ONE PIECE MAG

Die One Piece Mag Tauchrohreinheit wird im Magnesium-Spritzgussverfahren hergestellt. Wandstärken und Formen können sehr präzise und frei gestaltet werden, dadurch lässt sich ein ideales Verhältnis von Gewicht zu Steifigkeit erreichen. DT Swiss verwendet modernste Konstruktionsmethoden um diese Möglichkeiten auszunutzen.

The One Piece Mag lower unit is made using a magnesium injection-molding process. This process allows our engineers to precisely define wall thicknesses and complex shapes. The advanced engineering processes DT Swiss employs for its One Piece Mag lowers make for an ideal strength to weight ratio of the final product.

Les fourreaux One Piece Mag sont fabriqués en utilisant un processus de moulage par injection de magnésium. Ainsi, tous les volumes et formes peuvent être définis très librement et contrôlés avec une très haute précision. Ceci permet de créer un équilibre idéal entre poids et rigidité. DT Swiss emploie les méthodes de construction les plus avancées pour utiliser au mieux ces possibilités.

I nuovi foderi One Piece Mag sono fusi a getto in magnesio. Questo processo lascia la massima libertà nel dimensionamento delle sezioni e nella scelta delle forme. DT Swiss applica i più moderni metodi di costruzione per usufruire queste possibilità al massimo. Il risultato è un prodotto con una relazione ideale tra peso e rigidità.

TORSION BOX

Durch die zweiteilige, hohle Konstruktion der Gabelbrücke ist die Magnesium Tauchrohreinheit sehr leicht und steif.

The two piece, hollow construction of the arch creates a very light and stiff magnesium lower.

Grâce à une construction à deux pièces creuses de l'arceau, les fourreaux en magnésium sont très légers et rigides.

La costruzione cava, in due pezzi, dell'archetto in magnesio dà rigidità e leggerezza al profilo.

HOLLOW ARCH

Der Hollow arch (hohle Carbon Gabelbrücke) sorgt für eine extrem steife und leichte Tauchrohreinheit.

The hollow carbon arch makes an extremely stiff and light lower.

Hollow arch (arceau creux en carbone) pour des fourreaux extrêmement rigides et légers.

L'archetto vuoto in carbonio garantisce la massima rigidità e pesi contenuti.

ABS

Auto Balancing Spring. Hochleistungs Luftfederung. Positiv- und Negativluftkammer werden über ein einziges Ventil optimal auf das Fahrergewicht eingestellt.

Auto Balancing Spring – a high performance air spring system. Both the positive and negative air chamber are set up to the rider weight via a single valve.

Auto Balancing Spring. Ressort à air haute performance, dont les pressions dans la chambre positive et négative sont ajustées au poids du pilote par une seule valve.

Auto Balancing Spring – molla d'aria ad alte prestazioni. Le camere d'aria positiva e negativa vengono regolate seguente il peso del pilota con una sola valvola.

NCS

Negative Coil Spring. NCS ist ein Hochleistungs-Luftfederungssystem mit einer Stahl-Negativfeder. Diese ist so ausgelegt, dass unabhängig vom Fahrergewicht eine ideale Kennlinie erreicht wird.

Negative Coil Spring. NCS is a high performance air spring system featuring a negative coil spring. It is designed to achieve a perfect spring rate, and therefore performance, irrespective of the rider weight.

Negative Coil Spring. NCS est une suspension à air avec un ressort négatif en acier. Sa conception permet d'offrir une courbe, et donc une performance idéale indépendant du poids du pilote.

Negative Coil Spring. NCS è un sistema di sospensione ad aria con una molla negativa in acciaio. La sua concezione permette di ottenere una caratteristica della molla ideale, indipendente dal peso del pilota.

SINGLE SHOT

Zwei Fahrmodi: Open mode und Lockout. Geringes Gewicht und Dämpfungsperformance sind perfekt kombiniert.

Two ride settings: Open mode and lockout. Low weight and high performance are perfectly combined. Adjustable rebound.

Deux positions de roulage: Open mode et blocage. Hautes performances et légèreté sont combinés à la perfection. Détente réglable.

Due possibilità di funzionamento: Modalità aperta o bloccata. Una combinazione di peso contenuto e prestazioni di altissimo livello. Estensione regolabile.

TWIN SHOT

Drei Fahrmodi: Open mode, climb mode und Lockout. Geringes Gewicht, Verstellbarkeit und Dämpfungsperformance sind perfekt kombiniert. Einstellbare Zug- und Druckstufe.

Three ride settings: Open mode, climb mode and lockout. Low weight, adjustability and high performance are perfectly combined. Adjustable rebound and compression.

Trois positions de roulage: Open mode, climb mode et blocage. Hautes performances, réglages et légèreté sont combinés à la perfection. Détente et compression réglable.

Tre possibilità di funzionamento: Modalità aperta, salita o bloccata. Una combinazione di peso contenuto, regolabilità e prestazioni di altissimo livello. Estensione e compressione regolabile.

LAUNCH CONTROL

Diese Funktion schliesst die Zugstufe, die Gabel feder nach dem Komprimieren nur bis zu einem definierten Punkt aus. Dadurch lässt sich die Front des Bikes für Anstiege absenken. Wird die einstellbare Auslösekraft (threshold) durch einen Schlag überschritten, deaktiviert sich das Launch Control und die Gabel arbeitet wieder normal.

This function closes the rebound circuit, so the fork compresses but does not extend. By pushing the Launch Control button, the fork can be lowered for climbing. If the adjustable release threshold is exceeded by an impact, the Launch Control deactivates automatically and the fork immediately returns to full travel mode.

En activant cette fonction, le circuit de rebond est bloqué et la fourche ne travaille plus qu'en compression. La hauteur peut être ajusté en appuyant sur l'avant du vélo. Si, lors d'un impact, le seuil de déclenchement ajustable est dépassé, le Launch Control se désactive et la fourche retourne au débattement standard.

Questa funzione permette di chiudere il circuito d'estensione. Premere il pulsante Launch Control per abbassare la forcella durante la salita. In caso di superamento della soglia di sblocco regolabile, in seguito ad urto, il Launch Control si disattiva automaticamente e la forcella ritorna immediatamente all'estensione piena.

DT SWISS SYMBOLS

D

REMOTE CONTROL

Das Remote control ermöglicht die Bedienung der Federelemente vom Lenker aus.

E

CARBON CROWN

Gabelkrone und -schaft sind eine Einheit aus high modulus UD Carbon. Die Rippenverstärkungen im Inneren sorgen für erhöhte Steifigkeit und Sicherheit.

The Remote control allows the manipulation of the suspension from the handlebar.

TUBULAR

Tubular Reifen sind für den Wettkampfeinsatz auf der Strasse und im Cross Country Bereich das Nonplus-ultra. Mit Kontaktkleber auf die speziell geformten Felgen aufgeklebt, punkten sie mit sehr geringem Rollwiderstand und Gewicht bei maximalem Grip.

Crown and steerer are a unit of high modulus UD carbon. The internal rib reinforcements make it safe and stiff.

Le Remote control permet le réglage des suspensions au guidon.

F

Il Remote control consente di azionare la sospensione dal manubrio.

TUBELESS

Ein geschlossenes Felgenbett ermöglicht die Montage von standard tubeless Reifen.

Closed rim bed allows the installation of standard tubeless tires.

Jante non percée permettant le montage de pneus tubeless standard.

