Acer ColorBoost

Acer ColorBoost presents nature's true colors with an optimized 6-segment color-wheel design, powerful image processing, and advanced lamp illumination technology.

Acer ColorSafe II

Acer projectors featuring ColorSafe II are virtually immune to color decay, such as the yellow or green tint on images displayed by some projectors that have been used for extended periods of time. Acer projectors take advantage of DLP® technology to guarantee picture integrity despite prolonged use. Extended lifespan and consistent image quality lower total cost of ownership and translate to big savings.

Acer SpectraBoost

Acer SpectraBoost technology Provides a wider color gamut via patented color-wheel coating technology boosts color saturation an extra 30%.

Acer EcoProjection

Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 70%, from 5 W to 1 W. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
