in doubt, prefer 155.89.

170,92 vs. 171

Persons associated with ethics vs. Ethical systems

Use 170.92 for biography, collected works, critical appraisal of the work of an individual moral philosopher if the ethical system represented by the philosopher cannot be determined. Use 171 for biography, collected works, critical appraisal if the ethical system can be determined, e.g., critical appraisal of the ethics of Jeremy Bentham 171.5092. If in doubt, prefer 170.92.

180-190

History, geographic treatment, biography

Class single works by individual philosophers with the topic in philosophy. If there is no focus on a specific topic, class a work expressing primarily the philosopher's own viewpoint with the collected works of the philosopher in 180–190, e.g., use 193 for a general work by Hegel, such as *Phenomenology of Spirit*.

Class a work by an individual philosopher that is primarily a discussion of other philosophers' writings with the other philosophers' writings. For example, use 190 for a work by a western philosopher that is mostly a criticism of contemporary philosophers.

Use 100 for a work by an individual that takes a broad look at many questions in philosophy and does not seek to argue for the individual's own viewpoint.

200 vs. 100

Religion vs. Philosophy

Both religion and philosophy deal with the ultimate nature of existence and relationships, but religion treats them within the context of revelation, deity, worship. Philosophy of religion (210) does not involve revelation or worship but does examine questions within the context of deity.

Use 200 for any work that emphasizes revelation, deity, or worship, even if it uses philosophical methods, e.g., a philosophical proof of the existence of God 212.1. Use 180–190 for the thought of a religious tradition used to examine philosophical questions without reference to deity or religious topics, e.g., Jewish philosophy 181.06, Christian philosophy 190. However, use 200 for ethics based on a religion. If in doubt, prefer 200.

200.9 vs. 294, 299.5

Geographic treatment of religion vs. Religions of Indic and of East and Southeast Asian origin

Use 200.9 for works covering various religious traditions in an area, not just the religions that originated there, e.g., use 200.954 for the religions of India (including Christianity and Islam), use 200.951 for the religions of China (including Christianity and Buddhism). Use 294 and 299.5 for the religions that originated in particular geographic areas. Most of these religions have spread beyond the area where they originated. These areas also have adherents of religions that originated elsewhere, e.g., Buddhism (which originated in India) is present in China. If in doubt, prefer 200.9.

200.92 and 201-209, 292-299

Persons associated with religions other than Christianity

Persons associated with the religions in 292–299 are often identified with a number of religious functions and activities. For example, a Hindu guru may be thought of as a theologian, a teacher, a missionary, or a clergyman. If a religious leader cannot be identified primarily with one function, activity, or sect, class the leader's biography in the base number for the religion and add notation 092 from Table 1. Use 200.922 for collected biography of persons from many religions who are not identified with one function or activity. Use a number that corresponds to the number given in the table below for persons associated with a specific religion, e.g., a Buddhist member of a religious order 294.3657092 (corresponds to 206.57092 in the table below). Use the following table of preference for comprehensive biographies of persons primarily identified with one function, activity, or sect:

| Founders of religions | 206.3 |
|--|-----------|
| Founders of sects | 209 |
| Founders of religious orders | 206.57092 |
| Religious leaders (high ranking officials) | 200.92 |
| Of specific sects | 209 |
| Theologians | 202.092 |
| Moral theologians | 205.092 |
| Missionaries | 207.2092 |
| Martyrs, heretics, saints | 200.92 |
| Of specific sects | 209 |
| Teachers | 207.5092 |
| Members of religious orders | 206.57092 |
| Clergy | 200.92 |
| Of specific sects | 209 |

Use the subdivisions of 206 for the nature, role, and function of religious leaders. Except for founders of religions (206.3) and founders and members of religious orders (206.57092), do not use the subdivisions of 206 for biography.

Class works dealing with only one aspect of a person's career with the aspect, e.g., Muḥammad as a moral theologian 297.5092 (not 297.63).

201-209 and 292-299

Comparative religion

Except for 296 Judaism and 297 Islam, the subdivisions of the various religions in 292–299 are based on 201–209. All topics in 201–209 are provided for under the separate religions in 292–299, either explicitly, by synthesis, or by implication, even if the order is sometimes different. What is said about 201–209, therefore, will also be true of 292–299.

Compare the topics in 201–209 with the subdivisions of Christianity for clues to placement of specific topics. A comparative list follows:

| Social theologies | 201.7 | 261 |
|--|-------|------------------|
| Doctrinal theologies | 202 | 230 |
| Public worship | 203 | 246-247, 263-265 |
| Religious experience, life, practice | 204 | 242, 248 |
| Religious ethics | 205 | 241 |
| Leaders and organizations | 206 | 250, 262, 267 |
| Pastoral theology and work | 206.1 | 253 |
| Missions, religious education | 207 | 266, 268 |
| Sources | 208 | 220 |
| Denominations, sects, reform movements | 209 | 280 |

Denominations and sects

Class a denomination or sect with the religion to which its own members say it belongs.

Class the early history of a specific religion before its division into sects as general history of the religion, but class a comprehensive survey of the various sects in the number for the sects of the religion, e.g., the sects and reform movements of Buddhism 294.39. Class a work dealing with both early history and sects in the general number for history of the religion.

Class religious orders in 206.5 and similar numbers in 292–299, not with any sect within the religion to which the orders may belong.

203.6, 263.9, 292–299 vs. 394.265–.267

Customs associated with religious holidays

Use 203.6, 263.9, and similar numbers in 292–299 for the religious customs associated with religious holidays, e.g., sunrise Easter services 263.93, lighting the Hanukkah lamp 296.435. Use 394.265–.267 for the secular customs associated with religious holidays, e.g., Easter egg hunts 394.2667, eating latkes and spinning the

Hanukkah top 394.267. If in doubt, prefer 203.6, 263.9, and similar numbers in 292–299.

207.5, 268 vs. 200.71, 230.071, 292-299

Religious education, Christian religious education vs. Education in religion, education in Christianity, in Christian theology

Use 207.5 (and similar numbers in 292–299, such as 294.575 Hindu religious education or 297.77 Islamic religious education) for works on how various religions educate their members (especially young members) to be good followers of their own religions, usually called "religious education." Such education stresses knowledge of the faith and living as a member of a religion, and is meant to instill the values of a particular religion, not to study it in a detached manner. Use 268 for religious education as a ministry of the Christian church for the purpose of confirming believers in Christian faith and life, and religious education programs sponsored by the local church.

Use 200.71 for works on education in and teaching of comparative religion, the religions of the world, and religion as an academic subject, usually called "religious studies." Use 230.071 for works on education in and teaching of Christianity as an academic subject, e.g., a course on Christianity in secular secondary schools 230.0712. Use a similar number in 292–299 for works on education in and teaching of another specific religion as an academic subject, e.g., a course on Hinduism in secular secondary schools 294.50712, on Islam 297.0712.

If in doubt as to which type of education is being treated, prefer 207.5 (or a similar number in 292–299) and 268.

Use 200.711 (*not* 207.5) for works on religious education at the level of higher education, and for works on the education of the clergy. Use 230.0711 (*not* 268) for works on higher education in both Christianity and Christian theology and for works on education of the clergy; all of this education usually takes place in divinity schools, theological seminaries, and graduate departments of theology or ministry in universities. Class education or training of the clergy for specialized work with the specialty, e.g., courses in Biblical studies 220.0711, programs in Christian pastoral counseling 253.50711. Use similar numbers from 292–299, e.g., university education in Islam 297.0711.

Class study and teaching of specific topics in comparative religion, Christianity, or the specific religions in 292–299, as follows:

Class works on teaching a specific topic to children of primary-school age with works on religious education of children in general, e.g., Christian religious education courses on the Bible for children 268.432; Jewish religious education courses on the Tanakh (scriptures) for children 296.68.

Class works on teaching a specific topic to persons of secondary-school age and older with the topic using notation 071 from Table 1, e.g., study and teaching of Christian church history in secondary schools 270.0712; study of the Tanakh in Jewish colleges and universities 221.0711.

Use 268.434 for Christian religious education of adults, other than in the setting of formal higher education, e.g., works on adult education in parish religious education programs or Sunday schools.

220.92

Biography of individual persons in Bible

Class a comprehensive biography of a Biblical person with the book or books with which the person is most closely associated, usually the historical part of the Bible in which the person's life is narrated, e.g., Solomon, King of Israel, in 1st Kings 222.53092. Solomon's association with 223 Poetic books is weaker. However, some Biblical persons are more closely associated with nonhistorical books, e.g., class Isaiah and Timothy with the books that bear their names, 224.1092 and 227.83092, respectively. Although they appear briefly in historical narratives, their lives are not narrated in full there. Use 225.92 for the apostles John, Peter, and Paul, since each is associated with a number of books in the New Testament, but use 226.092 for the other apostles, associated primarily with Gospels and Acts.

See also discussion at 230–280.

221

Optional numbers for books of Old Testament (Tanakh)

Alphabetic index

Each of the books of the Old Testament (Tanakh) and the combination of them can have one of three different numbers depending on whether one chooses the preferred arrangement at 222–224 or one of the two optional arrangements. Optional numbers showing the books in the order found in Jewish Bibles appear as the second half of this entry (Option A) and at 296.11 (Option B). The following alphabetic listing gives the three numbers for each book or combination of books:

| Book | Preferred | Option A | Option B |
|-----------------------|-----------|----------|-----------|
| Amos | 224.8 | 223.63 | 296.1143 |
| Canticle of Canticles | 223.9 | 224.41 | 296.11641 |
| Chronicles | 222.6 | 224.8 | 296.1168 |
| Chronicles 1 | 222.63 | 224.81 | 296.11681 |
| Chronicles 2 | 222.64 | 224.82 | 296.11682 |
| Daniel | 224.5 | 224.5 | 296.1165 |
| Deuteronomy | 222.15 | 222.5 | 296.1125 |
| Ecclesiastes | 223.8 | 224.44 | 296.11644 |
| Exodus | 222.12 | 222.2 | 296.1122 |
| Esther | 222.9 | 224.45 | 296.11645 |
| Ezekiel | 224.4 | 223.5 | 296.1139 |
| Ezra | 222.7 | 224.6 | 296.1166 |
| Five scrolls | 221.044 | 224.4 | 296.1164 |
| Former Prophets | 222 | 223.1 | 296.1131 |
| Genesis | 222.11 | 222.1 | 296.1121 |
| Habakkuk | 224.95 | 223.68 | 296.1148 |
| Haggai | 224.97 | 223.72 | 296.1152 |

| Hosea | 224.6 | 223.61 | 296.1141 |
|-----------------|---------|---------|-----------|
| Isaiah | 224.1 | 223.3 | 296.1137 |
| Jeremiah | 224.2 | 223.4 | 296.1138 |
| Job | 223.1 | 224.3 | 296.1163 |
| Joel | 224.7 | 223.62 | 296.1142 |
| Jonah | 224.92 | 223.65 | 296.1145 |
| Joshua | 222.2 | 223.11 | 296.1132 |
| Judges | 222.32 | 223.12 | 296.1133 |
| Ketuvim | 223 | 224 | 296.116 |
| Kings | 222.5 | 223.14 | 296.1135 |
| Kings 1 | 222.53 | 223.141 | 296.11351 |
| Kings 2 | 222.54 | 223.142 | 296.11352 |
| Kohelet | 223.8 | 224.44 | 296.11644 |
| Lamentations | 224.3 | 224.43 | 296.11643 |
| Later Prophets | 224 | 223.2 | 296.1136 |
| Leviticus | 222.13 | 222.3 | 296.1123 |
| Malachi | 224.99 | 223.74 | 296.1154 |
| Megillot | 221.044 | 224.4 | 296.1164 |
| Micah | 224.93 | 223.66 | 296.1146 |
| Minor Prophets | 224.9 | 223.6 | 296.114 |
| Nahum | 224.94 | 223.67 | 296.1147 |
| Nehemiah | 222.8 | 224.7 | 296.1167 |
| Nevi'im | 224 | 223 | 296.113 |
| Numbers | 222.14 | 222.4 | 296.1124 |
| Obadiah | 224.91 | 223.64 | 296.1144 |
| Pentateuch | 222.1 | 222 | 296.112 |
| Prophetic books | 224 | 223 | 296.113 |
| Proverbs | 223.7 | 224.2 | 296.1162 |
| Pslams | 223.2 | 224.1 | 296.1161 |
| Qohelet | 223.8 | 224.44 | 296.11644 |
| Ruth | 222.35 | 224.42 | 296.11642 |
| Samuel | 222.4 | 223.13 | 296.1134 |
| Samuel 1 | 222.43 | 223.131 | 296.11341 |
| Samuel 2 | 222.44 | 223.132 | 296.11342 |
| Song of Solomon | 223.9 | 224.41 | 296.11641 |
| Song of Songs | 223.9 | 224.41 | 296.11641 |
| Torah | 222.1 | 222 | 296.112 |
| Writings | 223 | 224 | 296.116 |
| Zechariah | 224.98 | 223.73 | 296.1153 |
| Zephaniah | 224.96 | 223.71 | 296.1151 |

The following schedule is an optional arrangement for books of the Bible as found in Jewish Bibles. The preferred arrangement is at 222–224 in the regular schedule. Option B is given at 296.11 in the regular schedule. The see references and footnote instructions in this optional arrangement refer to numbers in the schedules, not to other numbers found in the Manual entries.

> (222–224) Optional numbers for books of Bible as arranged in Tanakh (Jewish Bible, Hebrew Bible)

230-280

Persons associated with Christianity

Use the following table of preference for comprehensive biographies: Jesus Christ, Mary, Joseph, Joachim, Anne, John the Baptist 232.9 Other persons in the Bible 220 Founders of denominations 280 Founders of religious orders 271 Higher clergy (e.g., popes, metropolitans, archbishops, 270.1 - .3bishops) prior to 1054 Higher clergy subsequent to 1054 280 Theologians 230 Moral theologians 241 Missionaries 266 269.2 **Evangelists** Persons noted for participation in associations for religious 267 272 Martyrs Heretics 273 270 Saints Saints prior to 1054 270.1 - .3Saints subsequent to 1054 280 248.22 **Mystics** Hymn writers 264.23 Religious educators 268 Members of religious orders 271 Clergy prior to 1054 270.1 - .3Clergy subsequent to 1054 280 Members of the early church to 1054 270.1 - .3Members of denominations 280 Christian biography of persons who fall in none of the above 270 categories

Add notation 092 from Table 1 as appropriate, e.g., collected biography of saints 270.0922; Pope Gregory the Great 270.2092.

Use numbers in the range 220–269 other than those listed in the table of preference above for comprehensive biographies of persons with specialized religious careers, or for works treating only one aspect of a person's life and work, e.g., a Biblical scholar 220.092.

Use subdivisions of 230 for biography and criticism of individual theologians, e.g., Saint Thomas Aquinas 230.2092. Use 230.044092 for Protestant theologians who are not connected with a specific denomination or who are important and influential enough to transcend their own denominations, e.g., Karl Barth 230.044092. Use 230.092 for theologians not connected with any specific type of theology. If in doubt, prefer 230.092. Class critical appraisal of an individual theologian's thought on a specific topic with the topic, e.g., on justification 234.7092.

Do not use 248.2 Religious experience or its subdivisions except 248.22 for comprehensive biographies, e.g., a biography of Teresa of Avila's religious life 282.092 (not 248.2092). However, use 248.2 for biographical accounts written for devotional purposes, not as comprehensive accounts of a person's life, e.g., the story of one's conversion 248.246092.

Do not use 253, 255, and 262.1 for biographies of persons who are members of the groups listed in the table of preference above.

Class biographies of members of specific denominations and sects with the main branch of the denomination rather than with the most specific organization or area, e.g., a biography of a member of the Lutheran Church in America 284.1092 (not 284.133092); a biography of a clergyman of the African Methodist Episcopal Church 287.8092 (not 287.83); a biography of a Russian clergyman of the Orthodox Church 281.9092 (not 281.947092); collected biography of Catholics in the United States 282.092273.

Use 280 without subdivision for members of nondenominational and interdenominational Christian churches. Also use 280 without subdivision if a person living after 1054 belongs to a Christian church, but it cannot be determined which denomination.

If a person does not belong to a church, or if it cannot be determined whether the person belongs to a church, use the historical period that most closely matches the individual's life span or the time period of the individual's greatest prominence in 270 and the country if known, e.g., biography of a 20th-century Christian 270.82092, biography of a 20th-century United States Christian 277.3082092.

See also discussion at 220.92.

231,7652 vs. 213, 500, 576.8

Relation of scientific and Christian viewpoints of origin of universe vs. Creation in philosophy of religion vs. Natural sciences and mathematics vs. Evolution

Evolution versus creation

Use 231.7652 for works on creation science or creationism written by Christians who assume that the Bible provides a chronology of natural history and who rely upon religious premises in responding to theories from the natural sciences. Similarly, use 231.7652 for works that attempt to refute creation science, unless they take the writings of creationists as a starting point from which to demonstrate the case for evolution. On the other hand, use 500 for works by creationist authors that attempt to refute evolution theory by examining the writings, hypotheses, and findings of scientists.

The difficulty stems from the fact that on the question of evolution the *pro* and *con* positions differ so radically that they normally belong in different disciplines, science and religion, respectively. However, when a religious author is trying to enlighten scientists on a specific scientific matter, class the work with science, while if a scientist is trying to enlighten the religious on a specific religious matter, class the work with religion. The correct classification is determined by the intent of the

author, and the interest of the readers that the author is seeking to reach, not by the truth, falsity, or validity of interpretations and premises.

Use 231.7652 for comprehensive works including both religion and science.

Use 213 for works that consider the relation between divine creation and evolution as a philosophical problem, without appealing to a particular religion or scripture. If in doubt between 213 and 231.7652, prefer 231.7652.

The most common focus of interest of works belonging in 500 is on biological evolution. Use 576.8 for these works. Use 523.88 if the emphasis of a work is mainly on stellar evolution, 530 if on basic physical principles, 551.7 if on historical geology, and 560 if on paleontology. Use 500 if there is no clear emphasis on a specific branch of science.

241 vs. 261.8

Christian ethics vs. Christian social theology

Some topics are covered in both religious ethics and social theology, e.g., war and peace (241.6242, 261.873). Use 241 for works that focus on what conduct is right or wrong. Use 261.8 for works that may discuss right and wrong, but treat the topic in a broader context as a problem in society and discuss Christian attitudes toward and influence on the problem. Use 241 for works that emphasize what the individual should do. Use 261.8 for works that stress what the church's stance should be, what response the church or Christian community should make to alleviate the problem, or the church's view on problems transcending individual conduct. If in doubt, prefer 241.

260 vs. 251-254, 259

Christian social and ecclesiastical theology vs. Local church and Pastoral care of specific kinds of persons

The local church is the group in which individual believers can meet regularly face to face for worship, fellowship, and church activities—for example, a congregation, a college church group.

Among the more recent forms of the local church are the small groups called basic Christian communities or basic ecclesial communities. These are smaller than parishes or congregations, but, like other forms of the local church, are organized for the general religious welfare of their members, not just for special projects or functions. Class these in the same way as parishes, i.e., class comprehensive works in 250 (or in 262.26 when treated as part of ecclesiology), and class specific aspects with the aspect in the subdivisions of 250.

Use either 250 or 260 for activities undertaken by the church, depending on the context. Use 250 for works intended for the individual practitioner in the local setting. This may be as small as a parish youth group or as large as a counseling program that serves a metropolitan area. Use 261 for the church's attitude to cultural and social problems, and its activities regarding them, unless the context is limited to the local church, e.g., a practical work for the prison chaplain 259.5, but the church's attitude to the treatment of criminals 261.8336. If in doubt, prefer 260.

Use 260 for some activities that can be conducted by the local church, e.g., public worship (264–265), religious education (268), spiritual renewal and evangelism (269), as the context of works on these subjects is often broader than the local church.

Use 262 for church organization, unless the scope is limited to administration of the local church (254).

261.5

Christianity and secular disciplines

Use 261.5 for personal Christian views and church teachings about secular disciplines as a whole, their value, how seriously a Christian should take them, how far the disciplines should affect faith. Class Christian philosophy of a secular discipline with the discipline, e.g., a Christian philosophy of psychology 150.1. In some cases specific provision is made for use of secular disciplines for religious purposes, e.g., use of drama 246.72. If in doubt, class with the secular discipline.

270, 230.11-.14 vs. 230.15-.2, 281.5-.9, 282

Early church to 1054 vs. Eastern churches, Roman Catholic Church

Use 270.1–.3 (*not* 281.1–.4) for the history of the Church prior to 1054, because the early church is considered to be undivided by denominations until the schism of 1054. Use 274–279 for the history of specific churches prior to 1054.

Use 270.1–.3 or 274–279 for the history of the Eastern and Roman Catholic churches before 1054. Use 281.5–.9 or 282 for works on later history or works that cover both the early and later history. If in doubt for works about both Eastern and Roman Catholic churches, prefer 270. If in doubt for works about a specific denomination, prefer 281.5–.9 or 282.

Use 230.11–.14 for theology of Eastern and Roman Catholic churches before 1054. Use 230.15–.2 for later theology.

280.042 vs. 262.0011

Relations between denominations vs. Ecumenism

Use 280.042 for works on the ecumenical movement and interdenominational cooperation. Use 280.042 also for works on relations between two or more specific denominations having notation that differs in the first three digits, e.g., relations between Roman Catholics (282) and Lutherans (284.1). Class works about relations among denominations having the same notation in the first three digits in the most specific number that includes them all, e.g., relations among the various Baptist denominations, between Baptists and Disciples of Christ 286. Class works about relations between one denomination and several others with the denomination emphasized, e.g., relations between Baptists and other denominations 286. Class discussions among denominations on a specific subject with the subject, e.g., the Eucharist 234.163. Use 262.0011 for theoretical works on ecumenism. If in doubt, prefer 280.042.

283-289

Protestant and other denominations

Under the general name of some denominations, e.g., Presbyterian churches of United States origin 285.1, notation is provided for specific denominations, e.g., 285.13. The specific denominations are named church bodies uniting a number of individual local churches, e.g., the Presbyterian Church (U.S.A.) 285.137, the Associate Presbyterian Church of North America 285.13 (the latter denomination is not listed in the schedule). Along with notation for specific denominations, a span for treatment of the denomination by continent, country, or locality will also be provided, e.g., 285.14—19. Use the notation for specific denominations if the denominations are treated with regard to all or nearly all the geographic area they cover, but use the span for treatment by continent, country, or locality for works on a specific denomination covering a smaller area, e.g., use 286.132 for the Southern Baptist Convention, but use 286.1768 for a state association of Southern Baptist churches in Tennessee (286.1 plus notation 768 for Tennessee from Table 2). Use the span for treatment by continent, country, or locality for individual local churches, regardless of the specific denomination to which they belong. Also use the span for treatment by continent, country, or locality for a work about several specific denominations in one country by area, e.g., a work describing the various Presbyterian denominations in the United States 285.173 (not 285.13).

Where the notation for specific denominations is limited to churches that originated in the United States or the British Commonwealth, e.g., the numbers following 284.1, 285.1, 285.2 and 287.5, use the span for treatment by continent, country, or locality for specific denominations in other areas, e.g., use 284.135 for the Evangelical Lutheran Church in America, but use 284.1485 (284.1 plus notation 485 for Sweden from Table 2) for the Lutheran Church of Sweden.

297.092

Persons associated with Islam

Use the following table of preference for comprehensive biographies of persons associated with an identifiable function, activity, or sect in Islam:

| Muḥammad the Prophet | 297.63 |
|--|------------|
| Muḥammad's family | 297.64 |
| Muḥammad's companions | 297.648 |
| Prophets prior to Muhammad | 297.246092 |
| Other persons in Koran | 297.122092 |
| Founders of sects and reform movements | 297.8 |
| Founders of Sufi orders | 297.48 |
| Higher non-Sufi religious leaders | 297.092 |
| Of specific sects and movements | 297.8 |
| Theologians | 297.2092 |
| Moral theologians | 297.5092 |
| Da'wah workers | 297.74 |
| Leaders and members of Sufi orders | 297.48 |
| Other Sufis (mystics) | 297.4 |
| Religious educators | 297.77092 |
| | |

| Mosque officers | 297.092 |
|---------------------------------|---------|
| Of specific sects and movements | 297.8 |
| Members of sects and movements | 297.8 |

Use 297.61 Leaders and their work for the role, function, and duties of religious leaders, not for biography of religious leaders.

Class works dealing with only one specialized aspect of a person's career or religious experience with the aspect, e.g., an account of conversion to Islam 297.574092.

Use 297.092 if a Muslim cannot be identified primarily with one function, activity, or sect.

297.26-.27

Islam and secular disciplines

Use numbers outside 200 for works that focus on issues of importance to practitioners of a secular discipline and for works that describe achievements of Muslims working within the discipline, but use 297.26–.27 for works that focus on Islamic theological issues in relation to secular disciplines. For example, class works describing achievements of Islamic arts with art, but use 297.267 for Islamic attitudes toward the arts, e.g., what kinds of music and visual arts are consistent with Islamic beliefs. Use 320.91767 (political situation and conditions in the Islamic world) or another subdivision of 320 for a work on Islam and politics that emphasizes issues primarily of concern to political scientists, but use 297.272 for a work on Islam and politics that emphasizes Islamic religious issues. If in doubt, prefer a number outside 297.

299.93

New Age religions

Class New Age perspectives on health and medicine, environmentalism, gardening, and other activities and areas of knowledge with the subject and discipline under discussion, even if the discussion rejects some of the main tenets of the discipline, e.g., using mental energy to cure illness 615.851.

Use 130 and its subdivisions for New Age literature mostly concerned with psychic and paranormal phenomena.

Use 201–209 for works on some aspects of religion from a New Age perspective if the works do not attempt to speak for a particular known religion or to establish a new religion or sect, e.g., use 204 for a New Age perspective on spirituality.

Use 299.93 for works concerned with several New Age religions, but use 200 if the work includes sects of the more established religions, e.g., sects of Buddhism, Hinduism, Native American religion, etc.

Use 299.93 for comprehensive works on the New Age as a whole or as a movement.

300-330, 355-390 vs. 342-347, 352-354

Bills, hearings, and legislative reports

Use 300-330 and 355-390 for:

General hearings and related reports, e.g., hearings on the state of the United States economy 330.973

Hearings and related reports on public policy

Oversight hearings and related reports that focus on whether present appropriations, laws, and public policies are meeting the needs of society

Hearings and related reports of legislative investigations not related to proposed legislation, e.g., investigations into political corruption 364.131

Military appropriation and authorization bills, hearings, and related reports

Use 342-347 for:

Bills, hearings, and reports relating to ordinary laws

Bills (including authorizations and appropriation bills) and related hearings and reports that establish government agencies. Use the number for the subject with which the agency deals, e.g., a bill to establish the U.S. Department of Education 344.73070262

Hearings on judicial nominations. Use numbers in 345 and 347, e.g., a hearing on a nomination to the U.S. Supreme Court 347.732634

Use 352-354 for:

Hearings and related reports on nonmilitary authorizations and appropriations that do not emphasize public policy and the needs of society. Use 352.49 plus notation 023 from the table under 352.493—499 for general hearings and reports, e.g., hearings on appropriations in Germany that do not emphasize public policy and the needs of society 352.4943023. Use the number for a specific agency plus notation 249 from the table under 352–354 for hearings and reports on a specific agency that do not emphasize public policy and the needs of society, e.g., hearings that do not emphasize health policy on appropriations to support health facilities 353.68249, to support health care facilities in Germany 353.6824943023

Oversight hearings focusing on agency internal performance. Use the number for the agency, e.g., an oversight hearing on internal performance of the U.S. Bureau of Indian Affairs 353.53497073

If in doubt, prefer in the following order: 300–330 and 355–390; 352–354; 342–347.

See also discussion at 300, 320.6 vs. 352–354: Nomination hearings.

300, 320.6 vs. 352-354

Social sciences and policy formulation vs. Specific topics of public administration

Public policy

Use 000–199, 300–349, 355–399, 600–999 for the public policy itself (what the policy is or should be, as distinct from how it is formulated or administered) in specific fields, e.g., public policy for libraries 021.8, economic development and growth policies 338.9, welfare policy 361.61, arts policy 700; however, religious policy is classed in 322.1, language policy in 306.449, and science policy in 338.926. However, use 323 for policies with civil rights implications, e.g., citizenship policy 323.6 (*not* 303.4833 or 353.48).

Certain policies have names that suggest one discipline but actually concern another. For example, use 338.926 for technology policy, technology transfer policy, research and development (R and D) policy, and even science policy if formulated in terms of promoting economic growth and development.

Use 320.6 for interdisciplinary works on policy formulation, and works on how society as a whole makes up its mind. Governments usually, but not always, make up the leading parties in policy formulation, e.g., presidents, governors, courts, and legislatures at various levels. Use 320.6 for policy formulation led or mediated by agencies in two or more branches of government, but use 352.34 for policy formulation conducted by executive agencies, how an executive decides upon policies and gets them carried out. Class policy formulation in a specific field by "the government" or society with the policy as explained above, but class policy formulation by executive agencies in specific fields in 352–354, plus notation 234 derived from 352.34.

For example, use 323 for a work about what civil rights policies are or should be, and on how society as a whole decides what they should be; 353.48234 for a work on how a civil rights agency resolves policy issues; and 353.485 for a work on how to administer civil rights policies. Similarly, use 338.9 for a work on economic development, 354.27 for a report on an economic development agency, and 354.27234 for a work on policy making in an economic development agency.

If in doubt, prefer the number outside public administration.

Nomination hearings

Class all nomination hearings for executive officers in 352–354, because it is difficult to determine whether emphasis is on matters like personal qualifications and administrative issues or on the policies that the agency should carry out. Class nominations for the head of an agency in the field that the agency administers, plus notation 2293 from the table under 352–354, e.g., nomination hearing for an attorney general 353.42293.

See also discussion at T1-068 vs. 353-354.

300 vs. 600

Social sciences vs. Technology

Use 300 for works that discuss the social implications of a technology, e.g., the economic importance of lumbering 338.17498 (*not* 634.98). Use 300 for works on the social utilization, the social control, and the social effect of technology. Use 600 for works that discuss how to make, operate, maintain, or repair something, e.g., manufacture of motor vehicles 629.2.

Use 300 rather than 600 for the following categories of material:

- 1. Works that emphasize the social use of the topic rather than operating or processing it, e.g., tea drinking in England 394.12 (*not* 641.33720942 or 641.63720942)
- 2. Works that emphasize the overall perspective, e.g., the shift from coal to oil in American industry 333.82130973 (not 621.4023)
- 3. Works that emphasize the social control as opposed to the control exercised during the manufacturing process, e.g., standards of drug quality imposed by a government agency or a trade association 363.1946 (*not* 615.19)
- 4. Works that cite raw statistics, e.g., crop production, acreage, fertilizer consumption, farm size 338.1 (not 630)

Technical reports

Use 300 for technical and research reports that emphasize procedural technicalities and refer to economic, legal, administrative, or regulatory complexities. Consider the purpose of the writer and the mission of the agency authorizing the reports in determining the classification of a report series, and of individual reports in a series. Use 300 if the emphasis is on the exercise of social control over a process or the social aspects of technological processes, e.g., water quality monitoring systems 363.739463 (*not* 628.161), a work describing how railroads serve Argentina 385.0982 (*not* 625.100982); a report on fertilizer and rice studying production efficiency in developing countries 338.162 (*not* 633.1889).

Interdisciplinary works

Use 300 as the interdisciplinary number for a phenomenon of social significance; and as the place of last resort for general works on a subject lacking disciplinary focus, e.g., a work on industrial archaeology not emphasizing how things were made 338.47609 (not 609). However, use 600 for works that emphasize descriptions of products or structures, such as clocks, locomotives, and windmills.

Biography and company history

Use 600 for works on artisans, engineers, and inventors. However, use 338.7 for works on artisans, engineers, and inventors who are of more interest as entrepreneurs, e.g., Henry Ford 338.76292092.

Use 600 (or 700 if the interest is artistic) for works on the products of specific companies that emphasize the description and design of the products, e.g., Seth Thomas clocks or Ferrari automobiles. However, use 338.7 if the organization or history of the company receives significant attention, e.g., Seth Thomas

clocks 681.113097461, but the Seth Thomas Clock Company and its clocks 338.7681113097461.

301-307 vs. 361-365

Sociology vs. Social problems and services

Use 301–307 only for works on social phenomena that focus on the phenomena themselves and not on actual or potential remedies to any social problems that those phenomena may cause.

Use 361–365 for works on social phenomena that focus on actual or potential remedies to the social problems that those phenomena cause.

Examples:

- 1. Use 306.85 for the family as a social phenomenon.
- 2. Use 306.88 for a work discussing the effect of the changing social roles of men and women in the dissolution of the family.
- 3. Use 362.82 for a work that discusses actual and potential remedies for family dissolution.

If in doubt, prefer 301–307.

302-307 vs. 150, T1-019

Social psychology vs. Psychology

Use 302–307 for works that focus on group behavior, including those that discuss the role of the individual in group behavior. Use 150 for works that focus on the individual, including those that discuss the influence of group behavior on the individual. If in doubt, prefer 302–307.

Use 302–307 without adding notation 019 from Table 1 for application of social psychology to a subject, e.g., social psychology of religion 306.6. Use the number for the subject plus notation 019 from Table 1 for the application of psychology to a subject, e.g., individual psychology of religion 200.19. If in doubt, prefer 302–307.

302-307 vs. 156

Comparative psychology

Use 302–307 for works considering the social behavior of animals as a background to human social behavior. Use 156 for works on comparative social psychology when used to shed light on the behavior of the individual. If in doubt, prefer 302–307.

302-307 vs. 320

Specific topics in sociology and anthropology vs. Political science

Use 302–307 for works on social institutions, processes, and phenomena if they emphasize how the social topics are related to and manifested in political ones, even if they have a political cast. Only use 320 for works on political institutions,

processes, and phenomena in which the political aspects are emphasized. For example, use 305.42 (*not* 324.623) for a work on the relation between the feminist movement and the enfranchisement of women. If in doubt, prefer 302–307.

303.483 vs. 306.45, 306.46

Social effects of science and technology

Use 303.483 for the effects of scientific discoveries and technological innovations upon society, e.g., a work on the transformation of religious, economic, and leisure institutions stemming from the development of electronic media 303.4833. Use 306.4 for the patterns of behavior of the individuals and groups engaged in scientific or technical endeavors, e.g., a description of the milieu that seems to be conducive to technological innovation 306.46. If in doubt, prefer 303.483.

305.6 vs. 305.92, 306.6

Sociology of religion and religious groups

Use 305.6 for the sociology of a group of people who are identified as belonging to a particular religion, especially if they are a minority group in a particular place, e.g., a work on the sociology of Christians in Indonesia 305.67598.

Use 305.92 for the sociology of a group of people whose occupation is religious, e.g., a work on the sociology of shamans 305.920144, a work on the sociology of people in Christian religious orders 305.9255.

Use 306.6 for the sociology of religious institutions considered from a secular viewpoint, e.g., a work on the sociology of the Christian Church 306.66.

If in doubt, prefer in the following order: 306.6, 305.6, 305.92.

305.9 vs. 305.5

People by occupation vs. People by social and economic levels

Use 305.9 for works on an occupational group when either

- I. there is little or no emphasis on social or economic level,
- 2. the group is well represented in two or more distinct social or economic levels, or
- 3. the group has an indefinite or transitional status.

Use 305.5 for works on an occupational group considered in terms of its specific social status. If in doubt, prefer 305.9.

306 vs. 305, 909, 930-990

Groups of people vs. Culture and institutions vs. History

Use 305 for groups of people, e.g., women as a social category 305.4. Use 306 for social institutions, e.g., the family 306.85. Use the number for the institution in 306, plus notation 08 from Table 1, for the role of a specific groups in a specific institution of society, e.g., women in the family 306.85082.

Use 909 and 930–990 for the role of groups of people in history, and for accounts of the major events shaping the history. In particular, use 909 and 930–990 for the history of ethnic and national groups.

If in doubt, prefer in the following order: 306, 305, 909, 930–990.

307

Communities

Use 307 for works on the community in a relatively restricted area as a social phenomenon and works on community planning, development, and redevelopment. These terms are used here in their ordinary meaning to imply the planning for and development of the community as a whole. Use 300 apart from 307 for works where specific subjects of community interest are addressed, e.g., economic development of the community 338.93–.99, developing hospitals for the community 362.11, planning community housing 363.5525, planning the city water supply 363.61, planning the education system 379.4–.9.

320 vs. 306.2

Politics of political institutions vs. Sociology of political institutions

Use 320 for works on the descriptive, comparative, historical, and theoretical study of political institutions and processes, in which the social environment is considered only as a background. Use 306.2 for works on the social dynamics of political institutions, the social sources (e.g., ethnic group, class, family) and the social processes of political institutions, or the impact of these institutions and their activity on the social environment. Use 306.2 also for works dealing with political institutions and processes as models for social institutions and processes. If in doubt, prefer 320.

320.557 vs. 297.09, 297.272, 322.1

Islamism and Islamic fundamentalism

Use 320.557 for works emphasizing the religiously oriented political ideologies of Islamism or Islamic fundamentalism; and for works on Islamism or Islamic fundamentalism that emphasize political aspects from a secular viewpoint.

Use 297.09 and other subdivisions of 297 only for works that emphasize religious aspects of Islamism or Islamic fundamentalism, such as a concern to maintain and hand down a pure version of the Islamic faith, a mindfulness to follow the strict letter of the Koran and Hadith, an attempt to generate a religious reawakening through preaching, teaching, and other forms of religious communication. Use 297.272 only for works that treat politics from the religious point of view.

Use 322.1 for works emphasizing the political role of Islamist or Islamic fundamentalist organizations and groups in relation to the state.

Use notation 082 Religious parties from table under 324.24–.29 for Islamist parties that function as regular political parties, e.g., Turkish Islamist parties 324.2561082, comparative studies of Islamist parties 324.2182.

If in doubt, prefer in the following order: 320.557; 322.1, 324.2; a subdivision of 297.

320.9, 320.4 vs. 351

Government vs. Public administration

Government is limited to considerations of the nature, role, goals and structure of states; their political direction and control; and how central controls are exercised and balanced against each other. Public administration concentrates on executive agencies and the procedures used to carry out their goals, policies, and actions in various fields

Use 320.9 for works that discuss the habitual conduct and methods of people in high office, even if they appear to cover the structure and functions of government.

Use 320.4 for works on the overall structure of governments, emphasizing their chief legislative, judicial, and executive organs, or for works that discuss typical activities of the different branches, e.g., regulating safety as an illustration of the police function. Use 320.4 also for comprehensive works on government and public administration of specific areas, but not for works emphasizing the work of carrying out goals and policies. Use 320 for interdisciplinary works on government and public administration not limited to specific areas.

Use 351 for works that emphasize agencies of the executive branch, or the usual components of administration: planning, organizing, staffing, financing, and equipping agencies to do a job.

If in doubt, prefer in the following order: 320.9, 320.4, 351.

322.1 vs. 201.72, 261.7, 292-299

Politics and religion

Use 322.1 for works discussing the relationships between religious organizations or movements and states or governments from a secular perspective. Use 201.72, 261.7, and similar numbers in 292–299 for works on the position that religious people and organizations take or should take toward political affairs (including the state). If in doubt, prefer 322.1.

324 vs. 320

The political process vs. Politics and government

Use 324 for works limited to party politics, but use 320 for comprehensive works on politics. "Politics" in the caption at 320 covers the concepts of adjusting relationships among individuals and groups in a political community, guiding and influencing the policy of government, and winning and holding control of society. If in doubt, prefer 324.

See also discussion at 909, 930–990 vs. 320.

324 vs. 320.5, 320.9, 909, 930-990

Political movements

Use 324 for works on the attempts of political movements to achieve power by nonviolent means and their ventures into electoral politics (even as splinter parties with scant chance of success). Use 320.5 for works concerning the thought and internal history or dynamics of political ideological movements. Use 320.5 also for

comprehensive works on specific ideological movements. Use 320.9 for the impact of these movements on the political system and their interaction with other political forces. Use 909, 930–990 for works on movements that come to power or directly affect the major events of history. If in doubt, prefer in the following order: 324, 909 and 930–990, 320.9, 320.5.

See also discussion at 909, 930-990 vs. 320.

324.2094-.2099 and 324.24-.29

Political parties in specific continents, countries, localities in modern world

Use 324.209 (or 324.21 for specific kind of party) for treatment of political parties by continent and by region larger than a specific country, e.g., political parties in Europe 324.2094; Conservative parties in Europe 324.214094.

Use 324.24–.29 for treatment of political parties by country, using area notation for country from Table 2, followed by notation to express the party, e.g., political parties in United Kingdom 324.241; the Conservative Party 324.24104.

Use the country number in 324.24–.29, followed by notation to express the party, plus notation 09 from Table 1, for treatment of political parties by locality within a country, since in most countries the local party is a branch of the national party, or, at least, a local organization of persons who regard themselves as members of a national party, e.g., the Conservative Party in Wales 324.2410409429 (not 324.242904). Use the same rule for works on regionalist parties, e.g., a regionalist party in Wales 324.241098409429 (not 324.2429084). Use the national number, plus modified standard subdivision 324.2094–.2099 and 009, for comprehensive works on parties of a specific part of a nation, e.g., parties of Wales 324.241009429, of Catalonia 324.246009467.

However, for Canada, the United States, and Australia, each of which has strong traditions of autonomy for state and provincial parties, the political parties of states and provinces are treated like "countries" rather than like "localities," e.g., political parties of New York State 324.2747 (not 324.27309747); the Democratic Party in New York State 324.274706 (not 324.273609747). Regions and localities are subordinated to national or state and provincial numbers, e.g., the Democratic Party in the Midwest 324.27360977, in New York City 324.274706097471.

330 vs. 650, 658

Business

Use 330 for works on business that present general information, economic conditions, financial information (such as interest rates), and reports on what certain companies are doing. Use 650 for works on business that emphasize practical managerial information and that cover 651 Office services as well as 658 General management. Use 658 if the work is limited to management. Use 330 for comprehensive works on 330 and 650. If in doubt, prefer 330.

331.120424 vs. 331.1377

Full employment policies vs. Prevention and relief of unemployment

Use 331.120424 for works on government labor policies and programs wider than simply combating unemployment, e.g., public service employment as a measure to

provide both jobs for the unemployed and assistance to distressed areas and state and local governments. Use 331.1377 for works on government labor policies and programs that discuss them solely in terms of prevention and relief of unemployment. If in doubt, prefer 331.120424.

332, 336 vs. 339

Macroeconomics

Use 332 and 336 for works on economic topics considered in their own right, e.g., monetary activities of central banks 332.112. Use 339 if the topics are discussed in relation to the total economic picture of a country or region, since macroeconomics is the study of the economy as a whole, especially with reference to its general level of output and income and the interrelationships among sectors of the economy, e.g., activities of central banks undertaken primarily to carry out macroeconomic policy 339.53. If in doubt, prefer 332 and 336.

332 vs. 338, 658.15

Financial topics in production economics and financial management

Use 332 for works discussing financial topics from the viewpoint of people or organizations with money to invest and those who serve them—investors, bankers, stockbrokers, and the like. Use 338 for works discussing financial topics from the viewpoint of people concerned with the production of goods and services, or who are interested in capital because it is necessary for production. For example, use 332.6722 (domestic investment in specific types of enterprise) for a work discussing whether mining is a safe and profitable field of investment for the general public; but use 338.23 (financial aspects of extraction of minerals) for a work discussing whether the mining industry will attract enough investment to expand production. Use 658.15 (or the subject plus notation 0681 from Table 1) for works discussing financial topics from the viewpoint of an executive responsible for the financial management of an organization, or works that focus narrowly on managerial concerns. If in doubt, prefer 332.

332,632044 vs. 332,6323

Gilt-edged securities

Use 332.632044 for works on all types of gilt-edged securities. In American usage the term may refer to any security of exceptionally high quality, or it may refer primarily to high-quality bonds. Use 332.6323 for works only on bonds. Use 332.63232 also for British works on gilt-edged securities, as in British usage the term refers to government bonds. If in doubt, prefer 332.632044.

332.6322 vs. 332.6323

Stocks

Use 332.6322 for stocks in the sense of shares (American usage), but use 332.6323 for stocks in the sense of bonds (British usage). If in doubt, prefer 332.6322.

333.7-.9 vs. 363.1, 363.73, 577

Social aspects of ecology

Use numbers in 300 rather than 577 for works on ecology and specific natural environments that discuss public policy and resource economics rather than biology. Class works on natural resource management, environmental impacts and monitoring, risk assessment, development, conservation and biodiversity as follows:

- 1. Natural resource management: Use 333.7 or the number for the specific resource, e.g., management of wetlands 333.918.
- 2. Environmental impacts and monitoring:
 - A. The resource situation in general: Use 333.7 or the number for the specific resource (without adding any further subdivisions), e.g., monitoring biodiversity 333.95;
 - B. Environmental impacts: Use 333.714 or the number for the specific resource plus notation 14 from the table under 333.7–.9, e.g., monitoring the impact of reclamation projects on wetlands 333.91814;
 - C. Pollution levels: Use 363.7363 or the number for the specific kind of pollutant or environment plus notation 63 from table under 362–363, e.g., monitoring oil pollution 363.738263. (However, use 333.7–.9 as instructed under 2. B. above for the impact of pollution, e.g., monitoring the impact of oil pollution on wetlands 333.91814);
 - D. Potential environmental impacts: Class with the development whose impact is being studied, e.g., the potential impact of an oil pipeline on tundra ecology 388.55.

3. Risk assessment:

- A. Generalized risks to the environment: Class as an impact study in 333.714 or the number for the specific resource plus notation 14 from the table under 333.7–9, e.g., contemporary risks to wetlands of America 333.918140973;
- B. Safety risks: Use the subdivision for the specific threat in 363.1 plus notation 72 from the table under 362–363, e.g., assessing the risk to humans of pesticides in food 363.19272;
- C. Risks of specific developments: Class with the specific development as a study of potential impacts, e.g., assessing the risk of tourism to biodiversity in East Africa 916.7604.
- 4. Development: Use 333.715 or the number for the specific resource plus notation 15 from the table under 333.7–.9, e.g., hydroelectric power development 333.91415.
- 5. Conservation: Use 333.72 or the number for the specific resource plus notation 16 from the table under 333.7–.9, e.g., conservation of biodiversity 333.9516.
- 6. Biodiversity: Use 333.95 (especially for works emphasizing its value or importance).

If in doubt, prefer in the following order: 333.7–.9, 363.1, 363.73, 577.

See also discussion at 363.73 vs. 571.95, 577.27.

333.7-.9 vs. 363.6

Natural resources and energy vs. Public utilities

Use 333.7–.9 for comprehensive works on resources, projection of needs and supplies, development, conservation and protection of resources. Use 363.6 for works on problems and services related to utilities distributing and delivering the resources to users. Use 333.7–.9 for "supply" as a noun, but use 363.6 for "supply" as a verb. If in doubt, prefer 333.7–.9.

However, use 333.7932 for a work about distribution of electrical power by utilities if the work emphasizes the problems of developing the supply of electricity, says little about the problems of distributing the electricity to customers, and does not discuss prices without reference to production costs.

Use 333.717 or a number for a specific resource in 333.7–.9 plus notation 17 from the table under 333.7–.9 for works on the rationing of natural resources still in their natural state, but use 363 for works on the rationing of final products, e.g., wellhead allocation of natural gas for companies or jurisdictions 333.823317, but rationing of natural gas among consumers or classes of consumers at the other end of the line 363.63. If in doubt, prefer 333.717 and numbers for specific resources in 333.7–.9.

333.7-.9 vs. 508, 913-919, 930-990

National parks and monuments

Use 333.7–.9 for works on national parks where the main attraction is nature if the emphasis is on conservation and protection of natural resources, e.g., forest parks 333.784, game reserves 333.954916. Use 508 or other numbers in 500 if the emphasis is on description of and guides to natural phenomena, e.g., a comprehensive guide to the natural history of Yellowstone National Park 508.78752, a guide to the geology of Yellowstone 557.8752.

Use 913–919, plus notation 04 from the table under 913–919 followed by notation for the historical period when the guidebook was written, for general guidebooks to all the national parks of an area, e.g., a 1989 general guidebook to the national parks of South America 918.0438.

Class general works about historical monuments with the events commemorated. For example, class a battlefield national park with the battle, e.g., Gettysburg National Military Park 973.7349. Class a park associated with the life of an individual in the biography number for that individual, e.g., Lyndon B. Johnson National Historical Park 973.923092, George Washington Carver National Monument 630.92.

If in doubt, prefer in the following order: 333.7–.9; 508 and other numbers in 500; 930–990; 913–919.

See also discussion at 913–919: Historic sites and buildings; also at 913–919: Add table: 04: Guidebooks; also at 930–990: Wars; also at 930–990: Historic preservation.

333.72 vs. 304.28, 320.58, 363.7

Environmentalism

Use 333.72 for works on environmentalism discussing the broader concept of preserving and protecting the supply as well as the quality of natural resources and for works about the environmental movement that focus on the concerns it shares with the long established conservation movement. Use 304.28 for works that emphasize the effect upon society of overuse, misuse, or pollution of the environment. Use 320.58 for works that emphasize the political ideologies of environmentalism. Use 363.7 for works on preserving and restoring the quality of the social living space, i.e., taking care of wastes, pollution, noise, the dead, and pests. If in doubt, prefer in the following order: 333.72, 304.28, 363.7, 320.58.

333.73-.78 vs. 333, 333.1-.5

Natural resources vs. Land economics

Use 333.73–.78 for works on land as a natural resource, as a source of economic goods (chiefly agricultural and mineral), and for works on the usage of the land and its resources. Use 333.73–.78, plus notation 17 from the add table under 333.7–.9, for works on control of usage regardless of who owns the land, e.g., price control, zoning. Use 333.73 for comprehensive works on land policy.

Use 333.73-.78 for land inventories, which often focus on land as a resource and land usage.

Use 333 for comprehensive works on land and on natural resources only if the works contain substantial discussion of ownership. It is more common for comprehensive works on land to contain substantial discussion of ownership than comprehensive works on other natural resources. Use 333.7–.9 for comprehensive works on natural resources that treat predominantly nonownership aspects. If in doubt, prefer 333.7–.9.

Use 333.1–.5 for land as property, where the central issues are the right to possession and use, and the right to transfer possession and use. Use 333.1–.5 for control of land only if the control is the kind that stems from ownership.

Use 333 for comprehensive works on both 333.1–.5 and 333.73–.78 with respect to land only if the works contain substantial discussion of ownership. Use 333.1–.5 for works on the right to use land and its resources. If in doubt, prefer in the following order: 333.73–.78, 333.1–.5, 333.

333,955-,959 vs. 639,97

Conservation and management of specific kinds of animals

Conservation and resource management are primarily economic concepts. Use 333.955–.959 for works on conservation of specific kinds of animals if the works discuss public policy and programs; give estimates or statistics of populations, abundance, harvest, catches, and kills; make appeals for resource management; and issue calls to protect an animal or save it from extinction. Use 639.97 for works that discuss agricultural methods and techniques and how to carry them out.

A few terms used in conservation work are troublesome because they may refer to either economics or technology. Use 333.955–.959 for works on rescue, reintro-

duction, management, and habitat improvement of specific kinds of animals, if the works are focused on programs and the rationale behind the activities. Use 639.97 only if the work is focused on hands-on activities where the animals are living.

If in doubt, prefer 333.955-.959.

335 vs. 306.345, 320.53

Socialism and related systems in economics, sociology, and political theory

Use 335 for interdisciplinary works on socialism and related systems, and works on their philosophic foundations, since they are based upon theories of how the economy does or should work. Use 335 also for wide-ranging works that do not fit within normal disciplinary boundaries but are clearly about socialism and related systems. Use 335 also for works discussing how another economic system should be reorganized into a socialist system.

Use 306.345 only for sociological studies of how socialist economic systems work out in practice.

Use 320.53 for works that emphasize how political movements intend to introduce socialism and what political forces they expect to harness to attain and keep power, or that discuss political movements and forces without in-depth discussion of the economic dynamics or theory.

Works in 320.53 and 335 may include material that is prescriptive, that says how society, the economy, or the political system ought to be organized. If in doubt, prefer 335.

337.3-.9 vs. 337.1

Foreign economic policies and relations of specific jurisdictions and groups of jurisdictions vs. Multilateral economic cooperation

Use 337.3–.9 for works on relations between a cooperative group treated as a whole and other countries or groups, e.g., economic relations of the European Union with Japan 337.4052, economic relations of the European Union with the rest of the world 337.4. Use 337.1 for works on cooperative relations among the states of multistate groups, e.g., cooperation within the European Union 337.142. If in doubt, prefer 337.3–.9.

338.091-.099 vs. 332.67309, 338.6042

Location of industry and investment

Use 338.091–.099 for works showing where industry is in fact located, i.e., for works that consider location as a condition. Use 338.6042 for works on the rationale for and the process of locating business organizations, i.e., for works that consider location as an action.

Use 332.67309 for works describing the advantages and disadvantages of making international investments, including establishing international enterprises, in particular areas.

If in doubt, prefer 338.091–.099.

338.092

Business biography

Use 338.0922 for collected biography of businesspeople in many fields. Use 338.040922 for collected biography of entrepreneurs in many fields.

Use 338.1—.4 for biographies of business leaders not limited to a specific enterprise but limited to a specific field, e.g., business leaders in the automotive manufacturing industry 338.4762920922. Use 338.6—.8 for biographies of people associated with the development and operation of specific types of enterprises but not confined to a specific industry or group of industries, e.g., small-business owners 338.6420922, people associated with trusts 338.850922. Use 338.70922 for biographies of company directors on the boards of companies in several industries or groups of industries. Use 338.76 for a biography of an entrepreneur or business leader associated with a specific business enterprise, e.g., the founder of a cosmetics manufacturing company 338.766855092.

338.1 vs. 631.558

Crop yields

Use 338.1 for works on crop yields that are compilations giving the total production of an area. Use 338.16 for works on yields per unit of area if they are taken as indicators of production efficiency, either of agricultural systems using various methods (e.g., crop rotation) or of agricultural systems prevailing in various areas. Use 631.558 only for works that have little or no economic or testing implications, e.g., lists of record yields of various crops. Class with the subject in agriculture if yield studies per unit of area are used in technical tests of varieties or specific production techniques, e.g., yield tests of fertilizer 631.80287. If in doubt, prefer 338.1.