La base del cerchio priva di fori consente di installare pneumatici tubeless standard.

TUBELESS READY

Tubeless ready Felgen sind auf den Einsatz von tubeless Kits und Reifen ausgelegt. Sie ermöglichen einen korrekten Sitz des tubeless Felgenbandes (passendes Modell verwenden!) und des tubeless Reifens.

Tubeless ready rims are designed for use with tubeless kits and tubeless compatible tires. With the correct kit and tubeless compatible tires, the tubeless ready rims make for simple and quick tubeless setups.

Les jantes tubeless ready sont conçues pour l'utilisation avec un kit tubeless et des pneus soit tubeless, soit tubeless ready. Elles permettent un maintien correct du fond de jante tubeless (attention à utiliser le bon modèle!) et du pneu tubeless.

I cerchi tubeless ready sono concepiti per l'uso di un kit tubeless e copertoni sia tubeless ready o tubeless. Permettono un allungamento corretto del copertone e del nastro tubeless (usare il modello adeguato!).

CARBON

Als High-Tech Verbundmaterial aus Fasern und Harz lässt sich Carbon genau entsprechend den auftretenden Belastungen einsetzen. Dadurch können konkurrenzlos leichte und widerstandsfähige Teile konstruiert werden.

Being a high-tech composite material consisting of fibres and resin, carbon can be used to resist the exact forces it is subjected to. This enables engineers to design parts with an unmatched strength to weight ratio.

Matériel composite constitué de fibres et de résine, le carbone peut être parfaitement adapté aux forces auxquelles il doit résister. Cela permet de construire des pièces ayant un rapport entre résistance et poids inégalable.

Essendo un materiale composito consistente di fibre e di una resina, il carbonio può essere impiegato per resistere esattamente alle forze presenti. Questo permette di costruire componenti con un rapporto tra leggerezza e resistenza senza paragone.

QUICK RELEASE

Der Schnellspanner ist das gebräuchlichste Laufradbefestigungssystem. Es wurde 1922 vom Rennfahrer Tullio Campagnolo erfunden und ist seitdem der Standard für Rennräder und Mountainbikes.

A wheelmounting system developed by Tullio Campagnolo in 1922. Originally designed for road bicycles, it became the standard for road- and mountain bikes.

Le blocage rapide développé en 1922 par Tullio Campagnolo pour les vélos de route, est aujourd'hui le standard pour tous types de vélos.

Un sistema di montaggio della ruota sviluppato da Tullio Campagnolo nel 1922. Progettato originariamente per le biciclette su strada, è diventato lo standard per le bici su strada e le mountain-bike.

DT SWISS THRU BOLT

Das DT Swiss Thru Bolt System ist zu 100% mit Standard Ausfallenden kompatibel. Durch die Verwendung von durchgehenden 9mm Achsen vorne und 10mm Achsen hinten wird eine wesentlich festere Laufradverbindung erreicht. Dadurch erhöht sich sowohl die Systemsteifigkeit als auch die Sicherheit.

The DT Swiss Thru Bolt system is 100% compatible with standard quick release dropouts. It uses 9mm front and 10mm rear alloy axles, making the connection between the wheel and the frame/fork substantially stronger and safer than a standard quick release.

Le système DT Swiss Thru Bolt est compatible à 100% avec les pattes standard pour blocage rapide. A la place d'un axe en diamètre de 5mm, le DT Swiss thru bolt utilise un axe en aluminium de 9 mm à l'avant et de 10mm à l'arrière.

Il sistema DT Swiss Thru Bolt è compatibile al 100 % con i forcellini a sgancio rapido standard. Utilizza perni in alluminio anteriori da 9 mm e posteriori da 10 mm, rendendo il collegamento tra la ruota e telaio/forcella sostanzialmente più forte e sicuro di uno sgancio rapido standard.

THRU AXLE

Steckachs-Laufradverbindungen sind nicht mit Ausfallenden von Schnellspannern kompatibel. Die Steckachse ist immer Bestandteil des Rahmens oder der Gabel. Der Durchmesser der Achse beträgt 20mm oder 15 mm vorne und 12 mm hinten.

A thru axle connection is not compatible with the quick release standard. Thru axles are always an integrated part of the frame or fork. The diameter of the axle is generally 20 or 15mm at the front and 12 mm at the rear.

Le thru axle n'est pas compatible avec les pattes standard pour blocages rapides. Le thru axle (axe traversant) fait toujours partie intégrante du cadre ou de la fourche. Le diamètre de ces axes est généralement de 20 ou 15mm à l'avant et 12 mm à l'arrière.

Il perno passante non è compatibile con lo standard a sgancio rapido. I perni passanti sono sempre parte integrante del telaio o della forcella. Il diametro del perno è generalmente 20 o 15 mm sulla ruota anteriore e 12 mm sulla ruota posteriore.

DT SWISS SYMBOLS

D

E

F

I

LEFTY

Lefty Federgabeln verwenden einen eigenen Nabensstandard. Das Laufrad wird mit einer Inbusschraube direkt mit der Gabelachse verschraubt. Alle DT Swiss Lefty Nabens verfügen über eine IS 6-bolt Bremsscheibenbefestigung.

Lefty forks use a proprietary axle system. The wheel is bolted directly to the fork axle via an Allen bolt. All DT Swiss Lefty hubs feature an IS 6-bolt disc mount.

Les fourches Lefty utilisent un standard d'axe spécifique. La roue est vissée directement sur l'axe de la fourche par une vis hexagonale. Sur tous les moyeux DT Swiss Lefty le disque du frein se monte par le standard IS 6-bolt.

Le forcelle Lefty utilizzano uno standard d'asse specifico. La ruota si monta con una vite esagonale direttamente sull'asse della forcella. Tutti i mozzetti DT Swiss Lefty corrispondono allo standard IS 6-bolt per montare il disco.

X-12

Das X-12 System vereint die überlegene Steifigkeit einer Steckachse mit der Anwendungsfreundlichkeit und dem Leichtgewicht des konventionellen Schnellspanners.

The X-12 system is as stiff as a normal thru axle but at the same time as user friendly and lightweight as a conventional quick release.

Le système X-12 possède la rigidité d'un axe traversant normal tout en étant aussi rapide en utilisation et léger qu'un blocage rapide conventionnel.

Il sistema X-12 ha la rigidezza di un perno passante convenzionale, sempre offrendo però la semplicità e la leggerezza di uno sgancio rapido.

BOLT ON

Beim Bolt on System verwendet man zwei Schrauben um das Laufrad mit dem Rahmen oder der Gabel zu verschrauben. Man findet diese Verbindung oft an BMX und Single Speed Rahmen mit horizontalen Ausfallenden.

The bolt on system is mainly found on BMX and single speed frames using horizontal dropouts. Two independent bolts which thread into the axle are used to connect the wheel to the frame or the fork.

Le système bolt on (vissé) est surtout utilisé en BMX et sur des vélos single speed. Deux vis indépendantes sont vissées directement sur l'axe du moyeu.

Il sistema bolt on è utilizzato principalmente su BMX e su bici single speed che utilizzano forcellini orizzontali. Due bulloni indipendenti che si inseriscono nell'asse servono a collegare la ruota al telaio o alla forcella.

DT SWISS RATCHET SYSTEM®

Das patentierte Freilauf-System mit hochpräzisen Zahnscheiben garantiert höchste Belastbarkeit und Zuverlässigkeit. Dank dem no-tool-Konzept ist das System sehr einfach und schnell zu warten.

