## ACKNOWLEDGMENTS

The following individuals contributed to the development of this document: Bruce Allen (Missouri Botanical Garden-MOBOT), Mike Arduser (Missouri Department of Conservation-MDC-retired), John Atwood (MOBOT), Alan Brant, John Brinda (MOBOT), Jeff Briggler (MDC), Malissa Briggler (MDC), Christopher Brown (Monsanto), Steve Buback (MDC), Dorothy Butler (MDC), Rick Clawson (MDC-retired), Bob DiStefano (MDC), Bill Elliott (MDC-retired), Tony Elliott (MDC), Randy Evans (MDC), Debby Fantz (MDC), Susan Farrington (MDC), Dennis Figg (MDC-retired), Jane Fitzgerald (Partners In Flight), Matt Gompper (University of Missouri - Columbia), Lonnie Hansen (MDC-retired), Janet Haslerig (MDC), Nels Holmberg (MOBOT), Peggy Horner (Ozark Regional Land Trust), Bob Hrabik (MDC), Vicki Jackson (University of Central Oklahoma), Brad Jacobs (MDC-retired), Tom Johnson (MDC-retired), Harold Kerns (MDC-retired), Dave Knuth (MDC), Phil Koenig, Jeff Koppelman (MDC-retired), Doug Ladd (The Nature Conservancy), Mike Leahy (MDC), Bill Mabee (MDC), Ted MacRae (Monsanto), Paul McKenzie (U.S. Fish and Wildlife Service-USFWS), Stephen McMurray (MDC), Elizabeth Middleton (MDC), Tim Nigh (MDC-retired), Doug Novinger (MDC), Elizabeth Olson (MDC), William Pflieger (MDC-retired), Barry Poulton (U.S. Geological Survey), Lynn Robbins (Missouri State University-retired), Randy Sarver (Department of Natural Resources), John Scheibe (Southeast Missouri State University), Tim Smith (MDC-retired), Janet Sternburg (MDC), Bill Summers, Richard Thoma (Monsanto-retired), Justin Thomas (NatureCITE), James Trager (MOBOT, Shaw Nature Reserve), Jacob Westhoff (MDC), Kathryn Womack (MDC), George Yatskievych (UT Austin).

**NOTICE:** Please submit reports of all sightings of species and natural communities listed in this checklist on the forms provided in the back of this checklist. Special criteria apply to birds and reports should follow the guidelines listed in Appendix A.

## INTRODUCTION

The Missouri Department of Conservation (MDC) is charged with the protection and management of Missouri's fish, forest, and wildlife resources. In the brief time since the settlement of Missouri, many plants and animals have declined to levels of concern and some have disappeared entirely. The species cataloged in this checklist represent 18 percent of the native vascular plants, 14 percent of the nonvascular plants, 28 percent of the vertebrate animals, and an unknown percentage of the native invertebrate species in Missouri. Together, the animals, plants, and natural communities represent Missouri's biological diversity—a natural heritage worth protecting.

The Department maintains two references relating to the status of listed plants and animals in Missouri: the *Missouri Species and Communities of Conservation Concern Checklist (Checklist)* and the *Wildlife Code of Missouri (Code)*. The *Checklist* is used mainly for planning and communication purposes. All native animal species in the State of Missouri are protected as biological diversity elements unless a method of legal harvest, harm or take is described in the *Code*. All native plant species in the State of Missouri are protected as biological diversity elements only on land owned by the Missouri Department of Conservation. Species listed in the *Code* under 3 CSR 10-4.111 and all federally listed endangered and threatened plants and animals protected by the Endangered Species Act of 1973 (ESA) are protected by the State Endangered Species Law 252.240. Some additional plants and animals in this *Checklist* also appear in the *Code* and are afforded special legal protection.