338.926 vs. 352.745, 500

Science policy

Science policy generally focuses on what society should do to promote the utilization of science and the growth of industries and activities based on science. Use 338.926 for works on science policy regarded as a policy or program to promote economic development and growth (use similar numbers in 338.93–.99 for science policy for economic development in specific areas, e.g., Europe 338.9406). Use 352.745 (and similar numbers in 352–354, built with 352.745) for works on public administration of science policy. Use 354.274 for works that emphasize administration of economic development. In the absence of a focus on the social sciences, use 509 for natural science policy in an area. If in doubt, prefer 338.926.

340, 342–347 vs. 340.56

Civil law

Use 340 for comprehensive works that treat civil law as all law that is not law of nations or criminal law (342–344, 346–347). Contrast civil law in this sense with criminal law (345). Use 340.56 for works that treat civil law as a system of law derived from Roman law that is in use to a greater or lesser extent in most countries in the modern world, e.g., Germany, France, Japan, Brazil, and even in some subordinate jurisdictions of countries that otherwise use another system, e.g.,

338

the province of Quebec in Canada and the state of Louisiana in the United States. If in doubt, prefer 340.

340, 342-347 vs. 340.57

Common law

Use 340 and 342–347 for works that treat common law as the system of law of England and other countries, such as the United States, whose law is derived from English law, or that treat common law as the branch of English law that derives from the old English courts of common law as opposed to the branch of law known as equity that grew up in the Court of Chancery. Use 340.57 for works that treat common law as law that is not the result of legislation but rather of custom and judicial decision. If in doubt, prefer 340.

340 vs. 808.06634

Legal writing

Use the number for the subject in 340 for works on the composition of legal briefs, law reports, and other documents if the work emphasizes how to make the document comply with the law, e.g., how to draw up a legal contract 346.022. Use 808.06634 for works that emphasize techniques of composition. If in doubt, prefer 340.

340.02-.09 vs. 349

Geographic treatment of law

Use 340.02–.09 for works intended to be general in coverage, even if most examples are taken from a specific jurisdiction. Use 349 for works limiting the law to a specific jurisdiction. For example, use 340.03, general law dictionaries, (not 349.7303, dictionaries of American law), for *Black's Law Dictionary*, even though the majority of the cases cited are from the United States. Use 340.025752 for a directory of lawyers who can practice law not only in Maryland but also in other parts of the United States and whose place of residence is in Maryland, but use 349.752025 for a directory of lawyers who can practice in Maryland but whose place of residence need not be in Maryland. If in doubt, prefer 340.02–.09.

340.52

Law and indigenous peoples

Use 340.52 for laws of indigenous peoples that had legal systems of their own prior to their incorporation into the national systems of other groups, e.g., laws of North American native peoples before becoming a part of the United States 340.5273. Use 342–347, plus notation 089 from Table 1, for the laws of such groups on a specific subject, e.g., family law of North American native peoples 346.01508997.

Use 341 for the relations between indigenous peoples and a nation established in their territory before their incorporation into the nation, e.g., treaties between the United States and native American peoples on territorial matters 341.42026673008997.

Use the numbers of the specific jurisdiction in 342–349 for the relations between an indigenous people and a nation established in its territory after its incorpora-

tion into the nation, e.g., law regulating nursing services for Aboriginal Australians 344.9404140899915, legal status of Aboriginal Australians 346.94013.

340.9

Conflict of laws

Use 340.9 for works where the key issue is usually which jurisdiction's laws are to govern the case, e.g., whose laws will govern in the case of a Canadian citizen married in France to a citizen of Germany and later divorced in Mexico when a dispute arises as to the disposition of jointly owned personal property? Although usually called private international law, it is not the law governing the interrelationships of nations, but the law governing the conflicts and disputes between private citizens of different nations, and its material is drawn from private law.

341 vs. 327

Law of nations vs. International relations

Use 341 for works that discuss the standards and principles that it is commonly felt should govern international relations, or for works that discuss concrete events from the standpoint of the problems that they pose to this system of order. Use 341.026 for works on treaties and cases of international courts. Use 327 for works that discuss what is actually transpiring in international relations (including the theory as to why things happen as they do), and the effects of what has happened. If in doubt, prefer 341.

341,45 vs. 343,0962

Law of the sea vs. Law of ocean transportation

Use 341.45 for works emphasizing jurisdictional issues of law of the sea, i.e., works that discuss the problems that arise from the fact that the high seas are outside the jurisdiction of any nation. Use 343.0962 for works emphasizing transportation issues of maritime law or admiralty law that consider legal issues that could arise either within or outside a single national jurisdiction. If in doubt, prefer 341.45.

342-349

Geographic treatment of law

Class law limited by geographic area as follows:

- 1. For law limited to a specific jurisdiction: Use 349 or 342.3–.9 (and parallel numbers, e.g., 343.3–.9) plus the area number for that jurisdiction, e.g., law of Germany 349.43, railroad law of Germany 343.43095.
- 2. Class the laws of local jurisdictions (cities, counties, subprovincial jurisdictions) as follows:

For the laws of a specific local jurisdiction: Use 349 or 342.3–.9 (and parallel numbers, e.g., 343.3–.9) plus the area number for the local jurisdiction, e.g., tax laws of Bayreuth, Bavaria 343.4331504; by-laws relating to public parks in Sheffield, England 346.42821046783.

For the laws of all the localities of a given area: Use the area number for the jurisdiction that contains the localities, e.g., tax laws of the cities of Bavaria

343.43304, of the cities of Germany 343.4304, laws relating to the public parks of cities in the United Kingdom 346.41046783.

Do not observe the principle of approximating the whole for jurisdictions for which there is no specific area number, i.e., subdivisions may be added for a jurisdiction not having its own number, e.g., Flint, Michigan's and Mt. Morris, Michigan's ordinances governing mental health services to the addicted 344.77437044. (Flint is in an including note at T2—77437 in Table 2, which normally means subdivisions may not be added for it. Mt. Morris, a suburb of Flint, is not mentioned in the including note, but subdivisions may still be added).

- 3. For the application of law of a specific jurisdiction to a limited area within that jurisdiction: Use the number for the law of the jurisdiction plus notation 09 from the table under 342–347, e.g., German law as practiced in Bavaria 349.4309433, application of German railroad law in Bavaria 343.4309509433.
- 4. For law limited to a specific regional intergovernmental organization: Use 349.2 or 342.2 (and parallel numbers, e.g., 343.2) plus the area number for that organization, e.g., law of European Union 349.24, railroad law of European Union 343.24095.
- 5. Class the laws of more than one jurisdiction other than those of a specific regional intergovernmental organization as follows:

For a collection of laws from various jurisdictions located in a particular area: Use 349 or 342.3–.9 (and parallel numbers, e.g., 343.3–.9) plus the area number for that area, e.g., law of Germany, France, Italy 349.4, railroad laws of Germany, France, Italy 343.4095.

For laws that affect more than one jurisdiction: Use 341 or 342.3–.9 (and parallel numbers, e.g., 343.3–.9) plus the area number for the area affected, e.g., treaties among Germany, France, Italy 341.02644, international laws regulating disarmament in Germany, France, Italy 341.733094, international laws regulating railroads in Germany, France, Italy 343.4095.

See also discussion at 340.02–.09 vs. 349.

Law of countries with federal governments

In federally organized countries, e.g., the United States, Australia, Federal Republic of Germany, there are two sets of laws: those of the central jurisdiction (national laws) and those of subordinate jurisdictions (laws of the provinces or states). Use the area number for the subordinate jurisdiction for laws of an individual state or province, e.g., criminal law of Virginia 345.755, of New South Wales 345.944. However, use the area number for the federal jurisdiction for laws of the states or provinces taken as a whole, e.g., criminal laws of the states of the United States 345.73, of the states of Australia 345.94. Use the area number for the region for works on the state and provincial laws of a region, e.g., provincial criminal law of western Canada 345.712.

Use of area number for capital districts

Use the area number for the capital district if the laws are, in effect, local laws even though passed by the national legislature, e.g., use notation 753 from Table 2 for

laws of Washington, D.C., even though the United States Congress passes some of these laws.

Jurisdiction in time

Class the laws of an area that was at some point not an independent jurisdiction as follows:

- 1. If the law is still operative in the now-independent jurisdiction, use the area number for the jurisdiction in question. For example, use notation 5491 from Table 2 for a law that is currently operative in Pakistan, even though it was enacted before Pakistan became independent, e.g., use 347.5491052 for the Limitation Act of 1908.
- 2. If the law is no longer operative in the now-independent jurisdiction, use the area number for the jurisdiction that was previously dominant. For example, use notation 54 from Table 2 for India for a law of 1908 no longer operative in Pakistan.

342,085 vs. 341,48

Civil rights vs. Human rights

Use 342.085 for works on the political and social rights of individuals that are recognized by the laws of a particular jurisdiction or group of jurisdictions. Use 341.48 for works on the political and social rights that are recognized by international agreements (such as the Universal Declaration of Human Rights) as the inherent and inalienable rights of all human beings. If in doubt, prefer 342.085

343.04-.06 vs. 336.2, 352.44

Tax law vs. Taxes and taxation vs. Revenue administration

Use 343.04—.06 for most works on taxes, especially popular works, because they usually explain what the law allows and prohibits, e.g., a work for taxpayers about U.S. income tax deductions 343.730523. Use 336.2 for works on the economics of taxes and interdisciplinary works on taxes, e.g., an economic and political analysis of U.S. tax policy 336.200973. Use 352.44 for works on tax administration, especially the administration of assessment and collection. If in doubt, prefer 343.04—.06.

343.078 vs. 343.08

Regulation of secondary industries and services vs. Regulation of commerce

Use 343.078 for works discussing regulations for topics such as production quotas, quality of the material produced, sizes of products specified, e.g., what services hotels are permitted to provide, how they are to provide them, and what rates they may charge 343.07864794. Use 343.08 for works discussing regulations for topics such as truth-in-labeling, advertising practices, and other aspects of marketing, e.g., how hotels may advertise 343.085564794. If in doubt, prefer 343.078.

345.02 vs. 346.03

Criminal offenses vs. Torts (Delicts)

Use 345.02 for acts considered as criminal offenses, but use 346.03 if those acts are considered as torts (a part of civil law), e.g., libel and slander considered from the standpoint of criminal law or brought as a criminal action 345.0256, but considered as a tort or brought as a civil action 346.034. Whether a particular act is regarded as a crime or as a tort or as neither will often depend on the jurisdiction, e.g., adultery may be regarded as a crime for which the offender may be prosecuted, a tort for which the offender may be sued, or merely as a fact to be adduced in evidence in a divorce case. If in doubt, prefer 345.02.

347

Jurisdiction

The location of the court does not necessarily determine the jurisdiction involved in procedure and courts, e.g., use 347.744 for procedure in a court in Boston, Massachusetts, if it is a state court, but use 347.73 if it is a United States district court.

351 vs. 352.29

Organization and structure of government agencies

Use 351 for general descriptions of administrative agencies and their work if the descriptions cover a representative sample of the agencies of a jurisdiction, e.g., a work on the ministries of the Indian government 351.54. Use 352.29 only for works emphasizing the organizational aspects of departments and agencies, e.g., a work detailing the organizational patterns of agencies of the Indian government 352.290954. If in doubt, prefer 351.

See also discussion at 352–354: Add table: 22.

351.3-.9 vs. 352.13-.19

Administration in and of subordinate jurisdictions in specific areas

Use 351.3–.9 for descriptive works on administration of individual jurisdictions regardless of kind, e.g., administration of the government of Ontario 351.713, of Cook County (Illinois) 351.7731, of Northern Highland (Scotland) 351.41152. This approach ensures consistent classification of works on administration of specific subordinate jurisdictions, since a classifier does not need to decide to which category a specific government belongs, e.g., whether Cook County is urban, or Northern Highland is rural.

Also use 351.3–.9 for works on administration of an individual jurisdiction and its subordinate jurisdictions, e.g., administration of Ontario and its local authorities 351.713. Use 352.13–.19 plus notation 09 from Table 1 only for general treatises on subordinate jurisdictions or on specific kinds of subordinate jurisdictions, e.g., provincial administration in Canada 352.130971, county administration in Illinois 352.1509773, rural administration in United Kingdom 352.170941.

The distinction between 351.3–.9 and 352.13–.19 is carried over under specific topics of public administration in 352–354. Use 352–354 plus notation 093–099 from

Table 1 for reports and practical works on the administration of a specific activity in a given jurisdiction or region, e.g., administration of social welfare in Ontario 353.509713. Use 352–354 plus notation 213–219 from the add table at 352–354 (and with notation 093–099 from Table 1) for theoretical and general descriptive works on how state (provincial) and local administration of a subject in a specific higher jurisdiction or region has been or should be conducted, e.g., local administration of social welfare in Ontario 353.521409713.

If in doubt, prefer 351.3–.9.

352-354

Specific topics of public administration

Agencies and their divisions

Use the same number for the administration of a function and the administration of an agency designated to perform that function. For example, use 354.50973 for both public administration of agriculture in the United States and administration of the United States Department of Agriculture. Also use the same number for an administrative report of a specific agency and an independent study of the functions that the agency performs. For example, use 354.5097305 for both the Annual Report of the United States Department of Agriculture and an independent journal on agricultural administration in the United States.

Use the number that best fits the responsibility of a specific agency. For example, use 352.5 for a general services agency having a wide range of miscellaneous functions, so long as the predominant duty concerns property administration (as is often the case), even if it has sections on archives and personnel training.

For works on a part of an agency, use the number that best fits the responsibility of that part of the agency, even if the number differs from the number for the agency as a whole. For example, use 352.53 for a procurement section in a general services agency, and 352.669 for a personnel training section in such an agency. For an archives section in the agency, use either 352.744 if it promotes archival activity or 026.93–.99 if it maintains general archives of the jurisdiction.

In some cases, the schedule gives a specific name of a generalized type of agency in a class-here note at a given number, referring to a typical agency with such a name. An agency with a similar name but a different function should be classed according to its function. Only when there is a conspicuous difference in the usage of different countries do notes in the schedule explain the difference. For example, at 353.3 one note reads "Class here home departments and ministries, European style interior ministries"; another note reads "See also 354.30973 for United States Department of the Interior."

Use the same number for two agencies that independently cover approximately the same field. However, use notation from the table under 352–354 for an agency that has a different relation to the subject. For example, use 354.760973 for the United States Department of Transportation, but use 354.76280973 for the former United States Interstate Commerce Commission (the ICC, which regulated transportation, not commerce). The base number for administration of transportation (354.76) and the final notation for area (T1—0973) are the same in both cases, but notation 28 for regulation is interposed between them for the ICC.

Use notation in 352–354 for agencies provided for in 352–354, even when the agencies are nominally subordinate to a nonexecutive branch of government. For example, use 352.430973 for the United States General Accounting Office, which is officially part of the legislative branch, but which performs a classical executive function of reviewing accounts and judging the effectiveness of expenditures throughout the government.

See also discussion at T1--068 vs. 353-354.

Add table

22

Organization and structure of government agencies

Use a number in 352–354 without adding notation 22 for general works on specific agencies, e.g., a work describing the Indian Home Ministry 353.30954. Use numbers in 352–354 plus notation 22 only for works emphasizing the organizational aspects of departments and agencies. If in doubt, prefer the number in 352–354 without notation 22.

See also discussion at 351 vs. 352.29.

2293

Heads of departments and agencies

Secretaries of state

Use notation 2293 for secretaries of state in the United Kingdom and countries in the Commonwealth of Nations, where the term is a generic one for heads of executive departments, often of cabinet level. (General works on this kind of secretary of state are classed in 352.293.)

Use 353.22930973 for the Secretary of State of the United States, a position equivalent to foreign minister or minister of foreign affairs in most other countries.

Do not use notation 2293 for secretaries of state in states of the United States. Most state secretaries of state may be classed in 352.387 plus notation 0974–0979 from Table 1 when their central duty is the authentication, maintenance, and preservation of important state papers and other records, and the compilation of organization manuals of the state government. When the office of a specific secretary of state has a range of duties that does not fit comfortably in the records management number, class the office in other numbers in 352–354.

Agencies named for their heads

Do not use notation 2293 from the add table with numbers in 352–354 for departments (usually quite small ones) named for their heads, e.g., offices of inspectors general or offices of ombudsmen. These agencies, and reports issued in the name of their heads, are classed in the number that most nearly approximates their duties, e.g., reports of inspectors general and ombudsmen 352.88, reports of ombudsmen in personnel agencies 352.6235.

27 - 28

Public administration of supporting and controlling functions of government

Use notation 27 and 28 in fields where the role of government is commonly both supportive and regulatory. For example, use notation 27 throughout 354 in the special sense of administering development, or research and development, as explained under 354.27 in the schedule. Likewise, use notation 28 in much of 354 in the special sense of controlling public utilities, as explained under 354.428 and 354.728 in the schedule.

Do not use notation 27 in fields where the primary role of government is supportive, and do not use 28 in fields where the primary role of government is regulatory. For example, use 353.78 (not 353.7827) for administration of recreation agencies, because most recreation agencies support recreation; and use 353.9 (not 353.928) for administration of safety agencies, because the primary role of safety agencies is safety regulation. Use notation 27 and 28, however, for the less common function of these agencies, e.g., works on regulating recreation 353.7828, and works on administration of programs promoting safety 353.927.

352.13 vs. 352.15

State and provincial administration vs. Intermediate units of local

Use 352.13 for territorial subdivisions with an extent that places them distinctly above "local administration," regardless of what they are called. The following list indicates the major territorial units that can currently be regarded as equivalent to "states and provinces" as defined in the note at 352.13:

Argentina (provinces)

Australia (states)

Brazil (federal units)

Canada (provinces)

Chile (regions)

China (provinces, autonomous regions)

(former) Czechoslovakia (regions)

Ethiopia (federal states)

France (regions)

Germany (states)

India (states)

Indonesia (provinces)

Iran (provinces)

Italy (regions)

Japan (regions)

Korea (regions)

Mexico (states) Nigeria (states)

Pakistan (provinces)

Peru (regions)

Philippines (regions)

Russia (provinces, territories, autonomous republics)

South Africa (provinces)
(former) Soviet Union (union republics)
Spain (autonomous communities)
Sudan (regions)
United States (states)
(former) Yugoslavia (republics, autonomous provinces)

Also use 352.13 for similar units that may be created in the future, and for "territories" in the sense of areas on the road to statehood, e.g., historic treatment of administration in territories of the United States 352.13097309.

Use 352.16 for general treatment of special urban units coordinate with states and provinces, e.g., administration of nationally controlled municipalities in China 352.160951.

Use 352.15 for all other units intermediate between the national governments and the primary units of local administration.

355-359 vs. 623

Military science vs. Military and nautical engineering

Use 623 for physical description, design, manufacture, operation, and repair of ordnance; use 355–359 for procurement and deployment, and also for the units and services that use the ordnance. Histories of the development of weapons emphasizing the interplay of human and social factors are regarded as procurement history, and are classed in 355.8 and similar numbers in 356–359 (e.g., 359.8, numbers built with notation 8 from add table under 356–359). If in doubt, prefer 355–359.

355.1409

History, geographic treatment, biography

Class uniforms of several participants in a particular war in the area number corresponding to the one used for the war in general history, e.g., uniforms of the Peninsular War (part of the Napoleonic Wars classed in 940.27) 355.14094, not 355.140946.

Class uniforms of a specific branch of the armed services with the branch, e.g., uniforms of the Royal Air Force 358.41140941.

359.32 vs. 359.83

Ships as naval units vs. Ships as transportation equipment and supplies

Use 359.32 or similar numbers in 359.9 (e.g., 359.933, 359.9435, 359.9853) when a work on ships focuses on matters normally covered by analogous works on regiments and other military units, e.g., the crew and its organization, duties, effectiveness, and history. Works about a specific ship will usually consider the ship as a naval unit (unless there is only one ship of a class). Use 359.83 or similar numbers in 359.9 (e.g., 359.9383, 359.94835, 359.98583) when the work focuses on development, procurement, operation, and actual or potential combat effectiveness of the hardware, or when discussion of personnel or personalities focuses on persons responsible for development and procurement of ships, e.g., Admiral Rickover's

work in developing nuclear submarines 359.93834092. Use 359.83 also for comprehensive works. If in doubt, prefer 359.32.

Use notation 09 from Table 1 plus country numbers from Table 2 for either specific ships, or a number of ships of a specific class employed by a specific nation.

361-365

Social problems and services

Problems and services are often linked terms, and, where one is spelled out, the other is implied, e.g., addiction at 362.29 implies services to the addicted, and services of extended medical care facilities at 362.16 imply the problems that require such services.

See also discussion at 300 vs. 600.

361-365 vs. 353.5

Social problems and services vs. Public administration of social welfare

Much of the material on social problems and services consists of government reports or gives considerable emphasis to the political and legal considerations related to social services. Use 361–365 for reports about welfare programs and institutions or for works that focus on the problem or the service, e.g., a discussion of political obstacles to effective poverty programs 362.5, a discussion of the political maneuvering behind the adoption of an act of the United States Congress spelling out a new housing program 363.580973. Use 353.5 for reports concentrating on the administrative activities of agencies supporting and regulating the programs and institutions. If in doubt, prefer 361–365; however, prefer 353.5 for administrative annual reports of government agencies.

361 vs. 362-363

Social problems and social welfare in general vs. Specific social problems and services

Use 361 for comprehensive works on the whole range of problems and services found in 362–363, for works on principles and methods of assessing and solving the problems when the works do not address a specific problem, and for works on the principles and methods of welfare work in general. Use the number for a specific problem in 362–363, plus notation 5 from the table under 362–363, for works on the application of the principles and methods to a specific problem, e.g., social work with poor people 362.553, housing allocation to relieve discrimination 363.55. If in doubt, prefer 361.

362-363 vs. 364.1

Specific social problems and services vs. Criminal offenses

Use 362–363 for a human activity considered as a social problem, but use 364.1 for the activity treated as a crime, e.g., drug addiction as a social problem 362.29, but illegal use of drugs 364.177; suicide as a social problem 362.28, but suicide treated as a crime 364.1522. If in doubt, prefer 362–363.

362.1-.4 and 614.4-.5

People with illnesses and disabilities and Incidence of and public measures to prevent disease

Use 362.1 and 362.4 for works on the social provision of services to people with physical illnesses or disabilities. Use 614.4–.5 for works on preventive measures, regardless of whether the emphasis is medical or social, e.g., social provision of immunization services and works on the medical aspects of immunization 614.47. Use 614.4–.5 for public measures strictly limited to preventive ones, e.g., fluoridation and programs advising people how to avoid cavities 614.5996; but programs to identify and treat people with cavities 362.19767. If in doubt, prefer 362.1.

Use 362.2 for works about the incidence and prevention of mental illness, mental illness as a social problem, and social provision of services to people with mental illness.

Use 614.4–.5 for studies of epidemics and the incidence of physical disease (including mental retardation and physical disabilities) when treated solely from the medical standpoint. Use 362.1 and 362.3–.4 for works emphasizing diseases as social problems. If in doubt, prefer 614.4–.5.

362.1-.4 vs. 610

Biographies and case histories of people with illnesses and disabilities, and biographies of medical personnel

Use 362.1-.4, plus notation 092 from Table 1, for biographies and memoirs of people who are dying and people with illnesses and disabilities if the works lack any other disciplinary focus, since such works typically illustrate the way society addresses itself to fundamental health problems and their solution. Use 001–999 for works that focus on a specific discipline, e.g., a work offering guidance in the Christian life with respect to health misfortunes 248.86, Christian meditations in times of illness 242.4. Use 362.1-.4, without adding notation 092 from Table 1, for studies of individual cases designed for the use of researchers, practitioners, and students in the social services, e.g., studies of services to patients with heart disease 362.19612. Use 616–618, plus notation 09 Case histories from the table under 616.1–.9, for studies of patients describing their illnesses in medical terms rather than their lives in social terms, e.g., case studies of heart disease 616.1209. If in doubt, prefer 362; however, prefer 616.8909, 616.890092, and similar numbers for psychiatric disorders (subdivisions of 616.852, 616.858, 616.89, 618.76), since the consideration of external circumstances is generally subordinated to the discussion of the state of mind of the patient.

Use 610 for most biographies of medical personnel, but use 362 for works on public health doctors or nurses emphasizing their influence on public health services and awareness, e.g., a biography of a doctor noted chiefly for promoting nursing homes 362.16092.

363 vs. 302–307, 333.7, 570–590, 600

Control of technology

Use 363, particularly 363.1 (safety) and 363.7 (environment), for works on control of technology addressing what must be done, regulating how it is to be done, in-

specting to see whether or not it has been done, and investigating when it was not done. Use 600 only for works dealing with the technological procedures for carrying out a given operation. Use 363 for institutional breakdown (who let it break), but use 600 for machinery breakdown (finding out what broke).

Use 363 if the author or publishing agency is interested in social service and social need, 304.2 if interested in human ecology, 333.7 if interested in economics, 579 or 580–590 if interested in how organisms survive, 620–690 if interested in how to make things, 628.5 if interested in physical techniques for controlling pollution, 632–635 if interested in how crops survive.

Use 363 for comprehensive works and works oriented toward problems and their solution. Use 302–307 for works giving significant consideration to the social dynamics of the problem, use 333.7 for resource-oriented material, and use 600 for works emphasizing technology.

If in doubt, prefer in the following order: 363, other numbers in 300, 570–590, 600. Especially prefer numbers in 300 for most works produced by commercial publishers and environmental or safety advocacy groups.

See also discussion at 300 vs. 600; also at 301–307 vs. 361–365.

363 vs. 344.02-.05, 353-354

Other social problems and services vs. Law and public administration

Use 363 for the work of agencies by which the government carries out the detailed intent of the law in matters of population, safety, the environment, and provision of basic necessities, including most discussion of policy and most detailed procedures for enforcing law, policy, or regulation. Use 344.02–.05 for the law itself, draft laws, and enforcement of the law in courts with respect to these fields. Use 353–354 for the internal administration of agencies concerned with these fields, including their administrative annual reports. If in doubt, prefer 363.

Law enforcement

Use 363.23 for law enforcement by the police, but use 353–354 for enforcement of the law by government agencies in the sense of seeing that the requirements of the law are being met, e.g., activities of a department of education to ensure that the requirements of the law are being met in schools 353.8. However, use 340 for laws governing how such enforcement should be carried out, e.g., the law governing what measures police may use in enforcing the law 344.0523 (or 345.052 if the work treats matters of criminal investigation). If in doubt, prefer 363.23.

Class enforcement of the law through the courts in 342–347, plus notation 0269 from table under 342–347 where appropriate, e.g., court procedure that promotes the enforcement of tax law 343,040269.

363.1

Public safety programs

The meaning and scope of the word "safety" may vary. Use 363 if the scope covers most of the social services, or even 361 if sufficient 362 material is included. Use

363.2 if "safety" is used narrowly to comprise only the work of the police and fire departments.

Priority of safety

Use 363.1 or 363.3, rather than numbers elsewhere in 300, for those aspects of safety that society must deal with through investigations and programs (the topics in the add table at 362–363), e.g., railroad safety 363.122 (*not* 385.0289). However, use 353.9 for the public administration of safety.

363.1 vs. 600

Safety regulations

Use 363.1, plus subdivision 6 from the table under 362–363 if appropriate, for manuals written by or for safety agencies that discuss technical details useful as background for regulation and inspection of various operations while still focusing primarily on safety services. Use the 600 number for the technology involved for safety regulations that spell out operating and construction techniques in explicit detail, even if the regulations are in the form of an officially promulgated regulation by a safety authority. If in doubt, prefer 363.1.

363.31 vs. 303.376, 791.4

Censorship

Use 363.31 for censorship of movies and programs after being released or aired, e.g., use of v-chips by parents. Use 303.376 for theories of censorship and sociological studies of censorship of movies, radio, and television. Use 791.4 for censorship of films and programs as they are being produced, e.g., censorship through editing. If in doubt, prefer 363.31.

363.5, 363.6, 363.8 vs. 338

Housing, public utilities, and food supply vs. Production

363.5, 363.6, and 363.8 deal with the problems of providing the basic necessities of life, and each has economic implications. Use 363.5, 363.6, or 363.8 for social factors affecting the availability of housing, water, fuel and food, or for social measures to ensure an adequate supply. Use 338 for the effect of these topics on the economic aspects of society, or the impact of economic conditions on the availability of housing, water, fuel, or food. For example, use 363.81 for a study of the mismatch between the expected growth of the food supply and of the population, but use 338.19 for a study of the effect of a drop in farm prices on the food supply. If in doubt, prefer 363.5, 363.6, or 363.8.

363.5 vs. 307.336, 307.34

Housing

Use 363.5 for works on housing problems and solutions addressed specifically to housing. Use 307.336 for the descriptive analysis of housing patterns that treats problems in the context of the sociology of communities. Use 307.34 for works addressing housing problems in the context of restructuring whole communities. If in doubt, prefer in the following order: 363.5, 307.34, 307.336.

Housing vs. Houses

Use 363.5 for interdisciplinary works on housing that treat the social aspects of lodging, as the term "housing" normally refers to the provision of lodging considered in the abstract. Use 643.1 for interdisciplinary works on houses and their use and for the home economics aspects of either housing or houses, as the term "houses" normally refers to the buildings considered as physical objects. If in doubt, prefer 363.5.

363.61

Water reports

Use 363.61 for reports concentrating on the problem of treating and delivering water to consumers and for interdisciplinary reports on water supply. Use 333.91 for water supply reports concentrating on water used, or needed in the future; 363.7284 for reports concentrating on assuring that wastewaters are properly treated; 363.739472 for reports concentrating on protection of natural waters; and 553.7 for reports concentrating on the supply of water on hand. If in doubt, prefer 363.61.

Use 333.9116 for general works on monitoring to protect water quality; 553.7, plus notation 1–9 from Table 2 where appropriate, for reports that describe the present chemical and biological status of available water but do not not focus on a specific objective, e.g., a base-line study of the quality of French surface waters 553.780944; 363.61 for water quality monitoring reports as tools for assuring compliance with water supply standards; 363.739463 for such reports as tools for assuring compliance with wastewater pollution standards; 628.16 for reports as tools for determining plant loads and technical difficulties in water treatment; and 628.3 for reports as tools for checking the effectiveness of sewage treatment works.

363.73 vs. 571.95, 577.27

Pollution vs. Toxicology vs. Effects of humankind on ecology

Use 363.7363 or the number for the specific pollutant or environment in 363.738–739, plus notation 63 from the table under 362–363, for pollution studies in which the growth and decline of biological indicator species is merely used to measure the extent and kind of pollution, and interpreted to suggest the need for, or sufficiency of, remedial measures, e.g., acid rain monitoring by use of indicator species 363.738663.

Use 571.95 for the pathological conditions caused by pollution and other agents in tissues of organisms. Use 577.27 or the number for the specific ecological environment (biome) in 577.3–.7, plus notation 27 derived from instructions under 577.76–.79, for the more generalized effects of substances upon the community of organisms, e.g., the reduction of species counts (biodiversity) and the general health and vigor of surviving species.

If in doubt, prefer in the following order: 363.73, 571.95, 577.27.

See also discussion at 333.7-.9 vs. 363.1, 363.73, 577.

363.8 vs. 613.2, 641.3

Food supply vs. Dietetics vs. Food

Use 363.8 for works on meeting the food supply needs of society in general and of various social groups and for interdisciplinary works on nutrition. Use 613.2 for works emphasizing how to help individuals meet dietary requirements and maintain optimal balanced intake without gaining or losing weight, for material to help dietitians in planning diets for individuals, and for comprehensive works on personal aspects of nutrition. Use 641.3 for works emphasizing the food itself and for interdisciplinary works on food. If in doubt, prefer in the following order: 363.8, 641.3, 613.2.

371 vs. 353.8, 371.2, 379

School administration and policy

Use 371 for the basic operations and activities of schools and school systems. Use 353.8 only for administration of national and state or provincial departments of education that regulate and support local school systems. Use 371.2 for comprehensive works on school (or school-system) administration and for works covering both 371.2 and 353.8. Use 371.201–207 and numbers to which reference is made under 371.201–207 for specific topics in plant and system administration.

Use 379 for policy and debate on major policy issues in education, e.g., discussion of the role of government. Subdivisions are provided in 379 only for general works on support and control of public education, and for a limited selection of major, controversial issues in education. Use 370–378 for public policy and debate concerning all other issues in education (that is, all issues not specifically named in 379).

If in doubt, prefer in the following order: 371, 371.2, 379, 353.8.

371.01-.8 vs. 372-374, 378

Specific levels and topics of education

Use 371.01–.8 for specific topics relating to two or more levels of education, e.g., to primary and secondary education, to secondary and higher education. Use 372–374 and 378 for any or all topics related to a specific level of education. There is specific provision at each level for each specific topic in 371.01–.8, usually in subdivision 1 under each level, e.g., in 372.1. If in doubt about whether a work relates to only one level, or to two or more levels, prefer 371.01–.8.

371.262 vs. 371.264

Standardized tests vs. Academic prognosis and placement

Use 371.262 for works that focus on particular tests and their use. Use 371.264 for general discussions of the use of results of standardized tests in prognosis and placement. Use 371.26 for works giving substantial treatment to both the tests in general and to their use in prognosis and placement. If in doubt, prefer 371.262.

372.24 and 373.23

Specific levels of primary and secondary education

The following tables show some common combinations of grades or sublevels used in primary and secondary education. Use the pattern shown in the first table when individual grades are discussed. That table reflects the 3-3-3-3 plan used in the schedule. The other tables after the first show how other combinations of levels fit into the schedule.

| Grades | Number |
|----------------------------------|---------|
| 1–3 (Lower primary level) | 372.241 |
| 4–6 (Intermediate primary level) | 372.242 |
| 7–9 (Lower secondary level) | 373.236 |
| 10–12 (Upper secondary level) | 373.238 |

The 6-6 pattern:

| Grades | Number |
|-------------------------|--------|
| 1-6 (Primary school) | 372 |
| 7–12 (Secondary school) | 373 |

The 8-4 pattern:

| Grades | Number |
|-------------------------|--------|
| 1–8 (Primary school) | 372 |
| 9–12 (Secondary school) | 373 |

The 4-4-4 pattern:

| Grades | Number |
|------------------------------|---------|
| 1–4 (Primary school) | 372 |
| 5–8 (Lower secondary school) | 373.236 |
| 9–12 (Secondary school) | 373 |

Use the higher level for other combinations of grades unless the majority of the grades are at the lower level, e.g., a primary school covering kindergarten through second grade 372.241. Use 371 for schools extending from first to ninth grade or beyond.

These guidelines apply only to discussion of specific combinations of grades in general, e.g., junior high schools (lower level secondary schools) in the United States 373.2360973. Use the geographic span under the general number for primary or secondary education (or 371.009) for specific schools, e.g., a specific junior high school in Atlanta, Georgia 373.758231.

The source of information for comparison of international levels of education is *International Standard Classification of Education: ISCED 1997* (UNESCO 1997).

378.4-.9 vs. 355.00711

College level military schools

Use 378.4–.9 (378 plus area notation of the place where it is found) for a college level military school that is not an official training academy, that is, those whose

students (*except* in wartime) usually enter civilian occupations, e.g., Virginia Military Institute (Lexington, Virginia) 378.755853, The Citadel (Charleston, South Carolina) 378.757915.

Use 355.00711 plus the area notation of the country it serves for an official military service academy (or a similar number for an academy of a specific service), e.g., the Royal Military Academy (Sandhurst, England) 355.0071141, the United States Naval Academy (Annapolis, Maryland) 359.0071173.

If in doubt, prefer 378.4–.9.

380

Commerce, communications, transportation

Since 380 is part of 330, the table of preference under 330 also applies to subjects in 380. Commerce, communications and transportation take the same position in that table as production. Therefore, use 331.1251388 for a work on the labor market in transportation, but use 388.049 for a work on production economics of transportation.

Add table

09 vs. 065

History and geographic treatment vs. Business enterprises

Use notation 09 for the system (facilities, activities, services) maintained by the company in a specific area, e.g., railroad transportation provided by the Union Pacific Railroad 385.0978. For international companies, use notation 09 only when coverage is limited to a specific area, e.g., comprehensive works on air transportation provided by United Airlines 387.7, air transportation in the United States provided by United Airlines 387.70973.

Use notation 065 for the corporate history of the company, e.g., the corporate history of the Union Pacific Railroad 385.06578. For international companies, use the area number for the country that is its home base, e.g., United Airlines 387.706573.

If in doubt, prefer 09.

384.54, 384.55, 384.8 vs. 791.4

Radio, television, and motion pictures

Use 384.54, 384.55, and 384.8 for interdisciplinary works and for the various aspects of presenting a program to the general public, e.g., selecting the correct day and time to broadcast a television variety show 384.5531. Use 791.4 for the various aspects of producing an individual program, e.g., arranging the various acts of a television variety show 791.450232. If in doubt between 384 and 791.4, prefer 384.

Class the history of a radio, television, or motion picture company as follows:

1. Use 384, plus notation 09 from Table 1, for a general history of the enterprise, e.g., a history of NBC (National Broadcasting Company) Television Network 384.5540973, and the history of the system (facilities, activities, services) main-

tained by the enterprise, e.g., stations broadcasting NBC television programs 384.554530973.

- 2. Use 384, plus notation 065 from the add table under 380, for the corporate history of the enterprise, e.g., the corporate history of the NBC Television Network 384.55406573.
- 3. Use 791.4, plus notation 09 from Table 1, for the history and critical appraisal of the products of the enterprise, e.g., the history of the television programs provided by NBC 791.450973.

391 vs. 646.3, 746.92

Costume vs. Clothing

Use 391 for clothing customs, such as what was worn, what is now fashionable, national costumes, e.g., Edwardian fashion 391.0094109041, Lithuanian national costumes 391.0094793. Use 646.3 for home economics aspects of clothing, such as how to dress on a limited budget, select the best quality clothing, dress correctly for the business world. Use 746.92 for artistic aspects of clothing, such as clothing considered as a product of the textile arts, fashion design. If in doubt, prefer in the following order: 391, 746.92, 646.3.

The source of information about kinds of costume and clothing is *The Fairchild Dictionary of Fashion*, 3rd ed. (New York: Fairchild Publications, 2003).

398.2

Folk literature

Literary collections cannot be specified for folk literature in 398.2. Disregard this aspect in classifying, and use the most specific number available.

Use notation 09 from Table 1 to distinguish literary criticism of collections of tales and lore, e.g., criticism of ghost stories 398.2509, criticism of French ghost stories 398.209440509. However, do not add notation 09 for individual tales or lore, e.g., literary criticism of a ghost story from France 398.2094405.

398.2 vs. 201.3, 230, 270, 292-299

Myths and legends

Use 398.2 for myths or mythology presented in terms of cultural entertainment or, especially, as representative of the early literary expression of a society, even if they are populated by gods and goddesses. Use 201.3 and similar numbers elsewhere in 200 for mythology presented from a strictly theological point of view or presented as an embodiment of the religion of a people. For example, use 398.2 for Greco-Roman myths retold for a juvenile audience; but use 294.382325 for Jataka tales illustrating the character of the Buddha.

Use 398.2 for mythology having a nonreligious basis that deals with beliefs and stories that can be referred to as superstitions, legends, fairy tales, etc., where the religious content or interest is not apparent. Use 201.3 and similar numbers elsewhere in 200 for mythology having a religious basis that deals with the most basic beliefs of people and with religious beliefs and practices.

Class specific myths and legends presented as examples of a people's religion with the subject in religion, e.g., legends of Jesus' coming to Britain 232.9.

Use 398.2 for interdisciplinary works on mythology, since this number includes folk narratives with a broader focus than religion alone. If in doubt, prefer 398.2.

398.2 vs. 398.3-.4

Folk literature

Use 398.2 for a folk tale on a specific subject and literary criticism of that tale. Use 398.3–.4 for comprehensive works on the history and criticism of the tale, e.g., tales of witches and wizards 398.21, a treatise on why in the tales witches are usually evil and wizards are usually good 398.45. If in doubt, prefer 398.2.

401.43 vs. 306.44, 401.45, 401.9, 412, 415

Meaning

Use 401.43 for works on semantics dealing with meaning in language, covering topics such as synonymy, ambiguity, and semantic truth (metalinguistic truth). Semantics is particularly concerned with the underlying logical structure of natural language, i.e., what elements are necessary beyond correct grammar for statements to make sense. Use 412 for works on etymology that study the history of the meanings of individual words. Use 415 for works on grammar that are concerned with meaning only in relation to morphology and syntax. If in doubt, prefer 401.43.

Use 401.45 for interdisciplinary works on linguistic pragmatics. Use 306.44 for works on the sociology of language concerned with meaning as affected by sociocultural context. Use 306.44 also for works on linguistic pragmatics that deal with language in its sociocultural context, but use 401.9 for works on pragmatics that focus on the individual psychological context. If in doubt, prefer 401.45.

407.1, T1-071 vs. 401.93, T4-019, 410.71, 418.0071, T4-80071

Education in language vs. Language acquisition

Use 407.1 for broad works on language education not limited to the prescriptive approach and comprehensive works on the study and teaching of both language and literature. Use 410.71 for works on the study and teaching of linguistics. Use 418.0071 for works on how to study or teach language using a prescriptive approach. The basic distinction between prescriptive and nonprescriptive linguistics is explained in the Manual note at 410. If in doubt, prefer 407.1.

Use notation for the specific language, plus notation 071 from Table 1 (which is incorporated in Table 4), for works on studying and teaching the linguistics of that language, broad works on studying and teaching the language that are not limited to the prescriptive approach, and comprehensive works on studying and teaching both the language and its literature, e.g., comprehensive works on studying and teaching French language and literature 440.71. Use notation 80071 from Table 4 for works on how to study or teach a specific language using a prescriptive approach, e.g., how to teach basic French 448.0071. If in doubt, prefer T1—071.

Use 401.93 for works on the psychology of learning language informally, as a child learns from its parents. Use T4—019 for the psychology of learning a specific language informally. Use 418.0071, or T4—80071 for a specific language, for the

psychology of formal study and teaching of language. Use 401.93, or T4—019 for a specific language, for comprehensive works on the psychology of learning language both formally and informally. If in doubt, prefer 401.93 or T4—019.

410

Linguistics

Prescriptive linguistics

Use 410, 411–417, 419, and 420–490 plus notation 1–7 from Table 4 for works on nonprescriptive approaches to linguistics (e.g., descriptive and theoretical linguistics), which are concerned with describing or explaining language usage as it does or did exist, without regard to an ideal of correct usage. Use 418 and 419–490 plus notation 8 from Table 4 for works on prescriptive approaches, which are concerned with promoting standard or correct usage of language, i.e., trying to learn to speak or write like educated native users of a standard form of a language. For example, use 415 and notation 5 from Table 4 for descriptive works about grammar, but use 418 and notation 82 from Table 4 for prescriptive works about grammar, e.g., descriptive works on French grammar 445, prescriptive works on French grammar 448.2. However, use 413 and notation 3 from Table 4 for dictionaries, regardless of whether they are prescriptive or descriptive, e.g., French dictionaries 443.

Use the number for nonprescriptive approaches for comprehensive works containing both nonprescriptive and prescriptive linguistics, e.g., a collection containing both descriptive and prescriptive papers about grammar in general or the grammar of many different languages 415. If in doubt, prefer the number for nonprescriptive approaches.

Contrastive linguistics

Use 410 or other numbers not limited to applied linguistics for works of contrastive linguistics that are purely descriptive or theoretical, or a combination of applied and nonapplied linguistics. Use 418 and notation 8 from Table 4 for works of contrastive linguistics that focus on finding ways to prevent errors caused by interference or negative transfers from a first language in learning a second language or in translating into a second language. If in doubt, prefer the number not limited to applied linguistics.

Historical linguistics

Use 417.7 for works on general historical (diachronic) linguistics. Use notation 09 from Table 1 for general historical linguistics of a specific language, or for historical linguistics of a specific topic, if the work gives a history, but not if the work merely discusses the processes of change in a general way. For example, use 415 for a general description of grammatical change, 425.09 for a history of grammatical changes in the English language, and 420.9 for a history of all kinds of changes in the English language. Although no provision comparable to 417.7 exists for individual languages in Table 4, notation 7 is provided under specific languages for works that focus on the distinctive characteristics of specific early forms of the language, e.g., 427.02 Middle English.

Comparative linguistics

Class a comparison of two languages with the language requiring local emphasis (usually the language that is less common in the particular setting). For example, libraries in English-speaking countries will use 495.6 for a work comparing English and Japanese, but libraries in Japan will use 420. If no emphasis is required, class the work with the language coming later in Table 6.

Class a comparison of three or more languages in the most specific number that will contain them all; e.g., use 430 for a comparison of Dutch, German, and English, since all are Germanic languages; use 491.6 for a comparison of Gaelic, Welsh, and Breton, since all are Celtic languages.

Use 410 if there is no number that will contain all the languages, e.g., a comparison of French, Hebrew, and Japanese.

Use the same criteria for comparisons of just one feature of various languages, but do not add notation from Table 4 to the number for language families unless there are special instructions to do so. For example, libraries in English-speaking countries will use 495.65 for a comparison of English and Japanese grammar, but libraries in Japan will use 425. Use 415 for a comparison of French, Hebrew, and Russian grammar; use 430.045 for a comparison of Dutch, German, and English grammar (because at 430.04 there are instructions to add); but use 491.6 for a comparison of Gaelic, Welsh, and Breton grammar.

See also discussion at 407.1, T1—071 vs. 401.93, T4—019, 410.71, 418.0071, T4—80071.

420-490

Specific languages

Dialects

Sources may differ as to whether a particular tongue is a language or a dialect. Treat a tongue as a dialect if it is shown as such in the Dewey Decimal Classification even if it is treated as a language in the work being classified, and vice versa.

Language vs. subject

Class examples and collections of "text" whose purpose is to display and study a language with the language, even if limited to a specific subject, e.g., a grammar of scientific English 425. Class language analysis of a specific work with the number for the work. If in doubt, prefer the specific subject or work.

471–475, 478 vs. 477

Classical vs. Old, postclassical, Vulgar Latin

The dates of the Classical Age of Latin are 80 B.C. to 130 A.D. (the Ciceronian Age 80 B.C. to 43 B.C., the Golden Age of Augustan literature 43 B.C. to 18 A.D., the Silver Age 18 A.D. to 130 A.D.). Use 471–475 and 478 for formal or literary Latin written at any time after the Classical Age that conforms to the standards of that age, e.g., a linguistic study on Latin manuscripts of the monks of Iona. However, use 477 for works on Vulgar Latin, on Old Latin (80 B.C. or earlier), or on postclassical Latin. The phrase "postclassical Latin" refers to the nonclassical or vulgarized Latin

used from the death of Juvenal (140 A.D.) until the period of renewed interest in the "pure" Latin of the Classical Age in the 11th and 12th centuries, and from the 14th century onward. If in doubt, prefer 471–475 and 478.

500 vs. 001

Natural sciences and mathematics vs. Knowledge

Use 500 for works about "science" that clearly imply emphasis on the natural sciences and mathematics. Use 001 for works that use the word "science" without implying emphasis on "natural science," for example, works that also cover the social sciences and the analytical aspects of other disciplines. Use 001.2 Scholarship and learning when the word "science" is used to cover disciplines outside 500. Use 001.4 Research rather than 507.2 for works on scientific method and scientific research with no clear emphasis on "natural science." However, use 509 for "history of science," as that term normally relates to the natural sciences and mathematics. If in doubt, prefer 500.

510

Mathematics

Primary and secondary school topics

Use the following numbers for the mathematical topics presently taught in primary and secondary schools of the United States:

| Arithmetic | 513 |
|--------------|-------|
| Algebra | 512.9 |
| Geometry | 516.2 |
| Trigonometry | 516.2 |

Use caution, however, when classifying works with "precalculus" in the title. Use 510 for works that cover three or more of algebra, arithmetic, elementary calculus, geometry and trigonometry. Use 512 for works that predominantly cover algebra, or cover algebra and arithmetic. Use 515 for works that predominantly cover elementary calculus. If in doubt, prefer 510.

Combination of topics

Use the following instructions when classing in 512.1 Algebra combined with other branches of mathematics, 513.1 Arithmetic combined with other branches of mathematics, and 515.1 Analysis and calculus combined with other branches of mathematics and when using "Class here linear algebra combined with analytic geometry" at 512.5 Linear algebra:

- 1. Use these numbers for works that deal basically with one subject but have some information on another subject either added at the end of the work or interspersed throughout it. For example, use 512.12 Algebra and Euclidean geometry for a textbook with ten chapters on algebra and two on Euclidean geometry.
- 2. Use these numbers only for works that are predominantly about the branch first named. For example, use 512.13 only for works about algebra with some

trigonometry added; use 516.24 for works about trigonometry with some algebra added.

510, T1-0151 vs. 003, T1-011

Systems

Use 510 for works about purely mathematical systems, e.g., systems of equations. Careful examination may be required to determine whether a work is limited to purely mathematical systems, because the same or similar terms may be applied to both mathematical systems and mathematical descriptions of real-world systems; for example, a work on dynamical systems may discuss either mathematics (515.39) or real-world systems (003.85).

Use 003 for works on mathematics applied to real-world systems, even though they are highly mathematical, and even though a significant part is organized according to mathematical concepts. Use 003 if the work makes clear that the mathematics is intended as background for systems theory, and the systems part of the work will typically be organized according to specific applications, types of systems, or systems concepts such as control, stability, input-output, feedback, observability, or state estimation.

If in doubt, prefer 510.

Use notation 011 from Table 1 for works that clearly stress systems, modeling, forecasting, or other topics named in 003. Use notation 0151 from Table 1 for works lacking such stress. If in doubt, prefer T1—0151.

See also discussion at 519.5, T1—015195 vs. 001.422, T1—0727.

510, T1-0151 vs. 004-006, T1-0285

Mathematics and computer applications

Use 510 plus notation 0285 from Table 1 for the use or application of computers in mathematics, e.g., computer programs used for the numerical solution of ordinary differential equations 518.63028553. Use 004–006 plus notation 0151 from Table 1 for mathematics applied to computers, e.g., recursive functions used to explain how computers work 004.0151135. If in doubt, prefer 510 plus notation 0285 from Table 1.

If the application is in a third discipline, use notation 0285 from Table 1 for works that involve both the use of computers and the use of mathematics, e.g., a computer program for solving structural engineering calculations 624.1028553.

519.5, T1—015195 vs. 001.422, T1—0727

Statistics

The subject of statistics can be divided into three parts:

- 1. How to obtain and arrange statistical data
- 2. How to manipulate the data by mathematical means to produce information regarding the topic being examined

3. How to interpret the statistical results

Use 519.5, or the number in 001–999 for the subject, plus notation 015195 from Table 1, for works containing only 2, or 2 with 1 or 3 or both as incidental information. Use 001.422, or the number in 001–999 for the subject, plus notation 0727 from Table 1, for works giving equal treatment to 1, 2, and 3, or containing information about only 1 or 3 or both 1 and 3.

In many disciplines a word derived from the discipline name combined with -metrics or -statistics is used for statistical work, e.g., sociometrics, econometrics, biometrics, biostatistics. Commonly works on these subjects concentrate on 2 from the above list, with secondary treatment of 3 or 1 or both. Use the number in 001–999 for the subject plus notation 015195 from Table 1 for these works. Use the number in 001–999 for the subject plus notation 0727 from Table 1 for works of broader treatment, emphasizing 1 or 3 or both 1 and 3.

If in doubt, prefer 519.5 or T1—015195.

See also discussion at 510, T1—0151 vs. 003, T1—011.

520 vs. 500.5, 523.1, 530.1, 919.9

Outer space

Use 520 for popular works on astronomy that use the terms "space" and "outer space" while discussing the various interesting astronomical bodies and phenomena of the universe, and use 523.1 for works that use the terms as synonymous with the universe treated as a single unit.

Use 520 for works on exploring space or outer space that emphasize astronomical findings (or use a specific number in 523 if the work is limited to specific bodies, e.g., the solar system 523.2). Use 919.9 plus notation 04 from the table under 913–919 when the works refer to geographic exploration, that is, live humans going out on real or imaginary visits to the planets or stars.

Use 500.5 for a work on space sciences in general that has no particular reference to astronomical bodies. Use 530.1, where an including note mentions space, if the work refers simply to space with nothing in it.

If in doubt, prefer in the following order: 520, 523.1, 530.1, 500.5, 919.9.

520 vs. 523.1, 523.112, 523.8

Astronomy and allied sciences vs. The universe, galaxies, quasars vs. Galaxies vs. Stars

Use 520 for works describing the universe in its several distinct components, e.g., as individual planets, stars, galaxies. Use 523.1 for works treating the universe as a single unit. If in doubt, prefer 520.

Stars and galaxies

Use 523.8 for comprehensive works on stars and galaxies when they are treated as individual astronomical bodies. However, use 523.112 when the work considers stars primarily as components of galaxies. Use 523.1 if the work considers galaxies and stars primarily in the context of cosmological theories, with little discussion

of individual stars or galaxies. Use 520 for works that discuss other astronomical bodies, e.g., planets and comets, as well as stars and galaxies.

If in doubt between 523.8 and 523.112, prefer 523.8.

523 vs. 550

Earth sciences in extraterrestrial worlds

Use 523 for phenomena of celestial bodies when the celestial body has no distinct lithosphere, since in such cases hydrosphere and meteorology are moot concepts, and thus the phenomena are not directly comparable to terrestrial phenomena. Use 559.9 and notation 0999 from Table 1 in 551–553 for phenomena of celestial bodies that have distinct lithospheres when the phenomena are directly comparable to terrestrial phenomena. For example, use 551.5099923 for the atmosphere of Mars (which has a lithosphere), but use 523.86 for the atmosphere of stars (which do not); use 523.45 for the red spot of Jupiter (a planet without a distinct lithosphere). If in doubt, prefer 523.

530.416 vs. 539.75

Responsive behavior and energy phenomena vs. Nuclear activities and interactions

Use 530.416 for works that study topics in responsive behavior, energy phenomena, nuclear activities, nuclear interactions in the context of the condensed (solid and liquid) state, i.e., in answer to the question, what is taking place in condensed matter that makes it behave the way it does. Use 539.75 for works that study these topics in the abstract, or in the context of nuclear structure, i.e., in answer to the question, what makes the atom and its particles behave the way they do. If in doubt, prefer 530.416.