This patented freewheel system uses precision Ratchets, featuring extremely high load capacity and reliability. The no tool concept allows for an easy execution of routine maintenance.

Le système de roue libre breveté DT Swiss utilise deux disques dentés. Il garantit une fiabilité et une résistance à l'usure très élevée. Grâce au concept no tool il est très facile à entretenir.

Questo sistema di ruota libera, brevettato, utilizza dei cricchetti di precisione, caratterizzati da capacità di carico ed affidabilità estremamente elevate. Il concetto no tool permette la semplice esecuzione della manutenzione di routine.

PAWL SYSTEM

Ein bewährtes Freilaufsystem mit Klinken (pawls), zuverlässig und sicher.

A proven freewheel system with pawls, reliable and safe.

Le système éprouvé de roue libre à cliquets offre fiabilité et sécurité.

Un sistema a ruota libera, consolidato, con cricchetti, affidabile e sicuro.

CENTER LOCK®

Von Shimano Inc. lizenzierte Bremsscheibbefestigung.

Brake rotor mounting system licensed by Shimano Inc.

Système de fixation centrale pour disques, licencié de Shimano Inc.

Il sistema di montaggio del rotore del freno su licenza Shimano Inc.

IS (6-BOLT)

Internationaler Standard zur Bremsscheibenmontage mit 6 Schrauben.

International rotor mounting standard using 6 bolts.

Standard international pour montage du disque de frein à 6 trous.

Standard internazionale di montaggio del rotore che utilizza 6 viti.

RWS

Patentiertes Laufrad-Befestigungssystem. Steifer, sicherer und leichter zu bedienen als ein Schnellspanner. 100 % Scheibenbremsen tauglich.

Patented wheelmounting system. Stiffer, safer and more user friendly than conventional quick releases. 100% disc brake compatible.

Système de montage de roue breveté. Plus rigide, sûr, et plus facile à utiliser que les serrages rapides conventionnels. 100% compatible frein à disque.

Sistema di montaggio della ruota brevettato. Più rigido, sicuro e facile da usare rispetto agli sganci rapidi tradizionali. Compatibile al 100 % con i freni a disco.

WELDED

Das Schweissverfahren erzeugt die präziseste, leichteste und stabilste Felgenverbindung. Nach dem Schweißen wird die Verbindungsstelle verputzt um einen nahtlosen Übergang zu erreichen.

The welding process creates the most precise, lightweight and strong rim connection possible. After welding, the seam is smoothed to guarantee a perfect tire fit.

La soudure permet d'obtenir la connection de la jante la plus précise, légère et durable. Après la soudure le joint est ébavuré et poncé pour obtenir un siège parfait pour le pneu.

I cerchi saldati possiedono il giunto più preciso, leggero e durabile. Dopo la saldatura il raccordo viene pulito con massima precisione per garantire un alloggiamento perfetto del copertone.

SLEEVED

Bei diesem Verfahren wird ein Formteil (sleeve) gleichmäßig in beide Enden des Profils gepresst. Die Sleeve Joint Verbindung ist die beste Alternative zu den geschweissten Felgen.

A precise sleeve connects the profile. This guarantees optimum resistance against all occurring loads. The sleeve joint connection is the best alternative to welded rims.

Chaque extrémité du profil de la jante est pressé sur un manchon de précision. La connection sleeve joint garantit une parfaite résistance à la torsion et une fiabilité à toute épreuve.

Un mancotto di precisione chiude il profilo e garantisce dunque una resistenza ottima a tutti i carichi. Il giunto a mancotto è la migliore alternativa ai cerchi saldati.

DT SWISS SYMBOLS

D

E

F

G

PIN JOINT

Zwei Stahl Inserts werden formschlüssig in die Enden des Profils eingepresst. Die so entstandene Verbindung ist präzise, haltbar und wirtschaftlich.

Two steel inserts are press fitted into both ends of the profile. The achieved pin joint connection is precise, strong and economic.

Deux pièces en acier sont pressées dans le profil de la jante. La connection ainsi obtenue est précise, durable et économique.

Due mancotti in acciaio vengono pressati in entrambi i lati del profilo. Il raccordo così ottenuto è preciso, durabile ed economico.

NO TOOL

Für die normale Wartung wird kein Spezialwerkzeug benötigt.

No special tools needed for routine maintenance.

Aucun outil spécifique n'est nécessaire pour l'entretien régulier.

Per la manutenzione di routine non occorre alcun utensile speciale.

DOUBLE BUTTED

Einfach reduzierte Speichen verfügen über einen verjüngten Mittelteil. Dies wird durch ein von DT Swiss eigens entwickeltes Kaltschmiedeverfahren erreicht, welches sowohl das Verhältnis von Festigkeit zu Gewicht als auch die Elastizität der Speiche verbessert.

Double butted spokes are thinner in the middle than at the ends. This is achieved through DT Swiss' unique cold forging technology, which reduces the diameter of the spoke for better strength to weight performance and improved elasticity.

Le diamètre sur la partie centrale des rayons «double butted» est réduit par un processus de forgeage à froid propre à DT Swiss qui améliore considérablement le rapport poids / résistance et l'élasticité du rayon.

I raggi a doppio spessore sono più sottili al centro che alle estremità. Questo è permesso dalla tecnologia unica DT Swiss di forgiatura a freddo, che risulta in un miglior rapporto tra resistenza e peso e una migliore elasticità.

TRIPLE BUTTED

Diese Speichen haben drei verschiedene Durchmesser. So können sie noch besser an die auftretenden Kräfte angepasst werden. Auch hier kommt das Kaltschmiedeverfahren, um die mechanischen Qualitäten der Speichen zu perfektionieren, zum Einsatz.

These spokes have three different diameters to adapt even further to the occurring loads. Again we use a cold forging process to achieve these qualities.

Ces rayons ont trois diamètres différents pour encore mieux s'adapter aux contraintes qui apparaissent tout en étant très léger. Ils sont bien entendu également forgés à froid.

Questi raggi hanno tre diversi diametri per adattarsi ancora meglio ai carichi. Di nuovo, ci avvaliamo di un processo di forgiatura a freddo per ottenere queste proprietà.

BLADED

Ein flacher Mittelteil ermöglicht bessere Aerodynamik. Wie bei unseren reduzierten Speichen wird auch diese Umformung per Kaltschmiedeverfahren erreicht.

These spokes have a flat bladed central section for improved aerodynamics. As with our butted spokes, cold forging is used to produce the aero section and to optimize mechanical properties.

Les rayons bladed sont plats pour une meilleure aérodynamique. Comme sur les rayons «butted», le forgeage s'effectue à froid pour améliorer les propriétés mécaniques.

Questi raggi presentano una sezione centrale piatta per una migliore aerodinamica. Come con i nostri raggi a spessore variabile, la forgiatura a freddo serve a realizzare la sezione aero e ad ottimizzare le proprietà meccaniche.

DT SWISS PRO LOCK®

Das in die Nippel eingespritzte Schraubensicherungssystem ermöglicht den Bau von extrem haltbaren Laufrädern.

A patented liquid injected into the nipple thread allows for extremely durable wheel builds.

Une colle adhésive à deux composants injectée dans le filet permet le montage de roues extrêmement fiables.

Un liquido brevettato, iniettato nel filetto dei nipples, consente di realizzare ruote estremamente durevoli.