### How to use the checklist

The checklist, developed with the cooperation of specialists throughout the state, is a list of plants, animals, and natural communities that MDC is particularly concerned about due to population declines or apparent vulnerability. The global and state ranks indicate the level of concern for each Element's (i.e., a species or type of natural community) continued existence throughout its range and in Missouri, respectively. Global ranks are assigned by the Natural Heritage/Conservation Data Center personnel and/or NatureServe. State Ranks in Missouri are assigned by the Missouri Natural Heritage Program within the Missouri Department of Conservation.

The Global and State Ranking System methodology was developed and provided by The Nature Conservancy, Conservation Science Division, in association with the Network of Natural Heritage Programs and Conservation Data Centers.

The checklist is arranged by broad taxonomic groups (e.g., terrestrial natural communities, flowering plants, insects, fish, and mammals). Within each group, species are arranged alphabetically by their scientific names and terrestrial natural communities by community type. Each Element is identified by its scientific name, common name, state rank, global rank, state status, and federal status.

## TERMS AND DEFINITIONS

### **FEDERAL STATUS**

The federal status is derived from the provisions of the Endangered Species Act of 1973, as amended, which is administered by the U.S. Fish and Wildlife Service (USFWS). Passage of the Endangered Species Act of 1973 gave the United States one of the most important laws ever enacted by any country to prevent the extinction of imperiled animals and plants. Protecting endangered and threatened species and restoring them to the condition where their existence is no longer jeopardized is the primary objective of the USFWS Endangered Species Program.

**E: Endangered:** Any species which is in danger of extinction throughout all or a significant portion of its range.

**T: Threatened:** Any species which is likely to become endangered within the foreseeable future.

**C: Candidate:** Plants or animals which USFWS is reviewing for possible addition to the list of endangered and threatened species.

**PE: Proposed Endangered:** Species officially proposed for listing as endangered; final ruling not yet made.

**PT: Proposed Threatened:** Species officially proposed for listing as threatened; final ruling not yet made.

**SAT: Threatened due to similarity of appearance:** Species is listed for its protection due to similarity of appearance with another listed species. Species listed as SAT are not biologically threatened.

### **STATE STATUS**

Rule 3CSR10-4.111 of the *Wildlife Code of Missouri* and certain state statutes apply to state *Code-listed* species.

**E: Endangered:** Determined by MDC under constitutional authority.

### **GLOBAL RANK (GRANK)**

Global ranks are assigned and maintained by the Natural Heritage/Conservation Data Center and/or NatureServe. A numeric rank (G1 through G5) of relative imperilment based on standard rank factors:

- the estimated number of Element Occurrences (EOs) throughout the Element's global, national, or subnational range;
- the estimated numbers of those EOs with good viability;
- the estimated abundance of the Element (measured in terms of population for species Elements as well as occupied area or linear distance for both species and communities);
- the estimated size of the Element's range;
- the short- and long-term trends in the Element's distribution over its range;
- the estimated number of adequately protected EOs throughout the Element's range globally, nationally, or subnationally;
- the scope, severity, and immediacy of threats to the Element;
- the vulnerability of the Element to intrusion; and
- the specificity of the Element's environmental requirements.

## **GLOBAL RANK (Cont.)**

**G1: Critically Imperiled:** At very high risk of extinction or elimination due to extreme rarity, very steep declines, or other factors.

**G2: Imperiled:** At high risk of extinction or elimination due to very restricted range, very few populations or occurrences, steep declines, or other factors.

**G3: Vulnerable:** At moderate risk of extinction or elimination due to a restricted range, relatively few populations or occurrences, recent and widespread declines, or other factors.

**G4: Apparently Secure:** Uncommon but not rare; some cause for long-term concern due to declines or other factors.

**G5: Secure:** Common; widespread and abundant.

**G#G#: Range Rank:** A numeric range rank (e.g., G2G3) is used to indicate uncertainty about the exact status of a taxon. Ranges cannot skip more than two ranks (e.g., GU should be used rather than G1G4).

**GU: Unrankable:** Currently unrankable due to lack of information or due to substantially conflicting information about status or trends. Note: Whenever possible (when the range of uncertainty is three consecutive ranks or less), a range rank (e.g., G2G3) should be used to delineate the limits (range) of uncertainty.