530.475 vs. 530.12, 531.16

Brownian motion and particle mechanics

Use 530.475 (or the similar numbers 530.415, 530.425, 530.435) for treatment of particles in diffusion within various states of matter. Use 530.12 for comprehensive works on particle mechanics. Particle mechanics is a subject that exists in both classical and quantum physics, but is far more basic to the study of quantum physics, where the quanta can be considered particles. Use 531.16 only if the emphasis is clearly on classical mechanics. Use other numbers in modern physics if appropriate, e.g., orbits of subatomic particles 539.725. If in doubt, prefer in the following order: 530.475, 530.12, 531.16.

Use 530.475 for interdisciplinary works on Brownian motion, which usually refers to the random motion of microscopic particles. However, class with the subject the extension by analogy of the concept to a variety of similar random movements, e.g., of prices, of biological populations, of instrumental recordings.

Use 530.425 for works on Brownian motion with an emphasis (often unstated) on such motion in fluids.

541 vs. 546

Physical chemistry of specific chemicals

Use a subdivision of 546 for physical chemistry of a specific element or compound; however, use a subdivision of 541 when one or two examples drawn from large groupings like metals (546.3) or nonmetals (546.7) are used primarily to study or explain a specific topic in physical chemistry, e.g., hydrogen-ion concentration 541.3728 (*not* 546.2).

If in doubt, prefer 541.

548 vs. 530.41

Crystallography vs. Solid-state physics

Use 548 for works on crystals and crystallography when these terms are used to refer to discrete objects and abstract lattice patterns. Use 530.41 for works on crystallography and the crystalline state in their broad senses, i.e., when the terms are used to cover atomic arrangement in metals, ceramics, amorphous materials, or polymers. Use 530.41 as the comprehensive number. If in doubt, prefer 548 for works clearly emphasizing ordinary crystals.

549 vs. 546

Mineralogy vs. Inorganic chemistry

Use 549 numbers for topics of physical and theoretical chemistry pertaining to the structure and behavior of homogeneous crystalline solids. Use 546 numbers for comprehensive works on the chemistry and mineralogy of specific chemical types. If in doubt, prefer 549.

549 vs. 548

Mineralogy vs. Crystallography

Use 549 for the crystallography of specific minerals unless the minerals are used to study or explain a topic in 548, e.g., quartz, feldspar, and related crystals 549.68, but a study of isomorphism using quartz, feldspar, and related crystals 548.3. If in doubt, prefer 549.

550 vs. 910

Earth sciences vs. Geography and travel

Geophysics (550) is the analysis of the structure of the earth and the forces shaping it; physical geography (910.02) is the description of the resulting landscape. Use the number for a specific force or process in 551 for descriptions of the results of the specific force or process, e.g., earthquakes in Myanmar 551.2209591. Use the number for a specific land form in 551.41–.45 for the operation of all forces and processes that combined to create a specific topographic land form, e.g., formation of mountains in Myanmar 551.43209591. Use 554–559 for the operation of all the forces and processes taken as a whole in a specific area, especially if the work emphasizes solid geology, e.g., geophysical processes operating in Myanmar or the geology of Myanmar 555.91. However, use 910.02 or the specific area number in 913–919, plus notation 02 from the table at 913–919, when a work treats the

geographic landscape with only minor consideration of geophysical processes, e.g., graphical description of surface features in Myanmar 915.9102. If in doubt, prefer 550.

Use 910 or the specific area number in 913–919, plus notation 04 from the table at 913–919, for descriptions of surface features for travelers. Such descriptions usually cover resort accommodations and the ambience as well as geographic features, e.g., contemporary tourist beaches in Myanmar 915.91045.

551.302-.307 vs. 551.35

Erosion and weathering, sediments and sedimentation, soil formation, mass movement vs. Geologic work of water

Use 551.302–.304 for works giving due coverage to the work of wind, glaciers, or frost, even if agents other than water take up only a small part of the text, since water is by far the most important agent in the erosion, transport, and deposit of geologic materials. Use 551.352–.354 only for works limited to the work of water or to materials transported by water.

Use 551.305 for the work of water in soil formation and 551.307 for the work of water in mass movement. Water is also the most important agent in these processes, but it almost always acts in conjunction with other agents to produce the processes, e.g., action of dissolved chemicals, temperature changes, or earthquake vibrations.

551.5 vs. 551.6

Meteorology vs. Climatology and weather

Meteorology analyzes and describes the properties and phenomena of the atmosphere, and thus explains climate and weather. Meteorology is also the comprehensive subject, encompassing consideration of climatology and weather. Use 551.5 for works called "climatology," "climate and weather," or simply "climate" or "weather," if they cover topics in meteorology. Use 551.6 only when the words are limited to four senses:

- 1. The description of phenomena of the atmosphere taken as a whole, weather usually being the short-range description, and climate the long-range description
- 2. The prediction of weather, climate, or specific meteorological phenomena, that is, weather forecasting and forecasts (551.63–.65)
- 3. The study of climate or meteorology in small areas, that is, microclimatology or micrometeorology (551.66)
- 4. The attempt to modify weather or any specific meteorological phenomena (551.68), which is actually a technology

Use 551.5 numbers for all other aspects, including description (weather reports) of specific phenomena, regardless of the terms used in the work in hand, e.g., a discussion of the factors that produce weather 551.5, reports of rainfall 551.577, a description of climate types of Asia 551.62095, forecasts of rainfall 551.6477, a forecast of a rainy day in Singapore 551.655957.

If in doubt, prefer 551.5.

551.7 vs. 560

Historical geology vs. Paleontology

Use 551.7 for works on historical geology, which studies the rocks and their strata, using paleontological facts to help date and interpret deposition, movement, and erosion. Use 560 for works on paleontology, which studies life in former geological ages through the interpretation of fossils. Paleontology utilizes the same material as historical geology, i.e., the geologic record, but only as a record of life and the environment in which life evolved. If in doubt, prefer 551.7.

571-575 vs. 630

Physiology, anatomy, and pathology of agricultural plants and animals

Use 571–575 for results of experimental work on basic physiology and pathology that utilize domestic plants and animals as models.

When domestic plants and animals are studied for agricultural purposes, observe the following guidelines:

Use 571.2 and 571.32 and similar numbers in 571.5–.8 and 575 for physiology and anatomy of agricultural plants, but use 636.0891–.0892 and similar numbers in 636.1–.8 for physiology and anatomy of agricultural animals.

Use 632 for comprehensive works on pathology and diseases of agricultural plants and animals, or for comprehensive works on pathology and diseases of plants. Use 633–635 plus notation 9 from the table under 633–635 for pathology and diseases of specific agricultural plants, e.g., diseases of cotton 633.519. Use 636.0896 for comprehensive works on pathology and diseases of agricultural animals. Use 636.1–.8 for pathology and diseases of specific kinds of agricultural animals plus notation 39 in add table under 636.1–.8 or notation 0896 as instructed in certain entries in the schedule, e.g., diseases of race horses 636.1239, diseases of horses 636.10896.

If in doubt, prefer 571–575.

See also discussion at 571–573 vs. 610.

571-573 vs. 610

Results of research in biology and medicine

Use 571–573 for results of physiological and anatomical research with animal models in 571–573. Use 615–618 for results of pharmacological, therapeutic, and pathological research if the medical relevance for humans is either stated or implied. If in doubt, prefer 571–573.

571.629 vs. 571.29

Cell biology vs. Physiology of microorganisms

Use 571.629 for works on microorganisms that go into details of internal structures, e.g., membranes and organelles, without also discussing details of reproduction. Use 571.29 for works that discuss only generalities of microorganisms or discuss

cell reproduction of microorganisms in addition to their general cell biology. If in doubt, prefer 571.629.

571.8 vs. 573.6, 575.6

Reproduction, development, and growth vs. Reproduction in animals and in plants

Use 571.8 for comprehensive works on reproduction, development, and growth, and for works covering reproduction of both animals and plants. Use 571.81 for comprehensive works on reproduction, development, and growth in animals, but not for reproduction alone in animals. Use 571.82 for comprehensive works on reproduction, development, and growth in plants, but not for reproduction alone in plants. Use 573.6 for reproduction in animals as well as reproductive system in animals, and 575.6 for reproduction in plants as well as reproductive organs in plants. If in doubt, prefer 571.8.

Reproduction in other organisms

Use 571.829 for reproduction of fungi and algae. Although some fungi and algae have reproductive organs, e.g., mushrooms and seaweeds, most do not, and the organs are poorly developed at best.

Use 571.8429 (*not* 571.829) for reproduction of unicellular microorganisms, and 571.84529 for the sexual reproduction of unicellular microorganisms.

Vegetative reproduction

Use 571.89 for comprehensive works on vegetative reproduction. Use 571.829 for vegetative reproduction of microorganisms, and 575.49 for vegetative reproduction of plants.

573.44 vs. 571.74

Hormones

Use 573.44 for works that emphasize endocrine hormones or hormones in animals while giving relatively limited treatment to hormones outside the animal kingdom. Use 571.74 only for truly comprehensive works on hormones, e.g., works that give balanced treatment to hormones in plants and microorganisms as well as animals. If in doubt, prefer 573.44.

576.5 vs. 572.8

Genetics vs. Biochemical genetics

Use 576.5 for comprehensive works on genetics, for works that emphasize the somatic manifestations of genes, and works that do not emphasize the DNA-based chemical structure of genetic material. Use 572.8 for works on genetics that emphasize the chemical structure and processes, e.g., DNA, RNA, replication, errors in transcription, and crossing over. If in doubt, prefer 576.5.

576.8 vs. 560

Evolution vs. Paleontology

Use 576.8 for works that emphasize how paleontological findings are evidence for evolution and works that include significant nonpaleontological evidence. Use 560 for works on the evolution of extinct organisms and works on the history of life that emphasize the description of extinct organisms and ancient environments. If in doubt, prefer 576.8.

577.3-.7 vs. 578.73-.77

Ecology of specific kinds of environments vs. Biology of specific kinds of environment

Use 577.3–.7 for works emphasizing either the nature of an environment or the interrelationships among various kinds of organisms found in the environment. Use 578.73–.77 for descriptive accounts of organisms found in a specific kind of area, e.g., plants and animals found in wetlands 578.768; and for comprehensive works on the biology of a specific kind of area, e.g., marine biology 578.77. If in doubt, prefer 577.3–.7.

577.3-.7 vs. 579-590

Ecology of dominant organisms in a specific kind of environment

Use 577.3–.7 for the ecology of dominant organisms (usually plants) of a specific ecological environment (biome). For example, use 577.4 (*not* 584.917) for the role of grass in grasslands. Similarly, use 577.3 for the ecology of specific forest associations, e.g., ecology of coniferous forest associations in Canada 577.30971 (*not* 585.0971 or 585.170971); and use 577.686 (*not* 597.17686) for fishpond ecology.

Use 579 or 580–590 only for works that emphasize the biology of the dominant kind of organism, e.g., the biology of grass in grasslands 584.9 (*not* 584.917), the biology of fish found in fishponds 597.17636.

If in doubt, prefer 577.3–.7.

578 vs. 304.2, 508, 910

Natural history vs. Human ecology vs. Geography

Use 578 for works on nature that concentrate on nonhuman living organisms and their settings. Use 304.2 for works that emphasize the relationship between natural phenomena and human institutions. Use 508 for works on nature that give significant treatment to earth sciences phenomena, e.g., weather, water features, and mountains. Use 910 for works that describe human settlement as well as natural phenomena. If in doubt, prefer in the following order: 578, 508, 910, 304.2.

578.76-.77 vs. 551.46, 551.48

Biology of aquatic environments vs. Oceanography and hydrology

Use 578.76–.77 for works on aquatic and marine biology, including comprehensive works on biology and ecology of water bodies. These works may include significant consideration of land and sea waters as part of the lives of aquatic organisms, but do

not usually include detailed physical description of water bodies. Use 551.46 and 551.48 for works limited to nonliving natural phenomena, and for comprehensive treatment of biological and physical phenomena of water bodies. If in doubt, prefer 578.76–.77.

579-590

Taxonomic nomenclature and sources of information

Taxonomic nomenclature

The notes below mention several of the commonly recognized taxonomic levels used in classifying organisms. The broadest is kingdom, followed (in order of increasing specificity) by phylum or division, class, order, family, genus, species.

In the schedules for specific kinds of organisms, scientific terms are preferred in headings for taxonomic numbers below the kingdom level. If there is an alternative scientific name still in current use, it is given in the heading in parentheses following the preferred term. If there are two or more alternative scientific names in current use, the preferred term is given in the heading, and the alternative names are given in a variant-name note. For example, Mycetozoa, Myxomycetes, Myxomycophyta, Myxomycota are given as variant names for Myxomycotina (slime molds) at 579.52. Most obsolete names have been dropped. If a common name is well established in the literature but does not have a clear-cut corresponding scientific term (or terms), the common name may be used alone, e.g., 598.412–.415 Ducks.

A scientific name given in a class-here note is usually that of a subordinate taxon that comprises all or most of the members of the group in the heading. For example, under 583.99 Asterales, the class here note gives Asteraceae (Compositae), the only family in the order.

Common names are linked to scientific names by parentheses when they are generally understood to be exact equivalents. When two common names are linked to a scientific name, a comma between them means that they are alternative common names, e.g., "(doves, pigeons)" after Columbidae in the class-here note at 598.65. An "and" means that the two groups with common names together comprise the scientific group, e.g., "(poplars and aspens)" after Populus in the including note at 583.65. Common names that simply refer to well-known members of a scientific class, however, are listed alphabetically in an including note.

With plants (and occasionally with animals), the familiar name for families consists of the name of a typical member or members plus the word "family," e.g., Ranunculaceae (buttercup family) at 583.34. The typical member may be a single species or a large genus with hundreds of species, but seldom approximates the whole of the family. Classifiers must not assume that if the family approximates the whole of an order, the typical members do also.

An illustration of two terminology problems appears at 583.23 Laurales. The main family of this order is Lauraceae, the laurel family, which encompasses over 85 percent of the species of the order. The family is therefore given in a class here note, signifying that subdivisions can be added to the number for works on the family because it approximates the whole of the order.

Only a few species of the laurel family, however, are individually known as laurels, while several plants of other orders are also called laurels. Since it is useful to know

where to class comprehensive works on laurels, the including note reads, in part: "Including ... comprehensive works on laurels." Being listed in an including note means that laurels (even in its broadest sense encompassing all plants called laurels) do not approximate the whole of the 2800 species in the order Laurales.

Some large classes of organisms have two including notes, for classifier convenience. The first including note lists the scientific names of families or higher taxa and their corresponding common names, the second the common names that do not correspond with the given scientific names. Genera are listed with the common names because so many have become common names.

Sources of taxonomic information

Taxonomic schedules usually follow the arrangement accepted in *The New Ency-clopaedia Britannica*, 1989. Other works that often prove helpful are *Synopsis and Classification of Living Organisms* edited by Sybil P. Parker (McGraw-Hill, 1982), and *Webster's Third New International Dictionary*.

See also discussion at 579.24-.25; also at 579.3; also at 599.

579-590 vs. 571-575

Biology of whole organisms vs. Biology of internal processes

Use 579 or 580–590 for general and external biological phenomena of specific kinds of organisms. Use 571–575, plus notation 1 (for animals) or 2 (for plants and microorganisms) from various add instructions in 571–575, for internal biological processes and structures of specific kinds of organisms.

The distinction between the biology of whole organisms in 579 or 580–590 (the first biology) and the biology of internal processes in 571–575 (the second biology) is based upon the recognition of fundamental differences between the literature of the two biologies. While the distinction between the two is not absolute, there are a number of basic differences:

- 1. The first biology requires the study of whole organisms or taxonomic groups and their relationships to each other and the environment; the second requires the study of parts of organisms to find out how the various processes work.
- 2. The first biology is studied primarily in the field, where it usually involves descriptive research; the second is studied primarily in laboratories, where it usually involves experimental research. (Either kind of research, however, can be used in either biology.)
- 3. In the first biology, topics are usually seen as typical only of the specific kind of organism being studied, e.g., snail shells, reproductive behavior of stickle-backs, weaverbird nests. In the second biology, the process studied in one organism is usually seen as typical of all living organisms (or as typical of a large class of organisms such as animals, vertebrates, or mammals), e.g., cell division, blood circulation, immune reactions.
- 4. Natural history is at the core of the first biology, and approximates the whole of it; physiology is at the core of the second, and approximates the whole of it.
- 5. Most of the literature in the first biology is written by specialists named after kinds of organisms, e.g., ornithologists and ichthiologists, while most of the lit-

erature on the second biology is written by specialists named after the processes and structures they study, e.g., biochemists and cytologists. The biggest exception is ecology (a study of processes involving whole organisms, counted here in the first biology), where the specialists tend to concentrate on the ecology of different kinds of environments.

6. Finally, the first biology dominates the collections of general and small libraries, while the second is collected much more heavily in academic and research libraries.

If in doubt, prefer 579 or 580-590.

579.165 vs. 616.9041

Harmful organisms vs. Medical microbiology

Use 579.165 for the biology of pathogenic microorganisms. Use 616.9041 for the study of the microorganisms in relation to human diseases. If in doubt, prefer 579.165.

579.24-.25

Virus classification

Subdivisions for specific kinds of viruses in 579.24–.25 are based upon *Classification and Nomenclature of Viruses* by the International Committee on Taxonomy and Viruses, 1982.

579.3

Classification of bacteria

Subdivisions for specific kinds of bacteria in 579.3 are based upon sections of *Bergey's Manual of Systematic Bacteriology*, 1984–1989. In most cases the sections have names that are English phrases defining exactly what the section contains, e.g., "Anaerobic Gram-Negative Straight, Curved and Helical Rods." *Bergey's* does use some traditional Latin or Greek names. At 579.39, where it is clear that one of *Bergey's* names (Oxygenic photosynthetic bacteria) corresponds to two traditional names, the traditional names (Cyanobacteria and Prochlorales) are preferred in the heading, and *Bergey's* name is given as a definition.

Minor kinds of bacteria

Use 579.32 for bacteria described in sections 1–3, 6–11, 20–25, and 33 of *Bergey's Manual*.

Actinomycetes and related orders

Use 579.37 for bacteria described in sections 14–17 and 26–32 of *Bergey's Manual*.

580 vs. 582.13

Angiospermae (Flowering plants) vs. Plants noted for their flowers

Use 580 for works on the taxonomic group called "flowering plants," as found in 583–585. This group includes most plants that will be found in a typical vegetable garden. Use 582.13 for works largely limited to nondomesticated plants with at-

tractive flowers. These are the kind of plants that are found in nature, but that might also find a place in flower gardens or flower books. If in doubt, prefer 580.

583-585 vs. 600

Interdisciplinary works on specific kinds of seed plants

Use 583–585 for works limited to the botany of useful plants, and for works giving significant treatment to species of no particular economic value. For example, use 583.34 for a work covering the 300 species of the buttercup family, and 583.952 for a work on peppers that covers all the species of Capsicum and other genera that are called peppers. Also use 583–585 when there are two or more uses in technology, or one such use offset by an obvious botanical interest, e.g., 583.46 for oaks because oaks are useful as ornamental trees as well as lumber trees, and 583.23 for laurels because the many wild species of interest to botanists usually outweigh the few species that are well known as ornamentals.

Use numbers in 600 for interdisciplinary works on most kinds of seed plants that have a single dominant use. For example, use 615.321 for medicinal plants, 633.2–.3 for forage plants, 635.9 for ornamental plants (635.933734 for roses), 641.33–.35 for food plants (641.3411 for apples), 674 for lumber plants, and 677 for textile plants (677.21 for cotton).

The interdisciplinary number for most common plants is given in the Relative Index as the number opposite the unindented term. Use 583–585 for interdisciplinary works on plants that are not indexed, unless they belong in categories like those mentioned in the preceding paragraph. If in doubt, prefer 583–585.

583-584

Classification and common names of Angiospermae (flowering plants)

The arrangement for specific kinds of dicotyledons in 583 is based upon the arrangement found in the article "Angiosperms" in *The New Encyclopedia Britannica*, 1989, volume 13, pages 627–835.

The subdivisions of monocotyledons in 584 are defined by reference to the same article in *The New Encyclopaedia Britannica*, but the basic outline from early editions of the Dewey Decimal Classification is retained.

Exercise caution in identifying orders and families of flowering plants by common names; many such names are used for plants in several unrelated taxonomic groups. Notes in the schedule linking the common names are not exhaustive.

598.824-.88

Families and common names of Oscines (Passeres, songbirds)

Use 598.8 for songbird families not given in 598.824—.88. Exercise caution in identifying families of songbirds by common names; many such names are used for birds of several different families.

599

Classification of mammals

In addition to the general sources of taxonomic information used throughout 579–590, *Walker's Mammals of the World*, 1991, is particularly helpful for genera and families.

See also discussion at 579-590.

599.94 vs. 611

Anthropometry vs. Human anatomy

Use 599.94 for works emphasizing variations of external features, shapes, and gross bone structure (e.g., the comparison of heavy-boned and thin-boned people, indexes of length and breadth of skeletal features). Use 611 for works emphasizing norms of overall structure, for detailed structure of bones, and for works on all other internal organs and structures. If in doubt, prefer 599.94.

604.7 vs. 660.2804

Hazardous chemicals

Use 604.7 for comprehensive consideration of hazardous chemicals that includes handling, transporting, and utilization outside the chemical industry. Use 660.2804 for consideration of hazardous chemicals during chemical engineering. If in doubt, prefer 604.7.

However, use numbers in 660 as comprehensive technology numbers for specific hazardous chemicals, e.g., processing, transportation, utilization of natural gas 665.73.

610 vs. 616

Medicine and health vs. Diseases

Use 610 for works containing separate treatment of health, pharmacology, and therapeutics, as well as of diseases. Use 616 for comprehensive works on the diseases listed in 616–618.

Use the table of contents as a guide in deciding whether a work belongs in 610 or 616. Use 610 if it reads like a summary of topics in 610.73–618; use 616 if it reads like a summary of topics in 616.02–.99 or in 616–618. Use 616 also if the whole of medicine is brought to bear on the concept of diseases in a single treatise that discusses group after group of diseases.

If in doubt, prefer 610.

Standard subdivisions

Use notation from Table 1 under 616 only for works clearly limited to the concept of diseases or works focusing on topics named in the class-here note at 616: clinical medicine, evidence-based medicine, internal medicine. Use 610.3 for medical dictionaries, 610.711 for medical schools, 610.92 for doctors not having a distinct specialty. If in doubt, prefer 610 plus notation from Table 1.

610.92 vs. 615.534092

Biographies of chiropractors

Use 610.92 for biographies of chiropractors who do not limit their practice. Use 615.534092 for biographies of chiropractors who limit their practice to therapeutic manipulation (615.82) or to manipulation for diseases of the musculoskeletal system (616.7062). If in doubt, prefer 610.92.

612 vs. 611

Human physiology vs. Human anatomy, cytology, histology

Physiology deals with how organs work, while anatomy concerns their form and structure. Use 612.1–.9 for works bearing the names of organs or regions that (1) emphasize their physiology, (2) treat physiology as well as anatomy, (3) treat tissue structure as well as gross anatomy, (4) treat cytology (cell biology), or (5) treat histology (tissue biology). Use 611.1–.9 for works bearing the names of organs or regions that emphasize gross anatomy. Use 611.018 for treatment of anatomy, physiology, and pathology at the cytological and histological level if not limited to specific organs or regions. If in doubt, prefer 612.

612.1 - .8

Physiology of specific functions, systems, organs

612.1–.8 contains the basic division of the human body into physiological systems. Parallel subdivisions 1–8 appear in shortened or slightly altered form under 611 for human anatomy; under 615.7 for pharmacokinetics; under 616 for diseases; and under 617.4 for surgery by system.

Use 612.1–.8 as a guide to classing an organ or function not provided for in one of the parallel arrays, e.g., use 615.74 Drugs affecting lymphatic and glandular systems for pharmacokinetics of the pituitary gland, as this is parallel to 612.4 Hematopoietic, lymphatic, glandular, urinary systems, where the pituitary gland is named at 612.492; use 615.73 Drugs affecting digestive system and metabolism for pharmacokinetics of the pancreas, as this is parallel to 612.3 Digestion, where the pancreas is named at 612.34. However, use 615.761, where the urinary system is given, for pharmacokinetics of the kidneys, even though kidney physiology is at 612.463, under 612.46, where the urinary system appears in the 612 schedule.

612.8 vs. 152

Physiology of nervous system vs. Psychology of sensory perception, movement, emotions, physiological drives

Use 612.8 for works that emphasize the physical and chemical mechanisms and pathways of sensations, emotions, and movements, e.g., 612.8232 for studies using electrodes to determine how the brain processes emotions. Use 152 for works that emphasize awareness, sensation, intentions, meanings, and actions as experienced by the individual or observed and described without reference to the physics or chemistry of the nervous system, e.g., 152.47 for feeling anger. Use 152 for comprehensive works. If in doubt, prefer 612.8.

613 vs. 612, 615.8

Personal health and safety vs. Human physiology vs. Specific therapies and kinds of therapies

Topics in 613 also appear in 612, e.g., exercise 612.044 and 613.71, rest 612.76 and 613.79. Use 613 numbers for works on applied or "how to stay healthy" aspects; use 612 numbers for works on descriptive physiology or "how the body works" aspects. Use 612 for comprehensive treatment of descriptive physiology and promotion of personal health. Use 613 for works that give information about physiology as background for an emphasis on promotion of personal health. If in doubt, prefer 613.

Topics in 613 also appear in 615.8, e.g., breathing 613.192 and 615.836, diet 613.2 and 615.854, exercise 613.71 and 615.82. Use 613 numbers for works on preventive or "staying healthy" aspects; use 615.8 numbers for works on therapeutic or "regaining health" aspects. Use 613 for comprehensive works. If in doubt, prefer 613.

614.4

Epidemiology

The term "epidemiology" sometimes refers to a research technique with application outside 614, e.g., in determining etiologies, such as smoking as a cause of cancer 616.994071; in determining the dimensions of social service requirements, such as the incidence, extent, severity of mental retardation 362.32; in exploring the possible effectiveness of proposed preventive measures, such as in reducing traffic accidents 363.1257.

615.1 vs. 615.2-.3

Drugs (Materia medica) vs. Specific drugs and groups of drugs

Most drugs are organic (615.3). Use 615.1 for comprehensive works on drugs even if there is a strong predominance of organic drugs, as long as coverage of inorganic drugs is in proportion to their importance. However, use 615.321 for comprehensive works on crude drugs and simples (products that serve as drugs with minimal processing, e.g., medicinal teas). If in doubt, prefer 615.1.

615.1 vs. 615.7

Drugs (Materia medica) vs. Pharmacokinetics

The term "pharmacology" may be used in the titles of works mainly limited to pharmacokinetics. Use 615.1 if the table of contents is arranged by types of drugs. Also use 615.1 for comprehensive works on drugs. Use 615.7 if the table of contents is arranged by physiological systems or if the work emphasizes the physiological and therapeutic action of drugs. If in doubt, prefer 615.1.

615.2-.3 vs. 615.7

Specific drugs and groups of drugs vs. Pharmacokinetics

Use 615.2–.3 for drugs that have an effect on several physiological systems or are not known primarily for their effect on a single system, e.g., antibiotics 615.329.

Use 615.7 for drugs known primarily for their effect on a single system, e.g., digitalis 615.711 Cardiotonic agents, or 616.129061 Drug therapy for heart failure (*not* 615.32395 Drugs derived from Scrophulariales); alcohol 615.7828 (*not* 615.32). If in doubt, prefer 615.2–.3.

615.53

General therapeutic systems

Use 615.53 only for historical or theoretical works about general therapeutic systems, e.g., a discussion of the theory of chiropractic 615.534. Use therapy numbers for works that discuss the application of these systems to therapy, e.g., the application of chiropractic 615.82. Use numbers in 616–618 when the therapies are applied to specific conditions, e.g., chiropractic in musculoskeletal diseases 616.7062.

Biography

Class biographies of founders of therapeutic systems with the system, e.g., use 615.533092 for a biography of Andrew Taylor Still, the founder of osteopathy. However, use 610.92 for other practitioners of a specific system.

See also discussion at 610.92 vs. 615.534092.

615.7 vs. 615.9

Pharmacokinetics vs. Toxicology

Use 615.704, or the number in 615.71–.78 for the system affected, for toxic effects and interactions of drugs primarily of pharmacokinetic interest. However, use 615.9 when a drug primarily of pharmacokinetic interest is considered a poison because it is so toxic that a single inadvertent ingestion would cause serious complications or death, e.g., the pharmacokinetics of atropine (belladonna) 615.7 (*not* in any specific subdivision because it affects several systems), but the toxicology of belladonna 615.9523952. If in doubt, prefer 615.7.

615.8

Specific therapies and kinds of therapies

Class the application of therapies listed in 615.8 to certain specific types of disorders with the disorder, even if the work takes the application for granted without highlighting it in the title, e.g., use 616.9940642 (not 615.842) for radiotherapy emphasizing cancer treatment; use 616.891654 (not 615.85154) for music therapy emphasizing psychiatric uses.

615.852 vs. 203.1, 234.131, 292–299

Religious and psychic therapies vs. Religious healing and Christian gift of healing

Use 615.852 for works on healing and medicine that focus on religious practices as a part of the medical practice. Use 203.1, 234.131, and similar numbers in 292–299 for works on healing as a religious practice, including such topics as religious beliefs about illness, rituals and prayers for healing, miraculous cures by charismatic leaders or saints, e.g., healing in religions of North American native peoples

Class other works concerning illness or medicine and religion as follows:

| 201.661 |
|----------|
| 261.561 |
| 292-299 |
| 201.7621 |
| |
| 261.8321 |
| 292-299 |
| 202.117 |
| 231.73 |
| 212 |
| |

616 vs. 612

Diseases vs. Human physiology

Use 616 for comprehensive works on diseases that move from a discussion of physiology to a more general consideration of causes of disease, complications, prevention, and therapy. Use 612 for comprehensive works on physiology (612) and pathological physiology (616.07). For example, use 616.1 for the physiology, pathology, and therapeutics of the circulatory system, but use 612.1 for the normal and pathological conditions of the circulatory system. If in doubt, prefer 616.

616 vs. 616.075

Clinical medicine

Use 616 for works on clinical medicine covering the application of all branches of medicine to the treatment of various diseases. Use 616.075 for works on clinical medicine limited to diagnosis or to the work of a clinical diagnostic laboratory. If in doubt, prefer 616.

616 vs. 617.4

Nonoperative therapies

Use numbers in 616 for most works on nonoperative therapies, e.g., therapeutic manipulations of muscles 616.74062 (*not* 617.473062). Use 617.4, which is primarily limited to operative surgery of systems, for nonoperative therapies only if they have some connection with operative surgery, e.g., electrotherapy by heart pacer 617.4120645, since the pacer must be surgically implanted (617.4120592). If in doubt, prefer 616.

616 vs. 618.92

Diseases vs. Pediatrics

Use 616 for diseases that are most often treated in children, but that remain lifetime problems or threats, e.g., congenital diseases 616.043, mumps 616.313. Use 618.92

only if the work in hand is limited to the occurrence of the disease in children, e.g., mumps in children 618.92313. If in doubt, prefer 616.

616.1-.9

Specific diseases

Add table

071 vs. 01

Etiology vs. Microbiology

Use notation 071 when a work considers multiple possible causes for a disease, e.g., genetic factors, environmental factors, and viruses as causes of cancer 616.994071. Use notation 01 or one of its subdivisions if the emphasis is on microorganisms or a specific type of microorganism, even when the cause of a disease is complex and not yet fully understood, e.g., oncogenic viruses 616.994019. If in doubt, prefer notation 071.

Use notation 01 without further subdivision when the etiological agent for a specific disease is known to be a single type of microorganism, unless predisposing and contributing factors are emphasized, e.g., Treponema pallidum causing syphilis 616.951301, but predisposing factors leading to severity of syphilis 616.9513071.

616.8583

Homosexuality

Use 616.8583 for homosexuality only when the work treats homosexuality as a medical disorder, or focuses on arguing against the views of those who consider homosexuality to be a medical disorder. Class works about gay men and lesbians in relation to other topics in medicine with the topic plus notation 08664 from Table 1, e.g., advice to gay men and lesbians about finding psychotherapy for a variety of psychiatric problems 616.891408664. Class most works about gay men and lesbians outside medicine, e.g., Christian attitudes to homosexuality 270.08664, interdisciplinary works on homosexuality 306.766, gay men and lesbians in armed forces 355.008664. If in doubt, prefer a number other than 616.8583.

616.86 vs. 158.1, 204.42, 248.8629, 292-299, 362.29

Recovery from addiction

Use 616.86 for self-help programs for individuals recovering from substance abuse and interdisciplinary works about recovery programs that focus on the individual's life with addiction, covering the individual's experience with both social and medical aspects. Use 204.42, 248.8629, and similar numbers in 292–299 for religious guides and inspirational works for the recovering addict. Use 362.29 for works on organizations providing recovery programs, including administration of the program, and interdisciplinary works that cover both organizational and therapeutic aspects of recovery programs. If in doubt, prefer 616.86.

Class works that treat recovery programs for people recovering from a specific kind of substance abuse as a medical service with the substance in 616.86, plus notation 06 Therapy or notation 03 Rehabilitation from the table under 616.1–.9, whether the

programs are run by professionals, such as psychiatrists or clinical psychologists, or whether they are self-help programs run by laypeople. Use notation 06 for programs to arrest the illness and begin recovery, e.g., twelve step programs. Use notation 03 for programs to help the individual remain in recovery. If in doubt, prefer notation 06.

Class works that treat recovery programs for those recovering from a specific kind of substance abuse as a social service, with the substance in 362.29, plus notation 86 Counseling and guidance from the table under 362–363. Such works typically emphasize the organizational or institutional aspects of the program.

For example, use 616.86103 for interdisciplinary works on life as a recovering alcoholic; 616.86106 for the twelve step Alcoholics Anonymous program; 204.42 for a general guide for a recovering alcoholic on how to live a religious life; 248.86292 for a guide for a recovering alcoholic on how to live a Christian life; 362.29286 for comprehensive works on Alcoholics Anonymous, the organization that provides the twelve step program and places for individuals in the program to meet.

Do not use 158.1 for works on recovery from addiction, because psychology applied to a medical problem is classed with the medical problem, not in 150.

616.89 vs. 150.195

Mental disorders vs. Psychoanalytic systems

Use 616.89 and similar numbers (616.852, 616.858, 618.76) for applications of a psychoanalytic system in psychiatry, e.g., 616.8917 for psychoanalytic treatment of mental illness. Use the appropriate subdivision of 150 for applications of a psychoanalytic system to specific topics or branches of normal psychology, or to specific topics or branches of both normal and abnormal psychology, e.g., 154.63 for Freudian theories of dream analysis. Use 150.195 for comprehensive works on a psychoanalytic system or its founder, e.g., 150.1952 for Freudian system. If in doubt, prefer 616.89.

617

Surgery, regional medicine, dentistry, ophthalmology, otology, audiology Add table

06

Therapy

Do not use notation 06 by itself with numbers whose meaning is limited to surgery, since surgery is a therapy. Add subdivisions of 06 to surgery numbers for specific physical therapies used in preparation for or rehabilitation from operative surgery, or for branches of surgery not limited to operative surgery, e.g., drug therapy in treatment of burns 617.11061. Use notation 06 freely under numbers not limited to surgery, e.g., ophthalmologic therapy 617.706.

617.5

Regional medicine

This number brings together two different concepts: (1) regions, which incorporate parts of several physiological systems, e.g., the abdominal region 617.55; and

(2) organs, which are parts of single systems, e.g., the stomach 617.553. Use numbers for regions in 617.5 for works covering regional medicine as well as regional surgery, but use notation 059 from the table under 617 for works limited to regional surgery, e.g., diseases of abdomen 617.55, abdominal surgery 617.55059. Use numbers for specific organs in 617.5 only for surgery, since nonsurgical treatment is given with the system in 616.1–.8, and do not add notation 059 by itself except for surgery utilizing specific instruments or techniques, e.g., diseases of stomach 616.33, cryosurgery of stomach 617.553059, but stomach surgery 617.553. Use notation 0592–0598 from the table under 617 with numbers for specific organs for plastic surgery, transplantation of tissue and organs, implantation of artificial organs, implantation and removal of assistive devices for organs, endoscopic surgery, and laser surgery, e.g., liver transplantation 617.55620592. If in doubt for organs, prefer 616, or 617.6–.8 for teeth, eyes, and ears. If in doubt for regions, prefer 617.5.

618,92097 vs. 617

Regional medicine, ophthalmology, otology, audiology in pediatrics vs. Surgery, regional medicine, dentistry, ophthalmology, otology, audiology

Use 618.92097 for nonsurgical specialties given in 617.5 (regional medicine) and 617.7–.8 (ophthalmology, otology, audiology) when applied to children. Use 617.98 for comprehensive works on surgical specialties applied to children. Use the number for the subject in 617, plus notation 0083 from the table under 617 if appropriate, for works on surgery of a specific organ, system, disorder applied to children, e.g., medicine of the back for children 618.9209756, but surgery of the back for children 617.560083.

Use 617 for both nonsurgical and surgical aspects of topics given in 617.1–2 when applied to children, e.g., pediatric sports medicine 617.1027083. Use 617.6 for both medical and surgical aspects of dentistry for children, e.g., comprehensive works 617.645, diseases of the teeth and gums 617.630083, dental surgery 617.605083.

If in doubt, prefer 618.92097.

618.977 vs. 617

Special branches of geriatric medicine vs. Surgery, regional medicine, dentistry, ophthalmology, otology, audiology

Use 618.9775–.9778 for nonsurgical specialties given in 617.5–.8 (regional medicine, dentistry, ophthalmology, otology, audiology) when applied to people in late adulthood. Use 617.97 for comprehensive works on surgical specialties applied to people in late adulthood. Use the number for the subject in 617, plus notation 00846 from the table under 617 if appropriate, for works on surgery of a specific organ, system, disorder applied to people in late adulthood, e.g., medicine of the back for people in late adulthood 618.97756, but surgery of the back for people in late adulthood 617.5600846; diseases of the teeth and gums 618.97763, but dental surgery 617.6050846.

Use 617 for both nonsurgical and surgical aspects of topics given in 617.1–.2 when applied to people in late adulthood, e.g., injuries in late adulthood 617.100846.

If in doubt, prefer 618.977.

622.22, 622.7 vs. 662.6, 669

In-situ processing and ore dressing vs. Chemical engineering of fuels and metallurgy

Use 622.22 or the number for the specific material in 622.3 for in-situ processing, which uses chemical techniques to get the target materials (or compounds containing the target materials) out of the ground and is usually considered as mining, e.g., solution mining of uranium 622.34932. However, class in-situ processing of a fossil fuel in the chemical engineering number for the material produced, as this usually transforms the fuel into another form, e.g., coal gasification 665.772.

Use 622.7 for ore dressing, which refers to physical means of separating more usable ore from the low-grade materials that are dug out of the ground, e.g., magnetic separation of iron ore 622.77. However, use a number in chemical engineering (usually metallurgy, 669) when physical means that effect substantial chemical change are applied, e.g., electrodeposition of iron from ores 669.14.

Class use of high temperatures that cause drastic chemical changes in chemical engineering, e.g., pyrometallurgy 669.0282.

If in doubt, prefer 622.22 or 622.7.

624 vs. 624.1

Civil engineering vs. Structural engineering

Use 624 for basic texts on civil engineering that discuss both (1) structural engineering (which treats the specific subdisciplines of civil engineering that have general applicability to all kinds of structures) and (2) the various types of structures to which the engineering is applied. Use 624.1 only for works that take a narrow view of structural engineering, and do not discuss the various types of structures. If in doubt, prefer 624.

624 vs. 690

Civil engineering vs. Construction of buildings

Use 624 for works about "building" or "construction" covering construction of all types of structures. Use 690 only for works limited to discussion of habitable structures (buildings). If in doubt, prefer 624.

629.046 vs. 388

Transportation equipment vs. Transportation

Use 629.046 and other vehicle numbers in 600 (e.g., 623.74, 623.82, 625.2, 629.1–.4, and 688.6) for:

- 1. Description of the vehicle, e.g., steam locomotives of the 1930s 625.26109043
- 2. Technology of the vehicle, e.g., design tests for ships 623.810287
- 3. Operation (technical) of the vehicle, e.g., piloting spacecraft 629.4582
- 4. Maintenance and repair of the vehicle, e.g., repairing motorcycles 629.28775

Use 385-388 for:

- 1. Services provided by the vehicle, e.g., transportation of passengers by trains 385.22
- 2. Operation (general) of the vehicle, e.g., duties of the ship's captain 387.54044
- 3. Economic and social aspects of the vehicle, e.g., a register of the airplanes owned by a company 387.73340216

Use 385–388 for interdisciplinary works. If in doubt, prefer 629.046 and other vehicle numbers in 600.

629,1366 vs. 387,740426

Air traffic control

Use 629.1366 for the equipment needed for air traffic control, e.g., radar devices, and the duties of the air traffic controllers. Use 387.740426 for general operational aspects, e.g., determining how many controllers are needed per airport; for economic and social aspects, e.g., the radio call letters of the control tower; and for interdisciplinary works. If in doubt, prefer 629.1366.

629.43, 629.45 vs. 559.9, 919.904

Space flight vs. Earth sciences of, geography of, and travel in extraterrestrial worlds

Use 629.43 and 629.45 for traveling to an extraterrestrial world and exploring it from space, e.g., Viking Mars Program 629.43543. Use 559.9 and notation 0999 from Table 1 in 551–553 for discoveries in extraterrestrial worlds emphasizing the "earth sciences" of the world, e.g., volcanic activity of Mars 551.21099923. Use 919.904 only for projected accounts about exploring the world, e.g., astronautics on Mars 919.92304. If in doubt, prefer 629.43 and 629.45.

630 vs. 579-590, 641.3

Agriculture and related technologies vs. Natural history of specific kinds of organisms vs. Food

Interdisciplinary numbers

Use numbers in 630 for interdisciplinary works on domestic plants and animals, or works discussing species known almost exclusively in agriculture. Use numbers in 630 as the interdisciplinary numbers for species if the work discusses varieties not known in nature. Use numbers in 579 or 580–590 for interdisciplinary works on plants and animals in general.

Use numbers in 630 for works that have material on where to find species in the wild, but concentrate on how to grow them, e.g., finding and growing wild flowers 635.9676 (not 582.13); where aquarium fishes are found and how to raise them 639.34 (not 597). Use numbers in 579 or 580–590 as the interdisciplinary numbers for species harvested in the wild, e.g., mushrooms, trees, and fishes, unless the species is best known for a single product, e.g., teak for lumber 674.144 (not 583.96).

Use 641.3 for interdisciplinary works on food. Use 641.3 (*not* 579, 580–590 or 630) for works that discuss the utilization and food value as well as the agriculture and biology of edible plants and animals.

If in doubt, prefer in the following order: 630, 641.3, 579 or 580–590.

632.95 vs. 632.2-.8

Pesticides vs. Specific diseases and pests

Pesticides are an exception to the general rule that control of specific pests and diseases is classed with the disease or pest. Use 632.95 if a work concentrates on a pesticide, discussing the mechanism of action, the on-farm environmental effects, or the safety aspects, even if the pesticide is used only on a single kind of pest or disease.

Use 632.2—8 if the work treats control of the pest or disease in crops, rather than emphasizing the pesticide and its toxicity. For example, use 632.951 for a work on how a rodenticide kills rats, or how it is a danger to local wildlife that eats poisoned rats, 632.9540289 for the safety hazards of herbicides; but use 632.69352 for a work on how to control rats by laying out rodenticides, 632.5 for a work on how to control weeds by spraying herbicides. If in doubt, prefer 632.95.

Use 632.95 for on-farm environmental effects of pesticides only if the work is limited to technical aspects. Use 363.7384 for interdisciplinary works on environmental effects of pesticides.

633-635

Specific plant crops

Certain plants have more than one number if they are important for two or more quite different crops. Some of the more important distinctions are:

Cereals versus cereal grasses (633.1 vs. 633.25)

Use 633.1 if the cereal is grown for grain (even if the fodder is an important by-product), but use 633.25 if the whole plant is to be consumed by livestock (even if the grain is allowed to ripen).

Legumes (633.3 vs. 635.65)

Use 633.3 if the legume is grown for either the ripened seed or forage, but use 635.65 if the pod is to be picked green or unripened for human consumption.

Other crops

For crops that are listed in only one number, use that number if the difference in production techniques and the appearance of the crop produced by the farmer is minor, e.g., use 635.21 for potatoes whether grown for food, feed, or starch, as they are all grown in the same manner and look alike. However, use 634.9753 for hemlocks grown for lumber, but 635.97752 for hemlocks grown for landscaping, as they are grown in a quite different manner and look quite different when shipped. If the crop described in a work does not fit existing numbers where the plant is named,

use the closest suitable number, e.g., a legume grown for hard fibers 633.58. If in doubt, prefer the existing number coming first in the schedule.

635.9 vs. 582.1

Flowers and ornamental plants in agriculture vs. Herbaceous and woody plants, plants noted for their flowers

Use 635.9 (often 635.97 Other groupings of ornamental plants) for works that emphasize plants to be cultivated or appreciated in human-made settings. Use 582.1 for works that emphasize the plants in nature or their biology. If in doubt, prefer 635.9.

See also discussion at 630 vs. 579–590, 641.3.

636.1-.8 vs. 636.088

Specific kinds of domestic animals vs. Animals for specific purposes

Use numbers in 636.1–.8 for terms used in subdivisions of 636.088 applied to specific kinds of domestic animals. Terms listed in 636.088 may apply to only one or a few kinds of animals provided for in 636.1–.8 and are therefore used primarily for number building. For example, the numbers for raising cows for milk and raising poultry for eggs are both derived in part from the eggs and milk number 636.08842. Notation 42 is added to 636.21 (cattle for specific purposes), giving 636.2142 for dairy farming, and to 636.51 (poultry for specific purposes), giving 636.5142 for egg production. 636.08842 itself will seldom be used, because there are few works on producing both milk and eggs or on producing milk from several kinds of animals. Use 636.5142 for works on producing eggs from several kinds of birds. If in doubt between a subdivision of 636.088 and a derived subdivision under 636.1–.8, prefer the latter.

636.70886, 636.70888 vs. 636.73, 636.752

Dogs for work and sport vs. Working and sporting dogs

Use 636.70886 and 636.70888 for works that cover dogs used as work animals (e.g., disaster search and rescue dogs, guide dogs) or dogs used as sport animals (e.g., fighting dogs) without limitation to a specific breed or group of dogs. Dogs as work animals also include dogs used in the movies, on television, and on stage. Sled dogs and watchdogs are explicit exceptions to the general rule, in that, although they are dogs used as work animals, they are classed in 636.73, since nearly all these dogs belong to the group of breeds recognized as working dogs.

Use 636.73 and 636.752 for works on specific breeds and groups of breeds of dogs, recognized by the American Kennel Club (AKC) as "working dogs" or as "sporting dogs."

If in doubt, prefer 636.70886 and 636.70888.

636.72-.75

Specific breeds and groups of dogs

The main groupings used are those recognized by the American Kennel Club (AKC) in *The Complete Dog Book*, 1997. The roughly corresponding groupings

of the Kennel Club of United Kingdom (KC) are given in class-here notes when the names differ materially. Most, but not all, of the breeds listed in the schedule are those recognized by the AKC. Class other breeds having pedigrees recognized in other nations that fit within the AKC or KC groupings with the groupings, e.g., European gundogs 636.752.

If in doubt about a breed not named in the schedule, class it in 636.7 (not 636.71).

Hounds

Use *Encyclopedia Americana* for help in separating gazehounds (636.7532) from scent hounds (636.7536).

636.82-.83

Specific breeds and kinds of domestic cats

Use David Taylor's *The Ultimate Cat Book*, 1989, for help in determining where a specific breed of cats should be classed.

643.29, 690.879, 728.79 vs. 629.226

Mobile and motor homes

Use 643.29 for interdisciplinary works on mobile homes and for mobile homes meant to serve as permanent homes. Use 629.226 (where campers, motor homes, trailers [caravans] are presented as types of motor land vehicles) only for what are essentially either automobiles with living accommodation, collapsible living accommodation to be used with trucks or trailers, or trailers with such limited living accommodation that they would not (even when hooked up) serve as permanent homes. Do not use 629.226 for mobile homes that must be towed and are meant to stay in one location for a long time. Use 690.879 for works on building mobile homes, and use 728.79 for works on the architecture of mobile homes. If in doubt, prefer 643.29.

647 vs. 647.068, 658.2, T1-0682

Institutional housekeeping vs. Plant management

Use 647 and subdivisions of 647.9 without the addition of the management notation from Table 1 for most works on the management of institutional households, because the term "management" often refers to the basic techniques of operating an establishment, i.e., to the topics found in 642–646 and 648 taken as a whole, when they apply to public facilities. Use 647.068 (or 647.94068, 647.95068, etc.) only when the work treats the kind of management topics found in 658.1–.8, e.g., financial management and marketing. If in doubt between 647 and 647.068, prefer 647.

Plant management covers some of the same topics as institutional housekeeping, e.g., utilities, equipment, maintenance. Use 647 (or other 640 numbers for specific aspects) if the emphasis is on doing the actual work, but use 658.2 if the emphasis is on making sure that the work is done, e.g., a how-to work on running utilities for restaurants 644, on hospital housecleaning 648.5; but a work on managing restaurant utilities 647.950682, on managing hospital housecleaning services 362.110682. If in doubt between 647 (or other 640 numbers for specific aspects) and 658.2 (or T1—0682), prefer 647.

658.04 vs. 658.114, 658.402

Management of enterprises of specific forms vs. Initiation of business enterprises by form of ownership organization vs. Internal organization

Use 658.04 for comprehensive works on management of enterprises of specific legal or ownership forms (e.g., corporations, partnerships). Use 658.114 for works that focus on initiating enterprises of specific legal or ownership forms—either starting a new business or converting an existing business to a new form, e.g., starting up a new individual proprietorship 658.1141, converting an individual proprietorship to a corporation 658.1145.

Use 658.402 for works on the internal managerial organization of an enterprise (how authority and responsibility are apportioned), not its legal or ownership organization. For example, in a line organization a single manager exercises final authority, either directly over production workers or over several supervisors who in turn supervise workers.

If in doubt, prefer in the following order: 658.04, 658.114, 658.402.

658.45 vs. 651.7, 808.06665

Communication in management vs. Communication as an office service vs. Business writing

Use 658.45 for works that focus on use of communication to achieve management goals. These works often emphasize the personal relations aspects of management communication.

Use 651.7 for works emphasizing such topics as the use of the telephone, techniques of dictation, how to use microcomputer software for form letters, mail-handling techniques—in short, the mechanics of communication. Do not use 651.7 for works that emphasize effective business writing style.

Use 808.06665 for style manuals on business writing and works on how to do effective business writing, whether aimed at secretaries or executives. Use 808.066651 for works on how to write a specific type of communication (e.g., business letters) and for model collections of a specific type intended to illustrate good writing style.

If in doubt, prefer in the following order: 658.45, 808.06665, 651.7.

669

Alloys

Use 669 for comprehensive works on alloys of a variety of metals. Use 669.1–.7 for comprehensive works on a specific alloy, or the alloys of a specific metal. Use 669.9 for the physical and chemical metallurgy of alloys, and the process of forming alloys.

Use the number for the chief constituent metal (if readily ascertainable) for an alloy not listed in 669, e.g., Monel®, a nickel alloy of about 67 percent nickel and 30 percent copper 669.7332 (not 669.3). If the chief constituent is not readily ascertainable, use the number for the metal coming first in the schedule, except use 669.142 for all alloys of steel.

671-679 vs. 680

Manufacture of products from specific materials vs. Manufacture of products for specific uses

In general, use 671–679 for primary products, and use 680 for final products from a given material, e.g., textiles 677, clothing 687. The distinction between 671–679 and 680 cannot be drawn consistently because some products from specific materials are in 680, e.g., leather and fur goods 685; and some products for specific uses are in 671–679, e.g., paper plates and cups 676.34. If in doubt, prefer 671–679.

680 vs. 745.5

Handicrafts

Use 680 for crafts in the sense of country crafts, and cottage industries and trades, such as those of the blacksmith (682) or harness maker (685.1). Also use 680 for handicrafts treated as the routine way of manufacturing secondary and final products. Use 745.5 for handicrafts when limited to artistic work. If in doubt, prefer 680.

690 vs. 643.7

Construction of buildings vs. Renovation, improvement, remodeling in home economics

Use 690.80286 or other numbers in 690 for works on home renovation and remodeling for professional builders. (Use the special standard subdivision notation 0286 for remodeling in 690 only with numbers drawn from 725–728; do not use a standard subdivision for this subject elsewhere in 690.) Use 643.7 and other numbers in 643 for a broad range of material intended for the do-it-yourself enthusiast, as indicated by the scope note at 643 reading "works for owner-occupants or renters covering activities by members of household." If in doubt, prefer 690.

700.92

Persons in the arts

The instructions for the classification of artists vary, either between major areas of the arts or within one division, e.g., use 730.92 for a sculptor, 730.092 for a sculptor who has also worked in one or more of the other plastic arts, 738.092 for a potter regardless of material or product.

Use either notation 092 from Table 1 or notation for period or place for works of an artist or artists as instructed under specific numbers, e.g., use 730.92 for works of a French sculptor, but use 741.944 for drawings by a French artist.

704.9 and 753-758

Iconography

Prefer iconography over history and geographic treatment, e.g., a general work on Romanesque art 709.0216, Romanesque painting 759.0216, Romanesque art of Normandy 709.44209021, Romanesque painting of Normandy 759.4209021, but the Virgin Mary and Child in Romanesque art of Normandy 704.948550944209021, the Virgin Mary and Child in Romanesque painting of Normandy 755.550944209021. However, care should be taken in classifying schools

and styles that are usually limited in subject matter, such as early Christian, Byzantine, and Romanesque schools, which usually treat religious themes. Use 704.9 or 753–758 only if a point is made that iconography or one of its aspects is the focus of the work.