DT SWISS WEAR CONTROL®

DT Swiss Felgen für Felgenbremsen sind mit Verbrauchsanzeigen versehen. Diese zeigen den Abnutzungsgrad der Bremsfläche an. Die DT Swiss Wear Control® ist EN konform.

The DT Swiss Wear Control® shows the extent of rim wear. It is compliant to the European standard.

Des témoins d'usure indiquent l'état d'usure de la jante. Le DT Swiss Wear Control® est conforme aux normes européennes.

Il DT Swiss Wear Control® evidenzia lo stato di usura del cerchio. È conforme allo standard europeo.

STRAIGHT PULL

Straight pull Speichen kommen ohne Speichenbogen aus und eliminieren so einen Schwachpunkt konventioneller Speichen. Trotzdem sind sie mit Standardwerkzeugen zentrier- und ersetzbar.

Straight pull spokes have no spoke elbow, which eliminates the biggest weakness of conventional spokes. They are still true- and replaceable with conventional tools.

Les rayons straight pull ont une tête de rayon non coudée, éliminant le point le plus faible de tous les rayons. Ils restent toujours ajustables et remplaçables avec des outils conventionnels.

I raggi straight pull hanno una testa diritta, eliminando così un punto debole dei raggi convenzionali. Rimangono sempre centrabili e scambiabili con attrezzi convenzionali.

CERAMIC CARTRIDGE BEARINGS

Diese gedichteten Lager verwenden Kugeln aus Keramik und Laufflächen aus rostfreiem Stahl. Neben dem niedrigeren Gewicht sind diese Lager hältbarer als rostfreie und rollen Dank sehr harten Keramikkugeln noch leichter.

These sealed bearings use ceramic balls running on stainless steel races. Due to the hardness of the ceramic balls, they feature less rolling resistance and longer life time at a lower weight than any stainless steel bearing.

Ces roulements utilisent des billes en céramique, des cages en acier inoxydable et des joints étanches. Ils ont une résistance au roulement encore plus faible tout en étant plus légers et plus solides.

Questi cuscinetti sigillati utilizzano delle sfere in ceramica che rotolano in guide di scorrimento in acciaio inox. Data la durezza delle sfere in ceramica, essi sono caratterizzati da una minor resistenza al rotolamento e da una maggior durata nonché da una maggiore leggerezza rispetto a qualsiasi cuscinetto in acciaio inox.

D

RR

road race

Geschwindigkeit ist es, was Rennradfahrer antreibt. Vorwärts kommen und schnell sein. Die Komponenten der RR Serie werden deshalb für möglichst effiziente Kraftübertragung konstruiert. Sie sind je nach Einsatzbereich hinsichtlich Aerodynamik, Gewicht oder Steifigkeit optimiert.

E

The RR product range meets road riders' need for speed with lightweight parts featuring great stiffness, aerodynamics and reliability.

F

La vitesse est primordiale pour les coureurs sur route, c'est pourquoi les composants RR sont conçus pour une transmission optimale de la puissance. En fonction de leur utilisation ils sont optimisés en aérodynamique, rigidité ou en poids.

I

La serie di prodotti RR soddisfa l'esigenza di velocità dei ciclisti su strada con parti ultraleggere, caratterizzate da grande rigidità, aerodinamica ed affidabilità.

R

road

Über den Ashpalt fliegen, den Rythmus finden, Landschaften geniessen. Die Teile der R Serie verfügen über die zentralen DT Swiss Technologien und sind so konzipiert, dass der Rennradgenuss garantiert ist: Zuverlässig, leicht und stabil.

Fly over the tarmac, find the rythm, enjoy landscapes. R category components feature the main DT Swiss technologies and are designed with the warrants of road riding enjoyment in mind: reliability, lightweight and durability.

Survoler le bitume, trouver le rythme, apprécier les paysages. Les composants de la série R disposent des technologies éprouvées DT Swiss et sont construits pour garantir le plaisir en vélo: fiables, légers et durables.

Sorvolare l'asfalto, trovare il ritmo, godersi il paesaggio. I componenti della serie R sono dotati delle più importanti tecnologie DT Swiss e creati per permettere il massimo piacere in bici: Affidabili, leggeri e duraturi.

XR

cross race

Cross Country Fahrer wollen sportliche Höchstleistungen erbringen und sich dabei in der Natur bewegen. Genauso wie hartes Training die Beine schneller macht, ist DT Swiss ständig bestrebt die XR Produkte leichter und steifer zu bauen.

Cross Country riders demand maximum performance from their bodies and the bike parts that take them through the countryside they enjoy. Just like constant training leads to improved results, DT Swiss is constantly improving the XR product line to make it lighter, stiffer and faster.

Ceux qui roulent en Cross Country aiment combiner les performances physiques et les expériences dans la nature. Tout comme l'entrainement intensif fait progresser le pilote, DT Swiss ne recule devant aucun effort pour rendre les produits XR plus légers, plus rigides et plus performants.

I ciclisti cross country richiedono la massima prestazione dal loro corpo e dalle parti della bici che li accompagnano attraverso il fuoristrada. Proprio come un allenamento costante porta a risultati migliori, DT Swiss sta costantemente migliorando la linea di prodotti XR allo scopo di renderla più leggera, rigida e veloce.

X

CROSS

Cross Country bedeutet sportliche Leistung, Spass an der Natur und am Entdecken. Alle Komponenten der X Kategorie sind mit DT Swiss Schlüsseltechnologien ausgestattet, so dass man sich auf das Wichtigste konzentrieren kann: Biken und Erleben.

Cross Country stands for physical effort, enjoying nature and discovering new places. All the parts in the X category come with DT Swiss core technologies so the rider can focus on the main thing: mountainbiking and exploring.

Cross Country, ça veut dire effort physique, profiter de la nature et découvrir. Tout les composants de la série X sont dotés des technologies spécifiques DT Swiss permettant de se concentrer sur l'essentiel: rouler et vivre le vélo.

Cross Country significa attività sportiva nella natura e scoprire nuovi luoghi. Tutti i prodotti della categoria X sono equipaggiati delle tecnologie chiave DT Swiss che consentono di concentrarsi sull'essenziale: Pedalare e divertirsi.

XM

cross mountain

XM Komponenten richten sich an Biker, die den Bikesport in all seinen Varianten betreiben wollen. Ob Alpenüberquerung, Feierabendrunde oder Marathon: Vielseitigkeit und Zuverlässigkeit sind für den Cross Mountain Fahrer ebenso wichtig wie Komfort und geringes Gewicht.

XM components are designed for the rider who wants to do it all. Whether it's riding across the Alps, the weekend group ride or competing in a bike marathon: To a Cross Mountain rider product versatility and reliability are as important as weight and comfort.

Les composants XM s'adressent à tous ceux qui veulent pratiquer le VTT sous toutes ses formes. A travers les Alpes, autour du monde ou lors d'une épreuve marathon. Polyvalence et fiabilité sont particulièrement importantes en Cross Mountain, tout comme le confort et le poids.

I componenti XM sono progettati per il biker che desidera praticare questo sport in tutte le sue varianti: attraversando le Alpi, andando in bici in gruppo durante il weekend oppure gareggiando in una maratona. Per un biker cross mountain, la versatilità ed affidabilità del prodotto sono tanto importanti quanto il peso e il comfort.