**GNR: Unranked:** Global rank not yet assessed.

**GH: Possibly Extinct:** Known from only historical occurrences but still some hope of rediscovery. There is evidence that the species may be extinct but not enough to state this with certainty. Examples of such evidence include (1) that a species has not been documented in approximately 20-40 years despite some searching or some evidence of significant habitat loss or degradation; and (2) that a species has been searched for unsuccessfully, but not thoroughly enough to presume that it is extinct.

**GX: Presumed Extinct:** Not located despite intensive searches and virtually no likelihood of rediscovery.

**SUBRANK:**

**T#: Infraspecific Taxon (binomial):** Rank applies to a subspecies or variety. Rules for assigning T-ranks follow the same principles outlined above.

**QUALIFIERS:**

**?: Inexact Numeric Rank:** Denotes inexact numeric rank; it is not used in combination with range ranks, GH, or GX.

**Q: Questionable Taxonomy:** Distinctiveness of this entity as a taxon at the current level is questionable; resolution of this uncertainty may result in change from a species to a subspecies or hybrid, inclusion of this taxon in another taxon, with the resulting taxon having a lower-priority (numerically higher) conservation status rank.

## **STATE RANK**

Assigning national and subnational conservation status ranks for species and ecosystems (ecological communities and systems) follows the same general principles as used in assigning global status ranks. Subnational ranks are assigned and maintained by the Missouri Natural Heritage Program (MONHP).

**S1: Critically Imperiled:** Critically imperiled in the state because of extreme rarity or because of some factor(s) such as very steep declines making it especially vulnerable to extirpation from the state.

**S2: Imperiled:** Imperiled in the state because of rarity due to very restricted range, very few populations or occurrences, steep declines, or other factors making it very vulnerable to extirpation from the state.

**S3: Vulnerable:** Vulnerable in the state due to a restricted range, relatively few populations or occurrences, recent and widespread declines, or other factors making it vulnerable to extirpation.

**S4: Apparently Secure:** Uncommon but not rare; some cause for long-term concern due to declines or other factors.

**S5: Secure:** Common, widespread, and abundant in the state.

**S#S#: Range Rank:** A numeric range rank (e.g., S2S3) is used to indicate any range of uncertainty about the status of the species. Ranges cannot skip more than two ranks (e.g., SU is used rather than S1S4).

**SU: Unrankable:** Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.

**S?: Unranked:** State rank not yet assessed.

**SE: Exotic:** An exotic established in the state; may be native in nearby regions (e.g., house finch or catalpa in eastern U.S.).

**SA: Accidental:** Accidental or casual in the state, in other words, infrequent and outside its usual range. Includes species (usually birds or butterflies) recorded once or only a few times at a location. A few of these species may have bred on the one or two occasions they were recorded. Examples include European strays or western birds on the East Coast and vice-versa.

**SP: Potential:** Potential that the species occurs in the state, but no extant or historic occurrences are accepted.

**SR: Reported:** Species reported in the state but without a basis for either accepting or rejecting the report, or the report not yet reviewed locally. Some of these are very recent discoveries for which the Program has not yet received first-hand information; others are old, obscure reports.

**SRF: Reported Falsey:** Species erroneously reported in the state and the error has persisted in the literature.

### **STATE RANK (*Cont.*)**

**SH: Possibly Extirpated:** Known from only historical records but still some hope of rediscovery. There is evidence that the species may no longer be present in the state, but not enough information to state this with certainty. Examples of such evidence include (1) that a species has not been documented in approximately 20-40 years despite some searching or some evidence of significant habitat loss or degradation; and (2) that a species has been searched for unsuccessfully, but not thoroughly enough to presume that it is no longer present in the state.

**SX: Presumed Extirpated:** Species is believed to be extirpated from the state. Not located despite intensive searches of historical sites and other appropriate habitat, and virtually no likelihood that it will be rediscovered.