Use of standard subdivisions

Add standard subdivisions to iconography numbers even if the topic does not approximate the whole of the heading. There are four exceptions: 704.9428 and 757.8 Pornography, 704.9434 and 758.5 Plants, 758.3 Animals, and notation from Table 2. For instance, if a work covers only roses in art or dogs in painting, a standard subdivision should not be added.

Add notation 09 from Table 1 plus notation 3–9 from Table 2 to show the nationality or locality of the artists rather than the location of the subject, e.g., Canadian portraits of British royal children 704.94250971, Canadian portrait paintings of British royal children 757.50971. Do not add notation 074 from the table under T1—093–099 in Table 1 unless the area covered by the work being classed approximates the whole of the area indicated by the notation from Table 2.

709.012-.015, 709.02-.05 vs. 709.3-.9

Fine and decorative arts by periods of development vs. Fine and decorative arts by specific continents, countries, localities

Class the works produced by an artistic school or in a particular style as follows:

- 1. From the same locality, with the locality in 709.3-.9
- 2. From various localities within a specific country, with the country in 709.3–.9
- 3. From two countries, with the country coming first in Table 2 in 709.3–9
- 4. From three or more European countries, with the period when the school or style flourished in 709.012–.015 or 709.02–.05
- 5. From three or more non-European countries within the same continent, with the continent in 709.3–.9
- 6. From three or more countries not within the same continent, with the period when the school or style flourished in 709.012–.015 or 709.02–.05

If in doubt, prefer in the following order: 709.012–.015 and 709.02–.05, the country number in 709.3–.9, the locality number in 709.3–.9.

709.2 vs. 381.457092

Art dealers

Use 709.2 for art dealers as a part of the art world, e.g., the artists the dealers knew and works of art they handled. Use 381.457092 for works about art dealers that focus on the economics of trading in art. If in doubt, prefer 709.2.

729

Design and decoration of structures and accessories

Use 729 only for general works that focus specifically on architectural design. Use 690 for works that treat construction alone, and use 721 for works that treat design and construction together. Use 729 for works on decoration only when the subject is being treated as an aspect of architectural decoration rather than as an art object in itself, e.g., the use of murals as architectural decoration 729.4, but comprehensive works on murals 751.73.

731-735 vs. 736-739

Sculpture vs. Other plastic arts

Use 731–735 for products and techniques of sculpture. Use 736–739 for products and techniques of the plastic arts. For example, use 731.74 for a bronze figure that is a sculptured bust, but use 739.512 for a bronze figure that is part of a larger decorative work (such as a finial or handle). If in doubt, prefer 731–735.

741.5

Choice between comic books, graphic novels, fotonovelas, cartoons, caricatures, comic strips and subject

Use 741.5 and its subdivisions for works of the imagination in comic book, graphic novel, fotonovela, cartoon, caricature, or comic strip forms that are primarily intended to delight. Use 001-999 plus notation 0207 or notation 0222 from Table 1 for works in these forms that are primarily intended to inform or persuade. Use notation 0207 Humorous treatment for works where the author's intention is serious, but where humor is used to convey the author's message; use notation 0222 Pictures and related illustrations for works where humor is not apparent. For example, use 900 plus notation 0207 from Table 1 for cartoon histories that are primarily intended to inform the reader about history, while using humor to convey the message, e.g., a cartoon history of the United States 973.0207; however, use 741.5 and its subdivisions for works that are primarily humorous in intent and merely use snatches of history as an occasion for humor. Use 510 plus notation from Table 1 for a work primarily intended to teach math, even if it has a thin fictional framework. Use 001–999 plus notation from Table 1 for works presented as cartoon textbooks, journalism, biographies or autobiographies about nonfiction topics, e.g., Larry Gonick's The Cartoon Guide to Physics 530.0207, Joe Sacco's Safe Area Goražde ["the War in Eastern Bosnia, 1992–95"] 949.742, Our Cancer Year (by Joyce Brabner and Harvey Pekar; illustrations by Frank Stack) 362.1969940092; however, use 741.5 and its subdivisions for works presented as factual that are known to be fictional, e.g., fictional autobiography. If in doubt about a work presented as a cartoon textbook, journalistic, biographical or autobiographical account about a nonfiction topic, prefer the number for the topic.

See also discussion at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07.

Use 741.5 and its subdivisions for works in comic book, graphic novel, fotonovela, cartoon, caricature, or comic strip forms that present fictional narratives comparable to short stories or novels in literature. Difficulties arise with nonfiction novels that use the techniques of fiction writing to tell the story of actual people and actual

events. Class an account of a true event or series of events using the names of the people involved, not inventing characters or distorting facts to enhance an intended artistic effect, and not going beyond the information available to the author from investigation and interviews, in the discipline appropriate to the facts described, e.g., Rick Geary's *The Beast of Chicago: An Account of the Life and Crimes of Herman W. Mudgett Known to the World as H. H. Holmes* 364.1523092. If, however, the author goes beyond what is learned from investigation and interviews in describing conversations, feelings, thoughts, or states of mind of the people depicted in the book, use 741.5 and its subdivisions. If in doubt about a work that uses techniques of fiction writing, prefer 741.5 and its subdivisions.

Use 741.5 and its subdivisions for adaptations in comic book, graphic novel, fotonovela, cartoon, caricature, or comic strip forms of other works of the imagination, such as literary works, operas, dramatic films, e.g., an adaptation of Kafka's *Metamorphosis* as a graphic novel by Peter Kuper, an American 741.5973. Adaptations of works of the imagination are classed in the number appropriate to the adaptation, not the work being adapted. (Do not regard a translation as an adaptation unless the changes are much greater than is common with translations; for example, use 741.59519 for a graphic novel translated from Korean into English.) Adaptations of nonfiction works, however, are classed with the subject, e.g., *The Picture Bible* (script by Iva Hoth; illustrations by Andre Le Blanc) 220.9505.

741.5 vs. 741.56

Comic books, graphic novels, fotonovelas vs. Cartoons, caricatures, comic strips

Use 741.5 and 741.59 for comic books, graphic novels, fotonovelas, e.g., *Astérix* (by Uderzo and Goscinny), *Astro Boy* (by Osamu Tezuka), *Contract with God and Other Tenement Stories* (by Will Eisner), *Fantastic Four, Nikopol Trilogy* (by Enki Bilal), *Strangers in Paradise* (by Terry Moore), *Tintin* (by Hergé), *Wonder Woman*. These are multi-panel works written to be read in relatively long segments, like short stories or novels. If they were originally published in parts, the parts are likely to have been issued monthly or less frequently (occasionally weekly or biweekly as part of serial anthologies), not daily.

Use 741.56 and 741.569 for cartoons, caricatures, comic strips, e.g., caricatures by Max Beerbohm, Al Hirschfeld, and David Levine; *New Yorker* and *Punch* cartoons; cartoons by Michael Leunig; *Andy Capp* (by Reg Smythe), *Doonesbury* (by G. B. Trudeau), *The Far Side* (by Gary Larson), *For Better or for Worse* (by Lynn Franks Johnston), *Garfield* (by Jim Davis), *Peanuts* (by Charles M. Schulz). These were written to be read in brief segments, like jokes or anecdotes. They have a single panel, or a few panels issued daily or weekly online or in a newspaper; consequently, they have an anecdotal quality even when the same characters appear in many segments brought together in collected works.

Use 741.56 and 741.569 for works originally published as comic strips, unless the same main characters also appear frequently in comic books, graphic novels, fotonovelas. Avoid separating works about the same characters between 741.569 and 741.59; use the number for the form in which the characters most commonly appear, regardless of whether the content of the work in hand was originally issued as comic strips or comic books, e.g., 741.56973 for works about Dick Tracy (most

commonly issued as comic strips), but 741.5973 for works about Spider-Man or Star Wars (most commonly issued as comic books). If in doubt, prefer 741.59.

Use 741.5 and 741.59 for comprehensive works on both kinds of graphic works. Use 741.59 for graphic artists and writers who are equally well known for doing both kinds of graphic works.

If in doubt, prefer 741.5 and 741.59.

Use 741.51 Techniques, procedures, apparatus, equipment, materials and 741.53 Special aspects of comic books, graphic novels, fotonovelas, cartoons, caricatures, comic strips for both kinds of graphic works.

741.593-.599 and 741.5693-.5699

Specific continents, countries, localities

Use the same guidelines for selecting geographic notation for cartoons, caricatures, comic strips as for comic books, graphic novels, fotonovelas.

Use notation for the country of the artist or writer for a work or a collection that features a particular artist or writer, e.g., a collection of comic books by a single Japanese artist 741.5952. Use the same number for biography or critical appraisal of a single writer or artist, e.g., a biography of the Japanese artist 741.5952. If an artist or writer changes place of residence to another country but does not change citizenship, use the area notation for the country of origin. If the artist or writer does change citizenship, however, use the area notation for the country of adopted citizenship. If information about an artist's or writer's national affiliation is not readily available in the work being classed or in standard reference books, use the area notation for the country of origin, if known; or the notation for the country in which the person's earlier works were published.

Use notation for the country where first published for a work or a collection where multiple hands (e.g., writers, pencilers, inkers, colorists, letterers) have contributed and no one artist or writer is featured, if the work reflects the culture of that country, e.g., a graphic novel first published in the United States 741.5973, a graphic novel first published in Japan then translated into English and published in the United States 741.5952 (not 741.5973).

If in doubt, try to determine what area's cultural tradition the work primarily reflects or was originally aimed at, and use the notation for that area. If still in doubt, prefer notation for the area that comes later in Table 2.

741.6 vs. 800

Illustrations

Use 741.6 for illustration in general. Class a specific type of illustration with the art form represented if the type is emphasized, e.g., etchings. Use 800 for illustrations that merely accompany or enhance the literary text. If in doubt, prefer 741.6.

745.1

Antiques

Use the available number in 700 for a specific type of antique, e.g., gold coins 737.43, antique New England furniture 749.0974.

If there is no available number in 700–779, use the 600–699 number for a specific type of antique, e.g., antique passenger automobiles 629.222. If there are separate numbers in 600–699 for the use of the object and for its manufacture, prefer the use number, e.g., thimbles 646.19 (not 687.8).

If there is no available number in either 600–699 or 700–779 for a specific antique or collectible, class it with the subject with which it is most closely associated, e.g., Shirley Temple collectibles 791.43028092.

745.5928

Handcrafted models and miniatures

Class handcrafted miniatures and models as follows:

Use 700 for handcrafted models:

- 1. If there is a specific number in 700 for the model, e.g., paper airplanes 745.592.
- 2. If there is a specific number in 700 for the subject illustrated by the model, e.g., handcrafted miniature furniture 749.0228. (Use notation 0228 from Table 1 to indicate the model or miniature.)
- 3. If there is no number in 600 for the model or the subject illustrated by the model. In this case the most specific number possible is chosen.

Use 600 for handcrafted models and miniatures if there is no specific number in 700 *and* either of the following conditions is met:

- 1. If there is a specific number in 600 for the model, e.g., handcrafted model airplanes 629.133134.
- 2. If there is a specific number for the subject illustrated by the model, e.g., hand-crafted miniature reciprocating steam engines 621.1640228. (Use notation 0228 from Table 1 to indicate the model or miniature.)

769.9

History, geographic treatment, biography of printmaking and prints

Use 769.92 for both printmakers who copy other artists and the artists being copied (if only prints are being discussed), e.g., prints after Gainsborough 769.92. Use 769.93–.99 for prints produced by a print workshop or a studio. If in doubt, prefer 769.92.

776 vs. 006.5-.7

Computer art

Use 776 for comprehensive works on computer art and for works on computer art where the computer itself displays the art object or creates the final art object. Use 700–780 plus notation 0285 from Table 1 or specific provisions in the schedule for works on computers used as tools or devices to create art objects, e.g., computers and the arts 700.285, computers in the graphic arts 760.0285, computer composition of music 781.34.

Use 006.5–.7 for works on the computer hardware and software used in computer arts, e.g., computer sound 006.5, computer graphics 006.6, multimedia systems 006.7. Such works will typically tell how to use the hardware or the software, and may include information on such topics as file compression.

If in doubt, prefer 776.

779 vs. 770.92

Photographic images vs. Biography

Use 779 and its subdivisions, plus notation 092 from Table 1, for collections and critical appraisals of photographic images by individuals. Use 779 and its subdivisions, plus notation 09 from Table 1 and notation 1–9 from Table 2, for collections and critical appraisals of photographic images by several artists from the same area to show the area where the photographers originated, e.g., collections of portrait photographs by French photographers 779.20944. In both cases, the collection may contain one or more type of photographic images, e.g., photographs, prints, digital images, filmstrips, slides, transparencies. Use 770.92 for biographies and critical appraisals of the body of the photographers' works, which may also contain some photographic images. If in doubt, prefer 779.

780

Music

Building numbers

Building a number for a work that is classed in 780 is a four-step process:

- 1. Determine the various facets of the work.
- 2. Arrange the facets in the proper order.
- 3. Determine whether or not the topics belonging to the facets can be indicated.
- 4. Follow the add instructions.

For example, in building the number for a work entitled *Harmony in Beethoven's piano sonatas*, one takes the following steps:

1. Determine the various facets of the work: For the work being classed, there are four facets, or aspects: a general musical topic, harmony; the composer, Beethoven; the instrument, piano; and a musical form, sonata.

- 2. Arrange the facets in proper order: The usual arrangement is the executant (the voice or instrument that produces the music), here the piano at 786.2; the music form, here the sonata at 784.183; general principles, here harmony at 781.25; standard subdivisions, here a person associated with the music at 780.92 (in this case Beethoven). This arrangement obeys the general instruction at 780, which states: unless other instructions are given, class subjects with aspects in two or more subdivisions of 780 in the one coming last. The major exception to executant before form occurs with vocal music (see 782 for complete details). If one decided to follow the option of classing all works related to a composer in 789, the arrangement would then be composer, the executant, the musical form, general principles, other standard subdivisions.
- 3. Determine whether or not the topics belonging to the facets can be indicated: If the topic is given in a class-here note or is the same or approximately the same as a number's heading, a topic from another facet can be indicated. If the topic is given in an including note, topics in other facets cannot be indicated. Since the topics, piano, sonata, and harmony, are the headings at 786.2, 784.183, and 781.25, respectively, further topics can be indicated. (For *Harmony in Chopin's mazurkas for piano*, the topics harmony and Chopin cannot be indicated because mazurka is a part of the including note at 784.1884.)
- 4. Follow the add instructions: At 786.2 *Pianos, the * refers to the footnote, which instructs one to add as instructed in the add table under the centered entry at 784–788. The add instruction in the add table says that musical forms and instruments are shown by adding 1, then the numbers following 784.1 in 784.18–19. Thus, facet indicator 1 plus 83 from 784.183 †Sonata form and sonatas added to 786.2 produces 786.2183 Piano sonatas. At 784.183, the † refers to the footnote, which instructs one to add as instructed in the add table under the centered entry at 781.2–.8, which says that in order to show general principles add 1 and then the numbers following 781 in 781.1–.7. The result of adding 1 and then 25 from 781.25 *Harmony is 786.2183125 harmony in piano sonatas. Even though the * at 781.25 indicates that further additions are possible, i.e., adding 092 to indicate Beethoven, the general add instruction at 780 forbids using 0 or 1 (alone or in combination) more than twice. (An option does allow further additions.) Thus, the class number for *Harmony in Beethoven's piano sonatas* is 786.2183125.

Examples

780.079 vs. 790.2

Music and the performing arts vs. The performing arts in general

Use 780.079 for works focusing on music in relation to the other performing arts. Use 790.2 for works on the performing arts as a whole. If in doubt, prefer 780.079.

780.26

Texts; treatises on music scores and recordings

Within 780, add 026 (from 780.26) to the number in 781–788 to indicate treatises about scores and recordings. (To distinguish scores and recordings themselves within 780, apply the optional provision given at 780.) However, when 780 and 781–788 numbers are added elsewhere in the schedules, add 026 for scores and recordings, as well as for treatises about them. For example:

| Number | Used for |
|--------------|---|
| 787.2 | A treatise on violin music |
| 787.2 | Violin scores |
| 787.2 | Recordings of violin music |
| 787.2026 | A treatise on violin scores |
| 787.20266 | A treatise on recordings of violin music |
| 016.7872 | A bibliography of treatises on violin music |
| 016.7872026 | A bibliography of violin scores |
| 016.7872026 | A bibliography of treatises on violin scores |
| 016.78720266 | A discography of recordings of violin music |
| 016.78720266 | A bibliography of treatises on recordings of violin music |

780.92 and 791.092

Biography of persons associated with public performances

Use the number for the activity with which the person's career is chiefly identified for the biography of a performer, e.g., the biography of an opera singer 782.1092. If the person's career involves more than one kind of public performance with no particular predominance, use the activity that comes first in the following table of preference:

| Music | 780 |
|-----------------|--------|
| Dancing | 792.8 |
| Stage | 792 |
| Motion pictures | 791.43 |
| Television | 791.45 |
| Radio | 791.44 |

For example, use 792.028092 for the biography of a stage actor who has also done considerable work in television. Give preference to activities listed in the above table over all other activities listed in 791.

Music 780

780.92

Musicians and composers

Musicians

Comprehensive works on musicians are classed in the most specific number that describes their careers. Use 780.92 only for musicians who are equally known for both their vocal and instrumental work, e.g., Ludwig van Beethoven 780.92. Use 782–783 for musicians known primarily for vocal music, e.g., Richard Wagner, an opera composer, 782.1092; Elvis Presley, a rock singer, 782.42166092. Use 784–788 for musicians known primarily for instrumental music, e.g., Sir Thomas Beecham, a conductor, 784.2092; Nicolò Paganini, a violinist, 787.2092. (See also 781.6 for discussion of musicians associated with traditions of music other than classical.)

See also discussion at 784–788: Add table: 092.

Composers

Use notation 092 from Table 1 to indicate a biography, a general criticism of the composer, an analysis of a composer's contribution to the development of some aspect of music (such as Haydn's role in the development of the concerto form), critical works on the body of a composer's work (such as a critique of the piano music of Ravel), and a collection of analyses of the individual pieces of music. Do not use notation 092 for criticism of an individual work by a composer.

The citation order for music requires that general criticism of a composer's works in a specific form and criticism of a single aspect of the works be separated because the aspect is shown by adding from 781. For example, use 784.2184092 for general criticism of Brahms's symphonies, but use 784.2184125 for criticism of harmony in Brahms's symphonies. However, if a library wishes to keep all criticism of a composer's works in the same number, it is optional not to add from 781, e.g., criticism of Brahms's symphonies and of harmony in Brahms's symphonies both 784.2184092.

See also discussion at 784-788: Add table: 092.

781.38

Arrangements

Add 138 (the arrangement notation derived from 781.38) to the number in 782–788 for a voice, instrument, or ensemble to indicate arrangements in general either of or for the voice, instrument, or ensemble. For example, use 787.2138 for both violin music arranged for various instruments and music of several instruments arranged for the violin, 787.2 (violin music) plus 138 (arrangements).

Add 1382–1388 (the arrangement notation derived from 781.382–.388) to the number in 782–788 for a voice, instrument, or ensemble for which the music was arranged in order to indicate the original voice, instrument, or ensemble. Use 781.382–.388 only for building other numbers; never use these numbers by themselves. For example, use 786.213872 for an arrangement of violin music for piano, that is, 786.2 (piano music) plus 13872 (arrangements of violin music).

47

781.47

Accompaniment

For treatises, add 147 (the accompaniment notation derived from 781.47) to indicate how to accompany the work, e.g., how to accompany violin music 787.2147.

(Option: For scores, add notation 147 to indicate the presence of accompaniment, e.g., accompanied violin music 787.2147, unaccompanied violin music 787.2.)

781.6

Traditions of music

Hybrid styles

Use 781.621–.629 for a hybrid style (a blending or fusion of two or more styles from different traditions of music to create a new style) that originates within and is associated with an ethnic or national group, e.g., a Nigerian style that blends Nigerian folk music and jazz 781.629669. Use the number coming last in 781.63–.69 for other hybrid styles, plus notation 17 from the table under 781.63–.69 if appropriate, e.g., blues-rock 781.661743, third stream music 781.68175.

Nonclassical musicians

Comprehensive works on nonclassical musicians (musicians of a tradition other than classical music) are classed in the most specific number that describes their careers. Use numbers in 781.62–.66 and in 781.69 for musicians that are equally known for both their vocal and instrumental work, e.g., Louis Armstrong, a jazz trumpeter, singer, and band leader, 781.65092. Use 782–783 for musicians known primarily for vocal music, e.g., Ella Fitzgerald, a jazz singer, 782.42165092. Use 784–788 for musicians known primarily for instrumental music, e.g., John Coltrane, a jazz tenor-saxophonist, 788.7165092. Add 162–166 or 169 (the traditions-of-music notation derived from 781.62–.66 and 781.69) to the number in 782–788 before adding notation 092 from Table 1.

See also discussion at 784-788: Add table: 092.

781.6 vs. 780, 780.9

World music

Use 781.6 for music emphasizing specific traditions, e.g., folk music around the world 781.62. Use 780 for music of various traditions from around the world, e.g., an encyclopedia of world music 780.3. Use 780.9 for the music of specific places in the world, e.g., comprehensive works on music of Brazil 780.981. If in doubt, prefer 781.6, 780.9, 780.

781.62 vs. 780.89

Folk music vs. Music with respect to ethnic and national groups

Use 781.62 for music that originates within and is associated with an ethnic or national group, e.g., African American music 781.6296073. Use 780.89 for the group in relation to music in general, e.g., a work about African American composers, opera singers, jazz conductors 780.8996073. If in doubt, prefer 781.62.

781.62 vs. 781.63-.66

Folk and popular music

Use 781.62 for folk music or popular music that originates within and is associated with an ethnic or national group. Use 781.63–.66 for other popular music. If in doubt, prefer 781.62.

Use allmusic.com (http://www.allmusic.com/) or a similar online source for help in determining the style of western popular music.

782

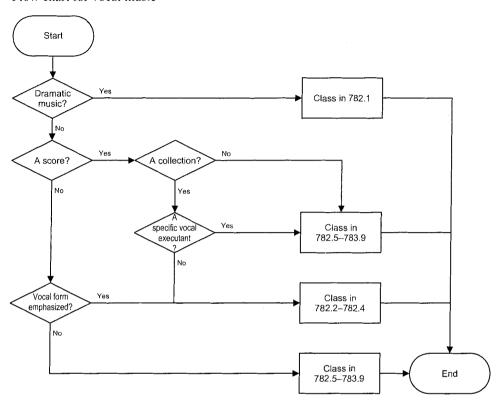

Vocal music

Use 782.1 for dramatic vocal scores, e.g., opera scores 782.1, scores of musical plays 782.14. Use 782.5–.9 and 783 for nondramatic vocal scores. (Use 792.5 for staging dramatic music.)

For nondramatic vocal music (782.2–.9 and 783), classification is determined by whether an item is a treatise or a recording, on the one hand, or a score, on the other. A person interested in reading about or listening to a singer or a piece of music will usually not know the singer's vocal range or the vocal requirements of that piece of music. In contrast, a person interested in scores will know the type of voice or voices involved, e.g., a song cycle sung by a soprano, or a mass sung by a tenor and male chorus. Therefore, use 782.2–.4 for treatises about and recordings of singers and nondramatic vocal forms, but use 782.5–.9 and 783 for scores and texts.

The following flow chart will help users select the correct section of vocal music.

Flow chart for vocal music

Examples (from applying the flow chart):

| Soprano arias from opera [scores] | 782.1 |
|---------------------------------------|--------|
| Soprano airs not from opera [scores] | 783.66 |
| Sacred songs by sopranos [recordings] | 782.25 |
| Women's soprano voice [treatise] | 783.66 |

Vocal scores

With scores, kind of voice and size of vocal ensemble must be considered. The distinction between 782.5–.9 and 783 is based upon the number of voices per part. Use 782.5–.9 for music having several voices per part (what is usually meant by choral music). Use 783 for music having one voice per part (part songs and solos). Observe the following preference order for scores and parts of nondramatic vocal music:

Size of vocal ensemble (including solos)
Type of voice, e.g., male, high, soprano, child's
Vocal forms

Size of vocal ensemble parallels the primary division in the instrument portion of the schedule. Choral music is analogous to orchestral music (more than one voice/instrument per part in some parts); music for single voices in combination is anal-

ogous to chamber music (only one voice/instrument per part); and music for solo voice is analogous to music for solo instrument.

Type of voice also parallels the instrument portion of the schedule, in that specifying the sex and range of the voice is analogous to specifying the kind and type of instrument. Different kinds of voice are distinguished first by sex and age (women, children, men) and second by range.

For example:

| Secular song for male voice choir | 782.842 |
|-----------------------------------|----------------|
| Male voice choir | 782.8 |
| Cooulanaana | 12 (from 792 1 |

Secular song 42 (from 782.42)

Carols for single voices in combination 783.11928
Single voices in combination 783.1
Nondramatic vocal forms 19

Carols 28 (from 782.28)

782.1 vs. 792.5, 792.6

Dramatic vocal forms

Use 782.1 for dramatic vocal forms as a type of vocal music, including such topics as tempos, plots, singers, conducting. Use 792.5 and 792.6 for dramatic vocal forms as a type of stage presentation, including such topics as costumes, sets, direction. For example, use 782.1 for operas as vocal music, 792.5 for staging of operas; use 782.14 for musical plays as vocal music, 792.6 for staging of musical plays. Use 792.509 for an opera house and its productions, e.g., a history of La Scala, Milan 792.5094521. If in doubt, prefer 782.1.

784-788

Instruments and their music

Add table

092

Biography

For persons associated with an instrument and its music <u>and</u> for persons associated with the music for the instrument, add notation 092 from Table 1 directly to the number for the instrument and its music, e.g., Nicolò Paganini (a violinist and composer) <u>and</u> Isaac Stern (a violinist) 787.2092. However, for persons interested only in the instrument, add 19 (the instrument notation derived from 784.19) before adding notation 092 from Table 1, e.g., Antonio Stradivari (a violin maker) 787.219092.

For persons associated with a specific tradition of music other than western art music, add 162–166 or 169 (the traditions-of-music notation derived from 781.62–.66 and 781.69) before adding notation 092 from Table 1, e.g., a country music violinist 787.2<u>1642</u>092. If the person is associated with more than one tradition, do not add to show the tradition.

791.43, 791.45 vs. 777

Motion pictures and television

Use 791.43 and 791.45 for motion pictures and television as art forms and for comprehensive works on producing them. Use 777 for the technical aspects of making motion pictures and videos. For example, use 791.43025 for the use of lighting techniques to enhance the mood of the scene and for a comprehensive work on lighting, but use 777.52 for how to determine what kind of lighting apparatus to use while filming in bright sunlight. If in doubt, prefer 791.43 and 791.45.

791.43 vs. 791.45

Motion pictures vs. Television

Use the Internet Movie Database (http://www.imdb.com/) or a similar online source for help in determining if a production should be treated as a motion picture or a television program. If in doubt, prefer 791.43.

791.437 and 791.447, 791.457, 792.9

Films, radio programs, television programs, stage productions

A production recorded in a different medium than the original production is classed with the recording, not with the production, e.g., a staged opera recorded for television 791.4572 (a television program), not 792.542 (a staged opera).

793.932 vs. 794.822

Computer adventure games vs. Arcade games

Use 793.932 for computer adventure games that present the player with a situation and a goal (or goals). These goals may involve solving a mystery or problems and accumulating points. The player must think as opposed to making reflex actions, and is projected into an interactive story. An example is *Myst*[®].

Use 793.932 also for computer fantasy role-playing games that involve reaching a goal by solving intellectual problems, but require reflex actions because of the fighting or athletic action, and in which outcomes are decided by the computer. Examples are *Final Fantasy*[®] and *SimCity*[®].

Use 794.822 for arcade games that emphasize quick reflexes, as opposed to intellectual decisions. The term refers to a type of game, not just those games played in video arcades, and may include fighting, space flight, shooting, pinball, mazes, space shootouts, and strategy. Examples are *Tekken*® and *PacMan*®.

If in doubt, prefer 793.932.

795.015192 vs. 519.27

Games of chance

Use 795.015192 for the probabilities, or "odds," of winning "games of chance" in the recreational sense, i.e., any games in which chance, not skill, is the most important factor in determining the outcome, e.g., craps, poker, solitaire. Use 519.27 for "games of chance" in the mathematical sense, which are limited to games played by

a single player to determine the optimal policy or strategy of winning the games and are a part of the theory of controlled probabilities. If in doubt, prefer 795.015192.

796.08 vs. 796.04

Groups of people vs. General kinds of sports and games

Use numbers in 796.08 or notation 08 from Table 1 added to numbers for specific sports or games for works on the participation of specific groups of people if the sports or games are not modified to allow their participation. Use either 796.04 or the number for the modified version if the sports or games have been modified to allow participation of specific groups of people. Numbers for the modified versions of a sport are usually given in the "specific types" or "variants" subdivisions of the sport, e.g., baseball 796.357, Little League baseball 796.35762, indoor baseball 796.3578. If these subdivisions are not provided, use the number for the type of sport as a whole. For example, use 796.3520873 for works on how people who have lost a leg can play golf, as they can usually play without a major change to the rules of golf. However, in order to participate in other sports, the person who has lost a leg may require a wheelchair. Use 796.0456 for comprehensive works on wheelchair sports. Class the wheelchair version of a specific sport with variants of the sport, e.g., wheelchair basketball 796.3238. If in doubt, prefer 796.08 or the number for the specific sport or game with use of notation 08 from Table 1.

The name of a variant of the sport may give the impression that it is for only one type of person when any type can play it. For example, women's basketball before 1971 was a variant of basketball in which there were six players per team and the three forwards played in the forecourt. Use 796.3238 (not 796.323082) for this variant because it can be played by either men or women.

Some sports and games have similar sounding names, but the rules are so different as to create separate, though related, sports and games. For example, American football, Canadian football, and Australian-rules football are similar sports, but they each have their own separate rules and are classed in 796.332, 796.335, and 796.336, respectively.

796.092

Sports personnel

Use the general number for the sport for the biography of sports personnel, regardless of position played or type of game, e.g., a quarterback in American professional football 796.332092 (*not* 796.33225092 or 796.33264092).

796.15 vs. 629.0460228

Play with remote-control vehicles; play with kites vs. Models and miniatures of transportation equipment

Use 796.15 for both play with remote-control model vehicles and for comprehensive works on remote-control model vehicles, e.g., flying and building remote-control model airplanes 796.154. Use 629.0460228 and similar numbers in 620 for the design and construction of model vehicles, e.g., building model airplanes 629.133134. If in doubt, prefer 796.15.

Use 790.133 for comprehensive works on play with all types of model railroads and trains, because most play with model railroads and trains does not involve remote-control vehicles.

800

Literature (Belles-lettres)

This entry uses notation from Table 3 to illustrate the application of principles to various literatures, e.g., "T3—1" is used to discuss poetry in specific literatures rather than "811, 821, 831, 841, etc." The notation "T3—1" refers to both T3A—1 from Table 3A (individual authors) and T3B—1 from Table 3B (more than one author). Difficulties arise with the notation for T3—8 Miscellaneous writings because the literary period comes between T3—8 and its various subdivisions. In the entry this form is expressed as T3—8 + the notation for the subdivision, e.g., diaries T3—8 + 03.

Choice between literature and nonliterary subject

The discipline of literature is restricted to: (1) works of the imagination that are written in the various literary forms, e.g., fiction, poetry; (2) literary criticism and description; (3) literary history and biography. Class works of the imagination intended to delight in 800, but class works that are essentially informational with the subject in other disciplines, regardless of their literary form. For example, class Jonathan Swift's *The Drapier's Letters* as a work on monetary policy in 332.49415 (not as a collection of the author's letters).

Essays, speeches, letters, and diaries are commonly used for nonliterary purposes. If in doubt whether to class a work in one of these forms as literature in 800 or with a subject elsewhere in the schedule, prefer the subject.

Class nonfiction novels that use the techniques of fiction writing to tell the story of actual people and actual events as follows. Class an account of a true event or series of events using the names of the people involved, not inventing characters or distorting facts to enhance an intended artistic effect, and not going beyond the information available to the author from investigation and interviews, in the discipline appropriate to the facts described. For example, class Truman Capote's *In Cold Blood*, a true account of a multiple murder, in 364.1523. If, however, the author goes beyond what is learned from investigation and interviews in describing conversations, feelings, thoughts, or states of mind of the people depicted in the book, class the work as fiction, e.g., Norman Mailer's *The Executioner's Song* 813.54. If in doubt, class as fiction.

Other kinds of fiction, and poetry and drama, are sometimes used as vehicles for conveying factual information, e.g., biographies written in verse, fiction employed to teach the fundamentals of mathematics. Use 800 for poetry, drama, and fiction unless the form is incidental to the explanation of a specific subject, e.g., Harvey's *Circulation of the Blood* (written in Latin verse) 612.13 (not 871.04). Make an exception for certain ancient works that have long been classed as literature regardless of their content, e.g., Hesiod's *Works and Days* 881.01 (not 630), even though it deals with practical agriculture.

Class a collection of literary texts or excerpts from literary texts that is meant to serve as a model for studying another discipline with the discipline illustrated. For example, use 307 for a collection meant to explain what a community is.

Class a literary study of nonliterary works in 809.935, e.g., the Bible as literature 809.93522.

Language

Class literary works by language, not by country of origin. However, class works in English originating in North America, South America, Hawaii, and geographically associated islands in 810 (not 820). Class works in English from Europe, Africa, Asia, Australia, and New Zealand, and comprehensive works on English literature in 820. In certain cases, use Table 3C to indicate country of origin. (See also discussion at T3C—93–99.)

Class literary works in the language in which they were originally written, e.g., an English translation of a work originally written in Spanish 860 (*not* 820).

Literature of two or more languages

Works treating literature of two or more languages are usually collections or works of criticism. If two languages are involved, use the number coming first in 820–890, except where there are different instructions. For example, use 820 (not 860) for English and Spanish, but use 880 (not 870) for Greek and Latin. If more than two languages are involved, but the languages all belong to a particular language family, use the most specific number that will contain all the languages. For example, use 830 for a work covering English, German, and Dutch, since they are all Germanic languages. Do not use 820–890 for broad groupings such as Indo-European literature. For example, use 808 for collections covering English, French, and Russian (all Indo-European languages), 809 for criticism, 800 for a combination of collections and criticism. Similarly, use 800, 808, or 809 for a work about literature in more than two languages when the languages are unrelated except that they belong to a broad grouping such as nonwestern or Asian languages. For example, use 808 (not 890) for a collection of Arabic, Persian, and Turkish literary texts. If any one language is predominant, class with that language.

Literary form

In literature there are two basic modes of expression: poetry and prose. Class drama, whether in poetry or prose, with drama in T3—2. Class epigrams with miscellaneous writings in T3—8 + 02, regardless of mode. Class works in other forms with poetry in T3—1 if written in verse. Class prose works in T3—3 Fiction, T3—4 Essays, T3—5 Speeches, T3—6 Letters, and T3—8 Miscellaneous writings. Use the subdivision for prose literature, T3—8 + 08, only for prose works in more than one literary form. Class prose works in a specific form with the form.

Use notation 7 Humor and satire only for collections in, or works of criticism about, two or more forms including both verse and prose, because humor and satire are categories of writing rather than a form or mode. Class literary works exhibiting humor and satire in a particular form (T3—1–6 and T3—8) with the form. Table 3A for individual authors has no notation parallel to T3B—7; class a collection of

works by an individual author in more than one form exhibiting humor and satire in T3A—8 + 09.

Literary period

Use the period tables supplied under various languages for the literature of that language from throughout the world and for the literatures of individual countries. For example, use 843.912 for French-language fiction of the early 20th century from throughout the world and for French-language fiction of the early 20th century from France. Use the same periods for affiliated literatures (literatures in the same language, but from countries other than the traditional homeland), e.g., use 843.912 for Belgian, Swiss, Canadian, and Senegalese French-language fiction of the early 20th century. (Optional periods are sometimes provided for use with a country other than the traditional homeland of the literature if some special device is used to set such literature apart from the literature in general. The options are described at 810–890 in the schedule.) In certain cases, use Table 3C to indicate country of origin of affiliated literatures. (See also discussion at T3C—93–99.)

In literary period tables, the name for a particular century is given if the span of years in the heading is less than 75 years, e.g., the 19th century in English literature is given in a class-here note under notation 8 Victorian period, 1837–1899, in the period table for English literature at 821–828. The name for the century is usually not given if the span of years in the heading is 75 or more years, e.g., the 20th century in English literature is not given under notation 91, which covers the span 1900–1999, in the period table for English literature.

Other elements

If appropriate, add notation 08 from Table 3B (or notation 08 or 008 from T3B—1008, notation 08 from table under T3B—102-107) for collections of works by or about more than one author, and notation 09 from Table 3B (or notation 09 or 009 from T3B—1009, notation 09 from table under T3B—102-107) for history, description, and critical appraisal of works of more than one author. Use this notation both on its own and also in order to add notation from Table 3C, to express features such as literary themes or subjects, literary elements (e.g., dialogue), literary qualities (e.g., romanticism), and specific kinds of persons for whom or by whom the literature is written.

Literary criticism

Class criticism with the literature being criticized. Class criticism of a specific work in the same number as the work itself, e.g., a critical analysis of Hemingway's *For Whom the Bell Tolls* 813.52. Class general criticism of the work of an author in the comprehensive number for the author, e.g., criticism of Hemingway 813.52.

Use 809 and notation 09 from Table 3B (or notation 09 or 009 from T3B—1009, notation 09 from table under T3B—102–107) for criticism of all kinds of literature except the works of individual authors. Use 809 for criticism of several literatures as a whole, 809.3 for criticism of fiction from several literatures. Use 810.9 for criticism of the English-language literature of the United States in general, 813.009 for criticism of English-language fiction of the United States in general, 813.5209 for criticism of early 20th-century American fiction in English.

Use 809.1—7 for criticism of literature in a specific form from more than two literatures. Use 808.1—7 for critical works in which the emphasis is on the various forms of literature as such, not on the various authors and literatures that may be used as examples. If in doubt between 808.1—7 and 809.1—7, prefer 809.1—7.

Use 801.95 for the theory and technique of literary criticism. Use 808.1–.7 for the theory and technique of criticism of specific literary forms. If in doubt between 801.95 and 808.1–.7, prefer 801.95.

Class appreciation of literature in the same manner as other criticism.

Class textual criticism of literature in the same manner as other criticism. However, use 801.959 (*not* 808.1–.7) for the theory and technique of textual criticism of specific literary forms.

Class criticism of criticism with the criticism being criticized and hence with the original subject of criticism, e.g., criticism of Hemingway and a criticism of that criticism by a third person, both 813.52.

Class works about critics in the same manner as works about other authors, i.e., class critics with the kind of literature that they chiefly criticize, e.g., a man who devoted the major part of his life to criticizing the works of Hemingway 813.52; a critic of Spanish literature 860.9.

Class criticism and critics with the language of the literature they are criticizing, not with the language in which the criticism is written, e.g., a French critic writing in French but criticizing American literature 810.9.

Adaptations

An adaptation may alter the form of a work or modify the content to such an extent in language, scope, or level of presentation that it can no longer be considered a version of the original. Class an adaptation in the number appropriate to the adaptation, e.g., Lamb's *Tales from Shakespeare* 823.7.

However, class a prose translation of poetry (which is merely a change in mode) in the number for the original work, e.g., Dante's *Divine Comedy* translated into German prose 851.1.

Excerpts

Class a collection of excerpts from different literary works as a collection.

800, T3C—362 vs. 398.245, 590, 636

Literature (Belles-lettres) and pets as specific subjects in literature vs. Folk literature of animals vs. Animals vs. Animal husbandry

Class literary accounts of animals, whether fictional or true, with the appropriate form in literature, e.g., poetry. Use subdivisions of T3—8 Miscellaneous writings for literary accounts of actual animals in the form of anecdotes or personal reminiscences, T3—8 + 02 for anecdotes, T3—8 + 03 for reminiscences, diaries, journals; or T3—8 + 07 for works without identifiable literary form.

Use T3C—362 for collections of literary works that treat pets as a specific subject or theme, e.g., a collection of English fiction about cats 823.00803629752.

Class works about animals intended to contribute to some discipline other than literature in the relevant discipline. Use 398.245 for folk literature of animals. Use 590 for animal stories in which the author's emphasis is on the habits and behavior of the animal. Use 636 where the emphasis is on the care and training of the animal.

If in doubt, prefer 800.

800 vs. 398.2

Literature (Belles-lettres) vs. Folk literature

Folk literature is anonymous, having been handed down by word of mouth from one generation to the next. In other words, folk literature is anonymous because it comes from an oral tradition. Folk literature can be collected and retold, e.g., folk tales collected and retold by Jacob and Wilhelm Grimm; but those who collect and retell are not the authors of the literature. Use 398.2 for folk literature.

Works whose authors are unknown only because the authors chose to publish under a pseudonym are not considered to be folk literature. Use 800 for literary works by pseudonymous authors.

Anonymous classics are not considered to be folk literature. Although their authorship is unknown and many of them came from an oral tradition, such works have a recognized literary merit and form part of the literary canon. Use 800 for them, e.g., Njáls Saga 839.63, Mort le Roi Artu (Mort Artu) 843.1, Mabinogion 891.6631. An aid in identifying anonymous classics in European literatures is Anonymous Classics: A List of Uniform Headings for European Literatures, 2nd ed. revised by the IFLA Working Group on Anonymous Classics (http://bibpurl.oclc.org/web/9557). Not all of these anonymous classics are literary; some need to be classed with the subject, especially in religion.

Works by known authors, even if in a genre that is traditional for folk literature or about typical folk literary topics, are not considered to be folk literature. Use 800 for them, e.g., fairy tales by Hans Christian Andersen 839.8136; *Inner City Nursery Rhymes* by Barbara Sillars Harvey 811.54, novels by Keri Arthur about werewolves and vampires 823.92.

Some legendary or historical events or themes form the basis for original works in many literatures, periods, and forms, e.g., the search for the Holy Grail or the battle of Roland with the Saracens. Medieval works involving them are often anonymous. Class each retelling of the event or theme with the literature, form, and period in which it was written, e.g., Mary Stewart's Merlin trilogy 823.914. Use 809.933 for works about a specific theme treated in several literatures.

If in doubt, prefer 800.

8.808

Collections of literary texts from more than two literatures

Here are examples illustrating the preference order for collections of texts in more than one form from more than two literatures. The preference order is the same for criticism (809).

- 1. Specific themes and subjects, e.g., 808.80382 (religion)
- 2. Specific elements, e.g., 808.8024 (plot)
- 3. Specific qualities, e.g., 808.8013 (idealism)
- 4. For and by specific kinds of persons, e.g., 808.899282 (children)
- 5. Period, e.g., 808.80033 (18th century)

See also discussion at Table 3B: Preference order.

808.81-.88 and 809.1-.7

Specific kinds of poetry, drama, fiction, speeches

The add instructions at 808.812–.818 Specific kinds of poetry, which allow the addition of the numbers following —10 in notation 102–107 from Table 3B, also permit further addition at that point, since numbers in the range T3B—102–107 have a footnote that leads to an add table under a centered entry: "Add as instructed under T3B—102–107."

Do not add notation 08 Collections of literary texts from the add table under T3B—102–107 by itself, since it would be redundant because 808.8 already means collections of literary texts, e.g., collections of narrative poetry 808.813 (*not* 808.81308). However, add notation 08 if it serves as a link for adding further notation from Table 3C, e.g., collections of narrative poetry about political themes 808.813083581.

Apply the same policy for collections of specific kinds of drama, fiction, and speeches, e.g., a collection of short stories 808.831 (*not* 808.83108), but a collection of short stories about political themes 808.831083581.

Apply a similar policy for history and criticism of specific kinds of poetry, drama, fiction, speeches. Do not add notation 09 History, description, critical appraisal by itself to numbers in 809 History, description, critical appraisal of more than two literatures, e.g., history and criticism of narrative poetry 809.13 (*not* 809.1309). However, add notation 09 if it serves as a link for adding further notation from Table 3C, e.g., history and criticism of narrative poetry about political themes 809.13093581.

808.82 vs. 791.437, 791.447, 791.457, 792.9

Texts of plays vs. Production scripts

Use 808.82 and similar numbers built with T3A—2 or T3B—2 for texts of plays. Use 791.437, 791.447, 791.457, and 792.9 for production scripts. A production script contains a variety of directions, e.g., where the furniture is to be placed, where the actors are to stand. For example, use 812.52 for the text of Thornton Wilder's

Our Town, but use 792.92 for the production script for a staged production of *Our Town*. If in doubt, prefer 808.82 and similar numbers.

900

History

Use 900 for the story of events that have transpired, or an account of the conditions that have prevailed, in a particular place or region. Use 001–899 for the history of a specific subject, e.g., a history of political developments (such as internal developments in government) without respect to their effect upon the larger society and place where they occur 320.9, history of economic events in France 330.944, history of warfare 355.0209, history of clocks 681.11309.

The general arrangement of Table 2, which determines the number assigned to the history of a particular place, is geographic rather than by political units, because although political affiliation may change, position on the earth's surface does not, e.g., history of Hawaii 996.9 under Oceania (*not* under United States history).

History includes the present (situation and conditions), but not the future (projected events). Use 303.49 for projected events.

Historic events vs. nonhistoric events

Depending upon their impact, class specific events either in 900 or in specific disciplines in 001–899. Use 930–990 for events that are important enough to affect the general social life and history of the place, regardless of any discipline involved, e.g., the sinking of the Lusitania 940.4514; the assassination of Abraham Lincoln 973.7092; the 1906 San Francisco earthquake 979.461051.

Use 001–899 for the history of the discipline for other specific events. For example, use 364 for the history of a crime, e.g., the Whitechapel murders committed by Jack the Ripper 364.1523. Use 796–799 for a sporting accident, e.g., a fatal accident during an automobile race 796.72.

If in doubt about the impact of the event, prefer 900.

However, take into account the author's purpose or point of view. For example, use 364.1524092 (*not* 973.922092) for a work about the assassination of John F. Kennedy that focuses on the modus operandi of the crime, the detective work involved in solving it, or both.

Use 300 for events that emphasize social aspects. Use 363 (*not* any other discipline involved) if safety factors are stressed, e.g., use 363.12365 for a study of the wreck of the Andrea Doria to determine what the causes of the accident were or what preventive measures might be mandated as a result of the incident.

Use 001–899 for collected accounts of events pertaining to one discipline, e.g., scientific travel 508. Use 904 for collected events without such focus.

909, 930-990 vs. 320

History and politics

Political history

Use 909 and 930–990 for political history that emphasizes major political events typified by the "battles, kings, and dates" school of history. Use 320.9 for political history that emphasizes the mechanics of give and take of political forces and movements and their internal development. Use 909 and 930–990 if the forces and movements come to power or bring about major changes in society. If in doubt, prefer 909 and 930–990.

See also discussion at 909, 930-990 vs. 320.4, 321, 321.09.

Political activities

Use 909 and 930–990 for the sum total of political activity of a specific period or place. Use 320 for specific important political activities presented in terms of the discipline political science, but consider 909 and 930–990 whenever an activity is discussed in a manner that highlights its influence on general events. Use 909 and 930–990 for important events and leaders with wide-ranging responsibilities, unless considered primarily in the context of a specific subject. If in doubt, prefer 909 and 930–990.

Special consideration of 320.9, 324, and 328 follows:

320.9: Use 320.9 for habitual activities and styles of leading political figures as a group, and activities reflecting the adjustment of political forces or the status of political parties and movements. Use 909 and 930–990 for the activities analyzed in terms of their effect on general events.

324: Use 324.2 for party histories; use 324.5 and 324.24—29, plus notation 015, for histories of nomination campaigns; and use 324.9 for histories of election campaigns, but only when they treat largely internal events of the parties and campaigns, or report winners, losers, and votes. Use 930–990 for the history of how a party or candidate came to power (or almost did), or how party and campaign events move nations (or other areas) in certain directions.

328: Use 328.4–.9 for histories of specific legislative bodies, but only when they are largely limited to what happened within or to the bodies, without significant consideration of what the legislative body did for the political unit it served. Use 328 for reports of proceedings of a legislature (i.e., its motions, debates, actions). Use 930–990 for the accomplishments of a given legislative session, but use 328 if the work concentrates on the body's internal history.

909, 930-990 vs. 320.4, 321, 321.09

Change of government

Use 909 and 930–990 for the history of changes in government or for particular coups and revolutions in specific areas, e.g., revolutions in the 20th century 909.82, the Russian Revolution 947.0841. Use 320.4 for political treatment of systems of government that precede or follow changes in a specific country, e.g., the government of the Soviet Union after the 1917 revolution 320.4470904. Use 321 numbers other than 321.09 for works on particular systems or kinds of systems and gener-

al political treatment of a specific system of government preceding or following changes, e.g., new republics 321.86. Use 321.09 primarily for studies of *the process* of change, rather than for works on particular changes. If in doubt, prefer in the following order: 909 or 930–990; 320.4; all subdivisions of 321 except 321.09; 321.09.

909, 930-990 vs. 910

History vs. Geography and travel

Use 909 or 930–990 if a work deals with both geography and civilization or with both travel and civilization. However, use 910 if the treatment of geography or travel is predominant. If in doubt, prefer 909 or 930–990

Use 910.02 or 913–919, plus notation 02 from table under 913–919, if the work deals only with the description of the physical earth.

913-919

Geography of and travel in ancient world and specific continents, countries, localities in modern world; extraterrestrial worlds

Historic sites and buildings

Works describing historic sites and buildings should be classed with the discipline that is emphasized.

Class a work about a building or historic site that has or had a specific purpose with the purpose of the building or site unless some other discipline is emphasized, e.g., a work about a Benedictine monastery in Lower Austria that emphasizes the history of the religious order in that place 271.1043612, a guide to the New York Stock Exchange building 332.64273. Class works about buildings that are associated with the life of an individual with the biography number for that person, e.g., the home of Thomas Wolfe in Asheville, North Carolina 813.52. Class works about a site that is famous for a historic event with the history of the event, e.g., Gettysburg National Military Park 973.7349.

Use 720.9 or 725–728 for works on a building or buildings in an area that emphasize the architecture of the building or buildings, e.g., a work on a church in Paris that emphasizes architectural history 726.50944361. Also use 725–728 for comprehensive works on the art history of a building and its contents, including the architecture of the building and the art works it contains.

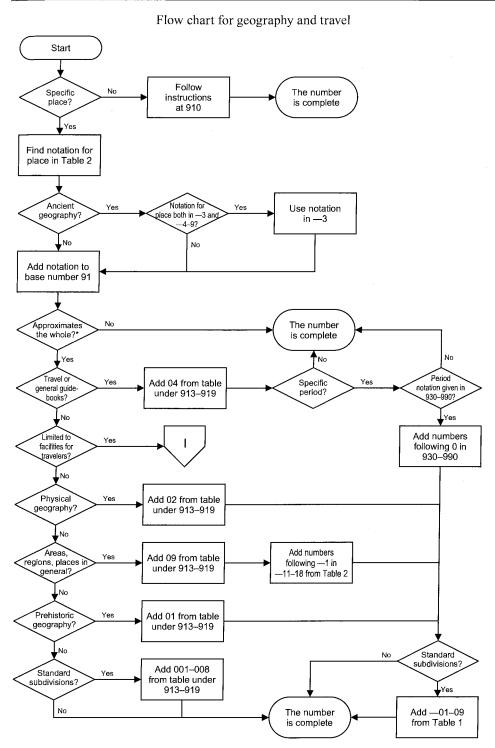

Use 930–990 for a work that describes the buildings in an area for the purpose of illustrating the history of the area. (See the discussion at 930–990: Historic preservation.)

Use 913–919 for works when no specific purpose or discipline is evident. (See the discussion below under 04 Travel on Guidebooks.)

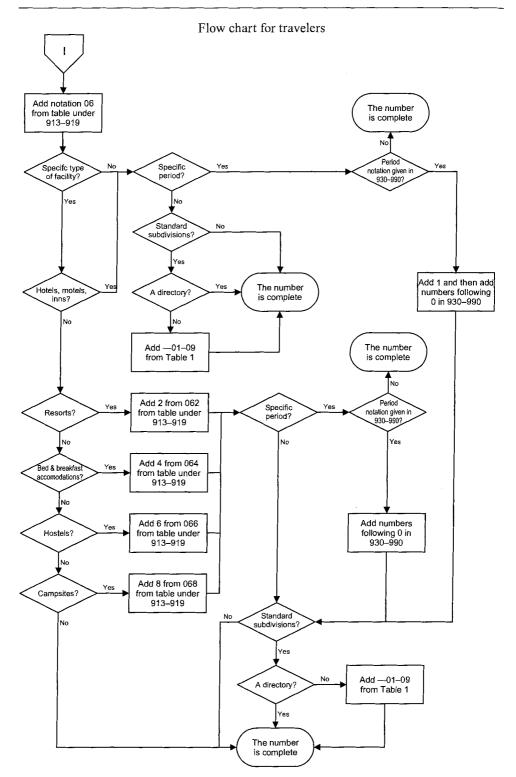

See also discussion at 333.7-.9 vs. 508, 913-919, 930-990.

Add table

The following flow chart is offered as an aid to building numbers and as a supplement to the detailed directions at 913–919.

^{*}See also Introduction and Glossary for information about "Approximates the whole"

04

Travel.

Use 04 for accounts of travel that emphasize events of the trip, places stopped at, accommodations, modes of transportation. If the work is purely a description of the area visited, with none, or very few, of these accompaniments, use subdivision 02 for physical geography. Use 930–990 for civilization and social conditions of the place visited and for works by a person who has lived in the area for several years.

Works on travel normally do not cover the whole of any given area. Class accounts according to the widest span covered, e.g., travel from Marseilles to Paris 914.404, travel from New York to San Francisco 917.304, travel in 1981 from New York City to Buffalo, New York 917.470443. Standard subdivisions may be added.

Discovery and exploration

Use 04 for works describing excursions into previously unknown or little known areas, e.g., the Lewis and Clark expedition 917.8042, Byrd's expedition to the South Pole 919.8904. However, use 930–990 if the initial exploration of a place forms an important part of its early history, e.g., early exploration of North America 970.01.