M

mountain

D

Mountainbiken in seinem ursprünglichen Sinn: Freunde, Natur und Spass. Die Produkte der M Serie setzen dabei kaum Grenzen: Mit Muskelkraft hoch und mit Spass in die Abfahrt. Bewährte Technologien und solide Konstruktion machen es möglich.

E

Mountainbiking with its original values in mind: friends, nature and fun. The M series products leave the rider with virtually no limits: pedal up and hammer the descents. Proven technology and solid engineering are the backbone of these components.

F

Le VTT comme dans ses origines: des amis, la nature et du plaisir. Les produits M n'y posent pas de limites: monter en pédalant et prendre le maximum de plaisir en descente. Une construction solide et des technologies éprouvées le permettent.

I

Il mountainbike nella versione originale: amici, natura e divertimento. Le parti della gamma M non mettono limiti: salire pedalando e massimo piacere in discesa. Tecnologie private e costruzione intelligente lo permettono.

EX

enduro cross

Endurobiker suchen Abenteuer, die Geschwindigkeit ist dabei zweitrangig. Für die ultimative, anspruchsvolle Singletrail Abfahrt nehmen sie auch lange Anstiege in Kauf. Gelegentliche Ausritte in den Bikepark müssen EX Komponenten ebenso überstehen. Enduro Produkte sind deshalb stabil, zuverlässig und trotzdem leicht.

For Enduro riders it's all about adventure. They suffer through long uphills to reach that ultimate, untouched singletrack, loaded with roots, rocks and flowing corners. A day in the local bike park? No problem, EX parts are strong, reliable and lightweight to do the job perfectly.

En Enduro la vitesse est vraiment secondaire, le plus important étant la sortie elle-même. Les riders sont à la recherche des singles les plus techniques, ludiques et longs. Une session au bikepark local n'est jamais refusée non plus. Pour être performant dans cette utilisation, les produits Enduro sont solides, fiables et pourtant légers.

Per l'endurista tutto è avventura. Soffre percorrendo lunghe salite per raggiungere la cima, singletrack incotaminati, che abbondano di radici, rocce e cascate. Una giornata nel bikepark locale? Nessun problema: le parti EX sono forti, affidabili e leggere, perfettamente all'altezza del compito.

E

enduro

Das Material darf Enduro Piloten keine Grenzen setzen. Bergab gehen sie ans Limit und auch bergauf soll es leicht gehen. Mit bewährten Materialien und DT Swiss Technologie erfüllen die Komponenten der E Kategorie diese Wünsche problemlos.

The equipment of all mountain riders must not set them any limits. When the trail points downwards, they push the boundaries but still want to ride up comfortably. E category components easily stand up to these demands with proven materials and all the key DT Swiss technologies.

Le matériel ne doit pas limiter les pilotes en enduro. Ils cherchent les limites en descente mais veulent monter avec aisance. Des matériaux haute qualité et des technologies exclusives DT Swiss résistent à ces exigences sans problème.

Il materiale non deve limitare i piloti enduro. In discesa cercano i limiti e salendo non vogliono disperdere troppe energie. Con materiali di alta qualità e tecnologie esclusive DT Swiss, i componenti della categoria E sono perfettamente adattati a queste esigenze.

FR

freeride

Freerider interpretieren ihre Umgebung immer wieder anders. Aus einem Fels, einem Baumstamm oder einem Treppengeländer wird ein Drop, ein Skinny oder eine Gelegenheit zum Grinden. Die FR Produkte sind in erster Linie robust, um all dem zu widerstehen, was Natur und Fahrer dem Bike abverlangen können.

Freeriding is about interpreting your surroundings. For freeriders big rocks, fallen trees and creeks become drops, skinnies and gaps. FR products have to be tough and reliable to handle misjudged landings and emergency ejections mid-air.

En Freeride les pilotes considèrent leur environnement comme un énorme terrain de jeu. Un rocher, un arbre déraciné ou un escalier deviennent un drop, un passage en équilibre ou une possibilité pour grinder. Les produits FR doivent avant tout être fiables pour résister à tout ce que le pilote fait avec son vélo.

Il freeriding interpreta l'ambiente circostante. Per il freerider, grandi rocce, alberi caduti e ruscelli diventano salti, dislivelli e rampe. I prodotti FR devono essere resistenti ed affidabili per gestire atterraggi mal riusciti e distacchi d'emergenza a mezz'aria dalla bici.

TK/E-BIKE

trekking/touring

Das Fahrrad als Reisemittel, Alltagsgefährt oder einfach um am Wochenende in die Natur zu radeln. Egal ob auf dem E-bike oder dem reiseerprobten Drahtesel, die TK/E-bike Komponenten von DT Swiss bestechen durch Zuverlässigkeit und rundum-sorglos Technik.

The bicycle can serve for touring, commuting or simply for a quiet ride through the countryside. Equally at home on E-bikes, touring bikes, or commuters the DT Swiss TK/E-bike components ensure reliable wheels thanks to their proven technology and materials.

Qu'on utilise son vélo pour voyager, comme moyen de transport quotidien ou tout simplement pour une balade en pleine nature le weekend. Sur un e-bike moderne ou sur un vélo de ville, les composants TK/E-bike DT Swiss se distinguent par leur fiabilité grâce à une technologie et des matériaux éprouvés.

La bici come mezzo da trasporto, per l'uso quotidiano o semplicemente per pedalare nella natura il fine settimana. Su una e-bike moderna o sulla bici da viaggio, i componenti TK/E-bike DT Swiss stupiscono con l'affidabilità e la meccanica provata.

D

DT TRUING STAND

Der DT truing stand ist der ultimative Zentrierständer! Das Profigerät besteht aus geschliffenem, anodisiertem Aluminium mit oberflächengehärteten Stahlführungen und Aufnahmen.

- Höchste Qualität, einfachste Bedienung
- Spart Zeit beim Laufradbau
- Kompatibel mit allen gängigen Fahrradlaufrädern (12" – 29") mit Schnellspann- oder Steckachse
- Dank drei präzisen Multilink-Armen sind die Messpunkte frei wählbar
- Genaue, spielfreie Taster für Höhen- und Seitenschlag
- Höchste Steifigkeit und feste Klemmung
- Laufrad kann auch mit Bereifung zentriert werden
- Zum verschräuben, aufstellen oder im Schraubstock einklemmen
- Optionen: Analoge Messuhren inklusive Messeinsatz mit Kugel, spezielle Messeinsätze mit gerundetem Teller oder kugelgelagerte Stahlrolle, Zentrieradapter für alle Achsvarianten.

E

DT TENSIOMETER (ANALOG)

Der analoge Tensiometer DT tensio ist ein Präzisionsinstrument zum Messen der Speichenspannungen im Laufrad. Diese DT Swiss Entwicklung, 100 % Swiss made, ist für das schrittweise Vorspannen der Speichen während des Laufradbau sowie der Kontrolle der Speichenspannung bestimmt. Für jeden professionellen Laufradbauer unerlässlich, ist es mit allen Speichenarten kompatibel, einschliesslich Flachspeichen. Der Tensiometer wird im praktischen Handkoffer geliefert.

The DT Swiss truing stand is the ultimate stand used by professionals. It is made of precision machined, polished and anodized aluminium with hardened steel guides and mounts.

- High-end quality and easy handling
- Quicker wheel building
- Compatible with all current bicycle wheels (12" – 29") with quick release or thru axle
- Three precision multilink arms providing a wide range of contact points
- Playfree precision gauges to measure lateral and vertical dish
- Extremely stiff and solid clamping
- Wheel can be trued with tires
- Can be installed on a table or clamped into a vice
- Upgrades: Analog gauges including measuring insert with ball, special measuring inserts with rounded washers or ball bearing steel roll, truing adapters for all axle configurations.

