AudioCodes IP Phones enter Microsoft Lync Third Party Device Interoperability Program

AudioCodes 300HD and 400HD series IP Phones slated to be qualified with Microsoft Lync Server 2010

Lod, Israel – September 13, 2012 – AudioCodes (NasdaqGS: AUDC), a leading provider of Voice over IP (VoIP) technologies, products and services, today announced that its 300HD and 400HD IP Phone products are being tested for compatibility with Lync. Qualification is expected to be completed by late fourth quarter 2012.

Microsoft tests and qualifies third party phones for interoperability and basic quality of experience with Microsoft Lync 2010.

AudioCodes 300HD and 400HD Series of High Definition [IP Phones](#) offers enhanced voice call quality and clarity for the Enterprise IP telephony markets. As a natural addition to the AudioCodes [Media Gateway](#) and [Enterprise Session Border Controller](#) products, the AudioCodes 300HD and 400 HD Series of High Definition IP Phones enable value added resellers (VARs), systems integrators and end-customers to build end-to-end Unified Communications solutions with Microsoft Lync 2010, based on AudioCodes' technological advantage and proven track record in voice quality and ease of use.

Upon qualification, AudioCodes plans to offer a free firmware upgrade for those customers with existing 300HD and 400HD series phones, enabling direct integration of those devices to Microsoft Lync 2010.

"We see the qualification of AudioCodes 300HD and 400HD IP Phones with Microsoft Lync as highly valuable to our partner community," said Lior Aldema, Chief Operating Officer of AudioCodes. "Sourcing gateways, E-SBCs, IP Phones and professional services from the same vendor simplifies the purchasing, deployment and support processes, effectively reducing costs for our partners."

"We're pleased to welcome AudioCodes and their 300HD and 400HD IP phones to our phone interoperability program," said Jyoti Black, Senior Director, Microsoft. "Once AudioCodes IP phones are qualified, partners can benefit from simplifying purchase, training, and support by procuring phones, gateways, SBAs and E-SBCs from a single vendor."

About AudioCodes

AudioCodes Ltd. (NasdaqGS: AUDC) designs, develops and sells advanced Voice over IP (VoIP) and converged VoIP and Data networking products and applications to Service Providers and Enterprises. AudioCodes is a VoIP technology market leader focused on converged VoIP and data communications and its products are deployed globally in Broadband, Mobile, Enterprise networks and Cable. The Company provides a range of innovative, cost-effective products including Media Gateways, Multi-Service Business Gateways, Session Border Controllers (SBC), Residential Gateways, IP Phones, Media Servers and Value Added Applications. AudioCodes' underlying technology, VolPerfectHD™, relies on AudioCodes' leadership in DSP, voice coding and voice processing technologies. AudioCodes' High Definition (HD) VoIP technologies and products provide enhanced intelligibility and a better end user communication experience in Voice communications.