Use 930.1 for accounts of archaeological expeditions.

Guidebooks

A guidebook can be either a residential guidebook (i.e., a guide for the permanent resident or long-term visitor) or a tourist guidebook (i.e., a guide for the short-term visitor). Residential guidebooks cover not only the tourist attractions but also the other parts of the area, such as banks, churches, grocery stores, real estate agencies, and residential neighborhoods, and normally give a snapshot view of the history of the area. Use 940–990, plus the notation for the period during which it was written, for a residential guidebook, e.g., use 975.3042 for a residential guidebook to Washington, D.C., written in 2003. Tourist guidebooks provide detailed information about the area through which tourists travel, telling them what to see, where to stay, and where to eat. If in doubt whether the book is a residential or a tourist guidebook, class it as a tourist guidebook.

Use 913–919, plus notation 04 from the table at 913–919, for tourist guidebooks, e.g., guidebooks to the United States 917.304. For individual guidebooks, add the notation for the historical period during which it was written, e.g., use 917.530442 for a tourist guidebook to Washington, D.C., written in 2003. Use 913 for guidebooks written before ca. 499, e.g., use 913.85049 for Pausanias' guide to Attica written ca. 130. Use the corresponding number in 914–919 for modern guidebooks to ancient areas, e.g., a 2003 guide to the ruins of Rome 914.56320493.

A guidebook that is limited to an aspect of the trip is classed with that aspect, e.g., a guide to London's underground rail system 388.4209421, restaurants of Hawaii 647.95969, lodgings for tourists in London 914.2106, bed and breakfast establishments of London 914.21064. In addition, guidebooks emphasizing a specific subject are classed with the subject, e.g., a guidebook to holy places in Spain

263.04246, a skiing guide to Aspen, Colorado 796.930978843. (For guidebooks to historic sites and buildings, see the discussion in the section above, Historic sites and buildings.)

Use the number for the attraction in 001–999 for a guidebook to a locality that is usually visited for only one type of attraction. For example, most people go to Orlando, Florida, in order to visit its theme parks: Walt Disney World, Sea World of Florida, and Universal Studios Florida. Therefore, use 791.06875924 for both guidebooks to the theme parks and to Orlando in general. However, use 913–919, plus notation 04 from the table at 913–919, for a guidebook that covers more than one locality, e.g., a guide to central Florida that covers not only Orlando but also Cape Canaveral, Daytona Beach, and Tampa 917.59204.

See also discussion at 333.7–.9 vs. 508, 913–919, 930–990; also at 913–919 vs. 796.51.

Biography

Add notation 092 from Table 1 to subdivisions 041–049 for biographies of discoverers, explorers, and travelers, but not for general geographers nor for first-person accounts of travel. Use the area without further subdivision for biographies of general geographers. Use subdivisions 041–049 for first-person accounts of travel, but do not add notation 092.

913-919 vs. 796.51

Walkers' guides

Walkers' guides can be written for either the hiker or the tourist. Both types of guides give detailed instructions on how to get from point A to point B, e.g., at the fork turn left, and a general description of the route to help the walker to choose one route over another, such as distance, what can be seen. Guides for the tourist also give detailed description of things en route, e.g., the type of vegetation, the history of the wayside shrine. Use 913–919, plus notation 04 from the table at 913–919, for guides for the tourist and for walking guides to an urban area, e.g., walking guides to San Francisco 917.946104. Use 796.51 for guides for the hiker in non-urban areas. If in doubt, prefer 913–919.

Use 001–999 for a guide limited to one topic, e.g., a walker's guide to the geology of Yosemite National Park 557.9447, a walking tour of the skyscrapers of San Francisco 720.4830979461.

920.008 vs. 305-306, 362

History and description of biography as a discipline with respect to kinds of persons; general collections of biography by kind of person vs. Social groups and social welfare problems and services

Use 920.008 for collected biographies of a social group. However, use 305 or 306, plus notation 0922 from Table 1, for biographies that focus on the sociological aspects of the group. Use 362, plus notation 0922 from Table 1, for biographies that focus on the social problems of a group and their solutions. If in doubt, prefer 920.008.

For example, use 920.0086642 for a collection of biographies of gay men. However, use 306.76620922 if the biographies focus on these men as leaders in the gayrights movements and or on other sociological aspects. Use 920.00871 for a collection of biographies of famous persons who are blind. However, use 362.410922 if the biographies focus on the problems of being blind and social services provided.

Apply the same policy for collected biographies of members of a specific ethnic or national group; however, use 920.0092 (*not* 920.0089). Apply the same policy also for collected biographies of men and of women; however, use 920.71 and 920.72, respectively (*not* 920.00811 or 920.0082).

920.009, 920.03-.09 vs. 909.09, 909.1-.8, 930-990

Biography vs. History

Use 920.009 and 920.03—.09 for collected biographies that contain both (a) biographies of historians and public figures who had a significant impact upon the general history of the place or time and (b) biographies of other public figures and/or biographies of persons of various occupations. Use 909.09, 909.1—.8, and 930—990 for collected biographies limited to biographies of historians and public figures who had a significant impact upon the general history of the place or time. For example, use 920.009033 for a collected biography of the famous persons of the 18th century that includes not only biographies of the kings and queens but also biographies of the bishops, scientists, artists, and athletes; 920.04 for a similar biography limited to Europe; and 920.044 for one limited to France. However, use 909.70922 for a collected biography of the heads of state of the 18th century; 940.099 for a collected biography of the kings and queens of Europe; and 944.0099 for a collected biography of the kings and queens of France. If in doubt, prefer 920.009 and 920.03—.09.

929.2

Family histories

Do not use numbers that are too specific for family histories, since families disperse from their place of origin. Use the area number for the country in which the family lives, not for the state, province, or smaller area, e.g., the history of a Florida family 929.20973 (*not* 929.209759). Treat England, Scotland, Wales, and Northern Ireland as separate countries.

Class a family history with the country in which the family presently lives, not with the country from which the family's ancestors came, e.g., the Duponts, a United States family of French origin, 929.20973 (not 929.20944).

Class family histories that give historical information about the area in which the family is located with the history of the area, e.g., prominent families in New York City 974.71.

930-990

History of ancient world; of specific continents, countries, localities; of extraterrestrial worlds

Wars

If most of a war's fighting took place in one region or country, use the number for the history of the region or country. For example, class the War of the Austrian Succession with the history of Europe in 940.2526; class the Vietnam War with the history of Vietnam in 959.7043. Use the number for the history of the country as a whole, even when the war was fought within a limited portion of a country. For example, class the Second Seminole War, which was fought against the Seminole Indians in Florida, with the history of the United States in 973.57 (*not* with the history of Florida in 975.904).

If most of the fighting took place on the high seas, use the number for the history of the participant in whose territorial waters the majority of the battles took place (not with the body of water in 909.096). If the majority of the battles took place on the high seas or in territorial waters of a non-participating country or if in doubt as to where the majority took place, use the number for the history of the participant whose number comes later in 930–990. For example, class the Anglo-Dutch Wars, which consisted of naval battles in the North Sea and English Channel between England and the Netherlands, with the history of the Netherlands in 949.204 (not with the history of the North Sea and English Channel in 909.096336 or the history of England in 941.06).

If there was no one place where the majority of the fighting occurred, but the war was fought in the colonies of one or more of the principal participants, use the number for the history of the participant that owned or controlled all or most of the colonies at the end of the war, either the "mother" country of the colonies or the victor of the war. For example, class the Anglo-Spanish War (War of Jenkins' Ear), which was fought in the Spanish colonies of Panama, Colombia, Cuba, and Florida and in the English colony of Georgia, with the history of Spain in 946.055. Class the Spanish-American War, which was fought in the Spanish colonies of the Philippines, Cuba, and Puerto Rico, which were all owned or controlled by the United States at the end of the war, with the history of the United States in 973.89 (not with the history of Spain in 946.074).

If none of the previous rules apply, use the number for the history of the region or country where the war began.

The following wars are exceptions to the above rules:

Franco-German War, 1870–1871, is classed with the history of Germany in 943.082 (*not* with the history of France in 944.07). The war was fought in France between France and Prussia. The political results of the war were the creation of the Third Republic of France (during the war) and the German Empire (at end of the war).

Livonian War, 1557–1582, is classed with the history of Russia in 947.043 (*not* with the history of the Baltic States in 947.9). The war was fought between Russia and the coalition of Denmark, Grand Duchy of Lithuania, Kingdom of Poland (later the Polish-Lithuanian Commonwealth), and Sweden for control of Greater Livonia (the territory of the present-day Estonia and Latvia), where the fighting took place.

Russo-Japanese War, 1904–1905, is classed with the history of Japan in 952.031 (*not* with the history of Russia in 947.083). The war was fought in Manchuria, China, over Russia's influence in Korea.

See also discussion at 333.7–.9 vs. 508, 913–919, 930–990; also at 930–990 vs. 355.009, 355–359.

Wars: Ongoing wars

For an ongoing war, use the number for the history of the region or country in which most of the fighting has occurred. For example, when World War II was introduced in Edition 14, most of the fighting had been in Europe; thus, World War II was classed with the history of Europe in 940.53 (not with world history in 909.824). If there is no one region or country in which most of the fighting has occurred, use the number for the history of the region or country where the war began.

Wars: Collections of wars

Use the number for the history of the region or the number for the general world history time period for a group of wars discussed together. For example, class comprehensive works on the Crusades with the general historical period of ca. 500–1450/1500 in 909.07. However, class an individual crusade with the history of the region or country where most of the fighting took place. For example, class the First Crusade with the history of the Middle East in 956.014.

Wars: Battles and other military actions

For specific battles or military actions of a war, use the number for the war, not the number for the place where the action occurred, e.g., class a battle occurring in the Philippines during the Spanish-American War in 973.8937 (*not* with the history of the Philippines in 959.9031), air raids on Tokyo in World War II 940.54252135 (*not* with the history of Tokyo in 952.135033).

Use the number for the overall war even when a series of battles or other military actions of that war can be considered as a war unto themselves, e.g., class the war in Spain (Peninsular War), which is one of the Napoleonic Wars, with the Napoleonic Wars in 940.27 (*not* with the history of Spain in 946.06).

However, use the numbers in the history of the United States, not the numbers in the history of Europe, for the various battles and other military actions in the North American colonies of England and France that are called wars but are aspects of European wars, e.g., class King William's War (North American aspect of the War of the League of Augsburg) with the history of the United States in 973.25 (*not* with the War of the League of Augsburg in 940.2525 or the history of England in 941.068).

When a battle or other military action occurs during the same time period and region of a major war but is not part of that war, use the number for the history of the country in which the fighting took place. For example, class the attempted French invasion of Sardinia in 1793, which took place during the time of the Napoleonic Wars but is not considered part of those wars, with the history of Sardinia in 945.9082 (*not* with the period of the Napoleonic Wars in 940.27). (Note: In 1793, Italy was not a unified country; thus, class this action in the history of Sardinia, not in the history of Italy.)

Wars: Military units

Use the numbers for military units under history of the particular war for the history of specific military units in that war, e.g., military units in World War I

940.412—.413. Use the number for military operations if there is no specific number for military units, e.g., military units in the Vietnam War 959.70434.

Use 355.3 (or similar numbers in 355–359, e.g., 358.4131, 359.31, 359.933) for comprehensive works on specific military units and for military units in peacetime.

Wars: Personal narratives

Class personal narratives of participants in a war in the appropriate subdivision of the history numbers for the specific war, e.g., personal narratives of American soldiers in World War II 940.548173. Class narratives that focus on a specific campaign, battle, or other subject with the subject, e.g., a personal account of the Battle of Berlin 940.54213155092, of Axis intelligence operations in World War II 940.5487092.

Class the narrative of a person's experiences during time of war, if it does not focus on the war as such, as biography and not in the number for the war, e.g., an actor's personal experiences of performing during 1940–1942 in Scotland 792.092 (*not* 940.53088792092).

See also discussion at 930–990: Biography; also at 930–990 vs. 355.009, 355–359.

Wars: Occupied countries

Use the war number for the history of the occupation of a country during the time of the war, e.g., occupation of countries in World War II 940.5336. Use 355.49 for military administration of the government of an occupied country during or following the war. Use 341.66 for international law concerning occupation.

Wars: History of an area not with the history of the war

Three kinds of wartime history are not classed with the history of the war (unless the number for the area covered coincides with the number for the war).

- 1. Use the number for the area for routine history of the everyday events of an area, even if during wartime, e.g., the history of Maryland during the Civil War 975.203 (*not* 973.709752).
- 2. Use the number for the history of a place for the effect of military action on the everyday life and civilization of the place, e.g., the effect of Civil War military actions on Maryland 975.203 (*not* 973.709752). However, use the war number for the participation of an area in that war, e.g., Maryland's participation in the Civil War 973.709752 (*not* 975.203).
- 3. Use the country's history number if there is no emphasis on the country's participation in the war, e.g., a history of Britain during George VI's reign 941.084. However, use the war number if the country's participation is emphasized, e.g., British participation in World War II 940.5341.

Other subjects called "wars"

The term "war" is sometimes applied to a sustained campaign against a problem, or to a period of conflict, tension, and competition between regions or countries. Use the following to class interdisciplinary works on these subjects:

- 1. A sustained campaign against a problem: Use the number for the problem, e.g., class the War on Crime with crime prevention in 364.4.
- 2. A period of conflict, tension, and competition between regions or countries: If there are only two countries involved and the countries are within the same region, use the number of the country coming last. If there are more than two countries but all are in the same region, use the number for the region. Otherwise, use the general world history number for the time of the hostility. For example, class the Cold War period of 1947–1991 (the period of conflict, tension, and competition between the United States and the Soviet Union and their allies) with the post World War II period in 909.825.

Also use this instruction to class interdisciplinary works on a war that is both a sustained campaign and a period. For example, class the War on Terrorism (the various military, political, and legal actions taken by the United States and its allies to end international terrorism) with the 2000–2019 period in 909.831.

Unlike military wars, class a specific aspect of this kind of war with the aspect, not with the comprehensive number for the war. For example, class foreign relations between the Soviet Union and the United States during the Cold War with foreign relations in 327.4707309045; class the Korean War with the history of Korea in 951.9042. Class terrorism as a type of social conflict with terrorism as a social problem in 363.325; class the Iraq War, 2003—, with the history of Iraq in 956.70443.

Historic preservation

Use 363.69 for comprehensive works on historic preservation and lists of preservation projects to be undertaken. However, use 930–990 if the list is primarily devoted to inventorying or describing the sites; use 720 if the list is primarily a description of buildings at the site.

Use 353.77 for administrative annual reports of agencies promoting the preservation of historical sites.

Use 720.288 (or numbers in 721–729, plus notation 0288 from Table 1) for works on historic preservation in an architectural context.

See also discussion at 333.7-.9 vs. 508, 913-919, 930-990.

Biography

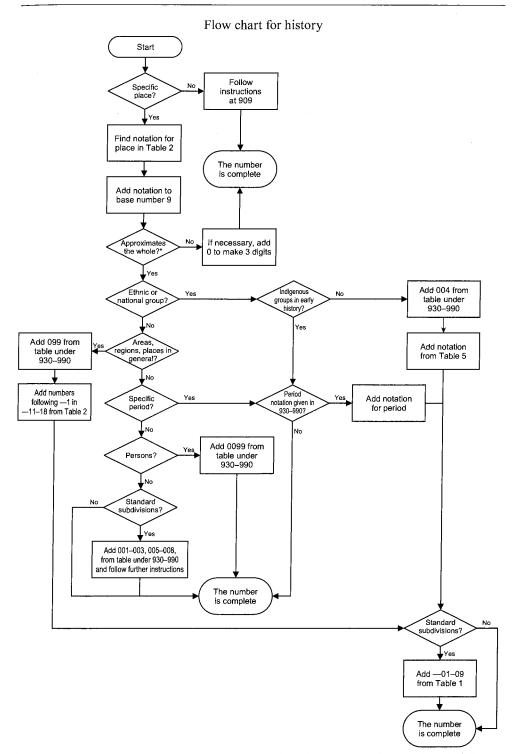

Add notation 092 from Table 1 to subdivisions 01–09 for biographies of persons who lived during the historical period and also for biographies of historians and historiographers of that period, e.g., biographies of Abraham Lincoln and of Bruce Catton, Civil War historian, 973.7092. Add notation 092 even if the life span of the person or the time during which the person impacted upon the history of the country or locality does not approximate the whole of the period, e.g., biography of Rajiv Gandhi 954.052092. Use subdivision 0099 (which is limited to collected treatment) *only* for works not limited to a specific period, e.g., biographies of the

kings and queens of Great Britain 941.0099. If subdivisions 01–09 for historical periods are not given in the schedule, do not add subdivision 0099 either for collected biographies limited to a specific period or for individual biographies, e.g., biographies of the 20th-century princes and princesses of Monaco and a biography of Grace, Princess of Monaco 944.949 (*not* 944.9490099). However, add subdivision 0099 for collected biographies not limited to a specific period, e.g., biographies of the princes and princesses of Monaco 944.9490099. Use subdivision 007202 for biographies of historians and historiographers whose works are not limited to a specific period, e.g., biographies of historians of British history 941.007202.

See also discussion at T1—092: Comprehensive biography: Public figures; also at 920.009, 920.03–.09 vs. 909.09, 909.1–.8, 930–990.

Add table

The following flow chart is offered as an aid to building numbers and as a supplement to the detailed instructions at 930–990.

^{*}See also Introduction and Glossary for information about "Approximates the whole"

01 - 09

Historical periods

The starting and finishing dates of historical period subdivisions usually mark significant events, which rarely occurred on either January 1 or December 31. The year during which the event occurred will therefore normally be given as both the finishing date of one period and the starting date of the next period. For example, 1861, the year when Kansas became a state, appears at both 978.102 Territorial period, 1803–1861 and 978.103 Statehood period, 1861–. Similarly, 1945, the year when World War II ended, appears at both 978.1032 [Kansas during] 1918–1945 and 978.1033 [Kansas during] 1945–.

When adding standard subdivisions to the historical periods, use notation 01-09 from Table 1 (*not* 001-009 from the table under 930-990). However, do not use T1-089 and T1-091, since the provisions for them given at 004 and 0091-0098 in the table under 930-990 take precedence over provisions for historical periods.

Add table: Centuries

The starting and finishing dates of historical period subdivisions may mark centuries or decades rather than significant events in the history of the area. Since such periods start on January 1 and end on December 31, the year either beginning or ending the period will appear in only one heading, e.g., 978.02 [Western United States during] 1800–1899 and 978.03 [Western United States during] 1900–. (The DDC uses the convention that a century begins with the year 00 and ends with the year 99.) In 940–990, the name for a particular century is given if the span of years in the heading is less than 75 years, e.g., the 15th century in German history is given in a class-here note at 943.028 Reigns of Albert II and Frederick III, 1438–1493. The name for the century is not usually given if the span of years in the heading is 75 or more years, e.g., the 17th century is not given at 943.04 [Germany during] 1618–1705. However, if the span in the heading covers three centuries, and the first and third century are given in the including note, the middle century is given in the class-here note, e.g., the 947.03 entry of Russian history has 1240–1462 in the heading, the 13th and 15th centuries in the including note, and the 14th century in the class here note.

930-990 vs. 355.009, 355-359

Military topics and war

Use 930–990 for works on military history that deal with the outcome of significant events in wars, e.g., the use of tanks on the Eastern Front and how their use affected various battles 940.54217. Use the history standard subdivisions in 355–359 for works emphasizing military history or topics without consideration of the general course of a war, e.g., changes in tank tactics during the course of World War II 358.18409044. If in doubt between 930–990 and 355–359, prefer 930–990.

See also discussion at 930-990: Wars.

Persons

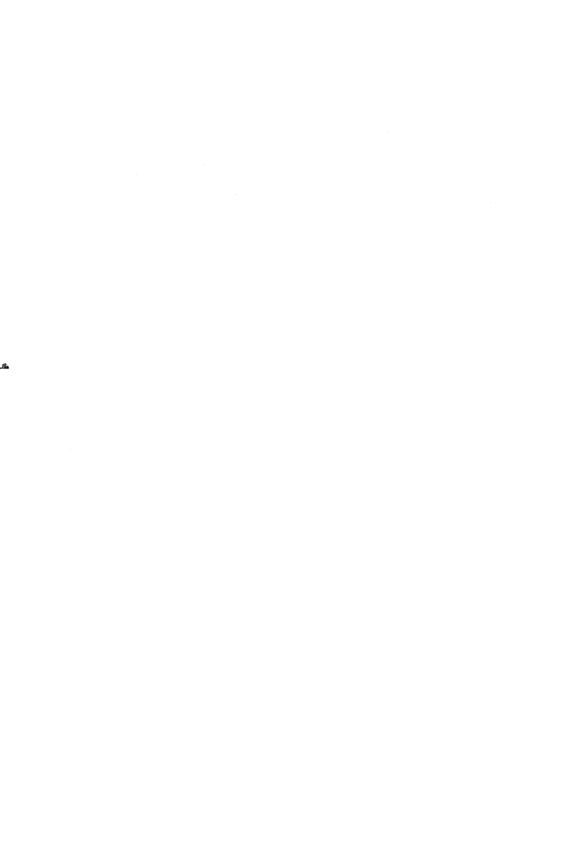

Use 930–990 for comprehensive works on soldiers chiefly associated with the history of a specific war, e.g., William Tecumseh Sherman 973.73092. Use 355.0092

for comprehensive works on soldiers associated with more than one war, or who had long and varied careers, e.g., Douglas MacArthur. If in doubt, prefer 930–990.

941

History of the British Isles

Use 941 for works on the United Kingdom (England, Wales, Scotland, and Northern Ireland), a political entity, and on Great Britain (England, Wales, and Scotland), a geographic entity. Use 942 only for works dealing with England alone, or with England and Wales. Histories of the period since 1603 (or including this period) will seldom deal with England or England and Wales alone. Histories of the period before 1603 may deal with England or England and Wales alone. Works on the civilization of this area may deal with any combination. Use 941 for the following combinations of two areas: England and Scotland, England and Ireland, Ireland and Wales.

Tables

Table 1. Standard Subdivisions

The following notation is never used alone, but may be used as required with any regular schedule number, e.g., workbooks (—076 in this table) in arithmetic (513): 513.076. When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. Unless other instructions are given, the terminal zeros in a main class or division number should be dropped before adding a standard subdivisions, e.g., journals (—05 in this table) in mathematics (510 minus the final zero): 510.5. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules

When standard subdivision notation from Table 1 is listed in Tables 2 through 6 and in the schedules, all of the notation's notes and subdivisions as given in this table are applicable unless other instructions are given. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that 610.7 is listed, but not 610.8 or the subdivisions of 610.7, does not exclude the use of 610.8 or 610.71

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Standard subdivisions may be added to special notation listed in the regular standard subdivision sequence, to subdivisions of —04 Special topics that are specifically listed in the schedules, and to displaced standard subdivisions wherever they appear. Numbers in the schedules that look as though they were built with notation from this table but are outside the regular sequence of standard subdivisions are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers

Never use more than one zero in applying a standard subdivision unless instructed to do so. If more than one zero is needed, the number of zeros is always indicated in the schedules. If the 0 subdivisions of a number in a schedule are used for special purposes, use notation 001–009 for standard subdivisions; if the 00 subdivisions also are used for special purposes, use notation 0001–0009 for standard subdivisions

(continued)

Table 1. Standard Subdivisions (continued)

Unless other instructions are given, observe the following table of preference, e.g., communication in education and research —07 (not —014):

| Smarial taming | 04 |

-01 Philosophy and theory

Including value

Class here methodology, schools of thought

Class interdisciplinary works on philosophy in 100

See Manual at T1-01

--011 Systems

Class here models (simulations), operations research

Add to base number —011 the numbers following 003 in 003.1–003.8, e.g., computer modeling and simulation —0113, forecasting and forecasts —0112; however, for forecasts concerning a specific group of people, see —081–089, plus notation 01 from table under —08, e.g., forecasts concerning retired people —0869601; for short term forecasts (ten years or less) in a specific historical period, see —0901–0905, plus notation 01 from table under —0901–0905, e.g., forecasts for 2010–2019 —09051201; for forecasts in a specific continent, country, locality, see —093–099, plus notation 01 from table under —093–099, e.g., forecasts for United States —097301

Class models (simulations) in study and teaching in —078

See Manual at 510, T1-0151 vs. 003, T1-011

--012 Classification

Class classification of bibliographic material in 025.42; class classification of bibliographic material on a specific subject in 025.46; class interdisciplinary works on classification in 001.012

—014 Communication

Including etymology; pronunciation, spelling

Class here language, terminology; content analysis, semiotics

Class subject headings and thesauri in information retrieval in 025.49001–025.49999; class interdisciplinary works on communication, semiotics in 302.2; class interdisciplinary works on language in 400; class interdisciplinary works on terminology in 401.4; class interdisciplinary works on etymology in 412. Class aspects of linguistics not provided for here with the aspect in 400, e.g., translating 418.02; class readers for nonnative speakers of a specific language intended to instill a knowledge of the special vocabulary of that language for a specific subject with the language in 400, plus notation 864 from Table 4, e.g., engineering readers (in a language other than Spanish) for Spanish-speaking people —8646102462, English-language engineering readers for Spanish-speaking people 428.646102462

For dictionaries, see —03

—014 1 Discourse analysis

-0148

Abbreviations, acronyms, symbols

Symbols classed here are limited to conventional or standard signs such as those used in mathematics, chemistry, flow charts, circuit diagrams, maps, road signs

Including dictionaries of abbreviations, acronyms, symbols

Class interdisciplinary works on symbols in 302.2223; class interdisciplinary works on abbreviations and acronyms in 411; class interdisciplinary dictionaries of abbreviations, acronyms, symbols in 413.15

—015 Scientific principles

Use of science to analyze and describe the subject, to support or attack its validity, to carry out operations in the subject, to provide information needed in a subject

Add to base number —015 the numbers following 5 in 510–590, e.g., mathematics —0151, meteorology —015515

Class scientific method in —0721; class statistical methods in —0727; class interdisciplinary works on natural sciences and mathematics in 500

For psychological principles, see —019

See Manual at T1—015 vs. T1—0245–0246; also at 510, T1—0151 vs. 003, T1—011; also at 510, T1—0151 vs. 004–006, T1—0285; also at 519.5, T1—015195 vs. 001.422, T1—0727

—(016) Bibliographies, catalogs, indexes

(Optional number; prefer 016)

—019 Psychological principles

Use for applications of individual psychology only, not for applications of social psychology

Including psychology of learning specific subjects

Class social psychology in 302; class psychology of learning a specific subject at primary level in 372.3–372.8; class interdisciplinary works on psychology in 150

See Manual at 302-307 vs. 150, T1-019

-02 Miscellany

SUMMARY

| | 020 2021022023024025027028029 | -020 8 [Synopses and outlines, humorous treatment, audiovisual treatment] Tabulated and related materials Illustrations, models, miniatures The subject as a profession, occupation, hobby The subject for people in specific occupations Directories of persons and organizations Patents and identification marks Auxiliary techniques and procedures; apparatus, equipment, materials Commercial miscellany |

| 020 2 | | Synopses and outlines |
| | | Including chronologies |
| | | Class works called synopses and outlines that are regular treatises or introductions to a subject in 001–999 without use of notation 0202 from Table 1; class interdisciplinary chronologies in 902.02 |

---020 8

-0207

Audiovisual treatment

Humorous treatment

See Manual at T1—0207 vs. T3B—7. T3A—8 + 02. T3B—802.

T3B-8+02, T3A-8+07, T3B-807, T3B-8+07

—021 Tabulated and related materials

Including statistics, statistical graphs

Class interdisciplinary collections of statistics in 310

See also —0727 for analysis of statistical data; also —0728 for methods of presenting statistical data

--021 2 Formulas and specifications

Class here tables of values for use in formulas and specifications

—021 6 Lists, inventories, catalogs

Not provided for elsewhere

Class directories of persons and organizations in —025; class lists and catalogs of products and services offered for sale, lease, or free distribution in —029; class catalogs of collections and exhibits in —074; class price trends for collectors in —075; class bibliographic catalogs on specific subjects in 016; class directories of databases on specific subjects in 016.02506

--021 8 Standards

Class here standardization

Add to base number —0218 notation 1–9 from Table 2, e.g., standards in Israel —02185694; however, for biography, see —092

Class interdisciplinary works on standardization, standards in 389.6; class collections of technical standards in 602.18

For specifications, see —0212

—022 Illustrations, models, miniatures

Including graphs

Class statistical graphs in -021

-022 2 Pictures and related illustrations

Class here cartoons, drawings, pictorial charts and designs, sketches

Class interdisciplinary works on cartoons in 741.5

For humorous cartoons, see —0207

See Manual at T1-0222 vs. T1-0223

—022 3 Maps, plans, diagrams

Class comprehensive works on historical maps and atlases in 911; class interdisciplinary works on maps, plans, diagrams; on maps, plans, diagrams of geography, travel, and roads in general and in specific areas in 912

See Manual at T1-0222 vs. T1-0223

--022 8 Models and miniatures

Class simulation models in —011; class model and miniature educational exhibits in —074; class interdisciplinary works in 688.1

—023 The subject as a profession, occupation, hobby

Class here vocational guidance, choice of vocation, career opportunities, occupational specialties, professional relationships; the subject as a profession, occupation, hobby for specific groups of people

Add to base number —023 notation 1–9 from Table 2, e.g., the subject as a profession in Great Britain —02341; however, for biography, see —092

Class interdisciplinary works on professional relationships in 331.7; class interdisciplinary works on vocational guidance, choice of vocation, career opportunities, occupational specialties in 331.702; class interdisciplinary works on hobbies in 790.13

—024 The subject for people in specific occupations

Add to base number —024 notation 001–999, e.g., the subject for engineers —02462

See Manual at T1-024; also at T1-015 vs. T1-0245-0246

—025 Directories of persons and organizations

Class here directories of public officials and employees; membership lists containing directory information, e.g., employment and education

Add to base number —025 notation 1–9 from Table 2, e.g., directories of Ohio —025771; however, for biography, see —092

Class directories giving biographical information in —0922

See also —029 for directories of products and services; also 016.02506 for directories of databases on specific subjects

See Manual at T1—025 vs. T1—029; also at T1—025 vs. T1—0601–0609

—(026) Law

(Optional number; prefer 341–347)

Add to base number —026 notation 1–9 from Table 2, e.g., law of Australia —02694; however, for biography, see —092

A special development of —026 covering treaties and cases in law of nations is given in centered entry at 341.2–341.7 for use with subdivisions in 341.2–341.7; another special development of —026 covering laws, regulations, cases, procedures, courts in the rest of law is given in centered entry at 342–347 for use with subdivisions in 342–347

—027 Patents and identification marks

—027 2 Patents

Add to base number —0272 notation 1–9 from Table 2, e.g., patents of Japan —027252; however, for biography, see —092

Class interdisciplinary works on patents in 346.0486; class interdisciplinary collections of patents in 608

>

| -027 5-027 8 Identification marks |
|--|
| Class comprehensive works in —027 |
| Trademarks and service marks |
| Class comprehensive works on trademarks generally found on products rather than identifying services in 602.75; class interdisciplinary works on trademarks and service marks in 929.95 |
| Ownership marks |
| Artists' and craftsmen's marks |
| Class interdisciplinary works in 700.278 |
| Auxiliary techniques and procedures; apparatus, equipment, materials |
| Apparatus, equipment, materials |
| Limited to apparatus, equipment, materials used in a subject |
| Class here instruments, instrumentation |
| Class apparatus, equipment, materials used in a specific auxiliary technique or procedure in —0285–0289; class collectibles, memorabilia in —075; class use of apparatus and equipment in study and teaching in —078; class products of a subject in 001–999 without adding notation 0284 from Table 1 |
| |

--028 5-028 9 Auxiliary techniques and procedures

Class laboratory manuals in —078; class comprehensive works in —028

For research methods, see -0721

—028 5 Computer applications

Class here computer applications in research; data processing

Unless it is redundant, add to base number —0285 the numbers following 00 in 004–006, e.g., digital personal computers —0285416, but digital computers as a whole —0285 (not —02854)

Class computer modeling and simulation in —0113; class interdisciplinary works on data processing in 004

See Manual at T1—0285; also at 510, T1—0151 vs. 004–006, T1—0285

—028 6 Green technology (Environmental technology)

Former heading: Waste technology

Including pollution control technology, waste technology

Class here environmental engineering (environmental health engineering, environmental protection engineering), sustainable engineering

Class interdisciplinary works on environmental engineering, green technology, sustainable engineering in 628; class interdisciplinary works on waste technology in 628.4; class interdisciplinary works on pollution control technology in 628.5

See also 621.042 for engineering of alternative and renewable energy resources

—028 7 Testing and measurement

Use this subdivision only with numbers denoting fabrication, manufacture, construction, installation, not with numbers denoting use, operation, or application when these are different, e.g., testing and measurement of textile manufacturing machinery 681.76770287 (not 677.02850287), of tools 621.900287

Class here laboratory manuals for testing, mensuration

Class aptitude tests in a specific field in 153.94; class technology of testing and measuring instruments in 681.2; class interdisciplinary works on measurement and mensuration in 530.8

For educational testing, see —076

—028 8 Maintenance and repair

Use this subdivision only with numbers denoting fabrication, manufacture, construction, installation, not with numbers denoting use, operation, or application when these are different, e.g., maintenance and repair of textile manufacturing machinery 681.76770288 (not 677.02850288), of tools 621.900288

Class here conservation, preservation, restoration

Class maintenance and repair in specific areas in —09; class interdisciplinary works on maintenance and repair in 620.0046; class interdisciplinary works on artistic conservation, preservation, restoration in 702.88

See also -0286 for green technology; also -0682 for management of maintenance

—028 9 Safety measures

Use only for personal safety and safety engineering

Class interdisciplinary works on safety in 363.1; class interdisciplinary works on personal safety in 613.6; class interdisciplinary works on safety engineering in 620.86

See Manual at 363.1

—029 Commercial miscellany

Including estimates of labor, time, materials; price trends

Class here listings of products and services offered for sale, lease, or free distribution

Add to base number —029 notation 1–9 from Table 2, e.g., commercial miscellary of Japan —02952; however, for biography, see —092

Class house organs in —05; class interdisciplinary commercial miscellary in 381.029; class noncurrent offers for sale used primarily to illustrate civilization and customs of an earlier period in 900

For price trends for collectors, see —075; for catalogs of bibliographic materials on specific subjects, see 016

See also —074 for listings of noncommercial collections and exhibits

See Manual at T1-025 vs. T1-029; also at T1-074 vs. T1-029

—03 Dictionaries, encyclopedias, concordances

Including thesauri (synonym dictionaries)

Class dictionaries of abbreviations, acronyms, symbols in —0148; class biographical dictionaries in —0922; class interdisciplinary encyclopedias in 030; class interdisciplinary dictionaries in 413

See also 025.49 for thesauri (controlled vocabularies)

—04 Special topics

Use this subdivision only when it is specifically set forth in the schedules. Add other standard subdivisions —01–09 to it and its subdivisions as required, e.g., participatory democracy in France 323.0420944

--05 Serial publications

Regardless of form (print or electronic) or frequency

Class here house organs, magazines, newspapers, yearbooks

Class monographic series in 001–999 without adding notation 05 from Table 1; class interdisciplinary serial publications in 050; class interdisciplinary newspapers in 071–079

For a special kind of serial publication, see the kind, e.g., directories in serial form —025, administrative reports of organizations —06

—06 Organizations and management

> —060 1–060 9 Organizations

Class here Greek-letter societies, student organizations; history, charters, regulations, membership lists, administrative reports

Class directories of organizations, membership lists with directory information in —025; class organizations engaged in education, research, related topics in —07; class business enterprises in 338.7; class government administrative and military organizations in 350; class nonadministrative proceedings and reports in 001–999 without adding notation 06 from Table 1; class comprehensive works on organizations active in a subject in —06; class interdisciplinary works on organizations in 060

See Manual at T1—0601–0609; also at T1—025 vs. T1—0601–0609; also at T1—072 vs. T1—0601–0609

--060.1

International organizations

Class guides to national organizations of the world in --06

--060 3-060 9

National, state, provincial, local organizations

Add to base number —060 notation 3–9 from Table 2, e.g., national organizations in France —06044

---068

Management

Class a routine activity called management associated with a profession, occupation, hobby in 001–999 without adding notation 068 from Table 1, e.g., management of patients 616 (not 616.0068); class interdisciplinary works in 658

See Manual at T1-068; also at T1-068 vs. 353-354

(Option: Class management of specific enterprises in 658.9)

---068 1

Organization and financial management

Including fund raising for festivals [formerly —079], fund raising, initiation of business enterprises

For internal organization, see —0684

See also —079 for fund raising for competitions, awards, financial support

---068 2

Plant management

Including equipment and utilities; maintenance

Class here comprehensive works on energy management

For a specific aspect of energy management, see the aspect, e.g., energy conservation in production management —0685

See also —0288 for technology of maintenance

See Manual at 647 vs. 647.068, 658.2, T1-0682

—068 3 Personnel management (Human resource management)

Including management of employee benefits, of in-service training and residency, of wages and salaries

Class comprehensive works on in-service training and residency in —07155; class interdisciplinary works on labor relations in 331

For management of executive personnel, see -0684

See also 331.21 for wages; also 331.255 for employee benefits

—068 4 Executive management

Including contracting out, internal organization, safety management

For contracting out a specific activity in management, see the activity, e.g., contracting out financial management —0681; for a specific aspect of safety management, see the aspect, e.g., personnel safety —0683

—068 5 Management of production

Class factory operations engineering in 670.42

—068 7 Management of materials

Including physical distribution, procurement of office equipment

See also —029 for evaluation and purchasing manuals

—068 8 Management of distribution (Marketing)

Including market research, personal selling

Class financial aspects of marketing management in —0681; class results of market research in 381

For physical distribution, see —0687; for advertising, see 659.1

-07 Education, research, related topics

Including programmed texts

Class here subject-oriented study programs; comprehensive works on education and research, on resources for education and research

Class psychology of learning specific subjects in —019

For a specific resource not provided for here, see the resource, e.g., directories —025, bibliographies 016, libraries 026

See Manual at 016 vs. 026, T1-07

SUMMARY

| 070 1-07 | 0 9 Geographic treatment |
|-------------|--|
| 071 | Education |
| —072 | Research |
| 074 | Museums, collections, exhibits |
| 075 | Museum activities and services |
| 076 | Review and exercise |
| 078 | Use of apparatus and equipment in study and teaching |
| 079 | Competitions, awards, financial support |

---070 1--070 9

Geographic treatment

Add to base number —070 notation 1–9 from Table 2, e.g., education and research in France —07044

--071

Education

Class here curricula, study (education), teaching, vocational education

Class student organizations in —0601–0609; class textbooks, school activities in a subject in 001–999 without adding notation 071 from Table 1; class comprehensive works on education and research in —07; class interdisciplinary works on education in 370; class interdisciplinary works on teaching in 371.102

For review and exercise, see —076; for use of apparatus and equipment in education, see —078; for competitions, awards, financial support in education, see —079; for special education in specific subjects, see 371.9

See Manual at 407.1, T1—071 vs. 401.93, T4—019, 410.71, 418.0071, T4—80071

---071 01--071 09

Geographic treatment

Class here geographic treatment of any two levels of education, e.g., secondary and higher education

Add to base number -0710 notation 1-9 from Table 2, e.g., education in Argentina -071082

>

-071 1-071 5 Specific levels of education

Class comprehensive works in ---071

For education in specific subjects at primary level, see 372.3–372.8

---071 1

Higher education (Tertiary education)

Class here professional education

Add to base number —0711 notation 1–9 from Table 2, e.g., universities in Japan —071152; however, for biography, see —092

For extension departments and services, see —0715

--071 2

Secondary education

Add to base number —0712 notation 1–9 from Table 2, e.g., secondary schools in rural regions —07121734; however, for biography, see —092

---071 5

Adult education and on-the-job training

Class here continuing, further, lifelong, permanent, recurrent education; correspondence schools and courses, distance education; extension departments and services; institutes and workshops; occupational and vocational training; radio and television classes

--071 55

On-the-job training

Class here apprenticeship, in-service training, residency

Class management of on-the-job training by employers in —0683; class interdisciplinary works in 331.2592

--072

Research

Class here action research, evaluation research

Class operations research in —011; class financial support of research in —079; class results of research in 001–999 without adding notation 072 from Table 1; class interdisciplinary works on research in 001.4

See Manual at T1-072 vs. T1-0601-0609

---072 01--072 09

Geographic treatment

Add to base number —0720 notation 1–9 from Table 2, e.g., research in England —072042

See Manual at T1-07201-07209 vs. T1-0721

---072 1

Research methods

Class here laboratory manuals used in research; qualitative research, quantitative research, scientific method; research and scientific techniques not provided for elsewhere in Table 1

Avoid notation for a specific research method when it is redundant, e.g., historical research in history 907.2 (not 907.22)

For specific research methods, see —0722-0727; for scientific method used in systems analysis, see —011. For a specific research or scientific technique provided for elsewhere in Table 1, see the technique, e.g., mathematical techniques —0151, data processing —0285, testing —0287

See Manual at T1-07201-07209 vs. T1-0721

--072 2

Historical research

Including oral history

Class here historiography

It is redundant to use the final digit of —0722 in history (900); stop at —072, e.g., historical research in European history 940.072

Class interdisciplinary works on historical research, on historiography in 907.2

Case studies relocated to -0723

—072 3 Descriptive research

Including case studies [formerly —0722]; sampling techniques; surveys, questionnaires, field work, observation, interviews

Class here data collection

Class management of information collection in —0684; class collection of operational data in 001–999 without adding notation 0723 from Table 1; class interdisciplinary works on data collection in research in 001.433

For analysis of statistical data, see —0727; for presentation of statistical data, see —0728

See also —075 for collection of objects

---072 4 Experimental research

Class models (simulations) in -011

—072 7 Statistical methods

Class statistical methods used in systems analysis in --011; class interdisciplinary works on statistical methods in 001,422

For data collection, see -0723; for presentation of statistical data, see -0728

See also —021 for works containing the statistics themselves

See Manual at 519.5, T1-015195 vs. 001.422, T1-0727

-072 8 Presentation of statistical data

Class here graphic presentation

Class the statistics themselves (no matter how presented) in —021

—074 Museums, collections, exhibits

Class here festivals [formerly —079], exhibitions, fairs; catalogs, lists regardless of whether or not articles are offered for sale; guidebooks, history and description

Add to base number —074 notation 1–9 from Table 2 for the area in which museums, collections, exhibits are found, e.g., museums in Pennsylvania —074748, festivals in New York City —0747471

Class comprehensive works on museology of a subject in —075; class interdisciplinary works on museums, collections, exhibits in 069; class interdisciplinary works on festivals in 394.26; class interdisciplinary works on exhibitions, fairs in 907.4

For collections of books and related informational materials in specific subjects, see 016

See Manual at T1-074 vs. T1-029

--075 Museum activities and services

Class here museology, collecting, collectibles, memorabilia, price trends for collectors

Class interdisciplinary works on museum activities and services in 069; class interdisciplinary works on museum collecting in 069.4; class interdisciplinary works on recreational collecting in 790.132

For activities and services of or relating to specific museums, collections, exhibits, see —074. For a specific museological technique not provided for here, see the technique in —028, e.g., maintenance and repair of collected objects —0288

--076 Review and exercise

Including workbooks with problems, questions, answers; civil service examinations; testing, test construction and evaluation

Class programmed texts with problems, questions, answers in —07; class interdisciplinary works on civil service examinations in 351.076; class interdisciplinary works on examinations and tests in 371.26

For review and exercise using apparatus and equipment, see —078

See also 153.94 for aptitude tests in a specific field

(Option: Class civil service examinations in specific subjects in 351.076)

—078 Use of apparatus and equipment in study and teaching

Class here laboratory manuals, student projects and experiments

Class interdisciplinary works on teaching aids in 371.33

For laboratory manuals used in testing, see —0287; for laboratory manuals used in research, see —0721

—078 5 Computer-assisted instruction

Unless it is redundant, add to base number —0785 the numbers following 00 in 004–006, e.g., use of digital personal computers —0785416, but digital computers —0785 (*not* —07854); interactive video —078567

Class interdisciplinary works on computer-assisted instruction in 371.334

—079 Competitions, awards, financial support

Including fund raising to support such activities; judging competitions

Class here bursaries, certificates, contests, fellowships and scholarships, grants, honors, medals, prizes

Add to base number —079 notation 4–9 from Table 2 for geographic eligibility only, e.g., competitions open to contestants from Italy —07945, awards open to entrants from the United States —07973, fellowships limited to residents of California —079794

Subdivisions are added for any or all topics in heading

Class description of works that are entered into competitions, that receive awards, or that are the results of financial support in 001–999 without adding notation 079 from Table 1; class interdisciplinary works on orders and decorations in 929.81

See also —0681 for financial management aspects of fund raising

Fund raising for festivals relocated to -0681; festivals relocated to -074

—08 Groups of people

Class here discrimination, group identity, minorities

The subdivisions listed in the add table below are special notation, not standard subdivisions

Unless other instructions are given in the add table below, observe the following table of preference, e.g., a periodical of statistics —021 (not —025):

| Forecasting and forecasts | 01 |
|--|-----------------|
| Specific continents, countries, localities | 093099 |
| Areas, regions, places in general | 091 |
| Historical periods | 0901-0905 |
| Museums, collections, exhibits | 074 |
| Collecting objects | 075 |
| Illustrations | 022 |
| Statistics | 021 |
| Dictionaries, encyclopedias, concordances | 03 |
| History and geographic treatment (without subdivision) | 09 |
| Serial publications | 05 |

(continued)

—08 Groups of people (continued)

| Add to each subdivision identified by * as follows: 01 Forecasting and forecasts 02 Statistics and illustrations 021 Statistics 022 Illustrations Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams Class statistical graphs in 021; class humorous cartoons in |
|---|
| 02 Statistics and illustrations 021 Statistics 022 Illustrations Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams |
| 022 Illustrations Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams |
| 022 Illustrations Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams |
| Including cartoons, drawings, pictures, pictorial charts and designs, sketches; graphs; maps, plans, diagrams |
| designs, sketches; graphs; maps, plans, diagrams |
| Class statistical graphs in 021: class humorous cartoons in |
| |
| -08 without adding from this table |
| O3 Dictionaries, encyclopedias, concordances |
| Class here thesauri (synonym dictionaries) |
| 05 Serial publications |
| Regardless of form (print or electronic) or frequency |
| Class here house organs, magazines, newspapers, yearbooks |
| 07 Museums, collections, exhibits; collecting objects |
| 074 Museums, collections, exhibits |
| Class here exhibitions, fairs, festivals; catalogs, lists |
| regardless of whether or not articles are offered for sale; |
| guidebooks, history and description |
| Add to 074 notation 4–9 from Table 2, e.g., collections in |
| Pennsylvania 074748 |
| 075 Collecting objects |
| Class here collectibles, memorabilia, price trends for |
| collectors |
| 09 History and geographic treatment |
| 0901–0905 Historical periods |
| Add to 090 the numbers following —090 in notation |
| 0901–0905 from Table 1, e.g., the group in the 20th |
| century 0904 |
| O91 Areas, regions, places in general |
| Add to 091 the numbers following —1 in notation 11–18 |
| from Table 2, e.g., the group in urban regions 091732 |
| 093–099 Specific continents, countries, localities |
| Add to 09 notation 3–9 from Table 2, e.g., the group in |
| Japan 0952 |

Class ethnic and national minorities in —089; class biography in —092

See Manual at T1-08 and 306.2-306.6

SUMMARY

| 080 1080 | 9 Forecasting, statistics, illustrations, dictionaries, encyclopedias, concordances, serials, museums and collecting, history and geographic treatment |

| 088 | Occupational and religious groups |
| 089 | Ethnic and national groups |

>

---080 1--080 9

Forecasting, statistics, illustrations, dictionaries, encyclopedias, concordances, serials, museums and collecting, history and geographic treatment

Add to base number —080 the numbers following 0 in notation 01–09 from table under —08, e.g., statistics —08021

—081–088 Groups of people by specific attributes

Unless other instructions are given, class a subject with aspects in two or more subdivisions of —081–088 in the number coming last, e.g., children with disabilities —087 (not —083)

Class comprehensive works on ethnic and national groups in —089. Class members of an ethnic or national group with a specific attribute, other than people with status defined by change in residence, with the attribute in —081–088, e.g., Chinese women —082

---081 *People by gender or sex

Class here gender identity, gender role, sex role

Subdivisions are added for either or both topics in heading

For women, see —082; for transgender and intersex people, see —0867

See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422

--081 1 *Men

Class here males

See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422

--082 *Women

Class here females; feminist views of a subject, e.g., feminist Christian theology 230.082

See Manual at T1-081 and T1-08351, T1-08352, T1-08421, T1-08422

—083 *Young people

Class here children

—083 2 *Infants

Children from birth through age two

—083 3 *Children three to five

Class here preschool children

| 083 4 | *Children six to eleven |
|--------|---|
| | Class here school children |
| | For school children over eleven, see —0835 |
| 083 41 | *Boys six to eleven |
| 083 42 | *Girls six to eleven |
| 083 5 | *Young people twelve to twenty |
| | Variant names: adolescents, teenagers, young adults, youth |
| | Class youth twenty-one and over, comprehensive works on young adults in -0842 |
| 083 51 | *Males twelve to twenty |
| | See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422 |
| 083 52 | *Females twelve to twenty |
| | See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422 |
| 084 | People in specific stages of adulthood |
| | Class comprehensive works on adults in 001-999 without adding notation 084 from Table 1 |
| 084 2 | *People in early adulthood |
| | Class here comprehensive works on young adults |
| | For young adults under twenty-one, see —0835 |
| 084 21 | *Young men |
| | See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422 |
| 084 22 | *Young women |
| | See Manual at T1—081 and T1—08351, T1—08352, T1—08421, T1—08422 |
| 084 4 | *People in middle adulthood |
| 084 6 | *People in late adulthood |
| 085 | *Relatives |
| | Class here parents, adoptive and foster parents, stepparents |
| 085 1 | *Fathers |
| 085 2 | *Mothers |
| | |

For unmarried mothers, see —086947

^{*}Add as instructed under —08

| 085 3 | *Grandparents |
|---------|--|
| | Including great grandparents of any degree (ancestors) |
| 085 4 | *Progeny |
| | Class here children considered in relation to parents |
| 085 5 | *Siblings |
| | Brothers and sisters by blood, adoption, foster care, remarriage of parents |
| 086 | *People by miscellaneous social attributes |
| | Not provided for elsewhere |
| 086 2 | *People by social and economic levels |
| | Class here people by level of cultural development [formerly —0863], social classes |
| | For people with social disadvantages, see —08694 |
| 086 21 | *Upper classes |
| | Including nobility, royalty, wealthy |
| | Class here elites |
| | For reigning monarchs and their regents, see -08835223 |
| 086 22 | *Middle classes (Bourgeoisie) |
| | Including entrepreneurs, managers, professionals |
| | Class here moderately well-to-do people |
| | For lower middle classes, see —08623 |
| 086 222 | *Intelligentsia [formerly —08631] |
| | Class here intellectual elites |
| 086 23 | *Lower middle classes |
| | Class here moderate-income people, working class in developed areas, blue collar workers |
| 086 24 | *Lower classes |
| | Including migrant workers, unskilled workers |
| | Class blue collar workers in —08623; class peasants, sharecroppers in —08863 |
| | For slaves, serfs, peons, see —08625; for poor people, see —086942 |
| 086 25 | *Slaves, serfs, peons |

^{*}Add as instructed under —08

| [086 3] | People by level of cultural development |
|----------|---|
| | Relocated to —0862 |
| [086 31] | Intelligentsia |
| | Relocated to —086222 |
| [086 33] | People with cultural disadvantages |
| | Relocated to —08694 |
| 086 5 | *People by marital status |
| 086 52 | *Single people |
| | For separated and divorced people, see -08653 ; for widowed people, see -08654 |
| 086 523 | *Engaged people |
| 086 53 | *Separated and divorced people |
| | Subdivisions are added for either or both topics in heading |
| 086 54 | *Widowed people |
| 086 55 | *Married people |
| | For polygamists, see —08659 |
| | People in common-law marriages relocated to —08656 |
| 086 56 | *People in partnerships and unions |
| | Class here people in common-law marriages [formerly —08655], civil unions, de facto relationships, domestic partnerships, registered partnerships; unmarried couples living together (cohabitation) |
| | Subdivisions are added for either or both topics in heading |
| 086 59 | *Polygamists |
| 086 6 | *People by sexual orientation |
| | Including asexuals |
| | Transsexuals relocated to —0867 |
| 086 62 | *Heterosexuals |
| 086 63 | *Bisexuals |
| 086 64 | *Gays |
| 086 642 | *Gay men |
| 086 643 | *Lesbians |

^{*}Add as instructed under —08

| 086 7 | *Transgender and intersex people |
|---------|--|
| | Including female-to-male transgender people, male-to-female transgender people |
| | Class here transsexuals [formerly —0866], transgenderists |
| | Subdivisions are added for transgender and intersex people together, for transgender people alone |
| 086 75 | *Intersex people |
| 086 9 | *People by miscellaneous social statuses |
| 086 91 | *People with status defined by changes in residence |
| | Class here aliens, expatriates, foreigners |
| | Class migrant workers in —08624; class runaway children in —086923; class tramps in —086942; class people of a specific ethnic or national group in —089 |
| 086 912 | *Immigrants |
| | Class displaced persons, refugees in —086914 |
| 086 914 | *Displaced persons |
| | Class here exiles, refugees, stateless persons |
| 086 918 | *Nomads |
| 086 92 | *Antisocial and asocial people |
| | Subdivisions are added for either or both topics in heading |
| | See also —086942 for tramps |
| 086 923 | *Juvenile delinquents and predelinquents |
| | Subdivisions are added for either or both topics in heading |
| 086 927 | *Offenders |
| | Class here convicts, criminals |
| | Class juvenile delinquents in —086923 |
| 086 93 | *Nondominant groups |
| | Class a specific nondominant group with the group, e.g., serfs —08625 |
| 086 94 | *People with social disadvantages |
| | Class here people with cultural disadvantages [formerly —08633], alienated and excluded classes |
| | Class people with a specific social disadvantage not provided for here with the disadvantage, e.g., addicts in recovery —0874 |
| | |