F

DT TENSIOMETER (DIGITAL)

Die digitale Messuhr erlaubt ein schnelles und präzises Ablesen der Werte. Über den Opto-RS232 Datenausgang lassen sich die Messwerte via Verbindungsleitung auf einen PC oder Drucker übertragen. Anwendbar für alle Speichenarten, einschliesslich Flach-speichen. Lieferung inklusive Koffer. 100 % Swiss made.

The analog tensiometer is a high-precision tool to measure spoke tensions. Developed by DT Swiss and 100 % Swiss made, it is used to precisely measure the spoke tension step by step during the wheel building process. The DT Swiss tensiometer is a necessity for any professional wheel builder. Can be used with all spoke types including flat spokes. Includes case.

Le tensiomètre analogique est un instrument de précision pour mesurer la tension de rayon. Cet outil développé par DT Swiss et fabriqué à 100 % en Suisse, vous permet de contrôler la tension des rayons pendant le montage de la roue. Indispensable à tous les monteurs professionnels et compatible avec tous types de rayons (rayons plats inclus). Il est livré dans une boîte protectrice.

G

SHOCK PUMP

- Pumpe für alle DT Swiss Suspension Produkte, 20bar / 300PSI Maximaddruck
- Platzsparend dank abnehmbarer Druckanzeige
- Anti Air-Loss Kupplung gegen Luftverlust beim Entfernen der Pumpe
- Geeignet für Links- und Rechtshänder dank drehbarer Anzeige
- Luftablassknopf zur Feineinstellung
- Griffiger Gummischutz für die Druckanzeige

- Fits all DT Swiss suspension forks and shocks 20bar/300PSI max. pressure
- Minimal packing size thanks to removable gauge and foldable hose
- Anti air-loss coupler for precise set-ups (no air loss when removing pump from valve)
- Suitable for right- and left-handed people
- Air bleeder for fine tuning
- Rubber padded gauge housing

- Pression maximale de 20 bar/300 PSI, suffisante pour les fourches et les amortisseurs DT Swiss.
- Indicateur de pression amovible pour un transport simplifié
- Pas de perte d'air lors du montage et démontage sur la valve d'air
- S'adapte aux droitiers et gauchers en tournant le manomètre
- Ajustage de la pression facile grâce à la valve de réglage
- Manomètre protégé pendant le transport

Il centruorote DT Swiss è il meglio che può essere utilizzato dai professionisti. È realizzato in alluminio lucidato ed anodizzato, lavorato a macchina di precisione con guide ed attacchi in acciaio temprato.

- Massima qualità e facilità di utilizzo
- Montaggio ruota più rapido
- Compatibile con tutte le ruote per bici disponibili in commercio (12" – 29") provviste di sgancio rapido o perno passante
- Tre bracci di precisione che offrono numerosi punti di contatto
- Indicatori di precisione per misurare il cerchio lateralmente e verticalmente
- Serraggio estremamente rigido e solido
- La ruota può essere centrata con i pneumatici
- Può essere installata su un tavolo oppure serrata in una morsa
- Upgrades: indicatori analogici comprensivi di inserto di misurazione a sfera, gli inserti di misurazione speciali con rondelle arrotondate oppure rullo in acciaio su cuscinetto a sfera, adattatori di centraggio per tutte le misure di perno.

Il tensiometro analogico è un utensile di alta precisione per misurare la tensionatura del raggio. Sviluppato da DT Swiss e realizzato al 100% in Svizzera, è utilizzato per misurare accuratamente la tensionatura del raggio passo a passo durante il processo di montaggio della ruota. Il tensiometro DT Swiss è indispensabile per qualunque costruttore professionista di ruote. Può essere utilizzato con tutti i tipi di raggi, inclusi i raggi piatti. Involturo in dotazione.

Il tensiometro digitale è dotato di un indicatore digitale che consente di leggere le misurazioni velocemente ed agevolmente. L'utilizzo del dispositivo di uscita dati Opto-RS232 consente di trasmettere i valori misurati direttamente a un PC oppure a una stampante tramite un cavo di connessione. Adatto per tutti i tipi di raggi, inclusi i raggi piatti. Involturo in dotazione. Realizzato al 100 % in Svizzera.

I

DT NIPPLE WRENCHES

Der passende Nippelspanner für DT Swiss Nippel mit innenliegendem Antrieb. Erhältlich für DT Swiss Nippel in Sechskant (blauer Griff 1), Tork (schwarzer Griff 2) oder Vierkant (roter Griff 3) Ausführung.

- Kleinere Handkräfte beim Vorspannen der Speichen
- Erleichtert die Arbeit mit Flachspeichen
- Entwickelt von DT Swiss
- Auch für Hochprofilfelgen geeignet (max. 100 mm)

The matching nipple wrench for DT Swiss nipples with an internal drive. Available for DT Swiss nipples with hexagonal (blue handle 1), torx (black handle 2) or square (red handle 3) heads.

- Less hand force needed
- Facilitates work with bladed spokes
- Developed by DT Swiss
- Also suitable for high profile rims (max. 100 mm)

La clé correcte pour les écrous DT Swiss avec empreinte à l'intérieur de la jante. Disponible pour les écrous DT Swiss en version hexagonale (poignée bleue 1), torx (poignée noire 2) ou carrée (poignée rouge 3).

- Force nécessaire à la tension des rayons réduite
- Facilite le travail avec les rayons plats
- Développé par DT Swiss
- Convient aussi pour les jantes à profil haut (max. 100 mm)

La chiave adatta per i nipples DT Swiss con un innesco all'interno del cerchio. Disponibile per i nipples DT Swiss in versione esagonale (manico blu 1), torx (manico nero 2) o quadrata (manico rosso 3).

- Richiede meno forza manuale
- Facilita il lavoro con i raggi piatti
- Sviluppato da DT Swiss
- Idoneo anche per cerchi ad alto profile (max. 100 mm)

SPOKEY

Professionelles Werkzeug für ein passgenaues Umfassen der Nippel.

Professional tool for a precise fit onto the nipple.

Outil professionnel garantissant une prise précise de l'écrou.

Utensile professionale per una presa precisa dei nipples.

DT AERO SPOKE HOLDER

0.8–1.0 mm / 1.0–1.3 mm

Diese Speichenhalter verhindern das Verdrehen von Flachspeichen (z.B. DT aerolite) beim Zentrieren oder Laufradbau. Durch ihre Konstruktion kann die Speiche so nah wie möglich beim Nippel gehalten, und somit das Verdrehen verhindert werden. Kompatibel mit allen DT Swiss Zentrierwerkzeugen.

This spoke holders effectively eliminate spoke twist when truing or building wheels with bladed spokes (e.g. DT aerolite). Thanks to their design, the spoke can be held close to the nipple, which eliminates twisting. Compatible with all DT Swiss nipple wrenches.

Empêchent la torsion des rayons plats lors de la mise en tension ou du dévoilage. La forme spécifique permet le maintien du rayon très proche de l'écrou pour faciliter le travail. Compatibles avec tous les clés de rayon DT Swiss.