### **QUALIFIERS:**

**?: Inexact or Uncertain:** Denotes inexact or uncertain rank; this should not be used with range ranks, SH, or SX.

## SPECIES CHANGES

### **STATUS CHANGES**

#### **PLANTS**

*Potentilla supina* ssp. *paradoxa* is changed from S1 to S2 after 2017 and 2018 surveys documented new populations in Cole, Boone, Moniteau, and Washington Counties.

#### **INSECTS**

*Bombus affinis* (Rusty Patch Bumblebee) Federal status changed to Endangered due to Federal action.

*Trimerotropis maritima* (Seaside Grasshopper) from SH to S1 due to several recent collections in alluvial sand deposits in Northwest Missouri.

### **ADDITIONS**

#### **CRUSTACEANS**

The Spring River Crayfish (*Faxonius roberti*) was known in Missouri from only the West Fork of the South Fork of the Spring River in Howell County where it comprised 25% of the crayfish community prior to 1984. However, the species has been declining in Missouri since that time due to introduction and spread of an invasive crayfish, and possibly due to drought and stream drying. Three recent surveys have failed to detect the species in Missouri and for many stream miles into Arkansas, and it appears that it may have been extirpated from Missouri. The U.S. Fish and Wildlife Service has considered the species for possible federal listing as Threatened or Endangered.

#### **INSECTS**

*Dianthidium texanum* (A Leafcutter Bee) as S1. Currently known only from a handful of glades in Eastern Missouri. Mostly on igneous glades, with one record from a sandstone glade.

*Macropis steironematis* (An Oil-collecting Bee) as S1 due to recent collection. Collected in tallgrass prairie in regularly sampled community.

*Melanoplus francoisensis* (A Spur-throat Grasshopper) as S1. Recently described species. Appears to be endemic to igneous substrates in MO.

*Papaipema eryngii* (Rattlesnake-master Borer Moth) as S3. Federal candidate for listing. Previously not known from Missouri, but now found at 17 sites, mostly in Unglaciated prairies.

#### **MAMMALS**

*Lasiurus cinereus* (Hoary Bat) as S3 due to fatalities related mainly to wind energy facilities. This species occurs throughout Missouri from spring – fall with undocumented winter use in Missouri.

### **DELETIONS**

#### **PLANTS**

The status for *Galium asprellum* has changed from SH to SRF as the perceived presence in MO was likely due to an error in an herbarium label that should have indicated the collection site in WI. Therefore, the species has not been documented in MO and is removed from the SOCC list.

*Opuntia polyacantha* var. *polyacantha* is no longer tracked as it is considered a non-native species in MO and the only MO occurrence had become naturalized from a previous planting.

*Symphyotrichum subulatum* var. *ligulatum* is no longer tracked as it is considered a non-native species and recent surveys indicate an expanding distribution along roadsides and floodplains in MO.

## **TAXONOMIC CHANGES**

### **LIVERWORTS AND HORNWORTS**

The taxon name for *Aneura maxima* is changed to *A. sharpii* as *A. maxima* is now considered a species restricted to Europe and Asia.

### **PLANTS**

The taxon name for *Leitneria floridana* is changed to *Leitneria pilosa* ssp. *ozarkana* as described by Schrader and Graves in 2011 (*Taxonomy of Leitneria Resolved by ISSR, ITS, and Morphometric Characterization*, Castanea 73[3]: 313-338).

The taxon name for *Rynchospora globularis* is changed to *Rynchospora globularis* var. *globularis*. Current collections from Missouri are identified as *Rynchospora globularis* var. *globularis*.

### **CRUSTACEANS**

Recent taxonomic work on several primary burrowing crayfish species has resulted in changes to taxonomy and nomenclature for two species:

The genus name for Painted Devil Crayfish (*Cambarus*) changes to *Lacunicambarus*, so the full Latin name will be *Lacunicambarus ludovicianus*.

Similarly, the genus name for Paintedhand Mudbug (*Cambarus*) changes to *Lacunicambarus*, so the full Latin name will be *Lacunicambarus polychromatus*.

