- 19) Ten Shillings Bradbury First Issue T10 Red De La Rue Dot in No. 5 Digit serial number issue 1914 series B/23 30179 and a scarcer type note with "P" of "POSTAGE" visible in watermark at top left above George V medallion, presentable Fine with small edge nicks and very minor pinholes to upper left, expected for the note's age. In 1914 just prior to the outbreak of World War I Lord Atterbury, Controller of H.M Stationery Office and Sir John Bradbury, the Secretary to the Treasury met at his house and they produced a design for these 10 Shillings and 1-pound notes just overnight. Due to no banknote paper available at the time except for the one in use for the White notes of Bank of England and for a rather rapid issuance of the notes simple cypher watermarked postal stamp paper was utilised. In addition to this, in order to increase the effectiveness of the productivity, a small number of notes were printed sideways at the edges of the sheets to fill the blank space resulting in another rare watermark variety known as the sideways watermark. In short, these watermark varieties are rather Rarer compared to the other notes as there would be a very limited number of them per sheet, on top of the fact that these notes are over a century old now with very few survivors seen nowadays. Therefore, this provides an exclusive window of opportunity for any collector to acquire this excellent example (£100 - £200)

These were Emergency notes issued just at the brink of World War I - Lord Atterbury, Controller of H.M Stationery Office and Sir John Bradbury, the Secretary to the Treasury met at his house and produced this design overnight. These were printed rather rapidly on simple Royal cypher and Postage watermarked postal paper with the use of different numbering machines resulting in many varieties, along with the further increase in productivity by printing extra notes sideways on the sheet's margins resulting in another variety - the sideways watermark. A very pleasing and collectible example (£300 - £500)

These 10 Shilling notes were produced as a result of the halt in production of the earlier Second issue with black serial numbers as there were widespread complaints that they were too easily confused with the 1 Pound notes of the same period. This resulted in the serial numbers being changed to red and these the last for the Bradbury issues with recorded prefixes only in 2 letters - B and C. An excellent opportunity for any collector to add a high-grade example of these George V period issues (£375 - £500)

The English Civil War was in progress when this fabulous coin was struck after Charles raised the Royal Standard in Nottingham on 22nd August 1642 he set up his court in Oxford where this spectacular piece was minted. The war against Cromwell's New Model Army dragged on until 1646 by which time Oxford was besieged with Charles escaping dressed as a servant. Charles joined the Scottish Presbyterian army but nine months later was handed over to the English Parliament after a payment of £100,000 was made. Negotiations between King and Parliament began but descended into intrigue as Charles made a secret deal with the Scots who invaded England in 1648 starting the Second Civil War. Once again Cromwell's New Model Army prevailed with Charles fleeing to Carisbrooke Castle on the Isle of Wight. Further negotiations collapsed into disarray with Parliament reducing itself to the so called Rump Parliament which eventually resulted in the trial and execution in January 1649 of Charles I (**£40000 - £60000**)