Questi porta-raggi eliminano efficacemente la torsione del raggio durante la centratrice o realizzazione della ruota con raggi bladed (per es. DT aerolite). Grazie alla loro progettazione, il raggio può essere tenuto vicino al nipple, con conseguente eliminazione del rischio di torsione. Compatibili con tutte le chiavi nipples DT Swiss.

MULTI TOOL

Nippelspanner für DT Swiss Torx und Vierkant Nippel sowie für das Halten von Aerospiechen.

Nipple wrench for DT Swiss torx and square nipples as well as for holding bladed spokes.

Une clé soit pour les écrous DT Swiss torx soit pour les écrous carrés et pour la prise des rayons plats.

Chiave sia per i nipples DT Swiss torx che per i nipples quadrati e per tenere i raggi piatti.

NIPPLE DRIVER

Erleichtert und beschleunigt das Aufschrauben der Nippel auf die Speichen.

Makes screwing the nipple onto the spoke quicker and easier.

Permet un vissage de l'écrou facile et rapide.

Velocizza e facilita l'avvitatura del nipple sul raggio.

NIPPLE GUIDE

Erleichtert das Positionieren und Fixieren der Nippel in Hochprofilfelgen.

Facilitates the insertion of nipples into deep section rims.

Facilite l'insertion de l'écrou dans les jantes à profil haut ou celles sans double oeillets.

Facilita l'inserimento del nipple nei cerchi a profilo alto.

SPOKE HEAD PUNCH

Durchschlag mit konkaver Spitze, passend auf DT Swiss Speichenköpfe. Verbessert den Sitz des Speichenkopfes im Nabenschluss.

Punch with concave head, fitting DT Swiss spoke heads. Improves seating of the spoke head in the hub flange.

Enfonceur avec pointe concave, fonctionne avec toutes les têtes de rayon DT Swiss. Optimise la position de la tête dans le flasque.

Punzone a testa concava, adatto per le teste dei raggi DT Swiss. Migliora l'alloggiamento della testa del raggio nella flangia del mozzo.

SPOKE RULER

Zum Messen von Speichenlängen und Speichendurchmessen.

For measuring spoke lengths and diameters.

Pour mesurer la longueur et le diamètre des rayons.

Per misurare le lunghezze e i diametri dei raggi.

G

DT SWISS SPOKE FREEZE

Speziell entwickelte Schraubensicherung für den Laufradbau. Verhindert ein Lösen der Speichen-Nippel Verbindung.

Threadlock solution to prevent loosening of the spoke-nipple connection.

Conçu pour éliminer le risque de desserrage de l'écrou et du rayon.

Soluzione threadlock per prevenire l'allentamento del collegamento raggio - nipple.

SOLDER TIN

Lötzinn mit Bindefähigkeit auf rostfreiem Stahl 18/10. Die Lötstelle bleibt dauerhaft glänzend. Bleifrei! Spule à 15.8 m

Solder tin with bonding capacity on 18/10 stainless steel. The soldered joint stays permanently shiny. Lead-free! Spool of 15.8m.

Etain de soudure. Compatible avec l'acier inoxydable 18/10. La soudure reste parfaitement brillante. Bobine de 15.8 m. Sans plomb!

Stagno per saldatura con capacità legante sull'acciaio inox 18/10. Il giunto saldato resta lucido permanentemente. Senza piombo! Bobina da 15,8m.

SPOKE HEAD WASHERS

Unterlagsscheiben aus Messing. Diese werden benötigt wenn zwischen Speiche und Speichenloch Spiel besteht. Erhältlich in den Durchmessern 2.2 und 2.5 mm.

Brass washers for the use between spoke head and hub flange. Necessary if there's play between the spoke and spokehole. Available in 2.2 and 2.5mm diameters.

Permettent de stabiliser la tête du rayon dans le flasque. Nécessaires lorsque il y a du jeu entre rayon et trou de flasque. Existe en 2.2 mm et 2.5 mm.

Rondelle in ottone da utilizzarsi tra la testa del raggio e la flangia del mozzo. Necessarie in presenza di gioco tra il raggio e il foro del raggio. Disponibili nei diametri da 2,2 e 2,5 mm.

TYING WIRE

Spezialdraht für das Binden von Speichenkreuzungen. Die verzinnte Drahtoberfläche dient als Temperaturindikator beim Löten. Spule à 100m.

Special wire for tying and soldering spoke crossings. The tin-plated wire surface also acts as a temperature indicator when soldering. Available in spools of 100m.

Fil pour ligaturer les croisements des rayons. Disponible en bobine de 100m.

Filo speciale per legare e saldare gli incroci dei raggi. La superficie del filo, stagnata, funge da indicatore della temperatura durante la saldatura. Disponibile nelle bobine da 100m.

APRON

Für den Laufradbau oder den Werkstattgebrauch. 100 % Baumwolle, Gesamtlänge ca. 95cm, Nacken- und Beckenaschen zum Binden und zwei praktische Fronttaschen. Gesticktes DT Swiss Logo.

For wheelbuilding or general wrenching. Made of 100 % cotton, total length 95 cm, with straps for neck and waist and two handy front pockets. Embroidered DT Swiss logo.

Le montage professionnel des roues peut devenir une affaire huileuse. Ce tablier est en 100 % coton, longueur totale 95 cm, serrage par la nuque et par la taille, avec deux poches frontales, logo DT Swiss brodé.

Per i costruttori di ruote oppure per l'officina in genere. Realizzato in cotone al 100 %, lungo 95cm in tutto, con lacci per il collo e la vita e due comode tasche anteriori. Il logo DT Swiss è ricamato.

Etanche à l'huile.

Impermeabile all'olio.

SPOKE LENGTH CHART

Zur exakten Berechnung von Speichenlängen bei Verwendung von Felgen mit einem ERD von 390 bis 630mm, Nieder- und Hochflanschnaben (24 bis 48 Loch) und den Kreuzungsarten radial bis 4fach.

Allows for precise spoke length calculation. Works when using rims with an ERD from 390 to 630 mm, low- and high-flanged hubs (24 to 48 holes), radial to 4-cross lacing patterns.

Pour un calcul de longueur de rayon précis, utilisant des jantes au diamètre de 390 à 630 mm, des moyeux à flasque haut ou compact de 24 à 48 trous.

Genauigkeit ± 0.5 mm. Format 70x52 cm.
Benutzen Sie auch unser Gratisprogramm «spokes calc» auf www.dtswiss.com. Hier lassen sich Speichenlängen einfach und rasch ermitteln.

Precision ± 0.5 mm. Dimensions 70x52 cm.
Also check out our free program «spokes calc» on www.dtswiss.com – an easy and fast way to calculate your spoke lengths.

Précision ± 0.5 mm. Dimensions 70x52 cm.
Consultez le site www.dtswiss.com, rubrique «spokes calc», pour un calcul facile et rapide de la longueur de rayon.

Consente di calcolare con precisione la lunghezza del raggio. Funziona quando si utilizzano i cerchi con un ERD compreso tra 390 e 630 mm, mozzi a flangia bassa e alta (da 24 a 48 fori), schemi di incrocio da radiale ad incrocio quadruplo.

Precisione ± 0.5 mm, Dimensione 70x52 cm.
Verificare anche il nostro programma gratuito «spokes calc» sul sito www.dtswiss.com – un modo facile e rapido per calcolare le lunghezze dei raggi.

SERVICE TOOL CASE

DT Swiss bietet verschiedene Reparaturkoffer, Service- und Wartungskits an.

Several service and maintenance tool kits are available for DT Swiss products.

