

## Townlands surveyed on each grid map and who the main surveyors were

### Notes:

- Some townlands may span more than one Grid map, in this case they are recorded to the map that has the greater part of the townland.
- In most townlands many volunteers helped the townland surveyor assemble the information. In this table it is only possible to list the main townland surveyor. Names of many of the volunteers and helpers on each grid map are listed separately in the 'Volunteer' listing.
- Most of these townlands are surveyed to a 90-100% level but some are only partially surveyed.