^{*}Add as instructed under —08

| 086 941 | *Unemployed people |
|---------|--|
| | Class poverty-stricken and destitute unemployed people in —086942 |
| 086 942 | *Poor people |
| | Including homeless people, tramps |
| 086 945 | *Abandoned children, abused children, children of unmarried parents, orphans |
| | See also —086923 for runaway children |
| 086 947 | *Unmarried mothers |
| 086 949 | *Victims of war and crime |
| | Including inmates of concentration or internment camps |
| 086 96 | *Retired people |
| 086 97 | *Veterans of military service |
| 087 | *People with disabilities and illnesses, gifted people |
| | Including people with learning disabilities |
| | Class here people with physical disabilities |
| 087 1 | *People with blindness and visual impairments |
| | Class here people who are blind-deaf |
| | Subdivisions are added for either or both topics in heading |
| 087 2 | *People with hearing impairments |
| | Class here people who are deaf |
| | Class people who are deaf-blind in —0871 |
| 087 3 | *People with mobility impairments |
| | Class people with mobility impairments resulting from developmental disabilities in -0875 |
| 087 4 | *People with mental illness and disabilities |
| | Including addicts, addicts in recovery, alcoholics |
| —087 5 | *People with developmental disabilities |
| | Class people with congenital visual disabilities in —0871; class people with congenital hearing disabilities in —0872 |
| | For people with mental developmental disabilities, see -0874 |
| 087 7 | *People with physical illnesses |
| | For people with a specific disability, illness, or impairment provided for elsewhere, see the disability, illness, or impairment, e.g., people with developmental disabilities —0875 |
| | |

^{*}Add as instructed under —08

-0879

*Gifted people

---088

Occupational and religious groups

Add to base number —088 notation 001–999, e.g., nondominant religious groups —0882, Catholic teachings on socioeconomic problems 261.8088282

Class works on the subject for people in specific occupations in -024

See Manual at T1-0882 and 200

--089

Ethnic and national groups

Class here ethnic and national minorities; racial groups, racism

Class biography of members of a specific ethnic or national group in —0923; class treatment with respect to specific ethnic and national groups in places where they predominate in —091–099. Class members of an ethnic or national group with a specific attribute, other than people with status defined by change in residence, with the attribute in —081–088, e.g., Chinese women —082

See Manual at T1-09 vs. T1-089

---089 001--089 009

Forecasting, statistics, illustrations, dictionaries, encyclopedias, concordances, serials, museology, history and geographic treatment

Add to base number —08900 the numbers following 0 in notation 01–09 from table under —08, e.g., statistics —0890021

---089 05--089 09

Specific ethnic and national groups with ethnic origins from more than one continent, of European descent

Add to base number —0890 the numbers following 0 in notation 05–09 from Table 5, e.g., ethnic groups of European descent —08909, ethnic groups of European descent in Namibia —0890906881

--089 1-089 9

Specific ethnic and national groups

Add to base number —089 notation 1–9 from Table 5, e.g., groups of Italian descent —08951, groups of Italian descent in United States —08951073

--09 History, geographic treatment, biography

Class historiography in —0722; class history and geographic treatment of museums, collections, exhibits representing the whole subject in —074; class history and geographic treatment of museum activities and services representing the whole subject in —075

See Manual at T1—09; also at T1—0601–0609: Selection of area number; also at T1—09 vs. T1—089

| | |

History and description

Add to base number —091 the numbers following —1 in notation 11-19 from Table 2, e.g., Torrid Zone —0913; then add further as instructed under —093–099, e.g., conservation and preservation in tropical areas —0913028

^{*}Add as instructed under —0901-0905

—092 Biography

Autobiography, description and critical appraisal of work, diaries, reminiscences, correspondence of people regardless of area, region, or place who are part of the subject or who study the subject, e.g., biographers, collectors, leaders and followers, practitioners and clients, scholars

Class here treatment of individuals

Class nonbiographical treatment of groups of people in —08; class biography not clearly related to any specific subject in 920; class belletristic diaries, reminiscences, correspondence in 800

Observe instructions not to use —092 that apply to 180–190, 759, 809, 810–890. (The instructions for 810–890 are found under notation 09 from Table 3B)

Do not use —092 for a person whose name is used in a schedule heading, e.g., class Muḥammad the Prophet in 297.63 (not 297.63092)

See Manual at T1—092; also at 913–919: Add table: 04: Biography; also at 930–990: Wars: Personal narratives; also at 930–990: Biography

(Option A: Class biography in 920.1–928

(Option B: Class individual biography in 92, or B

(Option C: Class all individual biography of men in 920.71, of women in 920.72)

---092 2

Collected biography

Class here comprehensive works

Add to base number —0922 notation 3–9 from Table 2, e.g., collected biography of a subject in Italy —092245

Class collectibles and memorabilia related to more than one person in —075; class collected biography of specific continents, countries, localities when not limited to a specific subject in 920.03–920.09

For collected biography of members of specific ethnic and national groups, see —0923

See Manual at T1-0922; also at T1-0922 vs. T1-093-099

(Option: Class collected biography in 92, 920, or B without subdivision)

Collected biography of people by specific gender or sex; age groups; relationships relocated to —0925; collected biography of people by miscellaneous social attributes relocated to —0926; collected biography of people with disabilities and illnesses, gifted people relocated to —0927; collected biography of members of specific religious groups relocated to —0928

-092 3-092 8 Collected biography of specific groups of people >

> Unless other instructions are given, class a subject with aspects in two or more subdivisions of -0923-0928 in the number coming last, e.g., biography of African American women from Texas —0925209764 (not —0922764 or —0923960730764)

Class comprehensive works in —0922

Collected biography of members of ethnic and national groups ---092 3

> Class collected biography of members of specific ethnic and national groups in areas where they predominate with the group in a specific area in —0922, e.g., biography of Italians in Italy —092245

Collected biography of people by specific gender or sex; age groups; relationships relocated to —0925; collected biography of people by miscellaneous social attributes relocated to —0926; collected biography of people with disabilities and illnesses, gifted people relocated to —0927; collected biography of members of specific religious groups relocated to -0928

---092 305--092 309 Collected biography of members of ethnic and national groups with ethnic origins from more than one continent, of European descent

> Add to base number —09230 the numbers following 0 in notation 05–09 from Table 5, e.g., biography of members of ethnic groups of European descent —092309, biography of members of ethnic groups of European descent in Australia —092309094

---092 31--092 39 Collected biography of members of specific ethnic and national groups

> Add to base number —0923 notation 1–9 from Table 5, e.g., biography of people of Italian descent —092351, biography of people of Italian descent in United States —092351073

Collected biography of people by specific gender or sex; age groups; relationships [all formerly —0922, —0923]

> Add to base number —0925 the numbers following —08 in notation 081-085 from Table 1, e.g., biography of women -09252

For collected biography of transgender and intersex people, see --09267

Collected biography of people by miscellaneous social attributes [formerly = 0922, = 0923]

Add to base number —0926 the numbers following —086 in Table 1, e.g., biography of gays —092664

Collected biography of people with disabilities and illnesses, gifted people [all formerly —0922, —0923]

Add to base number —0927 the numbers following —087 in Table 1, e.g., biography of blind people —09271

-092.5

-092.6

-0927

| T1 | Dewey Decimal Classification | 1 |
|--------|---|-----|
| 092 8 | Collected biography of members of specific religious groups [formerly —0922, —0923] | |
| | Add to base number —0928 the numbers following 2 in 230–290, e. biography of Muslims —092897 | g., |
| 092 9 | Biography of animals and plants | |
| | Use this number for animals and plants treated as individuals, e.g., a biography of Secretariat 798.400929 | |
| 093099 | Specific continents, countries, localities; extraterrestrial worlds | |
| | History and description by place, by specific instance of the subject | |
| | The subdivisions listed in the add table below are special notation, not standard subdivisions | |
| | Unless other instructions are given in the add table below, observe the following table of preference, e.g., a periodical of statistics —021 (not —05): | |
| | Maintenance and repair Forecasts Specific continents, countries, localities Areas, regions, places in general Historical periods Museums, collections, exhibits Collecting objects Illustrations Statistics Dictionaries, encyclopedias, concordances History and geographic treatment (without subdivision) Serial publications -028 -093-099 -091 | |
| | Add to base number —09 notation 3–9 from Table 2, e.g., the subject in North America —097, in Brazil —0981; then add further as follows: 01 Forecasts 02 Statistics, illustrations; maintenance and repair 021 Statistics 022 Illustrations Including cartoons, drawings, pictures, pictorial charand designs, sketches; graphs; maps, plans, diagrams Class statistical graphs in 021; class humorous cartoo in —093–099 without adding from this table 028 Maintenance and repair Class here conservation, preservation, restoration 03 Dictionaries, encyclopedias, concordances Including thesauri (synonym dictionaries) 05 Serial publications Regardless of form (print or electronic) or frequency Class here house organs, magazines, newspapers, yearbooks | |

(continued)

---093-099 Specific continents, countries, localities; extraterrestrial worlds (continued)

Museums, collections, exhibits; collecting objects
 Museums, collections, exhibits

Class here exhibitions, fairs, festivals; catalogs, lists regardless of whether or not articles are offered for sale; guidebooks, history and description

Add to 074 notation 4–9 from Table 2, e.g., collections in Pennsylvania 074748, collections of Brazilian

objects in Pennsylvania —0981074748

075 Collecting objects

Class here collectibles, memorabilia, price trends for collectors

09 History and geographic treatment

0901–0905 Historical periods

Add to 090 the numbers following —090 in notation 0901–0905 from Table 1, e.g., 20th century 0904; however, for museums, collections, exhibits of the subject in an area regardless of historical period, see 074, e.g., collections of 20th-century Brazilian art 709.81074 (not 709.810904)

091 Areas, places, regions in general

Add to 091 the numbers following —1 in notation 11–19 from Table 2, e.g., rural regions 091734

093–099 Specific continents, countries, localities; extraterrestrial worlds

Add to 09 notation 3–9 from Table 2, e.g., Poland 09438

Use 093–099 to add notation for a specific continent, country, locality when first area notation is used to specify area of origin, while second one identifies area in which subject is found or practiced, e.g., Polish political refugees 325.2109438, Polish political refugees in Canada 325.21094380971

(Option: Add historical period numbers that appear in subdivisions of 930–990, using one 0 in all cases except 00 for North America and South America, e.g., United States during Reconstruction —097308, Brazil during Empire —098104, North America in 20th century —097005. If option is used, do not use notation 090 from table above. An extra zero is used for the balance of notation from table above, e.g., statistics of Brazil —09810021)

See Manual at T1—0922 vs. T1—093–099; also at T1—0940902 vs. T1—0902

Table 2. Geographic Areas, Historical Periods, Biography

The following numbers are never used alone, but may be used as required (either directly when so noted or through the interposition of notation 09 from Table 1) with any number from the schedules, e.g., wages (331.29) in Japan (—52 in this table): 331.2952; railroad transportation (385) in Brazil (—81 in this table): 385.0981. They may also be used when so noted with numbers from other tables, e.g., notation 025 from Table 1. When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number

SUMMARY

| 001009 | Standard subdivisions |

| —163 88 | Sea of Crete and Aegean Sea |
| | For Dardanelles, see —16389 |
| —163 89 | Black Sea |
| | Including Bosporus, Dardanelles, Sea of Azov, Sea of Marmara |
| 164 | Pacific Ocean |
| | See Manual at T2—162; also at T2—163 and T2—164, T2—165 |
| | |

| 164 1 | Southeast Pacific Ocean |
|---------|---|
| | American coastal waters from Strait of Magellan to Mexico-United States boundary |
| | Including Gulf of California, Gulf of Guayaquil, Gulf of Panama, Gulf of Tehuantepec |
| | For Strait of Magellan, see —1674 |
| 164 2 | East Pacific Ocean |
| | For southeast Pacific Ocean, see —1641; for northeast Pacific Ocean, see —1643 |
| 164 3 | Northeast Pacific Ocean |
| | North American coastal waters from California to tip of Alaska |
| 164 32 | United States waters |
| | Including Monterey Bay, San Francisco Bay, Puget Sound, Strait of Juan de Fuca |
| | For Alaskan waters, see —16434 |
| 164 33 | Canadian waters |
| | Including Dixon Entrance; Hecate Strait, Queen Charlotte Strait, Strait of Georgia; Queen Charlotte Sound |
| | Class here Inside Passage |
| | For Strait of Juan de Fuca, see —16432 |
| —164 34 | Alaskan waters |
| | Including Bristol Bay, Cook Inlet, Gulf of Alaska, Norton Sound, Shelikof Strait |
| | For Dixon Entrance, see —16433 |
| —164 4 | North Pacific Ocean |
| | American coastal waters and Asian coastal waters located in an arc from Mexico-United States boundary to southern tip of Philippines, excluding South China Sea and inner seas of the Philippines |
| | For northeast Pacific Ocean, see —1643; for northwest Pacific Ocean, see —1645 |
| —164 5 | Northwest Pacific Ocean |
| 164 51 | Bering Sea |
| | Including Bering Strait |
| —164 52 | Coastal waters of southeast Kamchatka |
| 164 53 | Sea of Okhotsk |
| | Including La Perouse Strait |
| | |

| —164 54 | Sea of Japan |
|---------|---|
| | Including Korea Strait, Tatar Strait, Tsugaru Strait |
| | For La Perouse Strait, see —16453 |
| —164 55 | Eastern coastal waters and inner seas of Japan |
| | Including Inland Sea (Seto-naikai) |
| —164 56 | Yellow Sea |
| —164 57 | East China Sea |
| | Including Formosa Strait |
| | For Korea Strait, see —16454 |
| —164 58 | Philippine Sea |
| | Including Luzon Strait |
| —164 6 | West Pacific Ocean |
| | For northwest Pacific Ocean, see —1645; for southwest Pacific Ocean, see —1647 |
| —164 7 | Southwest Pacific Ocean |
| 164 71 | Inner seas of Philippines |
| | For Sulu Sea, see —16473 |
| —164 72 | South China Sea |
| | Including Gulf of Thailand, Singapore Strait |
| | For Formosa Strait, see —16457; for Luzon Strait, see —16458 |
| 164 73 | Inner seas of Malay Archipelago |
| | Including Celebes Sea, Ceram Sea, Molucca Sea, Sulu Sea; Makasar Strait |
| | For seas adjoining southern Sunda Islands, see -16474 |
| 164 74 | Seas adjoining southern Sunda Islands |
| | Including Bali Sea, Banda Sea, Flores Sea, Java Sea, Savu Sea |
| | For Karimata Strait, see —16472 |
| —164 75 | Arafura Sea |
| | For Torres Strait, see —16476 |
| 164 76 | Coral Sea and seas adjoining Melanesia |
| | Including Bismarck Sea, Solomon Sea; Torres Strait; eastern Queensland coastal waters |
| —164 77 | Fiji Sea |

| 164 78 | Tasman Sea |
|---------|--|
| | Including New South Wales coastal waters, Cook Strait |
| | For Tasmanian coastal waters, see -16576 |
| 164 79 | Eastern coastal waters of New Zealand |
| 164 8 | South Pacific Ocean |
| | American coastal waters from Mexico-United States boundary to Strait of Magellan; coastal waters of Antarctica; coastal waters of New Zealand; coastal waters of Australia; coastal waters of New Guinea; waters of Melanesia; coastal waters west and south of Philippines, including South China Sea and inner seas of Philippines |
| | For southeast Pacific Ocean, see —1641; for southwest Pacific Ocean, see —1647; for Pacific sector of Antarctic waters, see —1674 |
| 164 9 | Central Pacific Ocean |
| | American non-coastal waters, Asian non-coastal waters; waters of Polynesia, waters of isolated islands of Pacific, such as Wake and Easter Island |
| | Including coastal waters of Hawaii |
| 165 | Indian Ocean |
| | For Indian Ocean sector of Antarctic waters, see —1675 |
| | See Manual at T2—162; also at T2—163 and T2—164, T2—165 |
| —165 2 | Southwest Indian Ocean |
| | Class here west Indian Ocean |
| | For northwest Indian Ocean, see —1653 |
| —165 23 | Eastern coastal waters of Madagascar |
| —165 24 | Coastal waters of south Africa and coastal waters of southeast Africa |
| | From Cape of Good Hope to and including Delagoa Bay |
| —165 25 | Mozambique Channel |
| —165 26 | Coastal waters of east Africa |
| | From Cape Delgado to Cape Guardafui (tip of the "Horn") |
| —165 3 | Northwest Indian Ocean |
| —165 32 | Gulf of Aden |
| | Including 'Bab el Mandeb |
| —165 33 | Red Sea |
| | Including Gulf of Aqaba, Gulf of Suez |
| | For 'Bab el Mandeb, see —16532 |

| —165 35 | Persian Gulf |
|---------|--|
| | Including Strait of Hormuz |
| —165 36 | Gulf of Oman |
| | For Strait of Hormuz, see —16535 |
| —165 37 | Arabian Sea |
| | Including Laccadive Sea |
| 165 6 | Northeast Indian Ocean |
| —165 64 | Bay of Bengal |
| —165 65 | Andaman Sea |
| | Including Gulf of Martaban, Strait of Malacca |
| | For Singapore Strait, see —16472 |
| —165 67 | Coastal waters of southern Sumatra, coastal waters of Java, coastal waters of Lesser Sunda Islands |
| | For Timor Sea, see —16574 |
| 165 7 | Southeast Indian Ocean |
| | Class here east Indian Ocean |
| | For Arafura Sea, see —16475; for northeast Indian Ocean, see —1656 |
| —165 74 | Northwest Australian coastal waters |
| | From Melville Island to Northwest Cape |
| | Including Timor Sea |
| —I65 75 | West Australian coastal waters |
| | From Northwest Cape to Cape Leeuwin |
| —165 76 | South Australian coastal waters |
| | From Cape Leeuwin to Cape Howe |
| | Including Bass Strait, Great Australian Bight, Tasmanian coastal waters |
| —167 | Antarctic waters |
| | See Manual at T2—162; also at T2—163 and T2—164, T2—165 |
| —167 3 | Atlantic sector |
| | Including Drake Passage, Scotia Sea, Weddell Sea |
| | For Strait of Magellan, see —1674 |
| 167 4 | Pacific sector |
| | Including Amundsen Sea, Bellingshausen Sea, Ross Sea; Strait of Magellan |
| —167 5 | Indian Ocean sector |
| | |

| 168 | Special oceanographic forms and inland seas |
|---------|---|
| | Including coastal pools, saltwater lagoons |
| | Class specific inland seas in —4–9 |
| | See Manual at T2—162 |
| 169 | Fresh and brackish waters |
| | |
| > | —169 2–169 4 Surface waters |
| | Class comprehensive works in —169 |
| 169 2 | Lakes, ponds, freshwater lagoons |
| —1693 | Rivers and streams |
| 169 4 | Waterfalls |
| 169 8 | Groundwaters (Subsurface waters) |
| 17 | Socioeconomic regions |
| —171 | Socioeconomic regions by political orientation |
| 171 2 | Noncontiguous empires and political unions |
| | Add to base number —1712 notation 3–9 from Table 2 for mother country, e.g., French Community —171244 |
| | Class Roman Empire in —37 |
| —171 3 | Western bloc |
| 171 6 | Unaligned blocs |
| 171 65 | Afro-Asian bloc |
| —171 7 | Former communist bloc |
| —171 8 | Wartime groupings |
| —171 82 | Belligerents |
| —171 83 | Nonbelligerents and neutrals |
| —171 9 | Non-self-governing territories |
| —172 | Socioeconomic regions by degree of economic development |
| —172 2 | Developed regions |
| 172 4 | Developing regions |
| 173 | Socioeconomic regions by concentration of population |
| —173 2 | Urban regions |
| 173 3 | Suburban regions |
| 173 4 | Rural regions |
| | Including rural villages |
| | |

| 174 | Regions where ethnic and national groups predominate |
|-----------------|--|
| —174 05—174 09 | Regions where groups with mixed ancestry with ethnic origins from more than one continent predominate, regions where groups of European descent predominate |
| | Add to base number —174 notation 05–09 from Table 5, e.g., regions where groups of European descent predominate —17409 |
| 174 1174 9 | Regions where specific ethnic and national groups predominate |
| | Add to base number —174 notation 1–9 from Table 5, e.g., regions where Arabs predominate —174927 |
| —175 | Regions where specific languages predominate |
| | Add to base number —175 notation 1–9 from Table 6, e.g., regions where Spanish language predominates —17561 |
| —176 | Regions where specific religions predominate |
| —176 1 | Christianity |
| —176 12 | Catholicism |
| 176 14 | Protestantism |
| —176 2–176 9 | Other religions |
| | Add to base number —176 the numbers following 29 in 292–299, e.g., regions where Islam predominates —1767 |
| —177 | Nations belonging to specific international organizations |
| | Including nations belonging to Organization of Petroleum Exporting Countries |
| | Arrange alphabetically by name of organization |
| —18 O | ther kinds of terrestrial regions |
| —181 | Hemispheres |
| | Class zonal, physiographic, socioeconomic regions in a specific hemisphere in —11-17 |
| —181 1 | Eastern Hemisphere |
| —181 2 | Western Hemisphere |
| | Portion of world between 20° west longitude and 160° east longitude, including North and South America, most of North Atlantic Ocean (excluding northeastern portion), Southwest Atlantic Ocean, Northeast Pacific Ocean, and most of South Pacific Ocean (excluding southwestern portion) |
| | Class land portion of North and South America in —7; class geography of Western Hemisphere in 917; class history of Western Hemisphere in 970 |
| —181 3 | Northern Hemisphere |
| 1814 | Southern Hemisphere |
| | |

| 182 | Ocean and sea basins |
|---------|---|
| | The totality of continents facing and islands in specific major bodies of water |
| | Class ocean and sea waters in —162; class zonal, physiographic, socioeconomic regions in a specific ocean or sea basin in —11–17 |
| | For a specific part of an ocean or sea basin not provided for here, see the part, e.g., Aegean region—4958, Pacific Ocean islands—9 |
| —182 1 | Atlantic region |
| | Class here occident, western world |
| | See also —729 for Caribbean Area |
| —182 2 | Mediterranean region |
| | (Option: Class here Mediterranean region to 476; prefer —37) |
| —182 21 | Western Mediterranean region |
| | (Option: Class here western Mediterranean region to 476; prefer —37) |
| 182 24 | Eastern Mediterranean region |
| | (Option: Class Eastern Mediterranean region to 323; prefer —38) |
| | See also —56 for Middle East |
| 182 29 | Black Sea region |
| | (Option: Class here Black Sea region to 640; prefer —395) |
| | See also —56 for Middle East |
| —182 3 | Pacific region |
| —182 4 | Indian Ocean region |
| —19 | Space |

Class extraterrestrial worlds in —99

See Manual at T2-99 vs. T2-19

—2 Biography

Autobiography, description and critical appraisal of work, diaries, reminiscences, correspondence of people regardless of area, region, or place who are part of the subject or who study the subject, e.g., biographers, collectors, leaders and followers, practitioners and clients, scholars

Class here treatment of individuals

Add to base number —2 the numbers following —092 in notation 0922–0929 from Table 1, e.g., collected biography —22, collected biography of Italians in Italy —2245

Class belletristic diaries, reminiscences, correspondence in 800

See Manual at T1-092

> —3–9 Specific continents, countries, localities; extraterrestrial worlds

Class here specific instances of the subject

An area is classed in its present number even if it had a different affiliation at the time under consideration, e.g., Arizona under Mexican sovereignty —791 (not —72)

Class areas, regions, places not limited by continent, country, locality in —1; class parts of oceans and noninland seas limited by country or locality in —163–168; class biography regardless of area, region, place in —2; class comprehensive works in 001–999, without adding notation from Table 2

(Option: Class areas and regions limited by continent, country, locality in —1)

—3 Ancient world

Class a specific part of ancient world not provided for here in —4–9

Class comprehensive works on a specific jurisdiction extending over more than one country, province, or other unit and identified by * with the jurisdiction where noted in this table, e.g., Roman Empire —37. For works on a part of such a jurisdiction, see the specific unit where the part is located, e.g., Britain —361, Rome —3763

See Manual at T2-3; also at T2-4-9 vs. T2-3

(Option: Class specific parts in —4–9 as detailed below)

SUMMARY

| —31 | China to 420 |
|------------|--|
| <u>—32</u> | Egypt to 640 |
| -33 | Palestine to 70 |
| —34 | South Asia to 647 |
| —35 | Mesopotamia to 637 and Iranian Plateau to 637 |
| —36 | Europe north and west of Italian Peninsula to ca. 499 |
| —37 | Italian Peninsula to 476 and adjacent territories to 476 |
| —38 | Greece to 323 |
| —39 | Other parts of ancient world |

—31 China to 420

Add to base number —31 the numbers following —51 in —511–516, e.g., Sichuan Province —3138

(Option: Class in -51)

Egypt to 640

Add to base number —32 the numbers following —62 in —621–623, e.g., Alexandria —321, Giza, Memphis —322, Abydos, Karnak, Luxor, Thebes —323

See also —3948 for Sinai Peninsula

(Option: Class Egypt to 640 in —62; class lower Egypt to 640, Alexandria to 640 in —621; class Middle Egypt to 640, Giza, Memphis in —622; class upper Egypt to 640, Abydos, Karnak, Luxor, Thebes in —623)

-33 Palestine to 70

(Option: Class in -5694)

--334 Israel to 70

Add to base number —334 the numbers following —5694 in —56944–56949, e.g., Jerusalem —33442, Galilee —3345, Judah, Judaea —3349; however, for Darom district in Edom, see —39464; for Darom district in Arabia Petraea, see —3948

(Option: Class Israel to 70 in —5694; class Jerusalem district to 70 in —56944; class Jerusalem to 70 in —569442; class Tsafon district to 70, Galilee to 70 in —56945; class Haifa district to 70 in —56946; class Merkaz district to 70 in —56947; class Tel Aviv district to 70, Tel Aviv to 70 in —56948; class Darom district to 70, Judah, Judaea in —56949)

--335 Jordan to 70 and West Bank to 70

Subdivisions are added for Jordan to 70 and West Bank to 70 together, for Jordan to 70 alone

For Ma'dabā Province to 70, Karak Province to 70, Moab, see —39462; for Ṭafīlah Province to 70, 'Aqabah Province to 70, Edom, see —39464; for 'Aqabah Province to 622, Ma'ān Province to 622, Arabia Petraea in Jordan, Petra, see —3948

(Option: Class Jordan to 70 in —5695)

—335 1–335 5 West Bank to 70; Irbid Province to 70, 'Ajlūn Province to 70, Jarash Province to 70, Balqā' Province to 70

Add to base number —335 the numbers following —5695 in —56951-56955, e.g., Samaria —3353

(Option: Class West Bank to 70, Nablus district to 70, Samaria in —56953; class Irbid Province to 70 in —569542; class 'Ajlūn Province to 70 in —569546; class Jarash Province to 70 in —569548; class Balqā' Province to 70 in —56955)

—335 8 Amman Province to 70

(Option: Class in -56958)

-335 9 Zarqā' Province to 70 and Mafraq Province to 70

(Option: Class in —56959)

--335 93 Zarqā' province to 70

(Option: Class in —569593)

-335 97

Mafraq Province to 70

(Option: Class in -569597)

—34 South Asia to 647

Class here India to 647

Add to base number —34 the numbers following —54 in —541–549, e.g., western India —347, Indus River valley —3491; however, for Sri Lanka, see —5493; for Maldives, see —5495; for Nepal, see —5496; for Bhutan, see —5498

For southeast Asia, see -59

(Option: Class India to 647, South Asia to 647 in —54; class Pakistan to 647 in —5491; class Bangladesh to 647 in —5492)

—35 Mesopotamia to 637 and Iranian Plateau to 637

Class here *Assyria, *Chaldean Empire, *Persian Empire, *Sassanian Empire, *Seleucid Empire

Subdivisions are added for Mesopotamia and Iranian Plateau together; for Mesopotamia alone

Class central Asia in -396

(Option: Class in -- 567)

>

—352–355 Mesopotamia to 637

Class here Iraq to 637

Class comprehensive works in —35

-352

Kurdish Autonomous Region of Iraq to 637

(Option: Class in —5672)

--354

Upper Mesopotamia to 637

Including Upper Mesopotamian portion of Arabia Deserta to 637 [formerly —3947]; Ashur, Nineveh

(Option: Class in —5674)

--355

Lower Mesopotamia to 637

Including Lower Mesopotamian portion of Arabia Deserta to 637 [formerly —3947]; Babylon

Class here Akkad, Babylonia, Sumer, Ur

(Option: Class in —5675)

^{*}For a specific part of this jurisdiction, region, or feature, see the part and follow instructions under

-3

-357 Iranian Plateau to 637

Class here Iran to 637, Persia to 637

Add to base number —357 the numbers following —55 in —551–559, e.g., Media —3575, Ecbatana —35752, Elam, Susa —35766, Persis, Pasargadae, Persepolis —35772

See also -396 for Hyrcania

(Option: Class Iranian Plateau to 637, Iran to 637, Persia to 637 in —55; class Hamadān province to 637, Kordestān province to 637, Kermānshāhān province to 637, Īlām province to 637, Media in —555; class Hamadān province to 637, Ecbatana in —5552; class Khūzestān province to 637, Elam, Susa in —5566; class Fārs province to 637, Persis, Pasargadae, Persepolis in —5572)

—36 Europe north and west of Italian Peninsula to ca. 499

Including *western Mediterranean region to ca. 499

Class here *Europe to ca. 499, *western Europe to ca. 499

(Option: Class western Mediterranean region to ca. 499 in —18221; class Europe to ca. 499, Europe north and west of Italian Peninsula to ca. 499, western Europe to ca. 499 in —4)

—361 British Isles to 410

Class here United Kingdom to 410, Great Britain to 410

Add to base number —361 the numbers following —41 in notation 411–419 of this table, e.g., Border Country to 410 —36137, Ireland to 410 —3615

For England to 410 and Wales to 410, see —362

(Option: Class British Isles to 410, United Kingdom to 410, Great Britain to 410 in —41; class Scotland to 410, northern Britain to 410 in —411; class Ireland to 410 in —415; class Northern Ireland to 410 in —416; class Republic of Ireland to 410 in —417)

—362 England to 410 and Wales to 410

Class here Brittania (Roman province)

Add to base number —362 the numbers following —42 in notation 421–429 of this table, e.g., Chester —362714

Subdivisions are added for England and Wales together, for England alone

Class comprehensive works on British Isles in —361

(Option: Class England to 410, southern Britain to 410 in —42; class Wales to 410 in —429)

^{*}For a specific part of this jurisdiction, region, or feature, see the part and follow instructions under

—363 Germanic regions to 481 and Pannonia

Class here Germania Magna

Subdivisions are added for Germanic regions to 481 and Pannonia together, for Germanic regions to 481 alone

For British Isles, see —361; for Czech Republic and Slovakia, see —437; for Poland, see —438

(Option: Class Germanic regions to 481, Germany to 481, Germania Magna in —43)

Scandinavia to 481 relocated to —368; Germanic regions in Netherlands relocated to —36921; Alpine region cantons to 486, Raetia relocated to —36947

—363 1–363 6 Specific parts of Germanic regions to 481

Add to base number —363 the numbers following —43 in —431–436, e.g., Vindelicia —3633, Noricum —3636, Raetia in Austria —36364; however, for Austria, 476–481, see —436; for Liechtenstein, 476–481, see —43648

(Option: Class Bavaria to 481, Vindelicia in —433; class Austria to 476, Noricum in —436; class western Austria to 476, Raetia in Austria in —4364; class Liechtenstein to 476 in —43648)

—363 9 Pannonia [formerly —398]

Class here Hungary to ca. 640 [formerly -398]

(Option: Class in -439)

—364 Celtic regions to 486

Class here France to 486, Gaul (Gallia Transalpina)

Add to base number —364 the numbers following —44 in —441—444, e.g., Germania Superior —36439, Lugdunensis —3645, Aquitania —3647, Narbonensis —3648

For British Isles, see -361

See also -372 for Gallia Cisalpina

(Option: Class Celtic regions to 486, France to 486, Gaul [Gallia Transalpina] in —44; class Alsace to 486, Germania Superior in —4439; class central France to 486, Lugdunensis in —445; class southwestern France to 486, Aquitania in —447; class Languedoc-Roussillon to 486, Narbonensis in —448)

Netherlands to 486, Germania Inferior relocated to —3692; Belgium to 486, Belgica relocated to —3693; Luxembourg to 486 relocated to —36935; Switzerland to 486 relocated to —3694; Jura region cantons to 486, Helvetia relocated to —36943

-366 Iberian Peninsula to 415 and adjacent islands to 415

Class here Spain to 415, Tarraconensis

Subdivisions are added for Iberian Peninsula to 415 and adjacent islands to 415 together, for Iberian Peninsula to 415 alone

Add to base number —366 the numbers following —46 in —461-469, e.g., Baetica —3668, Lusitania —3669

(Option: Class Spain to 415, Iberian Peninsula to 415, Tarraconensis in —46; class Andalusia autonomous community to 415, Baetica in —468; class Portugal to 415, Lusitania in —469)

—368 Scandinavia to 481 [formerly —363]

Add to base number —368 the numbers following —48 in —481–489, e.g., Denmark —3689; however, for Finland, see —4897

(Option: Class Scandinavia to 481 in —48; class Norway to 481 in —481; class Sweden to 481 in —485; class Denmark to 481 in —489)

—369 Netherlands to 486, Belgium to 486, Luxembourg to 486, Switzerland to 486

Add to base number —369 the numbers following —49 in —492–494, e.g., Netherlands to 486, Germania Inferior —3692 [both formerly —364], Germanic regions in Netherlands —36921 [formerly —363], Belgium to 486, Belgica —3693 [both formerly —364], Luxembourg to 486—36935 [formerly —364], Switzerland to 486—3694 [formerly —363], Jura region cantons to 486, Helvetia —36943 [both formerly —364], Alpine region cantons to 486, Raetia —36947 [both formerly —363]

For Raetia in Austria, see —36364

(Option: Class Netherlands to 486, Germania Inferior in —492; class Belgium to 486, Belgica in —493; class Luxembourg to 486 in —4935; class Switzerland to 486 in —494; class Jura region cantons to 486, Helvetia in —4943; class Alpine region cantons to 486, Raetia in —4947)

—37 Italian Peninsula to 476 and adjacent territories to 476

The subdivisions of this table are based upon the territorial organization that was developed by Emperor Augustus at the end of the 1st century B.C. and lasted until the early 4th century A.D.

Class here *Mediterranean region to 476, *Roman Empire

Subdivisions are added for Italian Peninsula to 476 and adjacent territories to 476 together, for Italian Peninsula to 476 alone

(Option: Class Mediterranean region to 476 in —1822; class Italian Peninsula and adjacent territories to 476, Roman Empire in —45)

^{*}For a specific part of this jurisdiction, region, or feature, see the part and follow instructions under —3

Table 3. Subdivisions for the Arts, for Individual Literatures, for Specific Literary Forms

Notation from Table 3 is never used alone, but may be used as required by add notes under subdivisions of individual literatures or with base numbers for individual literatures identified by * under 810–890. It is never used for individual literatures that lack instructions to add from Table 3; the number for works of or about such literatures ends with the language notation, e.g., Newari poetry 895.49

Notation from Table 3 may also be used where instructed in 700.4, 791.4, 808–809

Table 3 is divided into three subtables:

Table 3A for description, critical appraisal, biography, single or collected works of an individual author

Table 3B for description, critical appraisal, biography, collected works of two or more authors; also for rhetoric in specific literary forms

Table 3C for additional elements used in number building within Table 3B and as instructed in 700.4, 791.4, 808–809

Turn to Table 3A or 3B for full instructions on building numbers for individual literatures, to 808–809 for other uses of Table 3B and 3C for literature, to 700.4 for uses of Table 3C for the arts, to 791.4 for uses of Table 3C for motion pictures, radio, television

See Manual at Table 3

Table 3A. Subdivisions for Works by or about Individual Authors

Procedures for building numbers for individual authors:

- 1. Look in the schedule 810–890 to find the base number for the language. The base number may be identified in an add note, e.g., at 821–828 ("add to base number 82") or another note, e.g., at 896 ("896.392 Swahili"); otherwise, it is the number given for the literature, e.g., Dutch-language literature 839.31. If there is a specific literary form, go to step 2; if not, go to the instructions under —8 in Table 3A
- 2. In Table 3A find the correct subdivision for the literary form, e.g., poetry —1. Add this to the base number, e.g., Swahili poetry 896.3921, Dutch poetry 839.311. If the literary form appears as a subdivision of —8 Miscellaneous writings, go to the instructions under —8 in Table 3A; otherwise, go to step 3
- 3. Turn back to the appropriate number in the schedule 810–890 to see whether there is an applicable period table. If there is one, go to step 4; if not, complete the class number by inserting a decimal point between the third and fourth digits, e.g., Khmer (Cambodian) poetry by a 20th-century author 895.9321
 - (Option: Where optional period tables are available for countries that share the same language, either [1] use initial letters to distinguish the separate countries, or [2] use the special number designated for literature of those countries that are not preferred. Then use the optional period tables, e.g., drama in English by a 20th-century New Zealand author NZ822.2 or 828.993322. Full instructions for optional period tables appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899. If the option is used, go to step 4)
 - (Option: Where optional period tables are not available for countries that share the same language, use initial letters to distinguish the separate countries. Then use the standard period table for the language if one is available. If a period table is available, go to step 4)
- 4. Select the appropriate period number. Add this number to the number already derived; always insert a point after the third digit. The class number is complete (*except* for William Shakespeare), since standard subdivisions are never added for individual authors, e.g., Spenser's *Faerie Queene* 821.3 (821 English poetry + 3 Elizabethan period)

See Manual at Table 3A; also at Table 3B vs. Table 3A; also at 800: Literary criticism

> —1-8 Specific forms

Unless other instructions are given, observe the following table of preference for works combining two or more literary forms, e.g., drama written in verse -2 (not -1):

| Drama | -2 |
|-------------------------------|----|
| Poetry | 1 |
| Class epigrams in verse in —8 | |
| Fiction | 3 |
| Essays | _4 |
| Speeches | 5 |
| Letters | 6 |
| Miscellaneous writings | —8 |

A single work of humor or satire, or a collection of humor or satire by an individual author in one form is classed with the form, e.g., satirical fiction—3. Humor or satire without identifiable form is classed according to the instructions at—8, plus notation 07 from the table under—81–89 if there is an applicable period table. A collection of humor or satire by an individual author in more than one form is classed according to the instructions at—8, plus notation 09 from the add table under—81–89 if there is an applicable period table

Class comprehensive works (description, critical appraisal, biography, or collected works that cover two or more forms of literature by an individual author) with the form with which the author is chiefly identified, e.g., a biography that discusses the poetry and fiction of a mid-19th-century American writer known primarily as a novelist 813.3

If the author is not chiefly identified with any one form, class comprehensive works as instructed at —8, plus notation 09 from the table under —81–89 if there is an applicable period table, e.g., the collected poetry and fiction of a mid-19th-century American writer not chiefly identified with any one form 818.309

See Manual at Table 3A

(Option: Class description, critical appraisal, biography, single and collected works of all individual authors regardless of form in —8)

—1 Poetry

Class epigrams in verse in —8

See Manual at T3A-2, T3B-2 vs. T3A-1, T3B-102

—11-19 Poetry of specific periods

Add to base number —1 notation from the period table for the specific literature in 810–890, e.g., earliest period —11; do not add standard subdivisions. If there is no applicable period table, add nothing to —1, e.g., Mongolian poetry by an author of the earliest period 894.231 (not 894.2311) (Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., poetry in English by an Australian author of the earliest period A821.1 or 828.993411)

—2 Drama

Class here closet drama, drama written in poetry

See Manual at T3A-2, T3B-2 vs. T3A-1, T3B-102

-21-29 Specific periods

Add to base number —2 notation from the period table for the specific literature in 810–890, e.g., earliest period —21; do not add standard subdivisions. If there is no applicable period table, add nothing to —2, e.g., Mongolian drama by an author of the earliest period 894.232 (not 894.2321) (Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., drama in English by a New Zealand author of the earliest period NZ822.1 or 828.993321)

-3 Fiction

Class here novels, novelettes, short stories

Class graphic novels in 741.5

—31–39 Specific periods

Add to base number —3 notation from the period table for the specific literature in 810–890, e.g., earliest period —31; do not add standard subdivisions. If there is no applicable period table, add nothing to —3, e.g., Mongolian fiction by an author of the earliest period 894.233 (not 894.2331) (Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., fiction in French by a Canadian author of the colonial period C843.3 or 848.99233)

—4 Essays

Texts, collections, discussions of works with literary value

See Manual at 800: Choice between literature and nonliterary subject

—41–49 Specific periods

Add to base number —4 notation from the period table for the specific literature in 810–890, e.g., earliest period —41; do not add standard subdivisions. If there is no applicable period table, add nothing to —4, e.g., Macedonian essays by an author of the earliest period 891.8194 (not 891.81941)

(Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., essays in Spanish by a 19th-century Mexican author M864.2 or 868.992142)

—5 Speeches

Texts, collections, discussions of works with literary value

See Manual at 800: Choice between literature and nonliterary subject

--51-59 Specific periods

Add to base number —5 notation from the period table for the specific literature in 810–890, e.g., earliest period —51; do not add standard subdivisions. If there is no applicable period table, add nothing to —5, e.g., Mongolian speeches by an author of the earliest period 894.235 (not 894.2351) (Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., speeches in Spanish by a 19th-century Chilean author Ch865.2 or 868.993352)

—6 Letters

Texts, collections, discussions of works with literary value

Class collections of the letters of an individual author as biography with the form with which the author is chiefly identified, e.g., letters of a mid-19th-century American known primarily as a novelist 813.3

See Manual at 800: Choice between literature and nonliterary subject

-61-69 Specific periods

Add to base number —6 notation from the period table for the specific literature in 810–890, e.g., earliest period —61; do not add standard subdivisions. If there is no applicable period table, add nothing to —6, e.g., Tibetan letters by an author of the earliest period 895.46 (not 895.461) (Option: Where two or more countries share the same language, follow one of the options given after step 3 at beginning of Table 3A, e.g., letters in Portuguese by a 20th-century Brazilian author B869.64 or 869.899264)

—8 Miscellaneous writings

Procedures for building numbers:

- 1. To the base number add notation 8, e.g., miscellaneous writings in English 828. Go to step 2 $\,$
- 2. Turn back to the appropriate number in the schedule 810–890 to see whether there is an applicable period table. If there is one, go to step 3; if not, complete the class number by inserting a decimal point between the third and fourth digits, e.g., miscellaneous writings in Khmer (Cambodian) by a 20th-century writer 895.9328

(Option: Where optional period tables are available for countries that share the same language, either [1] use initial letters to distinguish the separate countries, or [2] use the special number designated for literature of those countries that are not preferred. Then use the optional period tables, e.g., miscellaneous writings in English by a 20th-century New Zealand author NZ828.2 or 828.993382. Full instructions for optional period tables appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899. If the option is used, go to step 3)

(Option: Where optional period tables are not available for countries that share the same language, use initial letters to distinguish the separate countries. Then use the standard period table for the language if one is available. If a period table is available, go to step 3)

3. Select the appropriate period number, e.g., the Victorian period in the English literature of Great Britain 8. Then follow the instructions under —81–89

(Option: Class here description, critical appraisal, biography, single and collected works of all individual authors regardless of form; prefer —1–8)

—81–89 Specific periods

Add to base number —8 notation from the period table for the specific literature in 810–890, e.g., earliest period —81; then add further as follows, but in no case add standard subdivisions:

O2 Anecdotes, epigrams, graffiti, jokes, jests, quotations, riddles, tongue twisters

Class anonymous riddles from the oral tradition in 398.6; class anonymous jokes and jests from the oral tradition in 398.7; class anonymous tongue twisters from the oral tradition in 398.8

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07; also at T3A—8 + 02, T3B—802, T3B—8 + 02 vs. 398.6, 793.735

03 Diaries, journals, notebooks, reminiscences

See Manual at T3A-8+03 and T3B-803, T3B-8+03

07 Works without identifiable literary form

Class here experimental and nonformalized works, works that mimic nonliterary forms and genres for literary purposes, not conveying useful information (e.g., humorous or fantasy works in the form of dictionaries, self-help books, travel guides)

Class experimental works with an identifiable literary form with the form, e.g., experimental novels —3; class works without identifiable literary form that are linked with a specific literary work with the work, e.g., a history of an imaginary game associated with a specific novel with the novel in —3; class works that convey useful information on a nonliterary topic with the topic even if linked with a specific literary work, e.g., literary cookbooks with real recipes inspired by or derived from literary sources 641.5

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07

08 Prose literature

Collections or discussions of works in more than one prose form

Class here collections and criticism of selected prose works of an individual author that do not include the author's main literary form, e.g., a collection of the prose works of an English Victorian poet 828.808, a collection of the stories and plays of an English essayist of the romantic period 828.708 Class prose without identifiable literary form in 07. Class a specific form of prose literature with the form, e.g., essays—4; class comprehensive collections or criticisms of an author's work with the the author's main literary number, either with the predominant literary form or in 09 for individual authors not limited to or chiefly identifiable with one specific form, e.g., a comprehensive collection of the works of an English Victorian writer known primarily as a novelist 823.8

09 Individual authors not limited to or chiefly identifiable with one specific form

Class here description, critical appraisal, biography, collected works

(continued)

---81-89 Specific periods (continued)

If there is no applicable period table, add nothing to —8, e.g., Mongolian prose literature by an author of the later 20th century 894.238 (*not* 894.23808)

(Option: Where two or more countries share the same language, follow one of the options given after step 2 under —8, e.g., prose literature in English by an Indian author of the later 20th century In828.308 or 828.99358308)

Table 3B. Subdivisions for Works by or about More than One Author

Table 3B is followed and supplemented by Table 3C, which provides additional elements for building numbers within Table 3B

Procedures for building numbers for works by or about more than one author, limited to literatures of specific languages:

- 1. Look in the schedule 810–890 to find the base number for the language. The base number may be identified in an add note, e.g., at 821–828 ("add to base number 82") or another note, e.g., at 896 ("896.392 Swahili"); otherwise, it is the number given for the literature, e.g., Dutch-language literature 839.31. If there is a specific literary form, go to step 2; if not, go to step 8
- 2. In Table 3B find the subdivision for the literary form, e.g., poetry —1. Add this to the base number, e.g., English poetry 821, Dutch poetry 839.311. If the literary form appears as a subdivision of —8 Miscellaneous writings, go to the instructions under —8 in Table 3B. If the work deals with poetry, drama, fiction, or speech of specific media, scope, kinds for which there is special notation in Table 3B (e.g., —1042 sonnets), go to step 3. For other works that deal with or fall within a limited time span, go to step 4. A limited time span is (1) fewer than three literary periods or (2) a single century. For other works not limited by time period, go to step 7
- 3. Use the notation in Table 3B for the kind of poetry, drama, fiction, or speech, e.g., sonnets in English literature 821.042. Insert a point after the third digit. Check whether the specific form is (1) the sole kind in a heading identified by * or (2) is named in a subdivisions-are-added note as a kind for which subdivisions may be added or (3) appears in a class-here note under a heading identified by *. If none of these conditions holds, the number is complete, e.g., collections of English-language clerihews 821.07

If one of the three conditions does hold, follow the instructions in the table under —102–107 in Table 3B. Following these instructions will involve using Table 3C for literature of specific periods, literature displaying specific features or emphasizing specific subjects, and literature for and by groups of people, e.g., collections of English sonnets 821.04208, collections of English sonnets about love 821.042083543

(continued)

Table 3B. Subdivisions for Works by or about More than One Author (continued)

4. Turn back to the appropriate number in the schedule 810–890 to see whether there is an applicable period table. If there is one, go to step 5; if not, complete the class number by inserting a point between the third and fourth digits, e.g., Khmer (Cambodian) poetry by 20th-century authors 895.9321

(Option: Where optional period tables are available for countries that share the same language, either [1] use initial letters to distinguish the separate countries, or [2] use the special number designated for literature of those countries that are not preferred. Then use the optional period tables, e.g., 20th-century drama in English by New Zealand authors NZ822.2 or 828.993322. Full instructions for optional period tables appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899. If the option is used, go to step 5)

(Option: Where optional period tables are not available for countries that share the same language, use initial letters to distinguish the separate countries. Then use the standard period table for the language if one is available. If a period table is available, go to step 5)

- 5. Select the appropriate period number. Add this number to the number already derived, e.g., English poetry of the Elizabethan period 821.3; always insert a decimal point after the third digit. Go to step 6
- 6. Under the number for the literary form in Table 3B, go to the subdivisions for specific periods, e.g., under —2 for drama go to —21–29. Follow the instructions given there, which will lead to adding the numbers following —10 in notation 1001–1009 of this table. For literature displaying specific features, literature emphasizing subjects, and literature for and by groups of people, the instructions at —1001–1009 will lead to use of Table 3C, e.g., critical appraisal of idealism in English Elizabethan drama 822.30913
- 7. If the work is not limited by time period, go to the first subdivisions under the particular form in Table 3B, e.g., under —2 for drama go to —2001–2009. Follow the instructions given there to add the numbers following —100 in notation 1001–1009 of this table. For literature displaying specific features, literature emphasizing subjects, and literature for and by groups of people, the instructions at —1001–1009 will lead to use of Table 3C, e.g., collections of English poetry about war 821.00803581, collections of English poetry by rural authors 821.008091734

(continued)

Table 3B. Subdivisions for Works by or about More than One Author (continued)

8. If the work is not limited to a specific literary form, consult —01–09 in Table 3B. Follow the instructions at the number selected, making use of Table 3C when specified, e.g., collections of English literature in many forms about holidays 820.80334. Use period notation 08001–08009 and —09001–09009 only if there is an applicable period table

(Option: Where optional period tables are available for countries that share the same language, either [1] use initial letters to distinguish the separate countries, or [2] use the special number designated for literature of those countries that are not preferred. Then use the optional period tables, e.g., 20th-century drama in English by New Zealand authors NZ822.2 or 828.993322. Full instructions for optional period tables appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899)

(Option: Where optional period tables are not available for countries that share the same language, use initial letters to distinguish the separate countries. Then use the standard period table for the language if one is available)

The procedures described above require the use of schedule 810–890, Table 3B, and Table 3C in varying order. Sometimes also other tables are used. Example:

- 82 English (810–890) 1 poetry (Table 3B)
- 914 of later 20th century (810–890)
- 080 collections (Table 3B)
- 32 about travel (Table 3C)
- 4253 Lincolnshire (Table 2)

Thus, collections of later-20th-century English-language poetry about travel in Lincolnshire 821.914080324253

Note that literary form —8 Miscellaneous writings is arranged first by period and then by specific miscellaneous forms

Instructions in the use of notation from Table 3B for rhetoric in specific literary forms, collections of literary texts from more than two literatures, and history, description, critical appraisal of more than two literatures are found in 808–809

See Manual at Table 3B; also at Table 3B vs. Table 3A; also at 800

SUMMARY

| 01-09 | [Standard subdivisions; collections of literary texts in more than one form; history, description, critical appraisal of works in more than one form] |
|-----------|---|
| —1 | Poetry |
| —2 | Drama |
| —3 | Fiction |
| —4 | Essays |
| _5 _6 | Speeches |
| —6 | Letters |
| <u>_7</u> | Humor and satire |
| 8 | Miscellaneous writings |

--01-07 Standard subdivisions

Standard subdivisions are used for general works consisting equally of literary texts and history, description, critical appraisal, e.g., a serial consisting equally of literary texts and history, description, critical appraisal of a variety of literature in English 820.5. Works limited to specific topics found in Table 3C are classed in —08, plus notation from Table 3C

Class collections of literary texts in -08; class history, description, critical appraisal in -09

—08 Collections of literary texts in more than one form

Do not use for groups of people; class in —0808–0809

Class history, description, critical appraisal of a specific literature in —09

See Manual at T3B-08 and T3B-09

---080 001--080 008

Standard subdivisions

---080 009

History and geographic treatment

---080 009 01--080 009 05

Historical periods

Do not use for literature of a specific language; class in —08001–08009

---080 01--080 09

Specific periods

Add to base number —080 notation from the period table for the specific literature, e.g., earliest period —08001. If there is no applicable period table, this provision for indicating period cannot be used, e.g., collection of 20th-century literary works in Amharic 892 8708

Works consisting equally of literary texts and history, description, critical appraisal of a specific literature are classed here if limited to specific periods, e.g., texts and criticism of 19th-century English-language literary works 820.8008

---080 1--080 9

Literature displaying specific features, or emphasizing subjects, or for and by groups of people

Add to base number —080 notation 1–9 from Table 3C, e.g., collections of literary texts about holidays —080334

Works consisting equally of literary texts and history, description, critical appraisal of a specific literature are classed here if limited to specific topics found in Table 3C, e.g., texts and criticism of English-language literary works about war 820.803581

—09 History, description, critical appraisal of works in more than one form

Notation —09 from Table 1 as modified below

Do not use for geographic treatment; class in -090009

Class here collected biography of authors, individual and collected biography of critics

See Manual at T3B-08 and T3B-09

---090 001--090 008

Standard subdivisions

-090 009

Geographic treatment

Do not use for history without subdivision, biography; class in —09. Do not use for historical periods; class in —09001–09009

---090 009 3--090 009 9

Specific continents, countries, localities

Do not use for literature for and by residents of specific continents countries, localities; class in —0993–0999

---090 01--090 09

Literature from specific periods

Add to base number —0900 notation from the period table for the specific literature, e.g., earliest period —09001. If there is no applicable period table, this provision for indicating period cannot be used, e.g., history of early Cornish literature 891.6709

(Option: Use notation from an optional period table, e.g., history of literature in Spanish by Chilean authors of early 20th century Ch860.90042 or 868.9933090042; prefer —0993–0999, e.g., history of literature in Spanish by Chilean authors 860.9983, history of literature in Spanish by Chilean authors of early 20th century 860.998309041. Full instructions appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, and 869.899)

See Manual at T3B-091-099 vs. T3B-09001-09009

--[090 1-090 9]

Historical periods

Do not use; class in --- 09001-09009

-091-099

Literature displaying specific features or emphasizing subjects, and for and by groups of people