A recent global evaluation of crayfish taxonomy and nomenclature (Crandall and De Graves 2017) has resulted in all Missouri crayfishes in the genus *Orconectes* being reclassified to the genus *Faxonius*.

### **FISH**

Recent taxonomic work indicates all populations of the Southern Cavefish (*Typhlichthys subterraneus*) in Missouri are a new species called the Salem Plateau Cavefish (*Typhlichthys eigenmanni*). Populations of Southern Cavefish now occur only outside of Missouri.

The scientific name for Ozark Cavefish changed to *Troglichthys rosae* from *Amblyopsis rosae*.

## TERRESTRIAL NATURAL COMMUNITIES

In addition to lichens, plants, and animals, the MONHP tracks occurrences of high quality natural communities. Terrestrial natural communities are interrelated assemblages of plants, animals, and other living organisms incorporated into their physical surroundings- including geologic substrate, soils, topography and aspect - that are shaped by climate and other natural processes. High quality sites are ones that provide diverse assemblages of native species and represent the least distressed examples of ecosystems that existed in Missouri prior to European settlement. These natural communities frequently provide the habitat necessary for Missouri's listed lichens, plants, and animals. Examples of high-quality aquatic natural communities are included in the MONHP, although SRANKs have not been assigned to individual aquatic natural community types. Because MDC tracks occurrences of high quality natural communities, we encourage the submission of site information on natural communities as we do for species listed in this Checklist.

State ranks are assigned to natural communities using criteria that are similar to species SRANKs. Criteria include total number of occurrences, number of occurrences by grade [A-D], total acres, number of counties in which the community type occurs, number of protected occurrences, and threats. Global ranks are not applied to communities due to the difficulty in reconciling Missouri's classification system with larger scale classifications.

Natural community types have been classified using *The Terrestrial Natural Communities of Missouri* (Nelson, 2005). This classification system was developed to accomplish an inventory of the state's natural communities, prioritized by quality, size and distribution, to help meet land protection goals. The terrestrial natural communities tracked in MONHP (high-quality examples) are listed below with their SRANKs by major community type.

### **COMMUNITY TYPE**

#### **FOREST**

	<b><u>SRANK</u></b>
Dry-Mesic Loess/Glacial Till Forest	S3
Mesic Loess/Glacial Till Forest	S3
Dry-Mesic Limestone/Dolomite Forest	S3

<i>Myotis sodalis</i>	Indiana Myotis	Endangered	Endangered
<i>Spilogale putorius interrupta</i>	Plains Spotted Skunk	Endangered	

<sup>1</sup> Listed in the Wildlife Code of Missouri, Rule 3 CSR10-4.111 Endangered Species.

<sup>2</sup>Federally Listed Species under the Endangered Species Act (ESA) of 1973 as Amended:

Endangered = Any species that is in danger of extinction throughout all or a significant portion of its range.

Threatened = Any species that is likely to become endangered within the foreseeable future.

Candidate = Plants or animals that the U.S. Fish & Wildlife Service is reviewing for possible addition to the list of Endangered and Threatened species.

Proposed = Any species proposed for listing as Threatened or Endangered by the U.S. Fish & Wildlife Service.

Threatened/SA = Any species listed Threatened due to Similarity of Appearance by the U.S. Fish & Wildlife Service.

<sup>3</sup>Considered extirpated, historical or accidental occurrence in Missouri.

## THREATENED AND ENDANGERED SPECIES IN MISSOURI (Cont.)

<sup>1</sup> Listed in the Wildlife Code of Missouri, Rule 3 CSR10-4.111 Endangered Species.

<sup>2</sup>Federally Listed Species under the Endangered Species Act (ESA) of 1973 as Amended:

Endangered = Any species that is in danger of extinction throughout all or a significant portion of its range.

Threatened = Any species that is likely to become endangered within the foreseeable future.

Candidate = Plants or animals that the U.S. Fish & Wildlife Service is reviewing for possible addition to the list of Endangered and Threatened species.

Proposed = Any species proposed for listing as Threatened or Endangered by the U.S. Fish & Wildlife Service.

