JabloPhone is Your Solution!

JabloPhone, also known as Jablocom's **GSM Desktop Phone**, is a mobile phone that looks and functions exactly like a desktop phone.

JabloPhone enables customers to get rid of their landlines and just use their **mobile networks**. The key benefit for users is that it allows them to **reduce costs** without having to give up the benefits of landlines. Since most people find it extremely uncomfortable to have mobile phones or smartphones glued to their ears, the JabloPhone is designed in the **shape and feel of a desktop phone.**

Through leading partners such as GSM providers worldwide, both **businesses and households** use and enjoy the benefits and features of JabloPhone. In addition, the product fits the telephony needs of many **vertical industry** institutions including: hospitals, hotels, construction sites, oil fields, military bases, schools and law enforcement facilities.

Headlines

- Device settings
- SIM management
- Internet configuration
- Multilanguage support
- Lifetime support

JabloPhone

Where to use

Home Application

- Get rid of landline costs.
- Large keys are ideal for senior citizens and those with weak vision.
- Ideal for households in rural areas that typically only have mobile networks due to costs and location.

Business Application

- Quality speakerphone for critical group conference calls.
- Reduce costs associated with landline installation and maintenance.
- Call transfer from GSM to PBX, enabling organizations to drop their PSTN connection and just use JabloPhone as a full, functioning virtual switchboard allowing free intra company calls.

Vertical Application

- From office to hotels to homes, workers can take their JabloPhones wherever they need to go.
- Manage and control entire phone system through JabloTool.
- Internet connectivity and SMS capabilities allowing for all-in-one phone, SMS and data usage.