Add to base number —09 notation 1–9 from Table 3C, e.g., history and description of literature on Faust —09351, history of literature in Spanish by Chilean authors 860.9983, history of literature in Spanish by Chilean authors of early 20th century 860.998309041

See Manual at T3B-091-099 vs. T3B-09001-09009

(Option: Class literature from specific periods in —09001–09009, using notation from an optional period table)

> —1–8 Specific forms

Unless other instructions are given, observe the following table of preference for works combining two or more literary forms, e.g., poetic drama —2 (*not* —1):

| Drama | 2 |
|-------------------------------|---------------|
| Poetry | 1 |
| Class epigrams in verse in —8 | |
| Fiction | 3 |
| Essays | -4 |
| Speeches | 5 |
| Letters | 6 |
| Miscellaneous writings | 8 |
| Humor and satire | <u>7</u> |

Class comprehensive works on prose literature in —808. Class comprehensive works on two or more forms with the base number for the individual literature, plus notation 01–09 from Table 3B if applicable, adding 0 when required to make a three-figure number, e.g., comprehensive works on English poetry and fiction 820

—1 Poetry

Including greeting card verse

Class here folk poetry, prose poems

Class anonymous nursery rhymes and related rhymes and rhyming games from the oral tradition in 398.8

See Manual at T3B-1

--100 1-100 7 Standard subdivisions

Standard subdivisions are used for general works consisting equally of literary texts and history, description, critical appraisal, e.g., a serial consisting equally of literary texts and history, description, critical appraisal of poetry in English 821.005. Works limited to specific topics found in Table 3C are classed in —100801–100809

Class collections of literary texts in —1008; class history, description, critical appraisal in —1009

—100 8 Collections of literary texts

Do not use for groups of people; class in —100808-100809

General works consisting equally of literary texts and history, description, critical appraisal are classed in —1001–1007, in the number for the specific form, or the specific form plus literary period. Works limited to specific topics found in Table 3C are classed in —100801–100809

-100 800 1-100 800 7

Standard subdivisions

-[1008008]

Groups of people

Do not use; class in -100808-100809

| [100 800 9] | History, geographic treatment, biography |
|--------------------|---|
| | Do not use for collections by and for persons resident in specific areas; class in —100809. Do not use for history, description, critical appraisal; class in —1009 |
| 100 801-100 809 | Collections of literary texts displaying specific features or emphasizing specific subjects, for and by specific groups of people |
| | Add to base number —10080 notation 1–9 from Table 3C, e.g., collections of poetry dealing with travel —1008032 |
| | Works consisting equally of literary texts and history, description, critical appraisal are classed here if limited to specific topics found in Table 3C |
| 100 9 | History, description, critical appraisal |
| | Notation —09 from Table 1 as modified below |
| | Do not use for geographic treatment; class in -10099 |
| | Class here collected biography of authors, individual and collected biography of critics |
| | Follow the instructions under —1008 for works consisting equally of literary texts and history, description, critical appraisal |
| —100 901–100 907 | Standard subdivisions |
| — [100 908] | Groups of people |
| | Do not use; class in —10098-10099 |
| — [100 909] | History, geographic treatment, biography |
| | Do not use for history, biography; class in —1009. Do not use for geographic treatment; class in —10099 |
| —100 91–100 99 | History, description, critical appraisal of poetry displaying specific features or emphasizing specific subjects, for and by specific groups of people |
| | Add to base number —1009 notation 1–9 from Table 3C, e.g., critical appraisal of poetry by children —10099282 |

—102–107 Specific kinds of poetry

Limited to the kinds provided for below

Except for modifications shown under specific entries, add to each subdivision identified by * as follows:

01 - 07Standard subdivisions

> Standard subdivisions are used for general works consisting equally of literary texts and history, description, critical appraisal, e.g., a serial consisting equally of literary texts and history, description, critical appraisal of narrative poetry in English —10305. Works limited to specific topics found in Table 3C are classed in 08, plus notation from Table 3C Class collections of literary texts in 08; class history,

description, critical appraisal in 09

Collections of literary texts 08

08001-08008 Standard subdivisions

08009 History and geographic treatment

0800901-0800905 Historical periods

> Do not use for literature of a specific language; class in 0801–0809

0801-0809 Specific periods

> Add to 080 notation from the period table for the specific literature, e.g., Elizabethan period of English literature 0803, collections of English sonnets of the Elizabethan period 821.0420803. If there is no applicable period table, this provision for indicating period cannot be used, e.g., collection of 20th-century Slovak narrative poetry 891.8710308

Works consisting equally of literary texts and history, description, critical appraisal of a specific literature are classed here if limited to specific periods, e.g., texts and criticism of English sonnets of the Elizabethan period 821.0420803

081-089

Literature displaying specific features, or emphasizing subjects, or for and by groups of people

Add to 08 notation 1–9 from Table 3C, e.g., collections dealing with love 083543, collections of English sonnets

dealing with love 821.042083543

Works consisting equally of literary texts and history, description, critical appraisal of the form in a specific kind are classed here if limited to specific topics found in Table 3C, e.g., texts and criticism of narrative poems about war

-103083581

09 History, description, critical appraisal Class here collected biography

09001-09008 Standard subdivisions

09009

History and geographic treatment 0900901-0900905

Historical periods

Do not use for literature of a specific language: class in 0901–0909

(continued)

—102–107 Specific kinds of poetry (continued) > 0901-0909 Specific periods Add to 090 notation from the period table for the specific literature, e.g., Elizabethan period of English literature 0903, collections of English sonnets of the Elizabethan period 821.0420903. If there is no applicable period table, this provision for indicating period cannot be used, e.g., history and criticism of 20th-century Pashto (Afghan) lyric poetry 891.59310409 Follow the instructions under 0801-0809 for works consisting equally of literary texts and history, description, critical appraisal 091-099 Literature displaying specific features, or emphasizing subjects, or for and by groups of people Add to 09 notation 1–9 from Table 3C, e.g., critical appraisal of works about seasons 0933, critical appraisal of French lyric poetry about seasons 841.040933 Follow the instructions under 081–089 for works consisting equally of literary texts and history, description, critical appraisal Class epigrams in verse in —8; class comprehensive works in —1 See Manual at T3B-102-107, T3B-205, T3B-308 vs. T3C-1, T3C-3 --102*Dramatic poetry Including dramatic monologues See also --- 2 for poetic plays See Manual at T3A-2, T3B-2 vs. T3A-1, T3B-102 -103*Narrative poetry Including fabliaux For ballads, see -1044

--103 2

*Epic poetry

-1033

*Medieval metrical romances

See also —3 for prose versions of medieval romances

--104

*Lyric and balladic poetry

Including concrete poetry

Class here poetry of minnesingers and troubadours

Subdivisions are added for lyric and balladic poetry together, for lyric poetry alone

Class dramatic lyric poems in —102

^{*}Add as instructed under —102-107

| 104 1 | *Haiku |
|-------|---|
| 104 2 | *Sonnets |
| 104 3 | *Odes |
| 104 4 | *Ballads |
| 105 | *Didactic poetry |
| 107 | *Humorous and satirical poetry |
| | Including clerihews |
| | Class here light verse |
| | Subdivisions are added for either or both topics in heading |

—107 5 *Limericks

—11–19 Poetry of specific periods

and prose, in -7

Add to base number —1 notation from the period table for the specific literature in 810–890, e.g., earliest period —11; then add the numbers following —10 in notation 1001–1009 of this table, e.g., collections from the earliest period dealing with travel —1108032

Class humor and satire in two or more literary forms, including both verse

If there is no applicable period table, add nothing to —1, e.g., collections of Mongolian poetry by authors of the earliest period 894.231 (*not* 894.231108)

Class specific kinds of poetry from specific periods in —102–107

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of poetry in English by Australian authors of the earliest period A821.108 or 828.99341108)

—2 Drama

>

Class here closet drama, drama written in poetry, folk drama

See Manual at T3B-2; also at T3A-2, T3B-2 vs. T3A-1, T3B-102

—200 1–200 9 Standard subdivisions; collections; history, description, critical appraisal

Add to base number -200 the numbers following -100 in notation 1001-1009 of this table, e.g., collections of drama dealing with travel -2008032

-202-205 Drama of specific media, scope, kinds

Add to each subdivision identified by * as instructed under —102–107, e.g., collections of comedies dealing with travel —205230832

Class comprehensive works in —2

^{*}Add as instructed under —102-107

| > | 202-203 Drama for mass media |
|---------|---|
| | Class comprehensive works in —2 |
| 202 | Drama for radio and television |
| 202 2 | *Drama for radio |
| 202 5 | *Drama for television |
| 203 | *Drama for motion pictures |
| 204 | Drama of restricted scope |
| | Class drama of restricted scope for mass media in -202-203 |
| 204 1 | *One-act plays |
| | Including interludes, sketches |
| 204 5 | *Monologues |
| 205 | Specific kinds of drama |
| | Limited to the kinds provided for below |
| | Including masques |
| | Class specific kinds of drama for mass media in —202–203; class specific kinds of drama of restricted scope in —204 |
| | See Manual at T3B—102–107, T3B—205, T3B—308 vs. T3C—1, T3C—3 |
| —205 1 | *Serious drama |
| | Class here No plays |
| 205 12 | *Tragedy |
| | Class tragicomedy in —20523 |
| 205 14 | *Historical drama |
| -205 16 | *Religious and morality plays |
| | Not limited to medieval plays |
| | Class here miracle, mystery, passion plays |
| | Subdivisions are added for either or both topics in heading |
| 205 2 | *Comedy and melodrama |
| 205 23 | *Comedy |
| | Including tragicomedy |
| | Class humor and satire in two or more literary forms, including both verse and prose, in —7 |

^{*}Add as instructed under —102-107

---205 232

*Farce

-205 27

*Melodrama

Including modern detective and mystery (suspense) drama

-205 7

*Variety drama

-21-29 Drama of specific periods

Add to base number —2 notation from the period table for the specific literature in 810–890, e.g., earliest period —21; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of drama of earliest period —2109

If there is no applicable period table, add nothing to —2, e.g., collections of Mongolian drama by authors of the earliest period 894.232 (*not* 894.232108)

Class drama of specific media, scope, kinds from specific periods in —202-205

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of drama in English by New Zealand authors of the earliest period NZ822.108 or 828.99332108)

—3 Fiction

Class here novelettes and novels

Class graphic novels in 741.5

See Manual at T3B-3

---300 1-300 9

Standard subdivisions; collections; history, description, critical appraisal

Add to base number —300 the numbers following —100 in notation 1001–1009 of this table, e.g., collections of fiction dealing with travel —3008032

>

-301-308 Fiction of specific scope and kinds

Add to each subdivision identified by * as instructed under —102–107, e.g., collections of short stories dealing with travel —3010832

Class comprehensive works in —3

-301

*Short stories

Class short stories of specific kinds in —308

| 308 | Specific kinds of fiction |
|-------------------|--|
| | Limited to the kinds provided for below |
| | Unless other instructions are given, observe the following table of preference, e.g., historical adventure fiction —3081 (<i>not</i> —3087): |
| | Autobiographical and biographical fiction —3082 Historical and period fiction —3081 Adventure fiction —3087 Love and romance —3085 Psychological, realistic, sociological fiction —3083 |
| | See Manual at T3B—102–107, T3B—205, T3B—308 vs. T3C—1, T3C—3 |
| 308 1 | *Historical and period fiction |
| | Subdivisions are added for either or both topics in heading |
| | Class alternative histories in —308768 |
| 308 2 | *Autobiographical and biographical fiction |
| | Subdivisions are added for either or both topics in heading |
| 308 3 | *Psychological, realistic, sociological fiction |
| | Subdivisions are added for any or all topics in heading |
| —308 5 | *Love and romance |
| | Modern romantic fiction |
| | Subdivisions are added for either or both topics in heading |
| | Class medieval prose romances in —3 |
| 308 7 | *Adventure fiction |
| | Unless other instructions are given, observe the following table of preference, e.g., Gothic horror fiction —308729 (<i>not</i> —308738): |
| | Alternative histories -308768 Science fiction -308762 Gothic fiction -308729 Western fiction -30874 Detective, mystery, suspense, spy fiction -30872 (except -308729) -308733 Horror fiction -308738 Fantasy fiction -308766 Picaresque fiction -30877 |
| 200.72 | -1 |
| 308 72 | *Detective, mystery, suspense, spy, Gothic fiction |

suspense fiction alone, for spy fiction alone

Subdivisions are added for a combination of two or more topics in heading, for detective fiction alone, for mystery fiction alone, for

^{*}Add as instructed under —102-107

| 308 729 | *Gothic fiction |
|----------|--|
| | Class modern romantic fiction in which the supernatural has little or no role in -3085 |
| 308 73 | *Ghost and horror fiction |
| -308 733 | *Ghost fiction |
| 308 738 | *Horror fiction |
| 308 74 | *Western fiction |
| 308 76 | *Science and fantasy fiction, alternative histories |
| 308 762 | *Science fiction |
| —308 766 | *Fantasy fiction |
| 308 768 | *Alternative histories |
| | Class historical and period fiction in —3081 |
| 308 77 | *Picaresque fiction |
| 31-39 | Fiction of specific periods |

Add to base number —3 notation from the period table for the specific literature in 810–890, e.g., earliest period —31; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of fiction of earliest period —3109

If there is no applicable period table, add nothing to —3, e.g., collections of Mongolian fiction by authors of the earliest period 894.233 (not 894.233108)

Class specific scope and kinds from specific periods in —301–308

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of fiction in French by Canadian authors of the earliest period C843.108 or 848.9923108)

-4 Essavs

Collections or discussions of works with literary value

See Manual at 800: Choice between literature and nonliterary subject

-400 1-400 9 Standard subdivisions; collections; history, description, critical appraisal

> Add to base number —400 the numbers following —100 in notation 1001–1009 of this table, e.g., collections of essays dealing with travel -4008032

^{*}Add as instructed under —102-107

-41-49 Essays of specific periods

Add to base number —4 notation from the period table for the specific literature in 810–890, e.g., earliest period —41; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of essays of the earliest period —4109

If there is no applicable period table, add nothing to —4, e.g., collections of Mongolian essays by authors of the earliest period 894.234 (*not* 894.234108)

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of essays in Spanish by Mexican authors of the 19th century M864.208 or 868.99214208)

-5 Speeches

Collections or discussions of works with literary value

See Manual at 800: Choice between literature and nonliterary subject

--500 1-500 9

Standard subdivisions; collections; history, description, critical appraisal

Add to base number —500 the numbers following —100 in notation 1001–1009 of this table, e.g., collections of speeches dealing with travel —5008032

> —501–506 Specific kinds of speeches

Limited to the kinds provided for below

Add to each subdivision identified by * as instructed under —102–107, e.g., collections of recitations dealing with travel —5040832

Class comprehensive works in —5

-501 *Public speeches (Oratory)

Including after-dinner, platform, television speeches; speeches and toasts for special occasions

For debates, see -503

—503 *Debates

Class here public discussion of opposing views

—504 *Recitations

—505 *Texts for choral speaking

—506 *Conversations

^{*}Add as instructed under —102-107

---51--59 Speeches of specific periods

Add to base number —5 notation from the period table for the specific literature in 810–890, e.g., earliest period —51; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of speeches of the earliest period —5109

If there is no applicable period table, add nothing to —5, e.g., collections of Mongolian speeches by authors of the earliest period 894.235 (*not* 894.235108)

Class specific kinds from specific periods in -- 501-506

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of speeches in Spanish by Chilean authors of the 19th century Ch865.208 or 868.99335208)

—6 Letters

Collections or discussions of works with literary value

See Manual at 800: Choice between literature and nonliterary subject

--600 1-600 9

Standard subdivisions; collections; history, description, critical appraisal

Add to base number —600 the numbers following —100 in notation 1001–1009 of this table, e.g., collections of letters dealing with travel —6008032

—61–69 Letters of specific periods

Add to base number —6 notation from the period table for the specific literature in 810–890, e.g., earliest period —61; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of letters of the earliest period —6109

If there is no applicable period table, add nothing to —6, e.g., collections of Tibetan letters by authors of the earliest period 895.46 (*not* 895.46108)

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of letters in Portuguese by Brazilian authors of the 20th century B869.6408 or 869.89926408)

—7 Humor and satire

Limited to collections and criticism of works in two or more literary forms including both verse and prose

Class here parody

Subdivisions are added for either or both topics in heading

See also —808 for humor and satire in two or more prose forms

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07

(Option: Give precedence to humor and satire over all other literary forms)

Standard subdivisions; collections; history, description, critical appraisal

Add to base number -700 the numbers following -100 in notation 1001-1009 of this table, e.g., collections of humor and satire dealing with travel -7008032

—71–79 Humor and satire of specific periods

Add to base number —7 notation from the period table for the specific literature in 810–890, e.g., earliest period —71; then add the numbers following —10 in notation 1001–1009 of this table, e.g., critical appraisal of humor and satire of the earliest period —7109

If there is no applicable period table, add nothing to —7, e.g., collections of Turkmen humor and satire by authors of the earliest period 894.3647 (*not* 894.3647108)

(Option: Where two or more countries share the same language, follow one of the options given after step 4 at beginning of Table 3B, e.g., collections of humor and satire in English by Australian authors of the earliest period A827.108 or 828.99347108)

—8 Miscellaneous writings

Procedures for building numbers:

- 1. To the base number for the literature add notation 8, e.g., miscellaneous writings in English 828. If the work covers a limited time span (fewer than three literary periods, unless a single century spans three periods, then a single century), go to step 2; if not, go to step 4
- 2. Turn back to the appropriate number in the schedule 810–890 to see whether there is an applicable period table. If there is one, go to step 3; if not, go to step 4 (Option: Where optional period tables are available for countries that share the same language, either [1] use initial letters to distinguish the separate countries, or [2] use the special number designated for literature of those countries that are not preferred. Then use the optional period tables, e.g., miscellaneous writings in English by 20th-century New Zealand authors NZ828.2 or 828.993382. Full instructions for optional period tables appear under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899. If the option is used, go to step 3) (Option: Where optional period tables are not available for countries that share the same language, use initial letters to distinguish the separate countries. Then use the standard period table for the language if one is available. If a period table is available, go to step 3)
- 3. Select the appropriate period number, e.g., the Victorian period in English literature 8. Then follow the instructions under —81–89
- 4. If the work does not cover a limited time period, or if there is no applicable period table, consider whether the work is limited to one of the forms of miscellaneous writing listed in —802–808. If it is limited to one of those forms, go to step 5; if not, complete the class number by inserting a decimal point between the third and fourth digits, e.g., miscellaneous writings in Russian from many time periods 891.78, miscellaneous writings in Khmer (Cambodian) by 20th-century authors 895.9328
- 5. Class the work in the appropriate number from the span —802–808, then complete the number by inserting a point between the third and fourth digits, e.g., prose literature in Russian from many time periods 891.7808, prose literature in Khmer (Cambodian) by 20th-century authors 895.932808

See Manual at Table 3B: Number building

---800 1--800 9

Standard subdivisions; collections; history, description, critical appraisal

Add to base number —800 the numbers following —100 in notation 1001–1009 of this table, e.g., critical appraisal of miscellaneous writings from more than one period —8009

---802-808 Specific kinds of miscellaneous writings

Limited to kinds provided for below

Class in each number without further subdivision history, description, critical appraisal, biography, collections of works of authors from more than one period

Class comprehensive works in —8

---802

Anecdotes, epigrams, graffiti, jokes, jests, quotations, riddles, tongue twisters

Standard subdivisions are added for any or all topics in heading

Class humor and satire in two or more literary forms, including both verse and prose, in —7; class anonymous riddles from the oral tradition in 398.6; class anonymous jokes and jests from the oral tradition in 398.7; class anonymous tongue twisters from the oral tradition in 398.8

See Manual at T1--0207 vs. T3B--7, T3A-8 + 02, T3B-802, T3B-8 + 02, T3A-8 + 07, T3B-807, T3B-8 + 07; also at T3A-8 + 02, T3B-802, T3B-8 + 02 vs. 398.6, 793.735

---803

Diaries, journals, notebooks, reminiscences

Standard subdivisions are added for any or all topics in heading

Class interdisciplinary collections of diaries in 900. Class diaries, journals, notebooks, reminiscences of nonliterary authors with the appropriate subject, e.g., diary of an astronomer 520.92

See Manual at T3A-8+03 and T3B-803, T3B-8+03

---807

Works without identifiable literary form

Class here experimental and nonformalized works, works that mimic nonliterary forms and genres for literary purposes, not conveying useful information (e.g., humorous or fantasy works in the form of dictionaries, self-help books, travel guides)

Class experimental works with an identifiable literary form with the form, e.g., experimental novels —3; class works that convey useful information on a nonliterary topic with the topic, e.g., literary cookbooks with real recipes inspired by or derived from literary sources 641.5

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07

--808

Prose literature

Collections and discussions of works in more than one literary form

Class prose without identifiable literary form in —807. Class a specific form of prose literature with the form, e.g., essays —4

-81-89 Miscellaneous writings of specific periods

Add to base number —8 notation from the period table for the specific literature in 810–890, e.g., earliest period —81; then add further as follows:

001–009 Standard subdivisions; collections; history, description, critical appraisal

Add to 00 the numbers following —100 in notation 1001–1009 from Table 3B, e.g., collections 008

O2 Anecdotes, epigrams, graffiti, jokes, jests, quotations, riddles, tongue twisters

Add to 02 the numbers following —10 in notation 1001–1009 from Table 3B, e.g., collections 0208

Subdivisions are added for any or all topics in heading Class humor and satire in two or more literary forms, including both verse and prose, in —7; class anecdotes, epigrams, graffiti, jokes, jests, quotations, riddles, tongue twisters from specific periods in —802 if there is no applicable period table; class anonymous riddles from the oral tradition in 398.6; class anonymous jokes and jests from the oral tradition in 398.7; class anonymous tongue twisters from the oral tradition in 398.8

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07; also at T3A—8 + 02, T3B—802, T3B—8 + 02 vs. 398.6, 793.735

Diaries, journals, notebooks, reminiscences

Add to 03 the numbers following —10 in notation 1001–1009 from Table 3B, e.g., collections 0308

Subdivisions are added for any or all topics in heading Class diaries, journals, notebooks, reminiscences from specific periods in —803 if there is no applicable period table See Manual at T3A—8 + 03 and T3B—803, T3B—8 + 03

07 Works without identifiable literary form

Class here experimental and nonformalized works, works that mimic nonliterary forms and genres for literary purposes, not conveying useful information (e.g., humorous or fantasy works in the form of dictionaries, self-help books, travel guides)

Add to 07 the numbers following —10 in notation 1001–1009 from Table 3B, e.g., collections of stream of consciousness writings 0708025

Class works without identifiable literary form from specific periods in —807 if there is no applicable period table. Class experimental works with an identifiable literary form with the form, e.g., experimental novels —3; class works that convey useful information on a nonliterary topic with the topic, e.g., literary cookbooks with real recipes inspired by or derived from literary sources 641.5

See Manual at T1—0207 vs. T3B—7, T3A—8 + 02, T3B—802, T3B—8 + 02, T3A—8 + 07, T3B—807, T3B—8 + 07

(continued)

-81-89 Miscellaneous writings of specific periods (continued)

08 Prose literature

Collections and discussions of works in more than one literary

Add to 08 the numbers following —10 in notation 1001–1009

from Table 3B, e.g., collections 0808

Class prose without identifiable literary form in 07. Class a specific form of prose literature with the form, e.g., essays —4

Class prose literature from specific periods in —808, e.g., collections of 20th-century Albanian prose literature 891.991808

(Option: Use the notation from an optional period table with either option given after step 2 under —8 in Table 3B, e.g., prose literature in English by Australian authors of early 20th century A828.20808 or 828.9934820808)

Table 3C. Notation to Be Added Where Instructed in Table 3B, 700.4, 791.4, 808–809

See Manual at Table 3B: Preference order

SUMMARY

| - | 001–009 Standard subdivisions |
|------------------|--|
| | 01-09 Specific periods |
| | Arts and literature displaying specific qualities of style, mood, viewpoint |
| - - - - | 2 Literature displaying specific elements |
| - | Arts and literature dealing with specific themes and subjects |
| - | 4 Literature emphasizing subjects |
| - | Literature for and by ethnic and national groups |
| - | Literature for and by groups of people with specific attributes, residents of specific areas |
| -001-007 | Standard subdivisions |
| -[008] | Groups of people |
| | Do not use; class in —8–9 |
| -009 | History and geographic treatment |
| | Do not use for biography; class in base number. Do not use for literature for and by persons resident in specific areas; class in —9 |
| -009 01009 0 | Historical periods |
| | Do not use for literature of a specific language; class in —01-09 |
| | |

---01--09 Specific periods

Add to base number —0 notation from the period table for the specific literature, e.g., earliest period —01

—1 Arts and literature displaying specific qualities of style, mood, viewpoint

Do not use if redundant, e.g., horror (—164) in horror fiction (—308738 in Table 3B)

Class literature displaying specific elements and specific qualities in —2; class arts and literature dealing with specific themes and subjects and displaying specific qualities in —3

See Manual at T3B—102–107, T3B—205, T3B—308 vs. T3C—1, T3C—3

--11 Nontraditional viewpoints Including impressionism Class here avant-garde, experimental approaches in the arts For a specific type of avant-garde or experimental approach not provided for here, see the type, e.g., experimental literary works without identifiable literary form —807 in Table 3B --112Modernism Postmodernism --113 ---114 **Futurism** --115 Expressionism Dadaism and surrealism -116--1162 Dadaism Surrealism -1163Realism and naturalism -12 Including determinism **—13** Idealism -14 Classicism and romanticism Class pastoral arts and literature in —358209734 ---142 Classicism --145 Romanticism Including primitivism **—15** Symbolism, allegory, fantasy, myth Standard subdivisions are added for any or all topics in heading Including the grotesque, science fiction in the arts Class symbolism, allegory, fantasy, myth associated with a specific style or viewpoint with the style or viewpoint, e.g., surrealism —1163 For science fiction as a type of fiction, see -308762 in Table 3B See Manual at T3C-37 vs. T3C-15 ---16 Tragedy and horror -162Tragedy For tragedy as a kind of drama, see —20512 in Table 3B -164Horror

For horror fiction, see —308738 in Table 3B

—17 Comedy

Comic style or viewpoint

Class collections and criticism of humor and satire in two or more literary forms in —7 in Table 3B; class jokes in —802 in Table 3B

For comedy as a kind of drama, see -20523 in Table 3B

—18 Irony

—2 Literature displaying specific elements

Class literature dealing with specific themes and subjects and displaying specific elements in —3

—22 Description

Including setting

- --23 Narrative
- **—24** Plot
- -25 Stream of consciousness
- -26 Dialogue
- —27 Characters

Including the "double" (Doppelgänger) in literature

—3 Arts and literature dealing with specific themes and subjects

Personifications of a specific theme or subject are classed with the theme or subject, e.g., personifications of death —3548

Do not use if redundant, e.g., historical themes (--358) in historical fiction (--3081 in Table 3B)

See Manual at T3B—102–107, T3B—205, T3B—308 vs. T3C—1, T3C—3

-32 Travel and geography

Standard subdivisions are added for either or both topics in heading

Class here hotels

Add to base number —32 notation 1–9 from Table 2, e.g., ocean travel —32162, ancient geography —323, travel in California —32794

Class specific persons associated with travel and geography in —351; class historical and political themes in —358; class supernatural, mythological, legendary places in —372. Class religious aspects of travel and geography with the topic, e.g., travel on pilgrimages —3820351, geography in the Bible —3822091

Civilization of places, comprehensive works on places relocated to —358; landscapes relocated to —36

—33 Times

Including seasons; parts of day, e.g., dawn

Class specific persons associated with times in —351; class times (historical periods) in —3582–3589

See also -384 for time (philosophic concept)

--334 Holidays

Including religious holidays, e.g., Christmas

—34 Language

Class here comprehensive works on language and literature

Class specific persons associated with language in —351

For literature, see —357. For the language of a specific subject, see the subject, e.g., language of science —36

—35 Humanity

Class here autobiography, biography, human existence, works dealing with contemporary viewpoints

Unless other instructions are given, observe the following table of preference, e.g., women —3522 (*not* —3552):

| Specific persons | 351 |
|---|----------------|
| Specific groups of people | —352 |
| Historical, political, military themes | 358 |
| Life cycle | —354 |
| Social themes | —355 |
| Artistic, recreational, literary themes | —357 |
| Technical themes | —356 |
| Human characteristics and activities | —353 |

—351 Specific persons

Individual real, fictional, legendary, mythological persons

Including Count Dracula, Don Juan, Faust, Joan of Arc, Job, Julius Caesar, King Arthur, Odysseus, Pierrot

See also —382 for specific gods and goddesses

—352 Specific groups of people

Including heroes

See also —375 for paranatural beings of human and semihuman form; also —8-9 for literature for and by groups of people

—352 1–352 7 Groups of people by miscellaneous attributes

Add to base number —352 the numbers following —08 in notation 081–087 from Table 1, e.g., women —3522

| [352 8] | Occupational and religious groups |
|------------------|---|
| | A specific occupational group relocated to the group in —3, e.g., lawyers —3554; a specific religious group relocated to the group in —382, e.g., Buddhists —382943 |
| 352 9 | Ethnic and national groups |
| 352 905352 90 | Ethnic and national groups with ethnic origins from more than one continent, of European descent |
| | Add to base number —3529 notation 05–09 from Table 5, e.g., people of mixed African, Asian, and European ancestry —352905 |
| 352 91-352 99 | Specific ethnic and national groups |
| | Add to base number —3529 notation 1–9 from Table 5, e.g., Chinese —3529951 |
| | |
| | -353–358 Specific human, social, technical, artistic, recreational, terary, historical, political, military themes |
| | Class comprehensive works in —35 |
| | Specific human, social, technical, artistic, recreational, literary, historical, political, military themes related to a specific group of people, other than people associated with a specific occupational or religious group, relocated to the group of people in —352, e.g., people with disabilities —3527 |
| —353 | Human characteristics and activities |
| | Including alienation, chivalry, dreams, fear, friendship, happiness, heroism, justice, melancholy, personal beauty and ugliness, pride, snobbishness, success, vices, virtues |
| | Class here ethical and psychological themes |
| | Class love in —3543; class legal justice in —3554; class mental illness, comprehensive works on human body in —3561 |
| —353 8 | Sex |
| | Class here erotica, sexuality |
| | Class sexual orientation in —353 |
| —354 | Life cycle |
| | Including birth, adolescence, aging |
| | Class a specific social group associated with life cycle with the social group in —352, e.g., adolescents —35235 |
| —354 3 | Love and marriage |
| | Standard subdivisions are added for either or both topics in heading |
| 354 8 | Death |
| | |

—355 Social themes

Class here everyday life

For political themes, see —3581. For a specific aspect of everyday life, see the aspect, e.g., home and family management —3564, recreation —3579

Military science relocated to —3581; comprehensive works on adventure relocated to —3582

-355 2 Sociology and anthropology

Standard subdivisions are added for either or both topics in heading

Including exile, violence

Class sex in —3538; class social problems and services in —3556; class war and peace in —3581. Class themes associated with a specific social group with the social group in —352, e.g., feminism —3522, homophobia —352664; class themes associated with life cycle with the theme in —354, e.g., birth, adolescence, aging —354, love and marriage —3543, death —3548

-355 3 Economics

Including commerce, environment, industry, labor; accounting, management, public relations

--355 4 Law

—355 6 Social problems and services

Standard subdivisions are added for either or both topics in heading

Including crime, poverty

For social welfare problems of and services for people with physical illness, mental illness, substance abuse, mental retardation, physical disabilities, see —3561

—355 7 Education

—355 8 Communications and transportation

For communications and transportation engineering, see —356

See also —3553 for commerce

—355 9 Customs, etiquette, folklore

For holidays, see —334. For customs of specific subjects, see the subject, e.g., customs of life cycle —354, customs of peace and war, —3581; for specific themes in folklore, see the theme, e.g., real animals —362, legendary animals —374

Customs of costume, dwellings, food relocated to —3564

—356 Technical themes

Including communications, computer, military, transportation engineering

Class accounting, management, public relations in —3553; class comprehensive works on communications and transportation in —3558; class scientific themes, comprehensive works on scientific and technical themes in —36; class comprehensive works on computer science in —39

For agriculture, see -- 36

—356 1 Medicine, health, human body

Standard subdivisions are added for any or all topics in heading

Including human anatomy, physiology, diseases; mental illness; social welfare problems of and services for people with physical illness, mental illness, substance abuse, mental retardation, physical disabilities; human form and shape, nudity

Class birth, development, aging in —354; class death in —3548

For personal beauty and ugliness, see —353

—356 4 Home and family management

Including customs of costume, dwellings, food [all formerly —3559]; beauty shops, restaurants

Class hotels in —32; class personal beauty and ugliness in —353

—357 Artistic, recreational, literary themes

Including architecture, painting

Class comprehensive works on language and literature in —34; class gardens in —364

Books relocated to -39

—357 8 Music

—357 9 Recreational and performing arts

Including dancing, sports

—358 Historical, political, military themes

Standard subdivisions are added for historical, political, military themes together; for historical themes alone

Class here civilization of places, comprehensive works on places [both formerly —32], historical events

Class history with respect to ethnic and national groups in —3529; class historical fiction in literature in —3081 in Table 3B. Class historical themes in religion with religious themes in —382, e.g., history of Biblical events —3822095

For geography of places, see —32

-3581

Political and military themes

Standard subdivisions are added for either or both topics in heading Including nationalism, peace, war

Class here military science [formerly -355]

For military engineering, see —356; for political and military themes limited to general historical periods, see —358207–358208; for political and military themes limited to areas, regions, places in general, see —358209; for political and military themes limited to specific historical periods, see —35821–35828; for political and military themes limited to ancient world, to specific continents, countries, localities, to extraterrestrial worlds, see —3583-3589

-358 2

World historical themes

Civilization and events not limited by continent, country, locality

Including comprehensive works on adventure [formerly —355]

Class here military themes, political themes not limited by continent, country, locality

Class adventure fiction in literature in —3087 in Table 3B; class historical, military, political themes limited by continent, country, locality in —3583–3589; class comprehensive works on political themes, on military themes in —3581

For specific kinds of adventure, see the kind, e.g., detective adventures —3556, Westerns —35878

--[358 200 1-358 200 9]

Standard subdivisions

Do not use; class in -35801-35809

>

-358 207-358 208 General historical periods

Class here general historical themes covering three or more continents (or three or more countries if not on the same continent)

Class specific historical periods in —35821–35828; class comprehensive works in —3582

For ancient history, see —3583

-358 207

Ca. 500-1450/1500

Including comprehensive works on Crusades

Class history of a place during the period of the Crusades with the history of the place, e.g., history of Europe during the period of Crusades —3584018

For comprehensive works on a specific Crusade, see the history of the country or region in which most of the fighting took place, e.g., First Crusade—35856014, Fourth Crusade—35849503

-358208

Modern history, 1450/1500-

-358 209

Areas, regions, places in general

Not limited by continent, country, locality

-358 209 01-358 209 09

Standard subdivisions

-358 209 1-358 209 9

Specific areas, regions, places in general

Add to base number —358209 the numbers following —1 in notation 11–19 from Table 2, e.g., urban civilization —358209732, pastoral themes —358209734

--358 21-358 28

Specific historical periods

Add to base number —3582 the numbers following 909 in 909.1–909.8, e.g., 19th century —358281

Class general historical periods in -358207-358208

--358 3-358 9

Historical themes of ancient world; of specific continents, countries, localities; of extraterrestrial worlds

Class here military themes, political themes limited geographically

Add to base number —358 the numbers following 9 in 930–990, e.g., World War II —3584053, history and civilization of U.S. West —35878

Class western fiction as a type of fiction in —30874 in Table 3B

—36 Natural and physical phenomena; mathematics

Standard subdivisions are added for natural and physical phenomena, mathematics together; for natural and physical phenomena together; for natural phenomena alone

Including fire, weather

Class here landscapes [formerly —32], agriculture, nature, scientific themes, comprehensive works on scientific and technical themes

Class science fiction in literature in —308762 in Table 3B; class science fiction in the arts in —15; class times (e.g., seasons, times of day) in —33; class specific persons associated with natural and physical phenomena, with mathematics in —351. Class animals or plants for a specific purpose with the purpose, e.g., medicinal plants —3561, meat —3564

For human anatomy, physiology, diseases, see —3561

--362

Animals

Class here pets

Add to base number —362 the numbers following 59 in 592–599, e.g., cats -3629752

Class supernatural, mythological, legendary animals in —374

See Manual at 800, T3C-362 vs. 398.245, 590, 636

-364 Plants

Class here gardens

Add to base number —364 the numbers following 58 in 582–588, e.g., trees —364216, roses —3643734

Class supernatural, mythological, legendary plants in -37

—37 The supernatural, mythological, legendary

Standard subdivisions are added for any or all topics in heading

Including spiritualism

Class here monsters

Class specific legendary and mythological persons in —351; class specific groups of legendary and mythological people in —352; class religious mythology in —382013

See Manual at T3C-37 vs. T3C-15

--372 Places

Including Atlantis, dystopias, utopias

Class religious treatment of places associated with life after death in —382023

See also —382035 for religious treatment of sacred places

—374 Animals

Including dragons, werewolves

-375 Paranatural beings of human and semihuman form

Including centaurs, fairies, ghosts, vampires

Class gods, goddesses, other objects of worship and veneration in —382

For ghost fiction as a kind of fiction, see —308733 in Table 3B; for specific paranatural beings of human and semihuman form, see —351; for werewolves, see —374

—377 Magic and witchcraft

Standard subdivisions are added for either or both topics in heading

Class wicca in -3829994

-38 Philosophic and abstract themes

—382 Religious themes

Add to base number —382 the numbers following 2 in 201–299, e.g., Buddhism —382943; however, for religious holidays, see —334; for specific natural persons connected with religion, see —351

See also —42 for religious works not basically belletristic but discussed as literature

—384 Philosophic themes

Including existentialism, humanism, nihilism, time, transcendentalism

Class specific persons associated with philosophic themes in —351

For ethical themes, see —353

See also —33 for times (e.g., seasons, times of day)

—39 Computer science, information, general works

Including books [formerly —357], journalism, library and information sciences, museology

Class specific persons associated with computer science, information, or general works in —351; class supernatural, mythological, legendary phenomena in —37. Class computer applications in a specific subject with the subject, e.g., computer applications in economics —3553

For computer engineering, see -356

—4 Literature emphasizing subjects

Works not basically belletristic discussed as literature, where the real interest is in the literary quality of the text rather than the subject of the text

Add to base number —4 notation 001–999, e.g., religious works as literature —42, biography as literature —492

Class literary examination of a text in order to reach conclusions about its meaning, structure, authorship, date, where the real interest is in the subject of the text with the text, e.g., literary criticism of Bible 220.66

> —8-9 Literature for and by groups of people

Do not use if redundant, e.g., collections of English-language poetry for and by the English 821.008 (*not* 821.0080821)

Unless other instructions are given, observe the following table of preference, e.g., literature for or by Roman Catholic girls —92827088282 (*not* —921282083 or —9287):

| People by age group | 92829285 |
|--|-----------|
| People by gender or sex | 9286-9287 |
| People by relationships, people by miscellaneous social | |
| attributes, people with disabilities and illnesses, gifted | |
| people | 9205-9207 |
| Occupational and religious groups | 921 |
| Ethnic and national groups | 8 |
| Residents of specific continents, countries, localities | 9399 |
| Residents of specific regions | 91 |

Class literature displaying specific features for and by groups of people in —1–3; class comprehensive works in the appropriate number in Table 3B

—8 Literature for and by ethnic and national groups

Class literature for and by ethnic and national groups in continents, countries, localities where the groups predominate in —93–99

See Manual at T3C-93-99, T3C-9174 vs. T3C-8

---805--809

Ethnic and national groups with ethnic origins from more than one continent, of European descent

Add to base number —8 notation 05–09 from Table 5, e.g., literature by people of mixed African, native American, and Asian descent —805

-81-89 Specific ethnic and national groups

Add to base number —8 notation 1–9 from Table 5, e.g., literature by Africans and people of African descent —896, literature by Africans and people of African descent in Brazil —896081

—9 Literature for and by groups of people with specific attributes, residents of specific areas

—91 Literature for and by residents of specific regions

Not limited by continent, country, locality

Add to base number —91 the numbers following —1 in notation 11–19 from Table 2, e.g., literature by rural authors —91734

See Manual at T3C-93-99, T3C-9174 vs. T3C-8

—92 Literature for and by groups of people with specific attributes

---920 5--920 7

People by relationships, people by miscellaneous social attributes, people with disabilities and illnesses, gifted people

Miscellaneous social attributes not provided for elsewhere

Add to base number —920 the numbers following —08 in notation 085–087 from Table 1, e.g., literature by mothers —92052, literature by convicts —9206927

—921 Occupational and religious groups

Add to base number —921 notation 001–999, e.g., literature by Catholics —921282, literature by painters —92175

—928 People by age group, gender, or sex

> --928 2-928 5 Age groups

Class comprehensive works in -928

—928 2 Children

—928 26 Boys

---928 27 Girls

—928 3 Young people twelve to twenty

| \mathbf{T} | 2 | ~ |
|--------------|---|---|
| 1 | J | U |

| 928 36 | Males twelve to twenty |
|---|---|
| —928 37 | Females twelve to twenty |
| 928 5 | People in late adulthood |
| | |
| > | 928 6-928 7 People by gender or sex |
| | Class comprehensive works in —928 |
| | For transgender and intersex people, see —92067 |
| <u> 928 6 </u> | Men |
| —928 7 | Women |
| —93–99 | Literature for and by residents of specific continents, countries, localities |

Class here literature for and by ethnic and national groups in continents, countries, localities where the groups predominate

Add to base number —9 notation 3–9 from Table 2, e.g., literature (other than in Japanese language) by residents of Japan —952, a collection of Japanese-language literature by residents of Hokkaidō 895.60809524, a collection of English literature by residents of Australia 820.80994

See Manual at T3C-93-99; also at T3C-93-99, T3C-9174 vs. T3C-8

(Option: Do not use for literatures of specific countries if the literatures are separately identified in accordance with options given under 811–818, 819, 821–828, 828.99, 841–848, 848.99, 861–868, 868.99, 869, 869.899)

Table 4. Subdivisions of Individual Languages and Language Families

The following notation is never used alone, but may be used as required by add notes under subdivisions of specific languages or language families, or with the base numbers for individual languages identified by * under 420–490, e.g., Norwegian (base number 439.82) grammar (—5 in this table): 439.825. Where instructed to do so elsewhere, add 0 to the base number for the language before adding notation from this table, e.g., dictionary of Spanish Sign Language 419.46003. A decimal point is inserted following the third digit of any number thus constructed that is longer than three digits

Notation from Table 1 is added to the notation in Table 4 when appropriate, e.g., —509 history of grammar, 439.82509 history of Norwegian grammar

See Manual at 410

SUMMARY

| | SUMMARY | |
|---------|---|---|
| | -01-09 Standard subdivisions and special topics of subdivisions of individual languages and language families Writing systems, phonology, phonetics of the standard form of the language Etymology of the standard form of the language Dictionaries of the standard form of the language Grammar of the standard form of the language Historical and geographic variations, modern nongeographic variations Standard usage of the language (Prescriptive linguistics) | , |
| 01 | Philosophy and theory | |
| | Notation —01 from Table 1 as modified below | |
| | Do not use for schools and theories of linguistics; class in —018 | |
| 014 | Communication; semantics, pragmatics, languages for special purpose | S |
| | Notation —014 from Table 1 as modified below | |
| | Class here lexicology | |
| | For dictionaries, see —3; for lexicography, see —3028; for discursive works on terminology intended to teach vocabulary, see —81; for spelling and pronunciation in applied linguistics, see —813 | |
| | See Manual at T4—3 vs. T4—81 | |
| 014 1 | Discourse analysis | |
| | Including pragmatics in discourse analysis | |
| | Class discourse analysis of languages for special purposes in —0147 | |
| | Use of this number for content analysis, semiotics discontinued; class in —014 | 1 |
| [014 2] | Etymology | |
| | | |

Do not use: class in -2

| —014 3 | Semantics |
|----------------|--|
| | For history of word meanings, see —2 |
| | See Manual at 401.43 vs. 306.44, 401.45, 401.9, 412, 415 |
| 014 302 85 | Computer applications |
| 014 302 856 35 | Natural language processing |
| | Class here word sense disambiguation |
| —014 5 | Pragmatics |
| | For pragmatics in discourse analysis, see -0141 ; for pragmatics in psycholinguistics, see -019 |
| 014 52 | Speech acts |
| | Class here illocutionary acts |
| 014 54 | Presupposition |
| | Class here implication, entailment |
| 014 56 | Reference |
| | Class here anaphora, deixis |
| 014 7 | Languages for special purposes |
| | Class here sublanguages, discourse analysis of languages for special purposes |
| | Class teaching of languages for special purposes as second languages in —80071; class translation of languages for special purposes in —803. Class dictionaries of languages for special purposes with the purpose, plus notation 03 from Table 1, e.g., medical dictionaries 610.3 |
| [014 8] | Abbreviations, acronyms, symbols |
| | Do not use for abbreviations, acronyms, symbols as part of writing systems; class in —11. Do not use for dictionaries of abbreviations, acronyms, symbols; class in —315 |
| 018 | Schools, theories, methodologies |
| | Including functionalism, structural linguistics |
| | For works on schools, theories, methodologies that stress syntax, or syntax and phonology, see —5018 |
| 018 8 | Corpus linguistics |
| | Including language data samples collected as corpora to support corpus-based analysis, corpus linguistics applied to texts in a specific subject |
| | Class corpus linguistics applied to a specific topic in linguistics with the topic, e.g., corpus-based discourse analysis —0141, corpus-based analysis of noun phrases —55; class corpus linguistics applied to a specific work or the works of a specific author with the work or author, e.g., versions of the Bible 220.4, Shakespeare's works 822.33 |

--09

---019 Psychological principles Including language acquisition, speech errors Class here psycholinguistics Class psychological principles of a specific topic with the topic, e.g., psycholinguistics of reading a specific language —84019 See Manual at 407.1, T1-071 vs. 401.93, T4-019, 410.71, 418.0071. T4-80071 --02Miscellany --0285Computer applications Class computer applications in corpus linguistics in —0188 -0285635Natural language processing Class here computational linguistics --03**Encyclopedias and concordances** Do not use for dictionaries of standard form of language; class in —3. Do not use for dictionaries of historical and geographic variations of modern nongeographic variations in the language; class in —7 -04 Special topics of subdivisions of individual languages and language families -042Bilingualism Class here multilingualism Add to base number — 042 notation 2–9 from Table 6 for the language that is not dominant in the area in which the linguistic interaction occurs, e.g., works dealing with the dominant language and English —04221, works dealing with French as the dominant language and English 440.4221 See also 306.446 for sociology of bilingualism and multilingualism Standard subdivisions ---05--06 --07Education, research, related topics Education ---071 See Manual at 407.1, T1—071 vs. 401.93, T4—019, 410.71, 418.0071, T4 - 80071-072Research -0721Research methods Class corpus-based research methods in —0188 --08 Groups of people

Do not use for works that stress distinctive characteristics of historical and geographic variations from the standard form of the language; class in —7

History, geographic treatment, biography

> —1-5 Description and analysis of the standard form of the language

Class writing systems, phonology, etymology, dictionaries, grammar of historical and geographic variations, of modern nongeographic variations of the language in —7; class standard usage, prescriptive and applied linguistics in —8; class comprehensive works in the base number for the language (adding 0 when required to make a three-figure number), e.g., comprehensive works on phonology, etymology, dictionaries, grammar of standard French 440

See Manual at T4-1-5, T4-8 vs. T4-7

—1 Writing systems, phonology, phonetics of the standard form of the language

Class writing systems, phonology, phonetics of historical and geographic variations, of modern nongeographic variations of languages in —7

—11 Writing systems

Including alphabets, ideographs, syllabaries; braille; abbreviations, acronyms, symbols; capitalization, punctuation, transliteration

Class here paleography and epigraphy limited to study of ancient and medieval handwriting and inscriptions

Class dictionaries of abbreviations, acronyms, symbols in —315; class paleography covering all aspects of early writings in the base number for the language (adding 0 when required to make a three-digit number), e.g., Latin paleography 470; class paleography of historical and geographic variations, of modern nongeographic variations of the language in —7, e.g., paleography of postclassical Latin 477; class books meant to teach the alphabet in —813; class prescriptive works on punctuation in —823; class manual alphabets in —891

For spelling, see —152

--15 Phonology, phonetics, spelling

Standard subdivisions are added for phonology, phonetics, spelling together; for phonology and phonetics together; for phonology alone

Class here consonants, vowels; morphophonology, morphophonemics, phonemics

Class comprehensive works on phonology, morphology, syntax; on phonology and morphology; on phonology and syntax in —5

For suprasegmental features, see —16

See also —3 for dictionaries

—152 Spelling (Orthography) and pronunciation

Standard subdivisions are added for either or both topics in heading

Class here description and analysis of the nature, history, and function of spelling and pronunciation

Class specialized spelling and pronouncing dictionaries in —31; class training in standard spelling and pronunciation in —813; class fingerspelling in —891; class speech training for public speaking, debating, conversation in 808.5; class comprehensive works on writing systems in —11

—158 Phonetics

—16 Suprasegmental features

Phonology and phonetics of vocal effects extending over more than one sound segment

Including juncture (pauses), pitch, stress

Class here intonation

—2 Etymology of the standard form of the language

Class etymology of historical and geographic variations, of modern nongeographic variations of languages in —7

—203 Dictionaries, encyclopedias, concordances

Including dictionaries of eponyms [formerly —31]

Class dictionaries of foreign words and phrases in —2403; class bilingual dictionaries of etymology in —32–39

—24 Elements from foreign languages

—240 3 Dictionaries, encyclopedias, concordances

Class here dictionaries of foreign words and phrases

Class dictionaries of foreign words and phrases from a specific language with the language in —241–249, plus notation 03 from Table 1, e.g., dictionaries of foreign words and phrases from French —244103, dictionaries of foreign words and phrases from French in English 422.44103

—241–249 Elements from specific foreign languages

Add to base number —24 notation 1–9 from Table 6, e.g., French words in the language —2441, French words in English 422.441, dictionary of French words in English 422.44103

—3 Dictionaries of the standard form of the language

Including dictionaries with pictures of sign-language signs

Class dictionaries of historical and geographic variations, of modern nongeographic variations of languages in —7

See Manual at T4-3 vs. T4-81

—302 8 Auxiliary techniques and procedures; apparatus, equipment, materials

Class here basic techniques and procedures; lexicography

-31 Specialized dictionaries

Including dictionaries of clichés, homonyms, paronyms; pronouncing dictionaries, reverse dictionaries (dictionaries with words clustered by themes or that allow searching by definitions or that arrange words in reverse order of spelling), rhyming dictionaries; speller-dividers (ready-reference lists of words)

Class etymological dictionaries in —203; class dictionaries of foreign words and phrases in —2403; class reverse dictionaries (dictionaries of antonyms) in —312; class bilingual specialized dictionaries in —32–39; class crossword-puzzle dictionaries in 793.73203. Class subject dictionaries with the subject, plus notation 03 from Table 1, e.g., dictionary of medicine 610.3

See also -813 for spellers (spelling books with exercises to teach how to spell)

Dictionaries of eponyms relocated to -203

—312 Dictionaries of synonyms and antonyms

Standard subdivisions are added for either or both topics in heading

Class here reverse dictionaries (dictionaries of antonyms)

Class reverse dictionaries (dictionaries with words clustered by themes or that allow searching by definitions or that arrange words in reverse order of spelling) in —31

—313 Dictionaries of idioms

—315 Dictionaries of abbreviations, acronyms, symbols

Standard subdivisions are added for any or all topics in heading

—317 Picture dictionaries

Limited to dictionaries with pictures of what words represent

See also —3 for dictionaries with pictures of sign-language signs

-32-39 Bilingual dictionaries

Add to base number —3 notation 2–9 from Table 6, e.g., dictionaries of the language and English —321, dictionary of French and English 443.21

A bilingual dictionary with entry words in only one language is classed with that language, e.g., an English-French dictionary 423.41. A bilingual dictionary with entry words in both languages aimed at speakers of only one of the languages is classed with the other language, e.g., a bilingual dictionary with entry words in French and English but with introduction and explanatory apparatus only in French is classed with English in 423.41. A bilingual dictionary with entry words in both languages aimed at speakers of both languages is classed with the language coming later in 420–490, e.g., French-German. German-French dictionaries 443.31

—5 Grammar of the standard form of the language

Class here grammatical categories, sentences, syntax, topic and comment, word order; comprehensive works on phonology, morphology, syntax; on phonology and morphology; on phonology and syntax

Class grammar of historical and geographic variations, of modern nongeographic variations of languages in —7

Unless other instructions are given, class a subject with aspects in two or more subdivisions of —5 in the number coming last, e.g., number expressed by verbs —56 (not —55)

For phonology, see —15; for prescriptive grammar, see —82

—501 Philosophy and theory

Notation —01 from Table 1 as modified below

Do not use for schools and theories of grammar; class in --5018

---501 8 Schools, theories, methodologies

Including case, categorial, relational grammar

—501 82 Generative grammar

—501 84 Dependency grammar

—502 85 Computer applications

-502 856 35 Natural language processing

Class here part-of-speech tagging, parsing

> —55–57 Word classes

Class here parts of speech

Class comprehensive works in —5

-55 Nouns, pronouns, adjectives, articles

Including case, number, person

Class here noun phrases

—554 Nouns

---555 Pronouns

--56 Verbs

Including modality, mood, voice; comprehensive works on words derived from verbs, on infinitives, on participles

Class here verb phrases

Class works that treat a specific function (other than the verb function) of words derived from verbs with the function, e.g., gerunds as nouns —554

—562 Tense

—563 Aspect

-57 Miscellaneous word classes

Including conjunctions, interjections, particles, prepositions, prepositional phrases

Class clitics in -592

--576 Adverbs

Including adverbials

—59 Morphology

Class morphophonology, morphophonemics in —15

For morphology of specific word classes, see —55–57

—592 Word formation

Including affixes (infixes, prefixes, suffixes), clitics; formation of compound words