Threatened/SA = Any species listed Threatened due to Similarity of Appearance by the U.S. Fish & Wildlife Service.

<sup>3</sup>Considered extirpated, historical or accidental occurrence in Missouri.

## **FOR MORE INFORMATION**

MDC collects and manages information on the location and status of species and natural communities of conservation concern throughout the state. The Missouri Natural Heritage Database is a repository for this information.

If you have information on the location or questions about the status of any element on this *Checklist*, please contact:

Natural Heritage Coordinator  
Missouri Department of Conservation  
P.O. Box 180  
2901 W Truman Blvd  
Jefferson City, MO 65109  
(573) 522-4115

If you are requesting information about any Element on this *Checklist* for the purposes of environmental review, please write:

Resource Science Division  
Missouri Department of Conservation  
P.O. Box 180  
Jefferson City, MO 65109

You can also conduct an online Natural Heritage Review by submitting your information to  
<https://naturalheritagereview.mdc.mo.gov/>

## **WEBPAGE**

This checklist is updated annually. The most current version is always available by contacting MDC, Resource Science Division. *Checklist* information is also available on MDC's website:  
<http://mdc.mo.gov/145>.

## **CITATION**

An appropriate citation for this edition of the *Checklist* is:

Missouri Natural Heritage Program. 2019. Missouri species and communities of conservation concern checklist. Missouri Department of Conservation. Jefferson City, Missouri. pp. 54.

**APPENDIX A**  
**BIRD SPECIES TRACKED IN MONHP AND THEIR CRITERIA FOR EORS**  
**Updated October 5, 2016**

Species (ranks)	Regions	Criteria (safe dates), comments
<b>Anseriformes (Ducks, geese, swans)</b>		
Trumpeter Swan (S1, G4)	All (NE, NW)	1
<b>Galliformes (chicken-like birds)</b>		
Ruffed Grouse (SU, G5)	CE, OZ, SL, SE	1
Greater Prairie-chicken (S1, G4)	SW, KC, NW, NE	Anytime observed
<b>Suliformes (anhinga)</b>		
Anhinga (SX, G5)	SE	1
<b>Pelecaniformes (herons, egrets, storks, ibises)</b>		
American Bittern (S1, G4)	All	1- extensive-emergent marshes
Least Bittern (S3, G5)	All	1,2 (5/25-8/1)
Great Egret (S3, G5)	All (SE)	1
Snowy Egret (S1, G5)	SE	1
Little Blue Heron (S3, G5)	SE, SL	1
Black-crowned Night-Heron (S3, G5)	All (SE)	1
<b>Accipitriformes (hawks, eagles, kites, vultures)</b>		
Black Vulture (S3, G5)	OZ, SE	1
Osprey (S2, G5)	All (confirmed NE, SW)	1- Any large open body of water - Formerly SE, large rivers
Swallow-tailed Kite (SX, G5)	SE	1- Expanding range
Mississippi Kite (S3, G5)	All (SE, SL, NE)	1- Any large open body of water
Bald Eagle (S3, G4)	All	1
Northern Harrier (S2, G5)	All (except OZ, SE)	1
Sharp-shinned Hawk (S2, G5)	All	1
Swainson's Hawk (S2, G5)	SW, KC	1
<b>Gruiformes (rails, cranes)</b>		
Yellow Rail (SU, G4)	All	Anytime observed (migrant)
Black Rail (S1, G4)	All	Anytime observed, large marshes
King Rail (S1, G4G5)	All (SE, SL, NE)	1,2 (5/30-7/31)
Virginia Rail (S2, G5)	All	1,2 (5/15-8/1)
Sora (S2, G5)	All	1,2 (5/30-7/31)
Common Gallinule (S2, G5)	All (except OZ)	1,2 (5/30-8/31)
Sandhill Crane (S1, G5)	NE, NW, CE, SL	1
<b>Charadriiformes (gulls, terns, shorebirds)</b>		
Interior Least Tern (S1, G4T2Q)	SE	1- Formerly along MS, MO Rivers
Black Tern (SX, G4)	NW	1
<b>Cuculiformes (cuckoos, roadrunners)</b>		
Greater Roadrunner (S3, G5)	SW, OZ	1
<b>Strigiformes (Owls)</b>		
Barn Owl (S3, G5)	All (SE)	1,2 (5/25-8/15)
Burrowing Owl (SX, G4)	NW	1
Long-eared Owl (SU, G5)	All	1-Forests, dense thickets near water
Short-eared Owl (S2, G5)	SW, NW, NE, KC	1,2 (5/1-8/31)