Plusieurs kits de maintenance DT Swiss sont disponibles.

DVD

Mastering the Wheel: Gerd Schraner (DT Swiss) und Alex Roussel (UCI) erklären den Laufradbau in all seinen Facetten. Anleitung zum Bau von Laufrädern für Strasse, MTB, Bahn und BMX. Umfassend und verständlich für Anfänger und Profis. PC und Mac kompatibel, PAL oder NTSC Versionen verfügbar, Laufzeit 120 min.

Sprachen: Deutsch, Englisch, Französisch, Spanisch und Portugiesisch.

E

BOOK

Gerd Schraner zeigt in seinem Buch sämtliche Tricks und Kniffe, die für handgebaute, hochwertige Laufräder entscheidend sind. Das für Anfänger sowie für Profis gedachte Buch ist eine exakte Anleitung zum Bau von Laufrädern für Mountainbikes, Touren- und Rennräder.

F

F

Maîtriser la Roue: A l'atelier avec Gerd Schraner (DT Swiss) et Alex Roussel (UCI). Un cours pratique pour apprendre tout sur la roue (route, VTT, BMX). A la portée des monteurs professionnels et des amateurs. Compatible PC et Mac, disponible en version PAL ou NTSC, durée 120 min.

Langues: Allemand, Anglais, Français, Portugais, Espagnol.

I

Mastering the Wheel: Gerd Schraner (DT Swiss) e Alex Roussel (UCI) illustrano tutti i segreti riguardanti la realizzazione di una ruota, sia che si tratti di ruote MTB, su strada, su pista oppure BMX. Adatto per i principianti e i professionisti. Compatibile con PC e Mac, disponibile nella versione NTSC e PAL, durata 120 min.

Lingue: inglese, francese, tedesco, spagnolo e portoghese.

DT SWISS TUBELESS KIT

Mit dem DT Swiss Tubeless Kit verwandeln Sie Ihre DT Swiss Felge in ein Tubeless-System! Die Felge wird mittels Spezial-Klebeband gegen Luftverlust abgedichtet, eine Gummilösung dichtet den Reifen und wirkt im Falle kleinerer Einstiche selbst reparierend. Das Set besteht aus spezial Klebeband, Felgenband, Gummilösung und Ventil. Achtung: Nur für UST Tubeless-Reifen!

Kompatibilität siehe tech. Specs der Laufräder / Felgen und Seite 80.

The DT Swiss tubeless kit converts your DT Swiss rim into a tubeless system! The specially developed rim tape makes the rim airtight while the tire sealant seals the tire from the inside and automatically fixes small punctures. The set consists of tire sealant, adhesive tape, rim tape and valve. Attention: Only for UST tubeless tires!

For compatibility see tech specs wheels / rims and page 80.

Transformez vos roues DT Swiss en roues tubeless avec le DT Swiss tubeless kit. Le kit comprend: Un fond de jante étanche (flap), un kit valve spécifique, un liquide antirevaison préventif et une bande adhésive. Le flap rend la jante étanche à l'air et le liquide préventif repare les petites crevasses. Seulement pour les pneus tubeless UST!

Concernant la compatibilité voyez les spécifications techniques des roues / jantes et page 80.

Il kit tubeless DT Swiss converte il cerchio DT Swiss in un sistema tubeless! Il flap, sviluppato specificamente, rende il cerchio a tenuta d'aria mentre il lattice antiforatura sigilla il pneumatico dall'interno, riparando automaticamente piccole forature. Il set è costituito dal lattice antiforatura, dal nastro adesivo, dal flap e della valvola. Attenzione: solo per i pneumatici tubeless UST!

Per la compatibilità vedere i dati tecnici delle ruote / dei cerchi e pagina 80.

DT SWISS TUBELESS READY KIT

Das DT Swiss tubeless ready Kit macht aus einem tubeless ready Laufrad ein tubeless Laufrad. Einfach das Felgenband und das Tubeless Ventil installieren, Dichtflüssigkeit* beigeben und los geht's!

*Dichtflüssigkeit nicht inbegriffen

The DT Swiss tubeless ready kit transforms your tubeless ready wheel into a tubeless wheel. Simply install the rim tape and the tubeless valve, add some tire sealant* and off you go!

*tire sealant not included

Le DT Swiss tubeless ready kit fait d'une roue tubeless ready une roue tubeless. Il suffit d'installer le fond de jante, la valve tubeless et d'ajouter un peu de liquide préventif* et c'est parti!

*liquide préventif non inclus

Il DT Swiss tubeless ready kit trasforma ogni ruota tubeless ready in una ruota tubeless. Basta montare il nastro e la valvola tubeless e aggiungere un poco di lattice antiforatura* e si parte!

*lattice antiforatura venduto separatamente

DT SWISS TUBELESS READY TAPE

Das DT Swiss tubeless ready Tape dichtet die Felge ab und funktioniert gleichzeitig als Felgenband.

The DT Swiss tubeless ready tape seals the rim and works as a rim tape.

Le DT Swiss tubeless ready tape rend la jante étanche à l'air et sert comme fond de jante.

Il DT Swiss tubeless ready tape sigilla il cerchio e serve da nastro paranipples.

DT SWISS TUBELESS MILK

Die DT Swiss tubeless Milk dichtet tubeless ready Reifen ab und repariert kleine Einstiche automatisch.

The DT Swiss tubeless milk seals tubeless ready tires and automatically repairs small punctures.

Le liquide préventif DT Swiss tubeless milk rend les pneus tubeless ready étanches à l'air et répare les petites crevasses automatiquement.

Il lattice antiforatura DT Swiss tubeless milk sigilla i copertoni tubeless ready e ripara automaticamente le piccole forature.

CENTER LOCK® CAP

Abdeckung für Shimano Center Lock® Aufnahmen.

Cover for Shimano Center Lock® interfaces.

Protège le Center Lock® si la roue est utilisée avec des freins à jante.

Coperchio per l'interface Center Lock® Shimano.

CENTER LOCK® – IS (6-BOLT) ADAPTOR

Dieser Adapter von DT Swiss ermöglicht die Montage von Sechs-Loch Bremsscheiben auf allen Center Lock® Nabens.

- Schnelle und einfache Montage
- Nur 29.5 g ($\pm 5\%$)
- Erhältlich für QR und Steckachsabellen

With this adaptor from DT Swiss you can mount any 6 bolt rotor onto any Center Lock® hub.

- Quick and easy installation
- Lightweight at only 29.5 g ($\pm 5\%$)
- Available for QR and thru axle hubs

Grâce à cet adaptateur, vous pouvez monter n'importe quel disque à six trous sur votre moyeu Center Lock®.

- Le montage est très rapide et sûr
- Pèse seulement 29.5 g ($\pm 5\%$)
- Disponible pour moyeux QR et axe traversant

Questo adattatore DT Swiss consente di montare qualsiasi rotore a 6 bulloni su qualsiasi mozzo Center Lock®.

- Installazione rapida e veloce
- Leggero: pesa appena 29.5 g ($\pm 5\%$)
- Disponibile per mozzi QR e perno passante

CENTER LOCK LOCKRING

- für 15 mm Vorderrad-Achsen
- für 12/142 mm Hinterrad-Achsen

- for 15 mm front axles
- for 12/142 mm rear axles

- pour axes 15 mm antérieurs
- pour axes 12/142 mm postérieurs

- per perni da 15 mm anteriori
- per perni da 12/142 mm posteriori