Class here derivational morphology

Class etymology in -2

—595 Inflection

For inflectional schemata designed for use as aids in learning a language, see —82

—7 Historical and geographic variations, modern nongeographic variations

Class here early forms; dialects, patois, provincialisms; pidgins, creoles, mixed languages; argot, cant, jargon, slang

Subdivisions of —7 are given under some individual languages in 420–490

Use notation 7 only for works that stress differences among the forms of a language

Works on writing systems, etymology, dictionaries, phonology, phonetics, grammar, applied linguistics are classed here when applied to historical and geographic variations, to modern nongeographic variations, e.g., paleography and epigraphy of an early form of the language, the distinctive grammatical characteristics of a particular dialect

See Manual at T4-7; also at T4-1-5, T4-8 vs. T4-7

—8 Standard usage of the language (Prescriptive linguistics)

General, formal, informal usage

Class here applied linguistics, works for people learning a second language, works for native speakers who are learning the acceptable patterns of their own language

Class purely descriptive linguistics in —1–5; class dictionaries in —3; class prescriptive and applied linguistics applied to historical and geographic variations, to modern nongeographic variations of the language in —7

For rhetoric, see 808.04

See Manual at T4—1-5, T4—8 vs. T4—7; also at 410

---800 1--800 9

Standard subdivisions

See Manual at 407.1, T1—071 vs. 401.93, T4—019, 410.71, 418.0071, T4—80071

---800 71

Education

Class here second language teaching

See Manual at 407.1, T1—071 vs. 401.93, T4—019, 410.71, 418.0071, T4—80071

--802

Translating to and from other languages

Class here interpreting

Use the base number for the language being translated into, for works on translating into a specific language. Use the base number coming later in 420–490 for works on translating in both directions between two languages. Use the base number for the language being translated from, for works on translating from one language into many languages

Add to base number —802 notation 2–9 from Table 6 for the language being translated from, e.g., translating from Chinese into a specific language —802951, translating from Chinese into English 428.02951, translating from Chinese into English and English into Chinese 495.180221, translating from Chinese into many languages 495.1802

Except for collections of texts intended for teaching the art of translating, translations themselves are classed with the works translated

Translating materials on specific subjects relocated to —803; translating literature (belles-lettres) and rhetoric relocated to —804

---802 028 5

Computer applications

---802 028 563 5

Natural language processing

Class here machine translation

---803

Translating materials on specific subjects [formerly —802]

Class here interpreting materials on specific subjects

Use the base number for the language being translated into, for works on translating into a specific language. Use the base number coming later in 420–490 for works on translating in both directions between two languages. Use the base number for the language being translated from, for works on translating from one language into many languages

Add to base number —803 three-digit numbers 001–999 (but stop before any zero that follows a non-zero number), e.g., translating natural history materials —8035 (not —803508), translating medical materials —80361; then, for translating from a specific language, add 0* and to the result add notation 2–9 from Table 6, e.g., translating medical materials from German —80361031, translating medical materials from German into English 428.0361031; however, for translating literature (belles-lettres) and rhetoric, see —804

Notation for language may be added for any topic, even if the subject of the work does not approximate the whole

Class translating a specific work or the works of a specific author with the work, translations of the work, or author, e.g., translating the Bible 220, translating the Bible into English 220.52, translating the works of Aristotle 185

Except for collections of texts intended for teaching the art of translating, translations themselves are classed with the works translated, e.g., German translations of the Bible 220.531, translations of Julius Caesar's De Bello Gallico 936.402

--804

Translating literature (belles-lettres) and rhetoric [formerly —802]

Standard subdivisions are added for translating literature (belles-lettres) and rhetoric together, for translating literature (belles-lettres) alone

Class here interpreting literature and rhetoric, translating works about literature, rhetoric

Use the base number for the language being translated into, for works on translating into a specific language. Use the base number coming later in 420–490 for works on translating in both directions between two languages. Use the base number for the language being translated from, for works on translating from one language into many languages

Class translating a specific work or the works of a specific author with the work or author, e.g., translating the Aeneid 873.01, translating the works of Shakespeare 822.33

Except for collections of texts intended for teaching the art of translating, translations themselves are classed with the works translated, e.g., translation of the Divina Commedia by Dante Alighieri 851.1

---804 001-804 009

Standard subdivisions

Control of the second of the s

---804 02--804 09

Translating literature from a specific language

Add to base number —8040 notation 2–9 from Table 6, e.g., translating French literature —804041, translating French literature into English 428.04041

---804 1-804 8

Translating specific forms of literature

Add to base number —804 one-digit notation 1–8 from Table 3B, e.g., translating poetry —8041, translating tragedy —8042 (not —80420512); then, for translating from a specific language, add 0* and to the result add notation 2–9 from Table 6, e.g., translating Spanish poetry —8041061, translating Spanish poetry into English 428.041061 Notation for language may be added for any topic, even if the subject of the work does not approximate the whole

Class translating a specific work or the works of a specific author with the work, translations of the work, or author, e.g., translating the Bible 220, translating the Bible into English 220.52, translating the works of Aristotle 185

—81 Words

Class here discursive works on terminology intended to teach vocabulary

Class formal presentation of vocabulary for those whose native language is different in —824; class audio-lingual presentation of vocabulary for those whose native language is different in —834; class comprehensive works on terminology in —014

See also —3 for dictionaries

See Manual at T4-3 vs. T4-81

---813

Spelling (Orthography) and pronunciation

Standard subdivisions are added for either or both topics in heading

Including books meant to teach the alphabet

Class here pronunciation of consonants, vowels; spellers (spelling books with exercises to teach how to spell)

See also —152 for nonprescriptive treatment of spelling and pronunciation; also —31 for speller-dividers (ready-reference lists of words); also 783.043 for pronunciation for singing

—82 Structural approach to expression

Formal (traditional) presentation of grammar, vocabulary, reading selections

Class here prescriptive grammar, verb tables and inflectional schemata designed for use as aids in learning a language

For words, see –-81; for reading, see –-84

---823

Punctuation

^{*}Add 00 for standard subdivisions; see instructions at beginning of Table 1

| 824 | Structural approach to expression for people whose native language is different |
|-----------------|--|
| | Add to —824 notation 2–9 from Table 6, e.g., the language for Spanish-speaking people —82461, English for Spanish-speaking people 428.2461 |
| —83 | Audio-lingual approach to expression |
| | Class here the "hear-speak" school of learning a language |
| | For pronunciation, see —813 |
| 834 | Audio-lingual approach to expression for people whose native language is different |
| | Class here bilingual phrase books |
| | Add to —834 notation 2–9 from Table 6, e.g., the language for Spanish-speaking people —83461, English for Spanish-speaking people 428.3461 |
| 84 | Reading |
| | For readers, see —86 |
| 842 | Remedial reading |
| | Correcting faulty habits and increasing the proficiency of poor readers |
| 843 | Developmental reading |
| | Including reading power and efficiency of good readers |
| 843 2 | Rapid reading (Speed reading) |
| —86 | Readers |
| | Graded selections with emphasis on structure and vocabulary as needed |
| | Including readers compiled for training college students in reading comprehension |
| | Class here texts intended primarily for practice in reading a language |
| | (Option: Class primary readers in 372.4122) |
| 862 | Readers for new literates |
| | Regardless of subject |
| —864 | Readers for people whose native language is different from the language of the reader |
| —864 024 | Readers for people in specific occupations |
| | Class here readers intended to instill a knowledge of the special vocabulary of a specific subject |
| | Add to base number —864024 notation 001–999, e.g., engineering readers for people whose native language is different —86402462, English-language engineering readers for people whose native language is not English 428.6402462 |

---864 2--864 9

Readers for speakers of specific native languages

Add to base number —864 notation 2–9 from Table 6, e.g., readers (in language other than Spanish) for Spanish-speaking people —86461, English-language readers for Spanish-speaking people 428.6461; then add further as follows:

024

Readers for people in specific occupations

Class here readers intended to instill a knowledge of the special vocabulary of a specific subject

Add to base number 024 notation 001–999,
e.g., engineering readers (in language other than Spanish) for Spanish-speaking people

—8646102462, English-language engineering

readers for Spanish-speaking people 428.646102462

—89 Use of a spoken language or a manually coded form of a spoken language for communication with and by deaf people

—891 Manually coded language

Class here use of signs and fingerspelling to represent specific standard spoken languages

Class signs and fingerspelling used as part of sign languages in 419

See also —8955 for cued speech

—891 4–891 9 Specific systems of manual coding

Add to base number —891 notation 4–9 from Table 2, e.g., British systems of signing and fingerspelling —89141

—895 Lipreading, cued speech, oral interpretation (lipspeaking)

—895 4 Lipreading (Speechreading)

—895 5 Cued speech

Table 5. Ethnic and National Groups

The following numbers are never used alone, but may be used as required (either directly when so noted or through the interposition of notation 089 from Table 1) with any number from the schedules, e.g., civil and political rights (323.11) of Navajo Indians (—9726 in this table): 323.119726; ceramic arts (738) of Jews (—924 in this table): 738.089924. They may also be used when so noted with numbers from other tables, e.g., notation 174 from Table 2

In this table racial groups are mentioned in connection with a few broad ethnic groupings, e.g., a note to class Blacks of African origin at —96 Africans and people of African descent. Concepts of race vary. A work that emphasizes race should be classed with the ethnic group that most closely matches the concept of race described in the work

Except where instructed otherwise, and unless it is redundant, add 0 to the number from this table and to the result add notation 1 or —3–9 from Table 2 for area in which a group is or was located, e.g., Germans in Brazil —31081, but Germans in Germany —31; Jews in Germany or Jews from Germany —924043. If notation from Table 2 is not added, use 00 for standard subdivisions; see below for complete instructions on using standard subdivisions

Notation from Table 2 may be added if the number in Table 5 is limited to speakers of only one language even if the group discussed does not approximate the whole of the group specified by the Table 5 number, e.g., Bavarians in Brazil—31081 (because German is the primary language spoken by Bavarians), but Amhara in United States—928 (not—928073 because Amharic is not the only language spoken by the peoples included in—928)

Notation from Table 2 may be added for either present or past specific location of the group discussed if only one specific location is relevant, e.g., sociology of Jews from many different countries now in United States 305.8924073, contributions to music around the world of Jews who previously lived in Poland 780.899240438

If both present and past specific locations of the group discussed are relevant, then notation from Table 2 is added only for present location of the group, e.g., Jews from Germany in the United States —924073 (not —924043). An exception occurs when the present location of the group is defined by the class number to which ethnic or national group notation is added, e.g., Jews in United States history 973.04924. The area notation added to Table 5 numbers is then available to show the past location of the group, e.g., Jews from Germany in United States history 973.04924043, Jews from Germany in United States higher education 378.73089924043

Standard subdivisions may be added to Table 5 notation when that notation is added directly to the base number, e.g., periodicals about sociology of Irish Americans 305.8916207305. However, standard subdivisions are not added to Table 5 notation when that notation is used through interposition of notation 089 from Table 1, e.g., an exhibition of ceramic arts of Russian Jews 738.089924047 (*not* 738.089924047074)

(continued)

Table 5. Ethnic and National Groups (continued)

When Table 5 notation is not followed by 0 plus notation from Table 2, use 00 for standard subdivisions, e.g., periodicals about sociology of Japanese 305.8956005, collected biography of Irish Americans in New York City 974.71004916200922. When Table 5 notation is followed by 0 plus notation from Table 2, however, use 0 for standard subdivisions, e.g., periodicals about sociology of Japanese Americans 305.895607305. (For the purpose of this rule, notation 96073 African Americans is treated as Table 5 notation, e.g., periodicals on sociology of African Americans 305.896073005, periodicals on sociology of African Americans in Ohio 305.896073077105)

Except where instructed otherwise, give preference to ethnic group over nationality, e.g., United States citizens of Serbian descent —9182073 (not —13). In this table "ethnic group" most often means a group with linguistic ties, but it can also mean a group with other cultural ties

Except where instructed otherwise, when choosing between two ethnic groups, give preference to the group for which the notation is different from that for the nationality of the people, e.g., a work treating equally Hispanic and native American heritage of bilingual Spanish-Guaraní mestizos of Paraguay —9838220892 (not —68892)

Except where instructed otherwise, when choosing between two national groups, give preference to the former or ancestral national group, e.g., people from the former Soviet Union who became United States citizens —917073 (not—13)

See Manual at Table 5

SUMMARY

| 0509 | [People of mixed ancestry with ethnic origins from more than one |
|--------------|--|
| | continent; Europeans and people of European descent] |
| —1 | North Americans |
| <u>—2</u> | British, English, Anglo-Saxons |
| —3 | Germanic peoples |
| -4 | Modern Latin peoples |
| —5 | Italians, Romanians, related groups |
| 6 | Peoples who speak, or whose ancestors spoke, Spanish, Portuguese, Galician |
| <u></u> 7 | Other Italic peoples |
| —8 | Greeks and related groups |
| 9 | Other ethnic and national groups |
| | |

—05 People of mixed ancestry with ethnic origins from more than one continent

Limited to works that emphasize such mixed ancestry

Class works about people of mixed ancestry that do not emphasize mixture with the ethnic groups stressed in the works or with the groups with which the people are most closely identified, e.g., works about Métis that emphasize their North American native roots —97 (not —0597009); class works that stress the kind of mixed ethnic heritage (e.g., language, customs, food, but not genetics) that results when people of one continent move to another continent and raise their children in the new location with the ethnic group of origin, plus notation from Table 2 as instructed at beginning of Table 5 to show the new location, e.g., people who have Chinese parents and were raised in the United Kingdom —951041

-0509

Europeans and people of European descent with ethnic origins from more than one continent

Limited to works that emphasize European ancestry and mixed ancestry with ethnic origins from more than one continent

Add to base number —0509 notation 1–9 from Table 5, e.g., people with European and Asian ancestry —0509095, people with European and Asian ancestry in Hawaii —05090950969, people with European and Chinese ancestry —05090951

Works that emphasize mixed ancestry but give equal emphasis to European and non-European origins, or give more emphasis to non-European origins, are classed in —051–059, e.g., works about mixed Asian and European ancestry that give equal emphasis to both groups —0595009, works about mixed Chinese and European ancestry that emphasize Chinese ancestry —05951009

---051-059

Specific ethnic and national groups

Add to base number —05 notation 1–9 from Table 5 for the group only, e.g., American native peoples of mixed ancestry with ethnic origins from more than one continent —0597; then, for each group having its own number, add 0 and to the result add as follows:

001-009

Standard subdivisions

09 Europeans and people of European descent

Here are classed people whose mixed ancestry includes Europeans, Indo-European peoples, or white people generally, e.g., people of mixed American native and European ancestry —0597009, people of mixed American native and European ancestry in Canada —0597009071

For a specific ethnic or regional group, see 1–9

1–9 Specific ethnic and national groups

Add notation 1–9 from Table 5, e.g., people of mixed American native and French ancestry —0597041, people of mixed American native and French ancestry in Canada —0597041071, people of mixed Aleut and Russian ancestry —05971909171

Give priority in notation to the ethnic group emphasized. If emphasis is equal, give priority to the one coming last in Table 5

-09 Europeans and people of European descent

Class here people who speak or whose ancestors spoke languages traditionally spoken in Europe; comprehensive works on Indo-European peoples; comprehensive works on whites

Class works that emphasize mixed ancestry with origins from more than one continent in —05, e.g., works emphasizing mixed Hindi-English ancestry —059143021

For a specific ethnic or regional group, see the group, e.g., Germans —31, Bengali —9144, Arabs —927, people of Middle Eastern origins —94

Manufactures of the street of the street of the street of the street of the second of the second of

> —1–9 Specific ethnic and national groups

By origin or situation

Class people of mixed ancestry with ethnic origins from more than one continent in —05; class comprehensive works on Europeans, on Indo-European peoples in —09; class comprehensive works in 001–999 without adding notation from Table 5

See Manual at Table 5

(Option: To give local emphasis and a shorter number to a specific group, place it first by use of a letter or other symbol, e.g., Arabs —A [preceding —1]. Another option is given at —1)

—1 North Americans

For Spanish Americans, see —68; for North American regional and national groups of largely African descent, see —9697, e.g., West Indians —969729, Haitians —9697294; for North American native peoples, see —97. For North Americans of other origins, see the ethnic group of origin, e.g., North Americans of Celtic (Irish, Scots, Manx, Welsh, Cornish) origin —91607

(Option: To give local emphasis and a shorter number to a specific group, e.g., Sinhalese, class it in this number; in that case class North Americans in —2. Another option is given at —1–9)

—11 Canadians

Class here people of Canada as a national group

For Canadians not of British or French origin, see the ethnic group of origin, e.g., Canadians of German origin—31071, Inuit—9712071

—112 Canadians of British origin

See Manual at T5-112, T5-114 vs. T5-2, T5-41

—114 Canadians of French origin

See Manual at T5-112, T5-114 vs. T5-2, T5-41

—13 People of United States ("Americans")

Class here United States citizens of British origin, people of United States as a national group

For United States citizens of other origins, see the ethnic group of origin, e.g., German Americans —31073, African Americans —96073

See Manual at T5-13 vs. T5-2073, T5-21073

—2 British, English, Anglo-Saxons

Subdivisions are added for British, English, Anglo-Saxons together; for British as an ethnic group; for English as an ethnic group

For North Americans of British origin, see —1; for Anglo-Indians (Indian citizens of British origin), see —91411; for people of Celtic (Irish, Scots, Manx, Welsh, Cornish) origin, see —916

See Manual at Table 5; also at T5—112, T5—114 vs. T5—2, T5—41; also at T5—13 vs. T5—2073, T5—21073; also at T5—201–209 vs. T5—2101–2109

—21 People of British Isles

Class here United Kingdom citizens of British origin, people of United Kingdom as a national group

Class New Zealanders of British origin in —23; class Australians of British origin in —24; class South Africans of British origin in —28

For United Kingdom citizens of other origins, see the ethnic group of origin, e.g., United Kingdom citizens of Indian origin —91411041

See Manual at T5—13 vs. T5—2073, T5—21073; also at T5—201–209 vs. T5—2101–2109

-23 New Zealanders

Class here New Zealanders of British origin, New Zealanders as a national group

For New Zealanders of other origins, see the ethnic group of origin, e.g., New Zealanders of Irish origin —9162093, Maori —99442

--24 Australians

Class here Australians of British origin, Australians as a national group

For Australians of other origins, see the ethnic group of origin, e.g., Australians of Italian origin —51094, Aboriginal Australians —9915

—28 South Africans of British origin

Class South Africans as a national group in —968

See also —2106891 for Zimbabweans of British origin

—3 Germanic peoples

For English, Anglo-Saxons, see —2

-31 Germans

—35 Swiss

Class here Swiss Germans, comprehensive works on people of Switzerland as a national group

For Swiss citizens of other ethnic groups, see the ethnic group, e.g., French-speaking Swiss —410494, Romansh-speaking Swiss —59960494, Italian-speaking Swiss —510494

—36 Austrians

| 39 | Other Germanic peoples |
|----------------|--|
| | Including Goths, Vandals |
| 392 | Friesians |
| —393 | Netherlandish peoples |
| 393 1 | Dutch |
| 393 2 | Flemings (Flemish) |
| | Class here comprehensive works on Belgians as a national group |
| | For Walloons, see —42 |
| 393 6 | Afrikaners |
| | Class South Africans as a national group in —968 |
| —395 | Scandinavians |
| | Class here comprehensive works on peoples of the Nordic countries |
| | For Icelanders and Faroese, see —396; for Swedes, see —397; for Danes and Norwegians, see —398; for Finns, see —94541; for Sámi, see —9457 |
| —396 | Icelanders and Faroese |
| —396 1 | Icelanders |
| 3969 | Faroese |

--68073

States and U.S. citizens of Chilean origin —6883073; however, for comprehensive works on Spanish Americans in jurisdictions where they are a minority, see —6804–6809, e.g., Spanish Americans in United States

| 69 | Peoples who speak, or whose ancestors spoke, Portuguese and Galician |
|-----------------|--|
| | Subdivisions are added for peoples who speak, or whose ancestors spoke, Portuguese and Galician together; for peoples who speak, or whose ancestors spoke Portuguese alone |
| 6 91 | People of Portugal |
| 698 | Brazilians |
| | Class here Brazilians of Portuguese origin, Brazilians as a national group |
| | For Brazilian citizens of other origins, see the ethnic group of origin, e.g., Brazilians of Italian origin —51081, Brazilians of African origin —96081 |
| 699 | People who speak, or whose ancestors spoke, Galician |
| —7 | Other Italic peoples |
| | For Etruscans, see —9994 |
| <u>71</u> | Ancient Romans |
| 79 | Osco-Umbrians |
| 8 | Greeks and related groups |
| | Subdivisions are added for Greeks and related groups together, for Greeks as an ethnic group alone |
| | See also -91819 for Slavic Macedonians |
| —81 | Ancient Greeks |
| | Class here comprehensive works on ancient Greeks and Romans |
| | For ancient Romans, see —71 |
| 89 | Modern Greeks and related groups |
| 893 | Greek nationals |
| 895 | Cypriots |
| | Class here comprehensive works on people of Cyprus |
| | For Turkish Cypriots, see —943505693 |
| <u>9</u> | Other ethnic and national groups |

SUMMARY

| 91 | Other Indo-European peoples |
|---------------|--|
| 92 | Semites |
| 93 | Non-Semitic Afro-Asiatic peoples |
| 94 | Peoples of north and west Asian origin or situation; Dravidians; people who speak, or whose ancestors spoke, miscellaneous languages of south Asia |
| 95 | East and southeast Asian peoples; Munda |
| 96 | Africans and people of African descent |
| 97 | North American native peoples |
| 98 | South American native peoples |
| 99 | Papuans; Aboriginal Australians and Tasmanians; Malayo-Polynesian and related peoples; miscellaneous peoples |

—91 Other Indo-European peoples

SUMMARY

| 914 | South Asians |
|-----|--|
| 915 | Peoples who speak, or whose ancestors spoke, Iranian languages |
| 916 | Celts |
| 917 | East Slavs |
| 918 | Slavs |
| 919 | Balts and other Indo-European peoples |

—914 South Asians

Class here Indo-Aryans (peoples who speak, or whose ancestors spoke, Indo-Aryan languages)

For Dravidians and peoples who speak, or whose ancestors spoke, miscellaneous languages of south Asia, see —948; for south Asians who speak, or whose ancestors spoke, languages closely related to languages of east and southeast Asia, see —95; for Andamanese, see —959

See also notation 08621 in Table 1 for Brahmans as an elite social group; also notation 0882945 in Table 1 for Brahmans as a religious group

—914 1 National groups

Citizens of independent and partly independent jurisdictions of south Asia and of largely south Asian origin; former citizens and descendants of citizens of these jurisdictions

Including Guyanese, Mauritians, Surinamers

Class nationals of a specific ethnolinguistic group with the group, e.g., Tamil —94811

For Nepalese national group, see -91495

See also —96972983 for Trinidadian national group; also —9959 for Fijian national group

Maldivians as a national group relocated to ---91489

| 914 11 | Indians |
|--------------------|---|
| | Including Anglo-Indians (Indian citizens of British origin), post-1975 Sikkimese |
| | Class comprehensive works on Sikkimese in 91417 |
| <u>914 12</u> | Pakistanis and people of Bangladesh |
| —914 122 | Pakistanis |
| <u>914 126</u> | People of Bangladesh |
| <u>—</u> 914 13 | Sri Lankans (Ceylonese) |
| | For Sinhalese as an ethnic group, see —9148; for Tamil as an ethnic group, see —94811 |
| <u>—914 17</u> | Sikkimese |
| | For post-1975 Sikkimese, see —91411 |
| 914 18 | Bhutanese |
| | Class Bhotia as an ethnic group in —9541 |
| 914 2 | Punjabis and Sindhi |
| <u>—914 21</u> | Punjabis |
| 914 25 | Sindhi [formerly —948] |
| 914 3 | Peoples who speak, or whose ancestors spoke, Western Hindi languages |
| | Class here comprehensive works on Hindi-speaking peoples |
| | For peoples who speak, or whose ancestors spoke, languages of east central zone of Indo-Aryan languages (Eastern Hindi languages), see —91492 |
| 914 4 | Bengali |
| | For Bengali of Bangladesh, see —914126 |
| 914 5 | Assamese, Bihari, Oriya |
| <u>—914 51</u> | Assamese |
| —914 54 | Bihari |
| 914 56 | Oriya |
| 914 6 | Maratha and Konkani |
| 914 61 | Maratha [formerly —948] |
| 914 69 | Konkani [formerly —9149] |
| 914 7 | Gujarati and Bhil; people who speak, or whose ancestors spoke, Rajasthani |
| 9 14 71 | Gujarati |

| _ | |
|---------------|---|
| 914 79 | People who speak, or whose ancestors spoke, Rajasthani |
| | Including Gujar |
| 914 8 | Sinhalese, Vedda, Maldivians |
| | Subdivisions are added for Sinhalese, Vedda, Maldivians together; for Sinhalese alone |
| <u>914 89</u> | Maldivians |
| | Peoples who speak, or whose ancestors spoke, Divehi (Maldivian) |
| | Class here Maldivians as a national group [formerly —9141] |
| 914 9 | Other Indo-Aryan peoples |
| | Including peoples who speak, or whose ancestors spoke, Nuristani languages |
| | Konkani relocated to —91469 |
| 914 92 | Peoples who speak, or whose ancestors spoke, east central zone languages (Eastern Hindi languages) |
| | Including speakers of Awadhi, Bagheli, Chattisgarhi |
| | Speakers of Fijian Hindustani (Fiji Hindi) are of many south Asian ethnic groups; use —91409611 for Fijian citizens from south Asia |
| 914 95 | Nepali |
| | Class here Nepali as an ethnic group, comprehensive works on people of Nepal as a national group |
| | For citizens of Nepal belonging to other ethnic groups, see the ethnic group, e.g., Bihari—91454, Chepang and Newar—9549 |
| 914 96 | Pahari |
| | Class here peoples who speak, or whose ancestors spoke, northern zone languages, Pahari languages |
| | For people who speak, or whose ancestors spoke, Nepali, see —91495 |
| —914 97 | Romany people |
| 914 99 | Dardic peoples |
| | Including Kashmiris, Kohistanis |
| | Class Romany people in —91497 |
| 915 | Peoples who speak, or whose ancestors spoke, Iranian languages |
| | Including Kushans, Scythians |
| 915 5 | Persians |
| | Class here Persians as an ethnic group, comprehensive works on people of Iran as a national group |
| | For citizens of Iran belonging to other ethnic groups, see the ethnic group, e.g., Azerbaijani —94361055 |
| | |

| —915 7 | Tajik |
|---|---|
| | Including Galcha |
| <u> </u> | Other Iranian peoples |
| | Including Ossets, Pamiri |
| <u> </u> | Afghans (Pashtun) |
| | Class here Afghans as an ethnic group, comprehensive works on people of Afghanistan as a national group |
| | For citizens of Afghanistan belonging to other ethnic groups, see the ethnic group, e.g., Tajik—91570581 |
| 915 97 | Kurds |
| —915 98 | Baluchi |
| —916 | Celts |
| | Including Gauls |
| 916 2 | Irish |
| —9163 | Scots |
| 916 4 | Manx |
| 916 6 | Welsh (Cymry) |
| 9 16 7 | Cornish |
| 916 8 | Bretons |
| 917 | East Slavs |
| | Class here people of Commonwealth of Independent States, of former Soviet Union as national groups |
| | Class comprehensive works on Slavs in —918 |
| | For a specific ethnic group of Commonwealth of Independent States or former Soviet Union, see the group, e.g., Uzbek —94325 |
| <u>917 1</u> | Russians |
| <u> 917 14 </u> | Cossacks |
| 917 9 | Ukrainians, Ruthenians, Belarusians |
| 917 91 | Ukrainians and Ruthenians |
| | Subdivisions are added for Ukrainians and Ruthenians together, for Ukrainians alone |
| | See also notation 0882815 in Table 1 for Ruthenians as a religious group |
| —917 99 | Belarusians |
| 918 | Slavs |
| | For east Slavs, see —917 |

—918 1 Bulgarians and Macedonians

Class here comprehensive works on South Slavs

For Serbs and Montenegrins, see —9182; for Croats and Bosnians, see —9183; for Slovenes, see —9184

--918 11

Bulgarians

--918 19

Macedonians

-918.2

Serbs and Montenegrins

Class here people of Serbia as a national group; people of former Serbia and Montenegro as a national group; people of former Yugoslavia as a national group; comprehensive works on Serbs, Montenegrins, Croats, Bosnians

Subdivisions are added for Serbs and Montenegrins together, for Serbs alone

Class comprehensive works on South Slavs in —9181

For Croats, see —9183. For citizens of Serbia of other ethnic groups, citizens of former Yugoslavia of other ethnic groups, see the ethnic group, e.g., Serbian citizens of Hungarian ancestry —9451104971

Bosnians relocated to -91839

—f918 221

Serbs and Montenegrins

Number discontinued; class in —9182

--[918 23]

Croats

Relocated to —9183

---918 29

Montenegrins

---9183

Croats [formerly —91823] and Bosnians

Class here people of Croatia as a national group

Subdivisions are added for Croats and Bosnians together, for Croats alone

For citizens of Croatia of other ethnic groups, see the ethnic group, e.g., Hungarians —9451104972

--918 39

Bosnians [formerly —9182]

Class here people who speak, or whose ancestors spoke, Bosnian; Bosniaks; Bosnian Muslims; people of Bosnia and Hercegovina as a national group

For citizens of Bosnia and Hercegovina of other ethnic groups, see the ethnic group, e.g., Croats—9183049742

See also notation 088297 from Table 1 for Muslims as a religious group

-9184

Slovenes

| <u> </u> | West Slavs |
|--|---|
| | Including Kashubs |
| | Class here Poles |
| | For Cossacks, see —91714; for Czechs and Moravians, see —9186; for Slovaks, see —9187; for Wends, see —9188 |
| 9 18 6 | Czechs and Moravians |
| | Class here Czechoslovaks |
| | Subdivisions are added for either or both topics in heading |
| | For Slovaks, see —9187 |
| | See also notation 0882846 in Table 1 for Moravians as a religious group |
| 918 7 | Slovaks |
| 918 8 | Wends (Lusatians, Sorbs) |
| 919 | Balts and other Indo-European peoples |
| | Subdivisions are added for Balts and other Indo-European peoples together, for Balts alone |
| <u> 919 2 </u> | Lithuanians |
| <u>—919 3</u> | Latvians (Letts) |
| 919 9 | Albanians, Armenians, Hittites |
| 919 91 | Albanians |
| 919 92 | Armenians |
| <u>—92</u> | Semites |
| | Including peoples who spoke Syriac, other eastern Aramaic languages |
| | Class here comprehensive works on Afro-Asiatic peoples |
| | For non-Semitic Afro-Asiatic peoples, see —93 |
| 921 | Akkadians, Amorites, Assyrians, Babylonians |
| —922 | Aramaeans |
| | Including peoples who spoke western Aramaic languages |
| | Class peoples who spoke Syriac, other eastern Aramaic languages in —92 |
| 924 | Hebrews, Israelis, Jews |
| | Class here Beta Israel |
| | Subdivisions are added for any or all topics in heading |
| | See also notation 088296 in Table 1 for Jews as a religious group |
| —926 | Canaanites and Phoenicians |
| | For Amorites, see —921 |
| | |

| 927 | Arabs and Maltese |
|------------|---|
| | Subdivisions are added for Arabs and Maltese together, for Arabs alone |
| 927 2 | Bedouins |
| | See also —933 for Berbers and Tuareg |
| —927 4 | Palestinian Arabs |
| 927 5927 6 | Regional and national groups of Arabs |
| | Citizens of independent or partly independent jurisdictions having an Arab or Arabic-speaking majority or Arabic as the official language; former citizens and descendants of citizens of these jurisdictions |
| | Add to base number —927 notation 5–6 from Table 2, e.g., Iraqis —927567, North Africans —92761, Sudanese —927624; then add further as instructed at beginning of Table 5, e.g., Sudanese in Ethiopia and Ethiopian citizens of Sudanese ancestry —927624063; however, for comprehensive works on Arabs as a minority group in a country of Asia or Africa where Arabic is not the official language, see —92705–92706, e.g., Arabs in Iran —927055; for Mauritanians as a national group, see —9661 |
| | Class Palestinian Arabs as an ethnic group in —9274 |
| <u> </u> | Arabs of North Africa |
| | Number built according to instructions under —9275–9276 |
| | Class here comprehensive works on North Africans |
| | For a specific North African group not provided for here, see the group, e.g., Algerians —92765, Berbers —933 |
| —927 9 | Maltese |
| —928 | Peoples who speak, or whose ancestors spoke, Ethiopian languages |
| | Including Amhara, Gurage, Harari, Tigre, Tigrinya |
| | Class here comprehensive works on people of Ethiopia as a national group |
| | For Beta Israel, see —924; for Cushitic and Omotic peoples of Ethiopia, see —935; for Nilo-Saharan peoples of Ethiopia, see —965 |
| 928 9 | Eritreans |
| | Class here comprehensive works on people of Eritrea as a national group |
| | Class Eritreans who speak, or whose ancestors spoke, a specific Ethiopian language in —928 |
| | For Cushitic peoples of Eritrea, see —935; for Nilo-Saharan peoples of Eritrea, see —965 |
| —929 | Mahri and Socotrans |
| | Class here South Arabic peoples |

| —93 | Non-Semitic Afro-Asiatic peoples |
|------------|--|
| | Class here peoples who speak, or whose ancestors spoke, non-Semitic Afro-Asiatic languages |
| | Class comprehensive works on North Africans in —92761 |
| 931 | Ancient Egyptians |
| —932 | Copts |
| | See also notation 08828172 in Table 1 for Copts as members of the Coptic Church |
| —933 | Berbers and Tuareg |
| —935 | Cushitic and Omotic peoples |
| | Including Afar, Beja |
| | Subdivisions are added Cushitic and Omotic peoples together, for Cushitic peoples alone |
| | Class Beta Israel in —924; class Ethiopians as a national group in —928; class Eritreans as a national group in —9289; class Djiboutians as a national group in —96771 |
| —935 4 | Somali |
| | Class here Somali as a national group [formerly —96773] |
| —935 5 | Oromo |
| —935 9 | Omotic peoples |
| | Class here peoples who speak or whose ancestors spoke Omotic languages |
| 937 | Hausa |
| | Class the people of Niger as a national group in —96626 |
| —94 | Peoples of north and west Asian origin or situation; Dravidians; peoples who speak, or whose ancestors spoke, miscellaneous languages of south Asia |
| | Class here comprehensive works on peoples of Middle Eastern origin |
| | For Cypriots, see -895 ; for Indo-European peoples of these regions, see -91 ; for Semites, see -92 |
| —941 | Tungusic peoples |
| | Including Evenki, Nanai |
| 942 | Peoples who speak, or whose ancestors spoke, Mongolian languages |
| | Including Buriat (Buryat), Daur, Tu; people who speak, or whose ancestors spoke, Kalmyk-Oirat |
| | Class here Mongols |

| —942 3 | People who speak, or whose ancestors spoke, Mongolian proper |
|---|---|
| | Class here people who speak, or whose ancestors spoke, Halh Mongolian (Khalkha Mongolian); people of Mongolia as a national group |
| —943 | Turkic peoples |
| | Add to base number —943 the numbers following —943 in notation 9431–9438 from Table 6, e.g., Turks —9435, Uzbek —94325; then add further as instructed at beginning of Table 5, e.g., Turks in Germany —9435043; however, for Chuvashes, see —9456 |
| | Class Cossacks in —91714 |
| | See Manual at T5—9435 |
| —944 | Samoyed |
| —945 | Finno-Ugrians |
| 945 1 | Ugrians |
| | Including Ostyaks, Vogul |
| <u> 945 11 </u> | Hungarians |
| 945 3 | Permiaks, Votyak, Komi (Zyrian) |
| 945 4 | Finnic peoples |
| | Including Karelians, Kven, Livonians, Veps; people who speak, or whose ancestors spoke, Tornedalen Finnish |
| | For Permiaks, Votyak, Komi, see —9453; for Cheremis, Chuvashes, Mordvin, see —9456; for Sámi, see —9457 |
| 945 41 | Finns |
| | Class Kven and people who speak, or whose ancestors spoke, Tornedalen Finnish in —9454 |
| 945 45 | Estonians |
| [945 5] | Sámi |
| | Relocated to —9457 |
| 945 6 | Mari, Chuvashes, Mordvin |
| 945 7 | Sámi [formerly —9455] |
| | Add to base number —9457 the numbers following —9457 in notation 94572–94578 from Table 6, e.g., people who speak or whose ancestors spoke Lule Sámi —945743; then add further as instructed at beginning of Table 5, e.g., Lule Sámi in Sweden —9457430485 |
| —946 | Paleo-Asiatic (Paleosiberian) peoples |
| | Including Ainu (Utari); peoples who speak or whose ancestors spoke Chukotko-Kamchatkan (Luorawetlin), Yukaghir languages; Nivkh (Gilyak), Ket (Yenisei Ostyak) |

| —948 | Dravidians and and peoples who speak, or whose ancestors spoke, miscellaneous languages of south Asia |
|---------------|--|
| | Class here peoples who speak, or whose ancestors spoke, Dravidian languages |
| | Subdivisions are added for Dravidians and peoples who speak, or whose ancestors spoke, miscellaneous languages of south Asia together, for Dravidians alone |
| | Use of this number for Scytho-Dravidians discontinued because without meaning in context |
| | Sindhi relocated to -91425; Maratha relocated to -91461 |
| —948 1 | South Dravidians |
| | Including Toda |
| | Class here peoples who speak, or whose ancestors spoke, south Dravidian languages |
| —948 11 | Tamil |
| —948 12 | Malayalis |
| —948 14 | Kanarese |
| 948 2 | Central Dravidians |
| | Class here peoples who speak, or whose ancestors spoke, central Dravidian languages |
| 948 23 | Gond |
| —948 24 | Kandh (Kondh, Kui) |
| —948 27 | Telugu |
| 948 3 | North Dravidians |
| | Including Oraon (Kurux, Kurukh) |
| | Class here Brahui; peoples who speak, or whose ancestors spoke, north Dravidian languages |
| —948 9 | Peoples who speak, or whose ancestors spoke, miscellaneous languages of south Asia |
| | Only those peoples provided for below |
| | Including people who speak, or whose ancestors spoke, Nihali |
| | Class south Asians who speak, or whose ancestors spoke, languages closely related to east and southeast Asian languages in —95; class Andamanese in —959; class Indo-Aryans, comprehensive works on south Asians in —914 |
| 948 92 | Burusho |
| | Class here people who speak, or whose ancestors spoke, Burushaski |

—95 East and southeast Asian peoples; Munda

Including Karen

Class here east Asians; south Asian peoples who speak, or whose ancestors spoke, languages closely related to languages of east and southeast Asia; comprehensive works on Asian peoples

For a specific Asian people not provided for here, see the people, e.g., Persians —9155, Malays —9928

—951 Chinese

Class here Han Chinese; people who speak or whose ancestors spoke Mandarin Chinese (Putonghua), Beijing dialect; comprehensive works on people of China as a national group

For Chinese citizens of other ethnic groups, see the ethnic group, e.g., Mongol —942051

—951 7 Hakka

Class here people who speak or whose ancestors spoke Hakka dialects

—954 Tibeto-Burman peoples

Including Naxi

Class here peoples who speak, or whose ancestors spoke, Tibeto-Burman languages

Class Karen in -95

For Burmese, see -- 958

—954 1 Tibetans

Class here Bhotia as an ethnic group

See also —91418 for Bhutanese as a national group

—954 9 Eastern Himalayan peoples

Including Chepang, Newar

Class here peoples who speak, or whose ancestors spoke, eastern Himalayan languages

See also —91495 for Nepali

--956 Japanese

Including Ryukyuans

For Ainu, see -946

—957 Koreans

—958 Burmese

| —959 | Miscellaneous southeast Asian peoples; Munda |
|--------------------|--|
| | Only those peoples provided for below |
| | Including Andamanese [formerly —9911]; peoples who speak, or whose ancestors spoke, Kadai languages, Kam-Sui languages |
| | Class here peoples who speak, or whose ancestors spoke, Daic languages |
| 959 1 | Tai peoples |
| | Class here peoples who speak, or whose ancestors spoke, Tai languages |
| —959 11 | Thai (Siamese) |
| —959 19 | Other Tai peoples |
| | Including Shan |
| | For Viet-Muong peoples, see —9592 |
| 959 191 | Lao |
| —959 2 | Viet-Muong peoples |
| | Class here peoples who speak, or whose ancestors spoke, Viet-Muong languages |
| | Class comprehensive works on Montagnards of Vietnam in —9593 |
| —959 22 | Vietnamese |
| —959 3 | Austroasiatic peoples |
| | Including Semang [formerly —9911]; comprehensive works on Montagnards of Vietnam |
| | Class here peoples who speak, or whose ancestors spoke, Austroasiatic languages, Mon-Khmer languages |
| | For Viet-Muong peoples, see —9592; for Munda, see —9595. For Montagnards of a specific ethnic group, see the ethnic group, e.g., Rhade —9922 |
| —959 32 | Khmer |
| | Class here Khmer as an ethnic group, comprehensive works on people of Cambodia as a national group |
| | For citizens of Cambodia belonging to another ethnic group, see the ethnic group, e.g., Jarai—9922 |
| —[959 4] | Hmong and Yao peoples |

--96073

-963

-963915

-963 93

-96 Africans and people of African descent

Class here Blacks of African origin

For peoples who speak or whose ancestors spoke Ethiopian languages, see —928; for non-Semitic Afro-Asiatic peoples, see —93; for Malagasy, see —993

—960 67 Africans of Central Africa and offshore islands

Number built according to instructions at beginning of Table 5

Class here comprehensive works on African pygmies

For specific groups of African pygmies, see the specific ethnic group, e.g., Baka —96361

African Americans (United States Blacks)

Unless it is redundant, add 0* to —96073 and to the result add notation 1–9 from Table 2 for area, e.g., African Americans in England —96073042, African Americans in New York —960730747, but African Americans in United States —96073

See Manual at T5-96073

—961 Khoikhoi and San

Peoples who speak, or whose ancestors spoke, Niger-Congo languages

Including peoples who speak, or whose ancestors spoke, Ijoid languages, Kordofanian languages; Dogon

Add to base number —963 the numbers following —963 in notation 9632–9639 from Table 6, e.g., Zulu —963986; then add further as instructed at beginning of Table 5, e.g., Zulu in Malawi —96398606897

—963 91 Peoples who speak, or whose ancestors spoke, central Bantu languages

Number built according to instructions under —963

Peoples who speak, or whose ancestors spoke, Fipa-Mambwe languages relocated to —96394

Peoples who speak, or whose ancestors spoke, languages of Bemba group

Number built according to instructions under —963

People who speak, or whose ancestors spoke, Bwile relocated to —96393

Peoples who speak, or whose ancestors spoke, central western Bantu languages

Number built according to instructions under -- 963

Including people who speak, or whose ancestors spoke, Bwile [formerly —963915]

^{*}Add 00 for standard subdivisions; see instructions at beginning of Table 5

-96394

Peoples who speak, or whose ancestors spoke, northern Bantu languages

Number built according to instructions under —963

Including peoples who speak, or whose ancestors spoke, Fipa-Mambwe languages [formerly —96391]

---965

Peoples who speak, or whose ancestors spoke, Nilo-Saharan languages

Including Nilotic peoples, Nubians, Luo, Songhai

Class here peoples who speak or whose ancestors spoke Chari-Nile (Macrosudanic) languages

--966-968

Regional and national groups in Africa

Citizens of independent and partly independent jurisdictions; former citizens and descendants of citizens of these jurisdictions

Add to base number —96 the numbers following —6 in notation 66–68 from Table 2, e.g., West Africans —966, Nigerians —9669; then add further as instructed at beginning of Table 5, e.g., Nigerians in the United Kingdom and British citizens of Nigerian origin —9669041; however, Somali as a national group relocated from —96773 to —9354

Class nationals of a specific ethnolinguistic group with the group, e.g., South Africans of British origin —28, Nigerian Hausa —9370669, Nigerian Igbo —963320669

See also —9276 for national groups of African Arabs, e.g., modern Egyptians —92762, Sudanese —927624; also —928 for Ethiopians as a national group; also —9289 for Eritreans as a national group; also —931 for ancient Egyptians as a national group

---969

Other regional and national groups of largely African descent

Citizens of independent and partly independent jurisdictions outside Africa; former citizens and descendants of citizens of these jurisdictions

Add to base number —969 notation 4–9 from Table 2, e.g., West Indians —969729, Haitians —9697294, Virgin Islanders —96972972; then add further as instructed at beginning of Table 5, e.g., Haitians in the United States —9697294073

Class Cubans in —687291; class Dominicans (Dominican Republic) in —687293; class Puerto Ricans in —687295; class minority groups of African descent in —9604–9609, plus notation from Table 2 as instructed at beginning of Table 5 to show where the groups are located, e.g., people of African descent in Canada —96071. Class nationals of a specific ethnolinguistic group with the group, e.g., Bahamians of English origin —2107296

--969729

Caribbean peoples of largely African descent

Number built according to instructions under —969

Class here comprehensive works on Caribbean peoples

For Caribbean peoples of other ethnic groups, see the ethnic group, e.g., Spanish Americans —68729

—97 North American native peoples

Class here peoples who speak, or whose ancestors spoke, North American native languages; comprehensive works on Woodland Indians, on North and South American native peoples

Class national groups of modern Central America where Spanish is an official language in —68728 even if the majority of their population is of North American native origin, e.g., Guatemalans as a national group —687281. Class a specific group of Woodland Indians with the group according to the language that the Indians speak or their ancestors spoke, e.g., Iroquois —9755

For South American native peoples, see -98

-97078

Indians of Western United States

Number built according to instructions at beginning of Table 5

Class here Plains Indians

For a specific group of Plains Indians, see the group according to the language that the Indians speak or their ancestors spoke, e.g., Cheyenne—97353

---971

Peoples who speak, or whose ancestors spoke, Inuit, Yupik, Aleut languages

Class here peoples who speak, or whose ancestors spoke, Eskimo languages

---971 2

Peoples who speak, or whose ancestors spoke, Inuit (Inuktitut) languages

Including Greenlandic Inuit, Inupiat

Class comprehensive works on peoples who speak, or whose ancestors spoke, Inuit and Yupik languages in —971

—971 24

Eastern Canadian Inuit

--9714

Peoples who speak, or whose ancestors spoke, Yupik languages

Including peoples who speak, or whose ancestors spoke, Siberian Yupik languages; Yuit

--971 9

Aleut

--972

Peoples who speak, or whose ancestors spoke, Na-Dene languages

Including Chipewyan, Gwich'in, Hupa, Koyukon, Tinne

Class here peoples who speak, or whose ancestors spoke, Athapaskan languages

--972 5

Peoples who speak, or whose ancestors spoke, Apachean languages

Including Jicarilla Apache, Kiowa Apache

Class here Apache

For Navajo, see -9726

See also -97492 for Kiowa

| 972 56 | Chiricahua Apache and Mescalero Apache |

| | Including Jakun, Kanaq, Seletar, Temuan, other peoples who speak, or whose ancestors spoke, Malayo-Polynesian languages of Peninsular Malaysia other than Malay (Bahasa Malaysia, Standard Malay) |
| | Class here people who speak, or whose ancestors spoke, Malay (Bahasa Malaysia, standard Malay); people of Malaysia as a national group |
| | For citizens of Malaysia belonging to other ethnic groups, see the ethnic group, e.g., Chinese —9510595 |
| | See also —9593 for peoples who speak, or whose ancestors spoke, Semang, Senoic, other Aslian languages |
| —993 | Malagasy |
| 994 | Peoples who speak, or whose ancestors spoke, Polynesian languages |
| | Class here national groups of Polynesia; former citizens and descendants of citizens of these jurisdictions |
| | Add to base number —994 the numbers following —994 in notation 9942–9948 from Table 6, e.g., Tahitians —99444; then add further as instructed at beginning of Table 5, e.g., Tahitians in New Zealand —99444093 |
| | Comprehensive works on Pacific Islanders relocated to —995 |

| <u> 995 </u> | Peoples who speak, or whose ancestors spoke, eastern Malayo-Polynesian languages |
|--|---|
| | Class here comprehensive works on Pacific Islanders [formerly —994]; national groups of Melanesia |
| | For Papua New Guineans as a national group and peoples who speak, or whose ancestors spoke, Papuan languages, see —9912; for national groups of Polynesia and peoples who speak, or whose ancestors spoke, Polynesian languages, see —994 |
| <u> 995 2 </u> | Peoples who speak, or whose ancestors spoke, Micronesian languages |
| | Including Chamorro, Palauans |
| | Class here national groups of Micronesia |
| 995 9 | Fijians |
| | Class here peoples who speak, or whose ancestors spoke, eastern Fijian languages; people who speak, or whose ancestors spoke, standard Fijian; Fijians as a national group |
| | For Fijian citizens of south Asian origin, see —91409611 |
| 999 | Miscellaneous peoples |
| | Limited to peoples provided for below |
| —999 2 | Basques |
| 999 3 | Elamites |
| 999 4 | Etruscans |
| —999 5 | Sumerians |
| 999 6 | Georgians, Ingush, Chechen, Circassians, related peoples |
| | Class here peoples who speak, or whose ancestors spoke, Caucasian (Caucasic) languages |
| | Add to base number —9996 the numbers following —9996 in notation 99962–99969 from Table 6, e.g., Georgians —99969; then add further as instructed at beginning of Table 5, e.g., Georgians in Canada —99969071 |

Table 6. Languages

The following notation is never used alone, but may be used with those numbers from the schedules and other tables to which the classifier is instructed to add notation from Table 6, e.g., translations of the Bible (220.5) into Dutch (—3931 in this table): 220.53931; regions (notation 175 from Table 2) where Spanish language (—61 in this table) predominates: Table 2 notation 17561. When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number

Unless there is specific provision for the old or middle form of a modern language, class these forms with the modern language, e.g., Old High German —31, but Old English —29

Unless there is specific provision for a dialect of a language, class the dialect with the language, e.g., American English dialects —21, but Swiss-German dialect —35

Unless there is a specific provision for a pidgin, creole, or mixed language, class it with the source language from which more of its vocabulary comes than from its other source language(s), e.g., Crioulo language—69, but Papiamento—68. If in doubt, prefer the language coming last in Table 6, e.g., Michif—97323 (not—41)

The numbers in this table do not necessarily correspond exactly to the numbers used for individual languages in 420–490 and in 810–890. For example, although the base number for English in 420–490 is 42, the number for English in Table 6 is —21, not —2

(Option A: To give local emphasis and a shorter number to a specific language, place it first by use of a letter or other symbol, e.g., Arabic language —A [preceding —1]. Option B is described at —1)

See Manual at Table 6

SUMMARY

| —1 | Indo-European languages |
|------------|---|
| <u>2</u> | English and Old English (Anglo-Saxon) |
| —3 | Germanic languages |
| _4 | Romance languages |
| — 5 | Italian, Dalmatian, Romanian, Rhaetian, Sardinian, Corsicar |

Relocations and Discontinuations

In Edition 23, relocation and discontinuation notes usually follow other types of notes at the former location (the location from which a topic or group of topics has been shifted) in the schedules and tables.

The following two lists show all the relocations and discontinuations since Edition 22.

The column headed Edition 22 indicates in numerical order each number in that edition from which a topic or group of topics has been shifted; the column headed Edition 23 indicates each corresponding number in the present edition to which those topics or groups of topics have been shifted. If two or more topics have been shifted from one number to two or more numbers, each separate shift is shown.

Numbers in the Edition 22 column enclosed in square brackets are no longer in use; those not enclosed in brackets have lost part of their meaning through relocation or discontinuation, but still retain some of their original meaning.

In the following lists, the same abbreviations employed in the Relative Index are used for Tables 1–6, e.g., T1 means Table 1 Standard Subdivisions.

Relocations

In a relocation, one or more topics are shifted to a number differing form the old in respects other than length. If the relocation is partial, the original number remains valid; but if it is total, the original number is no longer used. Relocations are described and explained in the Introduction.

Relocations that have appeared previously in an interim update prior to publication of Edition 23 are indicated by * next to the Edition 22 number. Relocations that eliminate dual provision for the same topic or topics are indicated by † next to the Edition 22 number.

For example, in Table 2 one of the topics that was in —364 in Edition 22 has been relocated to —3692 in Edition 23; all of the topics in —3925 have been relocated to —39313. All the topics in —992 have been relocated to —9952 to eliminate dual provision. Scattered within 305–306 means that the topic has been relocated to so many numbers throughout that span that it is not feasible to name them all. A number or number range following a colon is an element of an add table. For example, 839.7:6 refers to notation 6 in the add table at 839.7.

For details of the specific relocated topics the classifier should consult the appropriate entries in the tables and schedules.

Discontinuations

A discontinuation is the result of shifting one or more topics to a number shorter than the previous one but otherwise not differing from it. If all topics in a given number are thus shifted, the number is no longer valid. Discontinuations are described and explained in the Introduction.

In addition, several numbers have been dropped because their content in Edition 22 was meaningless within the context of Edition 23.

For example in Table 2, [—469425] has been discontinued and all of its contents moved up to the broader number —46942, while only some of the topics in —48977 have been moved up to —48. In Table 5, [—948] has been discontinued because it is without meaning.

A number or number range following a colon is an element of an add table. For example, 342–347:011 refers to notation 011 in the add table at 342–347.

For details of the specific discontinued topics the classifier should consult the appropriate entries in the tables and schedules.

Equivalence Tables

The following equivalence tables lead in Table A from Edition 22 numbers to Edition 23 numbers and in Table B from Edition 23 numbers to Edition 22 numbers for cinematography and videography.

In most cases, the topics in an Edition 22 number are assigned to the corresponding Edition 23 number. If the topics are assigned to different numbers, the topics are listed separately in the Notes column. For example, in Table A, both recorders and recording formats were classed in 778.599 in Edition 22, but in Edition 23 they are classed in 777.36 and 777.38, respectively.

Table A

Reused Numbers

A reused number is a number with a total change in meaning from one edition to another. The list of reused numbers shows all Edition 22 numbers immediately reused in Edition 23.