**Piciformes (Woodpeckers)**

Red-cockaded Woodpecker (SX, G3)	OZ, SE	Anytime observed
Ivory-billed Woodpecker (SX, G1)	All	Anytime observed

**Falconiformes (falcons)**

Peregrine Falcon (S1, G4)	SL, KC	1- Formerly along MO river bluffs
---------------------------	--------	-----------------------------------

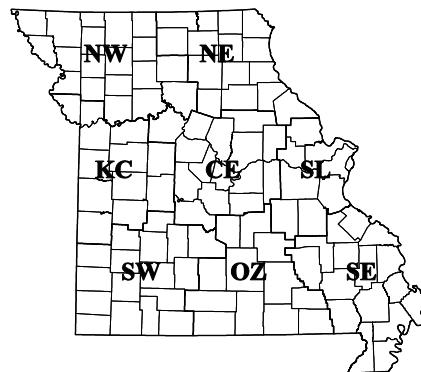

**Passeriformes (perching birds)**

Least Flycatcher (SU, G5)	NE, NW	1,2 (5/27-7/7)
Loggerhead Shrike (S2, G5)	All (SW, KC, NW)	1,2 (4/20-7/20)
Common Raven (SX, G5)	All	Anytime observed
Brown-headed Nuthatch (SX, G5)	OZ, SE	Anytime observed
Brown Creeper (SU, G5)	SL, NE, OZ	1,2 (5/15-9/15)
Marsh Wren (S3, G5)	All (except SW, SE, OZ)	1,2 (5/25-8/25)
Bachman's Warbler (SX, GH)	All	Anytime observed
Swainson's Warbler (S2, G4)	SE, OZ, SW	1,2 (5/25-8/15)
Cerulean Warbler (S2S3, G4)	All (OZ)	1,2 (6/1-8/10)
Chestnut-sided Warbler (S3, G5)	All	1,2 (6/1-8/10)
Black-throated Green Warbler (SU, G5)	SE	1
Bachman's Sparrow (S1, G3)	OZ, SW, SE	1,2 (6/1-8/15)
Painted Bunting (S3, G5)	SW, OZ	1,2 (5/25-8/1)
Yellow-headed Blackbird (S3, G5)	NW (possible anywhere)	1
Pine Siskin (SU, G5)	All	1

**MDC Region abbreviations (Regions listed are those in which the species is most likely to be recorded).**

CE- Central  
NE- Northeast  
OZ- Ozark  
SE- Southeast

KC- Kansas City  
NW- Northwest  
SL- St. Louis  
SW- Southwest

### Explanation of Criteria

**1. Confirmed breeding. Evidenced one or more of the following:**

- Nest building (except wrens and woodpeckers)
- Nest with egg(s) or young (seen or heard)
- Used nest or eggshells
- Physiological evidence of breeding based upon bird in hand (e.g. brood patch)
- Distraction display or injury feigning
- Recently fledged young
- Adults entering or leaving nest site in circumstances indicating nesting
- Adult carrying fecal sac
- Adult carrying food

**2. Probable breeding (valid only between safe dates)**

- Male and female seen together (not part of a flock)
- Bird holding territory
- Seven or more singing males detected in one visit
- Courtship or copulation
- Visiting probable nest site
- Agitated behavior or anxiety call (not provoked by observer)
- Nest building by wrens or woodpeckers

**3. Possible breeding (valid only between safe dates)**

- Species heard or seen in breeding habitat
- Species heard or seen but not in breeding habitat
