THE first Catalogue of the Australian Museum Library was prepared by Mr. Thos. Fielding and published in 1883, with Supplements for several succeeding years. The rapid growth of the Library, however, necessitated the preparation of an entirely new work, which has been undertaken by the Secretary and Librarian, Mr. S. Sinclair.

This Catalogue, when complete, will comprise :—

Part I.—An Alphabetical List of the Books in the Library, arranged mainly under Authors' Names.

Part II.—A more detailed List of Periodical Literature, Magazines, Proceedings of Societies, &c., arranged under places of publication.

Part III.—The Pamphlets, except those collected and bound under their respective authors, which will appear in Part I.

Parts I. and II. are ready in MS., but want of funds prevents their publication at present. Part III. forms the portion now issued.
